The Collected Works of
THOMAS HOBBS

(1588-1679)

Contents

The Books

Elements of Law, Natural and Politic

Of Liberty and Necessity

Answer to Sir William Davenant's Preface before Gondibert

De Cive

Leviathan

De Corpore

Six Lessons to the Professor of Mathematics

Seven Philosophical Problems

A Dialogue between a Philosopher and a Student of the Common Laws of England

An Answer to a Book Published by Dr. Bramhall, Late Bishop of Derry

Three Papers Presented to the Royal Society Against Dr. Wallis

Ten Dialogues of Natural Philosophy

An Historical Narration concerning Hersey and the Punishment Thereof
Behemoth

The Translations

Eight Books of the Peloponnesian War

The Whole Art of Rhetoric

Translation of Homer's 'Iliad'

[Translation of Homer's 'Odyssey'](#)

[*The Poetry*](#)

[De Mirabilis Pecci, Being the Wonders of the Peak in Darby-shire](#)

[The Life of Mr. Thomas Hobbes of Malmesbury](#)

[Historia Ecclesiastica Carmine Elegiaco Concinnata](#)

[*The Autobiography*](#)

[Considerations upon the Reputation, Loyalty, Manners and Religion of Thomas Hobbes of Malmsbury](#)

The Books

Malmesbury, a market town in Wiltshire — Thomas Hobbes was born in Westport, a village in Wiltshire, immediately west of Malmesbury. Westport no longer exists as a separate village and it is not named on modern maps. The built-up area was incorporated in the borough of Malmesbury in 1934.

Malmesbury and Westport from the Ordnance Survey one-inch map, first edition, 1828

Elements of Law, Natural and Politic

Thomas Hobbes was an accomplished pupil and in 1603 he enrolled at Magdalen Hall, the predecessor college to Hertford College, Oxford, where the principal was John Wilkinson, a Puritan, who had some influence on Hobbes' early development. The pupil appears to have followed his own curriculum and he was "little attracted by the scholastic learning", completing his B.A. degree in 1608. He was recommended by Sir James Hussey, his master at Magdalen, as tutor to William, the son of William Cavendish, Baron of Hardwick and began a lifelong connection with that family.

Acting as companion to the younger William in 1610, Hobbes took part in a grand tour of Europe, where he was exposed to European scientific and critical methods, offering a notable contrast to the scholastic philosophy that he had learned in Oxford. His scholarly pursuits at the time were aimed at a careful study of classic Greek and Latin authors. In June 1628, his employer Cavendish, then the Earl of Devonshire, died of the plague and the widowed countess dismissed Hobbes.

Over the next seven years, as well as tutoring, Hobbes expanded his knowledge of philosophy, awakening in him a curiosity in key philosophic debates. He visited Florence in 1636 and was later a regular debater in philosophic groups in Paris, conducted by Marin Mersenne. When Hobbes returned to England in 1637, he found it a country riven with discontent, disrupting him from the orderly execution of his philosophic plan. However, by the end of Charles I's calling of a Short Parliament in 1640, he had completed a short treatise entitled *The Elements of Law, Natural and Politic*. It was not published and only circulated as a manuscript among his close associates. A pirated version was published ten years later.

The Elements of Law is formed of two parts: *Human Nature* and *De Corpore Politico*. It is Hobbes' first published philosophical work and was written in part as a response to the conflicts between Charles I and Parliament. The book details Hobbes' initial attempt to address political matters with deductive methods of geometry, providing a definition of sovereignty that remains central to Hobbes' later political works.

Although it appears that much of the text was written prior to the sitting of the Short Parliament, there are polemical pieces of the work that reveal the influences of the rising political crisis. Nevertheless, many of the elements of Hobbes' political thought would remain unchanged between the appearance of *The Elements of Law* and his magnum opus *Leviathan*, showing that the events of the English Civil War had little effect on his contractarian methodology.

When in November 1640 the Long Parliament succeeded the Short, Hobbes felt that he was in disfavour due to the circulation of his controversial treatise and so he fled to Paris. He would not return to England for eleven years.

Thomas Hobbes by John Michael Wright, c. 1670

CONTENTS

Dedication

PART I

Chapter 1: The General Division of Man's Natural Faculties

Chapter 2: The Cause of Sense

Chapter 3: Of Imagination and the Kinds Thereof

Chapter 4: Of the Several Kinds of Discursion of the Mind

Chapter 5: Of Names, Reasoning, and Discourse of the Tongue

Chapter 6: Of a Knowledge, Opinion and Relief

Chapter 7: Of Delight and Pain; Good and Evil

Chapter 8: Of the Pleasures of the Senses; Of Honour

Chapter 9: Of the Passions of the Mind

Chapter 10: Of the Difference Between Men In These Discerning Faculty and the Cause

Chapter 11: What Imaginations and Passions Men Have, at the Names of Things Supernatural

Chapter 12: How by Deliberation From Passions Proceed Men's Actions

Chapter 13: How by Language Men Work Upon Each Other's Minds

Chapter 14: Of the Estate and Right of Nature

Chapter 15: Of the Divesting Natural Right by Gift and Covenant

Chapter 16: Some of the Laws of Nature

Chapter 17: Other Laws of Nature

Chapter 18: A Confirmation of the Same Out of The Word of God

Chapter 19: Of the Necessity and Definition of a Body Politic

PART II

Chapter 20: Of the Requisites to the Constitution of a Commonwealth

Chapter 21: Of the Three Sorts of Commonwealth

Chapter 22: Of the Power of Masters

Chapter 23: Of the Power of Fathers, and of Patrimonial Kingdom

Chapter 24: The Incommodities of Several Sorts of Government Compared

Chapter 25: That Subjects are not Bound to Follow Their Private Judgments in Controversies of Religion

Chapter 26: That Subjects are not bound to follow the Judgment of any Authorities in Controversies of Religion which is not Dependent on the Sovereign Power

Chapter 27: Of the Causes of Rebellion

Chapter 28: Of the Duty of Them That Have Sovereign Power

Chapter 29: Of the Nature and Kinds of Laws

Dedication

To the Right Honourable William, Earl of Newcastle, Governor to the Prince his Highness, one of His Majesty's Most Honourable Privy Council

MY MOST HONOURED Lord,

From the two principal parts of our nature, Reason and Passion, have proceeded two kinds of learning, mathematical and dogmatical. The former is free from controversies and dispute, because it consisteth in comparing figures and motion only; in which things truth and the interest of men, oppose not each other. But in the later there is nothing not disputable, because it compareth men, and meddleth with their right and profit; in which as oft as reason is against a man, so oft will a man be against reason. And from hence it comes, that they who have written of justice and policy in general do all invade each other, and themselves, with contradiction. To reduce this doctrine to the rules and infallibility of reason, there is no way, but first, to put such principles down for a foundation, as passion not mistrusting may not seek to displace: And afterward to build thereon the truth of cases in the law of nature (which hitherto have been built in the air) by degrees, till the whole be inexpugnable. Now (my Lord) the principles fit for such a foundation, are those which I have heretofore acquainted your Lordship withal in private discourse; and which, by your command I have here put into method. To examine cases thereby, between sovereign and sovereign, or between sovereign and subject, I leave to them, that shall find leisure, and encouragement thereto. For my part, I present this to your Lordship, for the true, and only foundation of such science. For the style, it is therefore the worse, because whilst I was writing I consulted more with logic, than with rhetoric. But for the doctrine, it is not slightly proved; and the conclusions thereof, are of such nature, as for want of

them, government and peace have been nothing else, to this day, but mutual fear. And it would be an incomparable benefit to commonwealth, that every man held the opinions concerning law and policy, here delivered. The ambition therefore of this book, in seeking by your Lordship's countenance, to insinuate itself with those whom the matter it containeth most nearly concerneth, is to be excused. For myself, I desire no greater honour, than I enjoy already in your Lordship's known favour; unless it be, that you would be pleased in continuance thereof, to give me more exercise in your commands; which, as I am bound by your many great favours, I shall obey, being

My most honoured Lord

Your Lordship's most humble and obliged Servant

Thomas Hobbes

PART I

Chapter 1: The General Division of Man's Natural Faculties

1. THE TRUE and perspicuous explication of the Elements of Laws, Natural and Politic, which is my present scope, dependeth upon the knowledge of what is human nature, what is a body politic, and what it is we call a law. Concerning which points, as the writings of men from antiquity downward have still increased, so also have the doubts and controversies concerning the same, and seeing that true knowledge begetteth not doubt, nor controversy, but knowledge; it is manifest from the present controversies, that they which have heretofore written thereof, have not well understood their own subject.

2. Harm I can do none though I err no less than they. For I shall leave men but as they are in doubt and dispute. But intending not to take any principle upon trust, but only to put men in mind what they know already, or may know by their own experience, I hope to err the less; and when I do, it must proceed from too hasty concluding, which I will endeavour as much as I can to avoid.

3. On the other side, if reasoning aright I win not consent (which may very easily happen) from them that being confident of their own knowledge weigh not what is said, the fault is not mine but theirs. For as it is my part to show my reasons, so it is theirs to bring attention.

4. Man's nature is the sum of his natural faculties and powers, as the faculties of nutrition, motion, generation, sense, reason, &c. For these powers we do unanimously call natural, and are contained in the definition of man, under these words, animal and rational.

5. According to the two principal parts of man, I divide his faculties into two sorts, faculties of the body, and faculties of the mind.

6. Since the minute and distinct anatomy of the powers of the body is nothing necessary to the present purpose, I will only sum them up into these three heads,

power nutritive, power motive, and power generative.

7. Of the powers of the mind there be two sorts, cognitive or imaginative or conceptive; and motive. And first of the cognitive.

8. For the understanding of what I mean by the power cognitive, we must remember and acknowledge that there be in our minds continually certain images or conceptions of the things without us, insomuch that if a man could be alive, and all the rest of the world annihilated, he should nevertheless retain the image thereof, and of all those things which he had before seen and perceived in it; every man by his own experience knowing that the absence or destruction of things once imagined, doth not cause the absence or destruction of the imagination itself. This imagery and representations of the qualities of things without us is that we call our cognition, imagination, ideas, notice, conception, or knowledge of them. And the faculty, or power, by which we are capable of such knowledge, is that I here call power cognitive, or conceptive, the power of knowing or conceiving.

Chapter 2: The Cause of Sense

1. HAVING DECLARED what I mean by the word conception, and other words equivalent thereunto, I come to the conceptions themselves, to show their difference, their causes, and the manner of their production as far as is necessary for this place.

2. Originally all conceptions proceed from the actions of the thing itself, whereof it is the conception. Now when the action is present, the conception it produceth is called SENSE, and the thing by whose action the same is produced is called the OBJECT of sense.

3. By our several organs we have several conceptions of several qualities in the objects; for by sight we have a conception or image composed of colour or figure, which is all the notice and knowledge the object imparteth to us of its nature by the eye. By hearing we have a conception called sound, which is all the knowledge we have of the quality of the object from the ear. And so the rest of the senses also are conceptions of several qualities, or natures of their objects.

4. Because the image in vision consisting in colour and shape is the knowledge we have of the qualities of the object of that sense; it is no hard matter for a man to fall into this opinion, that the same colour and shape are the very qualities themselves; and for the same cause, that sound and noise are the qualities of the bell, or of the air. And this opinion hath been so long received, that the contrary must needs appear a great paradox; and yet the introduction of species visible and intelligible (which is necessary for the maintenance of that opinion) passing to and fro from the object, is worse than any paradox, as being a plain impossibility. I shall therefore endeavour to make plain these four points:

(1) That the subject wherein colour and image are inherent, is not the object or thing seen.

(2) That that is nothing without us really which we call an image or colour.

(3) That the said image or colour is but an apparition unto us of that motion, agitation, or alteration, which the object worketh in the brain or spirits, or some internal substance of the head.

(4) That as in conception by vision, so also in the conceptions that arise from other senses, the subject of their inherence is not the object, but the sentient.

5. Every man hath so much experience as to have seen the sun and other visible objects by reJection in the water and in glasses, and this alone is sufficient for this conclusion: that colour and image may be there where the thing seen is not. But because it may be said that notwithstanding the image in the water be not in the object, but a thing merely phantastical, yet there may be colour really in the thing itself; I will urge further this experience: that divers times men see directly the same object double, as two candles for one, which may happen by distemper, or otherwise without distemper if a man will, the organs being either in their right temper, or equally distempered. The colours and figures in two such images of the same thing cannot be inherent both therein, because the thing seen cannot be in two places: one of these images thereof is not inherent in the object. But seeing the organs of sight are then in equal temper or equal distemper, the one of them is no more inherent than the other, and consequently neither of them both are in the object; which is the first proposition mentioned in the precedent section.

6. Secondly, that the image of any thing seen by reJection in glass or water or the like, is not any thing in or behind the glass, or in or under the water, every man may prove to himself; which is the second proposition.

7. For the third, we are to consider first, that upon every great agitation or concussion of the brain, as it happeneth from a stroke, especially if the stroke be upon the eye, whereby the optic nerve suffereth any great violence, there appeareth before the eyes a certain light, which light is nothing without, but an apparition only, all that is real being the concussion or motion of the parts of that nerve. From which experience we may conclude, that apparition of light without, is really nothing but motion within. If therefore from lucid bodies there can be

derived motion, so as to affect the optic nerve in such manner as is proper thereunto, there will follow an image of light somewhere in that line by which the motion was last derived unto the eye; that is to say, in the object, if we look directly on it, and in the glass or water, when we look upon it in the line of reJection, which in effect is the third proposition, namely, That image and colour is but an apparition unto us of that motion, agitation, or alteration, which the object worketh in the brain, or spirits, or some internal substance in the head.

8. But that from all lucid, shining and illuminated bodies, there is a motion produced to the eye, and, through the eye, to the optic nerve, and so into the brain, by which that apparition of light or colour is effected, is not hard to prove. And first, it is evident that the fire, the only lucid body here on earth, worketh by motion equally every way; insomuch as the motion thereof stopped or inclosed, it is presently extinguished, and no more fire. And farther, that that motion, whereby the fire worketh, is dilatation, and contraction of itself alternately, commonly called scintillation or glowing, is manifest also by experience. From such motion in the fire must needs arise a rejection or casting from itself of that part of the medium which is contiguous to it, whereby that part also rejecteth the next, and so successively one part beateth back the other to the very eye; and in the same manner the exterior part of the eye (the laws of refraction still observed) presseth the interior. Now the interior coat of the eye is nothing else but a piece of the optic nerve, and therefore the motion is still continued thereby into the brain, and by resistance or reaction of the brain, is also a rebound in the optic nerve again, which we not conceiving as motion or rebound from within, think it is without, and call it light; as hath been already shewed by the experience of a stroke. We have no reason to doubt, that the fountain of light, the sun, worketh any other wise than the fire, at least in this matter, and thus all vision hath its original from such motion as is here described. For where there is no light, there is no sight; and therefore colour also must be the same thing with light, as being the effect of lucid bodies: their difference being only this, that when the light cometh directly from the fountain to the eye, or indirectly by reflection from clean and polite

bodies, and such as have no particular motion internal to alter it, we call it light. But when it cometh to the eyes by reflection from uneven, rough, and coarse bodies, or such as are affected with internal motion of their own, that may alter it, then we call it colour; colour and light differing only in this, that the one is pure, the other a perturbed light. By that which hath been said, not only the truth of the third proposition, but also the whole manner of producing light and colour, is apparent.

9. As colour is not inherent in the object, but an effect thereof upon us, caused by such motion in the object, as hath been described: so neither is sound in the thing we hear, but in ourselves. One manifest sign thereof is: that as a man may see, so also he may hear double or treble, by multiplication of echoes, which echoes are sounds as well as the original; and not being in one and the same place, cannot be inherent in the body that maketh them. Nothing can make any thing in itself: the clapper hath not sound in it, but motion, and maketh motion in the internal parts of the bell so the bell hath motion, and not sound. That imparteth motion to the air; and the air hath motion, but not sound. The air imparteth motion by the ear and nerves to the brain; and the brain hath motion but not sound. From the brain it reboundeth back into the nerves outward, and thence it becometh an apparition without, which we call sound. And to proceed to the rest of the senses, it is apparent enough, that the smell and taste of the same thing, are not the same to every man, and therefore are not in the thing smelt or tasted, but in the men. So likewise the heat we feel from the fire is manifestly in us, and is quite different from the heat that is in the fire. For our heat is pleasure or pain, according as it is extreme or moderate; but in the coal there is no such thing. By this the fourth and last of the propositions is proved (*viz.*) That as in conception by vision, so also in the conceptions that arise from other senses, the subject of their inherence is not the object, but the sentient.

10. And from thence also it followeth, that whatsoever accidents or qualities our senses make us think there be in the world, they are not there, but are seemings and apparitions only. The things that really are in the world without us,

are those motions by which these seemings are caused. And this is the great deception of sense, which also is by sense to be corrected. For as sense telleth me, when I see directly, that the colour seemeth to be in the object; so also sense telleth me, when I see by reflection, that colour is not in the object.

Chapter 3: Of Imagination and the Kinds Thereof

1. AS STANDING water put into motion by the stroke of a stone, or blast of wind, doth not presently give over moving as soon as the wind ceaseth, or the stone settleth: so neither doth the effect cease which the object hath wrought upon the brain, so soon as ever by turning aside of the organ the object ceaseth to work; that is to say, though the sense be past, the image or conception remaineth; but more obscurely while we are awake, because some object or other continually plieth and soliciteth our eyes, and ears, keeping the mind in a stronger motion, whereby the weaker doth not easily appear. And this obscure conception is that we call PHANTASY or IMAGINATION: imagination being (to define it) conception remaining, and by little and little decaying from and after the act of sense.

2. But when present sense is not, as in SLEEP, there the images remaining after sense (when there be any) as in dreams, are not obscure, but strong and clear, as in sense itself. The reason IS, because that which obscured and made the conceptions weak, namely sense, and present operation of the objects, is removed. For sleep is the privation of the act of sense, (the power remaining) and dreams are the imaginations of them that sleep.

3. The causes of DREAMS (if they be natural) are the actions or violence of the inward parts of a man upon his brain, by which the passages of sense, by sleep benumbed, are restored to their motion. The signs by which this appeareth to be so, are the differences of dreams proceeding from the different accidents of man's body. Old men being commonly less healthful and less free from inward pains, are thereby more subject to dreams, especially such dreams as be painful: as dreams of lust, or dreams of anger, according as the heart, or other parts within, work more or less upon the brain, by more or less heat. So also the descent of

different sorts of phlegm maketh one to dream of different tastes of meats or drinks. And I believe there is a reciprocation of motion from the brain to the vital parts, and back from the vital parts to the brain; whereby not only imagination begetteth motion in those parts; but also motion in those parts begetteth imagination like to that by which it was begotten. If this be true, and that sad imaginations nourish the spleen, then we see also a cause, why a strong spleen reciprocally causeth fearful dreams. And why the effects of lasciviousness may in a dream produce the image of some person that hath caused them. If it were well observed, whether the image of the person in a dream be as obedient to the accidental heat of him that dreameth, as waking his heat is to the person, and if so, then is such motion reciprocal. Another sign that dreams are caused by the action of the inward parts, is the disorder and casual consequence of one conception or image to another: for when we are waking, the antecedent thought or conception introduceth, and is cause of the consequent, as the water followeth a man's finger upon a dry and level table. But in dreams there is commonly no coherence (and when there is, it is by chance), which must proceed from this, that the brain in dreams is not restored to its motion in every part alike; whereby it cometh to pass, that our thoughts appear like the stars between the flying clouds, not in the order which a man would choose to observe them in, but as the uncertain flight of broken clouds permit.

4. As when the water, or any liquid thing moved at once by divers movements, receiveth one motion compounded of them all; so also the brain or spirits therein, having been stirred by divers objects, composeth an imagination of divers conceptions that appeared singly to the sense. As for example, the sense sheweth us at one time the figure of a mountain, and at another time the colour of gold; but the imagination afterwards hath them both at once in a golden mountain. From the same cause it is, there appear unto us castles in the air, chimeras, and other monsters which are not in rerum natura, but have been conceived by the sense in pieces at several times. And this composition is that which we commonly call FICTION of the mind.

5. There is yet another kind of. imagination, which for clearness contendeth with sense, as well as a dream; and that is, when the action of sense hath been long or vehement: and the experience thereof is more frequent in the sense of seeing, than the rest. An example whereof is, the image remaining before the eye after a steadfast looking upon the sun. Also, those little images that appear before the eyes in the dark (whereof I think every man hath experience, but they most of all, that are timorous or superstitious) are examples of the same. And these, for distinction sake, may be called PHANTASMS.

6. By the senses (which are numbered according to the organs to be five) we take notice (as hath been said already) of the objects without us; and that notice is our conception thereof: but we take notice also some way or other of our conceptions. For when the conception of the same thing cometh again, we take notice that it is again; that is to say, that we have had the same conception before; which is as much as to imagine a thing past; which is impossible to sense, which is only of things present. This therefore may be accounted a sixth sense, but internal, not external, as the rest, and is commonly called REMEMBRANCE.

7. For the manner by which we take notice of a conception past, we are to remember, that in the definition of imagination, it is said to be a conception by little and little decaying, or growing more obscure. An obscure conception is that which representeth the whole object together, but none of the smaller parts by themselves; and as more or fewer parts be represented, so is the conception or representation said to be more or less clear. Seeing then the conception, which when it was first produced by sense, was clear, and represented the parts of the object distinctly; and when it cometh again is obscure, we find missing somewhat that we expected; by which we judge it past and decayed. For example, a man that is present in a foreign city, seeth not only whole streets, but can also distinguish particular houses, and parts of houses; departed thence, he cannot distinguish them so particularly in his mind as he did, some house or turning escaping him; yet is this to remember the city; when afterwards there escapeth him more particulars, this is also to remember, but not so well. In process of time, the image

of the city returneth, but as of a mass of building only, which is almost to have forgotten it. Seeing then remembrance is more or less, as we find more or less obscurity, why may not we well think remembrance to be nothing else but the missing of parts, which every man expecteth should succeed after they have a conception of the whole? To see at great distance of place, and to remember at great distance of time, is to have like conceptions of the thing: for there wanteth distinction of parts in both; the one conception being weak by operation at distance, the other by decay.

8. And from this that hath been said, there followeth, that a man can never know he dreameth; he may dream he doubteth, whether it be a DREAM or no: but the clearness of the imagination representeth every thing with as many parts as doth sense itself, and consequently, he can take notice of nothing but as present; whereas to think he dreameth, is to think those his conceptions past, that is to say, obscurer than they were in the sense: so that he must think them both as clear, and not as clear as sense; which is impossible.

9. From the same ground it proceedeth, that men wonder not in their dreams at places and persons, as they would do waking: for waking, a man would think it strange to be in a place wherein he never was before, and remember nothing of how he came there. But in a dream, there cometh little of that kind into consideration. The clearness of conception in a dream, taketh away distrust, unless the strangeness be excessive, as to think himself fallen from on high without hurt, and then most commonly he awaketh.

10. Nor is it impossible for a man to be so far deceived, as when his dream is past, to think it real: for if he dream of such things as are ordinarily in his mind, and in such order as he useth to do waking, and withal that he laid him down to sleep in the place where he findeth himself when he awaketh (all which may happen) I know no Kritirion or mark by which he can discern whether it were a dream or not, and do therefore the less wonder to hear a man sometimes to tell his dream for a truth, or to take it for a vision.

Chapter 4: Of the Several Kinds of Discursion of the Mind

1. THE SUCCESSION of conceptions in the mind, their series or consequence of one after another, may be casual and incoherent, as in dreams for the most part; and it may be orderly, as when the former thought introduceth the latter; and this is discourse of the mind. But because the word discourse is commonly taken for the coherence and consequence of words, I will (to avoid equivocation) call it DISCURSION.

2. The cause of the coherence or consequence of one conception to another, is their first coherence, or consequence at that time when they were produced by sense. As for example: from St. Andrew the mind runneth to St. Peter, because their names are read together; from St. Peter to a stone, for the same cause; from stone to foundation, because we see them together; and for the same cause, from foundation to church, from church to people, and from people to tumult. And according to this example, the mind may run almost from any thing to any thing. But as to the sense the conception of cause and effect succeed one another. so may they after sense in the imagination. And for the most part they do so. The cause whereof is the appetite of them, who, having a conception of the end, have next unto it a conception of the next means to that end. As when a man, from the thought of honour to which he hath an appetite, cometh to the thought of wisdom, which is the next means thereto; and from thence to the thought of study, which is the next means to wisdom, etc.

3. To omit that kind of discursion by which we proceed from any thing to any thing, there are of the other kind divers sorts. As first in the senses: there are certain coherences of conceptions, which we may call RANGING. Examples whereof are: a man's casting his eye upon the ground, to look about for some

small thing lost; the hounds casting about at a fault in hunting; and the ranging of spaniels. And herein we take a beginning arbitrarily.

4. Another sort of discursion is, when the appetite giveth a man his beginning, as in the example before adduced: where honour, to which a man hath appetite, maketh him to think upon the next means of attaining it, and that again of the next, &c. And this the Latins call *sagacitas*, SAGACITY, and we may call it hunting or tracing, as dogs trace the beast by the smell, and men hunt them by their footsteps; or as men hunt after riches, place, or knowledge.

5. There is yet another kind of discursion beginning with appetite to recover something lost, proceeding from the present backward, from the thought of the place where we miss it, to the thought of the place from whence we came last; and from the thought of that, to the thought of a place before, till we have in our mind some place, wherein we had the thing we miss: and this is called REMINISCENCE.

6. The remembrance of the succession of one thing to another, that is, of what was antecedent, and what consequent, and what concomitant, is called an EXPERIMENT; whether the same be made by us voluntarily, as when a man putteth any thing into the fire, to see what effect the fire will produce upon it; or not made by us, as when we remember a fair morning after a red evening. To have had many experiments, is that we call EXPERIENCE, which is nothing else but remembrance of what antecedents have been followed with what consequents.

7. No man can have in his mind a conception of the future, for the future is not yet. But of our conceptions of the past, we make a future; or rather, call past, future relatively. Thus after a man hath been accustomed to see like antecedents followed by like consequents, whensoever he seeth the like come to pass to any thing he had seen before, he looks there should follow it the same that followed then. As for example: because a man hath often seen offences followed by punishment, when he seeth an offence in present, he thinketh punishment to be consequent thereto. But consequent unto that which is present, men call future.

And thus we make remembrance to be prevision or conjecture of things to come, or EXPECTATION or PRESUMPTION of the future.

8. In the same manner, if a man seeth in present that which he hath seen before, he thinks that that which was antecedent to what he saw before, is also antecedent to that he presently seeth. As for example: he that hath seen the ashes remain after the fire, and now again seeth ashes, concludeth again there hath been fire. And this is called CONJECTURE of the past, or presumption of fact.

9. When a man hath so often observed like antecedents to be followed by like consequents, that whensoever he seeth the antecedent, he looketh again for the consequent; or when he seeth the consequent, he maketh account there hath been the like antecedent; then he calleth both the antecedent and the consequent, SIGNS one of another, as clouds are a sign of rain to come, and rain of clouds past.

10. This taking of signs from experience, is that wherein men do ordinarily think, the difference stands between man and man in wisdom, by which they commonly understand a man's whole ability or power cognitive. But this is an error; for these signs are but conjectural; and according as they have often or seldom failed, so their assurance is more or less; but never full and evident; for though a man hath always seen the day and night to follow one another hitherto; yet can he not thence conclude they shall do so, or that they have done so eternally. Experience concludeth nothing universally. If the signs hit twenty times for once missing, a man may lay a wager of twenty to one of the event; but may not conclude it for a truth. But by this it is plain, that they shall conjecture best, that have most experience: because they have most signs to conjecture by; which is the reason that old men are more prudent, that is, conjecture better, caeteris paribus, than young. For, being older, they remember more; and experience is but remembrance. And men of quick imagination, caeteris paribus, are more prudent than those whose imaginations are slow: for they observe more in less time. And PRUDENCE is nothing else but conjecture from experience, or taking signs of

experience warily, that is, that the experiments from which one taketh such signs be all remembered; for else the cases are not alike, that seem so.

11. As in conjectural things concerning past and future, it is prudence to conclude from experience, what is likely to come to pass, or to have passed already; so is it an error to conclude from it, that is so or so called. That is to say, we cannot from experience conclude, that any thing is to be called just or unjust, true or false, nor any proposition universal whatsoever, except it be from remembrance of the use of names imposed arbitrarily by men. For example: to have heard a sentence given (in the like case the like sentence a thousand times) is not enough to conclude that the sentence is just (though most men have no other means to conclude by); but it is necessary, for the drawing of such conclusion, to trace and find out, by many experiences, what men do mean by calling things just and unjust, and the like. Farther, there is another caveat to be taken in concluding by experience, from the tenth section of the second chapter., that is, that we conclude not such things to be without, that are within us.

Chapter 5: Of Names, Reasoning, and Discourse of the Tongue

1. SEEING THE succession of conceptions in the mind are caused (as hath been said before) by the succession they had one to another when they were produced by the senses; and that there is no conception that hath not been produced immediately before or after innumerable others, by the innumerable acts of sense; it must needs follow, that one conception followeth not another, according to our election, and the need we have of them, but as it chanceth us to hear or see such things as shall bring them to our mind. The experience we have hereof, is in such brute beasts, which, having the providence to hide the remains and superfluity of their meat, do nevertheless want the remembrance of the place where they hid it, and thereby make no benefit thereof in their hunger. But man, who in this point beginneth to advance himself above the nature of beasts, hath observed and remembered the cause of this defect, and to amend the same, hath imagined and devised to set up a visible or other sensible mark, the which when he seeth again, may bring to his mind the thought he had when he set it up. A MARK therefore is a sensible object which a man erecteth voluntarily to himself, to the end to remember thereby somewhat past, when the same is objected to his sense again. As men that have passed by a rock at sea, set up some mark, whereby to remember their former danger, and avoid it.

2. In the number of these marks, are those human voices (which we call the names or appellations of things) sensible to the ear, by which we recall into our mind some conceptions of the things to which we give those names or appellations. As the appellation white bringeth to remembrance the quality of such objects as produce that colour or conception in us. A NAME or

APPELLATION therefore is the voice of a man, arbitrarily imposed, for a mark to bring to his mind some conception concerning the thing on which it is imposed.

3. Things named, are either the objects themselves, as man; or the conception itself that we have of man, as shape or motion; or some privation, which is when we conceive that there is something which we conceive, not in him. As when we conceive he is not just, not finite, we give him the name of unjust and infinite, which signify privation or defect either in the thing named, or in us that give the name. And to the privations themselves we give the names injustice and infiniteness. So that here be two sorts of names: one of things, in which we conceive something, or of the conceptions themselves, which are called POSITIVE; the other of things wherein we conceive privation or defect, and those names are called PRIVATIVE.

4. By the advantage of names it is that we are capable of science, which beasts, for want of them, are not; nor man, without the use of them: for as a beast misseeth not one or two out of her many young ones, for want of those names of order, one, two, three, &c., which we call number; so neither would a man, without repeating orally, or mentally, the words of number, know how many pieces of money or other things lie before him.

5. Seeing there be many conceptions of one and the same thing, and for every several conception we give it a several name; it followeth that for one and the same thing, we have many names or attributes; as to the same man we give the appellations of just, valiant, &c., for divers virtues, and of strong, comely, &c., for divers qualities of the body. And again, because from divers things we receive like conceptions, many things must needs have the same appellation. As to all things we see, we give the same name of visible; and to all things we see moved, we give the appellation of moveable. And those names we give to many, are called UNIVERSAL to them all; as the name man to every particular of mankind: such appellations as we give to one only thing, are called individual, or SINGULAR; as Socrates, and other proper names; or, by circumlocution, as: he that writ the Iliad, for Homer.

6. This universality of one name to many things, hath been the cause that men think that the things themselves are universal. And do seriously contend, that besides Peter and John, and all the rest of the men that are, have been, or shall be in the world, there is yet somewhat else that we call man, (viz.) man in general, deceiving themselves by taking the universal, or general appellation, for the thing it signifieth. For if one should desire the painter to make him the picture of a man, which is as much as to say, of a man in general; he meaneth no more, but that the painter shall choose what man he pleaseth to draw, which must needs be some of them that are, have been, or may be, none of which are universal. But when he would have him to draw the picture of the king, or any particular person, he limiteth the painter to that one person himself chooseth. It is plain therefore, that there is nothing universal but names; which are therefore also called indefinite; because we limit them not ourselves, but leave them to be applied by the hearer: whereas a singular name is limited or restrained to one of the many things it signifieth; as when we say, this man, pointing to him, or giving him his proper name, or by some such other way.

7. The appellations that be universal, and common to many things, are not always given to all the particulars, (as they ought to be) for like conceptions and considerations in them all; which is the cause that many of them are not of constant signification, but bring into our minds other thoughts than those for which they were ordained. And these are called EQUIVOCAL. As for example, the word faith sometimes signifieth the same with belief; sometimes it signifieth particularly that belief which maketh a Christian; and sometimes it signifieth the keeping of a promise. Also all metaphors are (by profession) equivocal. And there is scarce any word that is not made equivocal by divers contextures of speech, or by diversity of pronunciation and gesture.

8. This equivocation of names maketh it difficult to recover those conceptions for which the name was ordained; and that not only in the language of other men, wherein we are to consider the drift, and occasion, and contexture of the speech, as well as the words themselves; but also in our own discourse, which being

derived from the custom and common use of speech, representeth not unto us our own conceptions. It is therefore a great ability in a man, out of the words, contexture, and other circumstances of language, to deliver himself from equivocation, and to find out the true meaning of what is said: and this is it we call UNDERSTANDING.

9. Of two appellations, by the help of this little verb is, or something equivalent, we make an AFFIRMATION or NEGATION, either of which in the Schools we call also a proposition, and consisteth of two appellations joined together by the said verb is: as for example, this is a proposition: man is a living creature; or this: man is not righteous; whereof the former is called an affirmation, because the appellation living creature is positive; the latter a negation, because not righteous is privative.

10. In every proposition, be it affirmative or negative, the latter appellation either comprehendeth the former, as in this proposition, charity is a virtue, the name of virtue comprehendeth the name of charity (and many other virtues besides), and then is the proposition said to be TRUE or TRUTH: for, truth, and a true proposition, is all one. Or else the latter appellation comprehendeth not the former; as in this proposition, every man is just, the name of just comprehendeth not every man; for unjust is the name of the far greater part of men. And then the proposition is said to be FALSE, or falsity: falsity and a false proposition being the same thing.

11. In what manner of two propositions, whether both affirmative, or one affirmative, the other negative, is made a SYLLOGISM, I forbear to write. All this that hath been said of names or propositions, though necessary, is but dry discourse: and this place is not for the whole art of logic, which if I enter further into, I ought to pursue: besides, it is not needful; for there be few men which have not so much natural logic, as thereby to discern well enough, whether any conclusion I shall hereafter make, in this discourse, be well or ill collected: only thus much I say in this place, that making of syllogisms is that we call RATIOCINATION or reasoning.

12. Now when a man reasoneth from principles that are found indubitable by experience, all deceptions of sense and equivocation of words avoided, the conclusion he maketh is said to be according to right reason; but when from his conclusion a man may, by good ratiocination, derive that which is contradictory to any evident truth whatsoever, then is he said to have concluded against reason: and such a conclusion is called absurdity.

13. As the invention of names hath been necessary for the drawing of men out of ignorance, by calling to their remembrance the necessary coherence of one conception to another; so also hath it on the other side precipitated men into error: insomuch, that whereas by the benefit of words and ratiocination they exceed brute beasts in knowledge; by the inconveniences that accompany the same they exceed them also in errors. For true and false are things not incident to beasts, because they adhere to propositions and language; nor have they ratiocination, whereby to multiply one untruth by another.. as men have.

14. It is the nature almost of every corporeal thing, being often moved in one and the same manner, to receive continually a greater and greater easiness and aptitude to the same motion; insomuch as in time the same becometh so habitual, that to beget it, there needs no more than to begin it. The passions of man, as they are the beginning of all his voluntary motions, so are they the beginning of speech, which is the motion of his tongue. And men desiring to shew others the knowledge, opinions, conceptions, and passions which are within themselves, and to that end. having invented language, have by that means transferred all that discursion of their mind mentioned in the former chapter, by the motion of their tongues, into discourse of words; and *ratio*, now, is but *oratio*, for the most part, wherein custom hath so great a power, that the mind suggesteth only the first word, the rest follow habitually, and are not followed by the mind. As it is with beggars, when they say their paternoster, putting together such words, and in such manner, as in their education they have learned from their nurses, from their companions, or from their teachers, having no images or conceptions in their minds answering to the words they speak. And as they have learned themselves,

so they teach posterity. Now, if we consider the power of those deceptions of sense, mentioned chapter 11 section 10, and also how unconstantly names have been settled, and how subject they are to equivocation, and how diversified by passion, (scarce two men agreeing what is to be called good, and what evil; what liberality, what prodigality; what valour, what temerity) and how subject men are to paralogism or fallacy in reasoning, I may in a manner conclude, that it is impossible to rectify so many errors of any one man, as must needs proceed from those causes, without beginning anew from the very first grounds of all our knowledge, sense; and, instead of books, reading over orderly one's own conceptions: in which meaning I take *nosce teipsum* for a precept worthy the reputation it hath gotten.

Chapter 6: Of a Knowledge, Opinion and Relief

1. THERE IS a story somewhere, of one that pretended to have been miraculously cured of blindness, wherewith he was born, by St. Alban or other St., at the town of St. Alban's; and that the Duke of Gloucester being there, to be satisfied of the truth of the miracle, asked the man, What colour is this? who, by answering, It is green, discovered himself, and was punished for a counterfeit: for though by his sight newly received he might distinguish between green, and red, and all other colours, as well as any that should interrogate him, yet he could not possibly know at first sight, which of them was called green, or red, or by other name. By this we may understand, there be two sorts of knowledge, whereof the one is nothing else but sense, or knowledge original (as I have said at the beginning of the second chapter), and remembrance of the same; the other is called science or knowledge of the truth of propositions, and how things are called, and is derived from understanding. Both of these sorts are but experience; the former being the experience of the effects of things that work upon us from without; and the latter the experience men have of the proper use of names in language. And all experience being (as I have said) but remembrance, all knowledge is remembrance: and of the former, the register we keep in books, is called history. but the registers of the latter are called the sciences.

2. There are two things necessarily implied in this word knowledge; the one is truth, the other evidence; for what is not true, can never be known. For let a man say he knoweth a thing never so well, if the same shall afterwards appear to be false, he is driven to a confession, that it was not knowledge, but opinion. Likewise, if the truth be not evident, though a man holdeth it, yet is his knowledge of it no more than theirs that hold the contrary. For if truth were enough to make it knowledge, all truths were known: which is not so.

3. What truth is, hath been defined in the precedent chapter; what evidence is, I now set down. And it is the concomitance of a man's conception with the words that signify such conception in the act of ratiocination. For when a man reasoneth with his lips only, to which the mind suggesteth only the beginning, and followeth not the words of his mouth with the conceptions of his mind, out of a custom of so speaking; though he begin his ratiocination with true propositions, and proceed with perfect syllogisms, and thereby make always true conclusions; yet are not his conclusions evident to him, for want of the concomitance of conception with his words. For if the words alone were sufficient, a parrot might be taught as well to know a truth, as to speak it. Evidence is to truth, as the sap is to the tree, which so far as it creepeth along with the body and branches, keepeth them alive; when it forsaketh them, they die. For this evidence, which is meaning with our words, is the life of truth; without it truth is nothing worth.

4. Knowledge, therefore, which we call SCIENCE, I define to be evidence of truth, from some beginning or principle of sense. For the truth of a proposition is never evident, until we conceive the meaning of the words or terms whereof it consisteth, which are always conceptions of the mind; nor can we remember those conceptions, without the thing that produced the same by our senses. The first principle of knowledge therefore is, that We have such and such conceptions; the second, that we have thus and thus named the things whereof they are conceptions; the third is, that we have joined those names in such manner, as to make true propositions; the fourth and last is, that we have joined those propositions in such manner as they be concluding. And by these four steps the conclusion is known and evident, and the truth of the conclusion said to be known. And of these two kinds of knowledge, whereof the former is experience of fact, and the latter evidence of truth: as the former, if it be great, is called prudence, so the latter, if it be much, hath usually been called, both by ancient and modern writers, SAPIENCE or wisdom: and of this latter, man only is capable; of the former, brute beasts also participate.

5. A proposition is said to be supposed, when, being not evident, it is nevertheless admitted for a time, to the end, that joining to it other propositions, we may conclude something; and so proceed from conclusion to conclusion, for a trial whether the same will lead us into any absurd or impossible conclusion; which if it do, then we know such supposition to have been false.

6. But if running through many conclusions, we come to none that are absurd, then we think the supposition probable; likewise we think probable whatsoever proposition we admit for truth by error of reasoning, or from trusting to other men. And all such propositions as are admitted by trust or error, we are not said to know, but think them to be true: and the admittance of them is called OPINION.

7. And particularly, when the opinion is admitted out of trust to other men, they are said to believe it; and their admittance of it is called BELIEF, and sometimes faith.

8. It is either science or opinion which we commonly mean by the word conscience: for men say that such and such a thing is true upon, or in their consciences; which they never do, when they think it doubtful; and therefore they know, or think they know it to be true. But men, when they say things upon their conscience, are not therefore presumed certainly to know the truth of what they say. It remaineth then, that that word is used by them that have an opinion, not only of the truth of the thing, but also of their knowledge of it. So that conscience, as men commonly use the word, signifieth an opinion, not so much of the truth of the proposition, as of their own knowledge of it, to which the truth of the proposition is consequent. CONSCIENCE therefore I define to be opinion of evidence.

9. Belief, which is the admitting of propositions upon trust, in many cases is no less free from doubt, than perfect and manifest knowledge. For as there is nothing whereof there is not some cause; so, when there is doubt, there must be some cause thereof conceived. Now there be many things which we receive from report of others, of which it is impossible to imagine any cause of doubt: for what can be opposed against the consent of all men, in things they can know, and have no

cause to report otherwise than they are (such as is a great part of our histories), unless a man would say that all the world had conspired to deceive him. And thus much of sense, imagination, discursion, ratiocination, and knowledge, which are the acts of our power cognitive, or conceptive. That power of the mind which we call motive, differeth from the power motive of the body. for the power motive of the body is that by which it moveth other bodies, which we call strength: but the power motive of the mind, is that by which the mind giveth animal motion to that body wherein it existeth; the acts hereof are our affections and passions, of which I am now to speak.

Chapter 7: Of Delight and Pain; Good and Evil

1. IN THE eighth section of the second chapter is shewed, how conceptions or apparitions are nothing really, but motion in some internal substance of the head; which motion not stopping there, but proceeding to the heart, of necessity must there either help or hinder that motion which is called vital; when it helpeth, it is called DELIGHT, contentment, or pleasure, which is nothing really but motion about the heart, as conception is nothing but motion within the head; and the objects that cause it are called pleasant or delightful, or by some name equivalent; the Latins have *jucunda*, a *juvando*, from helping; and the same delight, with reference to the object, is called LOVE: but when such motion weakeneth or hindereth the vital motion, then it is called PAIN; and in relation to that which causeth it, HATRED, which the Latin expresseth sometimes by *odium*, and sometimes by *taedium*.

2. This motion, in which consisteth pleasure or pain, is also a solicitation or provocation either to draw near to the thing that pleaseth, or to retire from the thing that displeaseth. And this solicitation is the endeavour or internal beginning of animal motion, which when the object delighteth, is called APPETITE; when it displeaseth, it is called AVERSION, in respect of the displeasure present; but in respect of the displeasure expected, FEAR. So that pleasure, love, and appetite, which is also called desire, are divers names for divers considerations of the same thing.

3. Every man, for his own part, calleth that which pleaseth, and is delightful to himself, GOOD; and that EVIL which displeaseth him: insomuch that while every man differeth from other in constitution, they differ also one from another concerning the common distinction of good and evil. Nor is there any such thing as *agathon aplox*, that is to say, simply good. For even the goodness which we

attribute to God Almighty, is his goodness to us. And as we call good and evil the things that please and displease; so call we goodness and badness, the qualities or powers whereby they do it. And the signs of that goodness are called by the Latins in one word PULCHRITUDO, and the signs of evil, TURPITUDO; to which we have no words precisely answerable.

4. As all conceptions we have immediately by the sense, are delight, or pain, or appetite, or fear; so are also the imaginations after sense. But as they are weaker imaginations, so are they also weaker pleasures, or weaker pain.

5. As appetite is the beginning of animal motion toward something which pleaseth us; so is the attaining thereof, the END of that motion, which we also call the scope, and aim, and final cause of the same: and when we attain that end, the delight we have thereby is called FRUITION: so that *bonum* and *finis* are different games, but for different considerations of the same thing.

6. And of ends, some are called *propinqui*, that is, near at hand; others *remoti*, farther off. But when the ends that be nearer attaining, be compared with those that be farther off, they are not called ends, but means, and the way to those. But for an utmost end, in which the ancient philosophers have placed felicity, and have disputed much concerning the way thereto, there is no such thing in this world, nor way to it, more than to Utopia: for while we live, we have desires, and desire presupposeth a farther end. Those things which please us, as the way or means to a farther end, we call PROFITABLE; and the fruition of them, USE; and those things that profit not, VAIN.

7. Seeing all delight is appetite, and appetite presupposeth a farther end, there can be no contentment but in proceeding: and therefore we are not to marvel, when we see, that as men attain to more riches, honours, or other power; so their appetite continually groweth more and more; and when they are come to the utmost degree of one kind of power, they pursue some other, as long as in any kind they think themselves behind any other. Of those therefore that have attained to the highest degree of honour and riches, some have affected mastery in some art; as Nero in music and poetry, Commodus in the art of a gladiator. And such as

affect not some such thing, must find diversion and recreation of their thoughts in the contention either of play, or business. And men justly complain as of a great grief, that they know not what to do. FELICITY, therefore (by which we mean continual delight), consisteth not in having prospered, but in prospering.

8. There are few things in this world, but either have a mixture of good and evil, or there is a chain of them so necessarily linked together, that the one cannot be taken without the other, as for example: the pleasures of sin, and the bitterness of punishment, are inseparable; as are also labour and honour, for the most part. Now when in the whole chain, the greater part is good, the whole is called good; and when the evil over-weigheth, the whole is called evil.

9. There are two sorts of pleasure, whereof the one seemeth to affect the corporeal organ of sense, and that I call SENSUAL; the greatest whereof is that, by which we are invited to give continuance to our species; and the next, by which a man is invited to meat, for the preservation of his individual person. The other sort of delight is not particular to any part of the body, and is called the delight of the mind, and is that which we call JOY. Likewise of pains, some affect the body, and are therefore called the pains of the body, and some not, and those are called GRIEF.

Chapter 8: Of the Pleasures of the Senses; Of Honour

1. HAVING IN the first section of the precedent chapter presupposed that motion and agitation of the brain which we call conception, to be continued to the heart, and there to be called passion; I have thereby obliged myself, as far forth as I can, to search out and declare, from what conception proceedeth every one of those passions which we commonly take notice of. For the things that please and displease, are innumerable, and work innumerable ways; but men have taken notice of the passions they have from them in a very few, which also are many of them without name.

2. And first, we are to consider that of conceptions there are three sorts, whereof one is of that which is present, which is sense; another, of that which is past, which is remembrance; and the third, of that which is future, which we call expectation: all which have been manifestly declared in the second and the third chapter. And every of these conceptions is pleasure present. And first for the pleasures of the body which affect the sense of touch and taste, as far forth as they be organical, their conception is sense; so also is the pleasure of all exonerations of nature; all which passions I have before named sensual pleasures; and their contraries, sensual pains; to which also may be added the pleasures and displeasures of odours, if any of them shall be found organical, which for the most part they are not, as appeareth by this experience which every man hath, that the same smells, when they seem to proceed from others, displease, though they proceed from ourselves; but when we think they proceed from ourselves, they displease not, though they come from others: the displeasure therefore, in these is a conception of hurt thereby as being unwholesome, and is therefore a conception of evil to come, and not present. Concerning the delight of hearing, it is diverse, and the organ itself not affected thereby. Simple sounds please by continuance

and equality, as the sound of a bell or lute: insomuch that it seemeth an equality continued by the percussion of the object upon the ear, is pleasure; the contrary is called harshness: such as is grating, and some other sounds, which do not always affect the body, but only sometimes, and that with a kind of horror beginning at the teeth. Harmony, or many sounds together agreeing, please by the same reason as unison, which is the sound of equal strings equally stretched. Sounds that differ in any height, please by inequality and equality alternate, that is to say, the higher note striketh twice, for one stroke of the other, whereby they strike together every second time; as is well proved by Galileo, in the first dialogue concerning local motions, where he also sheweth, that two sounds differing a fifth, delight the ear by an equality of striking after two inequalities; for the higher note striketh the ear thrice, while the other striketh but twice. In the like manner he sheweth, wherein consisteth the pleasure of concord, and the displeasure of discord, in other differences of notes. There is yet another pleasure and displeasure of sounds, which consisteth in consequence of one note after another, diversified both by accent and measure: whereof that which pleaseth is called air. But for what reason succession in one tone and measure is more air than another, I confess I know not; but I conjecture the reason to be, for that some of them may imitate and revive some passion which otherwise we take no notice of, and the other not; for no air pleaseth but for a time, no more doth imitation. Also the pleasures of the eye consist in a certain equality of colour: for light, the most glorious of all colours, is made by equal operation of the object; whereas colour is (perturbed, that is to say) unequal light, as hath been said chap. II, sect. 8. And therefore colours, the more equality is in them, the more resplendent they are. And as harmony is a pleasure to the ear, which consisteth of divers sounds; so perhaps may some mixture of divers colours be harmony to the eye, more than another mixture. There is yet another delight by the ear, which happeneth only to men of skill in music, which is of another nature, and not (as these) conception of the present, but rejoicing in their own skill; of which nature are the passions of which I am to speak next.

3. Conception of the future is but a supposition of the same, proceeding from remembrance of what is Past; and we so far conceive that anything will be hereafter, as we know there is something at the present that hath power to produce it. And that anything hath power now to produce another thing hereafter, we cannot conceive, but by remembrance that it hath produced the like heretofore. Wherefore all conception of future, is conception of power able to produce something; whosoever therefore expecteth pleasure to come, must conceive withal some power in himself by which the same may be attained. And because the passions whereof I am to speak next, consist in conception of the future, that is to say, in conception of power past, and the act to come; before I go any farther, I must in the next place speak somewhat concerning this power.

4. By this power I mean the same with the faculties of body and mind, mentioned in the first chapter, that is to say, of the body, nutritive, generative, motive; and of the mind, knowledge. And besides those, such farther powers, as by them are acquired (viz.) riches, place of authority, friendship or favour, and good fortune; which last is really nothing else but the favour of God Almighty. The contraries of these are impotences, infirmities, or defects of the said powers respectively. And because the power of one man resisteth and hindereth the effects of the power of another power simply is no more, but the excess of the power of one above that of another. For equal powers opposed, destroy one another; and such their opposition is called contention.

5. The signs by which we know our own power are those actions which proceed from the same; and the signs by which other men know it, are such actions, gesture, countenance and speech, as usually such powers produce: and the acknowledgment of power is called HONOUR; and to honour a man (inwardly in the mind) is to conceive or acknowledge, that that man hath the odds or excess of power above him that contendeth or compareth himself. And HONOURABLE are those signs for which one man acknowledgeth power or excess above his concurrent in another. As for example:

- Beauty of person, consisting in a lively aspect of the countenance, and other signs of natural heat, are honourable, being signs precedent of power generative, and much issue; as also, general reputation amongst those of the other sex, because signs consequent of the same.

- And actions proceeding from strength of body and open force, are honourable, as signs consequent of power motive, such as are victory in battle or duel; et a avoir tue son homme.

- Also to adventure upon great exploits and danger, as being a sign consequent of opinion of our own strength: and that opinion a sign of the strength itself.

- And to teach or persuade are honourable, because they be signs of knowledge.

- And riches are honourable; as signs of the power that acquired them.

- And gifts, costs, and magnificence of houses, apparel, and the like, are honourable, as signs of riches.

- And nobility is honourable by reflection, as signs of power in the ancestors.

- And authority, because a sign of strength, wisdom, favour or riches by which it is attained.

- And good fortune or casual prosperity is honourable, because a sign of the favour of God, to whom is to be ascribed all that cometh to us by fortune, no less than that we attain unto us by industry.

And the contraries, or defects, of these signs are dishonourable; and according to the signs of honour and dishonour, so we estimate and make the value or WORTH of a man. For so much worth is every thing, as a man will give for the use of all it can do.

6. The signs of honour are those by which we perceive that one man acknowledgeth the power and worth of another. Such as these:-To praise; to magnify; to bless, or call happy; to pray or supplicate to; to thank; to offer unto or present; to obey; to hearken to with attention; to speak to with consideration; to approach unto in decent manner, to keep distance from; to give the way to, and the like; which are the honour the inferior giveth to the superior.

But the signs of honour from the superior to the inferior, are such as these: to praise or prefer him before his concurrent; to hear him more willingly; to speak to him more familiarly; to admit him nearer. to employ him rather. to ask his advice rather; to like his opinions; and to give him any gift rather than money, or if money, so much as may not imply his need of a little: for need of little is greater poverty than need of much. And this is enough for examples of the signs of honour and of power.

7. Reverence is the conception we have concerning another, that he hath a power to do unto us both good and hurt, but not the will to do us hurt.

8. In the pleasure men have, or displeasure from the signs of honour or dishonour done unto them, consisteth the nature of the passions in particular, whereof we are to speak in the next chapter.

Chapter 9: Of the Passions of the Mind

1. GLORY, OR internal gloriation or triumph of the mind, is that passion which proceedeth from the imagination or conception of our own power, above the power of him that contendeth with us. The signs whereof, besides those in the countenance, and other gestures of the body which cannot be described, are, ostentation in words, and insolency in actions; and this passion, by them whom it displeaseth, is called pride: by them whom it pleaseth, it is termed a just valuation of himself. This imagination of our power and worth, may be an assured and certain experience of our own actions, and then is that glorying just and well grounded, and begetteth an opinion of increasing the same by other actions to follow; in which consisteth the appetite which we call ASPIRING, or proceeding from one degree of power to another. The same passion may proceed not from any conscience of our own actions, but from fame and trust of others, whereby one may think well of himself, and yet be deceived; and this is FALSE GLORY, and the aspiring consequent thereto procureth ill-success. Farther, the fiction (which also is imagination) of actions done by ourselves, which never were done, is glorying; but because it begetteth no appetite nor endeavour to any further attempt, it is merely vain and unprofitable; as when a man imagineth himself to do the actions whereof he readeth in some romant, or to be like unto some other man whose acts he admireth. And this is called VAIN GLORY: and is exemplified in the fable by the fly sitting on the axletree, and saying to himself, What a dust do I raise! The expression of vain glory is that we call a wish, which some of the Schoolmen, mistaking for some appetite distinct from all the rest, have called velleity, making a new word, as they made a new passion which was not before. Signs of vain glory in the gesture, are imitation of others, counterfeiting attention to things they understand not, affectation of fashions, captation of honour from

their dreams, and other little stories of themselves, from their country, from their names, and the like.

2. The passion contrary to glory, proceeding from apprehension of our own infirmity, is called HUMILITY by those by whom it is approved; by the rest, DEJECTION and poorness; which conception may be well or ill grounded. If well, it produceth fear to attempt any thing rashly; if ill, it may be called vain fear, as the contrary is vain glory, and consisteth in fear of the power, without any other sign of the act to follow, as children fear to go in the dark, upon imagination of spirits, and fear all strangers as enemies. This is the passion which utterly cows a man, that he neither dare speak publicly, nor expect good success in any action.

3. It happeneth sometimes, that he that hath a good opinion of himself, and upon good ground, may nevertheless, by reason of the forwardness which that passion begetteth, discover in himself some defect or infirmity, the remembrance whereof dejecteth him; and this passion is called SHAME, by which being cooled and checked in his forwardness, he is more wary for the time to come. This passion, as it is a sign of infirmity, which is dishonour; so also it is a sign of knowledge, which is honour. The sign of it is blushing, which happeneth less in men conscious of their own defects, because they less betray the infirmities they acknowledge.

4. COURAGE, in a large signification, is the absence of fear in the presence of any evil whatsoever; but in a stricter and more common meaning, it is contempt of wounds and death, when they oppose a man in the way to his end.

5. ANGER (or sudden courage) is nothing but the appetite or desire of overcoming present opposition. It hath been commonly defined to be grief proceeding from an opinion of contempt; which is confuted by the often experience we have of being moved to anger by things inanimate and without sense, and consequently incapable of contemning us.

6. REVENGEFULNESS is that passion which ariseth from an expectation or imagination of making him that hath hurt us, to find his own action hurtful to himself, and to acknowledge the same; and this is the height of revenge. For

though it be not hard, by returning evil for evil, to make one's adversary displeased with his own fact; yet to make him acknowledge the same, is so difficult, that many a man had rather die than do it. Revenge aimeth not at the death, but at the captivity and subjection of an enemy; which was well expressed in the exclamation of Tiberius Caesar, concerning one, that, to frustrate his revenge, had killed himself in prison: Hath he escaped me? To kill is the aim of them that hate, to rid themselves of fear; revenge aimeth at triumph, which over the dead is not.

7. REPENTANCE is the passion that proceedeth from opinion or knowledge that the action they have done is out of the way to the end they would attain. The effect whereof is, to pursue that way no longer; but, by consideration of the end, to direct themselves into a better. The first motion therefore in this passion is grief. But the expectation or conception of returning again into the way, is joy. And consequently, the passion of repentance is compounded and allayed of both, but the predominant is joy, else were the whole grief; which cannot be. For as much as he that proceedeth towards the end, conceiveth good, he proceedeth with appetite. And appetite is joy, as hath been said, chap. VII, sect. 3.

8. HOPE is expectation of good to come, as fear is the expectation of evil: but when there be causes, some that make us expect good, and some that make us expect evil, alternately working in our minds: if the causes that make us expect good, be greater than those that make us expect evil, the whole passion is hope; if contrarily, the whole is fear. Absolute privation of hope is DESPAIR, a degree whereof is DIFFIDENCE.

9. TRUST is a passion proceeding from belief of him from whom we expect or hope for good, so free from doubt that upon the same we pursue no other way. And distrust, or diffidence, is doubt that maketh him endeavour to provide himself by other means. And that this is the meaning of the words trust and distrust, is manifest from this, that a man never provideth himself by a second way, but when he mistrusteth that the first will not hold.

10. PITY is imagination or fiction of future calamity to ourselves, proceeding from the sense of another man's present calamity; but when it lighteth on such as we think have not deserved the same, the compassion is the greater, because then there appeareth the more probability that the same may happen to us. For the evil that happeneth to an innocent man, may happen to every man. But when we see a man suffer for great crimes, which we cannot easily think will fall upon ourselves, the pity is the less. And therefore men are apt to pity those whom they love: for, whom they love, they think worthy of good, and therefore not worthy of calamity. Thence also it is, that men pity the vices of some they never saw before; and therefore every proper man finds pity amongst women, when he goeth to the gallows. The contrary of pity is HARDNESS of heart, proceeding either from slowness of imagination, or from extreme great opinion of their own exemption of the like calamity, or from hatred of all, or most men.

11. INDIGNATION is that grief which consisteth in the conception of good success happening to them whom they think unworthy thereof. Seeing therefore men think all those unworthy whom they hate, they think them not only unworthy of the good fortune they have, but also of their own virtues. And of all the passions of the mind, these two, indignation and pity, are most easily raised and increased by eloquence; for the aggravation of the calamity, and extenuation of the fault, augmenteth pity. And the extenuation of the worth of the person, together with the magnifying of his success (which are the parts of an orator), are able to turn these two passions into fury.

12. EMULATION is grief arising from seeing one's self exceeded or excelled by his concurrent, together with hope to equal or exceed him in time to come, by his own ability. But, ENVY is the same grief joined with pleasure conceived in the imagination of some ill fortune that may befall him.

13. There is a passion which hath no name, but the sign of it is that distortion of the countenance we call LAUGHTER, which is always joy, but what joy, what we think, and wherein we triumph when we laugh, hath not hitherto been declared by any. That it consisteth in wit, or, as they call it, in the jest, this experience

confuteth: for men laugh at mischances and indecencies, therein there lieth no wit or jest at all. And forasmuch as the same thing is no more ridiculous when it groweth stale or usual, whatsoever it be that moveth laughter, it must be new and unexpected. Men laugh often (especially such as are greedy of applause from every thing they do well) at their own actions performed never so little beyond their own expectation; as also at their own jests: and in this case it is manifest, that the passion of laughter proceedeth from a sudden conception of some ability in himself that laugheth. Also men laugh at the infirmities of others, by comparison of which their own abilities are set off and illustrated. Also men laugh at jests, the wit whereof always consisteth in the elegant discovering and conveying to our minds some absurdity or another. And in this case also the passion of laughter proceedeth from the sudden imagination of our own odds and eminence; for what is else the recommending ourselves to our own good opinion, by comparison with another man's infirmities or absurdity? For when a jest is broken upon ourselves, or friends of whose dishonour we participate, we never laugh thereat. I may therefore conclude, that the passion of laughter is nothing else but a sudden glory arising from sudden conception of some eminency in ourselves, by comparison with the infirmities of others, or with our own formerly: for men laugh at the follies of themselves past, when they come suddenly to remembrance, except they bring with them any present dishonour. It is no wonder therefore that men take it heinously to be laughed at or derided, that is, triumphed over. Laughter without offence, must be at absurdities and infirmities abstracted from persons, and where all the company may laugh together. For laughing to one's self putteth all the rest to a jealousy and examination of themselves; besides, it is vain glory, and an argument of little worth, to think the infirmities of another sufficient matter for his triumph.

14. The passion opposite hereunto, whose signs are another distortion of the face with tears, called **WEEPING**, is the sudden falling out with ourselves, or sudden conception of defect; and therefore children weep often; for seeing they think every thing ought to be given unto them which they desire, of necessity

every repulse must be a sudden check of their expectation, and puts them in mind of their too much weakness to make themselves masters of all they look for. For the same cause women are more apt to weep than men, as being not only more accustomed to have their wills, but also to measure their power by the power and love of others that protect them. Men are apt to weep that prosecute revenge, when the revenge is suddenly stopped or frustrated by the repentance of the adversary; and such are the tears of reconciliation. Also pityful men are subject to this passion upon the beholding of those men they pity, and suddenly remember they cannot help. Other weeping in men proceedeth for the most part from the same cause it proceedeth from in women and children.

15. The appetite which men call LUST, and the fruition that appertaineth thereunto, is a sensual pleasure, but not only that; there is in it also a delight of the mind: for it consisteth of two appetites together, to please, and to be pleased; and the delight men take in delighting, is not sensual, but a pleasure or joy of the mind, consisting in the imagination of the power they have so much to please. But this name lust is used where it is condemned: otherwise it is called by the general word love; for the passion is one and the same indefinite desire of the different sex, as natural as hunger.

16. Of love, by which is understood the joy a man taketh in the fruition of any present good, hath been already spoken in the first section of the seventh chapter, under which is contained the love men bear to one another, or pleasure they take in one another's company; and by which men are said to be sociable by nature. But there is another kind of LOVE, which the Greeks call Eros, and is that which we mean, when we say: that man or woman is in love. For as much as this passion cannot be without diversity of sex, it cannot be denied but that it participateth of that indefinite love mentioned in the former section. But there is a great difference between the desire of a man indefinite, and the same desire limited ad hanc; and this is that love which is the great theme of poets. But notwithstanding their praises, it must be defined by the word need; for it is a conception of the need a man hath of that one person desired. The cause of this passion is not always, nor

for the most part, beauty, or other quality, in the beloved, unless there be withal hope in the person that loveth: which may be gathered from this: that in great difference of persons, the greater have often fallen in love with the meaner; but not contrary. And from hence it is, that for the most part they have much better fortune in love, whose hopes are built upon something in their person, than those that trust to their expressions and service; and they that care less, than they that care more; which not perceiving many men cast away their services, as one arrow after another; till in the end together with their hopes they lose their wits.

17. There is yet another passion sometimes called love, but more properly good will or CHARITY. There can be no greater argument to a man of his own power, than to find himself able, not only to accomplish his own desires, but also to assist other men in theirs: and this is that conception wherein consisteth charity. In which, first, is contained that natural affection of parents to their children, which the Greeks call Storgi, as also that affection wherewith men seek to assist those that adhere unto them. But the affection wherewith men many times bestow their benefits on strangers, is not to be called charity, but either contract, whereby they seek to purchase friendship; or fear, which maketh them to purchase peace. The opinion of Plato concerning honourable love, delivered (according to his custom, in the person of Socrates) in the dialogue intituled Convivium, is this: that a man full and pregnant with wisdom, or other virtue, naturally seeketh out some beautiful person, of age and capacity to conceive, in whom he may, without sensual respects, engender and produce the like. And this is the idea of the then noted love of Socrates wise and continent, to Alcibiades young and beautiful; in which love, is not sought the honour, but issue of his knowledge; contrary to common love, to which though issue sometimes follow, yet men seek not that, but to please, and to be pleased. It should therefore be this charity, or desire to assist and advance others. But why then should the wise seek the ignorant, or be more charitable to the beautiful than to others? There is something in it savouring of the use of that time: in which matter though Socrates be acknowledged for continent, yet continent men have the passion they contain, as much or more than they that

satiate the appetite; which maketh me suspect this platonic love for merely sensual; but with an honourable pretence for the old to haunt the company of the young and beautiful.

18. Forasmuch as all knowledge beginneth from experience, therefore also new experience is the beginning of new knowledge, and the increase of experience the beginning of the increase of knowledge; whatsoever therefore happeneth new to a man, giveth him hope and matter of knowing somewhat that he knew not before. And this hope and expectation of future knowledge from anything that happeneth new and strange, is that passion which we commonly call ADMIRATION; and the same considered as appetite, is called curiosity, which is appetite of knowledge. As in the discerning faculties, man leaveth all community with beasts at the faculty of imposing names; so also doth he surmount their nature at this passion of curiosity. For when a beast seeth anything new or strange to him; he considereth it so far only as to discern whether it be likely to serve his turn, or hurt him, and accordingly approacheth nearer it, or flieth from it; whereas man, who in most events remembereth in what manner they were caused and begun, looketh for the cause and beginning of everything that ariseth new unto him. And from this passion of admiration and curiosity, have arisen not only the invention of names, but also the supposition of such causes of all things as they thought might produce them. And from this beginning is derived all philosophy: as astronomy from the admiration of the course of heaven; natural philosophy from the strange effects of the elements and other bodies. And from the degrees of curiosity proceed also the degrees of knowledge among men; for to a man in the chase of riches or authority, (which in respect of knowledge are but sensuality) it is a diversion of little pleasure to consider, whether it be the motion of the sun or the earth that maketh the day, or to enter into other contemplation of any strange accident, than whether it conduce or not to the end he pursueth. Because curiosity is delight, therefore also all novelty is so, but especially that novelty from which a man conceiveth an opinion true or false of bettering his own estate. For in such

case they stand affected with the hope that all gamesters have while the cards are shuffling.

19. Divers other passions there be, but they want names; whereof some nevertheless have been by most men observed. For example: from what passion proceedeth it, that men take pleasure to behold from the shore the danger of them that are at sea in a tempest, or in fight, or from a safe castle to behold two armies charge one another in the field? It is certainly in the whole sum joy, else men would never flock to such a spectacle. Nevertheless there is in it both joy and grief. For as there is novelty and remembrance of own security present, which is delight; so is there also pity, which is grief. But the delight is so far predominant, that men usually are content in such a case to be spectators of the misery of their friends.

20. MAGNANIMITY is no more than glory, of which I have spoken in the first section; but glory well grounded upon certain experience of power sufficient to attain his end in open manner. And PUSILLANIMITY is the doubt of that; whatsoever therefore is a sign of vain glory, the same is also a sign of pusillanimity. for sufficient power maketh glory a spur to one's end. To be pleased or displeased with fame true or false, is a sign of the same, because he that relieth upon fame, hath not his success in his own power. Likewise art and fallacy are signs of pusillanimity, because they depend not upon our own power, but the ignorance of others. Also proneness to anger, because it argueth difficulty of proceeding. Also ostentation of ancestors, because all men are more inclined to make shew of their own power when they have it, than of another's. To be at enmity and contention with inferiors, is a sign of the same, because it proceedeth from want of power to end the war. To laugh at others, because it is affectation of glory from other men's infirmities, and not from any ability of their own. Also irresolution, which proceedeth from want of power enough to condemn the little differences that make deliberations hard.

21. The comparison of the life of man to a race, though it holdeth not in every point, yet it holdeth so well for this our purpose that we may thereby both see and

remember almost all the passions before mentioned. But this race we must suppose to have no other goal, nor no other garland, but being foremost. And in it:

To endeavour is appetite. To be remiss is sensuality. To consider them behind is glory. To consider them before is humility. To lose ground with looking back vain glory. To be holden, hatred. To turn back, repentance. To be in breath, hope. To be weary despair. To endeavour to overtake the next, emulation. To supplant or overthrow, envy. To resolve to break through a stop foreseen courage. To break through a sudden stop anger. To break through with ease, magnanimity. To lose ground by little hindrances, pusillanimity. To fall on the sudden is disposition to weep. To see another fall, disposition to laugh. To see one out-gone whom we would not is pity. To see one out-go we would not, is indignation. To hold fast by another is to love. To carry him on that so holdeth, is charity. To hurt one's-self for haste is shame. Continually to be out-gone is misery. Continually to out-go the next before is felicity. And to forsake the course is to die.

Chapter 10: Of the Difference Between Men In These Discerning Faculty and the Cause

1. HAVING SHEWED in the precedent chapters, that the imagination of men proceedeth from the action of external objects upon the brain, or some internal substance of the head; and that the passions proceed from the alteration there made, and continued to the heart: it is consequent in the next place (seeing the diversity of degree in knowledge in divers men, to be greater than may be ascribed to the divers temper of the brain) to declare what other causes may produce such odds, and excess of capacity, as we daily observe in one man above another. And for that difference which ariseth from sickness, and such accidental distemper, I omit the same, as impertinent to this place, and consider it only in such as have their health, and organs well disposed. If the difference were in the natural temper of the brain, I can imagine no reason why the same should not appear first and most of all in the senses, which being equal both in the wise and less wise, infer an equal temper in the common organ (namely the brain) of all the senses.

2. But we see by experience, that joy and grief proceed not in all men from the same causes, and that men differ much in constitution of body, whereby, that which helpeth and furthereth vital constitution in one, and is therefore delightful, hindereth and crosseth it in another, and causeth grief. The difference therefore of wits hath its original from the different passions, and from the ends to which their appetite leadeth them.

3. And first, those men whose ends are some sensual delight; and generally are addicted to ease, food, onerations and exonerations of the body, must of necessity thereby be the less delighted with those imaginations that conduce not to those ends, such as are imaginations of honour and glory, which, as I have said before,

have respect to the future: for sensuality consisteth in the pleasure of the senses, which please only for the present, and taketh away the inclination to observe such things as conduce to honour; and consequently maketh men less curious, and less ambitious, whereby they less consider the way either to knowledge or to other power; in which two consisteth all the excellency of power cognitive. And this is it which men call DULNESS; and proceedeth from the appetite of sensual or bodily delight. And it may well be conjectured, that such passion hath its beginning from a grossness and difficulty of the motion of the spirits about the heart.

4. The contrary hereunto, is that quick ranging of mind described chap. IV, sect. 3, which is joined with curiosity of comparing the things that come into his mind one with another. In which comparison, a man delighteth himself either with finding unexpected similitude in things, otherwise much unlike, in which men place the excellency of FANCY: and from thence proceed those grateful similies, metaphors, and other tropes, by which both poets and orators have it in their power to make things please or displease, and shew well or ill to others, as they like themselves; or else in discerning suddenly dissimilitude in things that otherwise appear the same. And this virtue of the mind is that by which men attain to exact and perfect knowledge: and the pleasure thereof consisteth in continual instruction, and in distinction of persons, places, and seasons; it is commonly termed by the name of JUDGMENT: for, to judge is nothing else, but to distinguish or discern; and both fancy and judgment are commonly comprehended under the name of wit, which seemeth a tenuity and agility of spirits, contrary to that restiveness of the spirits supposed in those that are dull.

5. There is another defect of the mind, which men call LEVITY, which betrayeth also mobility in the spirits, but in excess. An example whereof is in them that in the midst of any serious discourse, have their minds diverted to every little jest or witty observation; which maketh them depart from their discourse by parenthesis, and from that parenthesis by another, till at length they either lose themselves, or make their narration like a dream, or some studied nonsense. The

passion from which this proceedeth, is curiosity, but with too much equality and indifferency: for when all things make equal impression and delight, they equally throng to be expressed.

6. The virtue opposite to this defect is Gravity, or steadiness; in which the end being the great and master-delight, directeth and keepeth in the way thereto all other thoughts.

7. The extremity of dulness is that natural folly which may be called STOLIDITY: but the extreme of levity, though it be a natural folly distinct from the other, and obvious to every man's observation, yet it hath no name.

8. There is a fault of the mind called by the Greeks Amathia, which is INDOCIBILITY, or difficulty of being taught; the which must needs arise from a false opinion that they know already the truth of that which is called in question. For certainly men are not otherwise so unequal in capacity as the evidence is unequal of what is taught by the mathematicians, and what is commonly discoursed of in other books: and therefore if the minds of men were all of white paper, they would almost equally be disposed to acknowledge whatsoever should be in right method, and right ratiocination delivered unto them. But when men have once acquiesced in untrue opinions, and registered them as authentical records in their minds; it is no less impossible to speak intelligibly to such men, than to write legibly upon a paper already scribbled over. The immediate cause therefore of indocibility, is prejudice; and of prejudice, false opinion of our own knowledge.

9. Another, and a principal defect of the mind, is that which men call MADNESS, which appeareth to be nothing else but some imagination of such predominance above all the rest, that we have no passion but from it. And this conception is nothing else but excessive vain glory, or vain dejection; as is most probable by these examples following, which proceed in appearance, every one of them, from some pride, or some dejection of mind. As first we have had the example of one that preached in Cheapside from a cart there, instead of a pulpit, that he himself was Christ, which was spiritual pride or madness. We have had

divers examples also of learned madness, in which men have manifestly been distracted upon any occasion that hath put them in remembrance of their own ability. Amongst the learned madmen may be numbered (I think) also those that determine of the time of the world's end, and other such points of prophecy. And the gallant madness of Don Quixote is nothing else but an expression of such height of vain glory as reading of romants may produce in pusillanimous men. Also rage and madness of love, are but great indications of them in whose brains are predominant the contempts of their enemies, or their mistresses. And the pride taken in form and behaviour, hath made divers men run mad, and to be so accounted, under the name of fantastic.

10. And as these are the examples of extremities, so also are there examples too many of the degrees, which may therefore be well accounted follies. As it is a degree of the first, for a man, without certain evidence, to think himself inspired, or to have any other effect in himself of God's holy spirit than other godly men have. Of the second, for a man continually to speak his mind in a cento of other men's Greek or Latin sentences. Of the third, much of the present gallantry in love and duel. Of rage, a degree is malice; and of fantastic madness, affectation.

11. As the former examples exhibit to us madness, and the degrees thereof, proceeding from the excess of self-opinion; so also there be other examples of madness, and the degrees thereof, proceeding from too much vain fear and dejection: as in those melancholy men that have imagined themselves brittle as glass, or have had some other like imagination; and degrees hereof are all those exorbitant and causeless fears, which we commonly observe in melancholy persons.

Chapter 11: What Imaginations and Passions Men Have, at the Names of Things Supernatural

1. HITHERTO OF the knowledge of things natural, and of the passions that arise naturally from them. Now forasmuch as we give names not only to things natural, but also to supernatural; and by all names we ought to have some meaning and conception: it followeth in the next place, to consider what thoughts and imaginations of the mind we have, when we take into our mouths the most blessed name of GOD, and the names of those virtues we attribute unto him; as also, what image cometh into the mind at hearing the name of spirit, or the name of angel, good or bad.

2. Forasmuch as God Almighty. is incomprehensible, it followeth that we can have no conception or image of the Deity; and consequently all his attributes signify our inability and defect of power to conceive any thing concerning his nature, and not any conception of the same, excepting only this: that there is a God. For the effects we acknowledge naturally, do necessarily include a power of their producing, before they were produced; and that power presupposeth something existent that hath such power; and the thing so existing with power to produce, if it were not eternal, must needs have been produced by somewhat before it; and that again by something else before that: till we come to an eternal, that is to say, to the first power of all powers, and first cause of all causes. And this is it which all men call by the name of GOD: implying eternity, incomprehensibility, and omnipotency. And thus all men that will consider, may naturally know that God is, though not what he is; even as a man though born blind, though it be not possible for him to have any imagination what kind of thing is fire; yet he cannot but know that something there is that men call fire, because it warmeth him.

3. And whereas we attribute to God Almighty, seeing, hearing, speaking, knowing, loving, and the like; by which names we understand something in the men to whom we attribute them, we understand nothing by them in the nature of God. For, as it is well reasoned: Shall not God that made the eye, see? and the ear, hear? so is it also, if we say: shall God that made the eye, not see without the eye? and that made the ear, not hear without the ear? or that made the brain, not know without the brain? or that made the heart, not love without the heart? The attributes therefore given unto the Deity, are such as signify either our incapacity, or our reverence; our incapacity, when we say: incomprehensible and infinite: our reverence, when we give him those names, which amongst us are the names of those things we most magnify and commend, as omnipotent, omniscient, just, merciful, &c. And when God Almighty giveth those names to himself in the Scriptures, it is but anthropopathos, that is to say, by descending to our manner of speaking: without which we are not capable of understanding him.

4. By the name of spirit we understand a body natural, but of such subtilty that it worketh not on the senses; but that filleth up the place which the image of a visible body might fill up. Our conception therefore of spirit consisteth of figure without colour; and in figure is understood dimension: and consequently, to conceive a spirit, is to conceive something that hath dimension. But spirits supernatural commonly signify some substance without dimension; which two words do flatly contradict one another. And therefore when we attribute the name of spirit unto God, we attribute it, not as a name of anything we conceive, no more than when we ascribe unto him sense and understanding; but as a signification of our reverence, who desire to abstract from him all corporeal grossness.

5. Concerning other spirits, which some men call spirits incorporeal, and some corporeal, it is not possible, by natural means only, to come to knowledge of so much, as that there are such things. We who are Christians acknowledge that there be angels good and evil; and that they are spirits, and that the soul of man is a spirit; and that these spirits are immortal. But, to know it, that is to say, to have

natural evidence of the same: it is impossible. For all evidence is conception, as it is said chap. VI, sect. 3; and all conception is imagination and proceedeth from sense: chap. III, sect. I. And spirits we suppose to be those substances which work not upon the sense, and therefore not conceivable. But though the Scripture acknowledge spirits, yet doth it nowhere say, that they are incorporeal, meaning thereby, without dimensions and quantity; nor, I think, is that word incorporeal at all in the Bible; but it is said of the spirit, that it abideth in men; sometime that it dwelleth in them, sometimes that it cometh on them, that it descendeth, and cometh and goeth; and that spirits are angels, that is to say messengers: all which words do consignify locality; and locality is dimension; and whatsoever hath dimension, is body, be it never so subtile. To me therefore it seemeth, that the Scripture favoureth them more, who hold angels and spirits for corporeal, than them that hold the contrary. And it is a plain contradiction in natural discourse, to say of the soul of man, that it is *tota in toto*, and: *tota in qualibet parte corporis*, grounded neither upon reason nor revelation; but proceeding from the ignorance of what those things are which are called spectra, images that appear in the dark to children, and such as have strong fears, and other strong imaginations, as hath been said chap. III, sect. 5, where I call them phantasms. For taking them to be things really without us, like bodies, and seeing them to come and vanish so strangely as they do, unlike to bodies; what could they call them else, but incorporeal bodies? which is not a name, but an absurdity of speech.

6. It is true, that the heathens, and all nations of the world, have acknowledged that there are spirits, which for the most part they hold to be incorporeal; whereby it may be thought that a man by natural reason, may arrive, without the knowledge of Scripture, to the knowledge of this; that spirits are. But the erroneous collection thereof by the heathens may proceed, as I have said before, from ignorance of the causes of ghosts and phantasms, and such other apparitions. And from thence had the Grecians their number of gods, their number of daemons good and bad; and for every man his genius; which is not the acknowledging of this truth: that spirits are; but a false opinion concerning the force of imagination.

7. And seeing the knowledge we have of spirits, is not natural knowledge, but faith from supernatural revelation, given to the holy writers of Scripture; it followeth that of inspiration also, which is the operation of spirits in us, the knowledge we have must all proceed from Scripture. The signs there set down of inspiration, are miracles, when they be great, and manifestly above the power of men to do by imposture. As for example: the inspiration of Elias was known by the miraculous burning of his sacrifice. But the signs to distinguish whether a spirit be good or evil, are the same by which we distinguish whether a man or a tree be good or evil: namely actions and fruit. For there be lying spirits wherewith men are inspired sometimes, as well as with spirits of truth. And we are commanded in Scripture, to judge of the spirits by their doctrine, and not of the doctrine by the spirits. For miracles, our Saviour hath forbidden us to rule our faith by them, Matt. 24, 24. And Saint Paul saith, Gal. 1, 8: Though an angel from heaven preach unto you otherwise, &c. let him be accursed. Where it is plain, that we are not to judge whether the doctrine be true or no, by the angel; but whether the angel saith true or no, by the doctrine. So likewise, I Joh. cha vers. 1: Believe not every spirit: for false prophets are gone out into the world; verse 2: Hereby shall ye know the spirit of God: every spirit that confesseth that Jesus Christ is come in the flesh, is of God; verse 3: And every spirit that confesseth not that Jesus Christ is come in the flesh, is not of God; and this is the spirit of Antichrist; verse 15: Whosoever confesseth that Jesus is the Son of God, in him dwelleth God, and he in God. The knowledge therefore we have of good and evil inspiration, cometh not by vision of an angel that may teach it, nor by a miracle that may seem to confirm it; but by conformity of doctrine with this article and fundamental point of Christian faith, which also Saint Paul saith 1 Cor. 3, 11, is the sole foundation: that Jesus Christ is come in the flesh.

8. But if inspiration be discerned by this point; and this point be acknowledged and believed upon the authority of the Scriptures: how (may some men ask) know we that the Scripture deserveth so great authority, which must be no less than that of the lively voice of God? that is, how we know the Scriptures to be the word of

God? And first, it is manifest: that if by knowledge we understand science infallible and natural, such as is defined in the VI cha sect., proceeding from sense; we cannot be said to know it, because it proceedeth from the conceptions engendered by sense. And if we understand knowledge as supernatural, we cannot know it but by inspiration; and of that inspiration we cannot judge, but by the doctrine. It followeth therefore, that we have not any way, natural or supernatural, that knowledge thereof which can properly be called infallible science and evidence. It remaineth, that the knowledge we have that the Scriptures are the word of God, is only faith. For whatsoever is evident either by natural reason, or by revelation supernatural, is not called faith; else should not faith cease, no more than charity, when we are in heaven; which is contrary to the doctrine of Scripture. And, we are not said to believe, but to know those things which are evident.

9. Seeing then the acknowledgment of the Scriptures to be the word of God, is not evidence, but faith; and faith, chap. VI, sect. 7, consisteth in the trust we have in other men: it appeareth plainly that the men so trusted, are the holy men of God's church succeeding one another from the time of those that saw the wondrous works of God Almighty in the flesh; nor doth this imply that God is not the worker and efficient cause of faith, or that faith is begotten in man without the spirit of God; for all those good opinions which we admit and believe, though they proceed from hearing, and hearing from teaching, both which are natural, yet they are the work of God. For all the works of nature are his, and they are attributed to the Spirit of God. As for example Exod. 28, 3: Thou shalt speak unto all cunning men, whom I have filled with the spirit of wisdom, that they make Aaron's garments for his consecration, that he may serve me in the priest's office. The faith therefore wherewith we believe, is the work of the Spirit of God, in that sense, by which the Spirit of God giveth to one man wisdom and cunning in workmanship more than to another; and by which he effecteth also in other points pertaining to our ordinary life, that one man believeth that, which upon the same

grounds another doth not; and one man reverenceth the opinion, and obeyeth the commands of his superiors, and others not.

10. And seeing our faith, that the Scriptures are the word of God, began from the confidence and trust we repose in the church; there can be no doubt but that their interpretation of the same Scriptures, when any doubt or controversy shall arise, by which this fundamental point, that Jesus Christ is come in the flesh, is not called in question, is safer for any man to trust to, than his own, whether reasoning, or spirit; that is to say his own opinion.

11. Now concerning man's affections to Godward, they are not the same always that are described in the chapter concerning passions. For there, to love is to be delighted with the image or conception of the thing loved; but God is unconceivable; to love God therefore, in the Scripture, is to obey his commandments, and to love one another. Also to trust God is different from our trusting one another. For when a man trusteth a man, chap. IX, sect. 9, he layeth aside his own endeavour; but if we do so in our trust to God Almighty, we disobey him; and how shall we trust to him we disobey? To trust to God Almighty therefore is to refer to his good pleasure all that is above our own power to effect. And this is all one with acknowledging one only God; which is the first commandment. And to trust in Christ is no more, but to acknowledge him for God; which is the fundamental article of our Christian faith. And consequently to trust, rely, or, as some express it, to cast and roll ourselves on Christ, is the same thing with the fundamental point of faith, namely, that Jesus Christ is the son of the living God.

12. To honour God internally in the heart, is the same thing with that we ordinarily call honour amongst men: for it is nothing but the acknowledging of his power; and the signs thereof the same with the signs of the honour due to our superiors, mentioned chap. VIII, sect. 6 (viz.): to praise, to magnify, to bless him, to pray to him, to thank him, to give oblations and sacrifice to him, to give attention to his word, to speak to him in prayer with consideration, to come into his presence with humble gesture, and in decent manner, and to adorn his worship

with magnificence and cost. And these are natural signs of our honouring him internally. And therefore the contrary hereof: to neglect prayer, to speak to him extempore, to come to church slovenly, to adorn the place of his worship less than our own houses, to take up his name in every idle discourse, are manifest signs of contempt of the Divine Majesty. There be other signs which are arbitrary; as, to be uncovered (as we be here) to put off the shoes, as Moses at the fiery bush, and some other of that kind; which in their own nature are indifferent, till to avoid indecency and discord, it be otherwise determined by common consent.

Chapter 12: How by Deliberation From Passions Proceed Men's Actions

1. IT HATH been declared already, how external objects cause conceptions, and conceptions appetite and fear, which are the first unperceived beginnings of our actions: for either the action immediately followeth the first appetite, as when we do any thing upon a sudden; or else to our first appetite there succeedeth some conception of evil to happen unto us by such actions, which is fear, and withholdeth us from proceeding. And to that fear may succeed a new appetite, and to that appetite another fear, alternately, till the action be either done, or some accident come between, to make it impossible; and so this alternate appetite and fear ceaseth. This alternate succession of appetite and fear, during all the time the action is in our power to do, or not to do, is that we call DELIBERATION; which name hath been given it for that part of the definition wherein it is said that it lasteth so long, as the action whereof we deliberate, is in our power; for so long we have liberty to do or not to do: and deliberation signifieth the taking away of our own liberty.

2. Deliberation therefore requireth in the action deliberated two conditions: one, that it be future; the other, that there be hope of doing it, or possibility of not doing it. For appetite and fear are expectations of the future; and there is no expectation of good without hope; nor of evil without possibility. Of necessities therefore there is no deliberation. In deliberation the last appetite, as also the last fear, is called WILL (viz.) the last appetite will to do; the last fear will not to do, or will to omit. It is all one therefore to say will and last will: for though a man express his present inclination and appetite concerning the disposing of his goods, by word or writing; yet shall it not be accounted his will, because he hath liberty

still to dispose of them otherwise; but when death taketh away that liberty, then it is his will.

3. VOLUNTARY actions and omissions are such as have beginning in the will; all other are INVOLUNTARY or MIXED. Voluntary such as a man doth upon appetite or fear. involuntary such as he doth by necessity of nature, as when he is pushed, or falleth, and thereby doth good or hurt to another; mixed, such as participate of both; as when a man is carried to prison he is pulled on against his will, and yet goeth upright voluntary, for fear of being trailed along the ground: insomuch that in going to prison, going is voluntary. to the prison, involuntary. The example of him that throweth his goods out of a ship into the sea, to save his person, is of an action altogether voluntary. for, there is nothing there involuntary, but the hardness of the choice, which is not his action, but the action of the winds; what he himself doth, is no more against his will, than to fly from danger is against the will of him that seeth no other means to preserve himself.

4. Voluntary also are the actions that proceed from sudden anger, or other sudden appetite, in such men as can discern of good and evil; for in them the time precedent is to be judged deliberation. For then also he deliberateth in what cases it is good to strike, deride, or do any other action proceeding from anger or other such sudden passion.

5. Appetite, fear, hope, and the rest of the passions are not called voluntary; for they proceed not from, but are the will; and the will is not voluntary. For a man can no more say he will will, than he will will will, and so make an infinite repetition of the word will; which is absurd, and insignificant.

6. Forasmuch as will to do is appetite, and will to omit, fear; the causes of appetite and of fear are the causes also of our will. But the propounding of benefits and of harms, that is to say, of reward and punishment, is the cause of our appetite and of our fears, and therefore also of our wills, so far forth as we believe that such rewards and benefits, as are propounded, shall arrive unto us. And consequently, our wills follow our opinions, as our actions follow our wills. In

which sense they say truly and properly that say the world is governed by opinion.

7. When the wills of many concur to some one and the same action, or effect, this concourse of their wills is called CONSENT; by which we must not understand one will of many men, for every man hath his several will; but many wills to the producing of one effect. But when the wills of two divers men produce such actions as are reciprocally resistances one to the other, this is called CONTENTION: and being upon the persons of one another, BATTLE; whereas actions proceeding from consent are mutual AID.

8. When many wills are involved or included in the will of one or more consenting, (which how it may be, shall be hereafter declared) then is that involving of many wills in one or more called UNION.

9. In deliberations interrupted, as they may be by diversion to other business, or by sleep, the last appetite of such part of the deliberation is called INTENTION, or purpose.

Chapter 13: How by Language Men Work Upon Each Other's Minds

1. HAVING SPOKEN of the powers and acts of the mind, both cognitive and motive, considered in every man by himself, without relation to others; it will fall fitly into this chapter, to speak of the effects of the same powers one upon another; which effects are also the signs, by which one taketh notice of what another conceiveth and intendeth. Of these signs, some are such as cannot easily be counterfeited; as actions and gestures, especially if they be sudden; whereof I have mentioned some for example sake in the ninth chapter, at the several passions whereof they are signs; others there are that may be counterfeited: and those are words or speech; of the use and effect whereof I am to speak in this place.

2. The first use of language, is the expression of our conceptions, that is, the begetting in another the same conceptions that we have in ourselves; and this is called TEACHING; wherein if the conceptions of him that teacheth continually accompany his words, beginning at something from experience, then it begetteth the like evidence in the hearer that understandeth them, and maketh him know something, which he is therefore said to LEARN. But if there be not such evidence, then such teaching is called PERSUASION, and begetteth no more in the hearer, than what is in the speaker, bare opinion. And the signs of two opinions contradictory one to another, namely' affirmation and negation of the same thing, is called a CONTROVERSY; but both affirmations, or both negations, CONSENT in opinion.

3. The infallible sign of teaching exactly, and without error, is this: that no man hath ever taught the contrary; not that few, how few soever, if any. For commonly truth is on the side of the few, rather than of the multitude; but when in opinions

and questions considered and discussed by many, it happeneth that not any one of the men that so discuss them differ from another, then it may be justly inferred, they know what they teach, and that otherwise they do not. And this appeareth most manifestly to them that have considered the divers subjects wherein men have exercised their pens, and the divers ways in which they have proceeded; together with the diversity of the success thereof. For those men who have taken in hand to consider nothing else but the comparison of magnitudes, numbers, times, and motions, and their proportions one to another, have thereby been the authors of all those excellences, wherein we differ from such savage people as are now the inhabitants of divers places in America; and as have been the inhabitants heretofore of those countries where at this day arts and sciences do most flourish. For from the studies of these men hath proceeded, whatsoever cometh to us for ornament by navigation; and whatsoever we have beneficial to human society by the division, distinction, and portraying of the face of the earth; whatsoever also we have by the account of times, and foresight of the course of heaven; whatsoever by measuring distances, planes, and solids of all sorts; and whatsoever either elegant or defensible in building: all which supposed away, what do we differ from the wildest of the Indians? Yet to this day was it never heard of, that there was any controversy concerning any conclusion in this subject; the science whereof hath nevertheless been continually amplified and enriched with conclusions of most difficult and profound speculation. The reason whereof is apparent to every man that looketh into their writings; for they proceed from most low and humble principles, evident even to the meanest capacity; going on slowly, and with most scrupulous ratiocination (*viz.*) from the imposition of names they infer the truth of their first propositions; and from two of the first, a third; and from any two of the three a fourth; and so on, according to the steps of science, mentioned chap. VI, sect. 4. On the other side, those men who have written concerning the faculties, passions, and manners of men, that is to say, of moral philosophy, or of policy, government, and laws, whereof there be infinite volumes have been so far from removing doubt and controversy in the

questions they have handled, that they have very much multiplied the same; nor doth any man at this day so much as pretend to know more than hath been delivered two thousand years ago by Aristotle. And yet every man thinks that in this subject he knoweth as much as any other; supposing there needeth thereunto no study but that it accrueth to them by natural wit; though they play, or employ their mind otherwise in the purchase of wealth or place. The reason whereof is no other, than that in their writings and discourses they take for principles those opinions which are already vulgarly received, whether true or false; being for the most part false. There is therefore a great deal of difference between teaching and persuading; the signs of this being controversy; the sign of the former, no controversy

4. There be two sorts of men that be commonly called learned: one is that sort that proceedeth evidently from humble principles, as is described in the last section; and these men are called mathematics; the other are they that take up maxims from their education, and from the authority of men, or of custom, and take the habitual discourse of the tongue for ratiocination; and these are called dogmatics. Now seeing in the last section, those we call mathematics are absolved of the crime of breeding controversy; and they that pretend not to learning cannot be accused; the fault lieth altogether in the dogmatics, that is to say, those that are imperfectly learned, and with passion press to have their opinions pass everywhere for truth, without any evident demonstration either from experience, or from places of Scripture of uncontroverted interpretation.

5. The expression of those conceptions which cause in us the expectation of good while we deliberate, as also of those which cause our expectation of evil, is that which we call COUNSELLING. And as in the internal deliberation of the mind concerning what we ourselves are to do, or not to do, the consequences of the action are our counsellors, by alternate succession in the mind; so in the counsel which a man taketh from other men, the counsellors alternately do make appear the consequences of the action, and do not any of them deliberate, but

furnish amongst them all him that is counselled, with arguments whereupon to deliberate within himself.

6. Another use of speech is the expression of appetite, intention, and will; as the appetite of knowledge by interrogation; appetite to have a thing done by another, as request, prayer, petition; expressions of our purpose or intention, as PROMISE, which is the affirmation or negation of some action to be done in the future; THREATENING, which is the promise of evil; and COMMANDING, which is that speech by which we signify to another our appetite or desire to have any thing done, or left undone, for reason contained in the will itself: for it is not properly said, *Sic volo, sic jubeo*, without that other clause, *Stet pro ratione voluntas*: and when the command is a sufficient reason to move us to the action, then is that command called a LAW.

7. Another use of speech is INSTIGATION and APPEASiNG, by which we increase or diminish one another's passions; it is the same thing with persuasion: the difference not being real. For the begetting of opinion and passion is the same act; but whereas in persuasion we aim at getting opinion from passion; here, the end is, to raise passion from opinion. And as in raising an opinion. from passion, any premises are good enough to infer the desired conclusion; so, in raising passion from opinion, it is no matter whether the opinion be true or false, or the narration historical or fabulous. For not truth, but image, maketh passion; and a tragedy affecteth no less than a murder if well acted.

8. Though words be the signs we have of one another's opinions and intentions: because the equivocation of them is so frequent, according to the diversity of contexture, and of the company wherewith they go (which the presence of him that speaketh, our sight of his actions, and conjecture of his intentions, must help to discharge us of): it must be extreme hard to find out the opinions and meanings of those men that are gone from us long ago, and have left us no other signification thereof but their books; which cannot possibly be understood without history enough to discover those aforementioned circumstances, and also without great prudence to observe them.

9. When it happeneth that a man signifieth unto us two contradictory opinions whereof the one is clearly and directly signified, and the other either drawn from that by consequence, or not known to be contradictory to it; then (when he is not present to explicate himself better) we are to take the former of his opinions; for that is clearly signified to be his, and directly, whereas the other might proceed from error in the deduction, or ignorance of the repugnancy. The like also is to be held in two contradictory expressions of a man's intention and will, for the same reason.

10. Forasmuch as whosoever speaketh to another, intendeth thereby to make him understand what he saith; if he speak unto him, either in a language which he that heareth understandeth not, or use any word in other sense than he believeth is the sense of him that heareth; he intendeth also to make him not understand what he saith; which is a contradiction of himself. It is therefore always to be supposed, that he which intendeth not to deceive, alloweth the private interpretation of his speech to him to whom it is addressed.

11. Silence in them that think it will be so taken, is a sign of consent; for so little labour being required to say No, it is to be presumed, that in this case he that saith it not, consenteth.

Chapter 14: Of the Estate and Right of Nature

IN THE PRECEDENT chapters hath been set forth the whole nature of man, consisting in the powers natural of his body and mind, and may all be comprehended in these four: strength of body, experience, reason, and passion.

2. In this chapter it will be expedient to consider in what estate of security this our nature hath placed us, and what probability it hath left us of continuing and preserving ourselves against the violence of one another. And first, if we consider how little odds there is of strength or knowledge between men of mature age, and with how great facility he that is the weaker in strength or in wit, or in both, may utterly destroy the power of the stronger; since there needeth but little force to the taking away of a man's life; we may conclude that men considered in mere nature, ought to admit amongst themselves equality; and that he that claimeth no more, may be esteemed moderate.

3. On the other side, considering the great difference there is in men, from the diversity of their passions, how some are vainly glorious, and hope for precedency and superiority above their fellows, not only when they are equal in power, but also when they are inferior; we must needs acknowledge that it must necessarily follow, that those men who are moderate, and look for no more but equality of nature, shall be obnoxious to the force of others, that will attempt to subdue them. And from hence shall proceed a general diffidence in mankind, and mutual fear one of another.

4. Farther, since men by natural passion are divers ways offensive one to another, every man thinking well of himself, and hating to see the same in others, they must needs provoke one another by words, and other signs of contempt and hatred, which are incident to all comparison: till at last they must determine the pre-eminence by strength and force of body.

5. Moreover, considering that many men 's appetites carry them to one and the same end; which end sometimes can neither be enjoyed in common, nor divided, it followeth that the stronger must enjoy it alone, and that it be decided by battle who is the stronger. And thus the greatest part of men, upon no assurance of odds, do nevertheless, through vanity, or comparison, or appetite, provoke the rest, that otherwise would be contented with equality.

6. And forasmuch as necessity of nature maketh men to will and desire bonum sibi, that which is good for themselves, and to avoid that which is hurtful; but most of all that terrible enemy of nature, death, from whom we expect both the loss of all power, and also the greatest of bodily pains in the losing; it is not against reason that a man doth all he can to preserve his own body and limbs, both from death and pain. And that which is not against reason, men call RIGHT, or jus, or blameless liberty of using our own natural power and ability. It is therefore a right of nature: that every man may preserve his own life and limbs, with all the power he hath.

7. And because where a man hath right to the end, and the end cannot be attained without the means, that is, without such things as are necessary to the end, it is consequent that it is not against reason, and therefore right for a man, to use all means and do whatsoever action is necessary for the preservation of his body.

8. Also every, man by right of nature is judge himself of the necessity of the means, and of the greatness of the danger. For if it be against reason, that I be judge of mine own danger myself, then it is reason, that another man be judge thereof. But the same reason that maketh another man judge of those things that concern me, maketh me also judge of that that concerneth him. And therefore I have reason to judge of his sentence, whether it be for my benefit, or not.

9. As a man's judgment, in right of nature, is to be employed for his own benefit, so also the strength, knowledge, and art of every man is then rightly employed, when he useth it for himself; else must not a man have right to preserve himself.

10. Every man by nature hath right to all things, that is to say, to do whatsoever he listeth to whom he listeth, to possess, use, and enjoy all things he will and can. For seeing all things he willeth, must therefore be good unto him in his own judgment, because he willeth them; and may tend to his preservation some time or other; or he may judge so, and we have made him judge thereof, sect. 8: it followeth that all things may rightly also be done by him. And for this cause it is rightly said: *Natura dedit omnia omnibus*, that Nature hath given all things to all men; insomuch, that *jus* and *utile*, right and profit, is the same thing. But that right of all men to all things, is in effect no better than if no man had right to any thing. For there is little use and benefit of the right a man hath, when another as strong, or stronger than himself, hath right to the same.

11. Seeing then to the offensiveness of man's nature one to another, there is added a right of every man to every thing, whereby one man invadeth with right, and another with right resisteth; and men live thereby in perpetual diffidence, and study how to preoccupate each other; the estate of men in this natural liberty is the estate of war. For WAR is nothing else but that time wherein the will and intention of contending by force is either by words or actions sufficiently declared; and the time which is not war is PEACE.

12. The estate of hostility and war being such, as thereby nature itself is destroyed, and men kill one another (as we know also that it is, both by the experience of savage nations that live at this day, and by the histories of our ancestors, the old inhabitants of Germany and other now civil countries, where we find the people few and short lived, and without the ornaments and comforts of life, which by peace and society are usually invented and procured): he therefore that desireth to live in such an estate, as is the estate of liberty and right of all to all, contradicteth himself. For every man by natural necessity desireth his own good, to which this estate is contrary, wherein we suppose contention between men by nature equal, and able to destroy one another.

13. Seeing this right of protecting ourselves by our own discretion and force, proceedeth from danger, and that danger from the equality between men's forces:

much more reason is there, that a man prevent such equality before the danger cometh, and before there be necessity of battle. A man therefore that hath another man in his power to rule or govern, to do good to, or harm, hath right, by the advantage of this his present power, to take caution at his pleasure, for his security against that other in the time to come. He therefore that hath already subdued his adversary, or gotten into his power any other that either by infancy, or weakness, is unable to resist him, by right of nature may take the best caution, that such infant, or such feeble and subdued person can give him, of being ruled and governed by him for the time to come. For seeing we intend always our own safety and preservation, we manifestly contradict that our intention, if we willingly dismiss such a one, and suffer him at once to gather strength and be our enemy. Out of which may also be collected, that irresistible might in the state of nature is right.

14. But since it is supposed from the equality of strength and other natural faculties of men, that no man is of might sufficient, to assure himself for any long time, of preserving himself thereby, whilst he remaineth in the state of hostility and war; reason therefore dictateth to every man for his own good, to seek after peace, as far forth as there is hope to attain the same; and to strengthen himself with all the help he can procure, for his own defence against those, from whom such peace cannot be obtained; and to do all those things which necessarily conduce thereunto.

Chapter 15: Of the Divesting Natural Right by Gift and Covenant

1. WHAT IT is we call the law of nature, is not agreed upon, by those that have hitherto written. For the most part, such writers as have occasion to affirm, that anything is against the law of nature, do allege no more than this, that it is against the consent of all nations, or the wisest and most civil nations. But it is not agreed upon, who shall judge which nations are the wisest. Others make that against the law of nature, which is contrary to the consent of all mankind; which definition cannot be allowed, because then no man could offend against the law of nature; for the nature of every man is contained under the nature of mankind. But forasmuch as all men, carried away by the violence of their passion, and by evil customs, do those things which are commonly said to be against the law of nature; it is not the consent of passion, or consent in some error gotten by custom, that makes the law of nature. Reason is no less of the nature of man than passion, and is the same in all men, because all men agree in the will to be directed and governed in the way to that which they desire to attain, namely their own good, which is the work of reason. There can therefore be no other law of nature than reason, nor no other precepts of NATURAL LAW, than those which declare unto us the ways of peace, where the same may be obtained, and of defence where it may not.

2. One precept of the law of nature therefore is this, that every man divest himself of the right he hath to all things by nature. For when divers men have right not only to all things else, but to one another's persons, if they use the same, there ariseth thereby invasion on the one part, and resistance on the other, which is war; and therefore contrary to the law of nature, the sun whereof consisteth in making peace.

3. When a man divesteth and putteth from himself his right, he either simply relinquisheth it, or transferreth the same to another man. To RELINQUISH it, is by sufficient signs to declare, that it is his will no more to do that action, which of right he might have done before. To TRANSFER right to another, is by sufficient signs to declare to that other accepting thereof, that it is his will not to resist, or hinder him, according to that right he had thereto before he transferred it. For seeing that by nature every man hath right to every thing, it is impossible for a man to transfer unto another any right that he had not before. And therefore all that a man doth in transferring of right, is no more but a declaring of the will, to suffer him, to whom he hath so transferred his right, to make benefit of the same, without molestation. As for example, when a man giveth his land or goods to another, he taketh from himself the right to enter into, and make use of the said land or goods, or otherwise to hinder him of the use of what he hath given.

4. In transferring of right, two things therefore are required: one on the part of him that transferreth; which is, a sufficient signification of his will therein: the other, on the part of him to whom it is transferred; which is, a sufficient signification of his acceptation thereof. Either of these failing, the right remaineth where it was; nor is it to be supposed, that he which giveth his right to one that accepteth it not, doth thereby simply relinquish it, and transfer it to whomsoever will receive it; inasmuch as the cause of the transferring the same to one, rather than to another, is in that one, rather than in the rest.

5. When there appear no other signs that a man hath relinquished, or transferred his right, but only words; it behoveth that the same be done in words, that signify the present time, or the time past, and not only the time to come. For he that saith of the time to come, as for example, to-morrow: I will give, declareth evidently, that he hath not yet given. The right therefore remaineth in him to-day, and so continues till he have given actually. But he that saith: I give, presently, or have given to another any thing, to have and enjoy the same to-morrow, or any other time future, hath now actually transferred the said right, which otherwise he should have had at the time that the other is to enjoy it.

6. But because words alone are not a sufficient declaration of the mind, as hath been shewn chap. XIII, sect. 8 words spoken *de futuro*, when the will of him that speaketh them may be gathered by other signs, may be taken very often as if they were meant *de praesenti*. For when it appeareth that he that giveth would have his word so understood, by him to whom he giveth, as if he did actually transfer his right, then he must needs be understood to will all that is necessary to the same.

7. When a man transferreth any right of his to another, without consideration of reciprocal benefit, past, present, or to come; this is called **FREE GIFT**. And in free gift no other words can be binding, but those which are *de praesenti*, or *de praeterito*: for being *de futuro* only, they transfer nothing, nor can they be understood, as if they proceeded from the will of the giver; because being a free gift, it carrieth with it no obligation greater than that which is enforced by the words. For he that promiseth to give, without any other consideration but his own affection, so long as he hath not given, deliberateth still, according as the causes of his affections continue or diminish; and he that deliberateth hath not yet willed, because the will is the last act of his deliberation. He that promiseth therefore, is not thereby a donor, but *doson*; which name was given to that Antiochus, that promised often, but seldom gave.

8. When a man transferreth his right, upon consideration of reciprocal benefit, this is not free gift, but mutual donation; and is called **CONTRACT**. And in all contracts, either both parties presently perform, and put each other into a certainty and assurance of enjoying what they contract for: as when men buy or sell, or barter; or one party performeth presently, and the other promiseth, as when one selleth upon trust; or else neither party performeth presently, but trust one another. And it is impossible there should be any kind of contract besides these three. For either both the contractors trust, or neither; or else one trusteth, and the other not.

9. In all contracts where there is trust, the promise of him that is trusted, is called a **COVENANT**. And this, though it be a promise, and of the time to come, yet doth it transfer the right, when that time cometh, no less than an actual donation. For it is a manifest sign, that he which did perform, understood it was

the will of him that was trusted, to perform also. Promises therefore, upon consideration of reciprocal benefit, are covenants and signs of the will, or last act of deliberation, whereby the liberty of performing, or not performing, is taken away, and consequently are obligatory. For where liberty ceaseth, there beginneth obligation.

10. Nevertheless, in contracts that consist of such mutual trust, as that nothing be by either party performed for the present, when the contract is between such as are not compellable, he that performeth first, considering the disposition of men to take advantage of every thing for their benefit, doth but betray himself thereby to the covetousness, or other passion of him with whom he contracteth. And therefore such covenants are of none effect. For there is no reason why the one should perform first, if the other be likely not to perform afterward. And whether he be likely or not, he that doubteth, shall be judge himself (as hath been said chap. XIV, sect. 8), as long as they remain in the estate and liberty of nature. But when there shall be such power coercive over both the parties, as shall deprive them of their private judgments in this point; then may such covenants be effectual; seeing he that performeth first shall have no reasonable cause to doubt of the performance of the other, that may be compelled thereunto.

11. And forasmuch as in all covenants, and contracts, and donations, the acceptance of him to whom the right is transferred, is necessary to the essence of those covenants, donations, &c., it is impossible to make a covenant or donation to any, that by nature, or absence, are unable, or if able, do not actually declare their acceptance of the same. First of all therefore it is impossible for any man to make a covenant with God Almighty, farther than it hath pleased him to declare who shall receive and accept of the said covenant in his name. Also it is impossible to make covenant with those living creatures, of whose wills we have no sufficient sign, for want of common language.

12. A covenant to do any action at a certain time and place, is then dissolved by the covenanter, when that time cometh, either by the performance, or by the violation. For a covenant is void that is once impossible. But a covenant not to do,

without time limited, which is as much as to say, a covenant never to do, is dissolved by the covenanter then only, when he violateth it, or dieth. And generally all covenants are dischargeable by the covenantee, to whose benefit, and by whose right, he that maketh the covenant is obliged. This right therefore of the covenantee relinquished, is a release of the covenant. And universally, for the same reason, all obligations are determinable at the will of the obliger.

13. It is a question often moved, whether such covenants oblige, as are extorted from men by fear. As for example: whether, if a man for fear of death, have promised to give a thief an hundred pounds the next day, and not discover him, whether such covenant be obligatory or not. And though in some cases such covenant may be void, yet it is not therefore void, because extorted by fear. For there appeareth no reason, why that which we do upon fear, should be less firm than that which we do for covetousness. For both the one and the other maketh the action voluntary. And if no covenant should be good, that proceedeth from fear of death, no conditions of peace between enemies, nor any laws could be of force; which are all consented to from that fear. For who would lose the liberty that nature hath given him, of governing himself by his own will and power, if they feared not death in the retaining of it? What prisoner in war might be trusted to seek his ransom, and ought not rather to be killed, if he were not tied by the grant of his life, to perform his promise? But after the introduction of policy and laws, the case may alter; for if by the law the performance of such a covenant be forbidden, then he that promiseth anything to a thief, not only may, but must refuse to perform it. But if the law forbid not the performance, but leave it to the will of the promiser, then is the performance still lawful: and the covenant of things lawful is obligatory, even towards a thief.

14. He that giveth, promiseth, or covenanteth to one, and after giveth, promiseth, or covenanteth the same to another, maketh void the latter act. For it is impossible for a man to transfer that right which he himself hath not; and that right he hath not, which he himself hath before transferred.

15. An OATH is a clause annexed to a promise, containing a renunciation of God's mercy, by him that promiseth, in case he perform not as far as is lawful and possible for him to do. And this appeareth by the words which make the essence of the oath (viz.) so help me God. So also was it amongst the heathen. And the form of the Romans was, Thou Jupiter kill him that breaketh, as I kill this beast. The intention therefore of an oath being to provoke vengeance upon the breakers of covenants; it is to no purpose to swear by men, be they never so great, because their punishment by divers accidents may be avoided, whether they will, or no; but God's punishment not. Though it were a custom of many nations, to swear by the life of their princes; yet those princes being ambitious of divine honour, give sufficient testimony, that they believed, nothing ought to be sworn by, but the Deity.

16. And seeing men cannot be afraid of the power they believe not, and an oath is to no purpose, without fear of him they swear by; it is necessary that he that sweareth, do it in that form which himself admitteth in his own religion, and not in that form which he useth, that putteth him to the oath. For though all men may know by nature, that there is an Almighty power, nevertheless they believe not, that they swear by him, in any other form or name, than what their own (which they think the true) religion teacheth them.

17. And by the definition of an oath, it appeareth that it addeth not a greater obligation to perform the covenant sworn, than the covenant carrieth in itself, but it putteth a man into a greater danger, and of greater punishment.

18. Covenants and oaths are de voluntariis, that is, de possibilibus. Nor can the covenantee understand the covenanter to promise impossibles; for they fall not under deliberation: and consequently (by chap. XIII, sect. 10, which maketh the covenantee interpreter), no covenant is understood to bind further, than to our best endeavour, either in performance of the thing promised, or in something equivalent.

Chapter 16: Some of the Laws of Nature

1. IT IS a common saying that nature maketh nothing in vain. And it is most certain, that as the truth of a conclusion, is no more but the truth of the premises that make it; so the force of the command, or law of nature, is no more than the force of the reasons inducing thereunto. Therefore the law of nature mentioned in the former chapter, sect. 2, namely, That every man should divest himself of the right, &c. were utterly vain, and of none effect, if this also were not a law of the same Nature, That every man is obliged to stand to, and perform, those covenants which he maketh. For what benefit is it to a man, that any thing be promised, or given unto him, if he that giveth, or promiseth, performeth not, or retaineth still the right of taking back what he hath given?

2. The breach or violation of covenant, is that which men call INJURY, consisting in some action or omission, which is therefore called UNJUST. For it is action or omission, without jus, or right; which was transferred or relinquished before. There is a great similitude between that we call injury, or injustice in the actions and conversations of men in the world, and that which is called absurd in the arguments and disputations of the Schools. For as he, that is driven to contradict an assertion by him before maintained, is said to be reduced to an absurdity; so he that through passion doth, or omitteth that which before by covenant he promised not to do, or not to omit, is said to commit injustice. And there is in every breach of covenant a contradiction properly so called; for he that covenanteth, willeth to do, or omit, in the time to come; and he that doth any action, willeth it in that present, which is part of the future time, contained in the covenant: and therefore he that violateth a covenant, willeth the doing and the not doing of the same thing, at the same time; which is a plain contradiction. And so

injury is an absurdity of conversation, as absurdity is a kind of injustice in disputation.

3. In all violation of covenant, (to whomsoever accrueth the damage) the injury is done only to him to whom the covenant was made. For example, if a man covenant to obey his master, and the master command him to give money to a third, which he promiseth to do, and doth not; though this be to the damage of the third, yet the injury is done to the master only. For he could violate no covenant with him, with whom none was made, and therefore doth him no injury: for injury consisteth in violation of covenant, by the definition thereof.

4. The names of just, unjust, justice, injustice, are equivocal, and signify diversely. For justice and injustice, when they be attributed to actions, signify the same thing with no injury, and injury; and denominate the action just, or unjust, but not the man so; for they denominate him guilty, or not guilty. But when justice and injustice are attributed to men, they signify proneness and affection, and inclination of nature, that is to say, passions of the mind apt to produce just and unjust actions. So that when a man is said to be just, or unjust, not the action, but the passion, and aptitude to do such action is considered. And therefore a just man may have committed an unjust act; and an unjust man may have done justly not only one, but most of his actions. For there is an *oderunt peccare* in the unjust, as well as in the just, but from different causes; for the unjust man who abstaineth from injuries for fear of punishment, declareth plainly that the justice of his actions dependeth upon civil constitution, from whence punishments proceed; which would otherwise in the estate of nature be unjust, according to the fountain from whence they spring. This distinction therefore of justice, and injustice, ought to be remembered: that when injustice is taken for guilt, the action is unjust, but not therefore the man; and when justice is taken for guiltlessness, the actions are just, and yet not always the man. Likewise when justice and injustice are taken for habits of the mind, the man may be just, or unjust, and yet not all his actions so.

5. Concerning the justice of actions, the same is usually divided into two kinds, whereof men call the one commutative, and the other distributive; and are

said to consist, the one in proportion arithmetical, the other in geometrical: and commutative justice, they place in permutation, as buying, selling, and barter. distributive, in giving to every man according to their deserts. Which distinction is not well made, inasmuch as injury, which is the injustice of action, consisteth not in the inequality of things changed, or distributed, but in the inequality that men (contrary to nature and reason) assume unto themselves above their fellows; of which inequality shall be spoken hereafter. And for commutative justice placed in buying and selling, though the thing bought be unequal to the price given for it; yet forasmuch as both the buyer and the seller are made judges of the value, and are thereby both satisfied: there can be no injury done on either side, neither party having trusted, or covenanted with the other. And for distributive justice, which consisteth in the distribution of our own benefits; seeing a thing is therefore said to be our own, because we may dispose of it at our own pleasure: it can be no injury to any man, though our liberality be further extended towards another, than towards him; unless we be thereto obliged by covenant: and then the injustice consisteth in the violation of that covenant, and not in the inequality of distribution.

6. It happeneth many times that a man benefitteth or contributeth to the power of another, without any covenant, but only upon confidence and trust of obtaining the grace and favour of that other, whereby he may procure a greater, or no less benefit or assistance to himself. For by necessity of nature every man doth in all his voluntary actions intend some good unto himself. In this case it is a law of nature, That no man suffer him, that thus trusteth to his charity, or good affection towards him, to be in the worse estate for his trusting. For if he shall so do, men will not dare to confer mutually to each other's defence, nor put themselves into each other's mercy upon any terms whatsoever. but rather abide the utmost and worst event of hostility. by which general diffidence, men will not only be enforced to war, but also afraid to come so much within the danger of one another, as to make any overture of peace. But this is to be understood of those only, that confer their benefits (as I have said) upon trust only, and not for triumph

or ostentation. For as when they do it upon trust, the end they aimed at, namely to be well used, is the reward; so also when they do it for ostentation, they have the reward in themselves.

7. But seeing in this case there passeth no covenant, the breach of this law of nature is not to be called injury; it hath another name (viz.) INGRATITUDE.

8. It is also a law of nature, That every man do help and endeavour to accommodate each other, as far as may be without danger of their persons, and loss of their means, to maintain and defend themselves. For seeing the causes of war and desolation proceed from those passions, by which we strive to accommodate ourselves, and to leave others as far as we can behind us: it followeth that that passion by which we strive mutually to accommodate each other, must be the cause of peace. And this passion is that charity defined chap. IX, sect. 17.

9. And in this precept of nature. is included and comprehended also this, That a man forgive and pardon him that hath done him wrong, upon his repentance, and caution for the future. For PARDON is peace granted to him, that (having provoked to war) demandeth it. It is not therefore charity, but fear, when a man giveth peace to him that repenteth not, nor giveth caution for maintaining thereof in the time to come. For he that repenteth not, remaineth with the affection of an enemy; as also doth he that refuseth to give caution, and consequently is presumed not to seek after peace, but advantage. And therefore to forgive him is not commanded in this law of nature, nor is charity, but may sometimes be prudence. Otherwise, not to pardon upon repentance and caution, considering men cannot abstain from provoking one another, is never to give peace; and that is against the general definition of the law of nature.

10. And seeing the law of nature commandeth pardon when there is repentance, and caution for the future; it followeth that the same law ordaineth, That no revenge be taken upon the consideration only of the offence past, but of the benefit to come; that is to say, that all revenge ought to tend to amendment, either of the person offending, or of others, by the example of his punishment;

which is sufficiently apparent, in that the law of nature commandeth pardon, where the future time is secured. The same is also apparent by this: that revenge when it considereth the offence past, is nothing else but present triumph and glory, and directeth to no end; for end implieth some future good; and what is directed to no end, is therefore unprofitable; and consequently the triumph of revenge, is vain glory: and whatsoever is vain, is against reason; and to hurt one another without reason, is contrary to that, which by supposition is every man's benefit, namely peace; and what is contrary to peace, is contrary to the law of nature.

11. And because all signs which we shew to one another of hatred and contempt, provoke in the highest degree to quarrel and battle (inasmuch as life itself, with the condition of enduring scorn, is not esteemed worth the enjoying, much less peace); it must necessarily be implied as a law of nature, That no man reproach, revile, deride, or any otherwise declare his hatred, contempt, or disesteem of any other. But this law is very little practised. For what is more ordinary than reproaches of those that are rich, towards them that are not? or of those that sit in place of judicature, towards those that are accused at the bar? although to grieve them in that manner, be no part of the punishment for their crime, nor contained in their office; but use hath prevailed, that what was lawful in the lord towards the servant whom he maintaineth, is also practised as lawful in the more mighty towards the less; though they contribute nothing towards their maintenance.

12. It is also a law of nature, That men allow commerce and traffic indifferently to one another. For he that alloweth that to one man, which he denieth to another, declareth his hatred to him, to whom he denieth; and to declare hatred is war. And upon this title was grounded the great war between the Athenians and the Peloponnesians. For would the Athenians have condescended to suffer the Megareans, their neighbours, to traffic in their ports and markets, that war had not begun.

13. And this also is a law of nature, That all messengers of peace, and such as are employed to procure and maintain amity between man and man, may safely come and go. For seeing peace is the general law of nature, the means thereto, such as are these men, must in the same law be comprehended.

Chapter 17: Other Laws of Nature

1. THE QUESTION, which is the better man, is determinable only in the estate of government and policy, though it be mistaken for a question of nature, not only by ignorant men, that think one man's blood better than another's by nature; but also by him, whose opinions are at this day, and in these parts of greater authority than any other human writings (Aristotle). For he putteth so much difference between the powers of men by nature, that he doubteth not to set down, as the ground of all his politics, that some men are by nature worthy to govern, and others by nature ought to serve. Which foundation hath not only weakened the whole frame of his politics, but hath also given men colour and pretences, whereby to disturb and hinder the peace of one another. For though there were such a difference of nature, that master and servant were not by consent of men, but by inherent virtue; yet who hath that eminency of virtue, above others, and who is so stupid as not to govern himself, shall never be agreed upon amongst men; who do every one naturally think himself as able, at the least, to govern another, as another to govern him. And when there was any contention between the finer and the coarser wits, (as there hath been often in times of sedition and civil war) for the most part these latter carried away the victory and as long as men arrogate to themselves more honour than they give to others, it cannot be imagined how they can possibly live in peace: and consequently we are to suppose, that for peace sake, nature hath ordained this law, That every man acknowledge other for his equal. And the breach of this law, is that we call PRIDE.

2. As it was necessary that a man should not retain his right to every thing, so also was it, that he should retain his right to some things: to his own body (for example) the right of defending, whereof he could not transfer. to the use of fire, water, free air, and place to live in, and to all things necessary for life. Nor doth

the law of nature command any divesting of other rights, than of those only which cannot be retained without the loss of peace. Seeing then many rights are retained, when we enter into peace one with another, reason and the law of nature dictateth, Whatsoever right any man requireth to retain, he allow every other man to retain the same. For he that doth not so, alloweth not the equality mentioned in the former section. For there is no acknowledgement of the equality of worth, without attribution of the equality of benefit and respect. And this allowance of *aequalia aequalibus*, is the same thing with the allowing of *proportionalia proportionalibus*. For when a man alloweth to every man alike, the allowance he maketh will be in the same proportion, in which are the numbers of men to whom they are made. And this is it men mean by distributive justice, and is properly termed EQUITY. The breach of this law is that which the Greeks call *Pleovezia*, which is commonly rendered covetousness, but seemeth to be more precisely expressed by the word ENCROACHING.

3. If there pass no other covenant, the law of nature is, That such things as cannot be divided, be used in common, proportionably to the numbers of them that are to use the same, or without limitation when the quantity thereof sufficeth. For first supposing the thing to be used in common not sufficient for them that are to use it without limitation, if a few shall make more use thereof than the rest, that equality is not observed, which is required in the second section. And this is to be understood, as all the rest of the laws of nature, without any other covenant antecedent; for a man may have given away his right of common, and so the case be altered.

4. In those things which neither can be divided, nor used in common, the rule of nature must needs be one of these: lot, or alternate use; for besides these two ways, there can no other equality be imagined. And for alternate use, he that beginneth hath the advantage; and to reduce that advantage to equality, there is no other way but lot: in things, therefore, indivisible and incommunicable, it is the law of nature, That the use be alternate, or the advantage given away by lot; because there is no other way of equality'. and equality is the law of nature.

5. There be two sorts of lots: one arbitrary, made by men, and commonly known by the names of lot, chance, hazard, and the like; and there is natural lot, such as is primogeniture, which is no more but the chance, or lot of being first born; which, it seemeth, they considered, that call inheritance by the name of cleronomia, which signifieth distribution by lot. Secondly, *prima occupatio*, first seizing or finding of a thing, whereof no man made use before, which for the most part also is merely chance.

6. Although men agree upon these laws of nature, and endeavour to observe the same; yet considering the passions of men, that make it difficult to understand by what actions, and circumstances of actions, those laws are broken; there must needs arise many great controversies about the interpretation thereof, by which the peace must needs be dissolved, and men return again to their former estate of hostility. For the taking away of which controversies, it is necessary that there be some common arbitrator and judge, to whose sentence both the parties to the controversy ought to stand. And therefore it is a law of nature, That in every controversy, the parties thereto ought mutually to agree upon an arbitrator, whom they both trust; and mutually to covenant to stand to the sentence he shall give therein. For where every man is his own judge, there properly is no judge at all; as where every man carveth out his own right, it hath the same effect, as if there were no right at all; and where is no judge, there is no end of controversy, and therefore the right of hostility remaineth.

7. AN ARBITRATOR therefore or judge is he that is trusted by the parties to any controversy, to determine the same by the declaration of his own judgment therein. Out of which followeth: first, that the judge ought not to be concerned in the controversy he endeth; for in that case he is party, and ought by the same reason to be judged by another; secondly, that he maketh no covenant with either of the parties, to pronounce sentence for the one, more than for the other. Nor doth he covenant so much, as that his sentence shall be just; for that were to make the parties judges of the sentence, whereby the controversy would remain still undecided. Nevertheless for the trust reposed in him, and for the equality which

the law of nature requireth him to consider in the parties, he violateth that law, if for favour, or hatred to either party, he give other sentence than he thinketh right. And thirdly, that no man ought to make himself judge in any controversy between others, unless they consent and agree thereto.

8. It is also of the law of nature, That no man obtrude or press his advice or counsel to any man that declareth himself unwilling to hear the same. For seeing a man taketh counsel concerning what is good or hurt of himself only, and not of his counsellor; and that counsel is a voluntary action, and therefore tendeth also to the good of the counsellor: there may often be just cause to suspect the counsellor. And though there be none, yet seeing counsel unwilling heard is a needless offence to him that is not willing to hear it, and offences tend all to the breach of peace: it is therefore against the law of nature to obtrude it.

9. A man that shall see these laws of nature set down and inferred with so many words, and so much ado, may think there is yet much more difficulty and subtlety required to acknowledge and do according to the said laws in every sudden occasion, when a man hath but a little time to consider. And while we consider man in most passions, as of anger, ambition, covetousness, vain glory, and the like that tend to the excluding of natural equality, it is true; but without these passions, there is an easy rule to know upon a sudden, whether the action I be to do, be against the law of nature or not: and it is but this, That a man imagine himself in the place of the party with whom he hath to do, and reciprocally him in his; which is no more but a changing (as it were) of the scales. For every man's passion weigheth heavy in his own scale, but not in the scale of his neighbour. And this rule is very well known and expressed by this old dictate, *Quod tibi fieri non vis, alteri ne feceris*.

10. These laws of nature, the sum whereof consisteth in forbidding us to be our own judges, and our own carvers, and in commanding us to accommodate one another; in case they should be observed by some, and not by others, would make the observers but a prey to them that should neglect them; leaving the good, both without defence against the wicked, and also with a charge to assist them: which

is against the scope of the said laws, that are made only for the protection and defence of them that keep them. Reason therefore, and the law of nature over and above all these particular laws, doth dictate this law in general, That those particular laws be so far observed, as they subject us not to any incommmodity, that in our own judgments may arise, by the neglect thereof in those towards whom we observe them; and consequently requireth no more but the desire and constant intention to endeavour and be ready to observe them, unless there be cause to the contrary in other men's refusal to observe them towards us. The force therefore of the law of nature is not in *foro externo*, till there be security for men to obey it; but is always in *foro interno*, wherein the action of obedience being unsafe, the will and readiness to perform is taken for the performance.

11. Amongst the laws of nature, customs and prescriptions are not numbered. For whatsoever action is against reason, though it be reiterated never so often, or that there be never so many precedents thereof, is still against reason, and therefore not a law of nature, but contrary to it. But consent and covenant may so alter the cases, which in the law of nature may be put, by changing the circumstances, that that which was reason before, may afterwards be against it; and yet is reason still the law. For though every man be bound to allow equality to another. yet if that other shall see cause to renounce the same, and make himself inferior, then, if from thenceforth he consider him as. inferior, he breaketh not thereby that law of nature that commandeth to allow equality. In sum, a man's own consent may abridge him of the liberty which the law of nature leaveth him, but custom not; nor can either of them abrogate either these, or any other law of nature.

12. And forasmuch as law (to speak properly) is a command, and these dictates, as they proceed from nature, are not commands; they are not therefore called laws in respect of nature, but in respect of the author of nature, God Almighty.

13. And seeing the laws of nature concern the conscience, not he only breaketh them that doth any action contrary, but also he whose action is conformable to

them, in case he think it contrary. For though the action chance to be right, yet in his judgment he despiseth the law.

14. Every man by natural passion, calleth that good which pleaseth him for the present, or so far forth as he can foresee; and in like manner that which displeaseth him evil. And therefore he that foreseeeth the whole way to his preservation (which is the end that every one by nature aimeth at) must also call it good, and the contrary evil. And this is that good and evil, which not every man in passion calleth so, but all men by reason. And therefore the fulfilling of all these laws is good in reason; and the breaking of them evil. And so also the habit, or disposition, or intention to fulfil them good; and the neglect of them evil. And from hence cometh that distinction of *malum paenae*, and *malum culpae*; for *malum paenae* is any pain or molestation of mind whatsoever; but *malum culpae* is that action which is contrary to reason and the law of nature; as also the habit of doing according to these and other laws of nature that tend to our preservation, is that we call VIRTUE; and the habit of doing the contrary, VICE. As for example, justice is that habit by which we stand to covenants, injustice the contrary vice; equity that habit by which we allow equality of nature, arrogance the contrary vice; gratitude the habit whereby we requite the benefit and trust of others, ingratitude the contrary vice; temperance the habit by which we abstain from all things that tend to our destruction, intemperance the contrary vice; prudence, the same with virtue in general. As for the common opinion, that virtue consisteth in mediocrity, and vice in extremes, I see no ground for it, nor can find any such mediocrity. Courage may be virtue, when the daring is extreme, if the cause be good; and extreme fear no vice when the danger is extreme. To give a man more than his due, is no injustice, though it be to give him less; and in gifts it is not the sum that maketh liberality, but the reason. And so in all other virtues and vices. I know that this doctrine of mediocrity is Aristotle's, but his opinions concerning virtue and vice, are no other than those which were received then, and are still by the generality of men unstudied; and therefore not very likely to be accurate.

15. The sum of virtue is to be sociable with them that will be sociable, and formidable to them that will not. And the same is the sum of the law of nature; for in being sociable, the law of nature taketh place by the way of peace and society; and to be formidable, is the law of nature in war, where to be feared is a protection a man hath from his own power; and as the former consisteth in actions of equity and justice, the latter consisteth in actions of honour. And equity, justice, and honour, contain all virtues whatsoever.

Chapter 18: A Confirmation of the Same Out of The Word of God

1. THE LAWS mentioned in the former chapters, as they are called the laws of nature, for that they are the dictates of natural reason; and also moral laws, because they concern men's manners and conversation one towards another; so are they also divine laws in respect of the author thereof, God Almighty; and ought therefore to agree, or at least, not to be repugnant to the word of God revealed in Holy Scripture. In this chapter therefore I shall produce such places of Scripture as appear to be most consonant to the said laws.

2. And first the word of God seemeth to place the divine law in reason; by all such texts as ascribe the same to the heart and understanding; as Psalm 40, 8: Thy law is in my heart. Heb. 8, 10: After those days, saith the Lord, I will put my laws in their mind; and Heb. 10, 16, the same. Psalm 37, 31, speaking of the righteous man, he saith, The law of God is in his heart. Psalm 19, 7, 8: The law of God is perfect, converting the soul. It giveth wisdom to the simple, and light unto the eyes. Jer. 31, 33: I will put my law in their inward parts, and write it in their hearts. And John I, the lawgiver himself, God Almighty, is called by the name of Logos, which is also called: verse 4, The light of men: and verse 9, The light which lighteth every man, which cometh into the world: all which are descriptions of natural reason.

3. And that the law divine, for so much as is moral, are those precepts that tend to peace, seemeth to be much confirmed by such places of Scripture as these: Rom. 3, 17, righteousness which is the fulfilling of the law, is called the way of peace. And Psalm 85, 10: Righteousness and peace shall kiss each other. And Matth. 5, 9: Blessed are the peacemakers. And Heb. 7, 2, Melchisedec king of Salem is interpreted king of righteousness, and king of peace. And, verse 21, our

Saviour Christ is said to be a priest for ever after the order of Melchisedec; out of which may be inferred: that the doctrine of our Saviour Christ annexeth the fulfilling of the law to peace.

4. That the law of nature is unalterable, is intimated by this, that the priesthood of Melchisedec is everlasting; and by the words of our Saviour, Matth. 5, 18: Heaven and earth shall pass away, but one jot or tittle of the law shall not pass till all things be fulfilled.

5. That men ought to stand to their covenants, is taught Psalm 15, where the question being asked, verse 1, Lord who shall dwell in thy tabernacle, &c., it is answered, verse 4, He that sweareth to his own hindrance, and yet changeth not. And that men ought to be grateful, where no covenant passeth, Deut. 25, 4: Thou shalt not muzzle the Ox that treadeth out the corn, which St. Paul (1 Cor. 9, 9) interpreteth not of oxen, but of men.

6. That men content themselves with equality, as it is the foundation of natural law, so also is it of the second table of the divine law, Matth. 22, 39, 40: Thou shalt love thy neighbour as thyself. On these two laws depend the whole law and the prophets; which is not so to be understood, as that a man should study so much his neighbour's profit as his own, or that he should divide his goods amongst his neighbours; but that he should esteem his neighbour worthy all rights and privileges that he himself enjoyeth; and attribute unto him, whatsoever he looketh should be attributed unto himself; which is no more but that he should be humble, meek, and contented with equality.

7. And that in distributing of right amongst equals, that distribution is to be made according to the proportions of the numbers, which is the giving of *aequalia aequalibus*, and *proportionalia proportionalibus*; we have Numb. 26, 53, 54, the commandment of God to Moses: Thou shalt divide the land according to the number of names; to many thou shalt give more, to few thou shalt give less, to every one according to his number. That decision by lot is a means of peace, Prov. 18, 18: The lot causeth contention to cease, and maketh partition among the mighty.

8. That the accommodation and forgiveness of one another, which have before been put for laws of nature, are also law divine, there is no question. For they are the essence of charity, which is the scope of the whole law. That we ought not to reprove, or reprehend each other, is the doctrine of our Saviour, Matth. 7, 1: Judge not, that ye be not judged; (verse 3): Why seest thou the mote that is in thy brother's eye, and seest not the beam that is in thine own eye? Also the law that forbiddeth us to press our counsel upon others further than they admit, is a divine law. For after our charity and desire to rectify one another is rejected, to press it further, is to reprehend him, and condemn him, which is forbidden in the text last recited; as also Rom. 14, 12, 13: Every one of us shall give account of himself to God. Let us not therefore judge one another any more, but use your judgment rather in this, that no man put an occasion to fall, or a stumbling block before his brother.

9. Further, the rule of men concerning the law of nature, *Quod tibi fieri non vis, alteri ne feceris*, is confirmed by the like, Matth. 7, 12: Whatsoever therefore you would have men do unto you, that do you unto them: for this is the law and the prophets. And Rom. 2, 1: In that thou judgest another, thou condemnest thyself, &c.

10. It is also manifest by the Scriptures, that these laws concern only the tribunal of our conscience; and that the actions contrary to them, shall be no farther punished by God Almighty, than as they proceed from negligence and contempt. And first, that these laws are made to the conscience, appeareth, Matth. 5, 20: For I say unto you, except your righteousness exceed the righteousness of the Scribes and Pharisees, ye shall not enter into the kingdom of heaven. Now the Pharisees were the most exact amongst the Jews in the external performance; they therefore must want the sincerity of conscience; else could not our Saviour have required a greater righteousness than theirs. For the same reason our Saviour Christ saith: The publican departed from the temple justified, rather than the Pharisee. And Christ saith: His yoke is easy, and his burthen light; which proceeded from this, that Christ required no more than our best endeavour. And

Rom. 14, 23: He that doubteth, is condemned, if he eat. And in innumerable places both in the Old and New Testament, God Almighty declareth, that he taketh the will for the deed, both in good and evil actions. By all which it plainly appears, that the divine law is dictated to the conscience. On the other side it is no less plain: that how many and how heinous actions soever a man commit through infirmity, he shall nevertheless, whensoever he shall condemn the same in his own conscience, be freed from the punishments that to such actions otherwise belong. For, At what time soever a sinner doth repent him of his sins from the bottom of his heart, I will put all his iniquities out of my remembrance, saith the Lord.

11. Concerning revenge which by the law of nature ought not to aim, as I have said chapter XVI, section 10, at present delight, but at future profit, there is some difficulty made, as if the same accorded not with the law divine, by such as object the continuance of punishment after the day of judgment, when there shall be no place, neither for amendment, nor for example. This objection had been of some force, if such punishment had been ordained after all sins were past; but considering the punishment was instituted before sin, it serveth to the benefit of mankind, because it keepeth men in peaceable and virtuous conversation by the terror; and therefore such revenge was directed to the future only.

12. Finally, there is no law of natural reason, that can be against the law divine; for God Almighty hath given reason. to a man to be a light unto him. And I hope it is no. impiety to think, that God Almighty will require a strict account thereof, at the day of judgment, as of the instructions which we were to follow in our peregrination here; notwithstanding the opposition and affronts of supernaturalists now-a-days, to rational and moral conversation.

Chapter 19: Of the Necessity and Definition of a Body Politic

1. IN CHAP. XII, sect. 16, it hath been shewed, that the opinions men have of the rewards and punishments which are to follow their actions, are the causes that make and govern the will to those actions. In this estate of man therefore, wherein all men are equal, and every man allowed to be his own judge, the fears they have one of another are equal, and every man's hopes consist in his own sleight and strength; and consequently when any man by his natural passion, is provoked to break these laws of nature, there is no security in any other man of his own defence but anticipation. And for this cause, every man's right (howsoever he be inclined to peace) of doing whatsoever seemeth good in his own eyes, remaineth with him still, as the necessary means of his preservation. And therefore till there be security amongst men for the keeping of the law of nature one towards another, men are still in the estate of war, and nothing is unlawful to any man that tendeth to his own safety or commodity; and this safety and commodity consisteth in the mutual aid and help of one another, whereby also followeth the mutual fear of one another.

2. It is a proverbial saying, *inter arma silent leges*. There is little therefore to be said concerning the laws that men are to observe one towards another in time of war, wherein every man's being and well-being is the rule of his actions. Yet thus much the law of nature commandeth in war: that men satiate not the cruelty of their present passions, whereby in their own conscience they foresee no benefit to come. For that betrayeth not a necessity, but a disposition of the mind to war, which is against the law of nature. And in old time we read that rapine was a trade of life, wherein nevertheless many of them that used it, did not only spare the lives of those they invaded, but left them also such things, as were necessary to preserve that life which they had given them; as namely their oxen and

instruments for tillage, though they carried away all their other cattle and substance. And as the rapine itself was warranted in the law of nature, by the want of security otherwise to maintain themselves; so the exercise of cruelty was forbidden by the same law of nature, unless fear suggested anything to the contrary. For nothing but fear can justify the taking away of another's life. And because fear can hardly be made manifest, but by some action dishonourable, that betrayeth the conscience of one's own weakness; all men in whom the passion of courage or magnanimity have been predominated, have abstained from cruelty; insomuch that though there be in war no law, the breach whereof is injury, yet there are those laws, the breach whereof is dishonour. In one word, therefore, the only law of actions in war is honour; and the right of war providence.

3. And seeing mutual aid is necessary for defence, as mutual fear is necessary for peace; we are to consider how great aids are required for such defence, and for the causing of such mutual fear, as men may not easily adventure on one another. And first it is evident: that the mutual aid of two or three men is of very little security; for the odds on the other side, of a man or two, giveth sufficient encouragement to an assault. And therefore before men have sufficient security in the help of one another, their number must be so great, that the odds of a few which the enemy may have, be no certain and sensible advantage.

4. And supposing how great a number soever of men assembled together for their mutual defence, yet shall not the effect follow, unless they all direct their actions to one and the same end; which direction to one and the same end is that which, chap. XII, sect. 7, is called consent. This consent (or concord) amongst so many men, though it may be made by the fear of a present invader, or by the hope of a present conquest, or booty; and endure as long as that action endureth; nevertheless, by the diversity of judgments and passions in so many men contending naturally for honour and advantage one above another: it is impossible, not only that their consent to aid each other against an enemy, but also that the peace should last between themselves, without some mutual and common fear to rule them.

5. But contrary hereunto may be objected, the experience we have of certain living creatures irrational, that nevertheless continually live in such good order and government, for their common benefit, and are so free from sedition and war amongst themselves, that for peace, profit, and defence, nothing more can be imaginable. And the experience we have in this, is in that little creature the bee, which is therefore reckoned amongst *animalia politica*. Why therefore may not men, that foresee the benefit of concord, continually maintain the same without compulsion, as well as they? To which I answer, that amongst other living creatures, there is no question of precedence in their own species, nor strife about honour or acknowledgment of one another's wisdom, as there is amongst men; from whence arise envy and hatred of one towards another, and from thence sedition and war. Secondly, those living creatures aim every one at peace and food common to them all; men aim at dominion, superiority, and private wealth, which are distinct in every man, and breed contention. Thirdly, those living creatures that are without reason, have not learning enough to espy, or to think they espy, any defect in the government; and therefore are contented therewith; but in a multitude of men, there are always some that think themselves wiser than the rest, and strive to alter what they think. amiss; and divers of them strive to alter divers ways; and that causeth war. Fourthly, they want speech, and are therefore unable to instigate one another to faction, which men want not. Fifthly, they have no conception of right and wrong, but only of pleasure and pain, and therefore also no censure of one another, nor of their commander, as long as they are themselves at ease; whereas men that make themselves judges of right and wrong, are then least at quiet, when they are most at ease. Lastly, natural concord, such as is amongst those creatures, is the work of God by the way of nature; but concord amongst men is artificial, and by way of covenant. And therefore no wonder if such irrational creatures, as govern themselves in multitude, do it much more firmly than mankind, that do it by arbitrary institution.

6. It remaineth therefore still that consent (by which I understand the concurrence of many men's wills to one action) is not sufficient security for their

common peace, without the erection of some common power, by the fear whereof they may be compelled both to keep the peace amongst themselves, and to join their strengths together, against a common enemy. And that this may be done, there is no way imaginable, but only union; which is defined chap. XII, sect. 8 to be the involving or including the wills of many in the will of one man, or in the will of the greatest part of any one number of men, that is to say, in the will of one man, or of one COUNCIL; for a council is nothing else but an assembly of men deliberating concerning something common to them all.

7. The making of union consisteth in this, that every man by covenant oblige himself to some one and the same man, or to some one and the same council, by them all named and determined, to do those actions, which the said man or council shall command them to do; and to do no action which he or they shall forbid, or command them not to do. And farther.. in case it be a council whose commands they covenant to obey, that then also they covenant, that every man shall hold that for the command of the whole council, which is the command of the greater part of those men, whereof such council consisteth. And though the will of man, being not voluntary, but the beginning of voluntary actions, is not subject to deliberation and covenant; yet when a man covenanteth to subject his will to the command of another, he obligeth himself to this, that he resign his strength and means to him, whom he covenanteth to obey; and hereby, he that is to command may by the use of all their means and strength, be able by the terror thereof, to frame the will of them all to unity and concord amongst themselves.

8. This union so made, is that which men call now-a-days a BODY POLITIC or civil society; and the Greeks call it polis, that is to say, a, city. which may be defined to be a multitude of men, united as one person by a common power, for their common peace, defence, and benefit.

9. And as this union into a city or body politic, is instituted with common power over all the particular persons, or members thereof, to the common good of them all; so also may there be amongst a multitude of those members, instituted a subordinate union of certain men, for certain common actions to be done by those

men for some common benefit of theirs, or of the whole city; as for subordinate government, for counsel, for trade, and the like. And these subordinate bodies politic are usually called CORPORATIONS; and their power such over the particulars of their own society, as the whole city whereof they are members have allowed them.

10. In all cities or bodies politic not subordinate, but independent, that one man or one council, to whom the particular members have given that common power, is called their SOVEREIGN, and his power the sovereign power. which consisteth in the power and the strength that every of the members have transferred to him from themselves, by covenant. And because it is impossible for any man really to transfer his own strength to another, or for that other to receive it; it is to be understood: that to transfer a man's power and strength, is no more but to lay by or relinquish his own right of resisting him to whom he so transferreth it. And every member of the body politic, is called a SUBJECT, (viz.) to the sovereign.

11. The cause in general which moveth a man to become subject to another, is (as I have said already) the fear of not otherwise preserving himself, and a man may subject himself, to him that invadeth, or may invade him for fear of him; or men may join amongst themselves to subject themselves to such as they shall agree upon for fear of others. And when many men subject themselves the former way, there ariseth thence a body politic, as it were naturally; from whence proceedeth dominion, paternal, and despotic and when they subject themselves the other way, by mutual agreement amongst many, the body politic they make, is for the most part called a commonwealth in distinction from the former, though the name be the general name for them both and I shall speak in the first place of commonwealths, and afterward of bodies politic, patrimonial and despotical.

PART II

Chapter 20: Of the Requisites to the Constitution of a Commonwealth

1. THAT PART of this treatise which is already past, hath been wholly spent, in the consideration of the natural power, and the natural estate of man; namely of his cognition and passions in the first eleven chapters; and how from thence proceed his actions in the twelfth; how men know one another's minds in the thirteenth; in what estate men's passions set them in the fourteenth; what estate they are directed unto by the dictates of reason, that is to say, what be the principal articles of the law of nature, in the fifteenth, sixteenth, seventeenth, eighteenth, and lastly how a multitude of persons natural are united by covenants into one person civil or body politic. In this part therefore shall be considered, the nature of a body politic, and the laws thereof, otherwise called civil laws. And whereas it hath been said in the last chapter, and last section of the former part, that there be two ways of erecting a body politic; one by arbitrary institution of many men assembled together, which is like a creation out of nothing by human wit; the other by compulsion, which is as it were a generation thereof out of natural force; I shall first speak of such erection of a body politic, as proceedeth from the assembly and consent of a multitude.

2. Having in this place to consider a multitude of men about to unite themselves into a body politic, for their security, both against one another, and against common enemies; and that by covenants, the knowledge of what covenants, they must needs make, dependeth on the knowledge of the persons, and the knowledge of their end. First, for their persons they are many, and (as yet) not one; nor can any action done in a multitude of people met together, be attributed to the multitude, or truly called the action of the multitude, unless every man's hand, and every man's will, (not so much as one excepted) have concurred

thereto. For multitude, though in their persons they run together, yet they concur not always in their designs. For even at that time when men are in tumult, though they agree a number of them to one mischief, and a number of them to another; yet, in the whole, they are amongst themselves in the state of hostility, and not of peace; like the seditious Jews besieged in Jerusalem, that could join against their enemies, and yet fight amongst themselves; whensoever therefore any man saith, that a number of men hath done any act: it is to be understood, that every particular man in that number hath consented thereunto, and not the greatest part only. Secondly, though thus assembled with intention to unite themselves, they are yet in that estate in which every man hath right to everything, and consequently, as hath been said, chap. XIV, sect. 10, in an estate of enjoying nothing: and therefore meum and tuum hath no place amongst them.

3. The first thing therefore they are to do, is expressly every man to consent to something by which they may come nearer to their ends; which can be nothing else imaginable but this: that they allow the wills of the major part of their whole number, or the wills of the major part of some certain number of men by them determined and named; or lastly the will of some one man, to involve and be taken for the wills of every man. And this done they are united, and a body politic. And if the major part of their whole number be supposed to involve the wills of all the particulars, then are they said to be a DEMOCRACY, that is to say a government wherein the whole number, or so many of them as please, being assembled together, are the sovereign, and every particular man a subject. If the major part of a certain number of men named or distinguished from the rest, be supposed to involve the wills of every one of the particulars, then are they said to be an OLIGARCHY, or ARISTOCRACY; which two words signify the same thing, together with the divers passions of those that use them; for when the men that be in that office please, they are called an aristocracy, otherwise an oligarchy; wherein those, the major part of which declare the wills of the whole multitude, being assembled, are the sovereign, and every man severally a subject. Lastly if their consent be such, that the will of one man, whom they name, shall stand for

the wills of them all, then is their government or union called a MONARCHY; and that one man the sovereign, and every of the rest a subject.

4. And those several sorts of unions, governments, and subjections of man's will, may be understood to be made, either absolutely, that is to say, for all future time, or for a time limited only. But forasmuch as we speak here of a body politic, instituted for the perpetual benefit and defence of them that make it; which therefore men desire should last for ever, I will omit to speak of those that be temporary, and consider those that be for ever.

5. The end for which one man giveth up, and relinquisheth to another, or others, the right of protecting and defending himself by his own power, is the security which he expecteth thereby, of protection and defence from those to whom he doth so relinquish it. And a man may then account himself in the estate of security, when he can foresee no violence to be done unto him, from which the doer may not be deterred by the power of that sovereign, to whom they have every one subjected themselves; and without that security there is no reason for a man to deprive himself of his own advantages, and make himself a prey to others. And therefore when there is not such a sovereign power erected, as may afford this security; it is to be understood that every man's right of doing whatsoever seemeth good in his own eyes, remaineth still with him. And contrariwise, where any subject hath right by his own judgment and discretion, to make use of his force; it is to be understood that every man hath the like, and consequently that there is no commonwealth at all established. How far therefore in the making of a commonwealth, a man subjecteth his will to the power of others, must appear from the end, namely security. For whatsoever is necessary to be by covenant transferred for the attaining thereof, so much is transferred, or else every man is in his natural liberty to secure himself.

6. Covenants agreed upon by every man assembled for the making of a commonwealth, and put in writing without erecting of a power of coercion, are no reasonable security for any of them that so covenant, nor are to be called laws; and leave men still in the estate of nature and hostility. For seeing the wills of

most men are governed only by fear, and where there is no power of coercion, there is no fear; the wills of most men will follow their passions of covetousness, lust, anger, and the like, to the breaking of those covenants, whereby the rest, also, who otherwise would keep them, are set at liberty, and have no law but from themselves.

7. This power of coercion, as hath been said chap. XV, sect. 3, of the former part, consisteth in the transferring of every man's right of resistance against him to whom he hath transferred the power of coercion. It followeth therefore, that no man in any commonwealth whatsoever hath right to resist him, or them, on whom they have conferred this power coercive, or (as men use to call it) the sword of justice; supposing the not-resistance possible. For (Part I. chapter XV, sect. 18) covenants bind but to the utmost of our endeavour.

8. And forasmuch as they who are amongst themselves in security, by the means of this sword of justice that keeps them all in awe, are nevertheless in danger of enemies from without; if there be not some means found, to unite their strengths and natural forces in the resistance of such enemies, their peace amongst themselves is but in vain. And therefore it is to be understood as a covenant of every member to contribute their several forces for the defence of the whole; whereby to make one power as sufficient, as is possible, for their defence. Now seeing that every man hath already transferred the use of his strength to him or them, that have the sword of justice; it followeth that the power of defence, that is to say the sword of war, be in the same hands wherein is the sword of justice: and consequently those two swords are but one, and that inseparably and essentially annexed to the sovereign power.

9. Moreover seeing to have the right of the sword, is nothing else but to have the use thereof depending only on the judgment and discretion of him or them that have it; it followeth that the power of judicature (in all controversies, wherein the sword of justice is to be used) and (in all deliberations concerning war, wherein the use of that sword is required), the right of resolving and determining what is to be done, belong to the same sovereign.

10. Farther: considering it is no less, but much more necessary to prevent violence and rapine, than to punish the same when it is committed; and all violence proceedeth from controversies that arise between men concerning meum and tuum, right and wrong, good and bad, and the like, which men use every one to measure by their own judgments; it belongeth also to the judgment of the same sovereign power, to set forth and make known the common measure by which every man is to know what is his, and what another's; what is good, and what bad; and what he ought to do, and what not; and to command the same to be observed. And these measures of the actions of the subjects are those which men call LAWS POLITIC, or civil. The making whereof must of right belong to him that hath the power of the sword, by which men are compelled to observe them; for otherwise they should be made in vain.

11. Farthermore: seeing it is impossible that any one man that hath such sovereign power, can be able in person to hear and determine all controversies, to be present at all deliberations concerning common good, and to execute and perform all those common actions that belong thereunto, whereby there will be necessity of magistrates and ministers of public affairs; it is consequent, that the appointment, nomination, and limitation of the same, be understood as an inseparable part of the same sovereignty, to which the sum of all judicature and execution hath been already annexed.

12. And: forasmuch as the right to Use the forces of every particular member, is transferred from themselves, to their sovereign; a man will easily fall upon this conclusion of himself: that to sovereign power (whatsoever it doth) there belongeth impunity.

13. The sum of these rights of sovereignty, namely the absolute use of the sword in peace and war, the making and abrogating of laws, supreme judicature and decision in all debates judicial and deliberative, the nomination of all magistrates and ministers, with other rights contained in the same, make the sovereign power no less absolute in the commonwealth, than before commonwealth every man was absolute in himself to do, or not to do, what he

thought good; which men that have not had the experience of that miserable estate, to which men are reduced by long war, think so hard a condition that they cannot easily acknowledge, such covenants and subjection, on their parts, as are here set down, to have been ever necessary to their peace. And therefore some have imagined that a commonwealth may be constituted in such manner, as the sovereign power may be so limited, and moderated, as they shall think fit themselves. For example: they suppose a multitude of men to have agreed upon certain articles (which they presently call laws), declaring how they will be governed; and that done to agree farther upon some man, or number of men to see the same articles performed, and put in execution. And to enable him, or them thereunto, they allot unto them a provision limited, as of certain lands, taxes, penalties, and the like, than which (if mis-spent), they shall have no more, without a new consent of the same men that allowed the former. And thus they think they have made a commonwealth, in which it is unlawful for any private man to make use of his own sword for his security; wherein they deceive themselves.

14. For first, if to the revenue, it did necessarily follow that there might be forces raised, and procured at the will of him that hath such revenue; yet since the revenue is limited, so must also be the forces; but limited forces, against the power of an enemy, which we cannot limit, are unsufficient. Whensoever therefore there happeneth an invasion greater than those forces are able to resist, and there be no other right to levy more, then is every man, by necessity of nature, allowed to make the best provision he can for himself; and thus is the private sword, and the estate of war again reduced. But seeing revenue, without the right of commanding men, is of not use, neither in peace, nor war; it is necessary to be supposed, that he that hath the administration of those articles, which are in the former section supposed, must have also right to make use of the strengths of particular men; and what reason soever giveth him that right over any one, giveth him the same over them all. And then is his right absolute; for he that hath right to all their forces, hath right to dispose of the same. Again: supposing those limited forces and revenue, either by the necessary, or negligent use of

them, to fail; and that for a supply, the same multitude be again to be assembled, who shall have power to assemble them, that is to compel them to come together? If he that demandeth the supply hath that right (viz.) the right to compel them all; then is his sovereignty absolute: if not, then is every particular man at liberty to come or not; to frame a new commonwealth or not; and so the right of the private sword returneth. But suppose them willingly and of their own accord assembled, to consider of this supply; if now it be still in their choice, whether they shall give it or not, it is also in their choice whether the commonwealth shall stand or not. And therefore there lieth not upon any of them any civil obligation that may hinder them from using force, in case they think it tend to their defence. This device therefore of them that will make civil laws first, and then a civil body afterwards, (as if policy made a body politic, and not a body politic made policy) is of no effect.

15. Others to avoid the hard condition, as they take it, of absolute subjection, (which in hatred thereto they also call slavery) have devised a government as they think mixed of the three sorts of sovereignty. As for example: they suppose the power of making laws given to some great assembly democratical, the power of judicature to some other assembly; and the administration of the laws to a third, or to some one man; and this policy they call mixed monarchy, or mixed aristocracy, or mixed democracy, according as any of these three sorts do most visibly predominate. And in this estate of government they think the use of the private sword excluded.

16. And supposing it were so: how were this condition which they call slavery eased thereby? For in this estate they would have no man allowed, either to be his own judge, or own carver, or to make any laws unto himself; and as long as these three agree, they are as absolutely subject to them, as is a child to the father, or a slave to the master in the state of nature. The ease therefore of this subjection, must consist in the disagreement of those, amongst whom they have distributed the rights of sovereign power. But the same disagreement is war. The division therefore of the sovereignty, either worketh no effect, to the taking away of simple

subjection, or introduceth war; wherein the private sword hath place again. But the truth is, as hath been already shewed in 7, 8, 9, 10, 11, 12 precedent sections: the sovereignty is indivisible; and that seeming mixture of several kinds of government, not mixture of the things themselves, but confusion in our understanding, that cannot find out readily to whom we have subjected ourselves.

17. But though the sovereignty be not mixed, but be always either simple democracy, or simple aristocracy, or pure monarchy; nevertheless in the administration thereof, all those sorts of government may have place subordinate. For suppose the sovereign power be democracy, as it was sometimes in Rome, yet at the same time they may have a council aristocratical, such as was the senate; and at the same time they may have a subordinate monarch, such as was their dictator, who had for a time the exercise of the whole sovereignty, and such as are all generals in war. So also in a monarchy there may be a council aristocratical of men chosen by the monarch; or democratical of men chosen by the consent (the monarch permitting) of all the particular men of the commonwealth. And this mixture is it that imposeth; as if it were the mixture of sovereignty. As if a man should think, because the great council of Venice doth nothing ordinarily but choose magistrates, ministers of state, captains, and governors of towns, ambassadors, counsellors, and the like; that therefore their part of the sovereignty is only choosing of magistrates; and that the making of war, and peace, and laws, were not theirs, but the part of such councillors as they appointed thereto; whereas it is the part of these to do it but subordinately, the supreme authority thereof being in the great council that choose them.

18. And as reason teacheth us, that a man considered out of subjection to laws, and out of all covenants obligatory to others, is free to do, and undo, and deliberate as long as he listeth; every member being obedient to the will of the whole man; that liberty being nothing else but his natural power, without which he is no better than an inanimate creature, not able to help himself; so also it teacheth us: that a body politic of what kind soever, not subject to another, nor obliged by covenants, ought to be free, and in all actions to be assisted by the

members, every one in their place, or at the least not resisted by them. For otherwise, the power of a body politic (the essence whereof is the not-resistance of the members) is none, nor a body politic of any benefit. And the same is confirmed by the use of all nations and commonwealths in the world. For what nation is there or commonwealth wherein that man or council, which is virtually the whole, hath not absolute power over every particular member? or what nation or commonwealth is there, that hath not power and right to constitute a general in their wars? But the power of a general is absolute; and consequently there was absolute power in the commonwealth, from whom it was derived. For no person, natural or civil, can transfer unto another more power than himself hath.

19. In every commonwealth where particular men are deprived of their right to protect themselves, there resideth an absolute sovereignty, as I have already shewed. But in what man or in what assembly of men the same is placed, is not so manifest, as not to need some marks whereby it may be discerned. And first it is an infallible mark of absolute sovereignty in a man, or in an assembly of men, if there be no right in any other person natural or civil to punish that man, or to dissolve that assembly. For he that cannot of right be punished, cannot of right be resisted; and he that cannot of right be resisted, hath coercive power over all the rest, and thereby can frame and govern their actions at his pleasure; which is absolute sovereignty. Contrariwise he that in a commonwealth is punishable by any, or that assembly that is dissolvable, is not sovereign. For a greater power is always required to punish and dissolve, than theirs who are punished or dissolved; and that power cannot be called sovereign, than which there is a greater. Secondly, that man or assembly, that by their own right not derived from the present right of any other, may make laws, or abrogate them, at his, or their pleasure, have the sovereignty absolute. For seeing the laws they make, are supposed to be made by right, the members of the commonwealth to whom they are made, are obliged to obey them; and consequently not to resist the execution of them; which not-resistance maketh the power absolute of him that ordaineth them. It is likewise a mark of this sovereignty, to have the right original of

appointing magistrates, judges, counsellors, and ministers of state. For without that power no act of sovereignty, or government, can be performed. Lastly, and generally. whosoever by his own authority independent can do any act, which another of the same commonwealth may not, must needs be understood to have the sovereign power. For by nature men have equal right; this inequality therefore must proceed from the power of the commonwealth. He therefore that doth any act lawfully by his own authority, which another may not, doth it by the power of the commonwealth in himself; which is absolute sovereignty.

Chapter 21: Of the Three Sorts of Commonwealth

1. HAVING SPOKEN in general concerning instituted policy in the former chapter, I come in this to speak of the sorts thereof in special, how every one of them is instituted. The first in order of time of these three sorts is democracy, and it must be so of necessity, because an aristocracy and a monarchy, require nomination of persons agreed upon; which agreement in a great multitude of men must consist in the consent of the major part; and where the votes of the major part involve the votes of the rest, there is actually a democracy.

2. In the making of a democracy, there passeth no covenant, between the sovereign and any subject. For while the democracy is a making, there is no sovereign with whom to contract. For it cannot be imagined, that the multitude should contract with itself, or with any one man, or number of men, parcel of itself, to make itself sovereign; nor that a multitude, considered as one aggregate, can give itself anything which before it had not. Seeing then that sovereignty democratical is not conferred by the covenant of any multitude (which supposeth union and sovereignty already made), it resteth, that the same be conferred by the particular covenants of every several man; that is to say, every man with every man, for and in consideration of the benefit of his own peace and defence, covenanteth to stand to and obey, whatsoever the major part of their whole number, or the major part of such a number of them, as shall be pleased to assemble at a certain time and place, shall determine and command. And this is that which giveth being to a democracy; wherein the sovereign assembly was called of the Greeks by the name of Demus (*id est*, the people), from whence cometh democracy. So that where, to the supreme and independent court, every man may come that will and give his vote, there the sovereign is called the people.

3. Out of this that hath been already said, may readily be drawn: that whatsoever the people doth to any one particular member or subject of the commonwealth, the same by him ought not to be styled injury. For first, injury (by the definition, Part I. chap. XVI, sect. 2) is breach of covenant; but covenants (as hath been said in the precedent section) there passed none from the people to any private man; and consequently it (viz. the people) can do him no injury. Secondly, how unjust soever the action be, that this sovereign demus shall do, is done by the will of every particular man subject to him, who are therefore guilty of the same. If therefore they style it injury, they but accuse themselves. And it is against reason for the same man, both to do and complain; implying this contradiction, that whereas he first ratified the people's acts in general, he now disalloweth some of them in particular. It is therefore said truly, *volenti non fit injuria*. Nevertheless nothing doth hinder, but that divers actions done by the people, may be unjust before God Almighty, as breaches of some of the laws of nature.

4. And when it happeneth, that the people by plurality of voices shall decree or command any thing contrary to the law of God or nature, though the decree and command be the act of every man, not only present in the assembly, but also absent from it; yet is not the injustice of the decree, the injustice of every particular man, but only of those men by whose express suffrages, the decree or command was passed. For a body politic, as it is a fictitious body, so are the faculties and will thereof fictitious also. But to make a particular man unjust, which consisteth of a body and soul natural, there is required a natural and very will.

5. In all democracies, though the right of sovereignty be in the assembly, which is virtually the whole body; yet the use thereof is always in one, or a few particular men. For in such great assemblies as those must be, whereinto every man may enter at his pleasure, there is no means any ways to deliberate and give counsel what to do, but by long and set orations; whereby to every man there is more or less hope given, to incline and sway the assembly to their own ends. In a multitude of speakers therefore, where always, either one is eminent alone, or a

few being equal amongst themselves, are eminent above the rest, that one or few must of necessity sway the whole; insomuch, that a democracy, in effect, is no more than an aristocracy of orators, interrupted sometimes with the temporary monarchy of one orator.

6. And seeing a democracy is by institution the beginning both of aristocracy and monarchy, we are to consider next how aristocracy is derived from it. When the particular members of the commonwealth growing weary of attendance at public courts, as dwelling far off, or being attentive to their private businesses, and withal displeased with the government of the people, assemble themselves to make an aristocracy; there is no more required to the making thereof but putting to the question one by one, the names of such men as it shall consist of, and assenting to their election; and by plurality of vote, to transfer that power which before the people had, to the number of men so named and chosen.

7. And from this manner of erecting an aristocracy it is manifest that the few or optimates, have entered into no covenant, with any of the particular members of the commonwealth whereof they are sovereign; and consequently cannot do any thing to any private man that can be called injury to him, howsoever their act be wicked before Almighty God, according to that which hath been said before, section 3. Farther it is impossible that the people, as one body politic should covenant with the aristocracy or optimates, on whom they intend to transfer their sovereignty; for no sooner is the aristocracy erected, but the democracy is annihilated, and the covenants made unto them void.

8. In all aristocracies, the admission of such as are from time to time to have vote in the sovereign assembly, dependeth on the will and decree of the present optimates; for they being the sovereign, have the nomination (by the eleventh section of the former chapter) of all magistrates, ministers, and counsellors of state whatsoever, and may therefore choose either to make them elective, or hereditary, at their pleasure.

9. Out of the same democracy, the institution of a political monarch proceedeth in the same manner, as did the institution of the aristocracy (viz.) by a decree of

the sovereign people, to pass the sovereignty to one man named, and approved by plurality of suffrage. And if this sovereignty be truly and indeed transferred, the estate or commonwealth is an absolute monarchy, wherein the monarch is at liberty, to dispose as well of the succession, as of the possession; and not an elective kingdom. For suppose a decree be made, first in this manner: that such a one shall have the sovereignty for his life; and that afterward they will choose a new; in this case, the power of the people is dissolved, or not. If dissolved, then after the death of him that is chosen, there is no man bound to stand to the decrees of them that shall, as private men, run together to make a new election: and consequently, if there be any man, who by the advantage of the reign of him that is dead, hath strength enough to hold the multitude in peace and obedience, he may lawfully, or rather is by the law of nature obliged so to do. If this power of the people were not dissolved, at the choosing of their king for life; then is the people sovereign still, and the king a minister thereof only, but so, as to put the whole sovereignty in execution; a great minister, but no otherwise for his time, than a dictator was in Rome. In this case, at the death of him that was chosen, they that meet for a new election, have no new, but their old authority for the same. For they were the sovereign all the time, as appeareth by the acts of those elective kings, that have procured from the people, that their children might succeed them. For it is to be understood, when a man receiveth any thing from the authority of the people, he receiveth it not from the people his subjects, but from the people his sovereign. And farther, though in the election of a king for his life, the people grant him the exercise of their sovereignty for that time; yet if they see cause, they may recall the same before the time. As a prince that conferreth an office for life, may nevertheless, upon suspicion of abuse thereof, recall it at his pleasure; inasmuch as offices that require labour and care, are understood to pass from him that giveth them as onera, burthens to them that have them; the recalling whereof are therefore not injury, but favour. Nevertheless, if in making an elective king with intention to reserve the sovereignty, they reserve not a power at certain known and determined times and places to assemble themselves; the reservation

of their sovereignty is of no effect, inasmuch as no man is bound to stand to the decrees and determinations of those that assemble themselves without the sovereign authority.

10. In the former section is showed that elective kings, that exercise their sovereignty for a time, which determines with their life, either are subjects and not sovereigns; and that is, when the people in election of them reserve unto themselves the right of assembling at certain times and places limited and made known; or else absolute sovereigns, to dispose of the succession at their pleasure; and that is, when the people in their election hath declared no time nor place of their meeting, or have left it to the power of the elected king to assemble and dissolve them at such times, as he himself shall think good. There is another kind of limitation of time, to him that shall be elected to use the sovereign power (which whether it hath been practised anywhere or not, I know not, but it may be imagined, and hath been objected against the rigour of sovereign power), and it is this: that the people transfer their sovereignty upon condition. As for example: for so long as he shall observe such and such laws, as they then prescribe him. And here as before in elected kings, the question is to be made, whether in the electing of such a sovereign, they reserved to themselves a right of assembling at times and places limited and known, or not; if not, then is the sovereignty of the people dissolved, and they have neither power to judge of the breach of the conditions given him, nor to command any forces for the deposing of him, whom on that condition they had set up; but are in the estate of war amongst themselves, as they were before they made themselves a democracy; and consequently: if he that is elected, by the advantage of the possession he hath of the public means, be able to compel them to unity and obedience, he hath not only the right of nature to warrant him, but also the law of nature to oblige him thereunto. But if in electing him, they reserved to themselves a right of assembling, and appointed certain times and places to that purpose, then are they sovereign still, and may call their conditional king to account, at their pleasure, and deprive him of his government, if they judge he deserve it, either by breach of the condition set him, or otherwise.

For the sovereign power can by no covenant with a subject, be bound to continue him in the charge he undergoeth by their command, as a burden imposed not particularly for his good, but for the good of the sovereign people.

11. The controversies that arise concerning the right of the people, proceed from the equivocation of the word. For the word people hath a double signification. In one sense it signifieth only a number of men, distinguished by the place of their habitation; as the people of England, or the people of France; which is no more, but the multitude of those particular persons that inhabit those regions, without consideration of any contracts or covenants amongst them, by which any one of them is obliged to the rest. In another sense, it signifieth a person civil, that is to say, either one man, or one council, in the will whereof is included and involved the will of every one in particular; as for example: in this latter sense the lower house of parliament is all the commons, as long as they sit there with authority and right thereto; but after they be dissolved, though they remain, they be no more the people, nor the commons, but only the aggregate, or multitude of the particular men there sitting; how well soever they agree, or concur, in opinions amongst themselves; whereupon they that do not distinguish between these two significations, do usually attribute such rights to a dissolved multitude, as belong only to the people virtually contained in the body of the commonwealth or sovereignty. And when a great number of their own authority flock together in any nation, they usually give them the name of the whole nation. In which sense they say the people rebelleth, or the people demandeth, when it is no more than a dissolved multitude, of which though any one man may be said to demand or have right to something, yet the heap, or multitude, cannot be said to demand or have right to any thing. For where every man hath his right distinct, there is nothing left for the multitude to have right unto; and when the particulars say: this is mine, this is thine, and this is his, and have shared all amongst them, there can be nothing whereof the multitude can say: this is mine; nor are they one body, as behoveth them to be, that demand anything under the name of mine or his; and when they say ours, every man is understood to pretend in several, and

not the multitude. On the other side, when the multitude is united into a body politic, and thereby are a people in the other signification, and their wills virtually in the sovereign, there the rights and demands of the particulars do cease; and he or they that have the sovereign power, doth for them all demand and vindicate under the name of his, that which before they called in the plural, theirs.

12. We have seen how particular men enter into subjection, by transferring their rights; it followeth to consider how such subjection may be discharged. And first, if he or they have the sovereign power, shall relinquish the same voluntarily, there is no doubt but every man is again at liberty, to obey or not; likewise if he or they retaining the sovereignty over the rest, do nevertheless exempt some one or more from. their subjection, every man so exempted is discharged. For he or they to whom any man is obliged, hath the power to release him.

13. And here it is to be understood: that when he or they that have the sovereign power, give such exemption or privilege to a subject, as is not separable from the sovereignty, and nevertheless directly retain the sovereign power, not knowing the consequence of the privilege they grant, the person or persons exempted or privileged are not thereby released. For in contradictory significations of the will (Part I. chap. XIII, sect. 9), that which is directly signified, is to be understood for the will, before that which is drawn from it by consequence.

14. Also exile perpetual, is a release of subjection, forasmuch as being out of the protection of the sovereignty that expelled him, he hath no means of subsisting but from himself. Now every man may lawfully defend himself, that hath no other defence; else there had been no necessity that any man should enter into voluntary subjection, as they do in commonwealths.

15. Likewise a man is released of his subjection by conquest; for when it cometh to pass, that the power of a commonwealth is overthrown, and any particular man, thereby lying under the sword of his enemy yieldeth himself captive, he is thereby bound to serve him that taketh him, and consequently discharged of his obligation to the former. For no man can serve two masters.

16. Lastly, ignorance of the succession dischargeth obedience; for no man can be understood to be obliged to obey he knoweth not whom.

Chapter 22: Of the Power of Masters

1. HAVING SET forth, in the two preceding chapters, the nature of a commonwealth institutive, by the consent of many men together; I come now to speak of dominion, or a body politic by acquisition, which is commonly called a patrimonial kingdom. But before I enter thereinto: it is necessary to make known, upon what title one man may acquire right, that is to say, property or dominion, over the person of another. For when one man hath dominion over another, there is a little kingdom; and to be a king by acquisition, is nothing else, but to have acquired a right or dominion over many.

2. Considering men therefore again in the state of nature, without covenants or subjection one to another, as if they were but even now all at once created male and female; there be three titles only, by which one man may have right and dominion over another; whereof two may take place presently, and those are: voluntary offer of subjection, and yielding by compulsion; the third is to take place, upon the supposition of children begotten amongst them. Concerning the first of these three titles, it is handled before in the two last chapters; for from thence cometh the right of sovereigns over their subjects in a commonwealth institutive. Concerning the second title (which is when a man submitteth to an assailant for fear of death), thereby accrueth a right of dominion. For where every man (as it happeneth in this case) hath right to all things, there needs no more for the making of the said right effectual, but a covenant from him that is overcome, not to resist him that overcometh. And thus cometh the victor to have a right of absolute dominion over the conquered. By which there is presently constituted a little body politic, which consisteth of two persons, the one sovereign, which is called the MASTER, or lord; the other subject, which is called the SERVANT. And when a man hath acquired right over a number of servants so considerable,

as they cannot by their neighbours be securely invaded, this body politic is a kingdom despotical.

3. And it is to be understood: that when a servant taken in the wars, is kept bound in natural bonds, as chains, and the like, or in prison; there hath passed no covenant from the servant to his master; for those natural bonds have no need of strengthening by the verbal bonds of covenant; and they shew the servant is not trusted. But covenant (Part I. chap. XV, sect. 9) supposeth trust. There remaineth therefore in the servant thus kept bound, or in prison, a right of delivering himself, if he can, by what means soever. This kind of servant is that which ordinarily and without passion, is called a SLAVE. The Romans had no such distinct name, but comprehended all under the name of servus; whereof such as they loved and durst trust, were suffered to go at liberty, and admitted to places of office, both near to their persons, and in their affairs abroad; the rest were kept chained, or otherwise restrained with natural impediments to their resistance. And as it was amongst the Romans, so it was amongst other nations; the former sort having no other bond but a supposed covenant, without which the master had no reason to trust them; the latter being without covenant, and no otherwise tied to obedience, but by chains, or other like forcible custody.

4. A master therefore is to be supposed to have no less right over those, whose bodies he leaveth at liberty, than over those he keepeth in bonds and imprisonment; and hath absolute dominion over both; and may say of his servant, that he is his, as he may of any other thing. And whatsoever the servant had, and might call his, is now the master's; for he that disposeth of the person, disposeth of all the person could dispose of; insomuch as though there be meum and tuum amongst servants distinct from one another by the dispensation, and for the benefit of their master; yet there is no meum and tuum belonging to any of them against the master himself, whom they are not to resist, but to obey all his commands as law.

5. And seeing both the servant and all that is committed to him, is the property of the master, and every man may dispose of his own, and transfer the same at his

pleasure, the master may therefore alienate his dominion over them,. or give the same, by his last will, to whom he list.

6. And if it happen, that the master himself by captivity or voluntary subjection, become servant to another, then is that other master paramount; and those servants of him that becometh servant, are no further obliged, than their master paramount shall think good; forasmuch as he disposing of the master subordinate, disposeth of all he hath, and consequently of his servants; so that the restriction of absolute power in masters proceedeth not from the law of nature, but from the political law of him that is their master supreme or sovereign.

7. Servants immediate to the supreme master, are discharged of their servitude or subjection in the same manner that subjects are released of their allegiance in a commonwealth institutive. As first, by release; for he that captiveth. (which is done by accepting what the captive transferreth to him) setteth again at liberty, by transferring back the same. And this kind of release is called MANUMISSION. Secondly, by exile; for that is no more but manumission given to a servant, not in the way of benefit, but punishment. Thirdly, by new captivity, where the servant having done his endeavour to defend himself, hath thereby performed his covenant to his former master, and for the safety of his life, entering into new covenant with the conqueror, is bound to do his best endeavour to keep that likewise. Fourthly, ignorance of who is successor to his deceased master, dischargeth him of obedience; for no covenant holdeth longer than a man knoweth to whom he is to perform it. And lastly, that servant that is no longer trusted, but committed to his chains and custody, is thereby discharged of the obligation in foro interno, and therefore if he can get loose, may lawfully go his way.

8. But servants subordinate, though manumitted by their immediate lord, are not thereby discharged of subjection to their lord paramount; for the immediate master hath no property in them, having transferred his right before to another, namely to his own and supreme master. Nor if the chief lord should manumit his immediate servant, doth he thereby release the servants of their obligation to him

that is so manumitted. For by this manumission, he recovereth again the absolute dominion he had over them before. For after a release (which is the discharge of a covenant) the right standeth as it did before the covenant was made.

9. This right of conquest, as it maketh one man master over another, so also maketh it a man to be master of the irrational creatures. For if a man in the state of nature, be in hostility with men, and thereby have lawful title to subdue or kill, according as his own conscience and discretion shall suggest unto him for his safety and benefit; much more may he do the same to beasts; that is to say, save and preserve for his own service, according to his discretion, such as are of nature apt to obey, and commodious for use; and to kill and destroy, with perpetual war, all other, as fierce, and noisome to him. And this dominion is therefore of the law of nature, and not of the divine law positive. For if there had been no such right before the revealing of God's will in the Scripture, then should no man, to whom the Scripture hath not come, have right to make use of those creatures, either for his food or sustenance. And it were a hard condition of mankind, that a fierce and savage beast should with more right kill a man, than the man a beast.

Chapter 23: Of the Power of Fathers, and of Patrimonial Kingdom

1. OF THREE ways by which a man becometh subject to another, mentioned section 2. chap. ult., namely voluntary offer, captivity and birth, the former two have been spoken of, under the name of subjects and servants. In the next place, we are to set down the third way of subjection, under the name of children; and by what title one man cometh to have propriety in a child, that proceedeth from the common generation of two, (viz.) of male and female. And considering men again dissolved from all covenants one with another, and that (Part I. chap. XVII, sect. 2) every man by the law of nature, hath right or propriety to his own body, the child ought rather to be the propriety of the mother (of whose body it is part, till the time of separation) than of the father. For the understanding therefore of the right that a man or woman hath to his or their child, two things are to be considered: first what title the mother or any other originally hath to a child new born; secondly, how the father, or any other man, pretendeth by the mother.

2. For the first: they that have written of this subject have made generation to be a title of dominion over persons, as well as the consent of the persons themselves. And because generation giveth title to two, namely, father and mother, whereas dominion is indivisible, they therefore ascribe dominion over the child to the father only, ob praestantiam sexus; but they shew not, neither can I find out by what coherence, either generation inferreth dominion, or advantage of so much strength, which, for the most part, a man hath more than a woman, should generally and universally entitle the father to a propriety in the child, and take it away from the mother.

3. The title to dominion over a child, proceedeth not from the generation, but from the preservation of it; and therefore in the estate of nature, the mother in

whose power it is to save or destroy it, hath right thereto by that power, according to that which hath been said Part I. chap. XIV, sect. 13. And if the mother shall think fit to abandon, or expose her child to death, whatsoever man or woman shall find the child so exposed, shall have the same right which the mother had before; and for the same reason, namely for the power not of generating, but preserving. And though the child thus preserved, do in time acquire strength, whereby he might pretend equality with him or her that hath preserved him, yet shall that pretence be thought unreasonable, both because his strength was the gift of him, against whom he pretendeth; and also because it is to be presumed, that he which giveth sustenance to another, whereby to strengthen him, hath received a promise of obedience in consideration thereof. For else it would be wisdom in men, rather to let their children perish, while they are infants, than to live in their danger or subjection, when they are grown.

4. For the pretences which a man may have to dominion over a child by the right of the mother, they be of divers kinds. One by the absolute subjection of the mother: another, by some particular covenant from her, which is less than a covenant of such subjection. By absolute subjection, the master of the mother, hath right to her child, according to section 6, chap. XXII whether he be the father thereof, or not. And thus the children of the servant are the goods of the master in perpetuum.

5. Of covenants that amount not to subjection between a man and woman, there be some which are made for a time and some for life; and where they are for a time, they are covenants of cohabitation, or else of copulation only. And in this latter case, the children pass by covenants particular. And thus in the copulation of the Amazons with their neighbours, the fathers by covenant had the male children only, the mothers retaining the females.

6. And covenants of cohabitation are either for society of bed, or for society of all things; if for society of bed only, then is the woman called a CONCUBINE. And here also the child shall be his or hers, as they shall agree particularly by

covenant; for although for the most part a concubine is supposed to yield up the right of her children to the father, yet doth not concubinate enforce so much.

7. But if the covenants of cohabitation be for society of all things, it is necessary that but one of them govern and dispose of all that is common to them both; without which (as hath been often said before) society cannot last. And therefore the man, to whom for the most part the woman yieldeth the government, hath for the most part also the sole right and dominion over the children. And the man is called the HUSBAND, and the woman the WIFE; but because sometimes the government may belong to the wife only, sometimes also the dominion over the children shall be in her only; as in the case of a sovereign queen, there is no reason that her marriage should take from her the dominion over her children.

8. Children therefore, whether they be brought up and preserved by the father, or by the mother, or by whomsoever, are in most absolute subjection to him or her, that so bringeth them up, or preserveth them. And they may alienate them, that is, assign his or her dominion, by selling or giving them in adoption or servitude to others; or may pawn them for hostages, kill them for rebellion, or sacrifice them for peace, by the law of nature, when he or she, in his or her conscience, think it to be necessary.

9. The subjection of them who institute a commonwealth amongst themselves, is no less absolute, than the subjection of servants. And therein they are in equal estate; but the hope of those is greater than the hope of these. For he that subjecteth himself uncompelled, thinketh there is reason he should be better used, than he that doth it upon compulsion; and coming in freely, calleth himself, though in subjection, a FREEMAN; whereby it appeareth, that liberty is not any exemption from subjection and obedience to the sovereign power, but a state of better hope than theirs, that have been subjected by force and conquest. And this was the reason, that the name that signifieth children, in the Latin tongue is liberi, which also signifieth freemen. And yet in Rome, nothing at that time was so obnoxious to the power of others, as children in the family of their fathers. For both the state had power over their life without consent of their fathers; and the

father might kill his son by his own authority, without any warrant from the state. Freedom therefore in commonwealths is nothing but the honour of equality of favour with other subjects, and servitude the estate of the rest. A freeman therefore may expect employments of honour, rather than a servant. And this is all that can be understood by the liberty of the subject. For in all other senses, liberty is the state of him that is not subject.

10. Now when a father that hath children, hath servants also, the children (not by the right of the child, but by the natural indulgence of the parents) are such freemen. And the whole consisting of the father or mother, or both, and of the children, and of the servants, is called a FAMILY; wherein the father or master of the family is sovereign of the same; and the rest (both children and servants equally) subjects. The same family if it grow by multiplication of children, either by generation or adoption; or of servants, either by generation, conquest, or voluntary submission, to be so great and numerous, as in probability it may protect itself, then is that family called a PATRIMONIAL KINGDOM, or monarchy by acquisition; wherein the sovereignty is in one man, as it is in a monarch made by political institution. So that whatsoever rights be in the one, the same also be in the other. And therefore I shall no more speak of them, as distinct, but as of monarchy in general.

11. Having shewed by what right the several sorts of commonwealths, democracy, aristocracy, and monarchy, are erected; it followeth to shew by what right they are continued. The right by which they are continued, is called the right of succession to the sovereign power; whereof there is nothing to be said in a democracy, because the sovereign dieth not, as long as there be subjects alive; nor in an aristocracy, because it cannot easily fall out, that the optimates should every one fail at once; and if it should so fall out, there is no question, but the commonwealth is thereby dissolved. It is therefore in a monarchy only, that there can happen a question concerning the succession. And first: forasmuch as a monarch, which is absolute sovereign, hath the dominion in his own right, he may

dispose thereof at his own will. If therefore, by his last will, he shall name his successor, the right passeth by that will.

12. Nor if the monarch die without any will concerning the succession declared, is it therefore to be presumed that it was his will, his subjects which are to him as his children and servants, should return again to the state of anarchy, that is, to war and hostility; for that were expressly against the law of nature, which commandeth to procure peace, and to maintain the same. It is therefore to be conjectured with reason, that it was his intention to bequeath them peace, that is to say, a power coercive, whereby to keep them from sedition amongst themselves; and rather in the form of monarchy, than any other government; forasmuch as he, by the exercise thereof in his own person, hath declared that he approveth of the same.

13. Further, it is to be supposed his intention was, that his own children should be preferred in the succession, (when nothing to the contrary is expressly declared) before any other. For men naturally seek their own honour, and that consisteth in the honour of their children after them.

14. Again, seeing every monarch is supposed to desire to continue the government in his successors, as long as he may; and that generally men are endued with greater parts of wisdom and courage, by which all monarchies are kept from dissolution, than women are; it is to be presumed, where no express will is extant to the contrary, he preferreth his male children before the female. Not but that women may govern, and have in divers ages and places governed wisely, but are not so apt thereto in general as men.

15. Because the sovereign power is indivisible, it cannot be supposed, that he intended the same should be divided, but that it should descend entirely upon one of them, which is to be presumed should be the eldest, assigned thereto by the lot of nature; because he appointed no other lot for the decision thereof. Besides, what difference of ability soever there may be amongst the brethren, the odds shall be adjudged to the elder, because no subject hath authority otherwise to judge thereof.

16. And for want of issue in the possessor, the brother shall be the presumed successor. For by the judgment of nature, next in blood is next. in love; and next in love is next to preferment.

17. And as the succession followeth the first monarch, so also it followeth him or her that is in possession; and consequently, the children of him in possession shall be preferred before the children of his father or predecessor.

Chapter 24: The Incommodities of Several Sorts of Government Compared

1. HAVING SET forth the nature of a person politic, and the three sorts thereof, democracy, aristocracy, and monarchy; in this chapter shall be declared, the conveniences, and inconveniences, that arise from the same, both in general, and of the said several sorts in particular. And first, seeing a body politic is erected only for the ruling and governing of particular men, the benefit and damage thereof consisteth in the benefit or damage of being ruled. The benefit is that for which a body politic was instituted, namely, the peace and preservation of every particular man, than which it is not possible there can be a greater, as hath been touched before, Part I. chap. XIV, sect. 12. And this benefit extendeth equally both to the sovereign, and to the subjects. For he or they that have the sovereign power, have but the defence of their persons, by the assistance of the particulars; and every particular man hath his defence by their union in the sovereign. As for other benefits which pertain not to their safety and sufficiency, but to their well and delightful being, such as are superfluous riches, they so belong to the sovereign, as they must also be in the subject; and so to the subject, as they must also be in the sovereign. For the riches and treasure of the sovereign, is the dominion he hath over the riches of his subjects. If therefore the sovereign provide not so as that particular men may have means, both to preserve themselves, and also to preserve the public; the common or sovereign treasure can be none. And on the other side, if it were not for a common and public treasure belonging to the sovereign power, men's private riches would sooner serve to put them into confusion and war, than to secure or maintain them. Insomuch, as the profit of the sovereign and subject goeth always together. That distinction therefore of government, that there is one government for the good of him that

governeth, and another for the good of them that be governed; whereof the former is despotical (that is lordly); the other, a government of freemen, is not right; no more is the opinion of them that hold it to be no city, which consisteth of a master and his servants. They might as well say, it were no city, that consisted in a father and his own issue, how numerous soever they were. For to a master that hath no children, the servants have in them all those respects, for which men love their children; for they are his strength and his honour; and his power is no greater over them, than over his children.

2. The inconvenience arising from government in general to him that governeth, consisteth partly in the continual care and trouble about the business of other men, that are his subjects; and partly, in the danger of his person. For the head always is that part, not only where the care resideth, but also against which the stroke of an enemy most commonly is directed. To balance this incommmodity, the sovereignty, together with the necessity of this care and danger, comprehendeth so much honour, riches, and means whereby to delight the mind, as no private man's wealth can attain unto. The inconveniences of government in general to a subject are none at all, if well considered; but in appearance there be two things that may trouble his mind, or two general grievances. The one is loss of liberty; the other the uncertainty of meum and tuum. For the first, it consisteth in this, that a subject may no more govern his own actions according to his own discretion and judgment, or, (which is all one) conscience, as the present occasions from time to time shall dictate to him; but must be tied to do according to that will only, which once for all he had long ago laid up, and involved in the wills of the major part of an assembly, or in the will of some one man. But this is really no inconvenience. For, as it hath been shewed before, it is the only means by which we have any possibility of preserving ourselves; for if every man were allowed this liberty of following his conscience, in such difference of consciences, they would not live together in peace an hour. But it appeareth a great inconvenience to every man in particular, to be debarred of this liberty, because every one apart considereth it as in himself, and not as in the rest; by

which means, liberty appeareth in the likeness of rule and government over others; for where one man is at liberty, and the rest bound, there that one hath government. Which honour, he that understandeth not so much, demanding by the name simply of liberty, thinketh it a great grievance and injury to be denied it. For the second grievance concerning meum and tuum, it is also none, but in appearance only. It consisteth in this, that the sovereign power taketh from him that which he used to enjoy, knowing no other propriety, but use and custom. But without such sovereign power, the right of men is not propriety to any thing, but a community; no better than to have no right at all, as hath been shewed Part I. chap. XIV, sect. 10. Propriety therefore being derived from the sovereign power, is not to be pretended against the same; especially when by it every subject hath his propriety against every other subject, which when sovereignty ceaseth, he hath not, because in that case they return to war amongst themselves. Those levies therefore which are made upon men's estates, by the sovereign authority, are no more but the price of that peace and defence which the sovereignty maintaineth for them. If this were not so, no money nor forces for the wars or any other public occasion, could justly be levied in the world; for neither king, nor democracy, nor aristocracy, nor the estates of any land, could do it, if the sovereignty could not. For in all those cases, it is levied by virtue of the sovereignty; nay more, by the three estates here, the land of one man may be transferred to another, without crime of him from whom it was taken, and without pretence of public benefit; as hath been done. And this without injury, because done by the sovereign power; for the power whereby it is done, is no less than sovereign, and cannot be greater. Therefore this grievance for meum and tuum is not real; unless more be exacted than is necessary. But it seemeth a grievance, because to them that either know not the right of sovereignty, or to whom that right belongeth, it seemeth an injury; and injury, how light soever the damage, is always grievous, as putting us in mind of our disability to help ourselves; and into envy of the power to do us wrong.

3. Having spoken of the inconveniences of the subject, by government in general, let us consider the same in the three several sorts thereof, namely,

democracy, aristocracy, and monarchy; whereof the two former are in effect but one. For (as I have shewed before) democracy is but the government of a few orators. The comparison therefore will be between monarchy and aristocracy; and to omit that the world, as it was created, so also it is governed by one God Almighty; and that all the ancients have preferred monarchy before other governments, both in opinion, because they feigned a monarchical government amongst their gods; and also by their custom, for that in the most ancient times all people were so governed; and that paternal government, which is monarchy, was instituted in the beginning from the creation; and that other governments have proceeded from the dissolution thereof, caused by the rebellious nature of mankind, and be but pieces of broken monarchies cemented by human wit; I will insist only in this comparison upon the inconveniences that may happen to the subjects, in consequence to each of these governments.

4. And first it seemeth inconvenient, there should be committed so great a power to one man, as that it might be lawful to no other man or men to resist the same; and some think it inconvenient eo nomine, because he hath the power. But this reason we may not by any means admit, for it maketh it inconvenient to be ruled by Almighty God, who without question hath more power over every man, than can be conferred upon any monarch. This inconvenience therefore must be derived, not from the power, but from the affections and passions which reign in every one, as well monarch as subject; by which the monarch may be swayed to use that power amiss. And because an aristocracy consisteth of men, if the passions of many men be more violent when they are assembled together, than the passions of one man alone, it will follow, that the inconvenience arising from passion will be greater in an aristocracy, than a monarchy. But there is no doubt, when things are debated in great assemblies, but every man delivering his opinion at large, without interruption, endeavoureth to make whatsoever he is to set forth for good, better; and what he would have apprehended as evil, worse, as much as is possible; to the end his counsel may take place; which counsel also is never without aim at his own benefit, or honour: every man's end being some good to

himself. Now this cannot be done without working upon the passions of the rest. And thus the passions of those that are singly moderate, are altogether vehement; even as a great many coals, though but warm asunder, being put together inflame one another.

5. Another inconvenience of monarchy is this: that the monarch, besides the riches necessary for the defence of the commonwealth, may take so much more from the subjects, as may enrich his children, kindred and favourites, to what degree he pleaseth; which though it be indeed an inconvenience, if he should so do; yet is the same both greater in an aristocracy, and also more likely to come to pass; for there not one only, but many have children, kindred, and friends to raise; and in that point they are as twenty monarchs for one, and likely to set forward one another's designs mutually, to the oppression of all the rest. The same also happeneth in a democracy, if they all do agree; otherwise they bring in a worse inconvenience, (*viz.*) sedition.

6. Another inconvenience of monarchy, is the power of dispensing with the execution of justice; whereby the family and friends of the monarch, may with impunity, commit outrages upon the people, or oppress them with extortion. But in aristocracies, not only one, but many have power of taking men out of the hands of justice; and no man is willing his kindred or friends should be punished according to their demerits. And therefore they understand amongst themselves without farther speaking, as a tacit covenant: *Hodie mihi, cras tibi*.

7. Another inconvenience of monarchy, is the power of altering laws; concerning which, it is necessary that such a power be, that the laws may be altered, according as men's manners change, or as the conjuncture of all circumstances within and without the commonwealth shall require; the change of law being then inconvenient, when it proceedeth from the change, not of the occasion, but of the minds of him or them, by whose authority the laws are made. Now it is manifest enough of itself, that the mind of one man is not so variable in that point, as are the decrees of an assembly. For not only they have all their natural changes, but the change of any one man be enough, with eloquence and

reputation, or by solicitation and faction, to make that law to-day, which another by the very same means, shall abrogate to-morrow.

8. Lastly, the greatest inconvenience that can happen to a commonwealth, is the aptitude to dissolve into civil war. and to this are monarchies much less subject, than any other governments. For where the union, or band of a commonwealth, is one man, there is no distraction; whereas in assemblies, those that are of different opinions, and give different counsel, are apt to fall out amongst themselves, and to cross the designs of commonwealth for one another's sake: and when they cannot have the honour of making good their own devices, they yet seek the honour to make the counsels of their adversaries to prove vain. And in this contention, when the opposite factions happen to be anything equal in strength, they presently fall to war. Wherein necessity teacheth both sides, that an absolute monarch, (viz.) a general, is necessary both for their defence against one another, and also for the peace of each faction within itself. But this aptitude to dissolution, is to be understood for an inconvenience in such aristocracies only where the affairs of state are debated in great and numerous assemblies, as they were anciently in Athens, and in Rome; and not in such as do nothing else in great assemblies, but choose magistrates and counsellors, and commit the handling of state affairs to a few; such as is the aristocracy of Venice at this day. For these are no more apt to dissolve from this occasion, than monarchies, the counsel of state being both in the one and the other alike.

Chapter 25: That Subjects are not Bound to Follow Their Private Judgments in Controversies of Religion

1. HAVING SHOWED that in all commonwealths whatsoever, the necessity of peace and government requireth, that there be existent some power, either in one man, or in one assembly of men, by the name of the power sovereign, to which it is not lawful for any member of the same commonwealth to disobey; there occurreth now a difficulty, which, if it be not removed, maketh it unlawful for any man. to procure his own peace and preservation, because it maketh it unlawful for a man to put himself under the command of such absolute sovereignty as is required thereto. And the difficulty is this: we have amongst us the Word of God for the rule of our actions; now if we shall subject ourselves to men also, obliging ourselves to do such actions as shall be by them commanded; when the commands of God and man shall differ, we are to obey God, rather than man: and consequently the covenant of general obedience to man is unlawful.

2. This difficulty hath not been of very great. antiquity in the world. There was no such dilemma amongst the Jews; for their civil law, and divine law, was one and the same law of Moses: the interpreters whereof were the priests, whose power was subordinate to the power of the king; as was the power-of Aaron to the power of Moses. Nor is it a controversy that was ever taken notice of amongst the Grecians, Romans, or other Gentiles; for amongst these their severAl civil laws were the rules whereby not only righteousness and virtue, but also religion and the external worship of God, was ordered and approved; that being esteemed the true worship of God, which was kata ta nomima, (i.e.) according to the laws civil. Also those Christians that dwell under the temporal dominion of the bishop of Rome, are free from this question; for that they allow unto him (their sovereign) to interpret the Scriptures, which are the law of God, as he in his own judgment

shall think right. This difficulty therefore remaineth amongst, and troubleth those Christians only, to whom it is allowed to take for the sense of the Scripture that which they make thereof, either by their own private interpretation, or by the interpretation of such as are not called thereunto by public authority: they that follow their own interpretation, continually demanding liberty of conscience; and those that follow the interpretation of others not ordained thereunto by the sovereign of the commonwealth, requiring a power in matters of religion either above the power civil, or at least not depending on it.

3. To take away this scruple of conscience concerning obedience to human laws, amongst those that interpret to themselves the word of God in the Holy Scriptures; I propound to their consideration, first: that no human law is intended to oblige the conscience of a man, but the actions only. For seeing no man (but God alone) knoweth the heart or conscience of a man, unless it break out into action, either of the tongue, or other part of the body; the law made thereupon would be of none effect, because no man is able to discern, but by word or Other action whether such law be kept or broken. Nor did the apostles themselves pretend dominion over men's consciences concerning the faith they preached, but only persuasion and instruction. And therefore St. Paul saith 2 Cor. 1, 24, writing to the Corinthians, concerning their controversies, that he and the rest of the apostles, had no dominion over their faith, but were helpers of their joy.

4. And for the actions of men which proceed from their consciences, the regulating of which actions is the only means of peace; if they might not stand with justice, it were impossible that justice towards God, and peace amongst men should stand together in that religion that teacheth us, that justice and peace should kiss each other, and in which we have so many precepts of absolute obedience to human authority'. as Matth. 23, 2, 3, we have this precept: The Scribes and Pharisees sit in Moses' seat; all therefore whatsoever they bid you observe, that observe and do. And yet were the Scribes and Pharisees not priests, but men of temporal authority. Again Luke 11, 17: Every kingdom divided against itself shall be desolate; and is not that kingdom divided against itself,

where the actions of every one shall be ruled by his private opinion, or conscience; and yet those actions such as give occasion of offence and breach of peace? Again Rom. 13, 5, therefore you must be subject, not because of wrath only, but also for conscience sake. Titus 3, 1: Put them in remembrance, that they be subject to principalities and powers. 1 Peter 2, 3, 13-14: Submit yourselves unto all manner of ordinance of man, for the Lord's sake, whether it be unto the king, as unto the superior, or unto governors, as unto them that are sent of him for the punishment of evil-doers. Jude, verse 8: These dreamers also that defile the flesh, and despise government, and speak evil of them that are in authority. And forasmuch as all subjects in commonwealths are in the nature of children and servants, that which is a command to them, is a command to all subjects. But to these St. Paul saith, Colos. 3, 20, 22: Children, obey your parents in all things; servants, be obedient to your masters according to the flesh, in all things. And verse 23: Do it heartily as to the Lord, These places considered, it seemeth strange to me, that any man in a Christian commonwealth should have any occasion to deny his obedience to public authority, upon this ground, that it is better to obey God than man. For though St. Peter and the apostles did so answer the council of the Jews that forbad them to preach Christ, there appeareth no reason that Christians should allege the same against their Christian governors, that command to preach Christ. To reconcile this seeming contradiction of simple obedience to God and simple obedience to man, we are to consider a Christian subject, as under a Christian sovereign, or under an infidel.

5. And under a Christian sovereign we are to consider, what actions we are forbidden by God Almighty to obey them in, and what not. The actions we are forbidden to obey them in, are such only as imply a denial of that faith which is necessary to our salvation; for otherwise there can be no pretence of disobedience. For why should a man incur the danger of a temporal death, by displeasing of his superior, if it were not for fear of eternal death hereafter? It must therefore be enquired, what those propositions and articles they be, the belief whereof our Saviour or his apostles have declared to be such, as without believing them a man

cannot be saved; and then all other points that are now controverted, and make distinction of sects, Papists, Lutherans, Calvinists,. Arminians, &c., as in old time the like made Paulists, Apollonians, and Cephasians, must needs be such, as a man needeth not for the holding thereof deny obedience to his superiors. And for the points of faith necessary to salvation, I shall call them FUNDAMENTAL, and every other point a SUPERSTRUCTION.

6. And without all controversy, there is not any more necessary point to be believed for man's salvation than this, that Jesus is the Messiah, that is, the Christ; which proposition is explicated in sundry sorts, but still the same in effect; as, that he is God's anointed; for that is signified by the word Christ; that he was the true and lawful king of Israel, the son of David; and Saviour of the world, the redeemer of Israel; the salvation of God; he that should come into the world, the son of God, and (which I desire by the way to have noted, against the new sect of Arians), the begotten Son of God, Acts 3, 13; Heb. 1, 5; 5, 5: the only begotten Son of God, John 1, 14, 18; John 3, 16, 18; 1 John 4, 9: that he was God, John 1, 1; John 20, 28: that the fulness of the Godhead dwelt in him bodily. Moreover, the Holy One, the Holy One of God, the forgiver of sins, that he is risen from the dead: these are explications, and parts of that general article, that Jesus is the Christ. This point therefore, and all the explications thereof are fundamental; as also all such as be evidently inferred from thence; as, belief in God the Father: John 12, 44: He that believeth in me, believeth not in me, but in him that sent me; I John 2, 23: He that denieth the Son, hath not the Father. belief in God the Holy Ghost, of Whom Christ saith, John 14, 26: But the Comforter, which is the Holy Ghost, whom the Father will send in my name; and John 15, 26: But when the Comforter shall come, whom I will send unto you from the Father, even the Spirit of truth: belief of the Scriptures, by which we believe those points, and of the immortality of the soul, without which we cannot believe he is a Saviour.

7. And as these are the fundamental points of faith, necessary to salvation; so also are they only necessary as matter of faith, and only essential to the calling of a Christian; as may appear by many evident places of Holy Scripture: John 5, 39:

Search the Scriptures, for in them you think to have eternal life, and they are they which testify of me. Now, forasmuch as by the Scripture is meant there the Old Testament (the New being then not written), the belief of that which was written concerning our Saviour in the Old Testament, was sufficient belief for the obtaining of eternal life; but in the Old Testament, there is nothing revealed concerning Christ, but that he is the Messiah, and such things as belong to the fundamental points thereupon depending; and therefore those fundamental points are sufficient to salvation, as of faith. And John 6, 28, 29: Then said they unto him, What shall we do, that we might work the works of God? Jesus answered and said unto them, This is the work of God, that ye believe in him, whom he hath sent. So that the point to be believed is, That Jesus Christ came forth from God, and he which believeth it, worketh the works of God. John 11, 26, 27: Whosoever liveth and believeth in me, shall never die. Believest thou this? She said unto him, Yea, Lord, I believe that thou art the Christ, the Son of God, which should come into the world. Hence followeth that he that believeth this shall never die. John 20, 31: But these things are written, that ye might believe, that Jesus is the Christ, the Son of God; and that believing, ye might have life through his name. By which appeareth that this fundamental point is all that is required, as of faith to our salvation. 1 John 4, 2: Every spirit that confesseth that Jesus Christ is come in the flesh, is of God: 1 John 5, 1: Whosoever believeth that Jesus is the Christ, is born of God; and verse 4; Who is it that overcometh the world, but he that believeth, that Jesus is the Son of God? and verse 13: These things have I written unto you that believe in the name of the Son of God, that ye may know that ye have eternal life. Acts 8, 36, 37: The eunuch said, Here is water, what doth let me to be baptized? And Philip said unto him, If thou believest with all thy heart, thou mayest. He answered and said, I believe that Jesus Christ is the Son of God. This point therefore was sufficient for the reception of a man to baptism, that is to say to Christianity. And Acts 16, 30: The keeper of the prison fell down before Paul and Silas, and said, Sirs, what shall I do to be saved? And they said, Believe in the Lord Jesus Christ. And the sermon of St. Peter, upon the day of Pentecost, was

nothing else but an explication, that Jesus was the Christ. And when they that heard him, asked him, What shall we do? he said unto them, Acts 2, 38: Amend your lives, and be baptized every one of you in the name of Jesus Christ, for the remission of sins. Rom. 10, 9: If thou shalt confess with thy mouth the Lord Jesus, and shalt believe in thy heart, that God raised him up from the dead, thou shalt be saved. To these places may be added: that wheresoever our Saviour Christ doth approve the faith of any man, the proposition believed (if the same be to be collected out of the text) is always some of these fundamental points before mentioned, or something equivalent; as the faith of the centurion, Matth. 8, 8: Speak the word only, and my servant shall be healed; believing he was omnipotent; the faith of the woman, which had an issue of blood, Matth. 9, 21: If I may but touch the hem of his garment; implying, he was the Messiah; the faith required of the blind men, Matth. 9, 28: Believe you that I am able to do this? the faith of the Canaanitish woman, Matth. 15, 22, that he was the Son of David, implying the same. And so it is in every one of those places (none excepted) where our Saviour commendeth any man's faith; which because they are too many to insert here, I omit, and refer them to his inquisition that is not otherwise satisfied. And as there is no other faith required, so there was no other preaching; for the prophets of the Old Testament preached no other; and John the Baptist preached only the approach of the kingdom of heaven, that is to say, of the kingdom of Christ. The same was the commission of the apostles, Matth. 10, 7: Go preach, saying, The kingdom of heaven is at hand. And Paul preaching amongst the Jews, Acts 18, 5, did but testify unto the Jews, that Jesus was the Christ. And the heathens took notice of Christians no otherwise, but by this name that they believed Jesus to be a king, crying out, Acts 17, 6: These are they that have subverted the state of the world, and here they are, whom Jason hath received. And these all do against the decrees of Caesar, saying, that there is another king, one Jesus. And this was the sum of the predictions, the sum of the confessions of them that believed, as well men as devils. This was the title of his cross, Jesus of Nazareth, king of the Jews; this the occasion of the crown of

thorns, sceptre of reed, and a man to carry his cross;. this was the subject of the Hosannas; and this the title, by which our Saviour, commanding to take another man's goods, bade them say, The Lord hath need; and by this title he purged the temple of the profane market kept there. Nor did the apostles themselves believe any more than that Jesus was the Messiah nor understand so much; for they understood the Messiah to be no more than a temporal king, till after our Saviour's resurrection. Farthermore, this point that Christ is the Messiah, is particularly set forth for fundamental by that word, or some other equivalent thereunto in divers places. Upon the confession of Peter, Matth. 16, 16: Thou art the Christ, the son of the living God, our Saviour, verse 18, saith, Upon this rock will I build my Church. This point therefore is the whole foundation of Christ's church. Rom. 15, 20, St. Paul saith, So I enforced myself to preach the Gospel, not where Christ was named, lest I should have built upon another man's foundation. I Cor. 3, 10, St. Paul when he had reprehended the Corinthians for their sects, and curious doctrines and questions, he distinguisheth between fundamental points, and superstruction; and saith, I have laid the foundation, and another buildeth thereupon; but let every man take heed how he buildeth upon it. For other foundation can no man lay than that which is laid, which is Jesus the Christ. Colos. 2, 6: As you have received Christ Jesus the Lord, so walk in him, rooted and builded in him, and stablished in the faith.

8. Having showed this proposition, Jesus is the Christ, to be the only fundamental and necessary point of faith; I shall set down a few places more to show that other points, though they may be true, are not so necessary to be believed, as that a man may not be saved though he believe them not. And first, if a man could not be saved without assent of the heart to the truth of all controversies, which are now in agitation concerning religion, I cannot see how any man living can be saved; so full of subtilty, and curious knowledge it is, to be so great a divine. Why therefore should a man think that our Saviour, who Matth. 11, 30, saith, that his yoke is easy, should require a matter of that difficulty?. or how are little children said to believe? Matth. 18, 6; or how could the good thief

be thought sufficiently catechised upon the cross? or St. Paul so perfect a Christian presently upon his conversion? and though there may be more obedience required in him that hath the fundamental points explicated upon him, than in him, that hath received the same but implicitly; yet there is no more faith required for salvation in one man than in another. For if it be true, that whosoever shall confess with his mouth the Lord Jesus, and believe in his heart that God raised him from the dead, shall be saved; as it is, Rom. 10, 9; and that whosoever believeth that Jesus is the Christ, is born of God; the belief of that point is sufficient for the salvation of any man whosoever he be, forasmuch as concerneth faith. And seeing he that believeth not, that Jesus is the Christ, whatsoever he believe else, cannot be saved; it followeth that there is no more required to the salvation of one man, than of another, in matter of faith.

9. About these points fundamental there is little controversy amongst Christians, though otherwise of different sects amongst themselves. And therefore the controversies of religion, are altogether about points unnecessary to salvation; whereof some are doctrines raised by human ratiocination, from the points fundamental. As for example: such doctrines as concern the manner of the real presence, wherein are mingled tenets of faith concerning the omnipotency and divinity of Christ, with the tenets of Aristotle and the Peripatetics concerning substance and accidents, species, hypostasis and the subsistence and migration of accidents from place to place; words some of them without meaning, and nothing but the canting of Grecian sophisters; and these doctrines are condemned expressly Col. 2, 8, where after St. Paul had exhorted them to be rooted and builded in Christ, he giveth them this further caveat: Beware lest there be any man that spoil you through philosophy and vain deceits, through the traditions of men, according to the rudiments of the world. And such are such doctrines, as are raised out of such places of the Scriptures, as concern not the foundation, by men's natural reason; as about the concatenation of causes, and the manner of God's predestination; which are also mingled with philosophy; as if it were possible for men that know not in what manner God seeth, heareth, or speaketh,

to know nevertheless the manner how he intendeth, and predestineth. A man therefore ought not to examine by reason any point, or draw any consequence out of Scripture by reason, concerning the nature of God Almighty, of which reason is not capable. And therefore St. Paul, Rom. 12, 3, giveth a good rule, That no man presume to understand above that which is meet to understand, but that he understand according to sobriety'. which they do not who presume out of Scripture, by their own interpretation to raise any doctrine to the understanding, concerning those things which are incomprehensible. And this whole controversy concerning the predestination of God, and the freewill of man, is not peculiar to Christian men. For we have huge volumes of this subject, under the name of fate and contingency, disputed between the Epicureans and the Stoics, and consequently it is not matter of faith, but of philosophy; and so are also all the questions concerning any other point, but the foundation before named; and God receiveth a man, which part of the question soever he holdeth. It was a controversy in St. Paul's time, whether a Christian Gentile might eat freely of any thing which the Christian Jews did not; and the Jew condemned the Gentile that he did eat; to whom St. Paul saith, Rom. 14, 3: Let not him that eateth not, judge him that eateth; for God hath received him. And verse 6, in the question concerning the observing of holy days, wherein the Gentiles and the Jews differed, he saith unto them, He that observeth the day, observeth it to the Lord; and he that observeth not the day, observeth it not, to the Lord. And they who strive concerning such questions, and divide themselves into sects, are not therefore to be accounted zealous of the faith, their strife being but carnal, which is confirmed by St. Paul, 1 Cor. 3, 4: When one saith, I am of Paul, and another, I am of Apollos, are ye not carnal? For they are not questions of faith, but of wit, wherein, carnally, men are inclined to seek the mastery one of another. For nothing is truly a point of faith, but that Jesus is the Christ; as St. Paul testifieth, 1 Cor. 2, 2: For I esteemed not the knowledge of any thing amongst you, save Jesus Christ, and him crucified. And 1 Tim. 6, 20, 21: O Timotheus, keep that which is committed unto thee, and avoid profane and vain babblings, and opposition of

science falsely so called, which while some profess, they have erred, concerning the faith. 2 Tim. 2, 16: Stay profane and vain babblings, &c. Verse 17: Of which sort is Hymenaeus and Philetus, which as concerning the truth, have erred, saying that the resurrection is past already. Whereby St. Paul sheweth that the raising of questions by human ratiocination, though it be from the fundamental points themselves, is not only not necessary, but most dangerous to the faith of a Christian. Out of all these places I draw only this conclusion in general, that neither the points now in controversy amongst Christians of different sects, or in any point that ever shall be in controversy, excepting only those that are contained in this article, Jesus is the Christ, are necessary to salvation, as of faith; though as matter of obedience, a man may be bound not to oppose the same.

10. Although to the obtaining of salvation, there be required no more, as hath been already declared out of the Holy Scriptures, as matter of faith, but the belief of those fundamental articles before set forth; nevertheless, there are required other things, as matter of obedience. For, as it is not enough in temporal kingdoms (to avoid the punishment which kings may inflict) to acknowledge the right and title of the king, without obedience also to his laws; so also it is not enough to acknowledge our Saviour Christ to be the king of heaven, in which consisteth Christian faith, unless also we endeavour to obey his laws, which are the laws of the kingdom of heaven, in which consisteth Christian obedience. And forasmuch as the laws of the kingdom of heaven, are the laws of nature, as hath been shewed Part I. chap. XVIII, not only faith, but also the observation of the law of nature, which is that for which a man is called just or righteous (in that sense in which justice is taken not for the absence of all guilt, but for the endeavour, and constant will to do that which is just), not only faith, but this justice, which also from the effect thereof, is called repentance, and sometimes works, is necessary to salvation. So that faith and justice do both concur thereto; and in the several acceptation of this word justification, are properly said both of them to justify; and the want of either of them is properly said to condemn. For not only he that resisteth a king upon doubt of his title, but also he that doth it upon the

inordinateness of his passions, deserveth punishment. And when faith and works are separated, not only the faith is called dead, without works, but also works are called dead works, without faith. And therefore St. James, cha, 17, saith, Even so the faith, if it have no works, is dead in itself; and verse 26: For as the body without the spirit is dead, even so faith without works is dead. And St. Paul, Heb. 6, 1, calleth works without faith, dead works, where he saith, Not laying again the foundation of repentance from dead works. And by these dead works, is understood not the obedience and justice of the inward man, but the opus Operatum, or external action, proceeding from fear of punishment, or from vain glory, and desire to be honoured of men; and these may be separated from faith, and conduce no way to a man's justification. And for that cause St. Paul, Rom. 4, excludeth the righteousness of the law, from having part in the justification of a sinner. For by the law of Moses, which is applied to men's actions, and requireth the absence of guilt, all men living are liable to damnation; and therefore no man is justified by works, but by faith only. But if works be taken for the endeavour to do them, that is, if the will be taken for the deed, or internal for external righteousness, then do works contribute to salvation. And then taketh place that of St. James, cha, 24: Ye see then, how that of works a man is justified, and not of faith only. And both of these are joined to salvation, as in St. Mark 1, 15: Repent and believe the Gospel. And Luke 18, 18, when a certain ruler asked our Saviour, what he ought to do to inherit eternal life, he propounded to him the keeping of the commandments; which when the ruler said he had kept, he propounded to him the faith, Sell all that thou hast, and follow me. And John 3, 36: He that believeth in the Son, hath everlasting life. And He that obeyeth not the Son, shall not see life. Where he manifestly joineth obedience and faith together. And Rom: 1, 17: The just shall live by faith; not every one, but the just. For also the devils believe and tremble. But though both faith and justice (meaning still by justice, not absence of guilt, but the good intentions of the mind, which is called righteousness by God, that taketh the will for the deed) be both of them said to justify, yet are their parts in the act of justification to be distinguished. For justice

is said to justify, not because it absolveth, but because it denominates him just, and setteth him in an estate or capacity of salvation, whensoever he shall have faith. But faith is said to justify, that is, to absolve; because by it a just man is absolved of, and forgiven his unjust actions. And thus are reconciled the places of St. Paul and St. James, that faith only justifieth, and a man is not justified by faith only; and shewed how faith and repentance must concur to salvation.

11. These things considered it will easily appear: that under the sovereign power of a Christian commonwealth, there is no danger of damnation from simple obedience to human laws; for in that the sovereign alloweth Christianity, no man is compelled to renounce that faith which is enough for his salvation; that is to say, the fundamental points. And for other points,. seeing they are not necessary to salvation, if we conform our actions to the laws, we do not only what we are allowed, but also what we are commanded, by the law of nature, which is the moral law taught by our Saviour himself. And it is part of that obedience which must concur to our salvation.

12. And though it be true, whatsoever a man doth contrary to his conscience, is sin; yet the obedience in these cases, is neither sin, nor against the conscience. For the conscience being nothing else but a man's settled judgment and opinion, when he hath once transferred his right of judging to another, that which shall be commanded, is no less his judgment, than the judgment of that other. so that in obedience to laws, a man doth still according to his conscience, but not his private conscience. And whatsoever is done contrary to private conscience, is then a sin, when the laws have left him to his own liberty, and never else. And then whatsoever a man doth, not only believing it is ill done, but doubting whether it be ill or not, is done ill; in case he may lawfully omit the doing.

13. And as it hath been proved, that a man must submit his opinions, in matters of controversy, to the authority of the commonwealth; so also is the same confessed by the practice of every one of them that otherwise deny it. For who is there differing in opinion from another, and thinking himself to be in the right, and the other in the wrong, that would not think it reasonable, if he be of the same

opinion that the whole state alloweth, that the other should submit his opinion also thereunto? or that would not be content, if not that one or a few men, yet that all the divines of a whole nation, or at least an assembly of all those he liketh, should have the power to determine of all the controversies of religion? or, who is there that would not be content, to submit his opinions, either to the pope, or to a general council, or to a provincial council, or to a presbytery of his own nation? And yet in all these cases he submitteth himself to no greater than human authority. Nor can a man be said to submit himself to Holy Scripture, that doth not submit himself to some or other for the interpretation thereof; or why should there be any church government at all instituted, if the Scripture itself could do the office of a judge in controversies of faith? But the truth is apparent, by continual experience, that men seek not only liberty of conscience, but of their actions; nor that only, but a farther liberty of persuading others to their opinions; nor that only for every man desireth, that the sovereign authority should admit no other opinions to be maintained but such as he himself holdeth.

14. The difficulty therefore of obeying both God and man, in a Christian commonwealth is none: all the difficulty resteth in this point, whether he that hath received the faith of Christ, having before subjected himself to the authority of an infidel, be discharged of his obedience thereby, or not, in matters of religion. In which case it seemeth reasonable to think, that since all covenants of obedience are entered into for the preservation of a man's life, if a man be content, without resistance to lay down his life, rather than to obey the commands of an infidel; in so hard a case he hath sufficiently discharged himself thereof. For no covenant bindeth farther than to endeavour; and if a man cannot assure himself to perform a just duty, when thereby he is assured of present death, much less can it be expected that a man should perform that, for which he believeth in his heart he shall be damned eternally. And thus much concerning the scruple of conscience that may arise concerning obedience to human laws, in them that interpret the law of God to themselves. It remaineth, to remove the same scruple from them that

submit their controversies to others, not ordained thereunto by the sovereign authority. And this I refer to the chapter following.

Chapter 26: That Subjects are not bound to follow the Judgment of any Authorities in Controversies of Religion which is not Dependent on the Sovereign Power

1. IN THE former chapter have been removed those difficulties opposing our obedience to human authority, which arise from misunderstanding of our Saviour's title and laws; in the former whereof, namely his title, consisteth our faith; and in the latter, our justice. Now they who differ not amongst themselves concerning his title and laws, may nevertheless have different opinions concerning his magistrates, and the authority he hath given them. And this is the cause why many Christians have denied obedience to their princes; pretending that our Saviour Christ hath not given this magistracy to them, but to others. As for example: some say, to the pope universally; some, to a synod aristocratical; some, to a synod democratical in every several commonwealth; and the magistrates of Christ being they by whom he speaketh: the question is, whether he speak unto us by the pope, or by convocations of bishops and ministers, or by them that have the sovereign power in every commonwealth.

2. This controversy was the cause of those two mutinies that happened against Moses in the wilderness. The first by Aaron and his sister Miriam, who took upon them to censure Moses, for marrying an Ethiopian woman. And the state of the question between them and Moses they set forth Numbers 12, 2, in these words: What hath the Lord spoken but only by Moses? hath he not spoken also by us? And the Lord heard this, &c., and punished the same in Miriam, forgiving Aaron upon his repentance. And this is the case of all them that set up the priesthood against the sovereignty. The other was of Corah, Dathan, and Abiram, who with two hundred and fifty captains gathered themselves together against Moses, and against Aaron. The state of their controversy was this: Whether God were not

with the multitude, as well as with Moses, and every man as holy as he. For, Numb. 16, 3, thus they say, You take too much upon you, seeing all the congregation is holy,. every one of them, and the Lord is amongst them: wherefore then lift ye yourselves above the congregation of the Lord? And this is the case of them that set up their private consciences, and unite themselves to take the government of religion out of the hands of him or them, that have the sovereign power of the commonwealth; which how well it pleaseth God, may appear by the hideous punishment of Corah and his accomplices.

3. In the government therefore of Moses, there was no power neither civil nor spiritual, that was not derived from him; nor in the state of Israel under kings, was there any earthly power, by which those kings were compellable to any thing, or any subject allowed to resist them, in any case whatsoever. For though the prophets by extraordinary calling, did often admonish and threaten them, yet had they no authority over them. And therefore amongst the Jews, the power spiritual and temporal, was always in the same hand.

4. Our Saviour Christ, as he was the rightful king of the Jews in particular, as well as king of the kingdom of Heaven, in the ordaining of magistrates; revived that form of policy which was used by Moses. According to the number of the children of Jacob, Moses took unto him by the appointment of God, Numb. 1, 4, twelve men, every one of the chief of their tribe, which were to assist him in the muster of Israel. And these twelve, verse 24, are called the princes of Israel, twelve men, every one for the house of their fathers; which are said also Numb. 7, 2, to be heads over the houses of their fathers, and princes of the tribes, and over them that were numbered. And these were every one equal amongst themselves. In like manner our Saviour took unto him twelve apostles, to be next unto him in authority; of whom he saith Matth. 19, 28, When the Son of Man shall sit in the throne of his majesty, ye which follow me in the regeneration, shall sit also upon twelve thrones, and judge the twelve tribes of Israel. And concerning the equality of the twelve apostles amongst themselves our Saviour saith, Matth. 20, 25: Ye know that the Lords of the Gentiles have domination over them, &c. Verse 26:

But it shall not be so amongst you; but whosoever will be greatest among you, let him be your servant. And Matth. 23, 11: He that is greatest among you, let him be your servant. And a little before, verse 8, Be not called Rabbi; for one is your doctor Christ; and all ye are brethren. And Acts 1, in choosing of Matthias to be an apostle, though St. Peter used the part of a prolocutor, yet did no man take upon him the authority of election, but referred the same to lot.

5. Again, Moses had the command of God, Numb. 11, 16: Gather to me seventy men of the elders of Israel, whom thou knowest that they are the elders of the people, and governors over them, and bring them into the tabernacle, &c. And Moses did accordingly, verse 24. And these were chosen to help Moses in bearing the burthen of the government, as appeareth verse 17 of the same chapter. And as the twelve princes of the tribes were according to the number of Jacob's children; so were the seventy elders according to the number of the persons that went down with Jacob into Egypt. In like manner our Saviour in his kingdom of Heaven, the church, out of the whole number of those that believed in him, ordained seventy persons, which peculiarly were called the seventy disciples, to whom he gave power to preach the Gospel and baptize.

6. In our Saviour's time therefore, the hierarchy of the church consisted, besides himself that was the head, of twelve apostles, who were equal amongst themselves, but ordained over others, as were the twelve heads of the tribes; and seventy. disciples, who had every one of them power to baptize and teach, and help to govern the whole flock.

7. And whereas in the commonwealth instituted by Moses, there was not only a high-priest for the present, but also a succession and order of priests; it may be demanded why our Saviour Christ did not ordain the like? To which may be answered, that the high-priesthood, forasmuch as concerneth the authority thereof, was in the person of Christ, as he was Christ-King. So also was it in Moses, Aaron having the ministerial part only. For notwithstanding that Aaron was the high-priest, yet the consecration of him belonged to Moses, Exod. 29, 1. All the utensils of sacrifice, and other holy things, were ordered by Moses; and in sum:

the whole Levitical law was delivered by God by the hand of Moses, who was to Aaron a God, and Aaron to him a mouth. And for the ministerial part, there could no highpriest be ordained but himself; for seeing our Saviour was himself the sacrifice, who but himself could offer him up? And for the celebration of that sacrifice for ever after, our Saviour annexed the priesthood to those whom he had appointed to govern in the church.

8. After the ascension of our Saviour, the apostles dispersed themselves for the spreading of the Gospel; and continually as they converted any number of men, in any city or region, to the faith, they chose out such as they thought fittest, to direct them in matter of conversation and life, according to Christ's law, and to explicate unto them that mystery of Christ come in the flesh; that is to say, to unfold unto them at large the office of the Messiah. And of those elders some were subordinate to others, according as the apostles, who ordained them, thought meet. So St. Paul gave power to Titus, to ordain elders in Crete, and to redress things that were amiss. So that Titus was both an elder, and ordained elders, Tit. 1. 5: For this cause I left thee in Crete, that thou shouldest continue to redress the things that remain, and ordain elders in every city; where the word is *katasteses*, that is constitute; whereby it appeareth that in the apostles' times, one elder had authority over another, to ordain and rule them. For 1 Tim. 5, 19, Timothy an elder, is made judge of accusations against other elders. And Acts 14, 23, the disciples are said to ordain elders for all the congregations of the cities they had preached in; and though the word there be *cheirotonesantes*, yet it signifieth not election by holding up of hands, but simply and absolutely ordination. For the ordinary choosing of magistrates amongst the Grecians, which were all either popularly governed, or else by oligarchy, being performed by holding up of hands, made that word be taken simply for an election or ordination howsoever made. And thus in the primitive church, the hierarchy of the church was: apostles; elders that governed other elders; and elders that ruled not, but their office was to preach, to administer the sacraments, to offer up prayers and thanksgiving in the name of the people. But at that time there appeared no distinction between the

names of bishop and elder. But immediately after the apostles' time, the word bishop was taken to signify such an elder as had the government of elders, and other elders were called by the name of priests, which signifieth the same that elder doth. And thus the government of bishops hath a divine pattern in the twelve rulers, and seventy elders of Israel, in the twelve apostles and seventy disciples of our Saviour; in the ruling elders, and not ruling elders, in the time of the apostles.

9. And thus much of the magistrates over Christ's flock in the primitive church; for the office of a minister, or minstress, was to be subject to the flock, and to serve them in those things which appertain to their temporal business. The next thing to be considered is the authority which our Saviour gave to them, either over those whom they had converted, or those whom they were about to convert. And for these latter, which as yet were without the church, the authority which our Saviour gave to his apostles was no more but this: to preach unto them that Jesus was the Christ, to explicate the same in all points that concern the kingdom of heaven, and to persuade men to embrace our Saviour's doctrine, but by no means to compel any man to be subject to them. For seeing the laws of the kingdom of heaven, as hath been showed, Part I. chap. XVIII, sect. 10, are dictated to the conscience only, which is not subject to. compulsion and constraint; it was not congruent to the style of the King of Heaven to constrain men to submit their actions to him, but to advise them only; nor for him that professeth the sum of his law to be love, to extort any duty from us with fear of temporal punishment. And therefore as the mighty men in the world, that hold others in subjection by force, are called in Scripture by the name of hunters; so our Saviour calleth those whom he appointed to draw the world unto him, by subduing their affections, fishers; and therefore he saith to Peter and Andrew, Matth. 4, 19: Follow me, and I will make ye fishers of men. And Luke 10, 3: Behold, saith Christ, I send ye forth as lambs amongst wolves. And it were to no end to give them the right of compelling, without strengthening the same with greater power than of lambs amongst wolves. Moreover, Matth. 10, where our Saviour giveth a commission to his twelve apostles to go forth and convert the

nations to the faith, he giveth them no authority of coercion and punishment, but only saith, verse 14: Whosoever shall not receive you, nor hear your words, when ye depart out of that house, or that city, shake off the dust of your feet. Truly I say unto you, it shall be easier for the land of Sodom and Gomorrah in the day of judgment, than for that city. Whereby it is manifest, that all that the apostles could do by their authority, was no more than to renounce communion with them, and leave their punishment to God Almighty, in the day of judgment. Likewise the comparisons of the kingdom of heaven to the seed, Matth. 13, 3, and to the leaven, Matth. 13, 33, doth intimate unto us that the increase thereof ought to proceed from internal operation of God's word preached, and not from any law or compulsion of them that preach it. Moreover our Saviour himself saith, John 18, 36, that his kingdom is not of this world; and consequently his magistrates derive not from him any authority of punishing men in this world. And therefore also, Matth. 26, 52, after St. Peter had drawn his sword in his defence, our Saviour saith, Put up thy sword into his place. For all that take the sword shall perish by the sword. And, verse 54, How then shall the Scriptures be fulfilled, which say, that it must be so? showing out of the Scriptures, that the kingdom of Christ was not to be defended by the sword.

10. But concerning the authority of the apostles or bishops over those who were already converted and within the church, there be that think it greater than over them without. For some have said (Bellarmin. Lib. de Rom. Pont. ca): Though the law of Christ deprive no prince of his dominion, and Paul did rightly appeal to Caesar, whilst kings were infidels and out of the church; yet when they became Christians, and of their own accord underwent the laws of the gospel, presently as sheep to a shepherd, and as members to the head, they became subject to the prelate of the ecclesiastical hierarchy. Which, whether it be true or not, is to be considered by that light which we have from the Holy Scripture, concerning the power of our Saviour and his apostles, over such as they had converted. But our Saviour, as he imitated the commonwealth of the Jews in his magistrates, the twelve and the seventy; so did he also in the censure of the

church, which was excommunication; but amongst the Jews, the church did put the excommunicated persons from the congregation, which they might do by their power temporal; but our Saviour and his apostles, who took upon them no such power, could not forbid the excommunicated person to enter into any place and congregation, into which he was permitted to enter by the prince, or sovereign of the place; for that had been to deprive the sovereign of his authority. and therefore the excommunication of a person subject to an earthly power, was but a declaration of the church, which did excommunicate, that the person so excommunicated was to be reputed still as an infidel, but not to be driven by their authority out of any company he might otherwise lawfully come into. And this is it our Saviour saith, Matth. 18, 17: If he refuseth to hear the church, let him be unto thee as an heathen man and a publican. So that the whole effect of excommunicating a Christian prince, is no more than he or they that so excommunicate him, depart, and banish themselves out of his dominion. Nor can they thereupon discharge any of his subjects of their obedience to him; for that were to deprive him of his dominion, which they may not do; for being out of the church, it is confessed by them that make this objection, and proved in the former section, that our Saviour gave no authority to his apostles to be judges over them. And therefore in no case can the sovereign power of a commonwealth be subject to any authority ecclesiastical, besides that of Christ himself. And though he be informed concerning the kingdom of heaven, and subject himself thereto at the persuasions of persons ecclesiastical, yet is not he thereby subject to their government and rule. For if it were by their authority he took that yoke upon him, and not by their persuasion, then by the same authority he might cast it off; but this is unlawful. For if all the churches in the world should renounce the Christian faith, yet is not this sufficient authority for any of the members to do the same. It is manifest therefore that they who have sovereign power, are immediate rulers of the church under Christ, and all others but subordinate to them. If that were not, but kings should command one thing upon pain of death, and priests another upon

pain of damnation, it would be impossible that peace and religion should stand together.

11. And therefore there is no just cause for any man to withdraw his obedience from the sovereign state, upon pretence that Christ hath ordained any state ecclesiastical above it. And though kings take not upon them the ministerial priesthood (as they might if it pleased them) yet are they not so merely *laic*, as not to have sacerdotal jurisdiction. To conclude this chapter: since God speaketh not in these days to any man by his private interpretation of the Scriptures, nor by the interpretation of any power, above, or not depending on the sovereign power of every commonwealth; it remaineth that he speaketh by his vice-gods, or lieutenants here on earth, that is to say, by sovereign kings, or such as have sovereign authority as well as they.

Chapter 27: Of the Causes of Rebellion

1. HITHERTO OF the causes why, and the manner how, men have made commonwealths. In this chapter I shall show briefly, by what causes, and in what manner, they be again destroyed; not meaning to say anything concerning the dissolution of a commonwealth from foreign invasions, which is as it were the violent death thereof, I shall speak only of sedition, which is also the death of the commonwealth, but like to that which happeneth to a man from sickness and distemper. To dispose men to sedition three things concur. The first is discontent; for as long as a man thinketh himself well, and that the present government standeth not in his way to hinder his proceeding from well to better; it is impossible for him to desire the change thereof. The second is pretence of right; for though a man be discontent, yet if in his own opinion there be no just cause of stirring against, or resisting the government established, nor any pretence to justify his resistance, and to procure aid, he will never show it. The third is hope of success; for it were madness to attempt without hope, when to fail is to die the death of a traitor. Without these three: discontent, pretence, and hope, there can be no rebellion; and when the same are all together, there wanteth nothing thereto, but a man of credit to set up the standard, and to blow the trumpet.

2. And as for discontent, it is of two sorts: for it consisteth either in bodily pain present or expected, or else in trouble of the mind (which is the general division of pleasure and pain, Part I. chap. VII, sect. 9). The presence of bodily pain disposeth not to sedition; the fear of it doth. As for example: when a great multitude, or heap of people, have concurred to a crime worthy of death, they join together, and take arms to defend themselves for fear thereof. So also the fear of want, or in present want the fear of arrests and imprisonment, dispose to sedition. And therefore great exactions, though the right thereof be acknowledged, have

caused great seditions. As in the time of Henry VII. the seditions of the Cornish men that refused to pay a subsidy, and, under the conduct of the Lord Audley, gave the King battle upon Blackheath; and that of the northern people, who in the same king's time, for demanding a subsidy granted in parliament, murdered the Earl of Northumberland in his house.

3. Thirdly, the other sort of discontent which troubleth the mind of them who otherwise live at ease, without fear of want, or danger of violence, ariseth only from a sense of their want of that power, and that honour and testimony thereof, which they think is due unto them. For all joy and grief of mind consisting (as hath been said, Part I. chap. IX, sect. 21) in a contention for precedence to them with whom they compare themselves; such men must needs take it ill, and be grieved with the state, as find themselves postponed to those in honour, whom they think they excel in virtue and ability to govern. And this is it for which they think themselves regarded but as slaves. Now seeing freedom cannot stand together with subjection, liberty in a commonwealth is nothing but government and rule, which because it cannot be divided, men must expect in common; and that can be no where but in the popular state, or democracy. And Aristotle saith well (lib. 6, ca of his Politics), The ground or intention of a democracy, is liberty; which he confirmeth in these words: For men ordinarily say this: that no man can partake of liberty, but only in a popular commonwealth. Whosoever therefore in a monarchical estate, where the sovereign power is absolutely in one man, claimeth liberty, claimeth (if the hardest construction should be made thereof) either to have the sovereignty in his turn, or to be colleague with him that hath it, or to have the monarchy changed into a democracy. But if the same be construed (with pardon of that unskilful expression) according to the intention of him that claimeth, then doth he thereby claim no more but this, that the sovereign should take notice of his ability and deserving, and put him into employment and place of subordinate government, rather than others that deserve less. And as one claimeth, so doth another, every man esteeming his own desert greatest. Amongst all those that pretend to, or are ambitious of such honour, a few only can be

served, unless it be in a democracy; the rest therefore must be discontent. And so much of the first thing that disposeth to rebellion, namely, discontent, consisting in fear and ambition.

4. The second thing that disposeth to rebellion, is pretence of right. And that is when men have an opinion, or pretend to have an opinion: that in certain cases they may lawfully resist him or them that have the sovereign power, or deprive him or them of the means to execute the same. Of which pretences there be six special cases. One is, when the command is against their conscience, and they believe it is unlawful for a subject at the command of the sovereign power to do any action, which he thinketh in his own conscience not lawful for him to do, or to omit any action, which he thinketh not lawful for him to omit. Another is, when the command is against the laws, and they think the sovereign power in such sort obliged to his own laws, as the subject is; and that when he performeth not his duty, they may resist his power. A third is, when they receive commands from some man or men, and a supersedeas to the same from others, and think the authority is equal, as if the sovereign power were divided. A fourth is, when they are commanded to contribute their persons or money to the public service, and think they have a propriety in the same distinct from the dominion of the sovereign power; and that therefore they are not bound to contribute their goods and persons, no more than every man shall of himself think fit. A fifth, when the commands seem hurtful to the people; and they think, every one of them, that the opinion and sense of the people is the same with the opinion of himself, and those that consent with him; calling by the name of people, any multitude of his own faction. The sixth is, when the commands are grievous; and they account him that commandeth grievous things, a tyrant; and tyrannicide, that is, the killing of a tyrant, not only lawful, but also laudable.

5. All these opinions are maintained in the books of the dogmatics, and divers of them taught in public chairs, and nevertheless are most incompatible with peace and government, and contradictory to the necessary and demonstrable rules of the same. And for the first, namely, that a man may lawfully do or omit any

thing against his conscience, and from whence arise all seditions concerning religion and ecclesiastical government, it hath been plainly declared in the two last chapters, that such opinion is erroneous. For those two chapters have been wholly spent, to prove, that Christian religion not only forbiddeth not, but also commandeth, that in every commonwealth, every subject should in all things to the uttermost of his power obey the commands of him or them that is the sovereign thereof; and that a man in so obeying, doth according to his conscience and judgment, as having deposited his judgment in all controversies in the hands of the sovereign power; and that this error proceedeth from the ignorance of what and by whom God Almighty speaketh.

6. As for the second opinion which is: that the sovereign is in such sort obliged to his own laws, as the subject is; the contrary thereof hath been showed, Part II. chap. XX sections 7-12, by which it appeareth that the sovereign power is not to be resisted; that it carrieth the sword both of war and justice; that it hath the right of deciding all controversies, both judicial and deliberative; that it hath the making of all the laws civil; that it appointeth magistrates and public ministers, and that it implieth a universal impunity. How can he or they be said to be subject to the laws which they may abrogate at their pleasure, or break without fear of punishment? And this error seemeth to proceed from this, that men ordinarily understand not aright, what is meant by this word law, confounding law and covenant, as if they signified the same thing. But law implieth a command; covenant is but a promise. And not every command is a law, but only (Part I. chap. XIII, sect. 6) when the command is the reason we have of doing the action commanded. And then only is the reason of our actions in the command, when the omitting is therefore hurtful, because the action was commanded, not because it was hurtful of itself; and doing contrary to a command, were not at all hurtful, if there were not a right in him that commandeth to punish him that so doth. He or they that have all punishments in their own disposing, cannot be so commanded, as to receive hurt for disobeying, and consequently no command can be a law unto them. It is an error therefore to think: that the power which is virtually the

whole power of the commonwealth, and which in whomsoever it resideth, is usually called supreme or sovereign, can be subject to any law but that of God Almighty.

7. The third. opinion: that the sovereign power may be divided, is no less an error than the former, as hath been proved, Part II. chap. XX, sect. 15. And if there were a commonwealth, wherein the rights of sovereignty were divided, we must confess with Bodin, Lib. II. chap. I. *De Republica*, that they are not rightly to be called commonwealths, but the corruption of commonwealths. For if one part should have power to make the laws for all, they would by their laws, at their pleasure, forbid others to make peace or war, to levy taxes, or to yield fealty and homage without their leave; and they that had the right to make peace and war, and command the militia, would forbid the making of other laws, than what themselves liked. And though monarchies stand long, wherein the right of sovereignty hath seemed so divided, because monarchy of itself is a durable kind of government; yet monarchs have been thereby divers times thrust out of their possession. But the truth is, that the right of sovereignty is such, as he or they that have it, cannot, though they would, give away any part thereof, and retain the rest. As for example: if we should suppose the people of Rome to have had the absolute sovereignty of the Roman state, and to have chosen them a council by the name of the senate, and that to this senate they had given the supreme power of making laws, reserving nevertheless to themselves, in direct and express terms, the whole right and title of the sovereignty (which may easily happen amongst them that see not the inseparable connexion between the sovereign power and the power of making laws), I say, this grant of the people to the senate is of no effect, and the power of making laws is in the people still. For the senate understanding it to be the will and intention of the people, to retain the sovereignty, ought not to take that for granted, which was contradictory thereto, and passed by error. For, Part I. chap. XIII, sect. 9, in contradictory promises, that which is directly promised, is preferred before that which is opposite thereunto by consequence; because the consequence of a thing is not always observed, as is the thing itself.

The error concerning mixed government hath proceeded from want of understanding of what is meant by this word body politic, and how it signifieth not the concord, but the union of many men. And though in the charters of subordinate corporations, a corporation be declared to be one person in law, yet the same hath not been taken notice of in the body of a commonwealth or city, nor have any of those innumerable writers of politics observed any such union.

8. The fourth opinion (viz.): that subjects have their meum, tuum, and suum, in property, not only by virtue of the sovereign power over them all, distinct from one another, but also against the sovereign himself, by which they would pretend to contribute nothing to the public, but what they please, hath been already confuted, by proving the absoluteness of the sovereignty; and more particularly, Part II. chap. XXIV, sect. 2; and ariseth from this: that they understand not ordinarily, that before the institution of sovereign power meum and tuum implied no propriety, but a community, where every man had right to every thing, and was in state of war with every man.

9. The fifth opinion: that the people is a distinct body from him or them that have the sovereignty over them, is an error already confuted, Part II. chap. XXI, sect. 11, where it is showed, that when men say: the people rebelleth, it is to be understood of those particular persons only, and not of the whole nation. And when the people claimeth any thing otherwise than by the voice of the sovereign power, it is not the claim of the people, but only of those particular men, that claim in their own persons; and this error ariseth from the equivocation of the word people.

10. Lastly, for the opinion, that tyrannicide is lawful, meaning by a tyrant any man in whom resideth the right of sovereignty, it is no less false and pernicious to human society, than frequent in the writings of those moral philosophers, Seneca and others, so greatly esteemed amongst us. For when a man hath the right of sovereignty, he cannot justly be punished, as hath been often showed already, and therefore much less deposed, or put to death. And howsoever he might deserve punishment, yet punishment is unjust without judgment preceding, and judgment

unjust without power of judicature, which a subject hath not over his sovereign. But this doctrine proceedeth from the Schools of Greece, and from those that writ in the Roman state, in which not only the name of a tyrant, but of a king, was hateful.

11. Besides discontent, to the disposing of a man to rebellion, and pretence, there is required, in the third place, hope of success, which consisteth in four points: 1. That the discontented have mutual intelligence; 2. that they have sufficient number; 3. that they have arms; 4. that they agree upon a head. For these four must concur to the making of one body of rebellion, in which intelligence is the life, number the limbs, arms the strength, and a head the unity, by which they are directed to one and the same action.

12. The authors of rebellion, that is, the men that breed these dispositions to rebel in others, of necessity must have in them these three qualities: 1. To be discontented themselves; 2. to be men of mean judgment and capacity; and 3. to be eloquent men or good orators. And as for their discontent, from whence it may proceed, hath been already declared. And for the second and third, I am to show now, first, how they may stand together; for it seemeth a contradiction, to place small judgment and great eloquence, or, as they call it, powerful speaking, in the same man: and then in what manner they both concur to dispose other men to sedition.

13. It was noted by Sallust, that in Catiline (who was author of the greatest sedition that ever was in Rome) there was *Eloquentiae satis, sapientiae parum*; eloquence sufficient, but little wisdom. And perhaps this was said of Catiline, as he was Catiline: but it was true of him as an author of sedition. For the conjunction of these two qualities made him not Catiline, but seditious. And that it may be understood, how want of wisdom, and store of eloquence, may stand together, we are to consider, what it is we call wisdom, and what eloquence. And therefore I shall here again remember some things that have been said already, Part I. chap. V, VI. It is manifest that wisdom consisteth in knowledge. Now of knowledge there are two kinds; whereof the one is the remembrance of such

things, as we have conceived by our senses, and of the order in which they follow one another. And this knowledge is called experience; and the wisdom that proceedeth from it, is that ability to conjecture by the present, of what is past, and to come, which men call prudence. This being so, it is manifest presently, that the author of sedition, whosoever he be, must not be prudent. For if he consider and take his experiences aright, concerning the success which they have had, who have been the movers and authors of sedition, either in this or any other state, he shall find that of one man that hath thereby advanced himself to honour, twenty have come to a reproachful end. The other kind of knowledge is the remembrance of the names or appellations of things, and how every thing is called, which is, in matters of common conversation, a remembrance of pacts and covenants of men made amongst themselves, concerning how to be understood of one another. And this kind of knowledge is generally called science, and the conclusions thereof truth. But when men remember not how things are named, by general agreement, but either mistake and misname things, or name them aright by chance, they are not said to have science, but opinion; and the conclusions thence proceeding are uncertain, and for the most part erroneous. Now that science in particular from which proceed the true and evident conclusions of what is right and wrong, and what is good and hurtful to the being and well-being of mankind, the Latins call sapientia, and we by the general name of wisdom. For generally, not he that hath skill in geometry, or any other science speculative, but only he that understandeth what conduceth to the good and government of the people, is called a wise man. Now that no author of sedition can be wise in this acceptation of the word, is sufficiently proved, in that it hath been already demonstrated, that no pretence of sedition can be right or just; and therefore the authors of sedition must be ignorant of the right of state, that is to say, unwise. It remaineth therefore, that they be such, as name things not according to their true and generally agreed-upon names; but call right and wrong, good and bad, according to their passions, or according to the authorities of such as they admire, as Aristotle, Cicero, Seneca, and others of like authority, who have given the names of right and wrong, as their passions

have dictated; or have followed the authority of other men, as we do theirs. It is required therefore in an author of sedition, that he think right, that which is wrong; and profitable, that which is pernicious; and consequently that there be in him *sapientiae parum*, little wisdom.

14. Eloquence is nothing else but the power of winning belief of what we say; and to that end we must have aid from the passions of the hearer. Now to demonstration and teaching of the truth, there are required long deductions, and great attention, which is unpleasant to the hearer; therefore they which seek not truth, but belief, must take another way, and not only derive what they would have to be believed, from somewhat believed already, but also by aggravations and extenuations make good and bad, right and wrong, appear great or less, according as it shall serve their turns. And such is the power of eloquence, as many times a man is made to believe thereby, that he sensibly feeleth smart and damage, when he feeleth none, and to enter into rage and indignation, without any other cause, than what is in the words and passion of the speaker. This considered, together with the business that he hath to do, who is the author of rebellion, (viz.) to make men believe that their rebellion is just, their discontents grounded upon great injuries, and their hopes great; there needeth no more to prove, there can be no author of rebellion, that is not an eloquent and powerful speaker, and withal (as hath been said before) a man of little wisdom. For the faculty of speaking powerfully, consisteth in a habit gotten of putting together passionate words, and applying them to the present passions of the hearer.

15. Seeing then eloquence and want of discretion concur to the stirring of rebellion, it may be demanded, what part each of these acteth therein? The daughters of Pelias, king of Thessaly, desiring to restore their old decrepit father to the vigour of his youth, by the counsel of Medea chopped him in pieces, and set him a boiling with I know not what herbs in a cauldron, but could not make him revive again. So when eloquence and want of judgment go together, want of judgment, Like the daughters of Pelias, consenteth, through eloquence, which is as the witchcraft of Medea, to cut the commonwealth in pieces, upon pretence or

hope of reformation, which when things are in combustion, they are not able to effect.

Chapter 28: Of the Duty of Them That Have Sovereign Power

1. HAVING HITHERTO set forth how a body politic is made, and how it may be destroyed, this place requireth to say something concerning the preservation of the same. Not purposing to enter into the particulars of the art of government, but to sum up the general heads, wherein such art is to be employed, and in which consisteth the duty of him or them that have the sovereign power. For the duty of a sovereign consisteth in the good government of the people; and although the acts of sovereign power be no injuries to the subjects who have consented to the same by their implicit wills, yet when they tend to the hurt of the people in general, they be breaches of the law of nature, and of the divine Law; and consequently, the contrary acts are the duties of sovereigns, and required at their hands to the utmost of their endeavour, by God Almighty, under the pain of eternal death. And as the art and duty of sovereigns consist in the same acts, so also doth their profit. For the end of art is profit; and governing to the profit of the subjects, is governing to the profit of the sovereign, as hath been showed Part II. chapter XXIV, section 1. And these three: 1. the law over them that have sovereign power; 2. their duty; 3. their profit: are one and the same thing contained in this sentence, *Salus populi suprema lex*; by which must be understood, not the mere preservation of their lives, but generally their benefit and good. So that this is the general law for sovereigns: that they procure, to the uttermost of their endeavour, the good of the people.

2. And forasmuch as eternal is better than temporal good, it is evident, that they who are in sovereign authority, are by the law of nature obliged to further the establishing of all such doctrines and rules, and the commanding of all such actions, as in their conscience they believe to be the true way thereunto. For

unless they do so, it cannot be said truly, that they have done the uttermost of their endeavour.

3. For the temporal good of people, it consisteth in four points: 1. Multitude. 2. Commodity of living. 3. Peace amongst ourselves. 4. Defence against foreign power. Concerning multitude, it is the duty of them that are in sovereign authority, to increase the people, in as much as they are governors of mankind under God Almighty, who having created but one man, and one woman, declared that it was his will they should be multiplied and increased afterwards. And seeing this is to be done by ordinances concerning copulation: they are by the law of nature bound to make such ordinances concerning the same, as may tend to the increase of mankind. And hence it cometh, that in them who have sovereign authority: not to forbid such copulations as are against the use of nature; not to forbid the promiscuous use of women; not to forbid one woman to have many husbands; not to forbid marriages within certain degrees of kindred and affinity: are against the Law of nature. For though it be not evident, that a private man living under the law of natural reason only, doth break the same, by doing any of these things aforesaid; yet it is manifestly apparent, that being so prejudicial as they are to the improvement of mankind, that not to forbid the same, is against the law of natural reason, in him that hath taken into his hands any portion of mankind to improve.

4. The commodity of living consisteth in liberty and wealth. By Liberty I mean, that there be no prohibition without necessity of any thing to any man, which was lawful to him in the law of nature; that is to say, that there be no restraint of natural liberty, but what is necessary for the good of the commonwealth; and that well-meaning men may not fall into the danger of laws, as into snares, before they be aware. It appertaineth also to this liberty, that a man may have commodious passage from place to place, and not be imprisoned or confined with the difficulty of ways, and want of means for transportation of things necessary. And for the wealth of people, it consisteth in three things: the well ordering of trade, procuring of labour, and forbidding the superfluous consuming of food and apparel. All those therefore that are in sovereign authority,

and have taken upon them the government of people, are bound by the law of nature to make ordinances consisting in the points aforementioned; as being contrary to the law of nature, unnecessarily, either for one's own fancy, to enthrall, or tie men so, as they cannot move without danger; or to suffer them whose maintenance is our benefit, to want anything necessary for them, by our negligence.

5. For maintaining of peace at home, there be so many things necessarily to be considered, and taken order in, as there be several causes concurring to sedition. And first, it is necessary to set out to every subject his propriety, and distinct lands and goods, upon which he may exercise and have the benefit of his own industry, and without which men would fall out amongst themselves, as did the herdsmen of Abraham and Lot, every man encroaching and usurping as much of the common benefit as he can, which tendeth to quarrel and sedition. Secondly, to divide the burthens, and charge of the commonwealth proportionably. Now there is a proportionably to every man's ability, and there is a proportionably to his benefit by commonwealth: and this latter is it, which is according to the law of nature. For the burdens of the commonwealth being the price that we pay for the benefit thereof, they ought to be measured thereby. And there is no reason, when two men equally enjoying, by the benefit of the commonwealth, their peace and liberty, to use their industry to get their livings, whereof one spareth, and layeth up somewhat, the other spendeth all he gets, why they should not equally contribute to the common charge. That seemeth therefore to be the most equal way of dividing the burden of public charge, when every man shall contribute according to what he spendeth, and not according to what he gets; and this is then done, when men pay the commonwealth's part in the payments they make for their own provision. And this seemeth not only most equal, but also least sensible, and least to trouble the mind of them that pay it. For there is nothing so aggravateth the grief of parting with money, to the public, as to think they are overrated, and that their neighbours whom they envy, do thereupon insult over

them; and this disposeth them to resistance, and (after that such resistance hath produced a mischief) to rebellion.

6. Another thing necessary for the maintaining of peace, is the due execution of justice; which consisteth principally in the right performance of their duties, on the parts of those, who are the magistrates ordained for the same by and under the authority of the sovereign power; which being private men in respect of the sovereign, and consequently such as may have private ends, whereby they may be corrupted by gifts, or intercession of friends, ought to be kept in awe, by a higher power, lest people, grieved by their injustice, should take upon them to make their own revenges, to the disturbance of the common peace; which can by no way be avoided in the principal and immediate magistrates, without the judicature of the sovereign himself, or some extraordinary power delegated by him. It is therefore necessary, that there be a power extraordinary, as there shall be occasion from time to time, for the syndication of judges and other magistrates, that shall abuse their authority, to the wrong and discontent of the people; and a free and open way for the presenting of grievances to him or them that have the sovereign authority.

7. Besides those considerations by which are prevented the discontents that arise from oppression, there ought to be some means for the keeping under of those, that are disposed to rebellion by ambition; which consist principally in the constancy of him that hath the sovereign power, who ought therefore constantly to grace and encourage such, as being able to serve the commonwealth, do nevertheless contain themselves within the bounds of modesty, without repining at the authority of such as are employed, and without aggravating the errors, which (as men) they may commit; especially when they suffer not in their own particular. and constantly to show displeasure and dislike of the contrary. And not only so, but also to ordain severe punishments, for such as shall by reprehension of public actions, affect popularity and applause amongst the multitude, by which they may be enabled to have a faction in the commonwealth at their devotion.

8. Another thing necessary, is the rooting out from the consciences of men all those opinions which seem to justify, and give pretence of right to rebellious actions; such as are: the opinion, that a man can do nothing lawfully against his private conscience; that they who have the sovereignty, are subject to the civil laws; that there is any authority of subjects, whose negative may hinder the affirmative of the sovereign power; that any subject hath a propriety distinct from the dominion of the commonwealth; that there is a body of the people without him or them that have the sovereign power; and that any lawful sovereign may be resisted under the name of a tyrant; which opinions are they, which, Part II. chap. XXVII, sect. 5-10, have been declared to dispose men to rebellion. And because opinions which are gotten by education, and in length of time are made habitual, cannot be taken away by force, and upon the sudden: they must therefore be taken away also, by time and education. And seeing the said opinions have proceeded from private and public teaching, and those teachers have received them from grounds and principles, which they have learned in the Universities, from the doctrine of Aristotle, and others (who have delivered nothing concerning morality and policy demonstratively; but being passionately addicted to popular government, have insinuated their opinions, by eloquent sophistry): there is no doubt, if the true doctrine concerning the law of nature, and the properties of a body politic, and the nature of law in general, were perspicuously set down, and taught in the Universities, but that young men, who come thither void of prejudice, and whose minds are yet as white paper, capable of any instruction, would more easily receive the same, and afterward teach it to the people, both in books and otherwise, than now they do the contrary.

9. The last thing contained in that supreme law, *salus populi*, is their defence; and consisteth partly in the obedience and unity of the subjects, of which hath been already spoken, and in which consisteth the means of levying soldiers, and of having money, arms, ships, and fortified places in readiness of defence; and partly, in the avoiding of unnecessary wars. For such commonwealths, or such monarchs, as affect war for itself, that is to say, out of ambition, or of vain-glory,

or that make account to revenge every little injury, or disgrace done by their neighbours, if they ruin not themselves, their fortune must be better than they have reason to expect.

Chapter 29: Of the Nature and Kinds of Laws

1. THUS FAR concerning the Nature of Man, and the constitution and properties of a Body Politic. There remaineth only for the last chapter, to speak of the nature and sorts of law. And first it is manifest, that all laws are declarations of the mind, concerning some action future to be done, or omitted. And all declarations and expressions of the mind concerning future actions and omissions, are either promissive, as I will do, or not do; or provise, as for example, If this be done or not done, this will follow; or imperative, as Do this, or do it not. In the first sort of these expressions, consisteth the nature of a covenant; in the second, consisteth counsel; in the third, command.

2. It is evident, when a man doth, or forbearth to do any action, if he be moved thereto by this only consideration, that the same is good or evil in itself; and that there be no reason why the will or pleasure of another should be of any weight in his deliberation, that then neither to do nor omit the action deliberated, is any breach of law. And consequently, whatsoever is a law to a man, respecteth the will of another, and the declaration thereof. But a covenant is the declaration of a man's own will. And therefore a law and a covenant differ; and though they be both obligatory, and a law obligeth no otherwise than by virtue of some covenant made by him who is subject thereunto, yet they oblige by several sorts of promises. For a covenant obligeth by promise of an action, or omission, especially named and limited; but a law bindeth by a promise of obedience in general, whereby the action to be done, or left undone, is referred to the determination of him, to whom the covenant is made. So that the difference between a covenant and a law, standeth thus: in simple covenants the action to be done, or not done, is first limited and made known, and then followeth the

promise to do or not do; but in a law, the obligation to do or not to do, precedeth, and the declaration what is to be done, or not done, followeth after.

3. And from this may be deduced, that which to some may seem a paradox: that the command of him, whose command is a law in one thing, is a law in every thing. For seeing a man is obliged to obedience before what he is to do be known, he is obliged to obey in general, that is to say, in every thing.

4. That the counsel of a man is no law to him that is counselled, and that he who alloweth another to give him counsel, doth not thereby oblige himself to follow the same, is manifest enough; and yet men usually call counselling by the name of governing; not that they are not able to distinguish between them, but because they envy many times those men that are called to counsel, and are therefore angry with them that are counselled. But if to counsellors there should be given a right to have their counsel followed, then are they no more counsellors, but masters of them whom they counsel; and their counsels no more counsels, but laws. For the difference between a law and a counsel being no more but this, that in counsel the expression is, Do, because it is best; in a law, Do, because I have right to compel you; or Do, because I say, do: when counsel which should give the reason of the action it adviseth to, becometh the reason thereof itself, it is no more counsel, but a law.

5. The names *lex*, and *jus*, that is to say, law and right, are often confounded; and yet scarce are there any two words of more contrary signification. For right is that liberty which law leaveth us; and laws those restraints by which we agree mutually to abridge one another's liberty. Law and right therefore are no less different than restraint and liberty, which are contrary; and whatsoever a man doth that liveth in a commonwealth, *jure*, he doth it *jure civili*, *jure naturae*, and *jure divino*. For whatsoever is against any of these laws, cannot be said to be *jure*. For the civil law cannot make that to be done *jure*, which is against the law divine, or of nature. And therefore whatsoever any subject doth, if it be not contrary to the civil law, and whatsoever a sovereign doth, if it be not against the law of nature, he doth it *jure divino*, by divine right. But to say, *lege divina*, by divine law, is

another thing. For the laws of God and nature allowing greater liberty than is allowed by the law civil (for subordinate laws do still bind more than the superior laws, the essence of law being not to loose, but to bind): a man may be commanded that by a law civil, which is not commanded by the law of nature, nor by the law divine. So that of things done *lege*, that is to say, by command of the law, there is some place for a distinction between *lege divina* and *lege civili*. As when a man giveth an alms, or helpeth him that is in need, he doth it not *lege civili*, but *lege divina*, by the divine law, the precept whereof is charity. But of things that are done *jure*, nothing can be said done *jure divino*, that is not also *jure civili*, unless it be done by them that having sovereign power, are not subject to the civil law.

6. The differences of laws are according to the differences, either of the authors and lawmakers, or of the promulgation, or of those that are subject to them. From the difference of the authors, or lawmakers, cometh the division of law into divine, natural, and civil. From the difference of promulgation, proceedeth the division of laws into written and unwritten. And from the difference of the persons to whom the law appertaineth, it proceedeth, that some laws are called simply laws, and some penal. As for example: thou shalt not steal, is simply a law; but this: he that stealeth an ox, shall restore four-fold, is a penal, or as others call it, a judicial law. Now in those laws, which are simply laws, the commandment is addressed to every man; but in penal laws the commandment is addressed to the magistrate, who is only guilty of the breach of it, when the penalties ordained are not inflicted; to the rest appertaineth nothing, but to take notice of their danger.

7. As for the first division of law into divine, natural, and civil, the first two branches are one and the same law. For the law of nature, which is also the moral law, is the law of the author of nature, God Almighty; and the law of God, taught by our Saviour Christ, is the moral law. For the sum of God's law is: Thou shalt love God above all, and thy neighbour as thyself; and the same is the sum of the law of nature, as hath been showed, Part I chap. XVIII. And although the doctrine

of our Saviour be of three parts moral, theological, and ecclesiastical; the former part only, which is the moral, is of the nature of a law universal; the latter part is a branch of the law civil; and the theological which containeth those articles concerning the divinity and kingdom of our Saviour, without which there is no salvation, is not delivered in the nature of laws, but of counsel and direction, how to avoid the punishment, which by the violation of the moral law, men are subject to. For it is not infidelity that condemneth (though it be faith that saveth), but the breach of the law and commandments of God, written first in man's heart, and afterwards in tables, and delivered to the Jews by the hands of Moses.

8. In the state of nature, where every man is his own judge, and differeth from other concerning the names and appellations of things, and from those differences arise quarrels, and breach of peace; it was necessary there should be a common measure of all things that might fall in controversy; as for example: of what is to be called right, what good, what virtue, what much, what little, what meum and tuum, what a pound, what a quart, &c. For in these things private judgments may differ, and beget controversy. This common measure, some say, is right reason: with whom I should consent, if there were any such thing to be found or known in *rerum natura*. But commonly they that call for right reason to decide any controversy, do mean their own. But this is certain, seeing right reason is not existent, the reason of some man, or men, must supply the place thereof; and that man, or men, is he or they, that have the sovereign power, as hath been already proved; and consequently the civil laws are to all subjects the measures of their actions, whereby to determine, whether they be right or wrong, profitable or unprofitable, virtuous or vicious; and by them the use and definition of all names not agreed upon, and tending to controversy, shall be established. As for example, upon the occasion of some strange and deformed birth, it shall not be decided by Aristotle, or the philosophers, whether the same be a man or no, but by the laws. The civil law containeth in it the ecclesiastical, as a part thereof, proceeding from the power of ecclesiastical government, given by our Saviour to all Christian

sovereigns, as his immediate vicars, as hath been said Part II. chap. XXVI, sect. 10.

9. But seeing it hath been said, that all laws are either natural or civil; it may be demanded, to which of these shall be referred that law, which is called martial law, and by the Romans *disciplina militaris*? And it may seem to be the same with the law of nature; because the laws by which a multitude of soldiers are governed in an army, are not consent, but continually changing with the occasion; and that is still a law, which is reason for the present, and reason is the law of nature. It is nevertheless true that martial law is, civil law. because an army is a body politic, the whole power whereof is in the General, and the laws thereof made by him; and though they still follow and change as reason requireth, yet it is not, as the reason of every private man (as in the law of nature), but as the reason of the General requireth.

10. When he, or they, in whom is the sovereign power of a commonwealth, are to ordain laws for the government and good order of the people, it is not possible they should comprehend all cases of controversy that may fall out, nor perhaps any considerable diversity of them; but as time shall instruct them by the rising of new occasions, so are also laws from time to time to be ordained: and in such cases where no special law is made, the law of nature keepeth its place, and the magistrates ought to give sentence according thereunto, that is to say, according to natural reason. The constitutions therefore of the sovereign power, by which the liberty of nature is abridged, are written, because there is no other way to take notice of them; whereas the laws of nature are supposed to be written in men's hearts. Written laws therefore are the constitutions of a commonwealth expressed; and unwritten, are the laws of natural reason. Custom of itself maketh no law. Nevertheless when a sentence hath been once given, by them that judge by their natural reason; whether the same be right or wrong, it may attain to the vigour of a law; not because the like sentence hath of custom been given in the like case; but because the sovereign power is supposed tacitly to have approved such sentence for right; and thereby it cometh to be a law, and numbered amongst the

written laws of the commonwealth. For if custom were sufficient to introduce a law, then it would be in the power of every one that is deputed to hear a cause, to make his errors laws. In like manner, those laws that go under the title of *responsa prudentum*, that is to say, the opinions of lawyers, are not therefore laws, because *responsa prudentum*, but because they are admitted by the sovereign. And from this may be collected, that when there is a case of private contract between the sovereign and the subject, a precedent against reason shall not prejudice the cause of the sovereign; no precedent being made a law, but upon supposition that the same was reasonable from the beginning.

And thus much concerning the Elements and general grounds of Laws Natural and Politic. As for the law of nations, it is the same with the law of nature. For that which is the law of nature between man and man, before the constitution of commonwealth, is the law of nations between sovereign and sovereign, after.

Of Liberty and Necessity

MY REASONS.

LIBERTY AND NECESSITY

A TREATISE,

WHEREIN ALL CONTROVERSY CONCERNING
PREDESTINATION, ELECTION, FREE-WILL, GRACE, MERITS,
REPROBATION, &c.

IS FULLY DECIDED AND CLEARED.

IN ANSWER TO A TREATISE WRITTEN BY THE BISHOP OF
LONDONDERRY,

ON THE SAME SUBJECT.

TO THE SOBER AND DISCREET READER.

IT MADE ST. Chrysostom tremble whenever he reflected on the proportion, which those that went the *narrow* way, bore to those which marched in the *broad*, how *many* were the called, and how *few* the chosen, how many they were that were created for and in a capacity of eternal beatitude, and how few attained it. This consideration certainly would make a man look upon the Holy Scriptures, among Christians, as the greatest indulgence of heaven, being all the directions it hath been pleased to afford poor *man* in so difficult a journey as that of his eternal bliss or misery. But when a man cometh to look into those transcendant writings, he finds them to be the works of a sort of innocent harmless men, that had little acquaintance or familiarity with the world, and consequently not much interested in the troubles and quarrels of several countries; that though they are all but necessary, yet were they written occasionally, rather than out of design; and lastly, that their main business is, to abstract man from this world, and to persuade him to prefer the bare hope of what he can neither *see*, *hear*, nor *conceive*, before all the present enjoyments this world can afford. This begat a reverence and esteem to them in all those who endeavour to work out their salvation out of them. But if a man, not weighing them in themselves, shall consider the practices of those, who pretend to be the interpreters of them, and to make them fit meat for the people; how that instead of renouncing the world, they endeavour to raise themselves into the greatest promotions, leisure, and luxury; that they make them the decoys of the people, to carry on designs and intrigues of state, and study the enjoyments of this world more than any other people: he will find some grounds to conclude, the practices of such men to be the greatest disturbance, burden, and vexation of the Christian part of the world. The complaint is as true as sad; instead of acquainting the credulous vulgar, with the main end of their functions,

and the great business of their embassy, what a great measure of felicity is prepared for them, and how easily it may be forfeited; they involve their consciences in the briars of a thousand needless scruples, they spin out volumes out of half sentences, nay, out of points and accents, and raise endless controversies about things, (were men free from passion and prejudice), in themselves clear enough: and when they have canvassed their questions, till they are weary themselves, and have wearied hearers and readers, and all they have to do with, every one sits down under his own vine, and hugs his own apprehensions; so that after all their pains, bandings, and implacable adhesion to parties, the inconvenience remains still, and we as far from any solid conviction, as at first setting out.

The controversies betwixt *Rome* and the *Reformation* are long since beaten out of the pit, by other combatants of their own brood; so that if we speak of *Protestant* and *Catholic*, they are in a manner content to sit down with their present acquiescence: for as to conviction, he certainly is a *rare proselyte*, at whose conversion, *interest, humour, discontent, inclination*, are not admitted to the debate.

But to come yet nearer our purpose, let us consider our own factions of factions of *religion* here in England, where if that saying, that *it is better to live where nothing is lawful, than where all things*, be as true in *religion* as *policy*, posterity may haply feel the sad consequence of it. What, I pray, is the effect of so many *sermons, teachings, preachings, exercises, and exercising of gifts, meetings, disputations, conferences, conventicles, printed books*, written with so much distraction and presumption upon God Almighty, and abuse of his Holy Word? Marry this: it is the seminary of many vexatious, endless, and fruitless controversies, the consequence whereof are jealousies, heart-burnings, exasperation of parties, the introduction of factions and national quarrels into matters of religion, and consequently all the calamities of war and devastation. Besides, they are good lawful diversions for the duller sort of *citizens*, who contract diseases for want of motion; they supply the building of pyramids among

the Egyptians, by diverting the thoughts of the people from matters of state, and consequently from rebellion.

They find work for *printers*, &c if the parties interested are troubled with the itch of popularity, and will suffer themselves to be scratched out of somewhat by way of contribution to the impression. Hence is the *stationer's* shop furnished, and thence the *minister's* study in the country who having found out the humour of his auditory, consults with his stationer, on what books his money is best bestowed; who very gravely, it may be, will commend *Cole upon the Philippians* before the excellent, but borrowed, *Caryl upon Job*. But as to any matter of conviction, we see every one *acquiesces* in his own sentiments, every one hears the teacher who is most to his humour; and when he hath been at church, and pretends to have sat at his feet, comes home and censures him as he pleases.

To be yet a little more particular, what shall we think of those vast and involuble volumes concerning *predestination*, *free-will*, *free-grace*, *election*, *reprobation*, &c., which fill not only our libraries, but the world with their noise and disturbance, whereof the least thing we are to expect is *conviction*; every side endeavouring to make good their own grounds, and keep the cudgels in their hands as long as they can? What stir is there between the Molinists and Jansenists about *grace* and *merits*; and yet both pretend St. Augustin!

Must we not expect, that the Jesuits will, were it for no other end but to vindicate that reputation of learning they have obtained in the world, endeavour to make good their tenets, though the other were the truer opinion? Is truth then retired to that inaccessible rock that admits no approaches? Or are we all turned Ixions, and instead of enjoying that Juno, entertain ourselves with the *clouds* of our own persuasions; of which unnatural coition, what other issue can there be but Centaurs and monstrous opinions? To these questions I shall not presume to answer, but in the words of this great author, who answering the charge of *impiety* laid upon the holding of *necessity*, says thus; *If we consider the greatest part of mankind, not as they should be, but as they are, that is as men, whom either the study of acquiring wealth and preferment, or whom the appetite of sensual*

delights, or the impatience of meditating, or the rash embracing of wrong principles, have made unapt to discuss the truth of things, I must confess, &c.

Certainly we have some reason to expect an effectual cure from this man, since he hath so fortunately found out the disease. Now if he in so few sheets hath performed more than all the voluminous works of the *priests and ministers*, and that in points of soul-concernment and Christian interest, as *predestination, free-will, grace, merits, election, reprobation, necessity, and liberty* of actions, and others, the main hinges of human *salvation*; and to do this, being a person, whom not only the averseness of his nature to engage himself in matters of controversy of this kind, but his severer study of the *mathematics*, might justly exempt from any such skirmishes; we may not stick to infer, that the *black-coats*, generally taken, are a sort of ignorant *tinkers*, who in matters of their own profession, such as is the *mending and soldering* of men's *consciences*, have made more *holes* than they found; nay, what makes them more impardonable, they have neither the gratitude nor ingenuity to acknowledge this repairer of their breaches, and assertor of their reputation, who hath now effected what they all this while have been tampering about. I know this author is little beholden to the *ministers*, and they make a great part of the nation; and besides them, I know there are many illiterate, obstinate, and invincible spirits: yet I dare advance this proposition, how bold soever it may seem to some; that this book, how little and contemptible soever it may seem, contains more evidence and conviction in the matters it treats of, than all the volumes, nay libraries, which the *priests, jesuits, and ministers* have, to our great charge, distraction, and loss of precious time, furnished us with. Which if so, I shall undertake for any rational man, that all the controversial labours concerning religion in the world, all the polemical treatises of the most ancient or modern, shall never breed any maggots of scruples, or dissatisfactions in his brains, nor shall his eyes or head ever ache with turning them over; but he shall be so resolved in mind, as never to importune God Almighty with impertinent addresses, nor ever become any of those enthusiastical *spiritati*, who, as the most learned Mr. White says, *expound Scripture without sense or reason*,

and are not to be disputed with but with the same success as men write on sand, and trouble their neighbours with their dreams, revelations, and spiritual whimsies. No! Here is solid conviction, at least so far as the metaphysical mysteries of our religion will admit. If God be *omnipotent*, he is *irresistible*; if so, *just* in all his actions, though we, who have as much capacity to measure the justice of God's actions as a man born blind to judge of colours, haply may not discern it. What then need any man trouble his head, whether he be predestinated or no? Let him live justly and honestly according to the *religion* of his *country*, and refer himself to God for the rest, since he is the potter, and may do what he please with the vessel. But I leave the reader to find his satisfaction in the treatise itself, since it may be I derogate from it by saying so much before it. This book, I doubt not, will find no worse entertainment than the *Leviathan*, both in regard of its bulk, and that it doth not strike so home at the *ministers* and *Catholic* party as that did. And yet here we must complain of want of sufficiency or ingenuity to acknowledge the truths or confute the errors of that book; which till it is done, we shall not count the author an heretic. On this side the sea, besides the dirt and slander cast on him in *sermons* and private meetings, none hath put anything in print against him, but Mr. Rosse; one who may be said to have had so much learning, as to have been perpetually barking at the works of the most learned. How he hath been received beyond seas I know not, but certainly, not without the regret of the *Catholics*; who building their *church* on other foundations than those of the *Scriptures*, and pretending *infallibility*, *certitude*, and *unity* in *religion*, cannot but be discontented that these prerogatives of religion are taken away, not only from *tradition*, that is to say, from the *church*, but also from the *Scriptures*, and are invested in the *supreme power* of the nation, be it of what persuasion it will.

Thus much, Reader, I have thought fit to acquaint thee with, that thou mightest know what a jewel thou hast in thy hands, which thou must accordingly value, not by the bulk, but the preciousness. Thou hast here in a few sheets what might prove work enough for many thousand sermons and exercises; and more than the

catechisms and *confessions* of a thousand *assemblies* could furnish thee with: thou hast what will cast an eternal blemish on all the *cornered* caps of the *priests* and *jesuits*, and all the *black and white* caps of the *canting tribe*; to be short, thou art now acquainted with that man, who, in matters of so great importance as those of thy salvation, furnishes thee with better instructions, than any thou hast ever yet been acquainted with, what *profession*, *persuasion*, *opinion*, or *church* soever thou art of; of whom and his works make the best use thou canst. Farewell.

TO THE LORD MARQUIS OF NEWCASTLE.

RIGHT HONOURABLE, I HAD once resolved to answer my Lord Bishop's objections to my book DE CIVE in the first place, as that which concerns me most; and afterwards to examine his Discourse of LIBERTY and NECESSITY, which, because I had never uttered my opinion of it, concerned me the less. But seeing it was your Lordship's and my Lord Bishop's desire that I should begin with the *latter*, I was contented so to do, and here I present and submit it to your Lordship's judgment.

And first I assure your Lordship I find in it no new argument neither from *Scripture* nor from *reason*, that I have not often heard before, which is as much as to say, I am not surprised.

The *preface* is a handsome one, but it appeareth even in that, that he hath mistaken the question. For whereas he says thus, *If I be free to write this Discourse, I have obtained the cause*: I deny that to be true, for it is enough to his freedom of writing, that he had not written it, unless he would himself. If he will obtain the cause, he must prove that before he writ it, it was not necessary he should prove it afterward. It may be his Lordship thinks it all one to say, *I was free* to write it, and, *It was not necessary* I should write it. But I think otherwise. For he is *free* to do a thing, that may do it if he have the will to 'do it, and may forbear, if he have the will to forbear. And yet if there be a *necessity* that he shall have the *will* to do it, the action is necessarily to follow: and if there be a *necessity* that he shall have the *will* to forbear, the forbearing also will be necessary. The question therefore is not, whether a man be a *free agent*, that is to say, whether he can write or forbear, speak or be silent, according to his *will*; but, whether the *will* to write, and the *will* to forbear, come upon him according to his *will*, or according to anything else in his own power. I acknowledge this *liberty*, that I *can*

do if I *will*; but to say, I can *will* if I *will*, I take to be an absurd speech. Wherefore I cannot grant my Lord the cause upon his *preface*.

In the next place, he maketh certain distinctions of *liberty*, and says he meaneth not *liberty* from *sin*, nor from *servitude*, nor from *violence*; but, from *necessity*, *necessitation*, *inevitability*, and *determination to one*.

It had been better to *define* liberty, than thus to *distinguish*. For I understand never the more what he means by *liberty*; and though he say he means *liberty* from *necessitation*, yet I understand not how such a *liberty* can be, and it is a taking of the question without proof. For what is else the question between us, but whether *such* a liberty be possible or not?

There are in the same place other distinctions: as a liberty of *exercise only*, which he calls a *liberty of contradiction*, namely of doing not good, or evil *simply*, but of doing this or that good, or this or that evil *respectively*, and a *liberty of specification and exercise also*, which he calls a liberty of *contrariety*, namely a liberty not only to do good or evil, but also to do or not do this or that good or evil.

And with these *distinctions* his Lordship says he *clears the coast*, whereas in truth, he darkeneth his own meaning and the question, not only with the jargon of *exercise only*, *specification also*, *contradiction*, *contrariety*, but also with pretending distinction where none is: for how is it possible that the *liberty* of doing or not doing this or that good or evil, can consist, as he says it does in God and good angels, without a liberty of doing or not doing good or evil?

The next thing his Lordship does, after clearing of the coast, is the dividing of his forces, as he calls them, into *two* squadrons, *one* of places of *Scriptures*, the *other* of *reasons*, which allegory he useth, I suppose, because he addresseth the discourse to your Lordship, who is a military man. All that I have to say touching this, is, that I observe a great part of those his *forces* do look and *march* another way, and some of them *fight* amongst themselves.

And the first place of *Scripture*, taken from Numb xxx. 13, is one of those that look another way; the words are, *If a wife make a vow, it is left to her husband's*

choice either to establish it or make it void. For it proves no more but that the husband is a *free and voluntary agent*, but not that his *choice* therein is not *necessitated* or not *determined* to what he shall choose, by precedent *necessary* causes.

For if there come into the husband's mind greater good by establishing than abrogating such a vow, the establishing will follow necessarily; and if the evil that will follow in the husband's opinion outweigh the good, the contrary must needs follow: and yet in this following of one's *hopes* and *fears*, consisteth the nature of *election*. So that a man may both choose this, and cannot but choose this, and consequently *choosing* and *necessity* are joined together.

The second place of Scripture is Joshua, xxiv. 15. The third is 2 Sam xxiv. 12, whereby it is clearly proved, that there is *election* in *man*, but not proved that such *election* was not *necessitated* by the *hopes*, and *fears*, and considerations of *good* and *had* to follow, which depend not on the *will*, nor are subject to *election*. And therefore one answer serves all such places, if there were a thousand.

But his Lordship supposing, it seems, I might answer, as I have done, that *necessity* and *election* might stand together, and instance in the actions of *children*, *fools*, or *brute beasts*, whose *fancies*, I might say, are *necessitated* and *determined* to *one*; before these his proofs out of Scripture, desires to prevent that instance, and therefore says that the actions of *children*, *fools*, *madmen*, and *beasts*, are indeed *determined*, but that they proceed not from *election*, nor from *free*, but from *spontaneous agents*. As for example, that the *bee*, when it maketh honey, does it *spontaneously*; and when the *spider* makes his web, he does it *spontaneously*, but not by *election*.

Though I never meant to ground my answer upon the experience of what *children*, *fools*, *mad men*, and *beasts* do; yet that your Lordship may understand what can be meant by *spontaneous*, and how it differeth from *voluntary*, I will answer that *distinction*, and show that it *fighteth* against its fellow arguments.

Your Lordship therefore is to consider, that all *voluntary* actions, where the thing that induceth the *will* is not *fear*, are called also *spontaneous*, and said to be

done by a man's *own* accord. As when a man giveth money voluntarily to another for merchandise, or out of affection, he is said to do it of his own accord, which in Latin is *sponte*, and therefore the action is *spontaneous*; though to give one's money willingly to a thief to avoid killing, or throw it into the sea to avoid drowning, where the motive is *fear*, be not called *spontaneous*. But every *spontaneous* action is not therefore *voluntary*, for *voluntary* presupposes some precedent *deliberation*, that is to say, some *consideration*, and *meditation*, of what is likely to *follow*, both upon the doing, and abstaining from the action deliberated of; whereas many actions are done of our *own* accord, and are therefore *spontaneous*, for which nevertheless, as my Lord thinks, we never *consulted* nor *deliberated* in ourselves. As when making no question nor any the least doubt in the world, but the thing we are about is good, we *eat* and *walk*, or in anger *strike* or *revile*, which my Lord thinks *spontaneous*, but not *voluntary* nor *elective* actions, and with *such* kind of actions, he says *necessitation* may stand, but not with such as are *voluntary*, and proceed upon *election* and *deliberation*. Now if I make it appear to your Lordship, that those actions, which, he says, proceed from *spontaneity*, and which he ascribes to *children*, *fools*, *madmen*, and *beasts*, proceed from *election* and *deliberation*, and that actions *inconsiderate*, *rash*, and *spontaneous*, are ordinarily found in those, that are by themselves and many more thought as *wise*, or wiser than ordinarily men are, then my Lord Bishop's argument concludeth, that *necessity* and *election* may stand together, which is contrary to that which he intendeth by all the rest of his arguments to prove.

And first your Lordship's own experience furnishes you with proof enough, that *horses*, *dogs*, and other brute *beasts*, do *demur* oftentimes upon the way they are to take, the horse retiring from some strange figure that he sees, and coming on again to avoid the spur. And what else doth a man that *deliberateth*, but one while *proceed* toward action, another while *retire* from it, as the *hope* of greater *good* draws him, or the *fear* of greater evil *drives* him away.

A *child* may be so young as to do what it does without all *deliberation*, but that is but till it have the chance to be hurt by doing of somewhat, or till it be of age to

understand the rod: for the actions, wherein he hath once had a check, shall be *deliberated* on the second time.

Fools and *madmen* manifestly *deliberate* no less than the *wisest* men, though they make not so good a *choice*, the images of things being by disease altered.

For *bees* and *spiders*, if my Lord Bishop had had so little to do as to be a spectator of their actions, he would have confessed not only *election*, but *art*, *prudence*, and *policy*, in them, very near equal to that of mankind. Of *bees*, Aristotle says, *their life is civil*. —

Again, his Lordship is deceived, if he think any *spontaneous* action, after once being checked in it, differs from an action *voluntary* and *elective*: for even the setting of a man's foot, in the posture for *walking*, and the action of ordinary *eating*, was once *deliberated* of how and when it should be done, and though afterward it became *easy* and *habitual*, so as to be done without *forethought*; yet that does not hinder but that the act is *voluntary*, and proceedeth from *election*. So also are the *raskest* actions of *choleric* persons *voluntary* and upon *deliberation*: for who is there but very young children, that hath not *considered* when and how far he *ought*, or safely *may* strike or revile? Seeing then his Lordship agrees with me, that such actions are *necessitated*, and the *fancy* of those that do them *determined* to the action they do, it follows out of his Lordship's own doctrine, that the liberty of *election* does not take away the *necessity* of *electing* this or that *individual* thing. And thus one of his arguments fights against another.

The second argument from Scripture, consisteth in histories of men that did one thing, when if they would, they might have done another; the places are two: one is! Kings iii. 10, where the history says, God was pleased that Solomon, who might, if he would, have asked *riches*, or *revenge*, did nevertheless ask *wisdom* at God's hands: the other is the words of St. Peter to Ananias, Acts v. 4: *After it was sold, was it not in thine own power?*

To which the answer is the same with that I answered to the former places, that they prove there is *election*, but do not disprove the *necessity*, which I maintain, of what they so elect.

The fourth argument (for to the third and fifth I shall make but one answer) is to this effect; *If the decrees of God, or his foreknowledge, or the influence of the stars, or the concatenation of causes, or the physical or moral efficacy of causes, or the last dictate of the understanding, or whatsoever it be, do take away true liberty, then Adam before his fall had no true liberty. Quicquid ostendes mihi sic incredulus odi.*

That which I say *necessitated and determinated every action*, that his Lordship may no longer doubt of my meaning, *is the sum of all things, which being now existent, conduce and concur to the production of that action hereafter, whereof if any one thing now were wanting, the effect could not be produced.* This *concourse of causes*, whereof every one is *determined* to be such as it is by a like *concourse of former causes*, may well be called (in respect they were all set and ordered by the eternal cause of all things, God Almighty) the *decree* of God.

But that the *foreknowledge* of God should be a cause of any thing, cannot be truly said, seeing foreknowledge is knowledge, and knowledge depends on the existence of the things known, and not they on it.

The *influence of the stars* is but a small part of the whole cause, consisting of the *concourse of all agents*.

Nor does the *concourse of all causes* make one simple *chain* or concatenation, but an innumerable number of chains, joined together, not in all parts, but in the first link God Almighty; and consequently the whole cause of an event, doth not always depend on one single chain, but on many together.

Natural efficacy of objects does *determine voluntary agents*, and *necessitates the will*, and consequently the *action*; but for *moral efficacy*, I understand not what he means. —

The last dictate of the judgment, concerning the good or bad, that may follow on any action, is not properly the *whole cause*, but the last part of it, and yet may be said to produce the effect *necessarily*, in such manner as the last feather may be said to break a horse's back, when there were so many laid on before as there wanted but that one to do it.

Now for his *argument*, that *if the concurrence of all the causes necessitate the effect, that then it follows, Adam had no true liberty*: I deny the consequence; for I make not only the *effect*, but also the *election*, of that particular effect *necessary*, inasmuch as the will itself, and each propension of a man during his deliberation, is as much necessitated, and depends on a sufficient cause, as any thing else whatsoever. As for example, it is no more necessary that fire should burn, than that a man or other creature, whose limbs be moved by fancy, should have *election*, that is *liberty*, to do what he hath a fancy to do, though it be not in his *will* or *power* to *choose* his *fancy*, or choose his *election* and *will*.

This doctrine, because my Lord Bishop says he hates, I doubt had better been suppressed, as it should have been, if both your Lordship and he had not pressed me to an answer.

The arguments of greatest consequence, are the third and the fifth, and they fall both into one, namely: *If there be a necessity of all events, that it will follow, that, praise and reprehension, and reward and punishment, are all vain and unjust; and that if God, should openly forbid, and secretly necessitate the same action, punishing men for what they could not avoid, there would be no belief among them of heaven and hell.*

To oppose hereunto I must borrow an answer from St. Paul, Rom ix. 20, 21. From the eleventh verse of the chapter to the eighteenth, is laid down the very same objection in these words: *When they, meaning Esau and Jacob, were yet unborn, and had done neither good nor evil, that the purpose of God according to election, not by works, but by him that calleth, might remain firm, it was said unto her (viz. Rebecca) that the elder should serve the younger, &c. What then shall we say? Is there injustice with God? God forbid. It is not therefore in him that willeth, nor in him that runneth, but in God, that sheweth mercy. For the Scripture saith to Pharaoh, I have stirred thee up that I might show my power in thee, and that my name might be set forth in all the earth. Therefore whom God willeth, he hath mercy on, and whom he willeth he hardeneth.* Thus you see the case put by

St. Paul, is the same with that of my Lord Bishop, and the same objection in these words following:

Thou wilt ask me then, why does God yet complain, for who hath resisted his will?

To this therefore the Apostle answers, not by denying it was God's *will*, or that the decree of God concerning Esau was not before he had sinned, or that Esau was not necessitated to do what he did; but thus: *Who art thou, O man, that interrogatest God? Shall the work say to the workman, why hast thou made me thus? Hath not the potter power over the clay, of the same stuff to make one vessel to honour, another to dishonour?* According therefore to this answer of St. Paul, I answer my Lord's objection, and say, the *power* of God alone without other helps is sufficient *justification* of any action he doth. That which men make amongst themselves here by pacts and covenants, and call by the name of justice, and according whereunto men are accounted and termed rightly *just* or *unjust*, is not that by which God Almighty's actions are to be measured or called just, no more than his counsels are to be measured by human wisdom. That which he does, is made just by his doing it; just, I say, in him, though not always just in us.

For a man that shall command a thing openly, and plot secretly the hindrance of the same, if he punish him that he so commandeth, for not doing it, it is unjust. So also, his counsels are therefore not in vain, because they be his, whether we see the use of them or not. When God afflicted Job, he did object no sin unto him, but justified his afflicting of him, by telling him of his *power*: (Job xl. 9:) *Hast thou, saith God, an arm like mine?* (Job xxviii. 4): *Where wert thou when I laid the foundations of the earth?* and the like. So our Saviour, (John ix. 3) concerning the man that was born blind, said, it was not for his sin, or for his parents' sin, but that the power of God might be shown in him. *Beasts* are subject to death and torments, yet they cannot sin: it was God's will they should be so. *Power irresistible justifies all actions, really and properly*, in whomsoever it be found; less power does not, and because such power is in God only, he must needs be

just in all actions, and we, that not comprehending his counsels, call him to the bar, commit injustice in it.

I am not ignorant of the usual reply to his answer, by distinguishing between *will* and *permission*, as that God Almighty does indeed sometimes *permit* sins, and that he also foreknoweth that the sin he permitteth, shall be committed, but does not *will* it, nor *necessitate* it.

I know also they distinguish the action from the sin of the action, saying, that God Almighty does indeed cause the *action*, whatsoever action it be, but not the *sinfulness* or *irregularity* of it, that is, the *discordance* between the *action* and the *law*. Such distinctions as these dazzle my understanding; I find no difference between the *will* to have a thing done, and the *permission* to do it, when he that permitteth can hinder it, and knows that it will be done unless he hinder it. Nor find I any difference between an *action* and the *sin* of that action; as for example, between the killing of Uriah, and the sin of David in killing Uriah, nor when *one* is *cause* both of the *action* and of the *law*, how *another* can be cause of the *disagreement* between them, no more than how one man making a longer and a shorter garment, another can make the inequality that is between them. This I know; God cannot sin, because his doing a thing makes it just, and consequently, no sin; as also because whatsoever can sin, is subject to another's law, which God is not. And therefore it is blasphemy to say, God can sin; but to say, that God can so order the world, as a sin may be necessarily caused thereby in a man, I do not see how it is any dishonour to him. Howsoever, if such or other *distinctions* can make it clear, that St. Paul did not think Esau's or Pharaoh's actions proceeded from the *will* and *purpose* of God, or that proceeding from his will, could not therefore without injustice be blamed or punished, I will, as soon as I understand them, turn unto my Lord's opinion: for I now hold nothing in all this question betwixt us, but what seemeth to me, not obscurely, but most expressly said in this place by St. Paul. And thus much in answer to his places of Scripture.

TO THE ARGUMENTS FROM REASON.

OF THE ARGUMENTS from *reason*, the first is that which his Lordship saith is drawn from Zeno's beating of his man, which is therefore called *argumentum baculinum*, that is to say, a wooden argument. The story is this; Zeno held, that all actions were necessary; his man therefore being for some fault beaten, excused himself upon the necessity of it: to avoid this excuse, his master pleaded likewise the necessity of beating him. So that not he that maintained, but he that derided the necessity, was beaten, contrary to that his Lordship would infer. And the argument was rather withdrawn than drawn from the story.

The second argument is taken from certain inconveniences which his Lordship thinks would follow such an opinion. It is true that ill use might he made of it, and therefore your Lordship and my Lord Bishop ought, at my request, to keep private what I say here of it. But the inconveniences are indeed none, and what use soever he made of truth, yet truth is truth, and now the question is not, what is fit to be preached, but, what is true.

The first inconvenience he says, is this; *That the laws, which prohibit any action, will be unjust.*

2. *That all consultations are vain.*

3. *That admonitions to men of understanding, are of no more use, than to children, fools, and madmen.*

4. *That, praise, dispraise, reward and punishment, are in vain.*

5, 6. *That counsels, acts, arms, books, instruments, study, tutors, medicines, are in vain.*

To which arguments his Lordship expecting I should answer, by saying, the ignorance of the event were enough to make us use the means, adds, as it were a reply to my answer foreseen, these words: *Alas! how should our not knowing the*

event be a sufficient motive to make us use the means? Wherein his Lordship says right, but my answer is not that which he expecteth: I answer, First, that the *necessity* of an *action* doth not make the *laws*, that prohibit it, *unjust*. To let pass, that not the *necessity*, but the *will* to break the *law*, maketh the action *unjust*, because the *law* regardeth the *will*, and no other precedent causes of action. And to let pass, that no *law* can possibly be *unjust*, inasmuch as every man maketh, by his consent, the law he is bound to keep, and which consequently must be just, unless a man can be unjust to himself. I say, what *necessary* cause soever precede an *action*, yet if the action be *forbidden*, he that doth it *willingly* may justly be punished. For instance, suppose the law on pain of death prohibit stealing, and that there be a man, who by the strength of temptation is *necessitated* to steal, and is thereupon put to death, does not this punishment deter others from theft? Is it not a cause that others steal not? Doth it not frame and make their wills to justice?

To make the *law*, is therefore to make a *cause* of *justice*, and to *necessitate* justice; and consequently, it is no injustice to make such a law.

The intention of the *law* is not to grieve the *delinquent*, for that which is past, and not to be undone -, but to make him and others *just*, that else would not be so, and respecteth not the evil act *past*, but the *good to come*; insomuch as without the good intention for the future, no past act of a delinquent could justify his killing in the sight of God. But you will say, how is it just to kill one man to amend another, if what were done were *necessary*? To this I answer, that men are justly killed, not for that their *actions* are not *necessitated*, but because they are *noxious*, and they are spared and preserved whose actions are not noxious. For where there is no law, there no killing nor anything else can be unjust; and by the right of nature, we destroy, without being unjust, all that is noxious, both beasts and men; and for beasts we kill them justly, when we do it in order to our own preservation, and yet my Lord himself confesseth, that their actions, as being only *spontaneous*, and not *free*, are all *necessitated* and determined to that one thing they shall do. For men, when we make societies or commonwealths, we lay not down our right to kill, excepting in certain cases, as murder, theft or other

offensive action; so that the right, which the *commonwealth* hath to put a man to death for crimes, is not created by the *law*, but remains from the first right of *nature*, which every man hath to preserve himself; for that the law doth not take the right away in the case of criminals, who were by the law excepted. Men are not therefore put to death, or punished, for that their theft proceedeth from *election*; but because it was *noxious* and contrary to men's preservation, and the punishment conducing to the preservation of the rest, inasmuch as to punish those that do voluntary hurt, and none else, frameth and maketh men's *wills* such as men would have them. And thus it is plain, that from the *necessity* of a *voluntary* action, cannot be inferred the *injustice* of the *law* that forbiddeth it, or the magistrate that punisheth it.

Secondly, I deny that it maketh *consultations* to be in *vain*; it is the *consultation* that *causeth* a man, and *necessitated* him to *choose* to do one thing rather than another: so that unless a man say that that cause is in vain which necessitateth the effect, he cannot infer the superfluosness of consultation out of the necessity of the election proceeding from it. But it seemeth his Lordship reasons thus: If I must do this rather than that, I shall do this rather than that, though I consult not at all; which is a false proposition and a false consequence, and no better than this: If I shall live till to-morrow, I shall live till to-morrow, though I run myself through with a sword to-day. If there be a *necessity* that an action shall be done, or that any effect shall be brought to pass, it does not therefore follow, that there is nothing necessarily requisite as a means to bring it to pass; and therefore when it is determined, that one thing shall be chosen before another, it is determined also for what *cause* it shall so be chosen, which cause, for the most part, is *deliberation* or *consultation*, and therefore consultation is not in vain, and indeed the less in vain by how much the election is more necessitated, if *more* and *less* had any place in *necessity*.

The same answer is to be given to the third supposed inconvenience, namely, that *admonitions* are in *vain*; for the admonitions are parts of consultation, the admonitor being a counsellor for the time to him that is admonished.

The fourth pretended inconvenience is, that *praise, dispraise, reward, and punishment* will be in *rain*. To which I answer, that for *praise* and *dispraise*, they depend not at all on the *necessity* of the action praised or dispraised. For what is it else to *praise*, but to say a thing is good? Good, I say, for me, or for somebody else, or for the state and commonwealth? And what is it to say an action is good, but to say it is as I would wish? or as another would have it, or according to the will of the state? that is to say, according to the law. Does my Lord think that no action can please me, or him, or the commonwealth, that should proceed from *necessity*? Things may be therefore *necessary*, and yet *praise-worthy*, as also *necessary*, and yet *dispraised*, and neither of them both in vain, because *praise* and *dispraise*, and likewise *reward* and *punishment*, do by example make and conform the will to good and evil. It was a very great praise in my opinion, that Velleius Paterculus (Lib n. 35) gives Cato, where he says that he was good by *nature, et quia aliter esse non potuit*.

To the fifth and sixth inconveniences, that *counsels, arts, arms, instruments, books, study, medicines*, and the like, would be *superfluous*, the same answer serves as to the former, that is to say, that this consequence, *if the effect shall necessarily come to pass, then it shall come to pass without its causes*, is a false one, and those things named counsels, arts, arms, &c are the causes of these effects.

His Lordship's *third* argument consisteth in other *inconveniences*, which he saith will follow, namely, *impiety* and *negligence* of religious duties, as repentance, and *zeal* to God's service, &c.

To which I answer as to the rest, that they follow not. I must confess, if we consider the greatest part of mankind, not as they should be, but as they are, that is, as men, whom either the study of acquiring wealth, or preferment, or whom the appetite of sensual delights, or the impatience of meditating, or the rash embracing of wrong principles, have made unapt to discuss the truth of things: I must, I say, confess that the dispute of this question will rather hurt than help their piety; and therefore if his Lordship had not desired this answer, I should not have

written it, nor do I write it but in hopes your Lordship and his will keep it private. Nevertheless in very truth, the *necessity* of events does not of itself draw with it any *impiety* at all. For *piety* consisteth only in *two* things; one, that we honour God in our hearts, which is, that we think as highly of his *power* as we can, for to honour anything is nothing else but to think it to be of great power; the other is, that we signify that honour and esteem by our words and actions, which is called *cultus*, or *worship of God*. He therefore that thinketh that all things proceed from God's *eternal will*, and consequently are *necessary*, does he not think God *omnipotent*? Does he not esteem of his *power* as highly as is possible? which is to honour God as much as may be in his heart. Again, he that thinketh so, is he not more apt by *external* acts and words to acknowledge it, than he that thinketh otherwise? yet is this external acknowledgment the same thing which we call *worship*. So that this opinion fortifies *piety* in both kinds, external and internal; therefore is far from destroying it. And for *repentance*, which is nothing else but a glad returning into the right way, after the grief of being out of the way; though the cause that made him go astray were necessary, yet there is no reason why he should not grieve; and, again though the cause why he returned into the way were necessary, there remained still the causes of joy. So that the *necessity* of the actions taketh away neither of those parts of *repentance*, grief for the error, and joy for returning.

And for *prayer*, whereas he saith that the *necessity* of things destroy *prayer*, I deny it; for though *prayer* be none of the *causes* that *move* God's *will*, his will being unchangeable, yet since we find in God's word, he will not give his blessings but to those that ask, the motive of prayer is the same. *Prayer* is the gift of God no less than the *blessing*, and the prayer is decreed together in the same decree wherein the blessing is decreed. It is manifest that *thanksgiving* is no cause of the blessing past, and that which is past is sure and necessary, yet even amongst men thanks is in use as an acknowledgment of the benefit past, though we should expect no new benefit for our gratitude. And prayer to God Almighty is but thanksgiving for God's blessings in general, and though it precede the particular

thing we ask, yet it is not a cause or means of it, but a signification that we expect nothing but from God, in such manner, as he, not as we, will; and our Saviour by word of mouth bids us pray, *thy will*, not our will, *be done*, and by example teaches us the same; for he prayed thus, *Father if it be thy will, let this cup pass*, &c. The end of prayer, as of thanksgiving, is not to *move* but to *honour* God Almighty, in acknowledging that what we ask can be effected by him only.

The fourth argument from reason is this: the order, beauty, and perfection of the world requireth that in the universe should be agents of all sorts; some necessary, some free, some contingent. He that shall make all things necessary, or all things free, or all things contingent, doth overthrow the beauty and perfection of the world.

In which argument I observe, first a *contradiction*; for seeing he that *maketh* anything, in that he maketh it, maketh it to be *necessary*; it followeth that he that maketh all things, maketh all things necessarily to be: as if a workman make a garment, the garment must necessarily be; so if God make every thing, every thing must necessarily be. Perhaps the beauty of the world requireth, though we know it not, that some agents should work without deliberation (which his lordship calls *necessary* agents) and some agents with deliberation (and those both he and I call *free* agents) and that some agents should work, and we not know how (and their effects we both call *contingents*); but this hinders not but that he that electeth may have his *election* necessarily determined to *one* by *former* causes, and that which is *contingent*, and imputed to fortune, be nevertheless *necessary* and depend on *precedent* necessary causes. For by *contingent*, men do not mean that which hath *no* cause, but that which hath not for cause anything that we perceive; as for example, when a traveller meets with a shower, the journey had a cause, and the rain had a cause sufficient to produce it; but because the journey caused not the rain, nor the rain the journey, we say they were contingent one to another. And thus you see that though there be three sorts of events, *necessary*, *contingent*, and *free*, yet they may be *all* necessary without destruction of the beauty or perfection of the universe.

To the first argument from reason, which is, *That if liberty be taken away, the nature and formal reason of sin is taken away*; I answer by denying the consequence: the nature of sin consisted in this, that the *action* done proceed from our *will* and be against the *law*. A judge in judging whether it be sin or no, which is done against the law, looks at no higher cause of the action, than the will of the doer. Now when I say the action was *necessary*, I do not say it was done *against* the will of the doer, but *with* his will, and *necessarily*, because man's will, that is every volition or act of the will and purpose of man had a *sufficient*, and therefore a *necessary* cause, and consequently every *voluntary* action was *necessitated*. An action therefore may be *voluntary* and a *sin*, and nevertheless be *necessary*; and because God may afflict by a right derived from his *omnipotence*, though sin were not, and because the example of punishment on voluntary sinners, is the cause that produceth justice, and maketh sin less frequent, for God to punish such sinners, as I have said before, is no injustice. And thus you have my answer to his Lordship's objections both out of Scripture, and from reason.

CERTAIN DISTINCTIONS, WHICH HIS LORDSHIP SUPPOSING MIGHT BE BROUGHT TO EVADE HIS ARGUMENTS, ARE BY HIM REMOVED.

HE SAYS A man may perhaps answer, that the *necessity* of things held by him, is not a *stoical* necessity, but a *Christian* necessity, &c. But this *distinction* I have not used, nor indeed ever heard before, nor could I think any man could make *stoical* and *Christian* two kinds of *necessity*, though they may be two kinds of *doctrine*. Nor have I drawn my answer to his Lordship's arguments from the authority of any sect, but from the nature of the things themselves.

But here I must take notice of certain words of his Lordship's in this place, as making against his own tenet. *Where all the causes, saith he, being joined together, and subordinate one to another, do make but one total cause, if any one cause, much more the first, in the whole series or subordination of causes, be necessary, it determines the rest, and without doubt maketh the effect necessary.* For that which I call the *necessary* cause of any effect, is the *joining* together of all causes subordinate to the first, into one total cause. *V any of these, saith he, especially the first, produce its effect necessarily, then all the rest are determined.* Now it is manifest, that the first cause is a necessary cause of all the effects that are next and immediate to it, and therefore by his Lordship's own reason all effects are necessary.

Nor is that distinction of necessary in respect of the *first cause*, and necessary in respect of *second causes*, mine; it does, as his Lordship well notes, imply a contradiction. But the distinction of *free* into *free from compulsion*, and *free from necessitation*, I acknowledge. For to be *free from compulsion* is to do a thing so as *terror* be not the cause of his *will* to do it; for a man is then only said to be compelled, when fear makes him willing to it: as when a man willingly throws his

goods into the sea to save himself, or submits to his enemy for fear of being killed. Thus all men that do anything for *love*, or *revenge*, or *lust*, are *free from compulsion*, and yet their actions may be as necessary as those that are done by compulsion; for sometimes other passions work as forcibly as fear. But *free from necessitation*, I say, no man can be, and it is that which his Lordship undertook to disprove.

This *distinction*, his Lordship says, uses to be *fortified* by two reasons, but they are not mine. The first he says, is, that it is granted by all divines, that an *hypothetical necessity*, or necessity upon supposition, may stand with *liberty*. That you may understand this, I will give you an example of *hypothetical necessity*. If *I shall live, I shall eat*. This is an *hypothetical necessity*. Indeed it is a necessary proposition, that is to say, it is necessary that that proposition should be true whensoever uttered, but it is not the necessity of the thing, nor is it therefore necessary that the man should live, nor that the man should eat. I do not use to *fortify* my distinctions with such reasons; let his Lordship confute them how he will, it contents me; but I would have your Lordship take notice hereby, how easy and plain a thing, but withal false, with the grave usage of such terms as *hypothetical necessity*, and *necessity upon supposition*, and such like terms of Schoolmen, may be obscured and made to seem *profound learning*.

The second reason that may confirm the distinction of *free from compulsion*, and *free from necessitation*, he says is, that God and good angels do good necessarily, and yet are more free than we. This reason, though I had no need of, yet I think it so far forth good, as it is true that God and good angels do good necessarily, and yet are free; but because I find not in the articles of our faith, nor in the decrees of our church, set down in what manner I am to conceive God and good angels to work by necessity, or in what sense they work *freely*, I suspend my sentence in that point, and am content that there be a *freedom from compulsion*, and yet no *freedom from necessitation*, as hath been proved, in that a man may be necessitated to some action without threats and without fear of danger. But how my Lord can avoid the consisting together of *freedom* and *necessity*, supposing

God and good angels are freer than men, and yet do good necessarily, that we must examine: *I confess, saith he, that God and good angels are more free than we, that is, intensively in degree of freedom, not extensively in the latitude of the object, according to a liberty of exercise not of specification.*

Again, we have here two distinctions that are no distinctions, but made to seem so by terms invented by I know not whom to cover ignorance, and blind the understanding of the reader: for it cannot be conceived that there is any liberty greater, than for a man to do what he will. One heat may be more intensive than another, but not one liberty than another; he that can do what he will, hath all liberty possible, and he that cannot, hath none at all. Also *liberty*, as his Lordship says the Schools call it, of *exercise*, which is as I have said before, a liberty to do or not to do, cannot be without a *liberty*, which they call, of *specification*, that is to say, a liberty to do, or not to do this or that in particular. For how can a man conceive he hath liberty to do anything, that hath not liberty to do this, or that, or somewhat in particular? If a man be forbidden in Lent to eat this, and that, and every other particular kind of flesh, how can he be understood to have a liberty to eat flesh, more than he that hath no licence at all? You may by this again see the vanity of distinctions used in the *Schools*, and I do not doubt but that the imposing of them, by authority of *doctors* in the *Church*, hath been a great cause that men have laboured, though by sedition and evil courses, to shake them off; for nothing is more apt to beget hatred, than the tyrannizing over men's reason and understanding, especially when it is done, not by the Scriptures, but by the pretence of learning, and more judgment than that of other men.

In the next place his Lordship bringeth two arguments against distinguishing between *free from compulsion* and *free from necessitation*.

The first is, that *election* is opposite not only to *coaction* or *compulsion*, but also *necessitation* or determination to one. This is it he was to prove from the beginning, and therefore bringeth no new argument to prove it; and to those brought formerly, I have already answered. And in this place I deny again, that election is opposite to either; for when a man is compelled, for example, to

subject himself to an enemy or to die, he hath still election left him, and a deliberation to bethink which of the two he can better endure. And he that is led to prison by force, hath election, and may deliberate whether he will be hauled and trained on the ground, or make use of his own feet: likewise when there is no *compulsion*, but the strength of *temptation* to do an evil action, being greater than the motives to *abstain*, it necessarily determines him to the doing of it; yet he deliberates while sometimes the motives to do, sometimes the motives to forbear, are working on him, and consequently he *electeth* which he will. But commonly when we see and know the strength that moves us, we acknowledge *necessity*; but when we see not, or mark not the force that moves us, we then think there is none, and that it is not *causes* but *liberty* that produceth the action. Hence it is that they think he does not choose this, that of necessity chooses it; but they might as well say, fire doth not burn, because it burns of necessity.

The second argument is not so much an argument as a distinction, to show in what sense it may be said that *voluntary* actions are *necessitated*, and in what sense not. And therefore his Lordship allegeth, as from the authority of the *Schools*, and that which rippeth up the bottom of the *question*, that there is a double act of the *will*. The one, he says, is *actus imperatus*, an act done at the command of the will, by some inferior faculty of the soul; as to open or shut one's eyes; and this act may be compelled: the other, he says, is *actus elicited*, an act allured or drawn forth by allurement out of the will, as to *will*, to *choose*, to *elect*; this he says cannot be compelled. Wherein, letting pass that metaphorical speech of attributing command and subjection to the faculties of the soul, as if they made a commonwealth or family within themselves, and could speak one to another, which is very improper in searching the truth of a question, you may observe, first, that to compel a *voluntary* act, is nothing else but to will it; for it is all one to say, my will commands the shutting of my eyes, or the doing of any other action; and to say, I have the will to shut my eyes: so that *actus imperatus*, here, might as easily have been said in English a *voluntary action*, but that they that invented the term, understood not anything it signified.

Secondly, you may observe, that *actus elicitus*, is exemplified by these words, to *will*, to *elect*, to *choose*, which are all one, and so to will is here made an act of the will; and indeed as the will is a faculty or power in a man's soul, so to will is an act of it according to that power; but as it is absurdly said, that to dance is an act allured or drawn by fair means out of the ability to dance; so is it also to say, that to will is an act allured or drawn out of the power to will, which power is commonly called the will. Howsoever it be, the sum of his Lordship's distinction is, that a *voluntary* act may be done by *compulsion*, that is to say, by foul means, but to will that, or any act, cannot be but by *allurement*, or fair means. Now seeing fair means, allurements, and enticements, produce the action which they do produce, as *necessarily* as foul means and threatening; it follows, that to *will* may be made as *necessary* as anything that is done by *compulsion*. So that distinction of *actus imperatus* and *actus elicitus* are but words, and of no effect against necessity.

His Lordship in the rest of his discourse, reckoneth up the opinion of certain professions of men, touching the causes wherein the necessity of things, which they maintain, consisteth. And first he saith, the *astrologer* deriveth his *necessity* from the *stars*; secondly, that the *physician* attributeth it to the *temper* of the body. For my part, I am not of their opinion, because, neither the stars alone, nor the temperature of the patient alone, is able to produce any effect, without the concurrence of all other agents. For there is hardly any one action, how casual soever it seem, to the causing whereof concur not whatsoever is *in rerum naturâ*, which because it is a great paradox, and depends on many antecedent speculations, I do not press in this place. Thirdly, he disputeth against the opinion of them that say, *external objects* presented to men of such and such temperatures, do make their actions *necessary*; and says, the power such objections have over us, proceeds from our own fault: but that is nothing to the purpose, if such fault of ours proceedeth from causes not in our own power, and therefore that opinion may hold true for all that answer.

Further he says, *prayer, fasting, &c* may alter our *habits*; it is true, but when they do so, they are *causes* of the contrary *habit*, and make it *necessary*, as the former habit had been necessary, if *prayer, fasting, &c* had not been. Besides, we are not moved or disposed to prayer or any other action, but by outward objects, as pious company, godly preachers, or something equivalent. Fourthly, he says a resolved mind is not easily surprised, as the mind of Ulysses, who when others wept, alone wept not; and of the philosopher, that abstained from striking, because he found himself angry: and of him that poured out the water when he was thirsty, and the like. Such things I confess have, or may have been done, and do prove only that it was not necessary for Ulysses then to weep, nor for that philosopher to strike, nor for that other man to drink; but it does not prove that it was not necessary for Ulysses then to abstain, as he did, from weeping, nor for the philosopher to abstain, as he did, from striking, nor for the other man to forbear drinking, and yet that was the thing his Lordship ought to have proved. Lastly his Lordship confesses, that the *dispositions* of objects may be *dangerous* to *liberty*, but cannot be *destructive*. To which I answer, it is impossible: for *liberty* is never in any other danger than to be lost; and if it cannot be lost, which he confesses, I may infer, it can be in no danger at all.

The fourth opinion his Lordship rejecteth, is of them that make the will necessarily to follow the last dictate of the understanding; but it seems his Lordship understands that tenet in another sense than I do; for he speaketh as if they that held it, did suppose men must dispute the sequel of every action they do, great and small, to the least grain; which is a thing his Lordship, with reason, thinks untrue. But I understand it to signify, that the *will* follows the *last* opinion or *judgment* immediately preceding the *action*, concerning whether it be good to do it or not, whether he have weighed it long before, or not at all, and that I take to be the meaning of them that hold it. As for example, when a man strikes, his will to strike follows necessarily that thought he had of the sequel of his stroke, immediately before the lifting up of his hand. Now if it be understood in that sense, the *last* dictate of the understanding does *necessitate* the *action*, though not

as the whole cause, yet as the last cause, as the last feather necessitates the breaking of a horse's back, when there are so many laid on before, as there needed but the addition of one to make the weight sufficient.

That which his Lordship allegeth against this, is first, out of a poet, who in the person of Medea says,

“Video menora, proboque,

Deteriora sequor.”

But that saying, as pretty as it is, is not true; for though Medea saw many reasons to forbear killing her children, yet the last dictate of her judgment was, that the present revenge on her husband outweighed them all, and thereupon the wicked action *necessarily* followed. Then the story of the Roman, who of two competitors, said, one had the better reason, but the other must have the office. This also maketh against his Lordship, for the last dictate of his judgment that had the bestowing of the office, was this, that it was better to take a great bribe, than reward a great merit.

Thirdly, he objects that things nearer the sense, move more powerfully than reason; what followeth thence but this, the sense of the present good is commonly more immediate to the action, than the foresight of the evil consequence to come? Fourthly, whereas his Lordship says, that do what a man can, he shall sorrow more for the death of his son than for the sin of his soul, makes nothing to the last dictate of the understanding; but it argues plainly, that sorrow for sin is not *voluntary*, and by consequence, that *repentance* proceedeth from causes.

The last part of this discourse containeth his Lordship's opinions about reconciling *liberty* with the *prescience* and *decrees* of God, otherwise than some *divines* have done, against whom, he says, he had formerly written a treatise, out of which he repeateth only two things: one is, *That we ought not to desert a certain truth, for not being able to comprehend the certain manner of it.* And I say

the same, as for example, that his Lordship ought not to desert this certain truth, *that there are certain and necessary causes which make every man to will what he willeth, though he do not yet conceive in what manner the will of man is caused.* And yet I think the manner of it is not very hard to conceive, seeing we see daily, that *praise, dispraise, reward, and punishment, good and evil, sequels of men's actions* retained in *memory*, do frame and make us to the *election* of whatsoever it be that we elect, and that the memory of such things proceeds from the *senses*, and *sense* from the operation of the objects of sense, which are external to us, and governed only by God Almighty; and by consequence all *actions*, even of *free* and *voluntary* agents, are necessary.

The other thing that he repeateth, is, that the best way to reconcile *contingence* and *liberty* with *prescience* and the *decrees* of *God*, is to subject future *contingencies* to the *aspect of God*. The same is also my opinion, but contrary to what his Lordship all this while laboured to prove. For hitherto he held *liberty* and *necessity*, that is to say, *liberty* and the *decrees* of *God*, irreconcilable, unless the *aspect of God*, which word appeareth now the first time in this discourse, signify somewhat else besides *God's will* and *decree*, which I cannot understand. But he adds that we must subject them, according to that *presentiality* which they have in eternity, which he says cannot be done by them that conceive *eternity* to be an *everlasting succession*, but only by them that conceive it as an *indivisible point*. To which I answer, that as soon as I can conceive *eternity* to be an *indivisible point*, or anything but an *everlasting succession*, I will renounce all that I have written on this subject. I know St. Thomas Aquinas calls *eternity*, *nunc stans*, an *ever-abiding now*; which is easy enough to say, but though I fain would, yet I could never conceive it: they that can, are more happy than I. But in the mean time his Lordship alloweth all men to be of my opinion, save only those that can conceive in their minds a *nunc stans*, which I think are none. I understand as little how it can be true his Lordship says, that God is not *just*, but *justice* itself; not *wise*, but *wisdom* itself; not *eternal*, but *eternity* itself; nor how he concludes thence, that *eternity* is a *point indivisible*, and not a *succession*, nor in what sense

it can be said, that an *infinite point*, and wherein is no *succession*, can comprehend all *time*, though time be *successive*. These phrases I find not in the Scripture; I wonder therefore what was the design of the Schoolmen to bring them up, unless they thought a man could not be a true Christian unless his understanding be first strangled with such hard sayings. And thus much for answer to his Lordship's discourse, wherein I think not only his *squadrons of arguments*, but also his *reserve of distinctions*, are defeated. And now your Lordship shall have my doctrine concerning the same question, with my *reasons* for it, positively, and as briefly as I can, without any terms of *art*, in plain English.

MY OPINION ABOUT LIBERTY AND NECESSITY.

FIRST I CONCEIVE, that when it cometh into a man's mind to do or not to do some certain action, if he have no time to *deliberate*, the doing it or abstaining *necessarily* follow *the present* thought he hath of the *good* or *evil* consequence thereof to himself. As for example, in sudden *anger*, the *action* shall follow the thought of *revenge*; in sudden *fear*, the thought of *escape*. Also when a man hath time to *deliberate*, but deliberates not, because never anything appeared that could make him doubt of the consequence, the *action* follows his opinion of the *goodness* or *harm* of it. These actions I call VOLUNTARY, my Lord, if I understand him aright that calls them SPONTANEOUS. I call them *voluntary*, because those *actions* that follow immediately the *last* appetite, are *voluntary*, and here where is one only appetite, that one is the last. Besides, I see it is reasonable to punish a *rash* action, which could not be justly done by man to man, unless the same were *voluntary*. For no *action* of a man can be said to be without *deliberation*, though never so sudden, because it is supposed he had time to *deliberate* all the precedent time of his life, whether he should do that kind of action or not. And hence it is, that he that killeth in a sudden passion of *anger*, shall nevertheless be justly put to *death*, because all the time, wherein he was able to consider whether to kill were good or evil, shall be held for one continual *deliberation*, and consequently the killing shall be judged to proceed from *election*.

Secondly, I conceive when a man *deliberates* whether he shall do a thing or not do it, that he does nothing else but consider whether it be better for himself to do it or not to do it. And to *consider* an action, is to imagine the *consequences* of it, both *good* and *evil*. From whence is to be inferred, that *deliberation* is nothing else but *alternate* imagination of the *good* and *evil* sequels of an *action*, or, which

is the same thing, alternate *hope* and *fear*, or alternate *appetite* to do or quit the action of which he *deliberateth*.

Thirdly, I conceive that in all *deliberations*, that is to say, in all alternate *succession* of contrary *appetites*, the last is that which we call the WILL, and is immediately next before the doing of the action, or next before the doing of it become impossible. All other *appetites* to do, and to quit, that come upon a man during his deliberations, are called *intentions* and *inclinations*, but not *wills*, there being but one *will*, which also in this case may be called the *last will*, though the *intentions* change often.

Fourthly, I conceive that those *actions*, which a man is said to do upon *deliberation*, are said to be *voluntary*, and done upon *choice* and *election*, so that *voluntary* action, and action proceeding from *election* is the same thing; and that of a *voluntary agent*, it is all one to say, he is *free*, and to say, he hath not made an end of *deliberating*.

Fifthly, I conceive *liberty* to be rightly defined in this manner: *Liberty is the absence of all the impediments to action that are not contained in the nature and intrinsical quality of the agent*. As for example, the water is said to descend *freely*, or to have *liberty* to descend by the channel of the river, because there is no impediment that way, but not across, because the banks are impediments. And though the water cannot ascend, yet men never say it wants the *liberty* to ascend, but the *faculty* or *power*, because the impediment is in the nature of the water, and intrinsical. So also we say, he that is tied, wants the *liberty* to go, because the impediment is not in him, but in his bands; whereas we say not so of him that is sick or lame, because the impediment is in himself.

Sixthly, I conceive that nothing taketh beginning from *itself*, but from the *action* of some other immediate *agent* without itself. And that therefore, when first a man hath an *appetite* or *will* to something, to which immediately before he had no appetite nor will, the *cause* of his *will*, is not the *will* itself, but *something* else not in his own disposing. So that whereas it is out of controversy, that of *voluntary* actions the *will* is the *necessary* cause, and by this which is said, the

will is also *caused* by other things whereof it disposeth not, it followeth, that *voluntary* actions have all of them *necessary* causes, and therefore are *necessitated*.

Seventhly, I hold that to be a *sufficient cause*, to which nothing is wanting that is needful to the producing of the *effect*. The same also is a *necessary* cause. For if it be possible that a *sufficient* cause shall not bring forth the *effect*, then there wanteth somewhat which was needful to the producing of it, and so the *cause* was not *sufficient*; but if it be impossible that a *sufficient* cause should not produce the *effect*, then is a *sufficient* cause a *necessary* cause, for that is said to produce an effect *necessarily* that cannot but produce it. Hence it is manifest, that whatsoever is produced, is produced *necessarily*; for whatsoever is produced hath had a *sufficient* cause to produce it, or else it had not been; and therefore also *voluntary* actions are *necessitated*.

Lastly, that ordinary *definition* of a *free agent*, namely, *that a free agent is that, which, when all things are 'present which are needful to produce the effect, can nevertheless not produce it*, implies a contradiction, and is nonsense; being as much as to say, the cause may be *sufficient*, that is to say, *necessary*, and yet the *effect* shall not follow.

MY REASONS.

FOR THE FIRST five points, wherein it is explicated i, what *spontaneity* is; II, what *deliberation* is; III, what *will*, *propension*, and *appetite* are; iv, what a *free agent* is: v, what *liberty* is; there can no other proof be offered but every man's own experience, by reflection on himself, and remembering what he useth in his mind, that is, what he himself meaneth when he saith an action is *spontaneous*, a man *deliberates*; such is his *will*, that *agent* or that *action* is *free*. Now he that reflecteth so on himself, cannot but be satisfied, that *deliberation* is the *consideration of the good and evil sequels of an action to come*; that by *spontaneity* is meant *inconsiderate action*, or else nothing is meant by it; that *will* is the *last act of our deliberation*; that a *free agent* is he *that can do if he will, and forbear if he will*; and that *liberty* is *the absence of external impediments*. But to those that out of custom speak not what they conceive, but what they hear, and are not able, or will not take the pains to consider what they think when they hear such words, no argument can be sufficient, because *experience* and *matter of fact* are not verified by other men's arguments, but by every man's own *sense* and *memory*. For example, how can it be proved that to *love* a thing and to think it *good* is all one, to a man that doth not mark his own meaning by those words? Or how can it be proved that *eternity* is not *nunc stans* to a man that says those words by custom, and never considers how he can conceive the thing in his mind?

Also the sixth point, that a man cannot imagine anything to begin *without, a cause*, can no other way be made known, but by trying how he can imagine it; but if he try, he shall find as much reason, if there be no cause of the thing, to conceive it should begin at one time as another, that he hath equal reason to think it should begin at all times, which is impossible, and therefore he must think there

was some special cause why it began then, rather than sooner or later; or else that it began never, but was *eternal*.

For the seventh point, which is, that all *events* have *necessary* causes, it is there proved, in that they have *sufficient* causes. Further let us in this place also suppose any event never so casual, as the throwing, for example, *ames ace* upon a pair of dice, and see, if it must not have been *necessary* before it was thrown. For seeing it was thrown, it had a *beginning*, and consequently a *sufficient* cause to produce it, consisting partly in the *dice*, partly in outward things, as the posture of the parts of the *hand*, the measure of *force* applied by the caster, the posture of the parts of the *table*, and the like. In sum, there was nothing wanting which was necessarily requisite to the producing of that particular cast, and consequently the cast was necessarily thrown; for if it had not been thrown, there had wanted somewhat requisite to the throwing of it, and so the cause had not been *sufficient*. In the like manner it may be proved that every other accident, how *contingent* soever it seem, or how *voluntary* soever it be, is produced *necessarily*, which is that that my Lord Bishop disputes against. The same may be proved also in this manner. Let the case be put, for example, of the weather. *It is necessary that to-morrow it shall rain or not rain*. If therefore it be not *necessary* it shall rain, it is *necessary* it shall not rain, otherwise there is no necessity that the proposition, *it shall rain or not rain*, should be true. I know there be some that say, it may necessarily be true that one of the two shall come to pass, but not, singly that it shall rain, or that it shall not rain, which is as much to say, *one* of them is *necessary*, yet neither of them is *necessary*; and therefore to seem to avoid that absurdity, they make a distinction, that neither of them is true *determinate*, but *indeterminate*; which distinction either signifies no more but this, one of them is true, but we know not which, and so the necessity remains, though we know it not; or if the meaning of the distinction be not that, it hath no meaning, and they might as well have said, one of them is true *Titirice*, but neither of them, *Tu patulice*.

The last thing, in which also consisteth the whole controversy, namely that there is no such thing as an agent, *which when all things requisite to action are*

present, can nevertheless forbear to produce it; or, which is all one, that there is no such thing as freedom from necessity, is easily inferred from that which hath been before alleged. For if it be an agent, it can work; and if it work, there is nothing wanting of what is requisite to produce the action, and consequently the cause of the action is sufficient; and if sufficient, then also necessary, as hath been proved before.

And thus you see how the *inconveniences*, which his Lordship objecteth must follow upon the holding of *necessity*, are avoided, and the *necessity* itself *demonstratively* proved. To which I could add, if I thought it good logic, the *inconvenience* of denying *necessity*, as that it destroyeth both the *decrees* and the *prescience* of God Almighty; for whatsoever God hath *purposed* to bring to pass by *man*, as an instrument, or foreseeeth shall come to pass; a man, if he have *liberty*, such as his Lordship affirmeth, from *necessitation*, might frustrate, and make not to come to pass, and God should either not *foreknow* it, and not *decree* it, or he should *foreknow* such things shall be, as shall never be, and *decree* that which shall never *come to pass*.

This is all that hath come into my mind touching this question since I last considered it. And I humbly beseech your Lordship to communicate it only to my Lord Bishop. And so praying God to prosper your Lordship in all your designs, I take leave, and am, My most noble and most obliging Lord, Your most humble servant, Rouen,

Aug. 20, 1652.

THOMAS HOBBS.

Answer to Sir William Davenant's Preface before Gondibert

MOLESWORTH 1840 EDITION

SIR,

IF to commend your Poem, I should onely say (in general Terms) that in the choice of your Argument, the disposition of the parts, the maintenance of the Characters of your Persons, the dignitie and vigour of your expression, you have performed all the parts of various experience, readie memorie, clear judgement, swift and well govern'd fancie, though it were enough for the truth, it were too little for the weight and credit of my testimonie. For I lie open to two Exceptions, one of an incompetent, the other of a corrupted Witness. Incompetent, because I am not a Poet; and corrupted with the Honour done me by your Preface. The former obliges me to say something (by the way) of the Nature and Differences of Poesie.

As Philosophers have divided the Universe (their subject) into three Regions, Celestial, Aërial, and Terrestrial; so the Poets, (whose work it is by imitating humane life, in delightfull and measur'd lines, to avert men from vice, and incline them to virtuous and honourable actions) haue lodg'd themselves in the three Regions of mankind, Court, Citie, and Countrey, correspondent in some proportion, to those three Regions of the World. For there is in Princes, and men of conspicuous power (anciently call'd Heroes) a lustre and influence upon the rest of men, resembling that of the Heavens, and an insincereness, inconstancie, and troublesom humour of those that dwell in populous Cities, like the mobilitie, blustering, and impuritie of the Air; and a plainness, and (though dul) yet a nutritive facultie in rural people, that endures a comparison with the Earth they labour.

From hence have proceeded three sorts of Poesie, Heroique, Scommatique, and Pastoral. Every one of these is distinguished again in the manner of Representation, which sometimes is Narrative, wherein the Poet himself relateth; and sometimes Dramatique, as when the persons are every one adorned and brought upon the Theatre, to speak and act their own parts. There is therefore neither more nor less than six sorts of Poesie. For the Heroique Poem Narrative (such as is yours) is call'd Epique Poem; The Heroique Poem Dramatique, is Tragedie. The Scommatique Narrative, is Satyre; Dramatique is Comedie. The Pastoral Narrative, is called simply Pastoral (anciently Bucolique) the same Dramatique, Pastoral Comedie. The Figure therefore of an Epique Poem, and of a Tragedie, ought to be the same, for they differ no more but in that they are pronounced by one, or many persons. Which I insert to iustifie the figure of yours, consisting of five books divided into Songs, or Cantoes, as five Acts divided into Scenes has ever been the approved figure of a Tragedie.

They that take for Poesie whatsoever is writ in Verse, will think this Division imperfect, and call in Sonets, Epigrams; Eclogues, and the like pieces (which are but Essayes, and parts of an entire Poem) and reckon Empedocies and Lucretius (natural Philosophers) for Poets, and the moral precepts of Phocelides Theognis, and the Quatrains of Pybrach, and the Historie of Lucan, and others of that kind amongst Poems; bestowing on such Writers for honour, the name of Poets, rather than of Historians, or Philosophers. But the subject of a Poem, is the manners of men, not natural causes; manners presented, not dictated; and manners feigned (as the name of Poesie imports) not found in men. They that give enterance to Fictions writ in Prose, erre not so much, but they erre: For Prose requiteth delightfulness, not onely of fiction, but of stile; in which if Prose contend with Verse, it is with disadvantage and (as it were) on foot against the strength and wings of Pegasus.

For Verse amongst the Greeks was appropriated anciently to the service of their Gods, and was the Holy stile; the stile of the Oracles; the stile of the Laws; and the stile of Men that publickly recommended to their Gods, the vows and

thanks of the people; which was done in their holy songs called Hymns; and the composers of them were called Prophets and Priests before the name of Poet was known. When afterwards the majestie of that stile was observed, The Poets chose it as best becoming their high invention. And for the Antiquitie of Verse, it is greater than the antiquitie of Letters. For it is certain, Cadmus was the first that (from Phoenicia, a Countrey that neighboureth Judea) brought the use of Letters into Greece. But the service of the Gods, and the Laws (which by measured Sounds were easily committed to the memorie) had been long time in use, before the arrival of Cadmus there.

There is besides the grace of stile, another cause why the ancient Poets chose to write in measured language, which is this. There Poems were made at first with intention to have them sung, as well Epick as Dramatick (which custom hath been long time laid aside, but began to be revived in part, of late years in Italie) and could not be made commensurable to the Voice or Instruments, in Prose; the ways and motions whereof are so uncertain and undistinguished, (like the way and motion of a Ship in the Sea) as not onely to discompose the best Composers, but also to disapoint sometimes the most attentive Reader, and put him to hunt counter for the sense. It was therefore necessarie for Poets in those times, to write in Verse.

The Verse which the Greeks, and Latines (considering the nature of their own languages) found by experience most grave, and for an Epique Poem most decent, was their Hexameter; a Verse limited, not onely in the length of the line, but also in the quantitie of the syllables. In stead of which we use the line of ten Syllables, recompensing the neglect of their quantitie, with the diligence of Rime. And this measure is so proper for an Heroique Poem, as without some loss of gravitie and dignitie, it was never changed. A longer is not far from ill Prose, and a shorter, is a kind of whisking (you know) like the unlacing, rather than the singing of a Muse. In an Epigram or a Sonnet, a man may vary his measures, and seek glorie from a needless difficultie, as he that contrived Verses into the form of an Organ, a Hatchet, an Egg, an Altar, and a pair of Wings; but in so great and noble a work

as is an Epique Poem, for a man to obstruct his own way with unprofitable difficulties, is great imprudence. So likewise to chuse a needless and difficult correspondence of Rime, is but a difficult toy, and forces a man sometimes for the stopping of a chink, to say somewhat he did never think; I cannot therefore but very much approve your Stanza, wherein the syllables in every Verse are ten, and the Rime Alternate.

For the choice of your Subject, you have sufficiently justified your self in your Preface. But because I have observed in Virgil, that the Honour done to Aeneas and his companions, has so bright a reflection upon Augustus Caesar, and other great Romans of that time, as a man may suspect him not constantly possessed with the noble spirit of those his Heroes, and believe you are not acquainted with any great man of the race of Gondibert, I adde to your Justification the puritie of your purpose, in having no other motive of your labour, but to adorn Virtue, and procure her Lovers; than which there cannot be a worthier design, and more becoming noble Poesie.

In that you make so small account of the example of almost all the approved Poets, ancient and modern, who thought fit in the beginning, and sometimes also in the progress of their Poems, to invoke a Muse, or some other Deitie, that should dictate to them, or assist them in their writings; they that take not the laws of Art, from any reason of their own, but from the fashion of precedent times, will perhaps accuse your singularitie, For my part, I neither subscribe to their accusation, nor yet condemn that Heathen custom, otherwise than as accessarie to their false Religion. For their Poets were their Divines; had the name of Prophets, Exercised amongst the People a kind of spiritual Authoritie; would be thought to speak by a Divine spirit; have their works which they writ in Verse (the Divine stile) pass for the Word of God, and not of man; and to be hearkened to with reverence. Do not our Divines (excepting the stile) do the same, and by us that are of the same Religion cannot justly be reprehended for it? Besides, in the use of the spiritual calling of Divines, there is danger sometimes to be feared, from want of skill, such as is reported of unskilfull Conjurers, that mistaking the rites and

ceremonious points of their art, call up such spirits, as they cannot at their pleasure allay again, by whom storms are raised that overthrow buildings, and are the cause of miserable wracks at Sea. Unskilfull Divines do oftentimes the like; For when they call unseasonably for Zeal, there appears a spirit of Cruelty; and by the like error instead of Truth, they raise Discord; instead of Wisdom, Eraud; instead of Reformation, Tumult; and Controversie instead of Religion. Whereas in the Heathen Poets, at least in those whose works have lasted to the time we are in, there are none of those indiscretions to be found, that tended to subversion, or disturbance of the Commonwealths wherein they lived. But why a Christian should think it an ornament to his Poem; either to profane the true God, or invoke a false one, I can imagin no cause, but a reasonless imitation of Custom, of a foolish custom; by which a man enabled to speak wisely from the principles of nature, and his own meditation, loves rather to be thought to speak by inspiration, like a Bag-pipe.

Time and Education begets Experience; Experience begets Memorie; Memorie begets Judgement, and Fancie; Judgement begets the Strength and Structure; and Fancie begets the Ornaments of a Poem. The Ancients therefore fabled not absurdly, in making Memorie the Mother of the Muses. For Memorie is the World (though not really, yet so as in a Looking-glass) in which the Judgement, the severer Sister busieth her self in a grave and rigid examination of all the parts of Nature, and in registering by Letters their order, causes, uses, differences, and resemblances; Whereby the Fancie, when any work of Art is to be performed, finding her materials at hand and prepared for use, and needs no more than a swift motion over them, that what she wants, and is there to be had, may not lie too long unespied. So that when she seemeth to fly from one Indies to the other, and from Heaven to Earth, and to penetrate into the hardest matter, and obscurest places, into the future, and into her self, and all this in a point of time, the voyage is not very great, her self being all she seeks; and her wonderfull celeritie, consisteth not so much in motion, as in copious Imagerie discreetly ordered, and perfectly registered in the Memorie; which most men under the name of

Philosophie have a glimpse of, and is pretended to by many that grossly mistaking her, embrace contention in her place. But so far forth as the Fancie of man, has traced the ways of true Philosophie, so far it hath produced very marvellous effects to the benefit of mankind. All that is beautifull or defensible in building, or marvellous in Engines and Instruments of motion; whatsoever commoditie men receive from the observations of the Heavens, from the description of the Earth, from the account of Time, from walking on the Seas; and whatsoever distinguisheth the Civilitie of Europe, from the Barbaritie of the American savages, is the workmanship of Fancy, but guided by the Precepts of true Philosophie. But where these precepts fail, as they have hitherto failed in the doctrine of moral Virtue, there the Architect (Fancy) must take the Philosophers part upon her self. He therefore that undertakes an Heroick Poem (which is to exhibit a venerable and amiable Image of Heroick virtue) must not onely be the Poet, to place and connect, but also the Philosopher, to furnish and square his matter; that is, to make both Body and Soul, colour and shadow of his Poem out of his own Store: Which, how well you have performed I am now considering.

Observing how few the persons be you introduce in the beginning, and how in the course of the actions of these (the number increasing) after several confluences, they run all at last into the two principal streams of your Poem, Gondibert and Oswald, me thinks the Fable is not much unlike the Theater. For so, from several and far distant Sources, do the lesser Brooks of Lombardy, flowing into one another, fall all at last into the two main Rivers, the Po and the Adite. It hath the same resemblance also with a mans veins, which proceeding from different parts, after the like concourse, insert themselves at last into the two principal veins of the body. But when I considered that also the actions of men, which singly are inconsiderable, after many conjunctures, grow at last either into one great protecting power, or into destroying factions, I could not but approve the structure of your Poem, which ought to be no other than such, as an imitation of humane life requireth.

In the Streams themselves I find nothing but settled Valour, clean Honour, calm Counsel, learned Diversion, and pure Love save onely a torrent or two of Ambition, which (though a fault) has somewhat Heroick in it, and therefore must have place in an Heroick Poem. To shew the Reader in what place he shall find every excellent picture of Virtue you have drawn, is too long. And to shew him one, is to prejudice the rest; yet I cannot forbear to point him to the Description of Love in the person of Birtha, in the seventh Canto of the second Book. There has nothing been said of that Subject neither by the Ancient nor Modern Poets comparable to it. Poets are painters: I would fain see another painter draw so true, perfect and natural a Love to the Life, and make use of nothing but pure Lines, without the help of any the least uncomely shadow, as you have done. But let it be read as a piece by it self, for in the almost equal height of the whole, the eminence of parts is Lost.

There are some that are not pleased with fiction, unless it be bold; not onely to exceed the work, but also the possibility of Nature: they would have impenetrable Armours, Incharnted Castles, Invulnerable Bodies, Iron Men, Flying Horses, and a thousand other such things, which are easily feigned by them that dare. Against such I defend you (without assenting to those that condemn either Homer or Virgil) by dissenting onely from those that think the Beauty of a Poem consisteth in the exorbitancy of the fiction. For as truth is the bound of Historical, so the Resemblance of truth is the utmost limit of Poetical Liberty. In old time amongst the Heathen such strange fictions, and Metamorphoses, were not so remote from the Articles of their Faith, as they are now from ours, and therefore were not so unpleasant. Beyond the actual works of Nature a Poet may now go; but beyond the conceived possibility of Nature, never. I can allow a Geographer to make in the Sea, a Fish or a Ship, which by the scale of his Map would be two or three hundred mile long, and think it done for ornament, because it is done without the precincts of his undertaking; but when he paints an Elephant so, I presently apprehend it as ignorance, and a plain confession of Terra incognita.

As the description of Great Men and Great Actions, is the constant design of a Poet; so the descriptions of worthy circumstances are necessary accessions to a Poem, and being well performed, are the Jewels and most precious ornaments of Poesie. Such in Virgil are the Funeral games of Anchises, The duel of Aeneas and Turnus, &c. and such in yours are The Hunting, The Battel, The Citie Mourning, The Funeral, The House of Astragon, The Library and the Temple, equal to his, or those of Homer whom he imitated.

There remains now no more to be considered but the Expression, in which consisteth the countenance and colour of a beautifull Muse; and is given her by the Poet out of his own provision, or is borrowed from others. That which he hath of his own, is nothing but experience and knowledge of Nature, and specially humane nature; and is the true and natural Colour. But that which is taken out of Books (the ordinary boxes of Counterfeit Complexion) shews well or ill, as it hath more or less resemblance with the natural, and are not to be used (without examination) unadvisedly. For in him that professes the imitation of Nature (as all Poets do) what greater fault can there be, than to bewray an ignorance of Nature in his Poem; especially having a liberty allowed him, if he meet with any thing he cannot master, to leave it out?

That which giveth a Poem the true and natural Colour consisteth in two things, which are; To know well, that is, to have images of Nature in the memory distinct and clear; and To know much. A sign of the first is perspicuity, property, and decency, which delight all sorts of men, either by instructing the ignorant, or soothing the learned in their knowledge. A sign of the latter is novelty of expression, and pleaseth by excitation of the mind; for novelty causeth admiration, and admiration curiosity, which is a delightfull appetite of knowledge.

There be so many words in use at this day in the English Tongue, that, though of magnifick sound, yet (like the windy blisters of a troubled water) have no sense at all; and so many others that lose their meaning, by being ill coupled, that it is a hard matter to avoid them; for having been obtruded upon youth in the Schools (by such as make it, I think, their business there (as 'tis exprest by the best Poet)

With terms to charm the weak and pose the wise, they grow up with them, and gaining reputation with the ignorant, are not easily shaken off.

To this palpable darkness, I may also adde the ambitious obscurity of expressing more than is perfectly conceived; or perfect conception in fewer words than it requires. Which Expressions, though they have had the honour to be called strong lines, are indeed no better than Riddles, and not onely to the Reader, but also (after a little time) to the Writer himself dark and troublesom.

To the property of Expression I referre, that clearness of memory, by which a Poet when he hath once introduced any person whatsoever, speaking in his Poem, maintaineth in him to the end the same character he gave him in the beginning. The variation whereof, is a change of pace, that argues the Poet tired.

Of the Indecencies of an Heroick Poem, the most remarkable are those that shew disproportion either between the persons and their actions, or between the manners of the Poet and the Poem. Of the first kind, is the uncomliness of representing in great persons the inhumane vice of Cruelty, or the sordid vice of Lust and Drunkenness. To such parts as those the ancient approved Poets, thought it fit to suborn, nor the persons of men, but of monsters and beastly Giants, such as Polyphemus, Cacus, and the Centaurs. For it is supposed a Muse, when she is invoked to sing a song of that nature, should maidenly advise the Poet, to set such persons to sing their own vices upon the Stage; for it is not so unseemly in a Tragedy. Of the same kind it is to represent scurrility, or any action or language that moveth much laughter. The delight of an Epique Poem consisteth not in mirth, but admiration. Mirth and Laughter is proper to Comedie and Satyre. Great persons that have their minds employed on great designs, have not leasure enough to laugh, and are pleased with the contemplation of their own power and virtues, so as they need not the infirmities and vices of other men, to recommend themselves to their own favour by comparison, as all men do when they laugh. Of the second kind, where the disproportion is between the Poet, and the persons of his Poem, one is in the Dialect of the Inferiour sort of people, which is always different from the language of the Court. Another is to derive the Illustration of

any thing, from such Metaphors or Comparisons as cannot come into mens thoughts, but by mean conversation, and experience of humble or evil Arts, which the person of an Epique Poem, cannot be thought acquainted with.

From Knowing much, proceedeth the admirable variety and novelty of Metaphors and Similitudes, which are not possible to be lighted on, in the compass of a narrow knowledge. And the want whereof compelleth a Writer to expressions that are either defac'd by time, or sullied with vulgar or long use. For the phrases of Poesie, as the airs of musick with often hearing become insipide, the Reader having no more sense of their force, than our Flesh is sensible of the bones that sustain it. As the sense we have of bodies, consisteth in change and variety of impression, so also does the sense of language in the variety and changeable use of words. I mean not in the affectation of words newly brought home from travel, but in new (and withal significant) translation to our purposes, of those that be already received; and in far fetcht (but withal apt, instructive and comly) similitudes.

Having thus (I hope) avoided the first Exception, against the incompetency of my Judgement, I am but little moved with the second, which is of being bribed by the honour you have done me, by attributing in your Preface somewhat to my Judgement. For I have used your Judgement no less in many things of mine, which coming to light will thereby appear the better. And so you have your bribe again.

Having thus made way for the admission of my Testimony, I give it briefly thus; I never yet saw Poem, that had so much shape of Art, health of Morality, and vigour and beauty of Expression, as this of yours. And but for the clamour of the multitude, that hide their Envy of the present, under a Reverence of Antiquity, I should say further, that it would last as long as either the Aeneid, or Iliad, but for one Disadvantage, and the Disadvantage is this: The languages of the Greeks and Romans (by their Colonies and Conquests) have put off flesh and bloud, and are become immutable, which none of the modern tongues are like to be. I honour

Antiquity, but that which is commonly called Old time, is Young time. The glory of Antiquity is due, not to the Dead, but to the Aged.

And now, whilst I think on't, give me leave with a short discord to sweeten the Harmony of the approaching close. I have nothing to object against your Poem; but dissent onely from something in your Preface, sounding to the prejudice of Age. 'Tis commonly said, that old Age is a return to childhood. Which me thinks you insist on so long, as if you desired it should be believed. That is the note I mean to shake a little. That saying, meant onely of the weakness of body, was wrested to the weakness of mind, by froward children, weary of the controulment of their parents, masters, and other admonitours. Secondly, the dotage and childishness they ascribe to Age, is never the effect of Time, but sometimes of the excesses of youth, and not a returning to, but a continual stay with childhood. For they that wanting the curiosity of furnishing their memories with the rarities of Nature in their youth, and pass their time in making provision onely for their ease, and sensual delight, are children still, at what years soever; as they that coming into a populous Citie, never going out of their Inn, are strangers still, how long soever they have been there. Thirdly, there is no reason for any man to think himself wiser to day than yesterday, which does not equally convince he shall be wiser tomorrow than today.

Fourthly, you will be forced to change your opinion hereafter when you are old; and in the mean time you discredit all I have said before in your commendation, because I am old already. But no more of this.

I believe (Sir) you have seen a curious kind of perspective, where, he that looks through a short hollow pipe, upon a picture containing divers figures, sees none of those that are there painted, but some one person made up of their parts, conveyed to the eye by the artificial cutting of a glass. I find in my imagination an effect not unlike it from your Poem. The virtues you distribute there amongst so many noble persons, represent (in the reading) the image but of one mans virtue to my fancy, which is your own; and that so deeply imprinted, as to stay for ever

there, and govern all the rest of my thoughts and affections, in the way of honouring and serving you, to the utmost of my power, that am

Paris, January 10. 1650.

(SIR)

Your most humble and obedient Servant, THO. HOBS.

De Cive

1651 EDITION

The major treatise *De Cive* (On the citizen) was published in Paris originally in Latin in 1642, followed by two further Latin editions in 1647. The English translation of the work made its first appearance four years later under the title ‘Philosophicall rudiments concerning government and society’. The work anticipates important themes from *Leviathan*. A notable highlight is the now famous phrase ‘bellum omnium contra omnes’ (war of all against all), which first appeared in *De Cive*.

The treatise forms the first part of a trilogy of works that deal with human knowledge, the other two works being *De Corpore* (On the Body), published in 1655 and *De Homine* (On man), published in 1658. Due to the political turmoil at the time of publication, especially the unrest leading up to the Civil War of 1642, Hobbes hastily completed the work, which would systematically come last. It comprises three parts: *Libertas* (liberty); *Imperium* (dominion); and *Religio* (religion). In the first part, Hobbes describes man’s natural condition, dealing with the natural laws; in the second, the necessity of establishing a stable government is explained. Finally, he deals with issues regarding religion.

Frontispiece of 'De Cive', engraved by Jean Matheus in 1642

CONTENTS

TO THE RIGHT HONOURABLE, WILLIAM, EARLE OF DEVONSHIRE

The Author's Preface to the Reader

Chapter I: Of the state of men without Civill Society

Chapter II: Of the Law of Nature concerning Contracts

Chapter III: Of the other Lawes of Nature I.

Chapter IV: That the Law of Nature is a Divine Law

Chapter V: Of the causes, and first begining of civill Government

Chapter VI: Of the right of him, whether Counsell, or one Man onely, who hath the supreme power in the City

Chapter VII: Of the three kindes of Government, Democracy, Aristocracy, Monarchie

Chapter VIII: Of the Rights of Lords over their Servant

Chapter IX: Of the right of Parents over their children and of hereditary Government

Chapter X: A comparison between 3. kinds of government, according to their severall inconveniences

Chapter XI: Places and Examples of Scripture of the Rights of Government agreeable to what hath been said before

Chapter XII: Of the internal causes, tending to the dissolution of any Government

Chapter XIII: Concerning the duties of them who bear Rule

Chapter XIV: Of Lawes and Trespasses

Chapter XV: Of the Kingdome of God, by Nature

Chapter XVI: Of the Kingdome of God under the Old Covenant

Chapter XVII: Of the Kingdome of God by the new Covenant

Chapter XVIII: Concerning those things which are necessary for our entrance into the Kingdome of Heaven

John Aubrey (1626-1697) was an English antiquary, natural philosopher and writer. Hobbes was among Aubrey's early pupils.

PHILOSOPHICALL RUDIMENTS CONCERNING GOVERNMENT AND
SOCIETY.

Or,

A Dissertation Concerning Man in his severall habitudes and respects, as the
Member of a Society, first Secular, and then Sacred. Containing The Elements of
Civill Politie in the Agreement which it hath both with Naturall and Divine
Lawes.

In which is demonstrated, Both what the Origine of Justice is, and wherein the
Essence of Christian Religion doth consist.

Together with

The Nature, Limits and Qualifications both of Regiment and Subjection.

By Thomas Hobbes.

London, Printed by J.C. for R. Royston, at the Angel in Ivie-Lane.

1651.

TO THE RIGHT HONOURABLE, WILLIAM, EARLE OF DEVONSHIRE

MY MOST HONOURED Lord

May it please your Lordship,

It was the speech of the Roman people (to whom the name of King had been render'd odious, as well by the tyrannie of the Tarquins, as by the Genius and Decretals of that City) 'Twas the speech I say of the publick, however pronounced from a private mouth, (if yet Cato the Censor were no more then such) That all Kings are to be reckon'd amongst ravenous Beasts. But what a Beast of prey was the Roman people, whilst with its conquering Eagles it erected its proud Trophies so far and wide over the world, bringing the Africans, the Asiaticks, the Macedonians, and the Achaeans, with many other despoyled Nations, into a specious bondage, with the pretence of preferring them to be Denizons of Rome? So that if Cato's saying were a wise one, 'twas every whit as wise that of pontius Telesinus; who flying about with open mouth through all the Companies of his Army, (in that famous encounter which he had with Sylla) cried out, That Rome her selfe, as well as Sylla, was to be raz'd; for that there would alwayes be Wolves and Depraedatours of their Liberty, unlesse the Forrest that lodg'd them were grubb'd up by the roots. To speak impartially, both sayings are very true; That Man to Man is a kind of God; and that Man to Man is an arrant Wolfe. The first is true, if we compare Citizens amongst themselves; and the second, if we compare Cities. In the one, there's some analogie of similitude with the Deity, to wit, Justice and Charity, the twin-sisters of peace: But in the other, Good men must defend themselves by taking to them for a Sanctuary the two daughters of War, Deceipt and Violence: that is in plaine termes a meer brutall Rapacity: which although men object to one another as a reproach, by an inbred custome which

they have of beholding their own actions in the persons of other men, wherein, as in a Mirroir, all things on the left side appeare to be on the right, & all things on the right side to be as plainly on the left; yet the naturall right of preservation which we all receive from the uncontroulable Dictates of Necessity, will not admit it to be a Vice, though it confesse it to be an Unhappinesse. Now that with Cato himselfe, (a person of so great a renowne for wisdome) Animosity should so prevaile instead of Judgement, and partiality instead of Reason, that the very same thing which he thought equall in his popular State, he should censure as unjust in a Monarchical, other men perhaps may have leisure to admire. But I have been long since of this opinion, That there was never yet any more-then-vulgar-prudence that had the luck of being acceptable to the Giddy people; but either it hath not been understood, or else having been so, hath been levell'd and cryed downe. The more eminent Actions and Apothegms both of the Greeks and Romans have been indebted for their Eulogies not so much to the Reason, as to the Greatnesse of them, and very many times to that prosperous usurpation (with which our Histories doe so mutually upbraid each other) which as a conquering Torrent carryes all before it, as well publick Agents as publick Actions, in the streame of Time. Wisdome properly so call'd is nothing else but this, The perfect knowledge of the Truth in all matters whatsoever. Which being derived from the Registers and Records of Things, and that as 'twere through the Conduit of certain definite Appellations, cannot possibly be the work of a suddaine Acutenesse, but of a well-ballanc'd Reason, which by the Compendium of a word, we call philosophy. For by this it is, that a way is open'd to us, in which we travell from the contemplation of particular things to the Inference or result of universall Actions. Now look how many sorts of things there are which properly fall within the cognizance of humane reason, into so many branches does the tree of philosophy divide it selfe. And from the diversity of the matter about which they are conversant, there hath been given to those branches a diversity of Names too: For treating of Figures, tis call'd Geometry. of motion, physick; of naturall right, Moralls; put all together, and they make up philosophy. Just as the British,

the Atlantick, and the Indian Seas, being diversly christen'd from the diversity of their shoares, doe notwithstanding all together make up The Ocean. And truly the Geometricians have very admirably perform'd their part. For whatsoever assistance doth accrew to the life of man, whether from the observation of the Heavens, or from the description of the Earth, from the notation of Times, or from the remotest Experiments of Navigation; Finally, whatsoever things they are in which this present Age doth differ from the rude simplenesse of Antiquity, we must acknowledge to be a debt which we owe meerly to Geometry. If the Morall philosophers had as happily discharg'd their duty, I know not what could have been added by humane Industry to the completion of that happinesse, which is consistent with humane life. For were the nature of humane Actions as distinctly knowne, as the nature of Quantity in Geometricall Figures, the strength of Avarice and Ambition, which is sustained by the erroneous opinions of the Vulgar, as touching the nature of Right and Wrong, would presently faint and languish; And Mankinde should enjoy such an Immortall peace, that (unlesse it were for habitation, on supposition that the Earth should grow too narrow for her Inhabitants) there would hardly be left any pretence for war. But now on the contrary, that neither the Sword nor the pen should be allowed any Cessation; That the knowledge of the Law of Nature should lose its growth, not advancing a whit beyond its antient stature; that there should still be such siding with the severall factions of philosophers, that the very same Action should bee decryed by some, and as much elevated by others; that the very same man should at severall times embrace his severall opinions, and esteem his own Actions farre otherwise in himselfe then he does in others; These I say are so many signes, so many manifest Arguments, that what hath hitherto been written by Morall philosophers, hath not made any progress in the knowledge of the Truth; but yet have took with the world, not so much by giving any light to the understanding, as entertainment to the Affections, whilst by the successefull Rhetorickations of their speech they have confirmed them in their rashly received opinions. So that this part of philosophy hath suffered the same destiny with the publick Wayes,

which lye open to all passengers to traverse up and down or the same lot with high wayes and open streets; Some for divertisement, and some for businesse; so that what with the Impertinencies of some, and the Altercations of others, those wayes have never a seeds time, and therefore yield never a harvest. The onely reason of which unluckines should seem to be this; That amongst all the writers of that part of philosophy, there is not one that hath used an idoneous principle of Tractation: For we may not, as in a Circle, begin the handling of a Science from what point we please. There is a certain Clue of Reason, whose beginning is in the dark, but by the benefit of whose Conduct, wee are led as 'twere by the hand into the clearest light, so that the principle of Tractation is to be taken from that Darknesse, and then the light to be carried thither for the irradiating its doubts. As often therefore as any writer, doth either weakly forsake that Clue, or wilfully cut it asunder, he describes the Footsteps, not of his progresse in Science, but of his wandrings from it. And upon this it was, that when I applyed my Thoughts to the Investigation of Naturall Justice, I was presently advertised from the very word Justice, (wich signifies a steady Will of giving every one his Owne) that my first enquiry was to be, from whence it proceeded, that any man should call any thing rather his Owne, then another mans. And when I found that this proceeded not from Nature, but Consent, (for what Nature at first laid forth in common, men did afterwards distribute into severall Impropriations, I was conducted from thence to another Inquiry, namely to what end, and upon what Impulsives, when all was equally every mans in common, men did rather think it fitting, that every man should have his Inclosure; And I found the reason was, that from a Community of Goods, there must needs arise Contention whose enjoyment should be greatest, and from that Contention all kind of Calamities must unavoydably ensue, which by the instinct of Nature, every man is taught to shun. Having therefore thus arrived at two maximes of humane Nature, the one arising from the concupiscible part, which desires to appropriate to it selfe the use of those things in which all others have a joynt interest, the other proceeding from the rationall, which teaches every man to fly a contre-naturall Dissolution, as the greatest mischief that can

arrive to Nature; Which principles being laid down, I seem from them to have demonstrated by a most evident connexion, in this little work of mine, first the absolute necessity of Leagues and Contracts, and thence the rudiments both of morall and of civill prudence. That Appendage which is added concerning the Regiment of God, hath been done with this intent, that the Dictates of God Almighty in the Law of nature, might not seem repugnant to the written Law, revealed to us in his word. I have also been very wary in the whole tenour of my discourse, not to meddle with the civill Lawes of any particular nation whatsoever, That is to say, I have avoyded coming a shore, which those Times have so infested both with shelves, and Tempests. At what expence of time and industry I have beene in this scrutiny after Truth, I am not ignorant; but to what purpose, I know not. For being partiall Judges of our selves, we lay a partiall estimate upon our own productions. I therefore offer up this Book to your Lordships, not favour, but censure first, as having found by many experiments, that it is not the credit of the Author, nor the newnesse of the work, nor yet the ornament of the style, but only the weight of Reason, which recommends any Opinion to your Lordships Favour and Approbation. If it fortune to please, that is to say, if it be sound, if it be usefull, if it be not vulgar; I humbly offer it to your Lordship as both my Glory, and my protection; But if in any thing I have erred, your Lordship will yet accept it as a Testimony of my Gratitude, for that the means of study which I enjoyed by your Lordships Goodnesse, I have employed to the procurement of your Lordships Favour. The God of Heaven crown your Lordship with length of Dayes in this earthly Station, and in the heavenly Jerusalem, with a crown of Glory.

Your Honours most humble, and most devoted Servant, Tho. Hobbs.

The Author's Preface to the Reader

READER, I PROMISE thee here such things, which ordinarily promised, doe seeme to challenge the greatest attention, and I lay them here before thine eyes, whether thou regard the dignity or profit of the matter treated of, or the right method of handling it, or the honest motive, and good advice to undertake it, or lastly the moderation of the Authour. In this Book thou shalt finde briefly described the duties of men, First as Men, then as Subjects, Lastly, as Christians; under which duties are contained not only the elements of the Lawes of Nature, and of Nations, together with the true originall, and power of Justice, but also the very essence of Christian Religion it selfe, so farre forth as the measure of this my purpose could well bear it.

Which kinde of doctrine (excepting what relates to Christian Religion) the most antient Sages did judge fittest to be delivered to posterity, either curiously adorned with Verse, or clouded with Allegories, as a most beautifull and hallowed mystery of Royall authority; lest by the disputations of private men, it might be defiled; Other philosophers in the mean time, to the advantage of mankinde, did contemplate the faces, and motions of things; others, without disadvantage, their natures, and causes. But in after times, Socrates is said to have been the first, who truly loved this civill Science, although hitherto not thoroughly understood, yet glimmering forth as through a cloud in the government of the Common weale, and that he set so great a value on this, that utterly abandoning, and despising all other parts of philosophy, he wholly embraced this, as judging it onely worthy the labour of his minde. After him comes Plato, Aristotle, Cicero, and other philosophers, as well Greeke, as Latine. And now at length all men of all Nations, not only philosophers, but even the vulgar, have, and doe still deale with this as a matter of ease, exposed and prostitute to every Mother-wit, and to be attained

without any great care or study. And which makes mainly for its dignity, those who suppose themselves to have it, or are in such employment, as they ought to have it, doe so wonderfully please themselves in its Idaea, as they easily brooke the followers of other arts to be esteemed and styled ingenuous, learned, skilfull, what you will; except prudent: for this Name, in regard of civill knowledge, they presume to be due to themselves onely. Whether therefore the worth of arts is to be weighed by the worthinesse of the persons who entertain them, or by the number of those who have written of them, or by the judgement of the wisest. certainly this must carry it, which so neerly relates to princes, and others engaged in the government of mankind, in whose adulterate Species also the most part of men doe delight themselves, and in which the most excellent wits of philosophers have been conversant. The benefit of it when rightly delivered (that is) when derived from true principles by evident connexion, we shall then best discern, when we shall but well have considered the mischiefes that have befallen mankind in its counterfeit and babling form; for in such matters as are speculated for the exercise of our wits, if any error escape us, it is without hurt; neither is there any losse, but of time onely: but in those things which every man ought to meditate for the steerage of his life, it necessarily happens, that not onely from errors, but even from ignorance it selfe, there arise offences, contentions, nay even slaughter it selfe. Look now, how great a prejudice these are, such, and so great is the benefit arising from this doctrine of morality, truly declared. How many Kings (and those good men too) hath this one error, That a Tyrant King might lawfully be put to death, been the slaughter of? How many throats hath this false position cut, That a prince for some causes may by some certain men be deposed? And what blood-shed hath not this erroneous doctrine caused, That Kings are not superiours to, but administrators for the multitude? Lastly, how many rebellions hath this opinion been the cause of which teacheth that the knowledge whether the commands of Kings be just or unjust, belongs to private men, and that before they yeeld obedience, they not only may, but ought to dispute them? Besides, in the morall philosophy now commonly received, there

are many things no lesse dangerous then those, which it matters not now to recite. I suppose those antients foresaw this, who rather chose to have the Science of justice wrapt up in fables, then openly exposed to disputations: for before such questions began to be moved, princes did not sue for, but already exercised the supreme power. They kept their Empire entire, not by arguments, but by punishing the wicked, and protecting the good; likewise Subjects did not measure what was just by the sayings and judgements of private men, but by the Lawes of the Realme; nor were they kept in peace by disputations, but by power and authority: yea they revered the supreme power, whether residing in one man or in a councill, as a certain visible divinity; therefore they little used as in our dayes, to joyn themselves with ambitious, and hellish spirits, to the utter ruine of their State; for they could not entertain so strange a phansie as not to desire the preservation of that by which they were preserved; in truth, the simplicity of those times was not yet capable of so learned a piece of folly. Wherefore it was peace, and a golden age, which ended not before that Saturn being expelled, it was taught lawfull to take up arms against Kings. This I say, the Antients not only themselves saw, but in one of their fables, they seem very aptly to have signified it to us; for they say, that when Ixion was invited by Jupiter to a banquet, he fell in love, and began to court Juno her selfe; offering to embrace her, he clasp't a clowd, from whence the Centaures proceeded, by nature halfe men, halfe horses, a fierce, a fighting, and unquiet generation; which changing the names only, is as much as if they should have said, that private men being called to Counsels of State desired to prostitute justice, the onely sister and wife of the supreme, to their own judgements, and apprehensions, but embracing a false and empty shadow instead of it, they have begotten those hermaphrodite opinions of morall philosophers, partly right and comely, partly brutall and wilde, the causes of all contentions, and blood-sheds. Since therefore such opinions are daily seen to arise, if any man now shall dispell those clowds, and by most firm reasons demonstrate that there are no authentically doctrines concerning right and wrong, good and evill, besides the constituted Lawes in each Realme, and government;

and that the question whether any future action will prove just or unjust, good or ill, is to be demanded of none, but those to whom the supreme hath committed the interpretation of his Lawes; surely he will not only shew us the high way to peace, but will also teach us how to avoyd the close, darke, and dangerous by-paths of faction and sedition, then which I know not what can be thought more profitable.

Concerning my Method, I thought it not sufficient to use a plain and evident style in what I had to deliver, except I took my begining from the very matter of civill government, and thence proceeded to its generation, and form, and the first beginning of justice; for every thing is best understood by its constitutive causes; for as in a watch, or some such small engine, the matter, figure, and motion of the wheeles, cannot well be known, except it be taken in sunder, and viewed in parts; so to make a more curious search into the rights of States, and duties of Subjects, it is necessary, (I say not to take them in sunder, but yet that) they be so considered, as if they were dissolved, (i.e.) that wee rightly understand what the quality of humane nature is, in what matters it is, in what not fit to make up a civill government, and how men must be agreed among themselves, that intend to grow up into a well-grounded State. Having therefore followed this kind of Method; In the first place I set down for a principle by experience known to all men, and denied by none, to wit, that the dispositions of men are naturally such, that except they be restrained through feare of some coercive power, every man will distrust and dread each other, and as by naturall right he may, so by necessity he will be forced to make use of the strength hee hath, toward the preservation of himself You will object perhaps, that there are some who deny this; truly so it happens, that very many do deny it. But shall I therefore seem to fight against my self because I affirm that the same men confesse, and deny the same thing? In truth I do not, but they do, whose actions disavow what their discourses approve; of We see all countries though they be at peace with their neighbours, yet guarding their Frontiers with armed men, their Townes with Walls and ports, and keeping constant watches. To what purpose is all this, if there be no feare of the neighbouring power? Wee see even in well-governed States, where there are

lawes and punishments appointed for offenders, yet particular men travell not without their Sword by their sides, for their defences, neither sleep they without shutting not only their doores against their fellow Subjects, but also their Trunks and Coffers for feare of domestiques. Can men give a clearer testimony of the distrust they have each of other, and all, of all? How since they doe thus, and even Countreyes as well as men, they publiquely professe their mutuall feare and diffidence; But in disputing they deny it, thats as much as to say, that out of a desire they have to contradict others, they gainsay themselves. Some object that this principle being admitted, it would needs follow, not onely that all men were wicked (which perhaps though it seeme hard, yet we must yeeld to, since it is so clearly declar'd by holy writ) but also wicked by nature (which cannot be granted without impiety). But this, that men are evill by nature, followes not from this principle; for though the wicked were fewer then the righteous, yet because we cannot distinguish them, there is a necessity of suspecting, heeding, anticipating, subjugating, selfe-defending, ever incident to the most honest, and fairest condition'd; much lesse do's it follow that those who are wicked are so by nature, for though from nature, that is from their first birth, as they are meerly sensible Creatures, they have this disposition, that immediately as much as in them lies, they desire and doe whatsoever is best pleasing to them, that either through feare they fly from, or through hardnesse repell those dangers which approach them, yet are they not for this reason to be accounted wicked; for the affections of the minde which arise onely from the lower parts of the soule are not wicked themselves, but the actions thence proceeding may be so sometimes, as when they are either offensive, or against duty. Unlesse you give Children all they aske for, they are peevish, and cry, I and strike their parents sometimes, and all this they have from nature, yet are they free from guilt, neither may we properly call them wicked; first, because they cannot hurt; next, because wanting the free use of reason they are exempted from all duty; these when they come to riper yeares having acquired power whereby they may doe hurt, if they shall continue to doe the same things, then truly they both begin to be, and are properly accounted

wicked; In so much as a wicked man is almost the same thing with a childe growne strong and sturdy, or a man of a childish disposition; and malice the same with a defect of reason in that age, when nature ought to be better governed through good education and experience. Unlesse therefore we will say that men are naturally evill, because they receive not their education and use of reason from nature, we must needs acknowledge that men may derive desire, feare, anger, and other passions from nature, and yet not impute the evill effects of those unto nature. The foundation therefore which I have laid standing firme, I demonstrate in the first place, that the state of men without civill society (which state we may properly call the state of nature) is nothing else but a meere warre of all against all; and in that warre all men have equall right unto all things; Next, that all men as soone as they arrive to understanding of this hatefull condition, doe desire (even nature it selfe compelling them) to be freed from this misery. But that this cannot be done except by compact, they all quitt that right which they have unto all things. Furthermore I declare, and confirme what the nature of compacts is; how and by what meanes the right of one might be transfer'd unto another to make their compacts valid; also what rights, and to whom they must necessarily be granted for the establishing of peace, I meane what those dictates of reason are, which may properly be term'd the Lawes of nature; and all these are contain'd in that part of this booke which I entitle Liberty.

These grounds thus layd, I shew farther what civill government, and the supreme power in it, and the divers kinds of it are; by what meanes it becomes so, & what rights particular men, who intend to constitute this civill government, must so necessarily transfer from themselves on the supreme power, whether it be one man, or an assembly of men, that except they doe so it will evidently appeare to be no civill government, but the rights which all men have to all things, that is the rights of tarre will still remaine. Next, I distinguish the divers kindes of it, to wit, Monarchie, Aristocratie, Democratie, and paternall Dominion, and that of Masters over their Servants; I declare how they are constituted, and I compare their severall conveniences and inconveniences each with. other. furthermore, I

unfold what those things are which destroy it, and what his or their duty is who rule in chiefe. Last of all, I explicate the natures of the Law, and of sinne, and I distinguish Law from Counsell, from compact, from that which I call Right; all which I comprehend under the title of Dominion.

In the last part of it which is entituled Religion, lest that right which by strong reason I had confirm'd the Sovereigne powers in the preceding discourse have over their Subjects, might seem to be repugnant to the sacred Scriptures, I shew in the first place how it repugns not the Divine right, for as much as God overrules all rulers by nature, (i.e.) by the Dictates of naturall reason. In the second, for as much as God himselfe had a peculiar dominion over the Jewes by vertue of that antient Covenant of Circumcision. In the third, because God doth now rule over us Christians by vertue of our Covenant of Baptisme; and therefore the authority of Rulers in chiefe, or of civill government, is not at all, we see, contrary to Religion.

In the last place I declare what duties are necessarily requir'd from us, to enter into the Kingdome of Heaven; and of those I plainly demonstrate, and conclude out of evident testimonies of holy writ, according to the interpretation made by all, that the obedience which I have affirm'd to be due from particular Christian Subjects unto their Christian princes cannot possibly in the least sort be repugnant unto Christian Religion. You have seene my Method, receive now the reason which mov'd me to write this; I was studying philosophie for my minde sake, and I had gathered together its first Elements in all kinds, and having digested them into three Sections by degrees, I thought to have written them so as in the first I would have treated of a body, and its generall properties; in the second of man and his speciall faculties, and affections; in the third, of civill government and the duties of Subjects: therefore the first Section would have contained the first philosophie, and certaine elements of physick; in it we would have considered the reasons of Time, Place, Cause, Power, Relation, Proportion, Quantity, Figure, and motion. In the second we would have beene conversant about imagination, Memory, intellect, ratiocination, appetite, till, good and Evill, honest and

dishonest, and the like. what this last Section handles, I have now already shewed you. Whilst I contrive, order, pensively and slowly compose these matters, for I onely doe reason, I dispute not, it so happen'd in the interim, that my Country some few yeares before the civill warres did rage, was boyling hot with questions concerning the rights of Dominion, and the obedience due from Subjects, the true forerunners of an approaching war. And was the cause which (all those other matters deferr'd) ripen'd, and pluckt from me this third part. Therefore it happens that what was last in order, is yet come forth first in time, and the rather, because I saw that grounded on its owne principles sufficiently knowne by experience it would not stand in need of the former Sections. I have not yet made it out of a desire of praise (although if I had, I might have defended my selfe with this faire excuse, that very few doe things laudably, who are not affected with commendation) but for your sakes Readers, who I perswaded my selfe, when you should rightly apprehend and thoroughly understand this Doctrine I here present you with, would rather chuse to brooke with patience some inconveniences under government (because humane affairs cannot possibly be without some) then selfe opiniatedly disturb the quiet of the publique; That, weighing the justice of those things you are about, not by the perswasion and advise of private men, but by the Lawes of the Realme, you will no longer suffer ambitious men through the streames of your blood to wade to their owne power; That you will esteeme it better to enjoy your selves in the present state though perhaps not the best, then by waging warre, indeavour to procure a reformation for other men in another age, your selves in the meane while either kill'd, or consumed with age; Farthermore, for those who will not acknowledge themselves subject to the civill Magistrate, and will be exempt from all publique burthens, and yet will live under his Jurisdiction, and look for protection from the violence and injuries of others, that you would not looke on them as fellow Subjects, but esteeme them for enemies, and spies, and that yee rashly admit not for Gods Word all which either openly or privately they shall pretend to bee so. I say more plainly, if any preacher, Confessor, or Casuist, shal but say that this doctrin is agreeable with Gods word,

namely, That the chief ruler, nay any private man may lawfully be put to death without the chiefes command, or that Subjects may resist, conspire, or covenant against the supreme power, that ye by no means beleeeve them, but instantly declare their names. He who approves of these reasons, will also like my intention in writing this book.

Last of al, I have propounded to my self this rule through this whole discourse; First, not to define ought which concerns the justice of single actions, but leave them to be determined by the laws. Next not to dispute the laws of any government in special, that is, not to point which are the laws of any country, but to declare what the laws of all countries are. Thirdly not to seem of opinion, that there is a lesse proportion of for obedience due to an Aristocracy or Democracy, then a Monarchy; though I have endeavoured by arguments in my tenth Chapter to gain a belief in men, that Monarchy is the most commodious government (which one thing alone I confesse in this whole book not to be demonstrated, but only probably stated) yet every where I expresly say, that in all kind of Government whatsoever, there ought to be a supreme and equall power. Fourthly, not in any wise to dispute the positions of Divines, except those which strip Subjects of their obedience, and shake the foundations of civill government. Lastly, lest I might imprudently set forth somewhat of which there would be no need, what I had thus written, I would not presently expose to publique interest, wherefore I got some few copies privately disperst among some of my friends, that discrying the opinions of others, if any things appeared erroneous, hard, or obscure, I might correct, soften, and explain them.

These things I found most bitterly excepted against: that I had made the civill powers too large, but this by Ecclesiasticall persons; that I had utterly taken away liberty of conscience, but this by Sectaries; that I had set princes above the civil Laws, but this by Lawyers; wherefore I was not much moved by these mens reprehensions, (as who in doing this did but do their own business) except it were tye those knots so much faster.

But for their sakes who have a litle been staggered at the principles themselves, to wit the nature of men, the authority or right of nature, the nature of compacts and contracts, and the originall of civill government, because in finding fault they have not so much followed their passions, as their common sense, I have therefore in some places added some annotations whereby I presumed I might give some satisfaction to their differing thoughts; Lastly I have endeavoured to offend none beside those whose principles these contradict, and whose tender mindes are lightly offended by every difference of opinions.

Wherefore if ye shall meet with some things which have more of sharpnesse, and lesse of certainty then they ought to have, since they are not so much spoken for the maintenance of parties, as the establishment of peace, and by one whose just grief for the present calamities of his country, may very charitably be allowed some liberty, it is his only request to ye Readers, ye will deign to receive them with an equall mind.

Chapter I: Of the state of men without Civill Society

I. THE FACULTIES of Humane nature may be reduc'd unto four kinds; Bodily strength, Experience, Reason, Passion. Taking the beginning of this following Doctrine from these, we will declare in the first place what manner of inclinations men who are endued with these faculties bare towards each other, and whether, and by what faculty, they are born apt for Society, and so preserve themselves against mutuall violence; then proceeding, we will shew what advice was necessary to be taken for this businesse, and what are the conditions of Society, or of Humane Peace; that is to say, (changing the words onely) what are the fundamentall Lawes of Nature.

II. The greatest part of those men who have written ought concerning Commonwealths, either suppose, or require us, or beg of us to believe, That Man is a Creature born fit* for Society: The Greeks call him Zoon politikon, and on this foundation they so build up the Doctrine of Civill Society, as if for the preservation of Peace, and the Government of Man-kind there were nothing else necessary, then that Men should agree to make certaine Covenants and Conditions together, which themselves should then call Lawes. Which Axiom, though received by most, is yet certainly False, and an Errour proceeding from our too slight contemplation of Humane Nature; for they who shall more narrowly look into the Causes for which Men come together, and delight in each others company, shall easily find that this happens not because naturally it could happen no otherwise, but by Accident: For if by nature one Man should Love another (that is) as Man, there could no reason be return'd why every Man should not equally Love every Man, as being equally Man, or why he should rather frequent those whose Society affords him Honour or Profit. We doe not therefore by nature seek Society for its own sake, but that we may receive some Honour or Profit

from it; these we desire Primarily, that Secondarily: How by what advice Men doe meet, will be best known by observing those things which they doe when they are met: For if they meet for Traffique, it's plaine every man regards not his Fellow, but his Businesse; if to discharge some Office, a certain Market-friendship is begotten, which hath more of Jealousie in it then True love, and whence Factions sometimes may arise, but Good will never; if for Pleasure, and Recreation of mind, every man is wont to please himself most with those things which stirre up laughter, whence he may (according to the nature of that which is Ridiculous) by comparison of another mans Defects and Infirmities, passe the more currant in his owne opinion; and although this be sometimes innocent, and without offence; yet it is manifest they are not so much delighted with the Society, as their own Vain glory. But for the most part, in these kind of meetings, we wound the absent; their whole life, sayings, actions are examin'd, judg'd, condemn'd; nay, it is very rare, but some present receive a fling before they part, so as his reason was not ill, who was wont alwayes at parting to goe out last. And these are indeed the true delights of Society, unto which we are carryed by nature, (i.e.) by those passions which are incident to all Creatures, untill either by sad experience, or good precepts, it so fall out (which in many never happens) that the Appetite, of present matters, be dul'd with the memory of things past, without which, the discourse of most quick and nimble men, on this subject, is but cold and hungry.

But if it so happen, that being met, they passe their time in relating some Stories, and one of them begins to tell one which concernes himselfe; instantly every one of the rest most greedily desires to speak of himself too. if one relate some wonder, the rest will tell you miracles, if they have them, if not, they'l feine them: Lastly, that I may say somewhat of them who pretend to be wiser then others; if they meet to talk of Philosophy, look how many men, so many would be esteem'd Masters, or else they not only love not their fellowes, but even persecute them with hatred: So clear is it by experience to all men who a little more narrowly consider Humane affaires, that all free congress ariseth either from mutual poverty, or from vain glory, whence the parties met, endeavour to carry

with them either some benefit, or to leave behind them that same some esteem and honour with those, with whom they have been conversant: The same is also collected by reason out of the definitions themselves, of Will, Good, Honour, Profitable. For when we voluntarily contract Society, in all manner of Society we look after the object of the Will, i.e. that, which every one of those, who gather together, propounds to himselfe for good; now whatsoever seemes good, is pleasant, and relates either to the senses, or the mind, but all the mindes pleasure is either Glory, (or to have a good opinion of ones selfe) or referres to Glory in the end; the rest are Sensuall, or conducing to sensuality, which may be all comprehended under the word Conveniencies. All Society therefore is either for Gain, or for Glory; (i.e.) not so much for love of our Fellowes, as for love of our Selves: but no society can be great, or lasting, which begins from Vain Glory; because that Glory is like Honour, if all, men have it, no man hath it, for they consist in comparison and precellence; neither doth the society of others advance any whit the cause of my glorying in my selfe; for every man must account himself, such as he can make himselfe, without the help of others. But though the benefits of this life may be much farthered by mutuall help, since yet those may be better attain'd to by Dominion, then by the society of others: I hope no body will doubt but that men would much more greedily be carryed by Nature, if all fear were removed, to obtain Dominion, then to gaine Society. We must therefore resolve, that the Originall of all great, and lasting Societies, consisted not in the mutuall good will men had towards each other, but in the mutuall fear* * they had of each other.

[Born fit] Since we now see actually a constituted Society among men, and none living out of it, since we discern all desirous of congresse, and mutuall correspondence, it may seeme a wonderfull kind of stupidity, to lay in the very threshold of this Doctrine, such a stumbling block before t he Readers, as to deny Man to be born fit for Society: Therefore I must more plainly say, That it is true indeed, that to Man, by nature, or as Man, that is, as soone as he is born, Solitude

is an enemy; for Infants have need of others to help them to live, and those of riper years to help them to live well, wherefore I deny not that men (even nature compelling) desire to come together. But civill Societies are not meer Meetings, but Bonds, to the making whereof, Faith and Compacts are necessary: The Vertue whereof to Children, and Fooles, and the profit whereof to those who have not yet tasted the miseries which accompany its defects, is altogether unknown; whence it happens, that those, because they know not what Society is, cannot enter into it; these, because ignorant of the benefit it brings, care not for it. Manifest therefore it is, that all men, because they are born in Infancy, are born unapt for Society. Many also (perhaps most men) either through defect of minde, or want of education remain unfit during the whole course of their lives; yet have Infants, as well as those of riper years, an humane nature; wherefore Man is made fit for Society not by Nature, but by Education: furthermore, although Man were born in such a condition as to desire it, it followes not, that he therefore were Born fit to enter into it; for it is one thing to desire, another to be in capacity fit for what we desire; for even they, who through their pride, will not stoop to equall conditions, without which there can be no Society, do yet desire it.

[The mutuall fear] It is objected: It is so improbable that men should grow into civill Societies out of fear, that if they had been afraid, they would not have endur'd each others looks: They Presume, I believe, that to fear is nothing else then to be affrighted: I comprehend in this word Fear, a certain foresight of future evill; neither doe I conceive flight the sole property of fear, but to distrust, suspect, take heed, provide so that they may not fear, is also incident to the fearfull. They who go to Sleep, shut their Dores; they who Travell carry their Swords with them, because they fear Theives. Kingdomes guard their Coasts and Frontiers with Forts, and Castles; Cities are compast with Walls, and all for fear of neighbouring Kingdomes and Townes; even the strongest Armies, and most accomlisht for Fight, yet sometimes Parly for Peace, as fearing each others Power, and lest they might be overcome. It is through fear that men secure

themselves, by flight indeed, and in corners, if they think they cannot escape otherwise, but for the most part by Armes, and Defensive Weapons; whence it happens, that daring to come forth, they know each others Spirits; but then, if they fight, Civill Society ariseth from the Victory, if they agree, from their Agreement.

III. The cause of mutuall fear consists partly in the naturall equality of men, partly in their mutuall will of hurting: whence it comes to passe that we can neither expect from others, nor promise to our selves the least security: For if we look on men fullgrown, and consider how brittle the frame of our humane body is, (which perishing, all its strength, vigour, and wisdom it selfe perisheth with it) and how easie a matter it is, even for the weakest man to kill the strongest, there is no reason why any man trusting to his own strength should conceive himself made by nature above others: they are equalls who can doe equall things one against the other; but they who can do the greatest things, (namely kill) can doe equall things. All men therefore among themselves are by nature equal; the inequality we now discern, hath its spring from the Civill Law.

IV. All men in the State of nature have a desire, and will to hurt, but not proceeding from the same cause, neither equally to be condemn'd; for one man according to that naturall equality which is among us, permits as much to others, as he assumes to himself (which is an argument of a temperate man, and one that rightly values his power); another, supposing himselfe above others, will have a License to doe what he lists, and challenges Respect, and Honour, as due to him before others, (which is an Argument of a fiery spirit:) This mans will to hurt ariseth from Vain glory, and the false esteeme he hath of his owne strength; the other's, from the necessity of defending himselfe, his liberty, and his goods against this mans violence.

V. Furthermore, since the combate of Wits is the fiercest, the greatest discords which are, must necessarily arise from this Contention; for in this case it is not only odious to contend against, but also not to consent; for not to approve of what a man saith is no lesse then tacitely to accuse him of an Errour in that thing which

he speaketh; as in very many things to dissent, is as much as if you accounted him a fool whom you dissent from; which may appear hence, that there are no Warres so sharply wag'd as between Sects of the same Religion, and Factions of the same Commonweale, where the Contestation is Either concerning Doctrines, or Politique Prudence. And since all the pleasure, and jollity of the mind consists in this; even to get some, with whom comparing, it may find somewhat wherein to Tryumph, and Vaunt it self; its impossible but men must declare sometimes some mutuall scorn and contempt either by Laughter, or by Words, or by Gesture, or some signe or other. then which there is no greater vexation of mind; and then from which there cannot possibly arise a greater desire to doe hurt.

VI. But the most frequent reason why men desire to hurt each other, ariseth hence, that many men at the same time have an Appetite to the same thing; which yet very often they can neither enjoy in common, nor yet divide it; whence it followes that the strongest must have it, and who is strongest must be decided by the Sword.

VII. Among so many dangers therefore, as the naturall lusts of men do daily threaten each other withall, to have a care of ones selfe is not a matter so scornfully to be lookt upon, as if so be there had not been a power and will left in one to have done otherwise; for every man is desirous of what is good for him, and shuns what is evill, but chiefly the chieftest of naturall evils, which is Death; and this he doth, by a certain impulsion of nature, no lesse then that whereby a Stone moves downward: It is therefore neither absurd, nor reprehensible; neither against the dictates of true reason for a man to use all his endeavours to preserve and defend his Body, and the Members thereof from death and sorrowes; but that which is not contrary to right reason, that all men account to be done justly, and with right; Neither by the word Right is any thing else signified, then that liberty which every man hath to make use of his naturall faculties according to right reason: Therefore the first foundation of naturall Right is this, That every man as much as in him lies endeavour to protect his life and members.

VIII. But because it is in vaine for a man to have a Right to the end, if the Right to the necessary meanes be deny'd him; it followes, that since every man hath a Right to preserve himself, he must also be allowed a Right to use all the means, and do all the actions, without which he cannot preserve himself.

IX. Now whether the means which he is about to use, and the action he is performing, be necessary to the preservation of his Life, and Members, or not, he Himself, by the right of nature, must be judg; for say another man, judg that it is contrary to right reason that I should judg of mine own perill: why now, because he judgeth of what concerns me, by the same reason, because we are equall by nature, will I judge also of things which doe belong to him; therefore it agrees with right reason (that is) it is the right of nature that I judge of his opinion, (i.e.) whether it conduce to my preservation, or not.

X. Nature hath given to every one a right to all. That is it was lawfull for every man in the bare state of nature*, or before such time as men had engag'd themselves by any Covenants, or Bonds, to doe what hee would, and against whom he thought fit, and to possesse, use, and enjoy all what he would, or could get. Now because whatsoever a man would, it therefore seems good to him because he wills it, and either it really doth, or at least seems to him to contribute toward his preservation, (but we have already allowed him to be judge in the foregoing Article whether it doth or not, in so much as we are to hold all for necessary whatsoever he shall esteeme so) and by the 7. Article it appeares that by the right of Nature those things may be done, and must be had, which necessarily conduce to the protection of life, and members, it followes, that in the state of nature, To have all, and do all is lawfull for all. And this is that which is meant by that common saying, Nature hath given all to all, from whence we understand likewise, that in the state of nature, Profit is the measure of Right.

[In the meere state of Nature] This is thus to be understood: What any man does in the bare state of Nature is injurious to no man; not that in such a State he cannot offend God, or break the Lawes of Nature; for Injustice against men presupposeth Humane Lawes, such, as in the State of Nature there are none: Now

the truth of this proposition thus conceived is sufficiently demonstrated to the mindfull Reader in the Articles immediately foregoing; but because in certaine cases the difficulty of the conclusion makes us forget the premises, I will contract this Argument, and make it most evident to a single view; every man hath right to protect himself, as appears by the seventh Article. The same man therefore hath a right to use all the means which necessarily conduce to this end by the eighth Article: But those are the necessary means which he shall judge to be such by the ninth Article. He therefore hath a right to make use, of and to doe all whatsoever he shall judge requisite for his preservation: wherefore by the judgement of him that doth it, the thing done is either right, or wrong; and therefore right. True it is therefore in the bare State of Nature, &c but if any man pretend somewhat to tend necessarily to his preservation, which yet he himself doth not confidently believe so, he may offend against the Lawes of Nature, as in the third Chapter of this Book is more at large declar'd. It hath been objected by some: If a Sonne kill his Father, doth he him no injury? I have answered, That a Sonne cannot be understood to be at any time in the State of Nature, as being under the Power and command of them to whom he ownes his protection as soon as ever he is born, namely either his Fathers, or his Mothers, or his that nourisht him, as is demonstrated in the ninth Chapter.

XI. But it was the least benefit for men thus to have a common Right to all things; for the effects of this Right are the same, almost, as if there had been no Right at all; for although any man might say of every thing, This is mine, yet could he not enjoy it, by reason of his Neighbour, who having equall Right, and equall power, would pretend the same thing to be his.

XII. If now to this naturall proclivity of men, to hurt each other, which they derive from their Passions, but chiefly from a vain esteeme of themselves: You adde, the right of all to all, wherewith one by right invades, the other by right resists, and whence arise perpetuall jealousies and suspicions on all hands, and how hard a thing it is to provide against an enemy invading us, with an intention to oppresse, and ruine, though he come with a small Number, and no great

Provision; it cannot be deny'd but that the naturall state of men, before they entr'd into Society, was a meer War, and that not simply, but a War of all men, against all men; for what is WAR, but that same time in which the will of contesting by force, is fully declar'd either by Words, or Deeds? The time remaining, is termed PEACE.

XIII. But it is easily judg'd how disagreeable a thing to the preservation either of Man-kind, or of each single Man, a perpetuall War is: But it is perpetuall in its own nature, because in regard of the equality of those that strive, it cannot be ended by Victory; for in this state the Conquerour is subject to so much danger, as it were to be accounted a Miracle, if any, even the most strong should close up his life with many years, and old age. They of America are Examples hereof, even in this present Age: Other Nations have been in former Ages, which now indeed are become Civill, and Flourishing, but were then few, fierce, short-lived, poor, nasty, and destroy'd of all that Pleasure, and Beauty of life, which Peace and Society are wont to bring with them. Whosoever therefore holds, that it had been best to have continued in that state in which all things were lawfull for all men, he contradicts himself; for every man, by naturall necessity desires that which is good for him: nor is there any that esteemes a war of all against all, which necessarily adheres to such a State, to be good for him. And so it happens that through feare of each other we think it fit to rid our selves of this condition, and to get some fellowes; that if there needs must be war, it may not yet be against all men, nor without some helps.

XIV. Fellowes are gotten either by constraint, or by consent; By Constraint, when after fight the Conqueror makes the conquered serve him either through feare of death, or by laying fetters on him: By consent, when men enter into society to helpe each other, both parties consenting without any constraint. But the Conqueror may by right compell the Conquered, or the strongest the weaker, (as a man in health may one that is sick, or he that is of riper yeares a childe) unlesse he will choose to die, to give caution of his future obedience. For since the right of protecting our selves according to our owne wills proceeded from our

danger, and our danger from our equality, its more consonant to reason, and more certaine for our conservation, using the present advantage to secure our selves by taking caution; then, when they shall be full growne and strong, and got out of our power, to endeavour to recover that power againe by doubtfull fight. And on the other side, nothing can be thought more absurd, then by discharging whom you already have weak in your power, to make him at once both an enemy, and a strong one. From whence we may understand likewise as a Corollarie in the naturall state of men, That a sure and irresistible Power confers the right of Dominion, and ruling over those who cannot resist; insomuch, as the right of all things, that can be done, adheres essentially, and immediately unto this omnipotence hence arising.

XV. Yet cannot men expect any lasting preservation continuing thus in the state of nature (i.e.) of War, by reason of that equality of power, and other humane faculties they are endued withall. Wherefore to seek Peace, where there is any hopes of obtaining it, and where there is none, to enquire out for Auxiliaries of War, is the dictate of right Reason; that is, the Law of Nature, as shall be shewed in the next Chapter.

Chapter II: Of the Law of Nature concerning Contracts

I. ALL AUTHORS agree not concerning the definition of the Naturall Law, who notwithstanding doe very often make use of this terme in their Writings. The Method therefore, wherein we begin from definitions, and exclusion of all equivocation, is only proper to them who leave no place for contrary Disputes; for the rest, if any man say, that somewhat is done against the Law of Nature, one proves it hence, because it was done against the generall Agreement of all the most wise, and learned Nations: But this declares not who shall be the judg of the wisdome and learning of all Nations: Another hence, That it was done against the Generall consent of all Man-kind; which definition is by no means to be admitted; for then it were impossible for any but Children, and Fools, to offend against such a Law; for sure, under the notion of Man-kind, they comprehend all men actually endued with Reason. These therefore either doe Naught against it, or if they doe Ought, it is without their joint accord, and therefore ought to be excus'd; but to receive the Lawes of Nature from the Consents of them, who oftner Break, then Observe them, is in truth unreasonable: besides, Men condemne the same things in others, which they approve in themselves; on the other side, they publicly commend what they privately condemne; and they deliver their Opinions more by Hear-say, then any Speculation of their own; and they accord more through hatred of some object, through fear, hope, love, or some other perturbation of mind, then true Reason. And therefore it comes to passe, that whole Bodyes of people often doe those things by Generall accord, or Contention, which those Writers most willingly acknowledge to be against the Law of Nature. But since all doe grant that is done by RIGHT, which is not done against Reason, we ought to judg those Actions onely wrong, which are repugnant to right Reason, (i.e.) which contradict some certaine Truth collected by right reasoning from true Principles; but that

Wrong which is done, we say it is done against some Law: therefore True Reason is a certaine Law, which (since it is no lesse a part of Humane nature, then any other faculty, or affection of the mind) is also termed naturall. Therefore the Law of Nature, that I may define it, is the Dictate of right Reason*, conversant about those things which are either to be done, or omitted for the constant preservation of Life, and Members, as much as in us lyes.

- [Right Reason.] By Right Reason in the naturall state of men, I understand not, as many doe, an infallible faculty, but the act of reasoning, that is, the peculiar and true ratiocination of every man concerning those actions of his which may either redound to the dammage, or benefit of his neighbours. I call it Peculiar, because although in a Civill Government the reason of the Supreme (i.e. the Civill Law) is to be received by each single subject for the right; yet being without this Civill Government, (in which state no man can know right reason from false, but by comparing it with His owne) every mans owne reason is to be accounted not onely the rule of His owne actions which are done at His owne perill, but also for the measure of another mans reason, in such things as doe concerne him. I call it True; that is, concluding from true principles rightly fram'd, because that the wHole breach of the Lawes of Nature consists in the false reasoning, or rather folly of those men who see not those duties they are necessarily to performe toward others in order to their owne conservation; but the Principles of Right reasoning about such like duties are those which are explained in the 2, 3, 4, 5, 6, and 7. articles of the first Chapter.

II. But the first and fundamentall Law of Nature is, That Peace is to be sought after where it may be found; and where not, there to provide our selves for helps of War: For we shewed in the last Article of the foregoing Chapter, that this precept is the dictate of right reason; but that the Dictates of right reason are naturall Lawes, that hath been newly prov'd above; But this is the first, because

the rest are deriv'd from this, and they direct the wayes either to Peace, or self-defence.

III. But one of the Naturall Lawes deriv'd from this fundamentall one is this, That the right of all men, to all things, ought not to be retain'd, but that some certain rights ought to be transferr'd, or relinquish't: for if every one should retain his right to all things, it must necessarily follow, that some by right might invade; and others, by the same right, might defend themselves against them, (for every man, by naturall necessity, endeavours to defend his Body, and the things which he judgeth necessary towards the protection of his Body) therefore War would follow. He therefore acts against the reason of Peace, (i.e.) against the Law of Nature, whosoever he be, that doth not part with his Right to all things.

IV. But he is said to part with his right, who either absolutely renounceth it, or conveys it to another. He absolutely renounceth it, who by some sufficient Signe, or meet Tokens, declares that he is willing that it shall never be lawfull for him to doe that again, which before, by Right, he might have done; but he conveys it to another, who by some sufficient Signe, or meet Tokens, declares to that other, that he is willing it should be unlawfull for him to resist him, in going about to do somewhat in the performance where he might before, with Right, have resisted him; but that the conveyance of Right consists meerly in not resisting, is understood by this, that before it was convey'd, he, to whom he convey'd it, had even then also a right to all, whence he could not give any new Right: But the resisting Right he had, before he gave it, by reason whereof the other could not freely enjoy his Rights, is utterly abolisht: Whosoever therefore acquires some Right in the naturall state of men, he onely procures himself security, and freedome from just molestation in the enjoyment of his Primitive Right: As for example, if any man shall sell, or give away a Farme, he utterly deprives himself only from all Right to this Farme, but he does not so from others also.

V. But in the conveyance of Right the will is requisite not onely of him that conveys, but of him also that accepts it. If either be wanting, the Right remaines: for if I would have given what was mine, to one who refus'd to accept of it, I have

not therefore either simply renounc'd my Right, or convey'd it to any man; for the cause which mov'd me to part with it to this Man was in him onely, not in others too.

VI. But if there be no other Token extant of our will either to quit, or convey our Right, but onely Words; those words must either relate to the present, or time past; for if they be of the future onely, they convey nothing: for example, he that speaks thus of the time to come, I will give to morrow, declares openly that yet he hath not given it; so that all this day his right remains, and abides to morrow too, unlesse in the interim he actually bestowes it: for what is mine, remains mine till I have parted with it. But if I shall speak of the time present, suppose thus; I doe give, or have given you this to be received to morrow, by these words is signified that I have already given it, and that his Right to receive it to morrow, is conveyed to him by me to day.

VII. Neverthesse, although words alone are not sufficient tokens to declare the Will; if yet to words relating to the future, there shall some other signes be added, they may become as valid, as if they had been spoken of the present: If therefore, as by reason of those other signes, it appear, that he that speaks of the future, intends those words should be effectually toward the perfect transferring of his Right, they ought to be valid; for the conveyance of right depends not on words, but (as hath been instanc'd in the 4. Article) on the declaration of the Will.

VIII. If any man convey some part of his right to another, and doth not this for some certain benefit received, or for some compact, a conveyance in this kind is called a Gift, or free Donation. But in free donation those words onely oblige us which signifie the present, or the time past; for if they respect the future, they oblige not as words, for the reason given in the foregoing Article: It must needs therefore be, that the Obligation arise from some other tokens of the Will: But, because whatsoever is voluntarily done, is done for some good to him that wils it; there can no other token be assigned of the Will to give it, except some benefit either already receiv'd, or to be acquir'd; but is suppos'd, that no such benefit is acquired, nor any compact in being; for if so, it would cease to be a free

gift: It remains therefore, that a mutuall good turne without agreement be expected; but no signe can be given, that he, who us' d future words toward him who was in no sort engag'd to return a benefit, should desire to have his words so understood, as to oblige himselfe thereby. Nor is it suitable to Reason, that those who are easily enclined to doe well to others, should be oblig'd by every promise, testifying their present good affection: And for this cause, a promiser in this kind, must be understood to have time to deliberate, and power to change that affection as well as he to whom he made that promise, may alter his desert. But he that deliberates, is so farre forth free, nor can be said to have already given: But if he promise often, and yet give seldome, he ought to be condemn'd of levity, and be called not a Donour, but Dason.

IX. But the act of two, or more, mutually conveying their Rights, is call'd a Contract. But in every Contract, either both parties instantly performe what they contract for, insomuch as there is no trust had from either to other; or the one performs, the other is trusted, or neither performe. Where both parties performe presently, there the Contract is ended, as soon as 'tis performed; but where there is credit given either to one, or both, there the party trusted promiseth after-performance; and this kind of promise is called a COVENANT.

X. But the Covenant made by the party trusted with him, who hath already performed, although the promise be made by words pointing at the future, doth no lesse transfer the right of future time, then if it had been made by words signifying the present, or time past: for the others performance is a most manifest signe that he so understood the speech of him whom he trusted, as that he would certainly make performance also at the appointed time; and by this signe the party trusted knew himselfe to be thus understood, which, because he hindred not, 'twas an evident token of his Will to performe. The promises therefore which are made for some benefit received (which are also Covenants) are Tokens of the Will; that is, (as in the foregoing Section hath been declared) of the last act of deliberating, whereby the liberty of non-performance is abolisht, and by consequence are obligatory; for where Liberty ceaseth, there beginneth Obligation.

XI. But the Covenants, which are made in contract of mutuall trust, neither party performing out of hand, if there arise* a just suspicion in either of them, are in the state of nature invalid: for he that first performes by reason of the wicked disposition of the greatest part of men studying their owne advantage, either by right, or wrong, exposeth himself to the perverse will of him with whom he hath Contracted; for it suites not with reason, that any man should performe first, if it be not likely that the other will make good his promise after; which, whether it be probable, or not, he that doubts it, must be judge of, as hath been shewed in the foregoing Chapter in the 9. Article. Thus, I say, things stand in the state of nature, but in a Civill State, when there is a power which can compell both parties, he that hath contracted to perform first, must first performe; because, that since the other may be compell'd, the cause which made him fear the others non-performance, ceaseth.

[*Arise] For, except there appear some new cause of fear, either from somewhat done, or some other token of the till not to performe from the other part, it cannot be judg'd to be a just fear; for the cause which was not sufficient to keep him from making Compact, must not suffice to authorize the breach of it, being made.

XII. But from this reason, that in all Free-gifts, and Compacts, there is an acceptance of the conveyance of Right required: it followes, that no man can Compact with him who doth not declare his acceptance; and therefore we cannot compact with Beasts, neither can we give, or take from them any manner of Right, by reason of their want of speech, and understanding, Neither can any man Covenant with God, or be oblig'd to him by Vow, except so far forth as it appeares to him by Holy Scriptures, that he hath substituted certaine men who have authority to accept of such like Vowes and Covenants, as being in Gods stead.

XIII. Those therefore doe vow in vain, who are in the state of nature, where they are not tyed by any Civill Law, (except by most certain Revelation the Will of God to accept their Vow, or Pact, be made known to them) for if what they

Vow, be contrary to the Law of Nature, they are not tyed by their Vow, for no man is tyed to perform an unlawfull act; but if what is vowed, be commanded by some Law of nature, it is not their Vow, but the Law it self which ties them; but if he were free before his vow, either to doe it, or not doe it, his liberty remaines, because that the openly declar'd Will of the obliger is requisite to make an obligation by Vow, which in the case propounded is suppos'd not to be: Now I call him the Obliger to whom any one is tyed, and the Obliged him who is tyed.

XIV. Covenants are made of such things onely as fall under our deliberation, for it can be no Covenant without the Will of the Contractor, but the Will is the last act of him who deliberates; therefore they onely concerne things possible, and to come; no man therefore, by his Compact, obligeth himself to an impossibility. But yet, though we often Covenant to doe such things as then seem' d possible when we promis'd them, which yet afterward appear to be impossible, are we therefore freed from all obligation? The reason whereof is, that he who promiseth a future uncertainty receives a present benefit; on condition, that he return another for it: for his Will, who performes the present benefit hath simply before it, for its object, a certain good valuable with the thing promised; but the thing it selfe not simply, but with condition if it could be done; but if it should so happen, that even this should prove impossible, why then he must perform as much as he can. Covenants therefore oblige us not to perform just the thing it selfe covenanted for, but our utmost endeavour. for this onely is, the things themselves are not in our power.

XV. We are freed from Covenants two wayes, either by performing, or by being forgiven: By performing, for beyond that we oblig'd not our selves. By being for-given, because he whom we oblig'd our selves to by forgiving, is conceiv'd to return us that Right which we past over to him; for, forgiving, implies giving: that is, by the fourth Article of this Chapter, a conveyance of Right to him to whom the gift is made.

XVI. Its an usuall question, Whether Compacts extorted from us, through fear, do oblige, or not: For example, If to redeeme my life, from the power of a Robber,

I promise to pay him 100 l. next day; and that I will doe no act whereby to apprehend, and bring him to Justice, whether I am tyed to keep promise, or not? But though such a Promise must sometimes be judged to be of no effect, yet it is not to be accounted so, because it proceeded from fear, for then it would follow that those promises which reduc'd men to a civill life, and by which Lawes were made, might likewise be of none effect, (for it proceeds from fear of mutuall slaughter, that one man submits himselfe to the Dominion of another:) And he should play the fool finely, who should trust his captive covenanting with the price of his redemption. It holds universally true, that promises doe oblige when there is some benefit received; and that to promisee and the thing promised, be lawfull: But it is lawfull, for the redemption of my life, both to promise, and to give what I will of mine owne to any man, even to a Thief. We are oblig'd therefore. by promises proceeding from fear, except the Civill Law forbid them, by vertue whereof, that which is promised becomes unlawfull.

XVII. Whosoever shall contract with one to doe, or omit somewhat, and shall after Covenant the contrary with another; he maketh not the former, but the latter Contract unlawfull: for, he hath no longer Right to doe, or to omit ought, who by former Contracts hath conveyed it to another; wherefore he can conveigh no Right by latter Contracts, and what is promised, is promis'd without Right: He is therefore tyed onely to his first Contract; to break which is unlawfull.

XVIII. No man is oblig'd by any Contracts whatsoever not to resist him who shall offer to kill, wound, or any other way hurt his Body; for there is in every man a certain high degree of feare through which he apprehends that evill which is done to him to be the greatest, and therefore by naturall necessity he shuns it all he can, and 'tis suppos'd he can doe no otherwise: When a man is arrived to this degree of fear, we cannot expect but he will provide for himself either by flight, or fight. Since therefore no man is tyed to impossibilities, they who are threatned either with deathe (which is the greatest evill to nature) or wounds, or some other bodily hurts, and are not stout enough to bear them, are not obliged to endure them. Farthermore, he that is tyed by Contract is trusted, (for Faith only is the

Bond of Contracts) but they who are brought to punishment, either Capitall, or more gentle, are fettered, or strongly guarded, which is a most certain signe that they seem' d not sufficiently bound from non resistance by their Contracts. Its one thing if I promise thus: If I doe it not at the day appointed, kill me. Another thing if thus: If I doe it not, though you should offer to kill me, I will not resist: All men, if need be, contract the first way; but there is need sometimes. This second way, none, neither is it ever needfull; for in the meer state of nature, if you have a mind to kill, that state it selfe affords you a Right; insomuch as you need not first trust him, if for breach of trust you will afterward kill him. But in a Civill State, where the Right of life, and death, and of all corporall punishment is with the Supreme; that same Right of killing cannot be granted to any private person. Neither need the Supreme himselfe contract with any man patiently to yeeld to his punishment, but onely this, that no man offer to defend others from him. If in the state of nature, as between two Cities, there should a Contract be made, on condition of killing, if it were not perform'd, we must presuppose another Contract of not killing before the appointed day. Wherefore on that day, if there be no performance, the right of Warre returnes; that is, an hostile state, in which all things are lawfull, and therefore resistance also. Lastly, by the contract of not resisting, we are oblig'd of two Evills to make choice of that which seemes the greater; for certaine Death is a greater evill then Fighting; but of two Evills it is impossible not to chuse the least: By such a Compact therefore we should be tyed to impossibilities, which is contrary to the very nature of compacts.

XIX. Likewise no man is tyed by any Compacts whatsoever to accuse himself, or any other, by whose dammage he is like to procure himselfe a bitter life; wherefore neither is a Father oblig'd to bear witnesse against his Sonne, nor a Husband against his Wife, nor a Sonne against his Father; nor any man against any one, by whose meanes he hath his subsistance; for in vain is that testimony which is presum'd to be corrupted from nature; but although no man be tyed to accuse himself by any compact, yet in a publique tryall he may, by torture, be forc'd to make answer; but such answers are no testimony of the fact, but helps

for the searching out of truth; insomuch as whether the party tortur'd his answer be true, or false, or whether he answer not at all, whatsoever he doth, he doth it by Right.

XX. Swearing is a speech joyned to a promise, whereby the promiser declares his renouncing of Gods mercy, unlesse he perform his word; which definition is contained in the words themselves, which have in them the very essence of an Oath, to wit, so God help me, or other equivalent, as with the Romans, Doe thou Jupiter so destroy the deceiver, as I slay this same Beast: neither is this any let, but that an Oath may as well sometimes be affirmatory, as promissory; for he that confirms his affirmation with an Oath, promiseth that he speaks truth. But though in some places it was the fashion for Subjects to Swear by their Kings; that custome took its Originall hence, That those Kings took upon them Divine Honour; for Oathes were therefore introduc'd that by Religion, and consideration of the Divine Power men might have a greater dread of breaking their Faiths, then that wherewith they fear men, from whose eyes their actions may lie hid.

XXI. Whence it followes, that an Oath must be conceived in that forme which he useth, who takes it; for in vain is any man brought to Swear by a God whom he beleeves not, and therefore neither feares him. For though by the light of nature it may be known that there is a God, yet no man thinks he is to Swear by him in any other fashion, or by any other name then what is contain'd in the precepts of his own proper, that is, (as he who Swears imagines) the true Religion.

XXII. By the definition of an Oath we may understand, that a bare Contract obligeth no lesse, then that to which we are Sworn; for it is the contract which binds us, the Oath relates to the Divine punishment, which it could not provoke, if the breach of contract were not in its selfe unlawfull; but it could not be unlawfull if the Contract were not obligatory. Furthermore, he that renounceth the mercy of God obligeth himselfe not to any punishment, because it is ever lawfull to deprecate the punishment howsoever provok'd, and to enjoy Gods Pardon if it be granted. The onely effect therefore of an Oath is this, To cause men who are

naturally inclin'd to break all manner of faith, through fear of punishment, to make the more Conscience of their words and actions.

XXIII. To exact an Oath, where the breach of contract, if any be made, cannot but be known, and where the party compacted, withall wants not power to punish, is to do somewhat more then is necessary unto self-defence, and shewes a mind desirous not so much to benefit it selfe, as to prejudice another. For an Oath, out of the very form of swearing, is taken in order to the provocation of Gods anger, that is to say, of him that is Omnipotent against those who think, that by their own therefore violate their Faith, because they strength they can escape the punishment of men; and of him that is Omniscient against those, who therefore usually break their trust, because they hope that no man shall see them.

Chapter III: Of the other Lawes of Nature I.

ANOTHER OF THE Lawes of Nature is, to performe Contracts, or to keep trust; for it hath been shewed in the foregoing Chapter that the Law of Nature commands every man, as a thing necessary, to obtain Peace; to convey certain rights from each to other, and that this (as often as it shall happen to be done) is called a Contract: But this is so farre forth onely conducive to peace, as we shall performe Our selves, what we contract with others, shall be done, or omitted; and in vaine would Contracts be made, unlesse we stood to them. Because therefore, to stand to our Covenants, Or to keep faith, is a thing necessary for the obtaining of peace, it will prove by the second Article of the second Chapter to be a precept of the naturall Law.

II. Neither is there in this matter, any exception of the persons, with whom we Contract, as if they keep no faith with others; Or hold, that none ought to be kept, or are guilty of any other kind of vice: for he that Contracts, in that he doth contract, denies that action to be in vaine, and it is against reason for a knowing man to doe a thing in vain; and if he think himself not bound to keep it, in thinking so, he affirms the Contract to be made in vain: He therefore, who Contracts with one with whom he thinks he is not bound to keep faith, he doth at once think a Contract to be a thing done in vaine, and not in vaine, which is absurd. Either therefore we must hold trust with all men, or else not bargain with them; that is, either there must be a declared Warre, Or a sure and faithfull Peace.

III. The breaking of a Bargain, as also the taking back of a gift, (which ever consists in some action, Or omission) is called an INJURY: But that action, or omission, is called unjust, insomuch as an injury, and an unjust action, or omission, signifie the same thing, and both are the same with breach of Contract and trust: And it seemes the word Iniury came to be given to any action, or

omission, because they were without Right. He that acted, or omitted, having before conveyed his Right to some other. And there is some likeness between that, which in the common course of life we call Injury; and that, which in the Schools is usually called absurd. For even as he, who by Arguments is driven to deny the Assertion which he first maintain'd, is said to be brought to an absurdity; in like manner, he who through weakness of mind does, or omits that which before he had by Contract promis'd not to do, or omit, commits an Injury, and falls into no less contradiction, than he, who in the Schools is reduc'd to an Absurdity. For by contracting for some future action, he wills it done; by not doing it, he wills it not done, which is to will a thing done, and not done at the same time, which is a contradiction. An Injury therefore is a kind of absurdity in conversation, as an absurdity is a kind of injury in disputation.

IV. From these grounds it followes, that an injury can be done to no man* but him with whom we enter Covenant, or to whom somewhat is made over by deed of gift, or to whom somewhat is promis'd by way of bargain. And therefore damaging and injuring are often disjoyn'd: for if a Master command his Servant, who hath promis'd to obey him, to pay a summe of money, or carry some present to a third man; the Servant, if he doe it not, hath indeed damag'd this third party, but he injur'd his Master onely. So also in a civill government, if any man offend another, with whom he hath made no Contract, he damages him to whom the evill is done, but he injures none but him to whom the power of government belongs: for if he, who receives the hurt, should expostulate the mischief. and he that did it, should answer thus, What art thou to me? Why should I rather doe according to yours, then mine owne will, since I do not hinder, but you may do your own, and not my mind? In which speech, where there hath no manner of pre-contract past, I see not, I confesse, what is reprehensible.

- [Injury can be done against no man] The word injustice relates to some Law: Injury to some Person, as well as some Law. For what's unjust, is unjust to all; but there may an injury be done, and yet not against me, nor thee, but some other; and sometimes against no

private Person, but the Magistrate only; sometimes also neither against the Magistrate, nor any private man, but onely against God; for through Contract, and conveyance of Right, we say, that an injury is done against this, or that man. Hence it is (which we see in all kind of Government) that what private men contract between themselves by word, or writing, is releast againe at the will of the Obliger. But those mischiefes which are done against the Lawes of the Land, as theft, homicide, and the like, are punisht not as he wills, to whom the hurt is done, but according to the will of the Magistrate; that is, the constituted Lawes.

V. These words just, and unjust, as also justice, and injustice, are equivocall; for they signifie one thing when they are attributed to Persons, another when to actions: When they are attributed to Actions, Just signifies as much as what's done with Right, and unjust, as what's done with injury: he who hath done some just thing is not therefore said to be a just Person, but guiltlesse, and he that hath done some unjust thing, we doe not therefore say he is an unjust, but guilty man. But when the words are applyed to Persons; to be just, signifies as much as to be delighted in just dealing, to study how to doe righteousness, or to indeavour in all things to doe that which is just; and to be unjust, is to neglect righteous dealing, or to think it is to be measured not according to my contract, but some present benefit; so as the justice or injustice of the mind, the intention, or the man, is one thing; that of an action, or omission, another; and innumerable actions of a just man may be unjust, and of an unjust man, just: But that man is to be accounted just, who doth just things because the Law commands it, unjust things only by reason of his infirmity; and he is properly said to be unjust who doth righteousness for fear of the punishment annext unto the Law, and unrighteousnesse by reason of the iniquity of his mind.

VI. The justice of actions is commonly distinguisht into two kinds; Commutative, and Distributive, the former whereof they say consists in Arithmetically, the latter in Geometricall proportion: and that is conversant in

exchanging, in buying, selling, borrowing, lending, location, and conduction, and other acts whatsoever belonging to Contractors, where, if there be an equall return made, hence they say springs a commutative justice: But this is busied about the dignity, and merits of men; so as if there be rendred to every man kata pen axian more to him who is more worthy, and lesse to him that deserves lesse, and that proportionably, hence they say ariseth distributive justice: I acknowledge here some certaine distinction of equality; to wit, that one is an equality simply so called, as when two things of equall value are compar'd together, as a pound of silver with twelve ounces of the same silver; the other is an equality, secundum, quod as when a 1000 pound is to be divided to an hundred men, 600 pounds are given to 60 men, and 400 to 40 where there is no equality between 600 and 400. But when it happens, that there is the same inequality in the number of them to whom it is distributed, every one of them shall take an equall part, whence it is called an equall distribution: But such like equality is the same thing with Geometricall proportion. But what is all this to Justice? for neither, if I sell my goods for as much as I can get for them, doe I injure the buyer, who sought, and desir'd them of me? neither if I divide more of what is mine to him who deserves lesse, so long as I give the other what I have agreed for, do I wrong to either? which truth our Saviour himself, being God, testifies in the Gospell. This therefore is no distinction of Justice, but of equality; yet perhaps it cannot be deny'd, but that Justice is a certain equality, as consisting in this onely; that since we are all equall by nature, one should not arrogate more Right to himselfe, then he grants to another, unlesse he have fairly gotten it by Compact. And let this suffice to be spoken against this distinction of Justice, although now almost generally receiv'd by all, lest any man should conceive an injury to be somewhat else, then the breach of Faith, or Contract, as hath been defin'd above.

VII. It is an old saying, *Volenti non fit iniuria* (the willing man receives no injury) yet the truth of it may be deriv'd from our Principles. For grant, that a man be willing that that should be done, which he conceives to be an injury. to him; why then that is done by his will, which by Contract was not lawfull to be done;

but he being willing that should be done, which was not lawfull by Contract, the Contract it self (by the 15. 5 Article of the foregoing Chapter) becomes void: The Right therefore of doing it returns, therefore it is done by Right; wherefore it is no injury.

VIII. The third precept of the Naturall Law, is, That you suffer not him to be the worse for you, who out of the confidence he had in you, first did you a good turn; or that you accept not a gift, but with a mind to endeavour, that the giver shall have no just occasion to repent him of his gift. For without this he should act without reason that would conferre a benefit where he sees it would be lost; and by this meanes all beneficence, and trust, together with all kind of benevolence would be taken from among men, neither would there be ought of mutuall assistance among them, nor any commencement of gaining grace and favour. by reason whereof the state of Warre would necessarily remain, contrary to the fundamentall Law of Nature: But because the breach of this Law is not a breach of trust, or contract, (for we suppose no Contracts to have pass'd among them) therefore is it not usually termed an iniury, but because good turns and thanks have a mutuall eye to each other, it is called INGRATITUDE.

IX. The fourth precept of Nature, is, That every man render himself usefull unto others: which, that we may rightly understand, we must remember that there is in men, a diversity of dispositions to enter into society, arising from the diversity of their affections, not unlike that which is found in stones, brought together in the Building, by reason of the diversity of their matter, and figure. For as a stone, which in regard of its sharp and angular form takes up more room from other stones then it fills up it selfe, neither because of the hardnesse of its matter cannot well be prest together, or easily cut, and would hinder the building from being fitly compacted, is cast away, as not fit for use: so a man, who for the harshness of his disposition in retaining superfluities for himself, and detaining of necessities from others, and being incorrigible, by reason of the stubbornnesse of his affections, is commonly said to be uselesse, and troublesome unto others. Now, because each one not by Right onely, but even by naturall necessity is

suppos'd, with all his main might, to intend the procurement of those things which are necessary to his own preservation; if any man will contend on the other side for superfluities, by his default there will arise a Warre, because that on him alone there lay no necessity of contending, he therefore acts against the fundamentall Law of Nature: Whence it followes (which wee were to shew) that it is a precept of nature; That every man accommodate himselfe to others. But he who breaks this Law may be called uselesse, and troublesome. Yet Cicero opposeth inhumanity to this usefulness, as having regard to this very Law.

X. The fift precept of the Law of nature is: That we must forgive him who repents, and asketh pardon for what is past; having first taken caution for the time to come. The pardon of what is past, or the remission of an offence, is nothing else but the granting of Peace to him that asketh it, after he hath warr'd against us, & now is become penitent. But Peace granted to him that repents not, that is, to him that retains an hostile mind, or that gives not caution for the future; that is, seeks not Peace, but oportunity, is not properly Peace but feare, and therefore is not commanded by nature. Now to him that will not pardon the penitent, and that gives future caution, peace it selfe it seems is not pleasing; which is contrary to the naturall Law.

XI. The sixth precept of the naturall Law is, That in revenge. and punishments we must have our eye not at the evill past, but the future good. That is: It is not lawfull to inflict punishment for any other end, but that the offender may be corrected, or that others warned by his punishment may become better. But this is confirmed chiefly from hence, that each man is bound by the law of nature to forgive one another, provided he give caution for the future, as hath been shewed in the foregoing Article. Furthermore, because revenge, if the time past be onely considered, is nothing else but a certain triumph, and glory of minde, which points at no end, (for it contemplates onely what is past; but the end is a thing to come) but that which is directed to no end is vain; That revenge therefore which regards not the future, proceeds from vaine glory, and therefore without reason. But to hurt another without reason introduces a warre, and is contrary to the

fundamentall Law of Nature; It is therefore a precept of the Law of nature, that in revenge wee look not backwards but forward. Now the breach of this Law, is commonly called CRUELTY.

XII. But because all signes of hatred, and contempt provoke most of all to brawling and fighting, insomuch as most men would rather lose their lives, (that I say not their Peace) then suffer reproach; it followes in the seventh place, That it is prescribed by the Law of nature, that no man either by deeds, or words, countenance, or laughter, doe declare himselfe to hate, or scorne another. The breach of which Law is called Reproach. But although nothing be more frequent then the scoffes and jeers of the powerfull against the weak, and namely of Judges against guilty persons, which neither relate to the offence of the guilty, nor the duty of the Judges, yet these kind of men do act against the Law of nature, and are to be esteemed for contumelious.

XIII. The question whether of two men be the more worthy, belongs not to the naturall, but civill state; for it hath been shewed before, Chap. I. Art. 3. that all men by nature are equall, and therefore the inequality which now is, suppose from riches, power, nobility of kindred, is come from the civill Law. I know that Aristotle in his first book of Politiques affirmes as a foundation of the whole politicall science, that some men by nature are made worthy to command, others onely to serve; as if Lord and Master were distinguished not by consent of men, but by an aptnesse, that is, a certain kind of naturall knowledge, or ignorance; which foundation is not onely against reason (as but now hath been shewed) but also against experience: for neither almost is any man so dull of understanding as not to judge it better to be ruled by himselfe, then to yeeld himselfe to the government of another; neither if the wiser and stronger doe contest, have these ever, or often the upper hand of those. Whether therefore men be equall by nature, the equality is to be acknowledged, or whether unequall, because they are like to contest for dominion, its necessary for the obtaining of Peace, that they be esteemed as equall; and therefore it is in the eight place a precept of the Law of

nature, That every man be accounted by nature equall to another, the contrary to which Law is PRIDE.

XIV. As it was necessary to the conservation of each man, that he should part with some of his Rights, so it is no lesse necessary to the same conservation, that he retain some others, to wit the Right of bodily protection, of free enjoyment of ayre, water, and all necessaries for life. Since therefore many common Rights are retained by those who enter into a peaceable state, and that many peculiar ones are also acquired, hence ariseth this ninth dictate of the naturall Law, to wit, That what Rights soever any man challenges to himselfe, he also grant the same as due to all the rest: otherwise he frustrates the equality acknowledged in the former Article. For what is it else to acknowledge an equality of persons in the making up of society, but to attribute equall Right and Power to those whom no reason would else engage to enter into society? But to ascribe equall things to equalls, is the same with giving things proportionall to proportionals. The observation of this Law is called MEEKNES, the violation pleonexia, the breakers by the Latines are styled Immodici & immodesti.

XV. In the tenth place it is commanded by the Law of nature, That every man in dividing Right to others, shew himselfe equall to either party. By the foregoing Law we are forbidden to assume more Right by nature to our selves, then we grant to others. We may take lesse if we will, for that sometimes is an argument of modesty. But if at any time matter of Right be to be divided by us unto others, we are forbidden by this Law to favour one more or lesse then another. For he that by favouring one before another, observes not this naturall equality, reproaches him whom he thus undervalues: but it is declared above, that a reproach is against the Lawes of Nature. The observance of this Precept is called EQUITY; the breach, Respect of Persons. The Greeks in one word term it prosopolepsia.

XVI. From the foregoing Law is collected this eleventh, Those things which cannot be divided, must be used in common, (if they can) and (that the quantity of the matter permit) every man as much as he lists, but if the quantity permit not, then with limitation, and proPortionally to the number of the users: for otherwise

that equality can by no means be observed, which we have shewed in the forgoing Article to be commanded by the Law of Nature.

XVII. Also what cannot be divided, nor had in common, it is provided by the Law of nature (which may be the twelfth Precept) that the use of that thing be either by turns, or adjudged to one onely by lot, and that in the using it by turns, it be also decided by lot who shall have the first use of it; For here also regard is to be had unto equality: but no other can be found, but that of lot.

XVIII. But all lot is twofold; arbitrary, or naturall; Arbitrary is that which is cast by the consent of the Contenders, and it consists in meer chance (as they say) or fortune. Naturall is primogeniture (in Greek klironomia, as it were given by lot) or first possession. Therefore the things which can neither be divided, nor had in common, must be granted to the first possessour, as also those things which belonged to the Father are due to the Sonne, unlesse the Father himselfe have formerly conveyed away that Right to some other. Let this therefore stand for the thirteenth Law of Nature.

XIX. The 14 Precept of the Law of nature is; That safety must be assured to the mediators for Peace. For the reason which commands the end, commands also the means necessary to the end. But the first dictate of Reason is Peace. All the rest are means to obtain it, and without which Peace cannot be had. But neither can Peace be had without mediation, nor mediation without safety; it is therefore a dictate of Reason, that is, a Law of nature, That we must give all security to the Mediators for Peace.

XX. Furthermore, because, although men should agree to make all these, and whatsoever other Lawes of Nature, and should endeavour to keep them, yet doubts, and controversies would daily arise concerning the application of them unto their actions, to wit, whether what was done, were against the Law, or not, (which we call, the question of Right) whence will follow a fight between Parties, either sides supposing themselves wronged; it is therefore necessary to the preservation of Peace (because in this case no other fit remedy can possibly be thought on) that both the disagreeing Parties refer the matter unto some third, and

oblige themselves by mutuall compacts to stand to his judgement in deciding the controversie. And he to whom they thus refer themselves is called an Arbiter. It is therefore the 15. Precept of the naturall Law, That both parties disputing concerning the matter of right submit themselves unto the opinion and judgement of some third.

XXI. But from this ground, that an Arbiter or Judge is chosen by the differing Parties to determine the controversie, we gather, that the Arbiter must not be one of the Parties: for every man is presumed to seek what is good for himselfe naturally, and what is just, onely for Peaces sake, and accidentally. and therefore cannot observe that same equality commanded by, the Law of nature so exactly as a third man would do: It is therefore in the sixteenth place contained in the Law of nature, That no man must be Judge or Arbiter in his own cause.

XXII. From the same ground followes in the seventeenth place, That no man must be Judge who propounds unto himself any hope of profit, or glory, from the victory of either part: for the like reason swayes here, as in the foregoing Law.

XXIII. But when there is some controversie of the fact it selfe, to wit, whether that bee done or not, which is said to bee done, the naturall Law wills, that the Arbiter trust both Parties alike, that is, (because they affirm contradictories) that hee believe neither: He must therefore give credit to a third, or a third and fourth, or more, that he may be able to give judgement of the fact, as often as by other signes he cannot come to the knowledge of it. The 18. Law of nature therefore injoynes Arbiters, and Iudges of fact, That where firm and certain signes of the fact appear not, there they rule their sentence by such witnesses, as seem to be indifferent to both Parts.

XXIV. From the above declared definition of an Arbiter may be furthermore understood, That no contract or promise must Passe between him and the parties whose Iudge he is appointed, by vertue whereof he may be engaged to speak in favour of either part, nay, or be oblig'd to judge according to equity, or to pronounce such sentence as he shall truly judge to be equall. The Judge is indeed bound to give such sentence as he shall judge to be equall by the Law of Nature

re-counted in the 15. Article. To the obligation of which Law nothing can be added by way of Compact. Such compact therefore would be in vain. Besides, if giving wrong judgement, he should contend for the equity of it, except such Compact be of no force, the Controversie would remain after Judgement given, which is contrary to the constitution of an Arbiter, who is so chosen, as both parties have oblig'd themselves to stand to the judgement which he should pronounce. The Law of Nature therefore commands the Judge to be dis-engaged, which is its 19 precept.

XXV. Farthermore, forasmuch as the Lawes of Nature are nought else but the dictates of Reason, so as, unlesse a man endeavour to preserve the faculty of right reasoning, he cannot observe the Lawes of Nature, it is manifest, that he, who knowingly, or willingly, doth ought, whereby the rationall faculty may be destroyed, or weakned, he knowingly, and willingly, breaks the Law of nature: For there is no difference between a man who performes not his Duty, and him who does such things willingly, as make it impossible for him to doe it. But they destroy and weaken the reasoning faculty, who doe that which disturbs the mind from its naturall state; that which most manifestly happens to Drunkards and Gluttons; we therefore sin in the 20 place against the Law of Nature by Drunkennesse.

XXVI. Perhaps some man, who sees all these precepts of Nature deriv'd by a certain artifice from the single dictate of Reason advising us to look to the preservation, and safeguard of our selves, will say, That the deduction of these Lawes is so hard, that it is not to be expected they will be vulgarly known, and therefore neither will they prove obliging: for Lawes, if they be not known, oblige not, nay, indeed are not Lawes. To this I answer, it's true, That hope, fear, anger, ambition, covetousnesse, vain glory, and other perturbations of mind, doe hinder a man so, as he cannot attaine to the knowledge of these Lawes, whilst those passions prevail in him: But there is no man who is not sometimes in a quiet mind; At that time therefore there is nothing easier for him to know, though he be never so rude and unlearn'd, then this only Rule, That when he doubts, whether

what he is now doing to another, may be done by the Law of Nature, or not, he conceive himselfe to be in that others stead. Here instantly those perturbations which perswaded him to the fact, being now cast into the other scale, dissuade him as much: And this Rule is not onely easie, but is Anciently celebrated in these words, *Quod tibi fieri non vis, alteri ne feceris*: Do not that to others, you would not have done to your self.

XXVII. But because most men, by reason of their perverse desire of present profit, are very unapt to observe these Lawes, although acknowledg'd by them, if perhaps some others more humble then the rest should exercise that equity and usefulness which Reason dictates, those not practising the same, surely they would not follow Reason in so doing; nor would they hereby procure themselves peace, but a more certain quick destruction, and the keepers of the Law become a meer prey to the breakers of it. It is not therefore to be imagin'd, that by Nature, (that is, by Reason) men are oblig'd to the exercise of all these Lawes in that state of men wherein they are not practis'd by others. We are oblig'd yet in the interim to a readinesse of mind to observe them whensoever their observation shall seeme to conduce to the end for which they were ordain'd. We must therefore conclude, that the Law of Nature doth alwayes, and every where oblige in the internall Court, or that of Conscience, but not alwayes in the externall Court, but then onely when it may be done with safety.

The exercise of all these Lawes] Nay among these Lawes some things there are, the omission whereof (provided it be done for Peace, or Self-preservation) seemes rather to be the fulfilling, then breach of the Naturall Law; for he that doth all things against those that doe all things, and plunders plunderers, doth equity; but on the other side, to doe that which in Peace is an handsome action, and becomming an honest man, is dejectednesse, and Poornesse of spirit, and a betraying of ones self in the time of War, But there are certain naturall Lawes, whose exercise ceaseth not even in the time of War it self; for I cannot understand what drunkennesse, or cruelty (that is, Revenge which respects not the future good) can advance toward Peace, or the preservation of any man. Briefly, in the

state of nature, what's just, and unjust, is not to be esteem'd by the Actions, but by the Counsell, and Conscience of the Actor. That which is done out of necessity, out of endeavour for Peace, for the preservation of our selves, is done with Right; otherwise every damage done to a man would be a breach of the naturall Law, and an injury against God.

XXVIII. But the Lawes which oblige Conscience, may be broken by an act, not onely contrary to them, but also agreeable with them, if so be that he who does it be of another opinion: for though the act it self be answerable to the Lawes, yet his Conscience is against them.

XXIX. The Lawes of Nature are immutable, and eternall; What they forbid, can never be lawfull; what they command, can never be unlawfull: For pride, ingratitude, breach of Contracts (or injury), inhumanity, contumely, will never be lawfull; nor the contrary vertues to these ever unlawfull, as we take them for dispositions of the mind, that is, as they are considered in the Court of Conscience, where onely they oblige, and are Lawes. Yet actions may be so diversified by circumstances, and the Civill Law, that what's done with equity at one time, is guilty of iniquity at another; and what suits with reason at one time, is contrary to it another. Yet Reason is still the same, and changeth not her end, which is Peace, and Defence; nor of the minde which the meanes to attaine them, to wit, those vertues we have declar'd above, and which cannot be abrogated by any Custome, or Law whatsoever.

XXX. It's evident by what hath hitherto been said, how easily the Lawes of Nature are to be observ'd, because they require the endeavour onely, (but that must be true and constant) which who so shall performe, we may rightly call him JUST. For he who tends to this with his whole might, namely, that his actions be squar'd according to the precepts of Nature, he shewes clearly that he hath a minde to fulfill all those Lawes, which is all we are oblig'd to by rationall nature. Now he that hath done all he is oblig'd to, is a Just Man.

XXXI. All Writers doe agree that the Naturall Law is the same with the Morall. Let us see wherefore this is true. We must know therefore, that Good and

Evill are names given to things to signifie the inclination, or aversion of them by whom they were given. But the inclinations of men are diverse, according to their diverse Constitutions, Customes, Opinions; as we may see in those things we apprehend by sense, as by tasting, touching, smelling; but much more in those which pertain to the common actions of life, where what this man commends, (that is to say, calls Good) the other undervalues, as being Evil; Nay, very often the same man at diverse times, praises, and dispraises the same thing. Whilst thus they doe, necessary it is there should be discord, and strife: They are therefore so long in the state of War, as by reason of the diversity of the present appetites, they mete Good and Evill by diverse measures. All men easily acknowledge this state, as long as they are in it, to be evill, and by consequence that Peace is good. They therefore who could not agree concerning a present, doe agree concerning a future Good, which indeed is a work of Reason; for things present are obvious to the sense, things to come to our Reason only. Reason declaring Peace to be good, it followes by the same reason, that all the necessary means to Peace be good also, and therefore, that Modesty, Equity, Trust, Humanity, Mercy (which we have demonstrated to be necessary to Peace) are good Manners, or habits, (that is) Vertues. The Law therefore, in the means to Peace, commands also Good Manners, or the practise of Vertue: And therefore it is call'd Morall.

XXXII. But because men cannot put off this same irrationall appetite, whereby they greedily prefer the present good (to which, by strict consequence, many unfore-seen evils doe adhere) before the future, it happens, that though all men doe agree in the commendation of the foresaid vertues, yet they disagree still concerning their Nature, to wit, in what each of them doth consist; for as oft as anothers good action displeaseth any man, that action hath the name given of some neighbouring vice; likewise the bad actions, which please them, are ever entituled to some Vertue; whence it comes to passe that the same Action is prais'd by these, and call'd Vertue, and dispraised by those, and termed vice. Neither is there as yet any remedy found by Philosophers for this matter; for since they could not observe the goodnesse of actions to consist in this, that it was in order

to Peace, and the evill in this, that it related to discord, they built a morall Philosophy wholly estranged from the morall Law, and unconstant to it self; for they would have the nature of vertues seated in a certain kind of mediocrity betweene two extremes, and the vices in the extremes themselves; which is apparently false: For to dare is commended, and under the name of fortitude is taken for a vertue, although it be an extreme, if the cause be approved. Also the quantity of a thing given, whether it be great, or little, or between both, makes not liberality, but the cause of giving it. Neither is it injustice, if I give any man more, of what is mine own, then I owe him. The Lawes of Nature therefore are the summe of Morall Philosophy, whereof I have onely delivered such precepts in this place, as appertain to the preservation of our selves against those dangers which arise from discord. But there are other precepts of rationall nature, from whence spring other vertues: for temperance also is a precept of Reason, because intemperance tends to sicknesse, and death. And so fortitude too, (that is) that same faculty of resisting stoutly in present dangers, (and which are more hardly declined then overcome) because it is a means tending to the preservation of him that resists.

XXXIII. But those which we call the Lawes of nature (since they are nothing else but certain conclusions understood by Reason, of things to be done, and omitted; but a Law to speak properly and accurately, is the speech of him who by Right commands somewhat to others to be done, or omitted) are not (in propriety of speech) Lawes, as they proceed from nature; yet as they are delivered by God in holy Scriptures, (as we shall see in the Chapter following) they are most properly called by the name of Lawes: for the sacred Scripture is the speech of God commanding over all things by greatest Right.

Chapter IV: That the Law of Nature is a Divine Law

I. THE SAME Law which is Naturall, and Morall, is also wont to be called Divine, nor undeservedly, as well because Reason, which is the law of Nature, is given by God to every man for the rule of his actions; as because the precepts of living which are thence derived, are the same with those which have been delivered from the divine Majesty, for the LAWES of his heavenly Kingdome, by our Lord Jesus Christ, and his holy Prophets and Apostles. What therefore by reasoning we have understood above concerning the law of nature, we will endeavour to confirme the same in this Chapter by holy writ.

II. But first we will shew those places in which it is declared, that the Divine Law is seated in right reason. Psalm 37, 30, 31. The mouth of the righteous will be exercised in wisdom, and his tongue will be talking of judgement: The law of God is in his heart. Jerem. 31. 33. I will put my law in their inward parts, and write it in their hearts. Psal. 19. 7. The law of the Lord is an undefiled law, converting the soule. ver. 8. The Commandment of the Lord is Pure, and giveth light unto the eyes. Deuteron. 30. 11. This Commandment which I command thee this day, it is not hidden from thee, neither is it far off, &c. vers. 14. But the word is very nigh unto thee, in thy mouth, and in thine heart; that thou maist doe it. Psal. 119. 34. Give me understanding, and I shall keep thy law. vers. 105. Thy word is a lamp unto my feet, and a light unto my paths. Proverbs 9. 10. The knowledge of the holy is understanding. John 1. 1. Christ the Law-giver himselfe is called the word. vers. 9. The same Christ is called the true light that lighteth every man that cometh in the world. All which are descriptions of right reason, whose dictates, we have shewed before, are the lawes of nature.

III. But that which wee set downe for the fundamentall law of nature, namely, that Peace was to be sought for, is also the summe of the divine law, will be

manifest by these places. Rom. 3. 17. Righteousnesse, (which is the summe of the law) is called the way of Peace Psal. 85. 10. Righteousnesse and Peace have kissed each other. Matth. 5. 9. Blessed are the Peace-makers, for they shall be called the children of God. And after Saint Paul in his 6. Chapter to the Hebrewes, and the last verse had called Christ (the Legislator of that law we treat of) an High-Priest for ever after the order of Melchizedeck; he addes in the following Chapter, the first verse, This Melchizedeck was King of Salem, Priest of the most high God, &c. vers. 2. First being by interpretation King of Righteousnesse, and after that also King of Salem, which is, King of peace. Whence it is cleare, that Christ the King in his Kingdome placeth Righteousnesse and Peace together. Psal. 34. Eschue evill and doe good, seek Peace and ensue it. Isaiah 9. 6, 7. Unto us a child is born, unto us a Sonne is given, and the government shall be upon his shoulder, and his name shall be called Wonderfull, Counsellour, the mighty God, the everlasting Father, the Prince of peace. Isaiah 52. 7. How beautifull upon the mountaines are the feet of him that bringeth good tidings, that publisheth Peace, that bringeth good tidings of good, that publisheth salvation, that saith unto Sion, thy God reigneth! 3 Luke 2. 14. In the Nativity of Christ, the voice of them that praised God saying, Glory be to God on high, and in earth Peace, good will towards men. And Isaiah 53. 5. The Gospell is called the chastisement of our Peace. Isay 59. 8. Righteousnesse is called the way of Peace. The way of Peace they know not, and there is no judgement in their goings. Micah 5. 4, 5. speaking of the Messias, he saith thus, hee shall stand and feed in the strength of the Lord, in the Majesty of the name of the Lord his God, and they shall abide, for now shall he be great unto the end of the earth; And this man shall be your Peace, &c. Prov. 3. 1, 2. My sonne forget not my law, but let thine heart keep my Commandements, for length of dayes, and long life, and Peace, shall they adde to thee.

IV. What appertains to the first law of abolishing the community of all things, or concerning the introduction of meum & tuum, We perceive in the first place how great an adversary this same Community is to Peace, by those words of

Abraham to Lot, Gen. 13. 8. Let there be no strife I Pray thee, between thee and me, and between thy heard-men, and my heard-men, for we be brethren. Is not the whole land before thee? Separate thy selfe I Pray thee from me. And all those places of Scripture by which we are forbidden to trespasse upon our neighbours, as, Thou shalt not kill, thou shalt not commit adultery, thou shalt not steal, &c. doe confirm the law of distinction between Mine, and Thine. for they suppose the right of all men to all things to be taken away.

V. The same precepts establish the second law of nature of keeping trust: for what doth, Thou shalt not invade anothers right, import, but this? Thou shalt not take possession of that, which by thy contract ceaseth to be thine; but expressly set down, Psal. 15. vers. 1. To him that asked, Lord who shall dwell in thy Tabernacle? It is answered, vers. 3, 4: He that sweareth unto his neighbour, and disappointeth him not; and Prov. 6. 1. My sonne if thou be surety for thy friend, if thou have stricken thy hand with a stranger, Thou art snared with the words of thy mouth.

VI. The third Law concerning gratitude is proved by these places, Deut. 25. 4. Thou shalt not muzzle the Oxe when he treadeth out the corn; which Saint Paul I. Cor. 9. 9. interprets to be spoken of men, not Oxen onely. Prov. 17. 13. Who so rewardeth evill for good, evill shall not depart from his house. And Deut. 20. 10, 11. When thou comest nigh unto a city to fight against it, then proclaim Peace unto it. And it shall be if it make thee answer of Peace, and oPen unto thee, then it shall be that all the people that is found therein, shall be tributaries unto thee, and they shall serve thee. Proverbs 3. 29. Devise not evill against thy neighbour, seeing he dwelleth securely by thee.

VII. To the fourth Law of accommodating our selves, these precepts are conformable, Exod. 23. 4, 5. If thou meet thine enemies Oxe, or his Asse going astray, thou shalt surely bring it back to him again; if thou see the Asse of him that hateth thee lying under his burden, and wouldest forbear to help him, thou shalt surely help with him, vers. 9. Also, thou shalt not oppresse a stranger. Prov. 3. 30. Strive not with a man without a cause, if he have done thee no harme. Prov.

15. 18. A wrathfull man stirreth up strife, but he that is slow to anger, appeaseth strife. 18. 24. There is a friend that sticketh closer then a brother. The same is confirmed, Luke 10. By the Parable of the Samaritan, who had compassion on the Jew that was wounded by theeves, and by Christs precept, Matth. 5. 39. But I say unto you, that ye resist not evill, but whosoever shall smite thee on the right cheek, turn to him the other also, &c.

VIII. Among infinite other places which prove the fifth law, these are some. Matth. 6. 14. If you forgive men their trespasses, your heavenly Father will also forgive you: but if you forgive not men their trespasses, neither will your Father forgive your trespasses. Math. 18. 21. Lord how oft shall my Brother sinne against me, and I forgive him? till seven times? Jesus saith unto him, I say not till seven times, but till seventy times seven times: that is, toties quoties.

IX. For the confirmation of the sixth law, all those places are pertinent which command us to shew mercy; such as Mat. 5. 7. Blessed are the mercifull, for they shall obtain mercy. Levit. 19. 18. Thou shalt not avenge, nor bear any grudge against the children of thy people. But there are, who not onely think this law is not proved by Scripture, but plainly disproved from hence, that there is an eternall punishment reserved for the wicked after death, where there is no place either for amendment, or example. Some resolve this objection by answering, That God, whom no law restrains, refers all to his glory, but that man must not doe so; as if God sought his glory, (that is to say) pleased himselfe in the death of a sinner. It is more rightly answered, that the institution of eternall punishment was before sin, and had regard to this onely, that men might dread to commit sinne for the time to come.

X. The words of Christ prove this seventh, Matth. 5. 22. But I say unto you, That whosoever is angry with his brother without a cause, shall be in danger of the judgement, and whosoever shall say unto his Brother Racha, shall be in danger of the Counsell, but whosoever shall say, thou foole, shall be in danger of hell fire. Prov. 10. 18. Hee that uttereth a slander is a foole. Prov. 14. 21. Hee that

despiseth his neighbour, sinneth. 15. 1. Grievous words stir up anger. Prov. 22. 10. Cast out the scorner, and contention shall goe out, and reproach shall cease.

XI. The eighth law of acknowledging equality of nature, that is, of humility, is established by these places. Mat. 5. 3. Blessed are the Poor in spirit, for theirs is the Kingdom of heaven. Prov. 6. 16, 19. These six things doth the Lord hate, yea seven are an abomination unto him: A proud look, &c. Prov. 16. 5. Every one that is proud is an abomination unto the Lord, though hand joyned in hand, he shall not be unpunished. 11. 2. When pride cometh, then cometh shame, but with the lowly, is wisdom. Thus Isay 40. 3. (where the coming of the Messias is shewed forth, for preparation towards his Kingdome) The voyce of him that cryed in the wilderness, was this: Prepare ye the way of the Lord, make strait in the desert a high way for our God. Every valley shall be exalted, and every mountain, and hill, shall be made low; which doubtlesse is spoken to men, and not to mountains.

XII. But that same Equity which we proved in the ninth place to be a Law of Nature, which commands every man to allow the same Rights to others they would be allowed themselves, and which containes in it all the other Lawes besides, is the same which Moses sets down, Levit. 19. 18. Thou shalt love thy neighbour as thy self; and our Saviour calls it the summe of the morall Law, Mat. 22. 36. Master, which is the great Commandement in the Law? Jesus said unto him, Thou shalt love the Lord thy God with all thine heart, and with all thy soul, and with all thy mind; this is the first and great Commandement, and the second is like unto it, Thou shalt love thy neighbour as thy self. On these two Commandements hang all the Law and the Prophets. But to love our neighbor as our selves, is nothing else, but to grant him all we desire to have granted to our selves.

XIII. By the tenth Law respect of Persons is forbid; as also by these places following, Mat. 5. 45. That ye may be children of your Father which is in Heaven; for he maketh the sun to rise on the Evill, and on the Good, &c. Collos. 3. 11. There is neither Greek, nor Jew, circumcision, nor uncircumcision, Barbarian, or Scythian, bond, or free, but Christ is all, & in all. Acts 10. 34. of a truth, I

perceive, that God is no respecter of Persons. 2 Chron. 19. 7. There is no iniquity with the Lord our God, nor respect of Persons, nor taking of gifts. Ecclus. 35. 12. The Lord is Judge, and with him is no respect of Persons. Rom. 2. 11. For there is no respect of Persons with God.

XIV. The eleventh Law, which commands those things to be held in common which cannot be divided, I know not whether there be any expresse place in Scripture for it, or not; but the practise appears every where in the common use of Wels, Wayes, Rivers, sacred things, &c. for else men could not live.

XV. We said in the twelfth place, that it was a Law of Nature, That where things could neither be divided, nor possess'd in common, they should be dispos'd by lot, which is confirmed as by the example of Moses, who by Gods command, Numb. 34. divided the severall parts of the land of promise unto the Tribes by Lot: So Acts I. 24. by the example of the Apostles, who receiv'd Matthias, before Justus, into their number, by casting LotS, and saying, Thou Lord, who knowest the hearts of all men, shew whether of these two thou hast chosen, &c. Prov. 16. 33. The lot is cast into the lappe, but the whole disposing thereof is of the Lord. And which is the thirteenth Law, the Succession was due unto Esau, as being the First-born of Isaac, if himself had not sold it, (Gen. 25. 30.) or that the Father had not otherwise appointed.

XVI. Saint Paul writing to the Corinthians, Epist. 1. Cha. reprehends the Corinthians of that City for going to Law one with another before infidell Judges who were their enemies, calling it a fault, that they would not rather take wrong, and suffer themselves to be defrauded; for that is against that Law, whereby we are commanded to be helpful to each other. But if it happen the Controversie be concerning things necessary, what is to be done? Therefore the Apostle, Ver. 5. speaks thus, I speak to your shame. Is it so that there is not one wise man among you, no, not one that shall be able to judge between his brethren? He therefore, by those words confirms that Law of Nature which we call'd the fifteenth, to wit, Where Controversies cannot be avoided, there by the consent of Parties to appoint

some Arbiter, and him some third man; so as (which is the 16 Law) neither of the Parties may be judge in his own Cause.

XVII. But that the Judge, or Arbiter, must receive no reward for his Sentence, (which is the 17. Law) appears, Exod. 23. 8. Thou shalt take no gift; for the gift blindeth the wise, and perverteth the words of the righteous. Eccclus. 20. 29. Presents and gifts blind the eyes of the wise. Whence it followes, that he must not be more oblig'd to one part then the other, which is the 19. Law, and is also confirm'd, Deut. 1. 17. Ye shall not respect Persons in Judgment, ye shall hear the small as well as the great; and in all those places which are brought against respect of Persons.

XVIII. That in the judgement of Fact, witnesses must be had, (which is the 18. Law) the Scripture not only confirmes, but requires more then one, Deut. 17. 6. At the mouth of two witnesses, or three witnesses, shall he that is worthy of death be put to death. The same is repeated, Deut. 19. 15.

XIX. Drunkenesse, which we have therefore in the last place numbred among the breaches of the Naturall Law, because it hinders the use of right Reason, is also forbid in sacred Scripture for the same reason. Prov. 20. 1. Wine is a mocker, strong drink is raging, whosoever is deceived thereby is not wise. And Cha. 4, 5. It is not for Kings to drink wine, lest they drink, and forget the Law, and pervert the judgement of any of the afflicted: but that we might know that the malice of this vice consisted not formally in the quantity of the drink, but in that it destroyes Judgement and Reason, it followes in the next Verse, Give strong drink to him that is ready to perish, and wine to those that be heavy of heart. Let him drink, and forget his poverty, and remember his misery no more. Christ useth the same reason in prohibiting drunkenesse, Luk. 21. 34. Take heed to your selves, lest at any time your hearts be overcharg'd with surfetting and drunkenesse.

XX. That we said in the foregoing Chapter, The Law of Nature is eternall, is also prov'd out of the fifth of S. Matth. 18. Verily I say unto you, till Heaven and Earth Passe, one jot, or one tittle, shall in no wise Passe from the Law, and Psal. 119. v. 160. Every one of thy righteous judgements endureth for ever.

XXI. We also said, That the Lawes of Nature had regard chiefly unto Conscience; that is, that he is just, who by all possible endeavour strives to fulfill them. And although a man should order all his actions (so much as belongs to externall obedience) just as the Law commands, but not for the Lawes sake, but by reason of some punishment annext unto it, or out of Vain glory, yet he is unjust. Both these are proved by the Holy Scriptures. The first, Esay 55. 7. Let the wicked forsake his way, and unrighteous man his thoughts, and let him return unto the Lord, and he wil have mercy upon him, and to our God, for he will abundantly pardon. Ezek. 18. 31. Cast away from you all your transgressions whereby you have transgressed, & make you a new heart, and a new spirit; for why will you die O house of Israel? By which, and the like places, we may sufficiently understand that God will not punish their deeds whose heart is right. The second out of the 29. of Isay 13. The Lord said, Forasmuch as this people draw near me with their mouth, and with their lips doe honour me, but have removed their heart far from me, therefore I will proceed, &c. Mat. 5. 20. Except your righteousness shall exceed the righteousness of the Scribes and Pharisees ye shall in no case enter into the Kingdom of Heaven; and in the following verses our Saviour explains to them how that the commands of God are broken, not by Deeds only, but also by the Will; for the Scribes and Pharises did in outward act observe the Law most exactly, but for Glories sake onely; else they would as readily have broken it. There are innumerable places of Scripture in which is most manifestly declar'd that God accepts the Will for the Deed, and that as well in good, as in evill actions.

XXII. That the Law of Nature is easily kept, Christ himself declares in the 11. Chapter of Saint Matthew 28, 29, 30. Come unto me, &c. Take my yoke upon you, and learn of me, &c. for my yoke is easie, and my burthen light.

XXIII. Lastly, the Rule by which I said any man might know whether what he was doing, were contrary to the Law, or not, to wit, what thou wouldst not be done to, doe not that to another, is almost in the self same words delivered by our

Saviour, Mat. 7. 12. Therefore all things whatsoever ye would that men should do unto you, do you even so to them.

XXIV. As the law of nature is all of it Divine, so the Law of Christ by conversion, (which is wholly explain'd in the 5, 6, and 7. Chapter of S. Matthewes Gospell) is all of it also (except that one Commandement of not marrying her who is put away for adultery, which Christ brought for explication of the divine positive Law, against the Jewes, who did not rightly interpret the Mosaicall Law) the doctrine of Nature: I say the whole Law of Christ is explain'd in the fore-named Chapters, not the whole Doctrine of Christ; for Faith is a part of Christian Doctrine, which is not comprehended under the title of a Law; for Lawes are made, and given, in reference to such actions as follow our will, not in order to our Opinions, and, Belief which being out of our power, follow not the Will.

Chapter V: Of the causes, and first begining of civill Government

I. IT IS of it selfe manifest, that the actions of men proceed from the will, and the will from hope, and feare, insomuch as when they shall see a greater good, or lesse evill, likely to happen to them by the breach, then observation of the Lawes, they'l wittingly violate them. The hope therefore which each man hath of his security, and self-preservation, consists in this, that by force or craft he may disappoint his neighbour, either openly, or by stratagem. Whence we may understand, that the naturall lawes, though well understood, doe not instantly secure any man in their practise, and consequently, that as long as there is no caution had from the invasion of others, there remains to every man that same primitive Right of selfe-defence, by such means as either he can or will make use of (that is) a Right to all things, or the Right of warre; and it is sufficient for the fulfilling of the naturall law, that a man be prepared in mind to embrace Peace when it may be had.

II. It is an old saying, That all lawes are silent in the time of warre, and it is a true one, not onely if we speak of the civill, but also of the naturall lawes, provided they be referr'd not to the mind, but to the actions of men, by the third Chapter, Art. 29. And we mean such a war as is of all men against all men; such as is the meer state of nature; although in the warre of nation against nation a certain mean was wont to be observed. And therefore in old time there was a manner of living, and as it were a certain oeconomy, which they called leotrikon, living by Rapine, which was neither against the law of nature, (things then so standing) nor voyd of glory to those who exercised it with valour, not with cruelty. Their custome was, taking away the rest, to spare life, and abstain from Oxen fit for plough, and every instrument serviceable to husbandry, which yet is

not so to be taken, as if they were bound to doe thus by the law of nature, but that they had regard to their own glory herein, lest by too much cruelty, they might be suspected guilty of feare.

III. Since therefore the exercise of the naturall law is necessary for the preservation of Peace, and that for the exercise of the naturall law security is no lesse necessary, it is worth the considering what that is which affords such a security: for this matter nothing else can be imagined, but that each man provide himselfe of such meet helps, as the invasion of one on the other may bee rendered so dangerous, as either of them may think it better to refrain, then to meddle. But first it is plain, that the consent of two or three cannot make good such a security; because that the addition but of one, or some few on the other side, is sufficient to make the victory undoubtedly sure, and hartens the enemy to attacque us. It is therefore necessary, to the end the security sought for may be obtained, that the number of them who conspire in a mutuall assistance be so great, that the accession of some few to the enemies party may not prove to them a matter of moment sufficient to assure the victory.

IV. Farthermore, how great soever the number of them is who meet on selfe-defence, if yet they agree not among themselves of some excellent means whereby to compasse this, but every man after his own manner shall make use of his endeavours, nothing will be done; because that divided in their opinions they will be an hinderance to each other, or if they agree well enough to some one action through hope of victory, spoyle, or revenge, yet afterward through diversity of wits, and Counsels, or emulation, and envy, with which men naturally contend, they will be so torne and rent, as they will neither give mutuall help, nor desire peace, except they be constrained to it by some common feare. Whence it followes, that the consent of many, (which consists in this onely, as we have already defined in the foregoing section, that they direct all their actions to the same end, and the common good) that is to say, that the society proceeding from mutuall help onely, yeelds not that security which they seek for, who meet, and agree in the exercise of the above-named lawes of nature; but that somewhat else

must be done, that those who have once consented for the common good, to peace and mutuall help, may by fear be restrained, lest afterward they again dissent, when their private Interest shall appear discrepant from the common good.

V. Aristotle reckons among those animals which he calls Politique, not man only, but divers others; as the Ant, the Bee, &c. which though they be destitute of reason, by which they may contract, and submit to government, notwithstanding by consenting, (that is to say) ensuing, or eschewing the same things, they so direct their actions to a common end, that their meetings are not obnoxious unto any seditions. Yet is not their gathering together a civill government, and therefore those animals not to be termed politicall, because their government is onely a consent, or many wills concurring in one object, not (as is necessary in civill government) one will. It is very true that in those creatures, living only by sense and appetite, their consent of minds is so durable, as there is no need of any thing more to secure it, and (by consequence) to preserve peace among them, then barely their naturall inclination. But among men the case is otherwise. For first among them there is a contestation of honour and preferment; among beasts there is none: whence hatred and envy, out of which arise sedition and warre, is among men, among beasts no such matter. Next, the naturall appetite of Bees, and the like creatures, is conformable, and they desire the common good which among them differs not from their private; but man scarce esteems any thing good which hath not somewhat of eminence in the enjoyment, more then that which others doe possesse. Thirdly, those creatures which are voyd of reason, see no defect, or think they see none, in the administration of their Common-weales; but in a multitude of men there are many who supposing themselves wiser then others, endeavour to innovate, and divers Innovators innovate divers wayes, which is a meer distraction, and civill warre. Fourthly, these brute creatures, howsoever they may have the use of their voyce to signify their affections to each other, yet want they that same art of words which is necessarily required to those motions in the mind, whereby good is represented to it as being better, and evill as worse then in truth it is; But the tongue of man is a trumpet of warre, and sedition; and it is

reported of Pericles, that he sometimes by his elegant speeches thundered, and lightened, and confounded whole Greece it selfe. Fiftly, they cannot distinguish between injury and harme; Thence it happens that as long as it is well with them, they blame not their fellowes: But those men are of most trouble to the Republique, who have most leasure to be idle; for they use not to contend for publique places before they have gotten the victory over hunger, and cold. Last of all, the consent of those brutall creatures is naturall, that of men by compact onely, (that is to say) artificiall; it is therefore no matter of wonder if somewhat more be needfull for men to the end they may live in peace. Wherefore consent, or contracted society, without some common power whereby particular men may be ruled through feare of punishment, doth not suffice to make up that security which is requisite to the exercise of naturall justice.

VI. Since therefore the conspiring of many wills to the same end doth not suffice to preserve peace, and to make a lasting defence, it is requisite that in those necessary matters which concern Peace and selfe-defence, there be but one will of all men. But this cannot be done, unlesse every man will so subject his will to some other one, to wit, either Man or Counsell, that whatsoever his will is in those things which are necessary to the common peace, it be received for the wills of all men in generall, and of every one in particular. Now the gathering together of many men who deliberate of what is to be done, or not to be done, for the common good of all men, is that which I call a COUNSELL.

VII. This submission of the wils of all those men to the will of one man, or one Counsell, is then made, when each one of them obligeth himself by contract to every one of the rest, not to resist the will of that one man, or counsell, to which he hath submitted himselfe; that is, that he refuse him not the use of his wealth, and strength, against any others whatsoever (for he is supposed still to retain a Right of defending himselfe against violence) and this is called UNION. But we understand that to be the will of the counsell, which is the will of the major part of those men of whom the Counsell consists.

VIII. But though the will it self be not voluntary, but only the beginning of voluntary actions (for we will not to will, but to act) and therefore falls least of all under deliberation, and compact; yet he who submits his will to the will of an other, conveighs to that other the Right of his strength, and faculties; insomuch as when the rest have done the same, he to whom they have submitted hath so much power, as by the terrour of it hee can conforme the wills of particular men unto unity, and concord.

IX. Now union thus made is called a City, or civill society, and also a civill Person; for when there is one will of all men, it is to be esteemed for one Person, and by the word (one) it is to be knowne, and distinguished from all particular men, as having its own Rights and properties; insomuch as neither any one Citizen, nor all of them together (if we except him whose will stands for the will of all) is to be accounted the City. A CITY therefore (that we may define it) is one Person, whose will, by the compact of many men, is to be received for the will of them all; so as he may use all the power and faculties of each particular person, to the maintenance of peace, and for common defence.

X. But although every City be a civill Person, yet every civill Person is not a City; for it may happen that many Citizens, by the permission of the City, may joyne together in one Person, for the doing of certain things. These now will be civill Persons, as the companies of Merchants, and many other Convents; but Cities they are not, because they have not submitted themselves to the will of the company simply, and in all things, but in certain things onely determined by the City; and on such termes as it is lawfull for any one of them to contend in judgement against the body it selfe of the sodality; which is by no means allowable to a Citizen against the City; such like societies therefore are civill Persons subordinate to the City.

XI. In every city, That Man, or Counsell, to whose will each particular man hath subjected his will (so as hath been declared) is said to have the SUPREME POWER, or CHIEFE COMMAND, or DOMINION; which Power, and Right of commanding, consists in this, that each Citizen hath conveighed all his strength

and power to that man, or Counsell; which to have done (because no man can transferre his power in a naturall manner) is nothing else then to have parted with his Right of resisting. Each Citizen, as also every subordinate civill Person, is called the SUBJECT of him who hath the chiefe command.

XII. By what hath been sayed, it is sufficiently shewed, in what manner, and by what degrees many naturall Persons, through desire of preserving themselves, and by mutuall feare, have growne together into a civill Person, whom we have called a City. But they who submit themselves to another for feare, either submit to him whom they feare, or some other whom they confide in for protection; They act according to the first manner who are vanquished in warre, that they may not be slain; they according to the second, who are not yet overcome, that they may not be overcome. The first manner receives its beginning from naturall Power, and may be called the naturall beginning of a City; the latter from the Counsell, and constitution of those who meet together, which is a beginning by institution. Hence it is, that there are two kinds of Cities, the one naturall, such as is the paternall, and despoticall; the other institutive, which may be also called politicall. In the first the Lord acquires to himselfe such Citizens as he will; in the other the Citizens by their own wills appoint a Lord over themselves, whether he be one man, or one company of men endued with the command in chiefe. But we will speak in the first place of a City politicall or by institution, and next of a City naturall.

Chapter VI: Of the right of him, whether Counsell, or one Man onely, who hath the supreme power in the City

I. WE MUST consider first of all what a multitude* of men (gathering themselves of their owne free wills into society) is, namely, that it is not any one body, but many men, whereof each one hath his owne will, and his peculiar judgment concerning all things that may be propos'd. And though by particular Contracts each single man may have his own Right, and Propriety, so as one may say This is mine, the other, That is his; yet will there not be any thing of which the whole multitude, as a Person distinct from a single man, can rightly say, This is mine, more then anothers. Neither must we ascribe any action to the multitude, as it's one, but (if all, or more of them doe agree) it will not be an Action, but as many actions, as Men. For although in some great Sedition, it's commonly said, That the People of that City have taken up Armes; yet is it true of those onely who are in Armes, or who consent to them. For the City, which is one Person, cannot take up Armes against it selfe. Whatsoever therefore is done by the multitude, must be understood to be done by every one of those by whom it is made up; and that he, who being in the Multitude, and yet consented not, nor gave any helps to the things that were done by it, must be judg'd to have done nothing. Besides, in a multitude not yet reduc'd into one Person, in that manner as hath been said, there remaines that same state of nature in which all things belong to all men and there is no place for Meum & Tuum, which is call'd Dominion, and Propriety, by reason that that security is not yet extant which we have declar'd above to be necessarily requisite for the practise of the Naturall Laws.

[Multitude, &c.] The Doctrine of the Power of a City over it's Citizens, almost wholly depends on the understanding of the difference which is between a multitude of men ruling, and a multitude ruled: For such is the nature of a City,

That a multitude, or company of Citizens, not onely may have command, but may also be subject to command, but in diverse senses; which difference I did beleieve was clearly enough explained in this first Article,, but by the objections of many against those things which follow, I discern otherwise; wherefore it seemed good to me, to the end I might make a fuller explication, to adde these few things. By Multitude, because it is a collective word, we understand more then one, so as a multitude of men is the same with many men; The same word, because it is of the singular number, signifies one thing, namely, one multitude; but in neither sense can a multitude be understood to have one will given to it by nature, but to either a severall; and therefore neither is any one action whatsoever to be attributed to it: therefore a Multitude cannot promise, contract, acquire Right, convey Right, act, have, Possesse, and the like, unlesse it be every one apart, and Man by Man; so as there must be as many promises, compacts, rights, and actions, as Men. therefore a Multitude is no naturall Person; but if the same Multitude doe Contract one with another, that the will of one man, or the agreeing wills of the major part of them, shall be received for the will of all, then it becomes one Person; for it is endu'd with a will, and therefore can doe voluntary actions, such as are Commanding, making Lawes, acquiring and transferring of Right, and so forth; and it is oftner call'd the People, then the Multitude. We must therefore distinguish thus. then we say the People, or Multitude, wills, commands, or doth any thing, it is understood that the City which Commands, tills and Acts by the will of one, or the concurring wills of more, which cannot be done, but in an Assembly; But as oft as any thing is said to be done by a Multitude of Men, whether great, or small, without the will of that man, or assembly of men, that's understood to be done by a subjected People, that is, by many single Citizens together, and not proceeding from one till, but from diverse wills of diverse men, who are Citizens, and Subjects, but not a City.

II. Next, we must consider that every one of the Multitude (by whose meanes there may be a beginning to make up the City) must agree with the rest, that in those matters which shall be propounded by any one in the Assembly, that be

received for the will of all which the major part shall approve of; for otherwise there will be no will at all of a Multitude of Men, whose Wills and Votes differ so variously. Now if any one will not consent, the rest notwithstanding shall among themselves constitute the City without him: Whence it will come to passe, that the City retaines its primitive Right against the Dissentour, that is, the Right of war, as against an Enemy.

III. But because we said in the foregoing Chapter, the sixth Article, That there was requir'd to the security of men, not onely their Consent, but also the Subjection of their wills in such things as were necessary to Peace and Defence; and that in that Union, and Subjection, the nature of a City consisted; We must discern now in this place, out of those things which may be propounded, discuss'd, and stated in an Assembly of men, (all whose wills are contain'd in the will of the major part) what things are necessary to Peace, and common defence: But first of all, it is necessary to Peace, that a man be so farre forth protected against the violence of others, that he may live securely, that is, that he may have no just cause to fear others, so long as he doth them no injury. Indeed, to make men altogether safe from mutuall harmes, so as they cannot be hurt, or injuriously kill'd, is impossible, and therefore comes not within deliberation. But care may be had there be no just cause of fear; for security is the end wherefore men submit themselves to others, which if it be not had, no man is suppos'd to have submitted himselfe to ought, or to have quitted his Right to all things, before that there was a care had of his security.

IV. It is not enough to obtain this security, that every one of those who are now growing up into a City, doe covenant with the rest, either by words, or writing, Not to steal, not to kill, and to observe the like Lawes; for the pravity of humane disposition is manifest to all, and by experience too well known how little (removing the punishment) men are kept to their duties, through conscience of their promises. We must therefore provide for our security, not by Compacts, but by Punishments; and there is then sufficient provision made, when there are so great punishments appointed for every injury, as apparently it prove a greater evill

to have done it, then not to have done it: for all men, by a necessity of nature, chuse that which to them appears to be the lesse evill.

V. Now the right of punishing is then understood to be given to any one, when every man Contracts not to assist him who is to be punished. But I will call this Right, The Sword of Justice. But these kind of contracts men observe well enough, for the most part, till either themselves, or their near friends are to suffer.

VI. Because therefore for the security of particular men, and, by consequence for the common peace, it is necessary that the right of using the Sword for punishment, be transferred to some Man or Counsell, that Man or Counsell is necessarily understood by Right to have the supreme Power in the City. For he that by Right punisheth at his own discretion, by Right compells all men to all things which he himselfe wills; then which a greater command cannot be imagined.

VII. But in vain doe they worship peace at home, who cannot defend themselves against forrainers; neither is it possible for them to protect themselves against forrainers, whose forces are not united; and therefore it is necessary for the preservation of particulars, that there be some one Counsell, or one man, who hath the Right to arm, to gather together, to unite so many Citizens in all dangers, and on all occasions, as shall be needfull for common defence against the certain number, and strength of the enemy; and again, (as often as he shall finde it expedient) to make peace with them. We must understand therefore, that particular Citizens have conveyed their whole Right of Warre, and Peace, unto some one Man or Counsell; And that this right (which we may call the Sword of Warre) belongs to the same Man, or Counsell, to whom the Sword of Justice belongs; for no Man can by Right compell Citizens to take up armes, and be at the expences of Warre, but he who by Right can punish him who doth not obey. Both Swords therefore, as well this of War, as that of Justice, even by the constitution it selfe of a City, and essentially, doe belong to the chiefe command.

VIII. But because the right of the Sword is nothing else but to have power by right to use the sword at his own will, it followes, that the judgement of its right

use pertaines to the same party: for if the Power of judging were in one, and the power of executing in another, nothing would be done. For in vain would he give judgement, who could not execute his commands; or if he executed them by the power of another, he himselfe is not said to have the Power of the Sword, but that other, to whom he is onely an Officer. All judgement therefore in a City belongs to him who hath the swords, (i.e.) to him, who hath the supreme authority.

IX. Furthermore, since it no lesse, nay it much more conduceth to Peace to prevent brawles from arising, then to appease them being risen; and that all controversies are bred from hence, that the opinions of men differ concerning Meum & Tuum, just and unjust, profitable and unprofitable, good and evill, honest and dishonest, and the like, which every man esteems according to his own judgement; it belongs to the same chiefe power to make some common Rules for all men, and to declare them publicquely, by which every man may know what may be called his, what anothers, what just, what unjust, what honest, what dishonest, what good, what evill, that is summarily, what is to be done, what to be avoyded in our common course of life. But those Rules and measures are usually called the civill Lawes, or the Lawes of the City, as being the Commands of him who hath the supreme power in the City. And the CIVILL LAWES (that we may define them) are nothing else but the commands of him who hath the chiefe authority in the City, for direction of the future actions of his Citizens.

X. Furthermore, since the affaires of the City, both those of Warre, and Peace, cannot possibly be all administred by one man, or one Counsell, without Officers and subordinate Magistrates, and that it appertains to Peace, and common defence, that they to whom it belongs justly to judge of controversies, to search into neighbouring counsels, prudently to wage war, and on all hands warily to attend the benefit of the City, should also rightly exercise their offices; it is consonant to reason, that they depend on, and be chosen by him who hath the chiefe command both in War, and in Peace.

XI. It is also manifest, that all voluntary actions have their beginning from, and necessarily depend on the will, and that the will of doing, or omitting ought,

depends on the opinion of the good and evill of the reward, or punishment, which a man conceives he shall receive by the act, or omission; so as the actions of all men are ruled by the opinions of each; wherefore by evident and necessary inference, we may understand that it very much concerns the interest of Peace, that no opinions or doctrines be delivered to Citizens, by which they may imagine, that either by Right they may not obey the Lawes of the City, that is, the commands of that man, or Counsell, to whom the supreme power is committed, or that it is lawfull for to resist him, or that a lesse punishment remaines for him that denies, then him that yeelds obedience. For if one command somewhat to be done under penalty of naturall death, another forbids it under pain of eternall death, and both by their own Right, it will follow that the Citizens, although innocent, are not onely by Right punishable, but that the City it selfe is altogether dissolved; for no man can serve two Masters: nor is he lesse, but rather more, a Master, whom we believe we are to obey for feare of damnation, then he whom we obey for feare of temporall death. It followes therefore, that this one, whether Man, or Court, to whom the City hath committed the supreme Power, have also this Right, That he both judge what opinions* and doctrines are enemies unto peace, and also that he forbid them to be taught.

[Judge what opinions, & c.] There is scarce any Principle, neither in the worship of God, nor humane sciences, from whence there may not spring dissentions, discords, reproaches, and by degrees war it selfe; neither doth this happen by reason of the falshood of the Principle, but of the disposition of men, who seeming wise to themselves, will needs appear such to all others: But though such dissentions cannot be hindered from arising, yet may they be restrained by the exercise of the supreme Power, that they Prove no hinderance to the publique peace. of these kind of opinions therefore I have not spoken of in this place. There are certain doctrines wherewith Subjects being tainted, they verily believe that obedience may be refused to the City, and that by Right they may, nay ought, to oppose, and fight against chiefe Princes, and dignities. Such are those, which

whether directly, and openly, or more obscurely, and by consequence require obedience to be given to others beside them to whom the supreme authority is committed. I deny not, but this reflects on that Power which many living under other government, ascribe to the chiefe head of the Church of Rome, and also on that, which elsewhere out of that Church, Bishops require in theirs, to be given to them; and last of all, on that liberty which the lower sort of Citizens under pretence of Religion doe challenge to themselves; for what civill war was there ever in the Christian world, which did not either grow from, or was nourisht by this Root? The judgement therefore of doctrines, whether they be repugnant to civill obedience or not, and if they be repugnant, the Power of prohibiting them to be taught, I doe here attribute to the civill authority; for since there is no man who grants not to the City the judgement of those things which belong to its Peace, and defence, and it is manifest, that the opinions which I have already recited do relate to its Peace, it followes necessarily, that the examination of those opinions, whether they be such, or not, must be referred to the City, that is, to him who hath the supreme authority.

XII. Last of all, from this consideration, that each Citizen hath submitted his Will to his who hath the Supreme Command in the City, so as he may not employ his strength against him; it followes manifestly, that whatsoever shall be done by him who commands, must not be punisht; for as he who hath not power enough, cannot punish him naturally; so neither can he punish him by Right, who by Right hath not sufficient power.

XIII. It is most manifest by what hath been said, That in every perfect City (that is, where no Citizen hath Right to use his faculties, at his owne discretion, for the preservation of himselfe, or where the Right of the private Sword is excluded) there is a Supreme Power in some one, greater then which cannot by Right be conferr'd by men, or greater then which no mortall man can have over himself. But that power, greater then which cannot by men, be convey'd on a man, we call ABSOLUTE*: for whosoever hath so submitted his will to the will

of the City, That he can, unpunisht, doe any thing, make Lawes, judge Controversies, set Penalties, make use, at his own pleasure, of the strength, and wealth of men, and all this by Right, truly he hath given him the greatest dominion that can be granted. This same may be confirm'd by experience in all the Cities which are, or ever have beene; for though it be sometimes in doubt, what Man, or Counsell, hath the Chief Command, yet ever there is such a Command, and alwayes exercis'd, except in the time of Sedition, and Civill War, and then there are two Chiefe Commands made out of one: Now those seditious persons who dispute against absolute Authority, doe not so much care to destroy it, as to conveigh it on others; for removing this power, they together take away Civill Society, and a confusion of all things returnes. There is so much obedience joyn'd to this absolute Right of the Chief Ruler, as is necessarily requir'd for the Government of the City, that is to say, so much as that Right of his may not be granted in vaine. Now this kind of obedience, although for some reasons it may sometimes, by Right, be deny'd, yet because a greater cannot be perform'd, we will call it SIMPLE. But the obligation to performe this growes not immediately from that Contract by which we have conveigh'd all our Right on the City, but mediately from hence, That, without obedience, the Cities Right would be frustrate, and by consequence there would be no City constituted. For it is one thing if I say, I give you Right to Command what you will; another, if I say, I will doe whatsoever you Command; and the Command may be such, as I would rather die then doe it; forasmuch therefore as no man can be bound to will being kill'd, much lesse is he tyed to that, which to him is worse then death: if therefore I be commanded to kill my self, I am not bound to doe it; for though I deny to doe it, yet the Right of dominion is not frustrated, since others may be found, who being commanded, will not refuse to doe it; neither doe I refuse to doe that which I have contracted to doe. In like manner, if the Chief Ruler command any man to kill him, he is not tyed to doe it, because it cannot be conceiv'd that he made any such Covenant; nor if he command to execute a Parent, whether he be innocent, or guilty, and condemned by the Law, since there are others, who, being

commanded, will doe that, and a Son will rather die, then live infamous, and hated of all the world. There are many other cases, in which, since the Commands are shamefull to be done by some, and not by others, Obedience may, by Right, be perform'd by these, and refus'd by those; and this, without breach of that absolute Right which was given to the Chief Ruler. For in no case is the Right taken away from him, of slaying those who shall refuse to obey him. But they who thus kill men, although by Right given them from him that hath it, yet if they use that Right otherwise then right Reason requires, they sin against the Lawes of Nature, (that is) against God.

[Absolute] A popular state openly challengeth absolute dominion, and the Citizens oppose it not, for in the gathering together of many men, they acknowledge the face of a City; and even the unskilfull understand, that matters there are rul'd by Counsell. Yet monarchy is no lesse a City, then Democracy, and absolute Kings have their Counsellours, from whom they will take advice, and suffer their Power, in matters of greater consequence, to be guided, but not recall'd. But it appears not to most men how a City is contain'd in the person of a King; and therefore they object against Absolute Command: First, that if any man had such a Right, the condition of the Citizens would be miserable: For thus they think, he will take all, spoil all, kill all; and every man counts it his onely happinesse that he is not already spoil'd and kill'd. But why should he doe thus? not because he can; for unlesse he have a mind to it, he will not doe it. till he, to please one, or some few, spoil all the rest? First, though by Right, that is, without injury to them, he may doe it, yet can he not doe it justly, that is, without breach of the Naturall Lawes, and injury against God. And therefore there is some security for Subjects in the Oaths which princes take. Next, if he could justly doe it, or that he made no account of his Oath, yet appeares there no reason why he should desire it, since he findes no good in it. But it cannot be deny'd but a prince may sometimes have an inclination to doe wickedly; but grant then that thou hadst given him a power which were not absolute, but so much onely as suffic'd

to defend thee from the injuries of others, which, if thou wilt be safe, is necessary for thee to give; are not all the same things to be feared? for he that hath strength enough to protect all, wants not sufficiency to oppresse all. Here is no other difficulty then, but that humane affaires cannot be without some inconvenience. And this inconvenience it self is in the Citizens, not in the Government; for if men could rule themselves, every man by his own command, that's to say, could they live according to the Lawes of Nature, there would be no need at all of a City, nor of a common coercive power. Secondly, they object, That there is no Dominion in the Christian world Absolute; which indeed is not true, for all Monarchies, and all other States, are so; for although they, who have the chief Command, doe not all those things they would, and what they know profitable to the City, the reason of that is not the defect of Right in them, but the consideration of their Citizens, who busied about their private interest, and carelesse of what tends to the publique, cannot sometimes be drawn to performe their duties without the hazard of the City. therefore princes sometimes forbear the exercise of their Right, and prudently remit somewhat of the act, but nothing of their Right.

XIV. Neither can any man give somewhat to himselfe; for he is already suppos'd to have what he can give himself; nor can he be oblig'd to himselfe, for the same party being both the obliged, and the Obliger, and the Obliger having power to release the obliged, it were meerly in vain for a man to be obliged to himselfe, because he can release himself at his own pleasure; and he that can doe this, is already actually free. Whence its plaine, that the City is not tyed to the Civill Lawes; for the Civill Lawes are the Lawes of the City, by which, if she were engag'd, she should be engag'd to her selfe. Neither can the City be oblig'd to her Citizen, because, if he will, he can free her from her obligation; and he will, as oft as she wills, (for the will of every Citizen is in all things comprehended in the will of the City); the City therefore is free when she pleaseth, that is, she is now actually free; but the will of a Councill, or one who hath the Supreme Authority given him, is the will of the City; he therefore containes the wills of all

particular Citizens: Therefore neither is he bound to the Civill Lawes (for this is to be bound to himself) nor to any of his Citizens.

XV. Now because (as hath been shewn above) before the constitution of a City all things belong'd to all men, nor is there that thing which any man can so call his, as any other may not, by the same Right, claime as his own, (for where all things are common, there can be nothing proper to any man) it followes, that propriety receiv'd its beginning* when Cities receiv'd theirs, and that that onely is proper to each man which he can keep by the Lawes, and the power of the whole City, (that is) of him on whom its chief command is conferr'd. Whence we understand, that each particular Citizen hath a propriety, to which none of his fellow-Citizens hath Right, because they are tyed to the same Lawes; but he hath no propriety in which the Chief Ruler (whose Commands are the Lawes, whose will contains the will of each man, and who, by every single person, is constituted the Supreme Judge) hath not a Right. But although there be many things which the City permits to its Citizens, and therefore they may sometimes goe to Law against their Chief; yet is not that action belonging to Civill Right, but to Naturall Equity; neither is it concerning what by Right he may doe* * who hath the Supreme power, but what he hath been willing should be done, and therefore he shall be judge himself, as though (the equity of the cause being well understood) he could not give wrong judgment.

- [Propriety receiv'd its beginning, &c.] What's objected by some, That the propriety of goods, even before the constitution of Cities, was found in Fathers of Families, that objection is vaine, because I have already declar'd, That a Family is a little City. For the Sonnes of a Family have a propriety of their goods granted them by their Father, distinguisht indeed from the rest of the Sons of the same Family, but not from the propriety of the Father himself; but the Fathers of diverse Families, who are subject neither to any common Father, nor Lord, have a common Right in all things.

- [What by Right he may doe, &c.] As often as a Citizen is granted to have an action of Law against the Supreme, i.e. against the City, the question is not in that action, whether the City may, by Right, keep possession of the thing in controversie, but whether by the Lawes formerly made she would keep it; for the Law is the declared will of the Supreme: since then the City may raise money from the Citizens under two Titles, either as Tribute, or as Debt, in the former case there is no action of Law allowed; for there can be no question whether the City have Right to require Tribute: in the latter it is allowed, because the City will take nothing from its Citizens by fraud, or cunning, and yet if need require, all they have, openly; and therefore he that condemnes this place, saying, That by this doctrine it is easie for princes to free themselves from their Debts, he does it impertinently.

XVI. Theft, further, AduLtery, and all injuries are forbid by the Lawes of nature; but what is to be called Theft, what further, what Adultery, what injury in a Citizen, this is not to be determined by the naturall, but by the civill Law: for not every taking away of the thing which another possesseth, but onely another mans goods is theft; but what is ours, and what anothers, is a question belonging to the civill Law. In like manner, not every killing of a man is further, but onely that which the civill Law forbids; neither is all encounter with women Adultery, but onely that which the civill Law prohibits. Lastly, all breach of promise is an injury, where the promise it selfe is lawfull, but where there is no Right to make any compact, there can be no conveyance of it, and therefore there can no injury follow, as hath been said in the second Chapter, Artic. 17. Now what we may contract for, and what not, depends wholly upon the civill Lawes. The City of Lacedaemon therefore rightly ordered that those young men who could so take away certain goods from others as not to be caught, should goe unpunisht; for it was nothing else, but to make a Law that what was so acquired should be their

own, and not anothers. Rightly also is that man every where slain, whom we kill in warre, or by the necessity of selfe-defence. So also that copulation which in one City is Matrimony, in another will be judged Adultery. Also those contracts which make up Marriage in one Citizen, doe not so in another, although of the same City. because that he who is forbidden by the City (that is by that one man, or Councell, whose the supreme power is) to contract ought, hath no Right to make any contract, and therefore having made any, it is not valid, and by consequence, no Marriage. But his contract which received no prohibition, was therefore of force, and so was Matrimony: neither addes it any force to any unlawfull contracts, that they were made by an Oath, or Sacrament*, for those adde nothing to the strengthning of the contract, as hath been said above Cha. Artic. 22. What therefore Theft, what Murther, what Adultery, and in generall what injury is, must be known by the civill Lawes, that is, the commands of him who hath the supreme authority.

- [That they were made by an Oath or Sacrament, &c.] Whether Matrimony bee a Sacrament (in which sense that word is used by some Divines) or not, it is not my purpose to dispute: Onely I say, that the legitimate contract of a man and woman to live together, i.e. granted by the civill Law, whether it be a Sacrament, or not, is surely a legitimate Marriage; but that copulation which the City hath prohibited is no marriage, since it is of t he essence of Marriage to be a legitimate contract. There were legitimate marriages in many places, as among the Jewes, the Grecians, the Romans, which yet might be dissolved. But with those who permit no such contracts, but by a Law that they shall never be broke, Wedlock cannot be dissolved; and the reason is, because the City hath commanded it to be indissoluble, not because Matrimony is a Sacrament. Wherefore the ceremonies which at weddings are to be performed in the Temple, to blesse, or (if I may say so) to consecrate the husband and wife, will perhaps belong only to the office of Clergy-men; all the rest, namely

who, when, and by what contracts Marriages may be made, pertains to the Lawes of the City.

XVII. This same supreme command, and absolute power, seems so harsh to the greatest part of men, as they hate the very naming of them; which happens chiefly through want of knowledge, what humane nature, and the civill Lawes are, and partly also through their default, who when they are invested with so great authority, abuse their power to their own lust. That they may therefore avoyd this kind of supreme authority, some of them will have a City well enough constituted, if they who shall be the Citizens convening, doe agree concerning certaine Articles propounded, and in that convent agitated and approved; and doe command them to be observed, and punishments prescribed to be inflicted on them who shall break them: to which purpose, and also to the repelling of a forraign enemy, they appoint a certain and limited return, with this condition, that if that suffice not, they may call a new convention of estates. Who sees not in a City thus constituted, that the Assembly who prescribed those things had an absolute power? If therefore the assembly continue, or from time to time have a certain day, and place of meeting, that power will be perpetuall. But if they wholly dissolve, either the City dissolves with them, and so all is returned to the state of War, or else there is somewhere a power left to punish those who shall transgresse the Lawes, whosoever, or how many soever they be that have it, which cannot possibly be without an absolute power: for he that by right hath this might given, by punishments to restrain what Citizens he pleaseth, hath such a power, as a greater cannot possibly be given by any Citizens.

XVIII. It is therefore manifest, that in every City there is some one man, or Councell, or Court, who by Right hath as great a power over each single Citizen, as each man hath over himselfe considered out of that civill state, that is, supreme and absolute, to be limited onely by the strength and forces of the City it selfe, and by nothing else in the world: for if his power were limited, that limitation must necessarily proceed from some greater power; For he that prescribes limits, must have a greater power then he who is confin'd by them; now that confining

power is either without limit, or is again restrained by some other greater then it selfe, and so we shall at length arrive to a power which hath no other limit, but that which is the terminus ultimus of the forces of all the Citizens together. That same is called the supreme command, and if it bee committed to a councell, a supreme councell, but if to one man, the supreme Lord of the City. Now the notes of supreme command are these, To make and abrogate Lawes. To determine War and peace, to know, and judge of all controversies, either by himselfe, or by Judges appointed by him; to elect all Magistrates; Ministers, and Counsellors. Lastly, if there be any man who by Right can doe some one action which is not lawfull for any Citizen or Citizens to doe beside himselfe, that man hath obtained the supreme power: For those things which by Right may not be done by any one or many Citizens, the City it selfe can onely doe: He therefore that doth those things useth the Cities Right, which is the supreme power.

XIX. They who compare a City and its Citizens, with a man and his members, almost all say, that he who hath the supreme power in the City, is in relation to the whole City, such as the head is to the whole man; But it appeares by what hath been already said, that he who is endued with such a power, (whether it be a man, or a Court) hath a relation to the City, not as that of the head, but of the soule to the body. For it is the soule by which a man hath a will, that is, can either will, or nill; so by him who hath the supreme power, and no otherwise, the City hath a will, and can either will or nill. A Court of Counsellors is rather to be compared with the head, or one Counsellor, whose only Counsell (if of any one alone) the chief Ruler makes use of in matters of greatest moment: for the office of the head is to counsell, as the soules is to command.

XX. Forasmuch as the supreme command is constituted by vertue of the compacts which each single Citizen, or subject, mutually makes with the other. but all contracts, as they receive their force from the contractors, so by their consent they lose it again, and are broken; perhaps some may inferre hence, that by the consent of all the subjects together, the supreme authority may be wholly taken away. Which inference if it were true, I cannot discern what danger would

thence by Right arise to the supreme Commanders. For since it is supposed, that each one hath obliged himselfe to each other, if any one of them shall refuse, whatsoever the rest shall agree to doe, he is bound notwithstanding; neither can any man without injury to me, doe that which by contract made with me, he hath obliged himselfe not to doe. But it is not to be imagined that ever it will happen, that all the subjects together, not so much as one excepted, will combine against the supreme power; wherefore there is no feare for Rulers in chiefe, that by any Right they can be despoyled of their authority. If notwithstanding it were granted, that their Right depended onely on that contract which each man makes with his fellow-citizen, it might very easily happen, that they might be robbed of that Dominion under pretence of Right; for subjects being called either by the command of the City, or seditiously flocking together, most men think that the consents of all are contained in the votes of the greater part. Which in truth is false; for it is not from nature that the consent of the major part should be received for the consent of all, neither is it true in tumults, but it proceeds from civill institution, and is then onely true, when that Man or Court which hath the supreme power, assembling his subjects, by reason of the greatnesse of their number, allows those that are elected a power of speaking for those who elected them, and will have the major part of voyces, in such matters as are by him propounded to be discust, to be as effectuall as the whole. But we cannot imagine that he who is chiefe, ever convened his subjects with intention that they should dispute his Right, unlesse, weary of the burthen of his charge, he declared in plain termes, that he renounces and abandons his government. Now because most men through ignorance esteem not the consent of the major part of Citizens only, but even of a very few, provided they be of their opinion, for the consent of the whole City, it may very well seem to them, that the supreme authority may by right be abrogated, so it be done in some great Assembly of Citizens by the votes of the greater number; But though a government be constituted by the contracts of particular men with particulars, yet its Right depends not on that obligation onely; there is another tye also toward him who commands; for each Citizen compacting

with his fellow, sayes thus, I conveigh my Right on this party, upon condition, that you passe yours to the same; by which means, that Right which every man had before to use his faculties to his own advantage, is now wholly translated on some certain man, or Councell, for the common benefit; wherefore what by the mutuall contracts each one hath made with the other, what by the donation of Right which every man is bound to ratifie to him that commands, the government is upheld by a double obligation from the Citizens, first that which is due to their fellow citizens, next that which they owe to their prince. Wherefore no subjects how many soever they be, can with any Right despoyle him who bears the chiefe Rule, of his authority, even without his own consent.

Chapter VII: Of the three kindes of Government, Democracy, Aristocracy, Monarchie

I. WE HAVE already spoken of a City by institution in its Genus; we will now say somewhat of its species. As for the difference of Cities, it is taken from the difference of the Persons, to whom the Supreme Power is committed; this Power is committed either to one Man, or Councell, or some one Court consisting of many men. Furthermore, a Councell of many men, consists either of all the Citizens, (insomuch as every man of them hath a Right to Vote, and an interest in the ordering of the greatest affaires, if he will himselfe) or of a part onely; from whence there arise three sorts of Government: The one, when the Power is in a Councell, where every Citizen hath a right to Vote, and it is call'd a DEMOCRATY. The other, when it is in a Councell, where not all, but some part onely have their suffrages, and we call it an ARISTOCRATY. The third is that, when the Supreme Authority rests onely in one, and it is stiled a MONARCHY. In the first, he that governes is called demos, The PEOPLE. In the second, the NOBLES. In the third, the MONARCH.

II. Now, although Ancient Writers of Politiques have introduc'd three other kindes of Government opposite to these, to wit, Anarchy or confusion to Democracy, Oligarchy, that is, the command of some few, to Aristocracy, and Tyranny to Monarchy, yet are not these three distinct formes of Government, but three diverse Titles given by those who were either displeas'd with that present Government, or those that bare Rule. For men, by giving names, doe usually, not onely signifie the things themselves, but also their own affections, as love, hatred, anger, and the like, whence it happens that what one man calls a Democracy, another calls an Anarchy; what one counts an Aristocracy, another esteemes an Oligarchie. and whom one titles a King, another stiles him a Tyrant; so as we see

these names betoken not a diverse kinde of Government, but the diverse opinions of the Subjects concerning him who hath the Supreme Power. For first, who sees not that Anarchy is equally opposite to all the forenam'd Formes? For that word signifies that there is no Government at all, that is, not any City. But how is it possible that no City should be the species of a City? Farthermore, what difference is there between an Oligarchie, which signifies the Command of a few, or Grandees, or an Aristocracy, which is that of the Prime, or Chief Heads, more then that men differ so among themselves, that the same things seeme not good to all men? Whence it happens, that those persons, who by some are look'd on as the best, are by others esteem'd to be the worst of all men.

III. But men, by reason of their passions, will very hardly be perswaded that a Kingdome, and Tyranny, are not diverse kindes of Cities, who though they would rather have the City subject to one, then many, yet doe they not beleieve it to be well govern'd unlesse it accord with their judgements: But we must discover by Reason, and not by Passion, what the difference is between a King, and a Tyrant: but first, they differ not in this, That a Tyrant hath the greater Power, for greater then the Supreme cannot be granted; nor in this, That one hath a limited power, the other not; for he, whose authority is limited, is no King, but his Subject that limits him. Lastly, neither differ they in their manner of acquisition; for if in a Democraticall, or Aristocraticall Government some one Citizen should, by force, possesse himself of the Supreme Power, if he gain the consent of all the Citizens, he becomes a legitimate Monarch; if not, he is an Enemy, not a Tyrant. They differ therefore in the sole exercise of their command, insomuch as he is said to be a King, who governs wel, and he a Tyrant that doth otherwise. The case therefore is brought to this passe, That a King legitimately constituted in his Government, if he seeme to his Subjects to Rule well, and to their liking, they afford him the appellation of a King, if not, they count him a Tyrant. Wherefore we see a Kingdome, and Tyranny, are not diverse Formes of Government, but one and the self-same Monarch hath the name of a King given him in point of Honour, and Reverence to him, and of a Tyrant in way of contumely, and reproach. But

what we frequently finde in bookes said against Tyrants, took its originall from Greek, and Roman Writers, whose Government was partly Democraticall, and partly Aristocraticall, and therefore not Tyrants onely, but even Kings were odious to them.

IV. There are, who indeed doe think it necessary, That a Supreme Command should be somewhere extant in a, City. but if it should be in any one, either Man, or Councell, it would follow (they say) that all the Citizens must be slaves. Avoiding this condition, they imagine that there may be a certaine Form of Government compounded of those three kinds we have spoken of, yet different from each particular, which they call a mixt Monarchie, or mixt Aristocracy, or mixt Democracy, according as any one of these three sorts shall be more eminent then the rest: For example, if the naming of Magistrates, and the arbitration of War, and Peace, should belong to the King, Judicature to the Lords, and contribution of Monies to the People, and the power of making Lawes too altogether, this kind of State would they call a mixt Monarchie forsooth. But if it were possible that there could be such a State, it would no whit advantage the liberty of the subject; for as long as they all agree, each single Citizen is as much subject as possibly he can be; but if they disagree, the State returns to a Civill War, and the Right of the private Sword, which certainly is much worse then any subjection whatsoever: But that there can be no such kind of Government hath been sufficiently demonstrated in the foregoing Chapter, Artic: 6, 7, 8, 9, 10, 11, 12.

But that there can be no such kinde of Government] Most men grant, That a Government ought not to be divided, but they would have it moderated, and bounded by some limits. Truly it is very reasonable it should be so; but if these men, when they speak of moderating, and limiting, do understand dividing it, they make a very fond distinction. Truly, for my part, I wish that not onely Kings, but all other Persons endued with Supreme Authority would so temper themselves as to commit no wrong, and onely minding their charges contain themselves within the limits of the naturall, and divine Lawes: But they who distinguish thus, they

would have the chief Power bounded, and restrain'd by others; which, because it cannot be done, but that they who doe set the limits, must needs have some part of the Power, whereby they may be enabled to doe it, the Government is properly divided, not moderated.

V. Let us see a little now in the constituting of each Form of Government, what the constitutours doe. Those who met together with intention to erect a City, were almost in the very act of meeting a Democracy; for in that they willingly met, they are suppos'd oblig'd to the observation of what shall be determin'd by the major part: which, while that convent lasts, or is adjourn'd to some certain dayes, and places, is a clear Democracy; for that convent, whose will is the will of all the Citizens, hath the Supreme Authority; and because in this Convent every man is suppos'd to have a Right to give his voice, it followes, that it is a Democracy by the definition given in the first Article of this Chap. But if they depart, and break up the Convent, and appoint no time, or place, where, and when they shall meet again, the publick weal returns to Anarchy, and the same state it stood in before their meeting, that is, to the state of all men warring against all. The People therefore retains the supreme power no longer then there is a certain day and place publicly appointed, and known, to which whosoever will, may resort. For except that be known and determined, they may either meet at divers times, and places, that is in factions, or not at all; and then it is no longer demos, the People, but a dissolute multitude, to whom we can neither attributes any Action, or Right: Two things therefore frame a Democratie, whereof one (to wit the perpetuall prescription of Convents) makes demos, the People, the other (which is a plurality of voyces) to kratos or the power.

VI. Furthermore, it will not be sufficient for the People, so as to maintain its supremacy, to have some certain known times, and places of meeting, unlesse that either the intervals of the times be of lesse distance, then that any thing may in the mean time happen whereby (by reason of the defect of power) the City may be brought into some danger, or at least that the exercise of the supreme authority be, during the intervall, granted to some one man, or Councill. For unlesse this be

done, there is not that wary care, and heed taken for the defence and Peace of single men which ought to be, and therefore will not deserve the name of a City, because that in it for want of security, every mans Right of defending himselfe at his own pleasure, returns to him again.

VII. Democracy is not framed by contract of particular persons with the People, but by mutuall compacts of single men each with other. But hence it appears in the first place, that the Persons contracting, must be in being before the contract it selfe. But the People is not in being before the constitution of government, as not being any Person, but a multitude of single Persons; wherefore there could then no contract passe between the People and the Subject. Now, if after that government is framed, the subject make any contract with the People, it is in vain, because the People contains within its will, the will of that subject to whom it is supposed to be obliged; and therefore may at its own will and pleasure disengage it selfe, and by consequence is now actually free. But in the second place, that single Persons doe contract each with other may be inferred from hence, that in vain sure would the City have been constituted, if the Citizens had been engaged by no contracts to doe, or omit what the City should command to be done or omitted. Because therefore such kind of compacts must be understood to passe as necessary to the making up of a City, but none can be made (as is already shewed) between the Subject and the People; it followes, that they must be made between single Citizens, namely that each man contract to submit his will to the will of the major part, on condition that the rest also doe the like, as if every one should say thus, I give up my Right unto the People for your sake, on condition, that you also deliver up yours, for mine.

VIII. An Aristocracy, or Councell of Nobles endued with supreme authoritie, receives its originall from a Democracy, which gives up its Right unto it; where we must understand that certain men distingisht from others, either by eminence of title, blood, or some other Character, are propounded to the People, and by plurality of voyces are elected; and being elected, the whole Right of the People, or City, is conveighed on them, insomuch as whatsoever the People might doe

before, the same by Right may this Court of elected Nobles now doe. Which being done, it is clear that the People, considered as one Person, (its supreme authority being already transferred on these) is no longer now in being.

IX. As in Democracy the People, so in an Aristocracy the Court of Nobles is free from all manner of obligation; for seeing subjects not contracting with the People, but by mutuall compacts among themselves, were tyed to all that the People did, hence also they were tyed to that act of the People in resigning up its Right of government into the hands of Nobles. Neither could this Court, although elected by the People, be by it obliged to any thing; for being erected, the People is at once dissolved, as was declared above, and the authority it had as being a Person utterly vanisheth. Wherefore the obligation which was due to the Person must also vanish, and perish together with it.

X. Aristocracy hath these considerations, together with Democracy; First, that without an appointment of some certain times, and places, at which the Court of Nobles may meet, it is no longer a Court, or one Person, but a dissolute multitude without any supreme power; Secondly, that the times of their assembling cannot be disjoyned by long intervalls, without prejudice to the supreme power, unlesse its administration be transferred to some one man: Now the reasons why this happens, are the same which we set down in the fifth Article.

XI. As an Aristocratie, so also a monarchy is derived from the Power of the People, transferring its Right, (that is) its Authoritie on one man: Here also we must understand, that some one man, either by name, or some other token, is propounded to be taken notice of above all the rest, and that by a plurality of voyces the whole Right of the People is conveyed on him, insomuch as whatsoever the People could doe before he were elected, the same in every Respect may he by Right now doe, being elected; which being done, the People is no longer one Person, but a rude multitude, as being only one before by vertue of the supreme command, whereof they now have made a conveyance from themselves on this one Man.

XII. And therefore neither doth the Monarch oblige himselfe to any for the command he receives, for he receives it from the People; but as hath been shewed above, the People, as soon as that act is done, ceaseth to be a Person; but the Person vanishing, all obligation to the Person vanisheth. The subjects therefore are tyed to perform obedience to the Monarch, by those compacts only by which they mutually obliged themselves to the observation of all that the People should command them, (that is) to obey that Monarch, if he were made by the People.

XIII. But a Monarchy differs as well from an Aristocracy, as a Democratie, in this chiefly, that in those there must be certain set times and places for deliberation, and consultation of affaires, that is, for the actuall exercise of it in all times, and places; For the People, or the Nobles not being one naturall Person must necessarily have their meetings. The Monarch who is one by nature, is alwayes in a present capacity to execute his authority.

XIV. Because we have declared above in the 7. 9. and 12. Articles, that they who have gotten the supreme command are by no compacts obliged to any man, it necessarily followes, that they can doe no injury to the subjects; for injury according to the definition made in the third Article of the third Chapter, is nothing else but a breach of contract: and therefore where no contracts have part, there can be no injury. Yet the People, the Nobles, and the Monarch may diverse wayes transgresse against the other Lawes of nature, as by cruelty, iniquity, contumely, and other like vices, which come not under this strict, and exact notion of injury. But if the subject yeeld not obedience to the supreme, he will in propriety of speech be said to be injurious as well to his fellow subjects, because each man hath compacted with the other to obey, as to his chief Ruler, in resuming that Right, which he hath given him, without his consent. And in a Democracy, or Aristocracy, if any thing be decreed against any Law of nature, the City it selfe (i.e.) the civill Person sinnes not, but those subjects only by whose votes it was decreed; for sinne is a consequence of the naturall expresse will, not of the politicall, which is artificiall; for if it were otherwise, they would be guilty, by whom the decree was absolutely disliked: But in a Monarchie, if the Monarch

make any decree against the Lawes of nature, he sins himselfe, because in him the civill will and the naturall are all one.

XV. The people who are about to make a Monarch, may give him the supremacy either simply without limitation of time, or for a certaine season; and time determined; if simply, we must understand that he who receives it, hath the selfe-same power which they had, who gave it, on the same grounds: therefore that the People by Right could make him a Monarch, may he make another Monarch: insomuch as the Monarch to whom the command is simply given, receives a Right not of possession onely, but of succession also, so as he may declare whom hee pleaseth for his successor.

XVI. But if the power be given for a time limited, we must have regard to somewhat more then the bare gift onely: First, whether the People conveyinging its authority, left it selfe any Right to meet at certain times, and places, or not. Next, if it have reserved this power, whether it were done, so as they might meet before that time were expired, which they prescribed to the Monarch. Thirdly, whether they were contented to meet onely at the will of that temporary Monarch and not otherwise. Suppose now the People had delivered up its Power to some one man for term of life onely; which being done, let us suppose in the first place, that every man departed from the Counsell without making any order at all concerning the place where (after his death) they should meet again to make a new election. In this case it is manifest by the fifth Article of this Chapter, that the People ceaseth to be a Person, and is become a dissolute multitude, every one whereof hath an equall, to wit, a naturall Right to meet with whom he lists at divers times, and in what places shall best please him; nay, and if he can, engrosse the supreme power to himselfe, and settle it on his own head. What Monarch soever therefore hath a command in such a condition, he is bound by the Law of nature (set down in the Article of the third Chapter of not returning evill for good) prudently to provide, that by his death the City suffer not a dissolution, either by appointing a certain day, & place, in which those subjects of his who have a mind to it may assemble themselves, or else by nominating a successor: whether of these shall to

him seem most conducive to their common benefit. He therefore who on this foresaid manner hath received his command during life, hath an absolute Power, and may at his discretion dispose of the succession. In the next place, if we grant that the people departed not from the election of the temporary Monarch, before they decreed a certain time and place of meeting after his death, then the Monarch being dead, the authority is confirmed in the people, not by any new acts of the subjects, but by vertue of the former Right; for all the supreme command (as Dominion) was in the People, but the use, and exercise of it was only in the temporary Monarch, as in one that takes the benefit, but hath not the Right. But if the People after the election of a temporarie Monarch, depart not from the Court before they have appointed certain times, and places to convene, during the time prescribed him (as the Dictators in ancient times were made by the People of Rome) such an one is not to be accounted a Monarch, but the Prime Officer of the People; and if it shall seem good, the People may deprive him of his office even before that time, as the People of Rome did, when they conferred an equall power on Minutius Master of the horse, with Quintus Fabius Maximus, whom before they had made Dictator. The reason whereof is, hat it is not to be imagined, that, whether Man or Counsell who hath the readiest, and most immediate power to act, should hold his command on such termes as not to be able actually to execute it; for command is nothing else but a Right of commanding, as oft as nature allowes it possible. Lastly, if the People having declared a temporary Monarch, depart from the Court on such termes, as it shall not be lawfull for them to meet without the command of the Monarch, we must understand the People to be immediately dissolved, and that his authority who is thus declared, is absolute; forasmuch as it is not in the power of all the subjects to frame the City anew, unlesse he give consent who hath now alone the authority. Nor matters it, that he hath perhaps made any promise to assemble his Subjects on some certain times, since there remains no Person now in being, but at his discretion, to whom the promise was made. What we have spoken of these four cases of a People electing a Temporary Monarch will be more clearly explain'd by comparing them with an

absolute Monarch, who hath no heir apparent; for the People is Lord of the subject in such a manner as there can be no Heir but whom it self doth appoint. Besides, the spaces between the times of the subjects meeting may be fitly compar'd to those times wherein the Monarch sleeps, for in either the Acts of commanding ceases, the Power remains: Farthermore, to dissolve the convent, so as it cannot meet againe, is the death of the People; just as sleeping, so as he can never wake more, is the death of a man: As therefore a King, who hath no Heir, going to his rest, so as never to rise again, (i.e.) dying, if he commit the exercise of his Regall Authority to any one till he awake, does by consequence give him the Succession; the People also electing a Temporary Monarch, and not reserving a power to convene, delivers up to him the whole Dominion of the Country: Furthermore, as a King going to sleep for some season, entrusts the administration of his Kingdome to some other, and waking takes it again; so the people having elected a Temporary Monarch, and withall retaining a right to meet at a certain day, and place, at that day receives its supremacy again. And as a King who hath committed the execution of his Authority to another, himself in the mean while waking, can recall this commission againe when he pleaseth; so the People, who during the time prescribed to the Temporary Monarch, doth by Right convene, may if they please, deprive the Monarch of his Authority. Lastly, the King, who commits his Authority to another while himself sleeps, not being able to wake againe till he whom he entrusted, give consent, loses at once both his power, and his life; so the people, who hath given the Supreme Power to a temporary Monarch in such sort as they cannot assemble without his command is absolutely dissolv'd, and the power remains with him whom they have chosen.

XVII. If the Monarch promise ought to any one, or many subjects together, by consequence whereof the exercise of his power may suffer prejudice, that Promise or Compact whether made by Oath, or without it, is null: for all Compact is a conveyance of Right, which by what hath been said in the fourth Article of the second Chapter, requires meet, and proper signes of the Will in the conveyer. But he who sufficiently signifies his will of retaining the end, doth also sufficiently

declare that he quits not his Right to the means necessary to that end. Now he who hath promis'd to part with somewhat necessary to the Supreme Power, and yet retaines the Power it selfe, gives sufficient tokens, That he no otherwise promis'd it then so farre forth as the power might be retain'd without it. Whensoever therefore it shall appear that what is promis'd cannot be perform'd without prejudice to the Power, the promise must be valued as not made, (i.e.) of no effect.

XVIII. We have seen how Subjects, nature dictating, have oblig'd themselves by mutuall Compacts to obey the SuPreme Power. We will see now by what meanes it comes to passe that they are releas'd from these bonds of obedience. And first of all this happens by rejection, namely, if a man cast off, or forsake, but convey not the Right of his Command on some other; for what is thus rejected, is openly expos'd to all alike, catch who catch can; whence again, by the Right of nature, every subject may heed the preservation of himselfe according to his own judgement. In the second place, If the Kingdome fall into the power of the enemy, so as there can no more opposition be made against them, we must understand that he, who before had the Supreme Authority, hath now lost it: For when the Subjects have done their full indeavour to prevent their falling into the enemies hands, they have fulfill'd those Contracts of obedience which they made each with other, and what, being conquer'd, they promise afterwards, to avoid death, they must, with no lesse endeavour, labour to performe. Thirdly, in a Monarchy, (for a Democracy, and Aristocracy cannot fail) if there be no successour, all the subjects are discharg'd from their obligations; for no man is suppos'd to be tyed he knows not to whom, for in such a case it were impossible to perform ought. And by these three wayes all subjects are restor'd from their civill subjection to that liberty, which all men have to all things, to wit, naturall, and salvage, (for the naturall state hath the same proportion to the Civill, I mean liberty to subjection, which Passion hath to Reason, or a Beast to a Man:) Furthermore, each subject may lawfully be freed from his subjection by the will of him who hath the Supreme Power, namely, if he change his soile, which may be done two wayes,

either by permission, as he, who gets license to dwell in another Country; or Command, as he, who is Banisht: In both cases he is free from the Lawes of his former Country, because he is tyed to observe those of the latter.

Chapter VIII: Of the Rights of Lords over their Servant

I. IN THE two fore-going Chapters we have treated of an institutive, or fram'd Government, as being that which receives its originall from the consent of many, who by Contract and Faith mutually given, have oblig'd each other. Now followes, what may be said, concerning a naturall Government, which may also be call'd, Acquired, because it is that which is gotten by power, and naturall force. But we must know in the first place by what means the Right of Dominion may be gotten over the Persons of men. Where such a Right is gotten, there is a kind of a little Kingdome; for to be a King, is nothing else but to have Dominion over many Persons; and thus a Great Family is a Kingdom, & a Little Kingdome a Family. Let us return again to the state of nature, and consider men as if but even now sprung out of the earth, and suddainly (like Mushromes) come to full maturity without all kind of engagement to each other: There are but three wayes only whereby one can have the Dominion over the Person of another; whereof the first is, if by mutuall Contract made between themselves (for Peace, & self-defences sake) they have willingly given up themselves to the Power and Authority of some man, or Councel of Men, & of this we have already spoken. The 2d is, If a man taken Prisoner in the Wars, or overcome; or else distrusting his own forces, (to avoid Death) promises the Conquerour, or the stronger Party, his Service, i.e. to do all whatsoever he shall command him; in which Contract the good which the vanquisht, or inferiour, in strength doth receive, is the grant of his life, which by the Right of War in the naturall state of men he might have depriv'd him of, but the good which he promises, is his service and obedience. By vertue therefore of this promise, there is as absolute service and obedience due from the vanquisht, to the vanquisher, as possibly can be, excepting what repugns the Divine Lawes; for he who is oblig'd to obey the Commands of any man before he

knowes what he will command him, is simply, and without any restriction tyed to the performance of all Commands whatsoever. Now he that is thus tyed, is call'd a SERVANT, he to whom he is tyed, a LORD. Thirdly, there is a Right acquir'd over the Person of a Man, by Generation; of which kind of acquisition somewhat shall be spoken in the following Chapter.

II. Every one that is taken in the War, and hath his life spar'd him, is not suppos'd to have Contracted with his Lord; for every one is not trusted with so much of his naturall liberty, as to be able, if he desir'd it, either to flie away, or quit his service, or contrive any mischief to his Lord. And these serve indeed but within Prisons, or bound within Irons, and therefore they were call'd not by the common name of Servant onely, but by the peculiar name of Slave, even as now at this day un serviteur, and un serf or un esclave have diverse significations.

III. The obligation therefore of a Servant to his Lord ariseth not from a simple grant of his life, but from hence rather, That he keeps him not bound, or imprison'd, for all obligation derives from Contract; but where's no trust, there can be no Contract, as appears by the 2. Chap. Artic. 9. where a Compact is defin'd to be the promise of him who is trusted. There is therefore a confidence and trust which accompanies the benefit of pardon'd life, whereby the Lord affords him his corporall liberty. so that if no obligation, nor bonds of Contract had happen'd, he might not onely have made his escape, but also have kill'd his Lord, who was the preserver of his life.

IV. Wherefore such kind of Servants as are restrain'd by imprisonment, or bonds, are not comprehended in that definition of Servants given above, because those serve not for the Contracts sake, but to the end they may not suffer; and therefore if they flie, or kill their Lord, they offend not against the Lawes of Nature, for to bind any man is a plain signe, that the binder supposes him that is bound not to be sufficiently tyed by any other obligation.

V. The Lord therefore hath no less Dominion over a Servant that is not, then over one that is bound, for he hath a Supreme Power over both, and may say of his Servant no lesse then of another thing, whether animate, or inanimate, This is

mine; whence it followes, that whatsoever the Servant had before his servitude, that afterwards becomes the Lords; and whatsoever he hath gotten, it was gotten for his Lord: for he that can by Right dispose of the Person of a man, may surely dispose of all those things which that Person could dispose of. There is therefore nothing which the Servant may retaine as his own against the will of his Lord; yet hath he, by his Lords distribution, a propriety, and Dominion over his own goods, insomuch as one Servant may keep, and defend them against the invasion of his fellow Servant, in the same manner as hath been shewed before, that a subject hath nothing properly his owne against the will of the Supreme Authority, but every subject hath a propriety against his fellow subject.

VI. Since therefore both the Servant himself, and all that belongs to him are his Lords, and by the Right of Nature every man may dispose of his owne in what manner he pleases; the Lord may either sell, lay to pledge, or by Testament convey the Dominion he hath over his Servant, according to his own will and pleasure.

VII. Farthermore, what hath before been demonstrated concerning subjects in an institutive Government, namely, that he who hath the Supreme Power can doe his subject no injury; is true also concerning Servants, because they have subjected their will to the will of the Lord; wherefore, whatsoever he doth, it is done with their wills, but no injury can be done to him that willeth it.

VIII. But if it happen that the Lord, either by captivity or voluntary subjection, doth become a Servant or Subject to another, that other shall not onely be Lord of him, but also of his Servants; Supreme Lord over these, immediate Lord over him. Now because not the Servant only, but also all he hath are his Lords; therefore his Servants now belong to this man, neither can the mediate Lord dispose otherwise of them then shall seeme good to the Supreme. And therefore, if sometime in civill Governments, the Lord have an absolute power over his Servants, that's suppos'd to be deriv'd from the Right of Nature, and not constituted, but slightly pass'd over by the Civill Law.

IX. A servant is by the same manner freed from his servitude, that a Subject in an institutive government, is freed from his subjection; First, if his Lord enfranchise him, for the Right which the servant transferred to his Lord over himselfe, the same may the Lord restore to the servant again. And this manner of bestowing of liberty is called MANUMISSION; which is just as if a City should permit a Citizen to convey himselfe under the jurisdiction of some other City. Secondly, if the Lord cast off his servant from him, which in a City is banishment; neither differs it from Manumission in effect, but in manner onely: for there, liberty is granted as a favour, here, as a punishment: In both, the Dominion is renounced. Thirdly, if the servant be taken prisoner, the old servitude is abolished by the new; for as all other things, so servants also are acquired by warre, whom in equity the Lord must protect, if he will have them to be his. Fourthly, the servant is freed for want of knowledge of a successour, the Lord dying (suppose) without any Testament, or Heire, for no man is understood to be obliged, unlesse he know to whom he is to perform the obligation. Lastly, the servant that is put in bonds, or by any other means deprived of his corporall liberty, is freed from that other obligation of contract, for there can be no contract where there is no trust, nor can that faith be broken which is not given. But the Lord who himselfe serves another, cannot so free his servants, but that they must still continue under the power of the supreme, for, as hath been shewed before, such servants are not his, but the supreme Lords.

X. We get a right over irrationall Creatures in the same manner, that we doe over the Persons of men, to wit, by force and naturall strength; for if in the state of nature it is lawfull for every one, by reason of that warre which is of all against all, to subdue, and also to kill men as oft as it shall seem to conduce unto their good, much more will the same be lawfull against Brutes; namely at their own discretion, to reduce those to servitude which by art may be tamed, and fitted for use, and to persecute and destroy the rest by a perpetuall warre, as dangerous and noxious. Our Dominion therefore over beasts, hath its originall from the right of nature, not from divine positive Right: for if such a Right had not been before the

publishing of the sacred Scriptures, no man by right might have killed a beast for his food, but he to whom the divine pleasure was made manifest by holy Writ; a most hard condition for men indeed whom the beasts might devoure without injury, and yet they might not destroy them: Forasmuch therefore as it proceeds from the right of nature, that a beast may kill a man; it is also by the same Right, that a man may slay a beast.

Chapter IX: Of the right of Parents over their children and of hereditary Government

I. SOCRATES IS a man, and therefore a living creature, is a right reasoning, and that most evident, because there is nothing needfull to the acknowledging of the truth of the consequence, but that the word Man be understood, because a living creature is in the definition it selfe of a Man, and every one makes up the proposition which was desired, namely this, Man is a living Creature; And this, Sophroniscus is Socrates his Father, and therefore his Lord, is perhaps a true inference, but not evident, because the word Lord is not in the definition of a Father: wherefore it is necessary to make it more evident, that the connexion of Father and Lord be somewhat unfolded. Those that have hitherto endeavoured to prove the Dominion of a Parent over his children, have brought no other argument then that of generation, as if it were of it selfe evident, that what is begotten by me, is mine; just as if a man should think, that because there is a triangle, it appears presently without any farther discourse, that its angles are equall to two Rights. Besides, since Dominion (that is) supreme Power is indivisible, insomuch as no man can serve two Masters, but two Persons male and female, must concur in the act of generation, its impossible that Dominion should at all be acquired by generation onely. Wherefore we will with the more diligence in this place, enquire into the original of paternal Government.

II. Wee must therefore returne to the state of nature, in which, by reason of the equality of nature all men of riper yeares are to be accounted equall; There by right of nature the Conqueror is Lord of the conquered: by the Right therefore of nature, the Dominion over the Infant first belongs to him who first hath him in his power'd but it's manifest that he who is newly born is in the Mothers power

before any others, insomuch as she may rightly, and at her own wil, either breed him up, or adventure him to fortune.

III. If therefore she breed him (because the state of nature is the state of warre) she is supposed to bring him up on this condition, that being grown to full age he become not her enemy; (which is) that he obey her. For since by naturall necessity we all desire that which appears good unto us, it cannot be understood that any man hath on such termes afforded life to another, that he might both get strength by his years, and at once become an enemy; but each man is an enemy to that other whom he neither obeys nor commands. And thus in the state of nature, every woman that bears children, becomes both a Mother, and a Lord. But what some say, that in this case, the Father by reason of the preeminence of sexe, and not the Mother, becomes Lord, signifies nothing. For both reason shewes the contrary, because the inequality of their naturall forces is not so great, that the man could get the Dominion over the woman without warre. And custome also contradicts not; for women, namely Amazons, have in former times waged war against their adversaries, and disposed of their children at their own wils, and at this day in divers places, women are invested with the principall authority. Neither doe their husbands dispose of their children, but themselves; which in truth they do by the right of nature; forasmuch as they who have the supreme power, are not tyed at all (as hath bin shewed) to the civill lawes. Adde also that in the state of nature it cannot be known who is the Father but by the testimony of the Mother; the child therefore is his whose the Mother will have it, and therefore hers; Wherefore originall Dominion over children belongs to the Mother, and among men no lesse then other creatures: The birth followes the belly.

IV. The Dominion passes from the Mother to others, divers wayes; first, if she quit and forsake her Right by exposing the child. He therefore that shall bring up the childe thus exposed, shall have the same Dominion over it, which the Mother had. For that life which the Mother had given it (not by getting, but nourishing it) she now by exposing, takes from it; Wherefore the obligation also which arose from the benefit of life, is by this exposition made voyd. Now the preserved,

oweth all to the preserver, whether in regard of his education as to a Mother, or of his service, as to a Lord; for although the Mother in the state of nature, where all men have a right to all things, may recover her sonne again (namely by the same Right that any body else might doe it) yet may not the Sonne rightly transferre himselfe again unto his Mother.

V. Secondly, if the Mother be taken prisoner, her Sonne is his that took her, because that he who hath Dominion over the Person, hath also Dominion over all belonging to the Person; Wherefore over the Sonne also, as hath been shewed in the foregoing Chapter, in the fifth Article. Thirdly, if the Mother be a subject under what government soever, he that hath the supreme authority in that government, will also have the Dominion over him that is born of her. for he is Lord also of the Mother, who is bound to obey him, in all things. Fourthly, if a woman for societie sake give her selfe to a man on this condition; that he shall bear the sway; he that receives his being from the contribution of both Parties, is the Fathers, in regard of the command he hath over the Mother; but if a woman bearing rule shall have children by a Subject, the children are the Mothers: for otherwise the woman can have no children without prejudice to her authority. And universally, if the society of the male and female be such an union, as the one have subjected himselfe to the other, the children belong to him or her that commands.

VI. But in the state of nature, if a man, and woman contract so, as neither is subject to the command of the other, the children are the Mothers for the reasons above given in the third Article, unlesse by pacts it be otherwise provided. For the Mother may by pact dispose of her Right as she lists, as heretofore hath been done by the Amazons, who of those children which have been begotten by their neighbours, have by pact allowed them the males, and retained the females to themselves; but in a civill government, if there be a contract of marriage between a man and woman, the children are the Fathers; because in all Cities, viz. constituted of Fathers, not Mothers governing their families, the domesticall command belongs to the man, and such a contract, if it be made according to the

civill Laws, is called MATRIMONY; but if they agree only to lye together, the children are the Fathers, or the Mothers variously, according to the differing civill Lawes of divers Cities.

VII. Now because by the third Article the Mother is originally Lord of her Children, and from her the Father, or some body else by derived Right, it is manifest that the Children are no lesse subject to those by whom they are nourisht, and brought up, then Servants to their Lords, and Subjects to him who beares the Supreme Rule; and that a Parent cannot be injurious to his Sonne as long as he is under his power. A Son also is freed from subjection on the same manner as a subject and servant are. For emancipation is the same thing with manumission, and abdication with banishment.

VIII. The enfranchised son, or released servant, doe now stand in lesse fear of their Lord and Father, being deprived of his naturall and lordly power over them, and (if regard be had to true and inward Honour) doe Honour him lesse, then before. For Honour (as hath been said in the section above) is nothing else but the estimation of anothers power; and therefore he that hath least power, hath alwayes least Honour. But it is not to be imagin'd that the enfranchiser ever intended so to match the enfranchised with himself, as that he should not so much as acknowledge a benefit, but should so carry himself in all things, as if he were become wholly his equall; It must therefore be ever understood, That he who is freed from subjection, whether he be a servant, sonne, or some colony, doth promise all those externall signes, at least whereby Superiours used to be Honour'd by their inferiours. From whence it followes, That the precept of honouring our Parents, belongs to the law of nature, not onely under the title of Gratitude, but also of Agreement.

IX. What then, will some one demand, is the difference between a sonne, or between a subject, and a servant? Neither doe I know that any Writer hath fully declared what liberty, and what slavery is. Commonly to doe all things according to our own phancies, and that without punishment, is esteem'd to be liberty; not to be able to doe this, is judg'd bondage; which in a Civill Government, and with the

peace of mankind cannot possibly be done, because there is no City without a Command, and a restraining Right. LIBERTY, that we may define it, is nothing else but an absence of the lets, and hinderances of motion, as water shut up in a vessell is therefore not at liberty, because the vessell hinders it from running out, which the vessell being broken, is made free. And every man hath more or lesse liberty, as he hath more or lesse space in which he employes himself: as he hath more liberty, who is in a large, then he that is kept in a close prison. And a man may be free toward one part, and yet not toward another; as the traveller is bounded on this, and that side with hedges, or stone walls, lest he spoyle the vines, or corne, neighbouring on the high way. And these kinde of lets are externall, and absolute; in which sense all Servants, and Subjects are free, who are not fetter'd and imprisoned. There are others which are arbitrary, which doe not absolutely hinder motion, but by accident; to wit, by our own choyce, as he that is in a ship is not so hindered, but he may cast himselfe into the Sea, if he will: and here also the more wayes a man may move himselfe, the more liberty he hath, and herein consists civill liberty; for no man, whether subject, sonne, or servant, is so hindred by the punishments appointed by the City, the Father, or the Lord, how cruell soever, but that he may doe all things, and make use of all meanes necessary to the preservation of his life and health. For my part therefore I cannot finde what reason a meer servant hath to make complaints, if they relate onely to want of liberty, unlesse he count it a misery to be restrained from hurting himselfe, and to receive that life, (which by warre, or misfortune, or through his own idlenesse was forfeited) together with all manner of sustenance, and all things necessary to the conservation of health, on this condition only, that he will be rul'd: for he that is kept in by punishments layd before him, so as he dares not let loose the reines to his will in all things; is not opprest by servitude, but is governed and sustained. But this priviledge free subjects and sonnes of a family, have above servants, (in every government, and family, where servants are) that they may both undergoe the more honourable offices of the City or family, and also enjoy a larger possession of things superfluous. And herein layes the

difference between a free subject, and a servant, that he is FREE, but a SERVANT is he who also indeed, who serves his City onely; serves his fellow subject: all other liberty is an exemption from the Lawes of the City, and proper only to those that bear Rule.

X. A Father, with his sonnes and servants growne into a civill Person by vertue of his paternall jurisdiction, is called a FAMILY. This family, if through multiplying of children, and acquisition of servants, it becomes numerous, insomuch as without casting the uncertain dye of warre, it cannot be subdued, will be termed an Hereditary Kingdome; which though it differ from an institutive Monarchy, being acquired by force in the original, & manner of its constitution; yet being constituted, it hath al the same properties, and the Right of authority is every where the same, insomuch as it is not needfull to speak any thing of them apart.

XI. It hath been spoken, by what Right supreme authorities are constituted. Wee must now briefly tell you by what right they may be continued. Now the Right by which they are continued, is that which is called the right of SUCCESSION. Now because in a Democratie, the supreme authority is with the People, as long as there be any subjects in being, so long it rests with the same Person; for the People hath no Successour. In like manner in an Aristocracy, one of the Nobles dying, some other by the rest is substituted in his place; and therefore except they all dye together, which I suppose will never happen, there is no succession. The Querie therefore of the Right of Succession takes place onely in an absolute Monarchy. For they who exercise the supreme power for a time onely, are themselves no Monarchs, but Ministers of state.

XII. But first, if a Monarch shall by Testament appoint one to succeed him, the Person appointed shall succeed; for if he be appointed by the People, he shall have all the Right over the City which the People had, as hath been shewed in the 7. Chap. Art. 11. But the People might choose him; by the same Right therefore may he choose another; But in an hereditary Kingdome there are the same Rights

as in an institutive; Wherefore, every Monarch may by his will make a successour.

XIII. But what a man may transferre on another by Testament, that by the same Right may he yet living, give, or sell away; To whomsoever therefore he shall make over the supreme power, whether by gift, or sale, it is rightly made.

XIV. But if living, he have not declared his will concerning his successour by Testament, nor otherwise, it is supposed, First, that he would not have his Government reduced to an Anarchy, or the state of warre, (that is) to the destruction of his subjects; as well because he could not doe that without breach of the Lawes of nature, whereby he was obliged to the performance of all things necessarily conducing to the preservation of Peace, as also because if that had been his will, it had not been hard for him to have declared that openly. Next, because the Right passeth according to the will of the Father, we must judge of the successour according to the signes of his will. It is understood therefore, that he would have his subjects to be under a Monarchicall Government rather then any other, because he himselfe in ruling, hath before approved of that state by his example, and hath not afterward either by any word or deed condemned it.

XV. Furthermore, because by naturall necessity all men wish them better from whom they receive glory, and honour, then others; but every man after death receives honour and glory from his children, sooner then from the power of any other men: hence we gather, that a father intends better for his children, then any other persons. It is to be understood therefore, that the will of the father, dying without Testament, was, that some of his children should succeed him; yet this is to be understood with this proviso, that there be no more apparent tokens to the contrary: of which kind, after many successions, custome may be one, for he that makes no mention of his succession, is supposed to consent to the customes of his Realme.

XVI. Among children the Males carry the preheminance, in the beginning perhaps, because for the most part (although not alwayes) they are fitter for the administration of greater matters, but specially of wars; but afterwards, when it

was grown a custome, because that custome was not contradicted; and therefore the will of the Father, unlesse some other custome or signe doe clearly repugne it, is to be interpreted in favour of them.

XVII. Now because the Sonnes are equall, and the power cannot be divided, the eldest shall succeed; for if there be any difference by reason of age, the eldest is supposed more worthy, for nature being judge, the most in years (because usually it is so) is the wisest. But other judge there cannot be had. But if the Brothers must be equally valued, the succession shall be by lot. But primogeniture is a naturall lot, and by this the eldest is already prefer'd; nor is there any that hath power to judge, whether by this, or any other kind of lots the matter is to be decided. Now the same reason which contends thus for the first-born sonne, doth no lesse for the first born daughter.

XVIII. But if he have no children, then the command shall pass to his Brothers & Sisters, for the same reason, that the children should have succeeded if he had had them: for those that are nearest to us in nature, are supposed to be nearest in benevolence; and to his brothers, sooner then his sisters, and to the elder sooner then the yonger; for the reason is the same for these which it was for the children.

XIX. Furthermore, by the same reason that men succeed to the power, doe they also succeed to the Right of succession: for if the first-born dye before the Father, it will be judged, that he transferred his Right of succession unto his children, unlesse the Father have otherwise decreed it, and therefore the Nephewes will have a fairer pretence to the succession, then the Uncles. I say all these things will be thus, if the custome of the place (which the Father by not contradicting, will be judged to have consented to) doe not hinder them.

Chapter X: A comparison between 3. kinds of government, according to their severall inconveniences

I. WHAT DEMOCRATY, Aristocracy, and monarchy are, hath already been spoken, but which of them tends most to the preservation of the subjects Peace, and procuring their advantages, we must see by comparing them together. But first let us set forth the advantages, and disadvantages of a City in generall, lest some perhaps should think it better, that every man be left to live at his own will, then to constitute any civill society at all. Every man indeed out of the state of civill government hath a most entire, but unfruitfull liberty; because that he who by reason of his own liberty acts all at his own will, must also by reason of the same liberty in others, suffer all at anothers wil; but in a constituted City, every subject retains to himselfe as much freedom as suffices him to live well, and quietly, & there is so much taken away from others, as may make them not to be feared. Out of this state, every man hath such a Right to all, as yet he can enjoy nothing; in it, each one securely enjoys his limited Right; Out of it, any man may rightly spoyle, or kill one another; in it, none but one. Out of it we are protected by our own forces; in it, by the power of all. Out of it no man is sure of the fruit of his labours; in it, all men are. Lastly, out of it, there is a Dominion of Passions, war, fear, poverty, slovinlinesse, solitude, barbarisme, ignorance, cruelty. In it, the Dominion of reason, peace, security, riches, decency, society, elegancy, sciences, and benevolence.

II. Aristotle in his seventh book, and fourteenth Chapter of his Politiques saith, that there are two sorts of governments, whereof the one relates to the benefit of the Ruler, the other to that of the Subjects; as if where Subjects are severely dealt with, there were one, and where more mildly, there were another form of government; which opinion may by no means be subscribed to, for all the profits

and disprofits arising from government are the same, and common both to the Ruler, and the Subject; The Damages which befall some particular subjects through misfortune, folly, negligence, sloth, or his own luxury, may very well be severed from those which concern the Ruler, but those relate not to the government it selfe, being such as may happen in any form of government whatsoever. If these same happen from the first institution of the City, they will then be truly called the inconveniences of government, but they will be common to the Ruler with his subjects, as their benefits are common; but the first and greatest benefit, Peace, and defence, is common to both, for both he that commands, and he who is commanded, to the end that he may defend his life, makes use at once of all the forces of his fellow-subjects; and in the greatest inconvenience that can befall a City, namely the slaughter of subjects, arising from Anarchy, both the Commander, and the Parties commanded, are equally concerned. Next, if the Ruler levie such a summe of vast monies from his subjects, as they are not able to maintain themselves, and their families, nor conserve their bodily strength, and vigour, the disadvantage is as much his, as theirs, who with never so great a stock, or measure of riches, is not able to keep his authority or his riches without the bodies of his subjects; but if he raise no more then is sufficient for the due administration of his power, that is a benefit equall to himselfe and his subjects, tending to a common Peace, and defence. Nor is it imaginable which way publick treasures can be a grievance to private subjects, if they be not so exhausted, as to be wholly deprived from all possibility to acquire, even by their industry, necessaries to sustain the strength of their bodies, and mindes; for even thus the grievance would concern the Ruler; nor would it arise from the ill institution, or ordination of the government, (because in all manner of governments subjects may be oppressed) but from the ill administration of a well established government.

III. Now that Monarchy of the foresaid forms, of Democracy, Aristocracy, and Monarchy, hath the preheminance, will best appear by comparing the conveniences and inconveniences arising in each one of them. Those arguments

therefore that the whole universe is governed by one God; that the Ancients preferr'd the Monarchicall state before all others, ascribing the Rule of the Gods to one Jupiter; that in the beginning of affairs, and of Nations, the decrees of Princes were held for Laws; that paternall government instituted by God himselfe in the Creation, was Monarchicall. that other governments were compacted by the artifice of men out of the ashes of Monarchy, after it had been ruined with seditions; and that the people of God were under the jurisdiction of Kings, although I say these doe hold forth Monarchy as the more eminent to us, yet because they doe it by examples and testimonies, and not by solid reason, we will passe them over.

Compacted by the artifice of men, &c.] It seems the Ancients who made that same fable of Prometheus pointed at this. They say, that Prometheus having stolne fire from the Sunne, formed a man out of clay, and that for this deed he was tortured by Jupiter with a perpetuall gnawing in his liver. which is, that by humane invention (which is signified by Prometheus) Laws and Justice were by imitation taken from Monarchy, by vertue whereof (as by fire removed from its naturall orbe) the multitude (as the durt and dregs of men) was as it were quickned and formed into a civill Person, which is termed Aristocracy, or Democracy; but the Awthours and Abettors being found, who might securely and quietly have lived under the naturall jurisdiction of Kings, doe thus smart for it, that being exposed still to alteration, they are tormented with perpetuall cares, suspitions, and dissentions.

IV. Some there are who are discontented with the government under one, for no other reason, but because it is under one; as if it were an unreasonable thing that one man among so many, should so farre excell in power, as to be able at his own pleasure to dispose of all the rest; these men sure, if they could, would withdraw themselves from under the Dominion of one God. But this exception against one is suggested by envie, while they see one man in possession of what all desire: for the same cause they would judge it to be as unreasonable, if a few commanded, unlesse they themselves either were, or hoped to be of the number;

for if it be an unreasonable thing that all men have not an equall Right, surely an Aristocracy must be unreasonable also. But because we have shewed that the state of equality is the state of warre, and that therefore inequality was introduc'd by a generall consent; this inequality whereby he, whom we have voluntarily given more to, enjoys more, is no longer to be accompted an unreasonable thing. The inconveniences therefore which attend the Dominion of one man, attend his Person, not his Unity. Let us therefore see whether brings with it the greater grievances to the subject, the command of one man, or of many.

V. But first, we must remove their opinion who deny that to be any City at all, which is compacted of never so great a number of servants under a common Lord. In the 9. Artic. of the 5. Chapter, a City is defined to be one Person made out of many men, whose will by their own contracts is to be esteemed as the wills of them all, insomuch as he may use the strength and faculties of each single Person for the publick Peace and safety; and by the same article of the same Chapter, One Person is that, when the wills of many are contained in the will of one. But the will of each servant is contained in the will of his Lord, as hath been declared in the 5. Article of the 8. Chapter, so as he may employ all their forces and faculties according to his own will, and pleasure; it followes therefore that that must needs be a city, which is constituted by a Lord, and many servants; neither can any reason be brought to contradict this which doth not equally combat against a City constituted by a Father, and his Sonnes; for to a Lord who hath no children, servants are in the nature of sonnes; for they are both his honour, and safeguard; neither are servants more subject to their Lords, then children to their Parents, as hath been manifested above in the 5. Article of the 8. Chapter.

VI. Among other grievances of supreme authority one is, that the Ruler, beside those monies necessary for publick charges, as the maintaining of publick Ministers, building, and defending of Castles, waging warres, honourable sustaining his own houshold, may also, if he will, exact others through his lust, whereby to enrich his sonnes, kindred, favourites, and flatterers too. I confesse this is a grievance, but of the number of those which accompany all kindes of

government, but are more tolerable in a Monarchy then in a Democracy; for though the Monarch would enrich them, they cannot be many, because belonging but to one. But in a Democracy, look how many Demagoges, (that is) how many powerfull Oratours there are with the people (which ever are many, and daily new ones growing) so many Children, Kinsmen, friends, & Flatterers, are to be rewarded; for every of them desire not onely to make their families as potent, as illustrious in wealth, as may be, but also to oblige others to them by benefits for the better strengthning of themselves. A Monarch may in great part satisfie his Officers and Friends, because they are not many, without any cost to his Subjects, I mean, without robbing them of any of those Treasures given in for the maintenance of War, and Peace; In a Democracy, where many are to be satisfied, and alwayes new ones, this cannot be done without the Subjects oppression. Though a Monarch may promote unworthy Persons, yet oft times he will not doe it; but in a Democracy all the popular men are therefore suppos'd to doe it, because it is necessary; for else, the power of them who did it would so encrease, as it would not onely become dreadfull to those others, but even to the whole City also.

VII. Another grievance is, that same perpetuall fear of death which every man must necessarily be in, while he considers with himself that the Ruler hath power. not onely to appoint what punishments he lists on any Transgressions, but that he may also in his wrath, and sensuality, slaughter his innocent Subjects, and those who never offended against the Lawes. And truly this is a very great grievance in any forme of Government wheresoever it happens: (for it is therefore a grievance because it is; not, because it may be done) but it is the fault of the Ruler, not of the Government; For all the acts of Nero are not essentiall to Monarchie; yet Subjects are lesse often undeservedly condemn'd under one Ruler, then under the People: For Kings are onely severe against those who either trouble them with impertinent Counsells, or oppose them with reproachfull words, or controule their Wills; but they are the cause that that excesse of power which one Subject might have above another becomes harmlesse. Wherefore some Nero or Caligula

reigning, no men can undeservedly suffer, but such as are known to him, namely Courtiers, and such as are remarkable for some eminent Charge; and not all neither, but they onely who are possessed of what he desires to enjoy; for they that are offensive, and contumelious, are deservedly punished. Whosoever therefore in a Monarchy will lead a retired life, let him be what he will that Reignes, he is out of danger: for the ambitious onely suffer, the rest are protected from the injuries of the more potent. But in a popular Dominion there may be as many Nero's, as there are Oratours who sooth the People; for each one of them can doe as much as the People, and they mutually give way to each others appetite (as it were by this secret pact, Spare me to day, and Ile spare thee to morrow) while they exempt those from punishment, who to satisfie their lust, and private hatred, have undeservedly slain their fellow-subjects. Furthermore, there is a certain limit in private power, which if it exceed, it may prove pernicious to the Realme, and by reason whereof it is necessary sometimes for Monarchs to have a care that the common-weale do thence receive no prejudice. When therefore this power consisted in the multitude of Riches, they lessened it by diminishing their heaps; but if it were in popular applause, the powerfull party without any other crime laid to his charge, was taken from among them. The same was usually practised in Democracies; for the Athenians inflicted a punishment of ten yeares banishment on those that were powerfull, meerly because of their powers, without the guilt of any other crime; and those who by liberall gifts did seek the favour of the common people, were put to death at Rome, as men ambitious of a Kingdome. In this Democracy and Monarchy were eaven; yet differ'd they much in fame, because fame derives from the People, and what is done by many, is commended by many: and therefore what the Monarch does, is said to be done out of envie to their vertues, which if it were done by the People, would be accounted Politie.

VIII. There are some who therefore imagine Monarchy to bee more grievous then Democracy, because there is lesse liberty in that, then in this. If by liberty they mean an exemption from that subjection which is due to the Lawes (i.e.) the commands of the People, neither in Democracy, nor in any other state of

government whatsoever, is there any such kind of liberty. If they suppose liberty to consist in this, that there be few lawes, few prohibitions, and those too such, that except they were forbidden, there could be no Peace; then I deny that there is more liberty in Democracy then Monarchy; for the one as truly consisteth with such a liberty, as the other. For although the word liberty, may in large, and ample letters be written over the gates of any City whatsoever, yet is it not meant the Subjects, but the Cities liberty, neither can that word with better Right be inscribed on a City which is governed. by the people, then that which is ruled by a Monarch. But when private men or subjects demand liberty, under the name of liberty, they ask not for liberty, but dominion, which yet for want of understanding, they little consider; for if every man would grant the same liberty to another, which he desires for himselfe, as is commanded by the law of nature, that same naturall state would return again, in which all men may by Right doe all things, which if they knew, they would abhor, as being worse then all kind of civill subjection whatsoever. But if any man desire to have his single freedome, the rest being bound, what does he else demand but to have the Dominion? for who so is freed from all bonds, is Lord over all those that still continue bound. Subjects therefore have no greater liberty in a Popular, then in a Monarchicall State. That which deceives them, is the equall participation of command, and publique places; for where the authority is in the People, single subjects doe so far forth share in it as they are parts of the People ruling; and they equally partake in publique Offices so far forth as they have equall voices in choosing Magistrates, and publique Ministers. And this is that which Aristotle aim'd at, himself also, through the custome of that time, mis-calling Dominion liberty, in his sixth Book, and second Chapter of Politiques. In a popular State there is liberty by supposition; which is a speech of the vulgar, as if no man were free out of this State. From whence, by the way, we may collect, That those Subjects, who in a Monarchy deplore their lost liberty, doe onely stomach this, that they are not receiv'd to the steerage of the Common-weal.

IX. But perhaps for this very reason some will say, That a Popular State is much to be preferr'd before a Monarchicall. because that, where all men have a hand in publique businesses, 'there all have an opportunity to shew their wisdom, knowledge, and eloquence, in deliberating matters of the greatest difficulty and moment; which by reason of that desire of praise which is bred in humane nature, is to them who excell in such like faculties, and seeme to themselves to exceed others, the most delightfull of all things. But in a Monarchy, this same way to obtain praise, and honour, is shut up to the greatest part of Subjects; and what is a grievance, if this be none? Ile tell you: To see his opinion whom we scorne, preferr'd before ours; to have our wisdom undervalued before our own faces; by an uncertain tryall of a little vaine glory, to undergoe most certaine enmities (for this cannot be avoided, whether we have the better, or the worse); to hate, and to be hated, by reason of the disagreement of opinions; to lay open our secret Counsells, and advise to all, to no purpose, and without any benefit; to neglect the affaires of our own Family: These, I say, are grievances. But to be absent from a triall of wits, although those trialls are pleasant to the Eloquent, is not therefore a grievance to them, unlesse we will say, that it is a grievance to valiant men to be restrained from fighting, because they delight in it.

X. Besides, there are many reasons why deliberations are lesse succesfull in great Assemblies, then in lesser Councils; whereof one is, that to advise rightly of all things conducing to the preservation of a Common-weal, we must not onely understand matters at home, but Forraign Affaires too: at Home, by what goods the Country is nourished, and defended, and whence they are fetched; what places are fit to make Garrisons of; by what means Souldiers are best to be raised, and maintained; what manner of affections the Subjects bear toward their Prince, or Governours of their Country, and many the like: Abroad, what the power of each neighbouring Country is, and wherein it consists; what advantage, or disadvantage we may receive from them; what their dispositions are both to usward, and how affected to each other among themselves, and what Counsell daily passeth among them. Now, because very few in a great Assembly of men

understand these things, being for the most part unskilfull (that I say not incapable) of them, what can that same number of advisers with their impertinent Opinions contribute to good Counsell, other then meer letts and impediments?

XI. Another reason why a great Assembly is not so fit for consultation is, because every one who delivers his opinion holds it necessary to make a long continued Speech, and to gain the more esteem from his Auditours, he polishes, and adorne it with the best, and smoothest language. Now the nature of Eloquence is to make Good and Evill, Profitable and Unprofitable, Honest and Dishonest, appear to be more or lesse then indeed they are, and to make that seem just, which is unjust, according as it shall best suit with his end that speaketh. For this is to perswade; and though they reason, yet take they not their rise from true Principles, but from vulgar received opinions, which, for the most part, are erroneous; neither endeavour they so much to fit their speech to the nature of the things they speak of, as to the Passions of their mindes to whom they speak; whence it happens that opinions are delivered not by right reason, but by a certain violence of mind. Nor is this fault in the Man, but in the nature it selfe of Eloquence, whose end (as all the Masters of Rhetorick teach us) is not truth (except by chance) but victory, and whose property is not to inform, but to allure.

XII. The third reason why men advise lesse successfully in a great convent is, because that thence arise Factions in a commonweal, and out of Factions, Seditions, and Civill War; for when equall Oratours doe combat with contrary Opinions, and Speeches, the conquered hates the Conquerour, and all those that were of his side, as holding his Counsell, and wisdom in scorne: and studyes all meanes to make the advise of his adversaries prejudiciall to the State, for thus he hopes to see the glory taken from him, and restored unto himself. Farthermore, where the Votes are not so unequall, but that the conquered have hopes by the accession of some few of their own opinion at another sitting to make the stronger Party, the chief heads do call the rest together; they advise apart how they may abrogate the former judgment given; they appoint to be the first and earliest at the next convent; they determine what, and in what order each man shall speak, that

the same businesse may again be brought to agitation, that so what was confirmed before by the number of their then present adversaries, the same may now in some measure become of no effect to them, being negligently absent. And this same kind of industry and diligence which they use to make a people, is commonly called a faction. But when a faction is inferiour in votes, and superiour, or not much inferiour in power, then what they cannot obtain by craft, and language, they attempt by force of armes, and so it comes to a civill warre. But some will say, these things doe not necessarily, nor often happen; he may as well say, that the chief Parties are not necessarily desirous of vain glory, and that the greatest of them seldom disagree in great matters.

XIII. It followes hence, that when the legislative power resides in such convents as these, the Laws must needs be inconstant, and change, not according to the alteration of the state of affaires, nor according to the changeableness of mens mindes, but as the major part, now of this, then of that faction, do convene; insomuch as the Laws do flote here, and there, as it were upon the waters.

XIV. In the fourth place, the counsels of great assemblies have this inconvenience, that whereas it is oft of great consequence, that they should be kept secret, they are for the most part discovered to the enemy before they can be brought to any effect, and their power, and will, is as soon known abroad, as to the People it selfe commanding at home.

XV. These inconveniences which are found in the deliberations of great assemblies do so farre forth evince Monarchy to be better then Democracy, as in Democracy affairs of great consequence are oftner trusted to be discussed by such like Committees, then in a Monarchy. Neither can it easily bee done otherwayes; for there is no reason why every man should not naturally rather minde his own private, then the publique businesse, but that here he sees a means to declare his eloquence, whereby he may gain the reputation of being ingenuous, and wise, and returning home to his friends, to his Parents, to his wife, and children, rejoyce, and triumph in the applause of his dexterous behaviour: As of old all the delight Marcus Coriolanus had in his warlike actions, was, to see his praises so well

pleasing to his Mother. But if the People in a Democracy would bestow the power of deliberating in matters of Warre, and Peace, either on one, or some very few, being content with the nomination of Magistrates, and publique Ministers, that is to say, with the authority without the ministration, then it must be confest, that in this particular, Democracy and Monarchy would be equall.

XVI. Neither do the conveniencies or inconveniences which are found to be more in one kind of government then another, arise from hence, namely, because the government it self, or the administration of its affairs, are better committed to one, then many; or on the other side, to many, then to some few. For Government, is the power, the administration of it, is the. act. now the Power in all kind of government is equall; the acts only differ, that is to say the actions, and motions of a common-weale, as they flow from the deliberations of many, or few, of skilfull, or impertinent men. Whence we understand, that the conveniences, or inconveniences of any government, depend not on him in whom the authority resides, but on his Officers; and therefore nothing hinders, but that the common-weale may be well governed, although the Monarch be a woman, or youth, or infant, provided that they be fit for affaires, who are endued with the publique Offices, and charges; And that which is said, Woe to the land whose King is a childe, doth not signifie the condition of a Monarchy to be inferiour to a Popular state, but contrariwise, that by accident it is the grievance of a Kingdome, that the King being a childe, it often happens, that many by ambition, and power, intruding themselves into publique counsels, the government comes to be administred in a Democraticall manner, and that thence arise those infelicities which for the most part accompany the Dominion of the People.

XVII. But it is a manifest sign, that the most absolute Monarchy is the best state of government, that not onely Kings, but even those Cities which are subject to the people, or to Nobles, give the whole command of warre to one only, and that so absolute, as nothing can be more (wherein by the way this must be noted also, that no King can give a Generall greater authority over his army, then he himselfe by Right may exercise over all his subjects). Monarchy therefore is the

best of all governments in the Camps. But what else, are many Common-wealths, then so many Camps strengthened with armes, and men against each other, whose state (because not restrained by any common power, howsoever an uncertain peace, like a short truce, may passe between them) is to be accounted for the state of nature, which is the state of War.

XVIII. Lastly, since it was necessary for the preservation of our selves to be subject to some Man, or Councell, we cannot on better condition be subject to any, then one whose interest depends upon our safety, and welfare; and this then comes to passe when we are the inheritance of the Ruler; for every man of his own accord endeavours the preservation of his inheritance. But the Lands, and Monies of the Subjects are not onely the Princes Treasure, but their bodies, and active minds; which will be easily granted by those who consider at how great rates the Dominion of lesser Countries is valued, and how much easier it is for men to procure mony, then money men; nor doe we readily meet with any example that shewes us when any subject, without any default of his own, hath by his Prince been despoiled of his life, or goods, through the sole licenciousnesse of his Authority.

XIX. Hitherto we have compared a Monarchicall, with a Popular State; we have said nothing of Aristocracy; we may conclude of this, by what hath been said of those, that, that which is hereditary, and content with the election of Magistrates; which transmits its deliberations to some few, and those most able; which simply imitates the government of Monarchs most, and the People least of all, is for the Subjects both better, and more lasting then the rest.

Chapter XI: Places and Examples of Scripture of the Rights of Government agreeable to what hath been said before

I. WE HAVE in the 6. Chapter, and the 2. Article, so derived the Originall of institutive, or politicall Government from the consent of the Multitude, that it appears they must either all consent, or be esteem'd as Enemies. Such was the beginning of Gods Government over the Jewes instituted by Moses, If ye will obey my voice indeed, & c. Ye shall be unto me a Kingdome of Priests, & c. And Moses came, and called the Elders of the People, & c. And all the people answered, and said: All that the Lord hath spoken we will do, Exod. 19. ver. 5, 6, 7, 8. Such also was the beginning of Moyses his power under God, or of his Vicegerency. And all the people saw the thunderings and lightnings, and the noyse of the Trumpet, &c. And they said unto Moyses, speak thou unto us, and we will hear. Exod. 20. 18, 19. The like beginning also had Sauls Kingdome. When yee saw that Nahash King of the children of Ammon came out against you, yee said unto me, nay, but a King shall raign over us, when the Lord your God was your King; Now therefore behold the King whom yee have chosen, and whom yee have desired. 1 Sam. 12. 12. But the major part only consenting, and not all (for there were certain Sons of Belial, who said, How shall this man save us? and they dispised him, 1 Sam. 10. 27.) those who did not consent were put to death as Enemies; And the people said unto Samuel, Who is he that said, shall Saul reign over us? Bring the men that we may put them to death. 1 Sam. 11:

II. In the same 6. Chapter, the 6. and 7. Articles, I have shewed, that all judgment and Wars depend upon the will and pleasure of him who beares the Supreme Authority; that is to say, in a Monarchy, on a Monarch, or King; and this is confirmed by the Peoples owne judgement. Wee also will be like all the Nations, and our King shall JUDGE us, and goe out before us, and fight our

BATTELS. 1 Sam. 8. 20. And what pertaines to judgements, and all other matters, whereof there is any controversie, whether they be Good, or Evill, is confirmed by the testimony of King Solomon. Give therefore thy Servant an understanding heart to JUDGE thy People, that I may discern between GOOD and EVILL. 1. Kings 3. 9. And that of Absolom, There is no man deputed of the King to heare thee. 2. Sam. 15. 3.

III. That Kings may not be punished by their subjects, as hath been shewed above in the sixth Chapter, and the twelfth Article, King David also confirms, who, though Saul sought to slay him, did notwithstanding refrain his hand from killing him, and forbad Abishai, saying, Destroy him, not. for who can stretch forth his hand against the Lords Anointed, and be innocent? 1 Sam: iv. 9. And when he had cut off the skirt of his garment, The Lord forbid (saith he) that I should doe this thing unto my Master the Lords Anointed, to stretchforth mine hand against him. 1 Sam. 24. 7. And commanded the Amalekite, who for his sake had slain Saul, to be put to death. 2 Sam. 1. 15.

IV. That which is said in the 17. Chapter of judges, at the 6. verse. In those dayes there was no King in Israel, but every man did that which was right in his own eyes (as though where there were not a Monarchy, there were an Anarchy or confusion of all things) may be brought as a testimony to prove the excellency of Monarchy above all other forms of government, unlesse that by the word King may perhaps be understood, not one man onely, but also a Court, provided that in it there reside a supreme power; which if it be taken in this sense, yet hence it may follow, that without a supreme and absolute power (which we have endeavoured to prove in the sixth Chapter) there will be a liberty for every man to doe what hee hath a minde, or whatsoever shall seem right to himselfe; which cannot stand with the preservation of mankind, and therefore in all Government whatsoever, there is ever a supreme power understood to be somewhere existent.

V. We have in the 8. Chapter, the 7. and 8. Article, said, that Servants must yeeld a simple obedience to their Lords, and in the 9. Chapter, Article 7. that Sonnes owe the same obedience to their Parents. Saint Paul sayes the same thing

concerning Servants, Servants obey in all things your Masters according to the flesh, not with eye service, as men-pleasers, but in singleness of heart, fearing God. Colos. 3. 22. Concerning Sonnes, Children obey your Parents in all things, for this is well pleasing unto the Lord. Colos. 3. 20. Now as wee by simple obedience understand ALL THINGS which are not contrary to the Lawes of God; so in those cited places of Saint Paul, after the word ALL THINGS, we must suppose, excepting those which are contrary to the Lawes of God.

VI. But that I may not thus by peecemeale prove the right of Princes, I will now instance those testimonies which altogether establish the whole power, (namely that there is an absolute and simple obedience due to them from their subjects) And first out of the new Testament. The Scribes and Pharisees sit in Moyses seat; all therefore, whatsoever they bid you observe, that observe, and doe. Mat. 23. 2. Whatsoever they bid you, (sayes he) observe, that is to say, obey simply: Why? Because they sit in Moyses seat; namely, the civill Magistrates, not Aaron, the Priests. Let every soule be subject to the higher powers, for there is no Power but of God, the powers that be are ordained of God; whosoever therefore resisteth the Power, resisteth the ordinance of God, and they that resist shall receive to themselves damnation. Rom. 13. 1. Now because the powers that were in Saint Pauls time were ordained of God, and all Kings did at that time require an absolute entire obedience from their subjects, it followes that such a power was ordained of God. Submit your selves unto every ordinance of man for the Lords sake, whether it bee to the King as supreme, or unto Governours, as unto them that are sent by him, for the punishment of wicked doers, and for the praise of them that doe well, for so is the will of God. 1 Pet. 2. 13. Again Saint Paul to Titus, Put them in mind to bee subject to Principalities and Powers, to obey Magistrates, &c. Cha. vers. 1. What Principalities? Was it not to the Principalities of those times, which required an absolute obedience? Furthermore, that we may come to the example of Christ himselfe, to whom the Kingdome of the Jewes belonged by hereditary Right, derived from David himselfe; He when he lived in the manner of a subject, both paid tribute unto Caesar, and pronounced it to be

due to him. Give unto Caesar (saith he) the things which are Caesars, and unto God, the things which are Gods. Mat. 22. 21. When it pleased him to shew himselfe a King, he required entire obedience. Goe (said he) into the village over against you, and straightway yee shall finde an Asse tyed, and a Colt with her, loose them, and bring them unto me; and if any man say ought unto you, yee shall say the Lord hath need of them. Mat: 2. This he did therefore by the right of being Lord, or a King of the Jewes. But to take away a subjects goods on this pretence onely, because the Lord hath need of them, is an absolute power. The most evident places in the old Testament are these, Goe thou near, and heare ALL that the Lord our God shall say, and speak thou unto us all that the Lord our God shall speak unto thee, and we will hear it, and doe it. Deut. 5. 27. But under the word all, is contained absolute obedience. Again to Joshua. And they answered Joshua saying, ALL that thou commandest us, we will doe, and whithersoever thou sendest us, we will goe; according as we hearkened unto Moyses in ALL things, so will we hearken unto thee, onely the Lord thy God be with thee, as he was with Moyses; whosoever hee be that doth rebell against thy Commandement, and will not hearken unto thy words in ALL that thou commandest him, he shall be put to death. Joshua 1. 16, 17, 18. And the Parable of the Bramble. Then said all the trees unto the Bramble, Come thou, and reign over us; And the Bramble said unto the trees, If in truth yee anoint me King over you, then come and put your trust in my shadow. and if not, let fire come out of the Bramble, and devoure the Cedars of Lebanon. Judges 9. vers. 14, 15. The sense of which words is, that we must acquiese to their sayings, whom we have truly constituted to be Kings over us, unlesse we would chuse rather to be consumed by the fire of a civill warre. But the Regall authority is more particularly described by God himselfe, in the 1. Sam. 8. vers. 9. &c. Shew them the Right of the King that shall reign over them, & c. This shall be the Right of the King that shall reign over you; he will take your Sons, and appoint them for himself, for his Chariots, and to be his horsemen, and some shall runne before his Chariots, & c. And he will take your daughters to be confectionaries, &c. And he will take your vineyards, and give them to his

Servants, &c. Is not this power absolute? And yet it is by God himself styled the KINGS RIGHT; neither was any man among the Jewes, no not the High Priest himselfe, exempted from this obedience. For when the King (namely Solomon) said to Abiathar the Priest, Get thee to Anathoth unto thine own fields, for thou art worthy of death, but I will not at this time put thee to death, because thou barest the Ark of the Lord God before David my father, and because thou hast been afflicted in all wherein my Father was afflicted. So Solomon thrust out Abiathar from being Priest unto the Lord. 1 Kings. 2. 26. It cannot by any argument be proved, that this act of his displeased the Lord; neither read we, that either Solomon was reprov'd, or that his Person at that time was any whit lesse acceptable to God.

Chapter XII: Of the internal causes, tending to the dissolution of any Government

I. HITHERTO HATH been spoken by what causes, and Pacts, Common-weals are constituted, and what the Rights of Princes are over their subjects; Now we will briefly say somewhat concerning the causes which dissolve them, or the reasons of seditions. Now as in the motion of naturall bodies, three things are to be considered, namely, internall disposition, that they be susceptible of the motion to be produced; the externall Agent, whereby a certain and determined motion may in act be produced; and the action it selfe: So also in a Common-weale where the subjects begin to raise tumults, three things present themselves to our regard; First the Doctrines and the Passions contrary to Peace, wherewith the mindes of men are fitted and disposed; next their quality and condition who sollicite, assemble, and direct them already thus disposed, to take up armes, and quit their allegiance; Lastly, the manner how this is done, or the faction it selfe. But one, and the first which disposeth them to sedition, is this, That the knowledge of good and evill belongs to each single man. In the state of nature indeed, where every man lives by equall Right, and have not by any mutuall Pacts submitted to the command of others, we have granted this to be true, nay in the first Chapter, Article 9. we have demonstrated it. But in the civil state it is false. For it was shown in cha. art. 9] that the civill Lawes were the Rules of good and evill, just and unjust, honest and dishonest; that therefore what the Legislator commands, must be held for good, and what he forbids for evill; and the Legislator is ever that Person who hath the supreme power in the Commonweale, that is to say, the Monarch in a Monarchy. We have confirmed the same truth in the eleventh Chapter, Article 2. out of the words of Solomon; for if private men may pursue that as good, and shun that as evill which appears to them to be so, to what end serve those words of his? Give

therefore unto thy servant an understanding heart to judge thy People, that I may discern between good and evill. Since therefore it belongs to Kings to discerne betweene good and evill, wicked are those, though usuall sayings, that he onely is a King who does righteously, and that Kings must not be obeyed, unlesse they command us just things, and many other such like. Before there was any government, just and unjust had no being, their nature onely being relative to some command, and every action in its own nature is indifferent; that it becomes just, or unjust, proceeds from the right of the Magistrate: Legitimate Kings therefore make the things they command, just, by commanding them, and those which they forbid, unjust, by forbidding them; but private men while they assume to themselves the knowledge of good and evill, desire to be even as Kings, which cannot be with the safety of the Common weale. The most ancient of all Gods commands is, Gen. 2. 15. Thou shalt not eat of the tree of knowledge of good and evill; and the most ancient of all diabolicall tentations, Cha. vers. 5. Yee shall be as Gods, knowing good and evill; and Gods first expostulation with man, vers. 11. Who told thee that thou wert naked? Hast thou eaten of the tree, whereof I commanded thee that thou shouldest not eat? As if he had said, how comest thou to judge that nakedness, wherein it seemed good to me to create thee, to be shamefull, except thou have arrogated to thy selfe the knowledge of good and evill?

II. Whatsoever any man doth against his conscience is a sinne, for he who doth so, contemns the Law. But we must distinguish: That is my sinne indeed, which committing, I doe beleieve to be my sinne; but what I beleieve to be another mans sin, I may sometimes doe that without any sin of mine. For if I be commanded to doe that which is a sin in him who commands me, if I doe it, and he that commands me be by Right, Lord over me, I sinne not; for if I wage warre at the Commandement of my Prince, conceiving the warre to be unjustly undertaken, I doe not therefore doe unjustly, but rather if I refuse to doe it, arrogating to my selfe the knowledge of what is just and unjust, which pertains onely to my Prince. They who observe not this distinction, will fall into a necessity of sinning, as oft

as any thing is commanded them, which either is, or seems to be unlawfull to them: for if they obey, they sin against their conscience, and if they obey not, against Right. If they sin against their conscience, they declare that they fear not the paines of the world to come; if they sinne against Right, they doe as much as in them lyes, abolish humane society, and the civill life of the present world. Their opinion therefore who teach, that subjects sinne when they obey their Princes commands, which to them seem unjust, is both erroneous, and to be reckoned among those which are contrary to civill obedience; and it depends upon that originall error which we have observed above in the foregoing Article; for by our taking upon us to judge of good and evill, we are the occasion, that as well our obedience, as disobedience, becomes sin unto us.

III. The third seditious doctrine springs from the same root, That Tyrannicide is lawfull; Nay, at this day it is by many Divines, and of old it was by all the Philosophers, Plato, Aristotle, Cicero, Seneca, Plutarch, and the rest of the maintainers of the Greek, and Roman Anarchies, held not only lawful, but even worthy of the greatest praise. And under the title of Tyrants, they mean not onely Monarchs, but all those who bear the chief rule in any Government whatsoever; for not Pisistratus onely at Athens, but those thirty also who succeeded him, and ruled together, were all called Tyrants. But he, whom men require to be put to death as being a Tyrant, commands either by Right, or without Right; if without Right, he is an enemy, and by Right to be put to death; but then this must not be called the killing a Tyrant, but an enemy: if by Right, then the divine interrogation takes place, Who hath told thee that he was a Tyrant, hast thou eaten of the tree whereof I commanded thee that thou shouldest not eat? For why doest thou call him a Tyrant, whom God hath made a King, except that thou being a private Person, usurpest to thy self the knowledge of good and evill? But how pernicious this opinion is to all governments, but especially to that which is Monarchicall, we may hence discern, namely, that by it every King, whether good or ill, stands exposed to be condemned by the judgement, and slain by the hand of every murtherous villain.

IV. The fourth adversary opinion to Civill Society, is theirs, who hold, That they who bear Rule are Subject also to the Civill Lawes. Which hath been sufficiently proved before not to be true in the 6. Chap. Artic. 14. from this Argument, That a City can neither be bound to it self, nor to any subject; not to it selfe, because no man can be obliged except it be to another; not to any Subject, because the single wills of the Subjects are contained in the will of the City, insomuch, that if the City will be free from all such obligation, the Subjects will so too; and by consequence she is so. But that which holds true in a City, that must be supposed to be true in a man, or an assembly of men, who have the Supreme Authority, for they make a City, which hath no being but by their Supreme Power. Now that this Opinion cannot consist with the very being of Government, is evident from hence, that by it the knowledge of what is Good and Evill, that is to say, the definition of what is, and what is not against the Lawes, would return to each single Person: Obedience therefore will cease as oft as any thing seemes to be commanded contrary to the Civill Lawes, and together with it, all coercive jurisdiction, which cannot possibly be without the destruction of the very essence of Government. Yet this Errour hath great props, Aristotle, and others; who, by reason of humane infirmity, suppose the Supreme Power to be committed with most security to the Lawes onely; but they seem to have lookt very shallowly into the nature of, Government, who thought that the constraining Power, the interpretation of Lawes, and the making of Lawes, (all which are powers necessarily belonging to Government) should be left wholly to the Lawes themselves. Now although particular Subjects may sometimes contend in judgement, and goe to Law with the Supreme Magistrate, yet this is onely then, when the question is not what the Magistrate may, but what by a certain Rule he hath declared he would doe. As, when by any Law the Judges sit upon the life of a Subject, the question is not whether the Magistrate could by his absolute Right deprive him of his life; but whether by that Law his will was that he should be deprived of it; but his will was, he should, if he brake the Law. else, his will was he should not: This therefore, that a Subject may have an action of Law against

his Supreme Magistrate, is not strength of Argument sufficient to prove that he is tyed to his own Lawes. On the contrary, it is evident, that he is not tied to his owne Lawes, because no man is bound to himself. Lawes therefore are set for Titius, and Caius, not for the Ruler: however, by the ambition of Lawyers, it is so ordered, that the Lawes, to unskilfull men seeme not to depend on the Authority of the Magistrate, but their Prudence.

V. In the fifth place, That the Supreme Authority may be divided, is a most fatall Opinion to all Common-weales. But diverse men divide it diverse wayes. For some divide it so as to grant a Supremacy to the Civill Power in matters pertaining to Peace, and the benefits of this life, but in things concerning the salvation of the Soul they transfer it on others. Now, because justice is of all things most necessary to Salvation, it happens, that Subjects measuring justice, not as they ought, by the Civill Lawes, but by the precepts and doctrines of them who, in regard of the Magistrate, are either private mens or strangers, through a superstitious fear dare not perform the obedience due to their Princes, through fear falling into that which they most feared: Now what can be more pernicious to any state, then that men should, by the apprehension of everlasting torments, be deterred from obeying their Princes, that is to say, the Lawes, or from being just? There are also some who divide the Supreme Authority so as to allow the power of War, and Peace, unto one, (whom they call a Monarch) but the right of raising Monies they give to some others, and not to him: But because monies are the sinewes of War, and Peace, they who thus divide the Authority, doe either really not divide it at all, but place it wholly in them, in whose power the money is, but give the name of it to another, or if they doe really divide it, they dissolve the Government: for neither upon necessity can War be waged, nor can the publique Peace be preserved without Money.

VI. It is a common doctrine, That faith and holinesse are not acquired by study, and naturall reason, but are alwayes supernaturally infused, and inspired into men: which, if it were true, I understand not why we should be commanded to give an account of our faith; or why any man, who is truly a Christian, should not

be a Prophet; or lastly, why every man should not judge what's fit for him to doe, what to avoid, rather out of his own inspiration, then by the precepts of his Superiours, or right Reason. A return therefore must be made to the private knowledge of Good and Evil; which cannot be granted without the ruine of all Governments. This Opinion hath spread it self so largely through the whole Christian world, that the number of Apostates from natural reason is almost become infinite. And it sprang from sick-brained men, who having gotten good store of Holy Words by frequent reading of the Scriptures, made such a connexion of them usually in their preaching, that their Sermons, signifying just nothing, yet to unlearned men seemed most divine; for he whose non-sense appears to be a Divine speech, must necessarily seeme to be inspired from above.

VII. The seventh Doctrine opposite to Government, is this, That each subject hath an absolute Dominion over the goods he is in possession of. That is to say, such a propriety as excludes not only the right of all the rest of his fellow-subjects to the same goods, but also of the Magistrate himself. Which is not true; for they who have a Lord over them, have themselves no Lordship, as hath been proved, Cha. Artic. 5. Now the Magistrate is Lord of all his Subjects, by the constitution of Government. Before the yoke of Civill Society was undertaken, no man had any Proper Right; all things were common to all men. Tell me therefore, how gottest thou this propriety but from the Magistrate? How got the Magistrates it, but that every man transferred his Right on him? And thou therefore hast also given up thy Right to him; thy Dominion therefore, and Propriety, is just so much as he will, and shall last so long as he pleases; even as in a Family, each Son hath such proper goods, and so long lasting, as seeme good to the Father. But the greatest part of men who professe Civill Prudence, reason otherwise; we are equall (say they) by nature; there is no reason why any man should by better Right take my goods from me, then I his from him; we know that many sometimes is needfull for the defence and maintenance of the publique; but let them, who require it, shew us the present necessity, and they shall willingly receive it. They who talk thus, know not, that what they would have, is already

done from the beginning in the very constitution of Government, and therefore speaking as in a dissolute multitude, and yet not fashioned Government, they destroy the frame.

VIII. In the last place, it's a great hindrance to Civill Government, especially Monarchicall, that men distinguish not enough between a People and a Multitude. The People is somewhat that is one, having one will, and to whom one action may be attributed; none of these can properly be said of a Multitude. The People rules in all Governments, for even in Monarchies the People Commands; for the People wills by the will of one man; but the Multitude are Citizens, that is to say, Subjects. In a Democracy, and Aristocracy, the Citizens are the Multitude, but the Court is the People. And in a Monarchy, the Subjects are the Multitude, and (however it seeme a Paradox) the King is the People. The common sort of men, and others who little consider these truthes, do alwayes speak of a great number of men, as of the People, that is to say, the City; they say that the City hath rebelled against the King (which is impossible) and that the People will, and nill, what murmuring and discontented Subjects would have, or would not have, under pretence of the People, stirring up the Citizens against the City, that is to say, the Multitude against the People. And these are almost all the Opinions wherewith Subjects being tainted doe easily Tumult. And forasmuch as in all manner of Government Majesty is to be preserv'd by him, or them who have the Supreme Authority, the crimen laesae Majestatis naturally cleaves to these Opinions.

IX. There is nothing more afflicts the mind of man then Poverty, or the want of those things which are necessary for the preservation of life, and honour; and though there be no man but knowes that riches are gotten with industry, and kept by frugality, yet all the poor commonly lay the blame on the Evill Government, excusing their own sloth, and luxury, as if their private goods forsooth were wasted by publique exactions; But men must consider, that they who have no patrimony, must not onely labour that they may live, but fight too, that they may labour. Every one of the Jewes, who in Esdras his time built the Walls of Jerusalem, did the work with one hand, and held the Sword in the other. In all

Government we must conceive that the hand which holds the Sword is the King, or Supreme Councill, which is no lesse to be sustained, and nourisht, by the Subjects care and industry, then that wherewith each man procures himself a private fortune; and that Customes, and Tributes, are nothing else but their reward who watch in Armes for us, that the labours and endeavours of single men may not be molested by the incursion of enemies; and that their complaint, who impute their poverty to publick Persons, is not more just, then if they should say that they are become in want by paying of their debts: But the most part of men consider nothing of these things, for they suffer the same thing with them who have a disease they call an Incubus, which springing from Gluttony, it makes men believe they are invaded, opprest, and stifled with a great weight: Now it is a thing manifest of it selfe, that they who seeme to themselves to be burthened with the whole load of the Common-weal, are prone to be Seditious; and that they are affected with change, who are distasted at the present state of things.

X. Another noxious disease of the mind is theirs, who having little employment, want Honour and Dignity. All men naturally strive for Honour, and Preferment, but chiefly they who are least troubled with caring for necessary things. For these men are invited by their vacancy sometimes to disputation among themselves concerning the Common-weal, sometimes to an easie reading of Histories, Politiques, Orations, Poems, and other pleasant Books; and it happens, that hence they think themselves sufficiently furnisht both with wit, and learning, to administer matters of the greatest consequence. Now because all men are not what they appear to themselves, and if they were, yet all (by reason of the multitude) could not be received to publique Offices, its necessary that many must be passed by. These therefore conceiving themselves affronted, can desire nothing more, partly out of envy to those who were preferred before them, partly out of hope to overwhelm them, then ill successe to the publique Consultations; and therefore its no marvell if with greedy appetites they seek for occasions of innovations.

XI. The hope of overcomming is also to be numbred among other seditious inclinations. For let there be as many men as you wil, infected with opinions repugnant to Peace, and civill Government; let there be as many as there can, never so much wounded and torne with affronts, and calumnies, by them who are in Authority; yet if there be no hope of having the better of them, or it appear not sufficient, there will no sedition follow; every man will dissemble his thoughts, and rather content himself with the present burthen, then hazard an heavier weight. There are four things necessarily requisite to this hope: Numbers, Instruments, mutuall trust, and Commanders. To resist publique Magistrates without a great number, is not Sedition, but Desperation. By Instruments of war I mean all manner of armes, munition, and other necessary provision, without which Number can doe nothing, nor Arms neither without mutuall trust; Nor all these without union under some Commander, whom of their own accord, they are content to, obey. not as being engaged by their submission to his command (for we have already in this very Chapter, supposed these kind of men not to understand, being obliged beyond that which seems right and good in their own eyes) but for some opinion they have of his vertue, or military skill, or resemblance of humours. If these four be near at hand to men grieved with the present state, and measuring the justice of their actions by their own judgements, there will be nothing wanting to sedition and confusion of the Realme, but one to stirre up and quicken them.

XII. Salust his Character of Catiline, (then whom there never was a greater Artist in raising seditions) is this, That he had great eloquence, and little wisdom. he separates wisdom from eloquence, attributing this as necessary to a man born for commotions, adjudging that as an instructresse of Peace, and quietnesse. Now, eloquence is twofold. The one is an elegant, and cleare expression of the conceptions of the mind, and riseth partly from the contemplation of the things themselves, partly from an understanding of words taken in their own proper, and definite signification; the other is a commotion of the Passions of the minde (such as are hope, fear, anger, pittie) and derives from a metaphoricall use of words

fitted to the Passions: That forms a speech from true Principles, this from opinions already received, what nature soever they are of. The art of that is Logick, of this Rhetorick; the end of that is truth, of this victory. Each hath its use, that in deliberations, this in exhortations; for that is never disjoyned from wisdom, but this almost ever. But that this kind of powerfull eloquence, separated from the true knowledge of things, that is to say, from wisdom, is the true character of them who sollicite, and stirre up the people to innovations, may easily be gathered out of the work it selfe which they have to doe; for they could not poyson the people with those absurd opinions contrary to Peace and civill society, unlesse they held them themselves, which sure is an ignorance greater then can well befall any wise man. For he that knows not whence the Lawes derive their power, which are the Rules of just and unjust, honest and dishonest, good and evill; what makes and preserves Peace among men, what destroyes it; what is his, and what anothers; Lastly, what he would have done to himselfe (that he may doe the like to others) is surely to be accounted but meanly wise. But that they can turn their Auditors out of fools into madmen; that they can make things to them who are ill-affected seem worse, to them who are well-affected seem evil; that they can enlarge their hopes, lessen their dangers beyond reason: this they have from that sort of eloquence, not which explains things as they are, but from that other, which by moving their mindes, makes all things to appear to bee such as they in their mindes prepared before, had already conceived them.

XIII. Many men who are themselves very well affected to civill society, doe through want of knowledge, cooperate to the disposing of subjects mindes to sedition, whilst they teach young men a doctrine conformable to the said opinions in their Schooles, and all the people in their Pulpits. Now they who desire to bring this disposition into Act, place their whole endeavour in this, First, that they may joyn the ill affected together into faction and conspiracy; next, that themselves may have the greatest stroke in the faction: They gather them into faction, while they make themselves the relators, and interpretors of the counsels and actions of single men, and nominate the Persons and Places, to assemble and deliberate of

such things whereby the present government may be reformed, according as it shall seem best to their interests. Now to the end that they themselves may have the chief rule in the faction, The faction must be kept in a faction, that is to say, they must have their secret meetings apart with a few, where they may order what shall afterward be propounded in a general meeting, and by whom, and on what subject, and in what order each of them shall speak, and how they may draw the powerfulllest, and most popular men of the faction to their side: And thus when they have gotten a faction big enough, in which they may rule by their eloquence, they move it to take upon it the managing of affaires; and thus they sometimes oppresse the Commonwealth, namely where there is no other faction to oppose them, but for the most part they rend it, and introduce a civill warre. For folly and eloquence concur in the subversion of government in the same manner (as the fable hath it) as heretofore the daughters of Pelias King of Thessaly, conspired with Medea against their father; They going to restore the decrepit old man to his youth again, by the counsell of Medea, they cut him into peeces, and set him in the fire to boyle, in vain expecting when he would live again; So the common people through their folly (like the daughters of Pelias) desiring to renew the ancient government, being drawne away by the eloquence of ambitious men, as it were by the witchcraft of Medea, divided into faction, they consume it rather by those flames, then they reforme it.

Chapter XIII: Concerning the duties of them who bear Rule

I. BY WHAT hath hitherto been said, the duties of Citizens and in any kind of government whatsoever, and the Power of the supreme Ruler over them are apparent; but we have as yet said nothing of the duties of Rulers, and how they ought to behave themselves towards their Subjects; We must then distinguish between the Right, and the exercise of supreme authority, for they can be divided; as for example, when he who hath the Right, either cannot, or will not be present in judging trespasses, or deliberating of affaires: For Kings sometimes by reason of their age cannot order their affaires, sometimes also though they can doe it themselves, yet they judge it fitter, being satisfied in the choyce of their Officers and Counsellors, to exercise their power by them. Now where the Right and exercise are severed, there the government of the Commonweale, is like the ordinary government of the world, in which God, the mover of all things, produceth naturall effects by the means of secondary causes; but where he, to whom the Right of ruling doth belong, is himselfe present in all judicatures, consultations, and publique actions, there the administration is such, as if God beyond the ordinary course of nature, should immediately apply himself unto all matters. We will therefore in this Chapter summarily and briefly speak somewhat concerning their duties who exercise authority, whether by their own or others Right. Nor is it my purpose to descend into those things, which being divers from others, some Princes may doe, for this is to be left to the Politicall Practices of each Common weale.

II. Now all the duties of Rulers are contained in this one sentence, The safety of the people is the supreme Law; for although they who among men obtain the chieftest Dominion, cannot be subject to Lawes properly so called, that is to say, to the will of men, because to be chief, and subject, are contradictories; yet is it their

duty in all things, as much as possibly they can, to yeeld obedience unto right reason, which is the naturall, morall, and divine Law. But because dominions were constituted for Peaces sake, and Peace was sought after for safeties sake, he, who being placed in authority, shall use his power otherwise then to the safety of the people, will act against the reasons of Peace, that is to say, against the Lawes of nature; Now as the safety of the People dictates a Law by which Princes know their duty, so doth it also teach them an art how to procure themselves a benefit; for the power of the Citizens, is the power of the City, that is to say, his that bears the chief Rule in any state.

III. By the people in this place we understand, not one civill Person, namely the City it selfe which governs, but the multitude of subjects which are governed; for the City was not instituted for its own, but for the subjects sake; and yet a particular care is not required of this or that man; for the Ruler (as such) provides no otherwise for the safety of his people, then by his Lawes, which are universall; and therefore he hath fully discharged himselfe, if he have thoroughly endeavoured by wholesome constitutions, to establish the welfare of the most part, and made it as lasting as may be; and that no man suffer ill, but by his own default, Or by some chance which could not be prevented; but it sometimes conduces to the safety of the most part, that wicked men doe suffer.

IV. But by safety must be understood, not the sole preservation. of life in what condition soever, but in order to its happines. For to this end did men freely assemble themselves, and institute a government, that they might, as much as their humane condition would afford, live delightfully. They therefore who had undertaken the administration of power in such a kinde of government, would sinne against the Law of nature (because against their trust who had committed that power unto them) if they should not study, as much as by good Laws could be effected, to furnish their subjects abundantly, not only with the good things belonging to life, but also with those which advance to delectation. They who have acquired Dominion by arms, doe all desire that their subjects may be strong in body and mind, that they may serve them the better; wherefore if they should

not endeavour to provide them, not only with such things whereby they may live, but also with such whereby they may grow strong and lusty, they would act against their own scope and end.

V. And first of all, Princes doe beleieve that it mainly concerns eternall salvation, what opinions are held of the Deity, and what manner of worship he is to be adored with; which being supposed, it may be demanded, whether chief Rulers, and whosoever they be, whether one or more, who exercise supreme authority, sin not against the Law of nature, if they cause not such a doctrine, and worship, to be taught and practised (or permit a contrary to be taught and practised) as they beleieve necessarily conduceth to the eternall salvation of their subjects? It is manifest that they act against their conscience, and that they will, as much as in them lies, the eternall perdition of their subjects; for if they willed it not, I see no reason why they should suffer, (when being supreme they cannot be compelled) such things to be taught and done, for which they beleieve them to be in a damnable state. But we will leave this difficulty in suspence.

VI. The benefits of subjects respecting this life only, may be distributed into foure kindes. 1. That they be defended against forraign enemies. 2. That Peace be preserved at home. 3. That they be enrich't as much as may consist with publique security. 4. That they enjoy a harmelesse liberty; For supreme Commanders can conferre no more to their civill happinesse, then that being preserved from forraign and civill warres, they may quietly enjoy that wealth which they have purchased by their own industry.

VII. There are two things necessary for the Peoples defence; To be warned, and to be forearmed; for the state of Common-wealths considered in themselves, is natural, that is to say, hostile; neither if they cease from fighting, is it therefore to be called Peace, but rather a breathing time, in which one enemy observing the motion and countenance of the other, values his security not according to the Pacts, but the forces and counsels of his adversary; And this by naturall Right, as hath been shewed in the second Chapter, 10. Artic. from this, that contracts are invalid in the state of nature, as oft as any just fear doth intervene; It is therefore

necessary to the defence of the City, First, that there be some who may as near as may be, search into, and discover the counsels and motions of all those who may prejudice it. For discoverers to Ministers of State, are like the beames of the Sunne to the humane soule, and we may more truly say in vision politicall, then naturall, that the sensible, and intelligible Species of outward things, not well considered by others, are by the ayre transported to the soule, (that is to say to them who have the Supreme Authority) and therefore are they no lesse necessary to the preservation of the State, then the rayes of the light are to the conservation of man; or if they be compared to Spiders webs, which extended on all sides by the finest threds, doe warn them, keeping in their small holds, of all outward motions; They who bear Rule can no more know what is necessary to be commanded for the defence of their Subjects without Spies, then those Spiders can when they shall goe forth, and whether they shall repair, without the motion of those threds.

VIII. Farthermore, its necessarily requisite to the peoples defence, that they be fore-armed. Now to be fore-armed is to be furnisht with Souldiers, Armes, Ships, Forts and Monies, before the danger be instant; for the listing of Souldiers, and taking up of Armes after a blow is given, is too late, at least if not impossible. In like manner, not to raise Forts, and appoint Garrisons in convenient places, before the Frontiers are invaded, is to be like those Country Swains (as Demosthenes said) who ignorant of the art of Fencing, with their Bucklers guarded those parts of the body where they first felt the smart of the strokes. But they who think it then seasonable enough to raise Monies for the maintenance of Souldiers, and other Charges of War, when the danger begins to shew it self, they consider not surely how difficult a matter it is to wring suddainly out of close-fisted men so vast a proportion of Monies; for almost all men, what they once reckon in the number of their goods, doe judge themselves to have such a right and propriety in it, as they conceive themselves to be injured whensoever they are forced to imploy but the least part of it for the publique good. Now a sufficient stock of monies to defend the Country with Armes, will not soon be raised out of the

treasure of Imposts, and Customes; we must therefore, for fear of War, in time of Peace hoord up good summs, if we intend the safety of the Common-weal. Since therefore it necessarily belongs to Rulers for the Subjects safety to discover the Enemies Counsell, to keep Garrisons, and to have Money in continuall readinesse, and that Princes are by the Law of Nature bound to use their whole endeavour in procuring the welfare of their Subjects, it followes, that its not onely lawfull for them to send out Spies, to maintain Souldiers, to build Forts, and to require Monies for these purposes, but also, not to doe thus, is unlawfull. To which also may be added, whatsoever shall seeme to conduce to the lesning of the power of forraigners whom they suspect, whether by sleight, or force. For Rulers are bound according to their power to prevent the evils they suspect, lest peradventure they may happen through their negligence.

IX. But many things are required to the conservation of inward Peace, because many things concur (as hath been shewed in the foregoing Chapter) to its perturbation. We have there shewed, that some things there are which dispose the minds of men to sedition, others which move and quicken them so disposed. Among those which dispose them, we have reckoned in the first place certaine perverse doctrines. Its therefore the duty of those who have the chief Authority; to root those out of the mindes of men, not by commanding, but by teaching; not by the terrour of penalties, but by the perspicuity of reasons; the Lawes whereby this evill may be withstood are not to be made against the Persons erring, but against the Errours themselves. Those errors which in the foregoing Chapter we affirmed were inconsistent with the quiet of the Common-weal, have crept into the mindes of ignorant men, partly from the Pulpit, partly from the daily discourses of men, who by reason of little employment, otherwise, doe finde leasure enough to study; and they got into these mens mindes by the teachers of their youth in publique schooles. Wherefore also, on the other side, if any man would introduce sound Doctrine, he must begin from the Academies: There, the true, and truly demonstrated foundations of civill Doctrine are to be laid, wherewith young men being once endued, they may afterward both in private and

publique instruct the vulgar. And this they will doe so much the more cheerfully, and powerfully, by how much themselves shall be more certainly convinced of the truth of those things they profess, and teach; for seeing at this day men receive propositions, though false, and no more intelligible, then if a man should joyne together a company of termes drawn by chance out of an urne, by reason of the frequent use of hearing them; how much more would they for the same reason entertain true doctrines suitable to their own understandings, and the nature of things? I therefore conceive it to be the duty of Supreme Officers to cause the true elements of civill Doctrine to be written, and to command them to be taught in all the Colledges of their severall Dominions.

X. In the next place we shewed that grief of mind arising from want did dispose the Subjects to Sedition, which want, although deriv'd from their own luxury, and sloth, yet they impute it to those who govern the Realm, as though they were drained and opprest by publique Pensions. Notwithstanding it may sometimes happen that this complaint may be just, namely, when the burthens of the Realm are unequally imposed on the Subjects; For that which to all together is but a light weight, if many withdraw themselves, it wil be very heavy, nay, even intollerable to the rest: Neither are men wont so much to grieve at the burthen it self, as at the inequality. With much earnestnes therefore men strive to be freed from taxes, & in this conflict the lesse happy, as being overcome, do envy the more fortunate. To remove therefore all just complaint, its the interest of the publique quiet, and by consequence it concernes the duty of the Magistrate, to see that the publique burthens be equally born. Furthermore, since what is brought by the subjects to publick use, is nothing else but the price of their bought Peace, its reason good, that they who equally share in the peace, should also pay an equall part either by contributing their Monies, or their labours to the Common-weal. Now it is the Law of Nature (by the 15. Article of the 3. Chapter) that every man in distributing right to others, doe carry himself equall to all; wherefore Rulers are by the naturall Law obliged to lay the burthens of the Common-weal equally on their Subjects.

XI. Now in this place we understand an equality, not of Money, but of Burthen, that is to say, an equality of reason between the Burthens, and the Benefits. For although all equally enjoy Peace, yet the benefits springing from thence, are not equall to all; for some get greater possessions, others lesse; and againe, some consume lesse, others more. It may therefore be demanded whether Subjects ought to contribute to the publique, according to the rate of what they gain, or of what they spend, that is to say, whether the persons must be taxt, so as to pay contribution according to their wealth, or the goods themselves, that every man contribute according to what he spends. But if we consider, where Monies are raised according to wealth, there they who have made equall gain, have not equall possessions, because that one preserves what he hath got by frugality, another wastes it by luxury, and therefore equally rejoycing in the benefit of Peace, they doe not equally sustaine the Burthens of the Common-weal: and on the other side, where the goods themselves are taxt, there every man, while he spends his private goods, in the very act of consuming them he undiscernably payes part due to the Common-weal, according to, not what he hath, but what by the benefit of the Realm he hath had. It is no more to be doubted, but that the former way of commanding monies is against equity, and therefore against the duty of Rulers, the latter is agreeable to reason, and the exercise of their authority.

XII. In the third place, we said that that trouble of minde which riseth from ambition was offensive to publique Peace. For there are some who seeming to themselves to be wiser then others, and more sufficient for the managing of affaires then they who at present doe govern, when they can no otherwise declare how profitable their vertue would prove to the Common-weale, they shew it, by harming it; but because ambition and greedinesse of honours cannot be rooted out of the mindes of men, its not the duty of Rulers to endeavour it; but by constant application of rewards, and punishments, they may so order it, that men may know that the way to honour is, not by contempt of the present government, nor by factions, and the popular ayre, but by the contraries. They are good men who observe the Decrees, the Lawes and Rights of their Fathers; if with a constant

order we saw these adorned with honours, but the factious punished, and had in contempt by those who bear command, there would be more ambition to obey, then withstand. Notwithstanding it so happens sometimes, that as we must stroke a horse by reason of his too much fiercenesse, so a stiffe-neckt subject must be flatter'd for fear of his power; but as that happens when the rider, so this, when the Commander is in danger of falling. But we speak here of those, whose authority and power is intire. Their duty (I say) it is to cherish obedient subjects, and to depresse the factious all they can; nor can the publique power be otherwise preserved, nor the subjects quiet without it.

XIII. But if it be the duty of Princes to restrain the factious, much more does it concern them to dissolve and dissipate the factions themselves. Now I call a faction, a multitude of subjects gathered together, either by mutuall contracts among themselves, or by the power of some one, without his or their authority who bear the supreme Rule: A faction therefore is as it were a City in a City; for as by an Union of men in the state of nature a City receives its being, so by a new union of subjects, there ariseth a faction. According to this definition, a multitude of subjects who have bound themselves simply to obey any forreign Prince, or Subject, or have made any Pacts, or Leagues of mutuall defence between themselves against all men, not excepting those who have the supreme power in the City, is a faction. Also favour with the vulgar if it be so great, that by it an Army may be rais'd, except publique caution be given, either by hostages, or some other pledges, contains faction in it; The same may be said of private wealth, if it exceed, because all things obey mony. Forasmuch therefore as it is true, that the state of Cities among themselves is naturall, and hostile, those Princes who permit factions, doe as much as if they received an enemy within their walls, which is Contrary to the subjects safety, and therefore also against the Law of nature.

XIV. There are two things necessary to the enriching of Subjects, Labour and thrift; there is also a third which helps, to wit the naturall increase of the earth and water; and there is a fourth too, namely the Militia, which sometimes augments,

but more frequently lessens the subjects stock. The two first are only necessary. For a City constituted in an Island of the Sea, no greater then will serve for dwelling, may grow rich without sowing, or fishing, by merchandize, and handicrafts only; but there is no doubt if they have a territory, but they may be richer with the same number, or equally rich, being a greater number. But the fourth, namely the Militia, was of old reckoned in the number of the gaining Arts, under the notion of Booting or taking Prey; and it was by mankind, (disperst by families) before the constitution of civill societies, accounted just and honourable; for preying, is nothing else but a warre waged with small forces; And great Common-weales, namely that of Rome, and Athens, by the spoyles of warre, forraigne tribute, and the territories they have purchased by their armes, have sometimes so improved the Common-wealth, that they have not onely not required any publique monies from the poorer sort of subjects, but have also divided to each of them both monies and lands. But this kind of increase of riches, is not to be brought into rule and fashion: For the Militia in order to profit, is like a Dye wherewith many lose their estates, but few improve them. Since therefore there are three things only, the fruits of the earth and water, Labour and Thrift, which are expedient for the enriching of subjects, the duty of Commanders in chief, shall be conversant onely about those three. For the first, those lawes will be usefull which countenance the arts that improve the increase of the earth, and water, such as are husbandry, and fishing. For the second, all Lawes against idlenesse, and such as quicken industry, are profitable; the art of Navigation (by help whereof the commodities of the whole world, bought almost by labour only, are brought into one City) and the Mechanicks, (under which I comprehend all the arts of the most excellent workmen) and the Mathematicall sciences, the fountains of navigatory and mechanick employments, are held in due esteem and honour. For the third, those lawes are usefull, whereby all inordinate expence, as well in meats, as in clothes, and universally in all things which are consumed with usage, is forbidden. Now because such lawes are beneficiall to the ends above specified, it belongs also to the Office of supreme Magistrates, to establish them.

XV. The liberty of subjects consists not in being exempt from the Lawes of the City, or that they who have the supreme power cannot make what Laws they have a mind to; but because all the motions and actions of subjects, are never circumscribed by Lawes, nor can be, by reason of their variety, it is necessary that there be infinite cases, which are neither commanded, nor prohibited, but every man may either doe, or not doe them, as he lists himselfe. In these, each man is said to enjoy his liberty, and in this sense liberty is to be understood in this place, namely, for that part of naturall Right, which is granted and left to Subjects by the civill Lawes. As water inclosed on all hands with banks, stands still and corrupts; having no bounds, it spreads too largely, and the more passages it findes, the more freely it takes its current; so subjects, if they might doe nothing without the commands of the Law would grow dull, and unwildly, if all, they would be disperst, and the more is left undetermined by the Lawes, the more liberty they enjoy. Both extremes are faulty, for Lawes were not invented to take away, but to direct mens actions, even as nature ordained the banks, not to stay, but to guide the course of the streame. The measure of this liberty is to be taken from the subjects, and the Cities good. Wherefore in the first place it is against the charge of those who command, and have the authority of making lawes, that there should be more lawes then necessarily serve for good of the Magistrate, and his Subjects; for since men are wont commonly to debate what to do, or not to do, by naturall reason, rather then any knowledge of the Lawes, where there are more Lawes then can easily be remembred, and whereby such things are forbidden, as reason of it selfe prohibites not of necessity, they must through ignorance, without the least evill intention, fall within the compasse of Lawes, as gins laid to entrap their harmelesse liberty, which supreme Commanders are bound to preserve for their subjects by the Lawes of nature.

XVI. It is a great part of that liberty which is harmlesse to civill government, and necessary for each subject to live happily, that there be no penalties dreaded, but what they may both foresee, and look for. and this is done, where there are either no punishments at all defined by the Lawes, or greater not required then are

defined. Where there are none defined, there he that hath first broken the Law, expects an indefinite or arbitrary punishment, and his feare is supposed boundlesse, because it relates to an unbounded evill; now the Law of nature commands them who are not subject to any civill Lawes, (by what we have said in the third Chapter, Artic. 11.) and therefore supreme Commanders, that in taking revenge and punishing, they must not so much regard the past evill, as the future good, and they sin, if they entertain any other measure in arbitrary punishment, then the publique benefit. But where the punishment is defined, either by a Law prescribed, as when it is set down in plain words, that he that shall doe thus, or thus, shall suffer so and so; or by practice, as when the penalty, (not by any Law prescribed, but arbitrary from the beginning) is afterward determined by the punishment of the first. delinquent (for naturall equity commands that equall transgressors be equally punished); there to impose a greater penalty then is defined by the Law, is against the Law of nature. For the end of punishment is not to compell the will of man, but to fashion it, & make it such as he would have it who hath set the penalty. And deliberation is nothing else but a weighing, as it were in scales, the conveniencies, and inconveniencies of the fact we are attempting; where, that which is more weighty, doth necessarily according to its inclination prevaile with us. If therefore the Legislator doth set a lesse penalty on a crime, then will make our feare more considerable with us, then our lust; that excesse of lust above the feare of punishment, whereby sinne is committed, is to be attributed to the Legislator (that is to say) to the supreme; and therefore if he inflict a greater punishment, then himselfe hath determined in his Lawes, he punisheth that in another, in which he sinned himselfe.

XVII. It pertaines therefore to the harmlesse and necessary liberty of subjects, that every man may without feare, enjoy the rights which are allowed him by the Lawes; for it is in vain to have our own distinguisht by the Lawes from anothers, if by wrong judgement; robbery, theft, they may bee again confounded. But it falls out so, that these doe happen where Judges are corrupted; for the fear whereby men are deterred from doing evill, ariseth not from hence, namely,

because penalties are set, but because they are executed; for we esteeme the future by what is past, seldome expecting what seldome happens. If therefore Judges corrupted either by Gifts, Favour, or even by pittie it self, do often forbear the execution of the Penalties due by the Law, and by that meanes put wicked men in hope to passe unpunisht: honest Subjects encompassed with murtherers, theeves and knaves, will not have the liberty to converse freely with each other, nor scarce to stirre abroad without hazard; nay, the City it self is dissolved, and every mans right of protecting himself at his own will returns to him. The Law of Nature therefore gives this precept to Supreme Commanders, that they not onely doe righteousness themselves, but that they also by penalties cause the Judges, by them appointed, to doe the same; that is to say, that they hearken to the complaints of their Subjects; and as oft as need requires, make choice of some extraordinary Judges, who may hear the matter debated concerning the ordinary ones.

Chapter XIV: Of Lawes and Trespases

I. HEY WHO lesse seriously consider the force of words, doe sometimes confound Law with Counsell, sometimes with Covenant, sometimes with Right. They confound Law with Counsell, who think, that it is the duty of Monarchs not onely to give ear to their Counsellours, but also to obey them, as though it were in vaine to take Counsell, unlesse it were also followed. We must fetch the distinction between Counsell, and Law, from the difference between Counsell, and Command. Now COUNSELL is a precept in which the reason of my obeying it, is taken from the thing it self which is advised; but COMMAND is a precept in which the cause of my obedience depends on the will of the Commander. For it is not properly said, Thus I will, and thus I Command, except the will stand for a Reason. Now when obedience is yielded to the Lawes, not for the thing it self, but by reason of the advisers will, the Law is not a Counsell, but a Command, and is defined thus, LAW is the command of that Person (whether Man, or Court) whose precept containes in it the reason of obedience; as the Precepts of God in regard of Men, of Magistrates in respect of their Subjects, and universally of all the powerfull in respect of them who cannot resist, may be termed their Lawes. Law and Counsell therefore differ many ways; Law belongs to him who hath power over them whom he adviseth, Counsell to them who have no power. To follow what is prescribed by Law, is duty, what by Counsell, is free-will. Counsell is directed to his end that receives it, Law, to his that gives it. Counsell is given to none but the willing, Law even to the unwilling. To conclude, the right of the Counsellour is made void by the will of him to whom he gives Counsell, the right of the Law-giver is not abrogated at the pleasure of him who hath a Law imposed.

II. They confound Law, and Covenant, who conceive the Lawes to be nothing else but certain omologemata or forms of living, determined by the common

consent of men: Amongst whom is Aristotle, who defines Law on this manner, *Nomos esti logos orismenos kath omologian koinen poleos*, *minuon pos dei pratein ekasta*, that is to say, Law is a speech limited according to the common consent of the City, declaring every thing that we ought to doe. Which definition is not simply of Law, but of the Civill Law; for it is manifest that the Divine Lawes sprang not from the consent of men, nor yet the Lawes of Nature; for if they had their originall from the consent of men, they might also by the same consent be abrogated; but they are unchangeable. But indeed that's no right definition of a Civill Law; for in that place a City is taken either for one civill person, having one will, or for a multitude of men who have each of them the liberty of their private wills. If for one person, those words, common consent, are ill placed here, for one person hath no common consent; neither ought he to have said, (declaring what was needfull to be done) but commanding; for what the City declares, it commands its Subjects. He therefore by a City understood a multitude of men declaring by common consent (imagine it a writing confirm'd by Votes) some certain formes of living; but these are nothing else but some mutuall contracts which oblige not any man (and therefore are no Lawes) before that a Supreme Power being constituted which can compell, have sufficient remedy against the rest, who otherwise are not likely to keep them. Lawes therefore, according to this definition of Aristotle, are nothing else, but naked, and weak contracts, which then at length, when there is one who by right doth exercise the Supreme Power, shall either become Lawes, or no Lawes, at his will and pleasure: Wherefore he confounds Contracts with Lawes, which he ought not to have done; for Contract is a promise, Law a command. In Contracts we say, I will do this; In Lawes, Doe this. Contracts oblige us, Lawes tie us fast, being obliged. A Contract obligeth of it self, The Law holds the party obliged by vertue of the universall Contract of yeelding obedience; Therefore in Contract its first determined what is to be done, before we are obliged to doe it; But in Law we are first obliged to performe, and what is to be done, is determined afterwards. Aristotle therefore ought to have defined a civill law thus, A civill law is a speech limited by the will

of the City, commanding every thing behooffull to be done, which is the same with that we have given above in the 6. Chap. art. 9. to wit, that the civill lawes are the command of him (whether man, or Court of men) who is endued with supreme Power in the city, concerning the future actions of his Subjects.

Contracts oblige us. To be obliged, and to be tyed being obliged, seems to some men to be one, and the same thing, and that therefore here seems to be some distinction in words, but none indeed. More cleerly therefore, I say thus, That a man is obliged by his contracts, that is, that he ought to performe for his promise sake; but that the Law tyes him being obliged, that is to say, it compells him to make good his promise, for fear of the punishment appointed by the Law.

III. They confound Lawes with Right, who continue still to doe what is permitted by divine Right, notwithstanding it be forbidden by the civill Law: That which is prohibited by the divine Law, cannot bee permitted by the civill, neither can that which is commanded by the divine Law, be prohibited by the civill. Notwithstanding that which is permitted by the divine Right, that is to say, that which may be done by divine Right, doth no whit hinder why the same may not be forbidden by the civill Lawes; for inferiour Lawes may restrain the liberty allowed by the superiour, although they cannot enlarge them. Now naturall liberty is a Right not constituted, but allowed by the Lawes. For the Lawes being removed, our liberty is absolute; This is first restrained by the naturall, and divine Lawes, the residue is bounded by the civill Law, and what remains may again be restrained by the constitutions of particular Towns, and Societies. There is great difference therefore between Law, and Right; For Law is a fetter, Right is freedome, and they differ like contraries.

IV. All Law may be divided, first according to the diversity of its Authors into Divine and humane. The Divine, according to the two wayes whereby God hath made known his will unto men, is twofold, naturall (or morall) and positive; naturall is that which God hath declared to all men by his eternall word borne with them, to wit, their naturall Reason; and this is that Law which in this whole book I have endeavoured to unfold. Positive is that, which God hath revealed to

us by the word of Prophetie, wherein he hath spoken unto men as a man: Such are the Lawes which he gave to the Jewes concerning their government, and divine worship, and they may be termed the Divine civill Lawes, because they were peculiar to the civill government of the Jewes, his peculiar people. Again, the naturall Law may be divided into that of Men, which alone hath obtained the title of the Law of nature, and that of Cities, which may be called that of Nations, but vulgarly it is termed the Right of Nations. The precepts of both are alike, but because Cities once instituted doe put on the personall proprieties of men, that Law, which speaking of the duty of single men, we call naturall, being applyed to whole Cities, and Nations, is called the Right of Nations. And the same Elements of naturall law, and Right, which have hitherto been spoken of, being transferred to whole Cities and Nations, may be taken for the Elements of the lawes, and Right of Nations.

V. All humane law is civill. For the state of men considered out of civill society, is hostile, in which, because one is not subject to another, there are no other Lawes, beside the dictates of naturall reason, which is the divine Law. But in civill government the City onely, that is to say, that man, or Court, to whom the supreme power of the City is committed, is the Legislator, and the Lawes of the City are civill. The civill Lawes may be divided according to the diversity of their subject matter, into sacred, or secular; sacred are those which pertain to Religion, that is to say, to the ceremonies, and worship of God (to wit what Persons, things, places, are to be consecrated, and in what fashion, what opinions concerning the Deity are to be taught publicquely, and with what words, and in what order supplications are to be made, and the like) and are not determined by any divine positive Law. For the civill sacred Lawes are the humane Lawes (which are also called Ecclesiasticall) concerning things sacred; but the secular under a generall notion, are usually called the civill Lawes.

VI. Again, the civill Law (according to the two offices of the. Legislator, whereof one is to judge; the other to constrain men to acquiesce to his judgements) hath two parts; the one distributive, the other vindicative, or penall.

By the distributive it is, that every man hath his proper Right, that is to say, it sets forth Rules for all things, whereby we may know what is properly ours, what another mans; so as others may not hinder us from the free use and enjoyment of our own; and we may not interrupt others in the quiet possession of theirs; and what is lawfull for every man to doe or omit, and what is not lawfull. Vindicative is that whereby it is defined what punishment shall be inflicted on them who break the Law.

VII. Now distributive, and vindicative, are not two severall Species of the Lawes, but two parts of the same Law. For if the Law should say no more, but (for example) whatsoever you take with your net in the Sea, be it yours, its in vain; For although another should take that away from you which you have caught, it hinders not, but that it still remains yours; for in the state of nature where all things are common to all, yours, and others, are all one, insomuch as what the Law defines to be yours, was yours even before the Law, and after the Law ceases not to bee yours, although in another mans possession. Wherefore the Law doth nothing, unlesse it bee understood to bee so yours, as all other men be forbidden to interrupt your free use, and secure enjoyment of it at all times, according to your own will, and pleasure. For this is that which is required to a propriety of goods, not that a man may be able to use them, but to use them alone, which is done by prohibiting others to be an hinderance to him. But in vain doe they also prohibit any men, who doe not withall strike a fear of punishment into them; in vain therefore is the Law, unlesse it contain both parts, that which forbids injuries to be done, and that which punisheth the doers of them. The first of them which is called distributive, is Prohibitory, and speaks to all; the second which is styled vindicative, or paenary, is mandatory, and onely speaks to publique Ministers.

VIII. From hence also we may understand, that every civill Law hath a penalty annexed to it, either explicitly, or implicitly; For where the penalty is not defined, neither by any writing, nor by example of any one who hath suffered the punishment of the transgressed Law there the penalty is understood to be

arbitrary, namely, to depend on the will of the Legislator, that is to say, of the supreme Commander. For in vain is that Law which may be broken without punishment.

IX. Now because it comes from the civill Lawes, both that every man have his proper Right, and distinguisht from anothers, and also that he is forbidden to invade anothers Rights, it followes, that these Precepts (Thou shalt not refuse to give the honour defin'd by the Lawes unto thy Parents: Thou shalt not kill the man whom the Lawes forbid thee to kill: Thou shalt avoid all copulation forbidden by the Laws: Thou shalt not take away anothers goods against the Lords will: Thou shalt not frustrate the Laws and Judgements by false testimony) are Civill Lawes. The naturall Lawes command the same things but implicitly. for the law of nature (as hath been said in the 3. Chap. Art. 2.) commands us to keep contracts, and therefore also to performe obedience when we have covenanted obedience, and to abstaine from anothers goods when it is determin'd by the civill Law what belongs to another. But all Subjects (by the 13. Art. of the 6. Chap.) do covenant to obey his commands who hath the supreme power, that is to say the civill Lawes, in the very constitution of government, even before it is possible to break them. For the Law of nature did oblige in the state of nature, where first (because nature hath given all things to all men) nothing did properly belong to another, and therefore it was not possible to invade anothers right; next, where all things were common, and therefore all carnall copulations lawfull; Thirdly, where was the state of Warre, and therefore lawfull to kill; Fourthly, where all things were determined by every mans own judgement, and therefore paternall respects also: Lastly, where there were no publique judgements, and therefore no use of bearing witnesse, either true, or false.

X. Seeing therefore our obligation to observe those Laws, is more ancient then the promulgation of the Laws themselves, as being contained in the very constitution of the City, by the vertue of the naturall Law which forbids breach of Covenant, the Law of nature commands us to keep all the civill Laws; for where we are tyed to obedience, before we know what will be commanded us, there we

are universally tyed to obey in all things. Whence it followes, that no civil Law whatsoever, which tends not to a reproach of the Deity (in respect of whom, Cities themselves have no right of their own, and cannot be said to make Lawes) can possibly be against the Law of nature; for though the Law of nature forbid theft, adultery, &c. yet if the civill Law command us to invade any thing, that invasion is not theft, adultery, &c. For when the Lacedemonians of old permitted their youths by a certaine Law, to take away other mens goods, they commanded that these goods should not bee accounted other mens, but their own who took them; and therefore such surreptions were no thefts. In like manner, copulations of heathen Sexes, according to their Lawes, were lawfull marriages.

XI. Its necessary to the essence of a Law, that the Subjects be acquainted with two things, First, what man or Court hath the supreme power, that is to say, the Right of making Lawes. Secondly, what the Law it self sayes; for he that neither knew either to whom or what he is tyed to, cannot obey, and by consequence is in such a condition, as if he were not tyed at all. I say not that it is necessary to the essence of a Law, that either one, or the other be perpetually known, but onely that it be once knowne; and if the Subject afterward forget either the Right he hath who made the Law, or the Law it self, that makes him no lesse tyed to obey, since he might have remembred it, had he had a will to obey.

XII. The knowledge of the Legislator depends on the Subject himselfe; for the right of making Lawes could not be conferr'd on any man without his owne consent, and covenant, either exprest, or suppos'd; exprest, when from the beginning the Citizens doe themselves constitute a forme of governing the City, or when by promise they submit themselves to the Dominion of any one; or suppos'd at least, as when they make use of the benefit of the Realme, and Lawes, for their protection and conservation against others. For to whose Dominion we require our fellow Subjects to yeeld obedience for our good, his Dominion we acknowledge to be legitimate by that very request. And therefore ignorance of the power of making Lawes, can never be a sufficient excuse; for every man knowes what he hath done himselfe.

XIII. The knowledge of the lawes depends on the Legislator, who must publish them, for otherwise they are not Lawes; for Law is the command of the Law-maker, and his command is the Declaration of his Will; it is not therefore a Law, except the will of the Law-maker be declar'd, which is done by promulgation. Now in promulgation two things must be manifest, whereof one is, that he or they who publish a Law, either have a right themselves to make Lawes, or that they doe it by authority deriv'd from him or them who have it; the other is the sense of the Law it selfe. Now, that the first, namely publisht Lawes proceed from him who hath the supreme command, cannot be manifest (speaking exactly and philosophically) to any, but them who have received them from the mouth of the Commander; the rest beleeve, but the reasons of their beliefe are so many, that it is scarce possible they should not believe. And truly in a Democratical City where every one may be present at the making of Laws if he will, he that shall be absent, must beleeve those that were present; but in monarchies and Aristocracies, because its granted but to few to be present, and openly to heare the commands of the monarch or the Nobles, it was necessary to bestow a power on those few of publishing them to the rest. And thus we beleeve those to be the Edicts and Decrees of Princes, which are propounded to us for such, either by the writings, or voices of them, whose office it is to publish them. But yet when we have these causes of beliefe, that we have seen the Prince, or supreme Councell constantly use such Counsellors, Secretaries, publishers, and seales, and the like arguments for the declaring of his will; that he never took any authority from them; that they have bin punisht who not giving credit to such like promulgations have transgrest the Law; not onely he who thus believing shall not obey the Edicts and Decrees set forth by them is every where accus'd, but he that not believing, shall not yield obedience, is punisht. For the constant permission of these things is a manifest signe enough, and evident declaration of the Commanders will; provided there be nothing contain'd in the Law, Edict or Decree, derogatory from his supreme power: For it is not to be imagin'd that he would have ought taken from his power by any of his Officers as long as he retaines a will to governe. Now the sense of

the law, when there is any doubt made of it, is to be taken from them to whom the supreme authority hath committed the knowledge of causes, or Judgements; for to judge is nothing else then by interpretation to apply the lawes to particular cases. Now we may know who they are that have this Office granted them, in the same manner, as we know who they be that have authority given them to publish Laws.

XIV. Againe the civill law according to its two fold manner of publishing, is of two sorts, written & unwritten; By written, I understand that which wants a voice, or some other signe of the will of the Legislator that it may become. a Law. For all kind of Laws are of the same age with mankind, both in nature, and time, and therefore of more antiquity then the invention of letters, and the Art of writing. Wherefore not a writing, but a voice is necessary for a written law. this alone is requisite to the being, that to the Remembrance of a Law; for we reade, that before letters were found out for the help of memory, that Lawes contracted into Meetre, were wont to be sung. The unwritten is that which wants no other publishing then the voice of nature, or naturall reason; such are the lawes of nature. For the naturall Law although it be distinguisht from the civill, for as much as it commands the Will, yet so farre forth as it relates to our actions it is civill; for example, this same, Thou shalt not covet, which onely appertaines to the minde, is a naturall Law, onely. but this, Thou shalt not invade, is both naturall and civill. For seeing it is impossible to prescribe such universall Rules, whereby all future contentions which perhaps are infinite, may be determined, its to be understood that in all cases not mentioned by the written lawes, the law of naturall equity is to be followed, which commands us to distribute equally to equals; and this by the vertue of the civill law, which also punisheth those who knowingly and willingly doe actually transgresse the lawes of nature.

XV. These things being understood, it appeares first, That the Lawes of Nature, although they were describ'd in the Books of some Philosophers, are not for that reason to be termed Written lawes: and that the Writings of the Interpreters of the Lawes, were no Lawes, for want of the Supreme Authority; nor yet those orations of the Wise, (that is to say) Judges, but so farre forth as by the consent of the

Supreme power they part into custome; and that then they are to be received among the Written lawes, not for the Customes sake (which by its own force doth not constitute a Law) but for the Will of the Supreme Commander, which appears in this, that he hath suffer'd his Sentence, whether equall, or unequall, to passe into custome.

XVI. Sinne, in its largest signification, comprehends every deed, word and thought, against right reason. For every man by reasoning seeks out the meanes to the end which he propounds to himselfe. If therefore he reason right (that is to say, beginning from most evident principles, he makes a discourse out of consequences continually necessary,) he will proceede in a most direct way; otherwise hee'l goe astray, that is to say, he will either doe, say, or endeavour, somewhat against his proper end: which when he hath done, he will indeed in reasoning be said to have erred, but in action and will to have sinned; for sin followes error, just as the Will doth the understanding: And this is the most generall acception of the word, under which is contain'd every imprudent action, whether against the Law, as to overthrow another mans house, or not against the Law, as to build his owne upon the Sand.

XVII. But when we speak of the Lawes, the word Sinne is taken in a more strict sense, and signifies not every thing done against right reason, but that onely which is blameable, and therefore is call'd *malum culpae*, the evill of fault; but yet if any thing be culpable it is not presently to be term'd a sinne, or fault, but onely if it be blameable with reason. We must therefore enquire what is to be blameable with reason, what against reason. Such is the nature of man, that every one calls that good which he desires, and evill which he eschewes; and therefore through the diversity of our affections, it happens that one counts that good, which another counts evill; and the same man what now he esteem'd for good, he immediately looks on as evill; and the same thing which he calls good in himselfe, he tearmes evill in another. For we all measure good and evill by the pleasure or paine we either feele at present, or expect hereafter. Now seeing the prosperous actions of enemies (because they increase their honours, goods, and

power) and of equalls, (by reason of that strife of honours which is among them) both seeme and are irkesome, and therefore evill to all; and men use to repute those evill, that is to say, to lay some fault to their charge from whom they receive evill; its impossible to be determined by the consent of single men whom the same things doe not please and displease, what actions are, and what not to be blam'd. They may agree indeed in some certaine generall things, as that theft, adultery, and the like are sinnes, as if they should say that all men account those things evill to which they have given names which are usually taken in an evill sense; but we demand not whether theft be a Sinne, but what is to be term'd theft, and so concerning other in like manner. For as much therefore as in so great a diversity of censurers, what is by reason blameable, is not to bee measur'd by the reason of one man more then another, because of the equality of humane nature, and there are no other reasons in being, but onely those of particular men, and that of the City, it followes, that the City is to determine what with reason is culpable: So as a fault, that is to say, a SINNE, is that, which a man do's, omits, sayes, or wills, against the reason of the City, that is, contrary to the Lawes.

XVIII. But a man may doe somewhat against the Lawes through humane infirmity, although he desire to fulfill them, and yet his action as being against the Lawes, is rightly blam'd, and call'd a Sinne. But there are some, who neglect the Lawes, and as oft as any hope of gain and impunity doth appear to them, no conscience of contracts and betrothed faith can withhold them from their violation. Not only the deeds, but even the mindes of these men are against the Lawes. They who sinne onely through infirmity, are good men even when they sinne; but these even when they doe not sin, are wicked. For though both the action, and the mind be repugnant to the Lawes, yet those repugnancies are distinguisht by different appellations, for the irregularity of the action is called adikema, unjust deed; that of the mind adikia, and kakia, injustice, and malice; that is, the infirmity of a disturbed soule, this the pravity of a sober mind.

XIX. But seeing there is no sin which is not against some Law, and that there is no Law which is not the command of him who hath the supreme power, and

that no man hath a supreme power which is not bestowed on him by our own consent; in what manner will he be said to sinne, who either denies that there is a God, or that he governs the world, or casts any other reproach upon him? For he will say, that he never submitted his will to Gods will, not conceiving him so much as to have any being. And granting that his opinion were erroneous, and therefore also a sin, yet were it to be numbred among those of imprudence or ignorance, which by right cannot be punished. This speech seems so farre forth to be admitted, that though this kind of sin be the greatest and most hurtful, yet is it to be refer'd to sins of imprudence*; but that it should be excused by imprudence or ignorance, is absurd. For the Atheist is punisht either immediately by God himselfe, or by Kings constituted under God; not as a Subject is punished by a King, because he keeps not the Lawes, but as one enemy by another, because he would not accept of the Lawes; that is to say, by the Right of warre, as the Giants warring against God: For whosoever are not subject either to some common Lord, or one to another, are enemies among themselves.

- [Yet is it to be referred to sins of imprudence] Many find fault that I have referr'd Atheisme to imprudence, and not to injustice; yea by some it is taken so, as if I had not declared my selfe an enemy bitter enough against Atheists: They object farther, that since I had elsewhere said that it might be knowne there is a God, by naturall reason, I ought to have acknowledged that they sin at least against the Law of nature, and therefore are not only guilty of imprudence, but injustice too. But I am so much an enemy to Atheists, that I have both diligently sought for, and vehemently desired to find some Law whereby I might condemne them of injustice; but when I found none, I enquired next what name God himselfe did give to men so detested by him. Now God speaks thus of the Atheist: The fool hath said in his heart, there is no God. therefore I placed their sinne in that rank which God himselfe referres to; next, I shew them to be enemies of God. But I conceive the name of an enemy to be sometimes

somewhat sharper, then that of an unjust man. Lastly, I affirme that they may under that notion be justly punisht both by God, and supreme Magistrates, and therefore by no meanes excuse or extenuate this sinne. Now that I have said that it might be known by naturall reason that there is a God, is so to be understood, not as if I had meant that all men might know this, except they think that because Archimedes by naturall reason found out what proportion the circle hath to the square, it followes thence, that every one of the vulgar could have found out as much. I say therefore, that although it may be knowne to some by the light of reason that there is a God, yet men that are continually engaged in pleasures, or seeking of riches and honour, also men that are not wont to reason aright, or cannot do it, or care not to doe it, lastly, fools, in which number are Atheists, cannot know this.

XX. Seeing that from the vertue of the Covenant whereby each Subject is tyed to the other to perform absolute and universall obedience (such as is defined above Cha. art. 13.) to the City, that is to say, to the Sovereign power, whether that be one man or Councel, there is an obligation derived to observe each one of the civill Lawes, so that that Covenant contains in it self all the Laws at once; it is manifest that the subject who shall renounce the generall Covenant of obedience, doth at once renounce all the Lawes. Which trespasse is so much worse then any other one sinne, by how much to sinne alwayes, is worse then to sinne once. And this is that sin which is called TREASON; and it is a word or deed whereby the Citizen, or Subject, declares that he will no longer obey that man or Court to whom the supreme power of the City is entrusted. And the Subject declares this same will of his by deed, when he either doth, or endeavours to do violence to the Sovereigns Person, or to them who execute his commands; of which sort are Traytors, Regicides, and such as take up armes against the City, or during a warre, flye to the enemies side. And they shew the same will in word, who flatly deny that themselves or other subjects are tyed to any such kind of obedience, either in

the whole, as he who should say that wee must not obey him (keeping the obedience which we owe to God intire) simply, absolutely, and universally; or in part, as he who should say, that he had no Right to wage warre at his own will, to make Peace, list souldiers, levie monies, electing Magistrates, and publique Ministers, enacting Lawes, deciding controversies, setting penalties, or doing ought else, without which the State cannot stand. And these and the like words and deeds are Treason by the naturall, not the civill Law. But it may so happen, that some action which before the civill Law was made, was not Treason, yet will become such, if it be done afterwards. As if it be declared by the Law, that it shall be accounted for a sign of renouncing publique obedience (that is to say for Treason) if any man shall coyn monies, or forge the Privie Seale, he that after that Declaration shall doe this, will be no lesse guilty of Treason then the other. Yet he sinnes lesse, because he breakes not all the Laws at once, but one Law only; for the Law by calling that Treason which by nature is not so, doth indeed by Right set a more odious name, and perhaps a more grievous punishment on the guilty persons, but it makes not the sinne it selfe more grievous.

XXI. But that sinne which by the Law of nature is Treason, is a Transgression of the naturall, not the civill Law. For since our obligation to civill obedience, by vertue whereof the civill Lawes are valid, is before all civill Law, and the sin of Treason is naturally nothing else but the breach of that obligation; it followes that by the sin of Treason, that Law is broken which preceded the civill Law, to wit, the naturall, which forbids us to violate Covenants, and betrothed faith. But if some Sovereign Prince should set forth a Law on this manner, Thou shalt not rebell, he would effect just nothing: For except Subjects were before obliged to obedience, that is to say, not to rebell, all Law is of no force; now the obligation which obligeth to what we were before obliged to, is superfluous.

XXII. Hence it followes, that Rebels, Traytors, and all others convicted of Treason, are punisht not by civill, but naturall Right; that is to say, not as civill Subjects, but as Enemies to the Government, not by the Right of Sovereignty, and Dominion, but by the Right of Warre.

XXIII. There are some who think that those acts which are done against the Law, when the punishment is determined by the Law it selfe, are expiated, if the punished willingly undergoe the punishment; and that they are not guilty before God of breaking the naturall Law (although by breaking the civill Lawes, we break the naturall too, which command us to keep the civill) who have suffered the punishment which the Law required; as if by the Law, the fact were not prohibited, but a punishment were set instead of a price, whereby a licence might be bought of doing what the Law forbids. By the same reason they might inferre too, that no transgression of the Law were a sin, but that every man might enjoy the liberty which he hath bought by his own perill. But we must know that the words of the Law may be understood in a twofold sense, the one as containing two parts (as hath been declared above in the seventh Art.) namely that of absolutely prohibiting, as, Thou shalt not doe this; and revenging, as, he that doth this, shall be punisht; The other, as containing a condition, for example, Thou shalt not doe this thing, unlesse thou wilt suffer punishment; and thus, the Law forbids not simply, but conditionally. If it be understood in the first sense, he that doth it, sins, because he doth what the Law forbids to be done; if in the second, he sins not, because he cannot be said to doe what is forbidden him, that performs the condition; For in the first sense, all men are forbidden to doe it; in the second, they only who keep themselves from the punishment. In the first sense, the vindicative part of the Law obligeth not the guilty, but the Magistrate to require punishment; in the second, he himselfe that owes the punishment is obliged to exact it, to the payment whereof, if it be capitall, or otherwise grievous, he cannot be obliged. But in what sense the Law is to be taken, depends on the will of him who hath the Soveraignty. When there is therefore any doubt of the meaning of the Law, since we are sure they sinne not who doe it not, it will be sin if we doe it, howsoever the Law may afterward be explained; for so to doe that which a man doubts whether it be a sin or not, when he hath freedome to forbear it, is a contempt of the Lawes, and therefore by the 28. Art. of the third Chapter, a sin against the Law of nature. Vain therefore is that same distinction of obedience

into Active and Passive, as if that could be expiated by penalties constituted by humane decrees, which is a sinne against the Law of nature, which is the Law of God; or as though they sinned not, who sinne at their own perill.

Chapter XV: Of the Kingdome of God, by Nature

I. WEE HAVE already in the foregoing Chapters, proved both by reason, and testimonies of holy Writ, that the estate of nature, that is to say, of absolute liberty, such as is theirs, who neither govern, nor are governed, is an Anarchy, or hostile state; that the precepts whereby to avoyd this state, are the Lawes of nature; that there can be no civill government without a Sovereigne; and that they who have gotten this Sovereigne command must be obey'd simply, that is to say, in all things which repugne not the Commandments of God: There is this one thing only wanting to the complete understanding of all civill duty, & that is, to know which are the Laws and Commandments of God. For else we cannot tell whether that which the civill power commands us, be against the Lawes of God, or not; whence it must necessarily happen, that either by too much obedience to the civill authority, we become stubborne against the divine Majesty; or for feare of sinning against God, we runne into disobedience against the civill power: To avoid both these rocks, its necessary to know the Divine Lawes. now because the knowledge of the Lawes, depends on the knowledge of the Kingdome, we must in what followes, speak somewhat concerning the Kingdome of God.

II. The Lord is King, the earth may be glad there of saith the Psalmist, Psal: 97 v. 1. And againe the same Psalmist, Psal. 99. v. 1. The Lord is King, be the People never so unpatient; he sitteth betweene the Cherubins, be the Earth never so unquiet; to wit, whether men will, or not, God is THE King over all the Earth, nor is he mov'd from his Throne, if there be any who deny either his existence, or his providence. Now although God governe all men so by his power, that none can doe any thing which he would not have done, yet this, to speake properly, and accurately, is not to reigne; for he is sayed to reigne, who rules not by acting, but speaking, that is to say, by precepts and threatnings. And therefore we account not

inanimate, nor irrationall bodies, for Subjects in the Kingdome of God, although they be subordinate to the Divine power; because they understand not the commands, and threats of God; nor yet the Atheists, because they beleeve not that there is a God; nor yet those who beleeving there is a God, doe not yet beleeve that he rules these Inferiour things; for even these, although they be govern'd by the power of God, yet doe they not acknowledge any of his Commands, nor stand in awe of his threats. Those onely therefore are suppos'd to belong to Gods Kingdome, who acknowledge him to be the Governour of all things, and that he hath given his Commands to men, and appointed punishments for the transgressours; The rest, we must not call Subjects, but Enemies of God.

III. But none are said to governe by commands, but they who openly declare them to those who are govern'd by them; for the Commands of the Rulers are the Lawes of the Rul'd. But lawes they are not, if not perspicuously publisht, in so much as all excuse of Ignorance may be taken away. Men indeed publish their Lawes by word or voice, neither can they make their will universally knowne any other way; But Gods lawes are declar'd after a threefold manner: first, by the tacit dictates of Right reason: next, by immediate revelation, which is suppos'd to be done either by a supernaturall voice, or by a vision or dreame, or divine inspiration: Thirdly, by the voice of one man whom God recommends to the rest, as worthy of beliefe, by the working of true miracles. Now he whose voice God thus makes use of to signifie his will unto others, is called a PROPHET. These three manners may be term'd the threefold word of God, to wit the Rationall word, the sensible word, and the word of Prophecy: To which answer, the three manners whereby we are said to heare God, Right reasoning, sense, and faith. Gods sensible word hath come but to few; neither hath God spoken to men by Revelation except particularly to some, and to diverse diversely; neither have any Lawes of his Kingdome beene publisht on this manner unto any people.

IV. And according to the difference which is between the Rationall word and the word of Prophecy, we attribute a twofold Kingdome unto God: Naturall, in which he reignes by the dictates of right reason, and which is universall over all

who acknowledge the Divine power, by reason of that rationall nature which is common to all; and Prophetically, in which he rules also by the word of Prophecy, which is peculiar, because he hath not given positive Lawes to all men, but to his peculiar people, and some certaine men elected by him.

V. God in his naturall Kingdome hath a Right to rule, and to punish those who break his Lawes, from his sole irresistable power. For all Right over others is either from nature, or from Contract. How the Right of governing springs from Contract, we have already shewed in the 6. Chapter. And the same Right is derived from nature, in this very thing, that it is not by nature taken away. For when by nature all men had a Right over all things, every man had a Right of ruling over all as ancient as nature it selfe; but the reason why this was abolisht among men, was no other but mutuall fear; as hath been declared above in the second Chapter, the 3. art; reason namely dictating that they must foregoe that Right for the preservation of mankind, because the equality of men among themselves according to their strength and naturall powers was necessarily accompanied with warre, and with warre joynt the destruction of mankind. Now if any man had so farre exceeded the rest in power, that all of them with joynt forces could not have resisted him, there had been no cause why he should part with that Right which nature had given him; The Right therefore of Dominion over all the rest, would have remained with him, by reason of that excesse of power whereby he could have preserved both himselfe and them. They therefore whose power cannot be resisted, and by consequence God Almighty, derives his Right of Sovereignty from the Power it selfe. And as oft as God punisheth, or slayes a sinner, although he therefore punish him because he sinned, yet may we not say that he could not justly have punished or killed him although he had not sinned. Neither, if the will of God in punishing, may perhaps have regard to some sin antecedent, doth it therefore follow, that the Right of afflicting, and killing, depends not on divine Power, but on mens sins.

VI. That question made famous by the disputations of the Antients, why evill things befell the good, and good things the evill, is the same with this of ours, by

what Right God dispenseth good and evill things unto men. And with its difficulty, it not only staggers the faith of the vulgar concerning the divine providence, but also of Philosophers, and which is more, even of holy men. Psal. 73. v. 1, 2, 3. Truly God is good to Israel, even to such as are of a clean heart. but as for me, my feet were almost gone, my steps had well nigh slipt. And why? I was grieved at the wicked, I doe also see the ungodly in such prosperity. And how bitterly did Job expostulate with God, that being just, he should yet be afflicted with so many calamities? God himselfe with open voyce resolved this difficulty in the case of Job, and hath confirmed his Right by arguments drawn not from Jobs sinne, but from his own power. For Job and his friends had argued so among themselves, that they would needs make him guilty, because he was punisht; and he would reprove their accusation by arguments fetcht from his own innocence: But God when he had heard both him and them, refutes his expostulation, not by condemning him of injustice, or any sin, but by declaring his own power, Job. 38. v. 4. Where wast thou (sayes he) when I laid the foundation of the earth, &c. And for his friends, God pronounces himself angry against them, Job. 42. v. 7. Because they had not spoken of him the thing that is right, like his servant Job. Agreeable to this is that speech of our Saviours in the mans case who was born blind, when, his Disciples asking him whether he or his Parents had sinned, that he was born blind, he answered, John 9. v. 3. neither hath this man sinned, nor his Parents, but that the works of God should be manifest in him. For though it be said, Rom. 5. 12. That death entred into the world by sinne, it followes not, but that God by his Right might have made men subject to diseases, and death, although they had never sinned, even as he hath made the other animalls mortall, and sickly, although they cannot sinne.

VII. Now if God have the Right of Sovereignty from his power, it is manifest, that the obligation of yeelding him obedience lyes on men by reason of their weaknesse*; for that obligation which rises from Contract, of which we have spoken in the second Chapter, can have no place here, where the Right of Ruling (no Covenant passing between) rises only from nature. But there are two Species

of naturall obligation, one when liberty is taken away by corporall impediments, according to which we say that heaven and earth, and all Creatures, doe obey the common Lawes of their Creation: The other when it is taken away by hope, or fear, according to which the weaker despairing of his own power to resist, cannot but yeeld to the stronger. From this last kinde of obligation, that is to say from fear, or conscience of our own weaknesse (in respect of the divine power) it comes to passe, that we are obliged to obey God in his naturall Kingdome; reason dictating to all, acknowledging the divine power and providence, that there is no kicking against the pricks.

- [By reason of their weaknesse] If this shall seem hard to any man, I desire him with a silent thought to consider, if there were two Omnipotents, whether were bound to obey; I beleieve he will confesse that neither is bound: if this be true, then it is also true what I have set down, that men are subject unto God because they are not omnipotent. And truly our Saviour admonishing Paul (who at that time was an enemy to the Church) that he should not kick against the pricks, seems to require obedience from him for this cause, because he had not Power enough to resist.

VIII. Because the word of God ruling by nature onely, is supposed to be nothing else but right reason, and the Laws of Kings can be known by their word only, its manifest that the Laws of God ruling by nature alone, are onely the naturall Lawes; namely those which we have set down in the second and third Chapters, and deduced from the dictates of reason, Humility, Equity, Justice, Mercy, and other Morall vertues befriending Peace, which pertain to the discharge of the duties of men one toward the other, and those which right reason shall dictate besides, concerning the honour and worship of the Divine Majesty. We need not repeat what those Naturall Laws, or Morall vertues are; but we must see what honours, and what divine worship, that is to say, what sacred Lawes, the same naturall reason doth dictate.

IX. Honour, to speak properly, is nothing else but an opinion of anothers Power joyned with goodnesse; and to honour a man, is the same with highly esteeming him, and so honour is not in the Party honoured, but in the honourer. Now three Passions do necessarily follow honour thus placed in opinion; Love, which referres to goodnesse; hope, and feare, which regard Power. And from these arise all outward actions, wherewith the powerfull are appeased, and become Propitious, and which are the effects, and therefore also the naturall signes of honour it selfe. But the word honour is transferred also to those outward effects of honour, in which sense, we are said to honour him, of whose power we testifie our selves, either in word, or deed, to have a very great respect; insomuch as honour is the same with worship. Now WORSHIP is an outward act, the sign of inward honour. and whom we endeavour by our homage to appease, if they be, angry or howsoever to make them favourable to us, we are said to worship.

X. All signes of the mind are either words or deeds, and therefore all worship consists either in words or deeds. Now both the one and the other are referred to three kindes; whereof the first is Praise, or publique declaration of goodnesse; The second, a publique declaration of Present Power, which is to magnify megalunois; The third, is a publique declaration of happinesse, or of Power, secure also for the future, which is called, makariomos. I say, that all kindes of honour may be discerned, not in words only, but in deeds too. But we then praise, and celebrate in words, when we doe it by way of Proposition, or Dogmatically, that is to say by Attributes, or Titles, which may be termed praysing, and celebrating, categorically, and plainly, as when we declare him whom we honour to be liberall, strong, wise; And then, in deeds, when it is done by consequence, or by hypothesis, or supposition, as by Thanksgiving, which supposeth goodnesse; or by Obedience, which supposeth Power. or by Congratulation, which supposeth happinesse;

XI. Now whether we desire to praise a man in words, or deeds, we shall find some things which signify honour with all men, such as among attributes, are the generall words of vertues and powers, which cannot be taken in ill sense, As

Good, Faire, Strong, Just, and the like; and among actions, Obedience, Thanksgiving, Prayers, and others of that kinde, by which an acknowledgement of vertue and power is ever understood: Others, which signify honour, but with some, and scorne with others, or else neither; such as in Attributes, are those words which according to the diversity of opinions, are diversly referred to vertues or vices, to honest or dishonest things; As that a man slew his enemy, that he fled, that he is a Philosopher, or an Orator, and the like, which with some are had in honour, with others in contempt. In deeds, such as depend on the custome of the place, or prescriptions of civill Lawes, as in saluting to be bareheaded, to put off the shoes, to bend the body. to petition for any thing, and the like. Now standing, prostrate, kneeling, forms of ceremony, that worship which is alwayes, and by all men accounted honourable, may be called Naturall; the other, which followes places, and customes, Arbitrary.

XII. Furthermore, worship may be enjoyned, to wit by the command of him that is worshiped, and it may bee voluntary, namely such as seems good to the worshipper: If it be enjoyned, the actions expressing it, do not signify honour, as they signify actions, but as they are enjoyned: for they signify obedience immediately, obedience power; insomuch as worship enjoyned consists in obedience. Voluntary is honourable onely in the nature of the actions, which if they doe signify honour to the beholders, it is worship, if not, it is Reproach. Again worship may be either publique or private. But publique, respecting each single worshipper, may not be voluntary; respecting the City it may. For seeing that which is done voluntarily, depends on the will of the Doer, there would not one worship be given, but as many worships as worshippers, except the will of all men were united by the command, of one. But Private worship may be voluntary, if it be done secretly; for what is done openly is restrained, either by Lawes, or through modesty, which is contrary to the nature of a voluntary action.

XIII. Now that we may know what the scope and end of worshipping others is, we must consider the cause why men delight in worship: And we must grant what we have shewed elsewhere, that Joy consists in this, that a man contemplate

vertue, strength, science, beauty, friends, or any Power whatsoever, as being, or as though it were his own; and it is nothing else but a Glory, or Triumph of the mind conceiving it selfe honoured, that is to say, lov'd and fear'd, that is to say, having the services and assistances of men in readinesse. Now because men beleieve him to be powerfull whom they see honoured (that is to say) esteemed powerfull by others, it falls out that honour is increased by worship; and by the opinion of power, true power is acquired. His end therefore who either commands, or suffers himself to be worshipt, is, that by this means he may acquire as many as he can, either through love, or fear, to be obedient unto him.

XIV. But that we may understand what manner of Worship of God naturall reason doth assigne us, let us begin from his Attributes: where, first it is manifest, that existence is to be allowed him; for there can be no will to honour him, who, we think, hath no being. Next, those Philosophers who said, that God was the World, or the worlds Soul, (that is to say, a part of it) spake unworthily of God, for they attribute nothing to him, but wholly deny his being. For by the word God we understand the Worlds cause; but in saying that the World is God, they say, that it hath no cause, that is as much, as there is no God. In like manner, they who maintain the world not to be created, but eternall; because there can be no cause of an eternall thing, In denying the world to have a Cause, they deny also that there is a God. They also have a wretched apprehension of God, who imputing idlenesse to him, doe take from him the Government of the world, and of mankind. For say they should acknowledge him omnipotent, yet if he minde not these inferiour things, that same thred-bare Sentence will take place with them, Quod supra nos, nihil ad nos; What is above us, doth not concern us. And seeing there is nothing for which they should either love, or fear him, truly he will be to them as though he were not at all. Moreover in Attributes which signifie Greatnesse, or Power, those which signifie some finite, or limited thing, are not signes at all of an honouring mind. For we honour not God worthily if we ascribe lesse Power, or greatnesse to him then possibly we can; but every finite thing is lesse then we can, for most easily we may alwayes assigne and attribute more to a

finite thing; No shape therefore must be assigned to God, for all shape is finite; nor must he be said to be conceived, or comprehended by imagination, or any other faculty of our soul; for whatsoever we conceive is finite: And although this word Infinite signifie a conception of the mind, yet it followes not, that we have any conception of an infinite thing: For when we say that a thing is infinite, we signifie nothing really, but the impotency in our owne mind, as if we should say we know not whether, or where it is limited: Neither speak they honourably enough of God, who say we have an Idea of him in our mind; for an Idea is our conception, but conception we have none, except of a finite thing: Nor they, who say that he hath Parts, or that he is some certaine intire thing; which are also attributes of finite things: Nor that he is in any place; for nothing can be said to be in a place, but what hath bounds and limits of its greatnesse on all sides: Nor that he is moved, or is at rest; for either of them suppose a being in some place: Nor that there are more Gods; because not more infinites. Farthermore concerning attributes of happinesse, those are unworthy of God which signify sorrow (unlesse they be taken not for any Passion, but by a Metonymy for the effect) such as Repentance, anger, Pity: Or Want, as Appetite, Hope, Concupiscence, and that love which is also called lust, for they are signes of Poverty, since it cannot be understood, that a man should desire, hope, and wish for ought, but what he wants and stands in need. of. Or any Passive faculty; for suffering belongs to a limited power, and which depends upon another. When we therefore attribute a will to God, it is not to be conceived like unto ours, which is called a rationall desire; for if God desires, he wants, which for any man to say, is a contumelie; but we must suppose some resemblance which we cannot conceive. In like manner when wee attribute sight and other acts of the senses to him, or knowledge, or understanding, which in us are nothing else but a tumult of the minde raised from outward objects pressing the Organes, wee must not think that any such thing befalls the Deity; for it is a signe of power depending upon some other, which is not the most blessed thing. He therefore who would not ascribe any other titles to God, then what reason commands, must use such as are either Negative, as

infinite, eternall, incomprehensible, &c. or superlative, as most good, most great, most powerfull, &c. or Indefinite, as good, just, strong, Creatour, King, and the like; in such sense, as not desiring to declare what he is (which were to circumscribe him within the narrow limits of our phantasie), but to confesse our own admiration, and obedience, which is the property of humility, and of a minde yeelding all the honour it possibly can doe. For Reason dictates one name alone, which doth signify the nature of God (i.e.) Existent, or simply, that he is; and one in order to, and in relation to us, namely God, under which is contained both King, and Lord, and Father.

XV. Concerning the Outward actions wherewith God is to be worshipped (as also concerning his Titles) its a most generall command of Reason, that they be signes of a mind yeelding honour; under which are contained in the first place, Prayers;

Qui fingit sacros auro, vel marmore vultus,
Non facit ille Deos, qui rogat, ille facit.

For Prayers are the signes of hope, and hope is an acknowledgement of the divine Power, or goodnesse.

In the second place, Thanksgiving; which is a signe of the same affection, but that prayers goe before the benefit, and thanks follow it.

In the third, Guifts, that is to say oblations and sacrifices, for these are thanksgivings.

In the fourth, not to sweare by any other. For a mans Oath is an, Imprecation of his wrath against him if he deceive, who both knowes whether he doe, or not, and can punish him if he doe, though he be never so powerfull; which only belongs to God: for if there were any man from whom his subjects malice could not lye hid, and whom no humane power could resist, plighted faith would suffice without swearing, which, broken, might be punisht by that Man; and for this very reason there would be no need of an Oath.

In the fifth place, To speak warily of God; for that is a sign of fear, and feare is an acknowledgement of Power. It followes from this precept: That we may not

take the name of God in vain, or use it rashly; for either are inconsiderate. That we must not swear where there is no need; for that is in vain; but need there is none, unlesse it be between Cities to avoyd or take away contention by force, which necessarily must arise, where there is no faith kept in promises, or in a City, for the better certainty of Judicature. Also, That we must not dispute of the Divine nature: For it is supposed that all things in the naturall Kingdom of God are enquired into by reason only, that is to say, out of the Principles of naturall Science; but we are so far off by these to attain to the knowledge of the nature of God, that we cannot so much as reach to the full understanding of all the qualities of our own bodies, or of any other Creatures. Wherefore there comes nothing from these disputes, but a rash imposition of names to the divine Majesty, according to the small measure of our conceptions. It followes also (which belongs to the Right of Gods Kingdome) that their speech is inconsiderate, and rash, who say, That this, or that, doth not stand with divine justice; for even men count it an affront that their children should dispute their Right, or measure their justice otherwise then by the rule of their Commands.

In the sixth. Whatsoever is offered up in Prayers, thanksgivings, and sacrifices, must in its kind be the best, and most betokening honour; namely, Prayers must not be rash, or light, or vulgar, but beautifull, and well composed. For though it were absurd in the Heathen to worship God in animage, yet was it not against reason to use Poetry, and Musick, in their Churches. Also Oblations must be clean, and Presents sumptuous, and such as are significative either of submission, or gratitude, or commemorative of benefits received; for all these proceed from a desire of honouring.

In the seventh. That God must be worshipt not privately onely, but openly, and publiquely in the sight of all men; because that worship is so much more acceptable, by how much it begets honour, and esteem in others (as hath been declared before in the 13. art.). Unlesse others therefore see it, that which is most pleasing in our worship, vanisheth.

In the last place. That we use our best endeavour to keep the Lawes of Nature. For the undervaluing of our Masters command, exceeds all other affronts whatsoever; as on the other side, Obedience is more acceptable then all other sacrifices. And these are principally the naturall Lawes concerning the worship of God, those I mean which Reason dictates to every Man; but to whole Cities, every one whereof is one Person, the same naturall Reason farther commands an uniformity of publique worship. For the actions done by particular Persons, according to their private Reasons, are not the Cities actions, and therefore not the Cities worship; but what is done by the City, is understood to be done by the command of him, or them who have the Sovereignty, wherefore also together with the consent of all the subjects, that is to say, Uniformly.

XVI. The naturall Lawes set down in the foregoing Article concerning the divine worship, only command the giving of naturall signes of honour; but we must consider that there are two kindes of signes, the one naturall, the other done upon agreement, or by expresse, or tacite composition. Now because in every language, the use of words, and names, come by appointment, it may also by appointment be altered; for that which depends on, and derives its force from the will of men, can by the will of the same men agreeing be changed again, or abolisht. Such names therefore as are attributed to God by the appointment of men, can by the same appointment be taken away; now what can be done by the appointment of men, that the City may doe; The City therefore by Right (that is to say, they who have the power of the whole City) shall judge what names or appellations are more, what lesse honourable for God, that is to say, what doctrines are to be held and profest concerning the nature of God, and his operations. Now actions doe signify not by mens appointment, but naturally, even as the effects are signes of their causes; whereof some are alwayes signes of Scorn to them before whom they are committed, as those, whereby the bodies uncleannesse is discovered, and whatsoever men are ashamed to doe before those whom they respect; Others are alwayes signes of honour, as to draw near, and discourse decently and humbly, to give way, or to yeeld in any matter of private

benefit: In these actions the City can alter nothing. But there are infinite others, which, as much as belongs to honour, or reproach, are indifferent; now these, by the institution of the City, may both be made signes of honour, and being made so, doe in very deed become so. From whence we may understand, that we must obey the City in whatsoever it shall command to be used for a sign of honouring God, that is to say, for Worship; provided it can be instituted for a sign of honour, because that is a sign of honour, which by the Cities command is us'd for such.

XVII. We have already declared which were the Laws of God, as wel sacred as secular, in his government by the way of Nature onely. Now because there is no man but may be deceived in reasoning, and that it so falls out, that men are of different opinions concerning the most actions, it may be demanded farther, whom God would have to be the Interpreter of right Reason, that is to say, of his Lawes. And as for the Secular Lawes, I mean those which concern justice, and the carriage of men towards men; by what hath been said before of the constitution of a City, we have demonstratively shewed it agreeable to reason, that all Judicature belongs to the City, and that Judicature is nothing else but an Interpretation of the Laws, and by consequence, that everywhere Cities, that is to say, those who have the Sovereign power, are the Interpreters of the Lawes. As for the Sacred Lawes, we must consider what hath been before demonstrated in the fifth Chap. the 13. art. that every Subject hath transferr'd as much right as he could on him, or them, who had the supreme authority, but he could have transferred his right of judging the manner how God is to be honoured, and therefore also he hath done it; That he could, it appeares hence, that the manner of honouring God before the constitution of a City was to be fetcht from every mans private Reason; but every man can subject his private Reason to the Reason of the whole. City Moreover, if each Man should follow his own reason in the worshipping of God, in so great a diversity of worshippers, one would be apt to judge anothers worship uncomely, or impious; neither would the one seem to the other to honour God: Even that therefore which were most consonant to reason, would not be a worship, because that the nature of worship consists in this, that it be the sign of inward honour; but

there is no sign but whereby somewhat becomes known to others, and therefore is there no sign of honour but what seems so to others. Again, that's a true sign which by the consent of men becomes a sign; therefore also that is honourable, which by the consent of men, that is to say, by the command of the City, becomes a sign of honour. It is not therefore against the will of God, declared by the way of reason onely, to give him such signs of honour as the City shall command. Wherefore Subjects can transferre their Right of judging the manner of Gods worship on him or them who have the Sovereign power. Nay, they must doe it, for else all manner of absurd opinions, concerning the nature of God, and all ridiculous ceremonies which have been used by any Nations, will bee seen at once in the same, City. whence it will fall out, that every man will beleieve that all the rest doe offer God an affront; so that it cannot be truly said of any that he worships God; for no man worships God, that is to say, honours him outwardly, but he who doth those things, whereby hee appeares to others for to honour him. It may therefore bee concluded, that the Interpretation of all Lawes, as well Sacred, as Secular, (God ruling by the way of nature only) depends on the authority of the City, that is to say, that man, or councell, to whom the Sovereign power is committed; and that whatsoever God commands, he commands by his voyce. And on the other side, that whatsoever is commanded by them, both concerning the manner of honouring God, and concerning secular affaires, is commanded by God himselfe.

XVIII. Against this, some Man may demand, first, Whether it doth not follow, that the City must be obeyed if it command us directly to affront God, or forbid us to worship him? I say, it does not follow, neither must we obey. For to affront, or not to worship at all, cannot by any Man be understood for a manner of worshipping; neither also had any one, before the constitution of a City, of those who acknowledge God to rule, a Right to deny him the honour which was then due unto him; nor could he therefore transfer a Right on the City of commanding any such things. Next, if it be demanded whether the City must be obeyed if it command somewhat to be said, or done, which is not a disgrace to God directly,

but from whence by reasoning disgracefull consequences may be derived: as for example, if it were commanded to worship God in an image, before those who account that honourable? Truly it is to be done*. For Worship is instituted in signe of Honour; but to Worship him thus, is a signe of honour, and increaseth Gods Honour among those who do so account of it. Or if it be commanded to call God by a name which we know not what it signifies, or how it can agree with this word, God? That also must be done; for what we do for Honours sake, (and we know no better), if it be taken for a signe of Honour, it is a signe of Honour; and therefore if we refuse to doe it, we refuse the enlarging of Gods Honour. The same judgement must be had of all the Attributes and Actions about the meerly rationall Worship of God which may be controverted, and disputed; for though these kind of commands may be sometimes contrary to right reason, and therefore sins in them who command them, yet are they not against right reason, nor sins in Subjects, whose right reason in points of Controversie is that, which submits its selfe to the reason of the City. Lastly, if that Man, or Councell, who hath the Supreme Power, command himselfe to be Worshipt with the same Attributes, and Actions, wherewith God is to be Worshipt, the question is, whether we must obey? There are many things which may be commonly attributed both to God, and Men; for even Men may be Praised, and Magnified; and there are many actions whereby God, and Men, may be Worshipt. But the significations of the Attributes, and Actions, are onely to be regarded: Those Attributes therefore, whereby we signify our selves to be of an opinion, that there is any man endued with a Sovereignty independent from God, or that he is immortall, or of infinite power, and the like, though commanded by Princes, yet must they be abstained from. As also from those Actions signifying the same, as Prayer to the absent; to aske those things which God alone can give, as Rain, and Fair weather; to offer him what God can onely accept, as Oblations, Holocausts; or to give a Worship, then which a greater cannot be given, as Sacrifice. For these things seeme to tend to this end, that God may not be thought to rule, contrary to what was supposed from the beginning. But genuflection, prostration, or any other act of the body

whatsoever, may be lawfully used even in civill Worship. for they may signifie an acknowledgment of the civill power onely. For Divine Worship is distinguisht from civill, not by the motion, placing, habit, or gesture of the Body, but by the declaration of our opinion of him whom we doe Worship; as if we cast down our selves before any man, with intention of declaring by that Signe that we esteeme him as God, it is Divine Worship; if we doe the same thing as a Signe of our acknowledgment of the civill Power, it is civill Worship. Neither is the Divine Worship distinguished from Civill by any action usually understood by the words *latreia* and *douleia*, whereof the former marking out the Duty of Servants, the latter their Destiny, they are words of the same action in degree.

- [Truly it is to be done] We said in the 14. Article of this Chapter, That they who attributed limits to God, transgress the naturall Law concerning Gods Worship. Now they who worship him in an Image, assigne him limits; wherefore they doe that which they ought not to doe, and this place seemes to contradict the former. We must therefore know first, that they who are constrained by Authority, doe not set God any bounds, but they who command them; for they who worship unwillingly, doe worship in very deed, but they either stand or fall there, where they are commanded to stand or fall by a lawfull Sovereign. Secondly, I say it must be done, not at all times, and every where, but on supposition that there is no other rule of worshipping God beside the dictates of humane reason; for then the will of the City stands for Reason. But in the Kingdome of God by way of Covenant, whether old, or new, where idolatry is expressly forbid, though the City commands us to worship thus, yet must we not do it. Which, if he shall consider, who conceived some repugnancy between this, and the 14. Article, will surely cease to think so any longer.

XIX. From what hath been said may be gathered, that God reigning by the way of naturall reason onely, Subjects doe sinne, First, if they break the morall Laws,

which are unfolded in the second and third Chapters. Secondly, if they break the Lawes, or commands of the City in those things which pertain to Justice. Thirdly, if they worship not God, kata ta nomika. Fourthly, if they confesse not before men, both in words, and deeds, that there is one God most good, most great, most blessed, the Supreme King of the World, and of all worldly Kings; that is to say, if they doe not worship God. This fourth sinne in the naturall Kingdome of God, by what hath been said in the foregoing Chapter, in the second Article, is the sinne of Treason against the Divine Majesty; for it is a denying of the Divine Power, or Atheisme. For sinnes proceed here, just as if we should suppose some man to be the Sovereign King, who being himselfe absent, should rule by his Vice-Roy; against whom sure they would transgresse who should not obey his Vice-Roy in all things, except he usurpt the Kingdome to himself, or would give it to some other; but they who should so absolutely obey him, as not to admit of this exception, might be said to be guilty of Treason.

Chapter XVI: Of the Kingdome of God under the Old Covenant

I. MANKIND, FROM conscience of its own weaknesse, and admiration of naturall events, hath this, that most men beleieve God to be the invisible Maker of all visible things, whom they also fear, conceiving that they have not a sufficient protection in themselves; but the imperfect use they had of their Reason, the violence of their Passions did so clowd them, that they could not rightly worship him. Now the fear of invisible things, when it is sever'd from right reason is superstition. It was therefore almost impossible for men without the speciall assistance of God to avoyd both Rocks of Atheisme and Superstition: for this proceeds from fear without right reason, that, from an opinion of right reason, without feare. Idolatry therefore did easily fasten upon the greatest part of men, and almost all nations did worship God in Images, and resemblances of finite things; and they worshipt spirits, or vain visions, perhaps out of fear calling them Devills. But it pleased the Divine Majesty (as we read it written in the sacred history) out of all mankind to call forth Abraham, by whose means he might bring men to the true worship of him, and to reveal himselfe supernaturally to him, and to make that most famous Covenant with him and his seed, which is called the old Covenant, or Testament. He therefore is the head of true Religion; he was the first that after the Deluge taught, that there was one God, the Creatour of the Universe; And from him the Kingdome of God by way of Covenants, takes its beginning. Joseph. Antiq. Jewes. lib. I. ca.

II. In the beginning of the world God reigned indeed, not onely naturally, but also by way of Covenant, over Adam, and Eve; so as it seems he would have no obedience yeelded to him, beside that which naturall Reason should dictate, but by the way of Covenant, that is to say, by the consent of men themselves. Now

because this Covenant was presently made void, nor ever after renewed, the originall of Gods Kingdom (which we treat of in this place) is not to be taken thence. Yet this is to be noted by the way, that by that precept of not eating of the tree of the knowledge of good and evill (whether the judicature of good and evill, or the eating of the fruit of some tree were forbidden) God did require a most simple obedience to his commands, without dispute whether that were good, or evill, which was commanded; for the fruit of the tree, if the Command be wanting, hath nothing in its own nature, whereby the eating of it could be morally evill, that is to say, a sinne.

III. Now the Covenant between God and Abraham, was made in this manner. Gen. 17. v. 7, 8. I will establish my Covenant between me and thee, and thy seed after thee in their generations, for an everlasting Covenant, to be a God unto thee, and to thy seed after thee. And I will give unto thee, and to thy seed after thee, the Land wherein thou art a stranger, all the Land of Canaan, for an everlasting possession, and I will be their God. Now it was necessary to institute some sign whereby Abraham and his seed should retain the memory of this Covenant; wherefore Circumcision was added to the Covenant, but yet as a sign onely. vers 10: This is my Covenant which yee shall keep between me and thee, and thy seed after thee, every man-child among you shall be circumcised, and ye shall circumcise the flesh of your foreskin, and it shall be a token of the Covenant between me and you. It is therefore Covenanted, that Abraham shall acknowledge God to be his God, and the God of his seed; that is to say, that he shall submit himselfe to be governed by him, and that God shall give unto Abraham the inheritance of that Land wherein he then dwelt, but as a Pilgrim, and that Abraham for a memoriall sign of this Covenant, should take care to see himselfe, and his male seed circumcised.

IV. But seeing that Abraham even before the Covenant acknowledged God to be the Creatour and King of the world, (for he never doubted either of the being, or the Providence of God) how comes it not to be superfluous, that God would purchase to himself with a price, and by contract, an obedience which was due to

him by nature; namely by promising Abraham the Land of Canaan, upon condition that he would receive him for his God, when by the Right of nature he was already so? By those words therefore, To be a God unto thee and to thy seed after thee, wee understand not that Abraham satisfied this Covenant by a bare acknowledgement of the power, and Dominion which God had naturally over men, that is to say, by acknowledging God indefinitely, which belongs to naturall reason; but he must definitely acknowledge him, who said unto him, Gen. 12. v. 1. Get thee out of thy Country, &c. Gen. 13. v. 14. Lift up thine eyes. &c. who appear'd unto him, Gen. 18. v. 1. in the shape of three celestiall men, and Gen. 15. v. 1. In a vision; and vers. 13. In a dream, which is matter of faith. In what shape God appeared unto Abraham, by what kinde of sound he spake to him, is not exprest, yet it is plain that Abraham beleev'd that voyce to be the voyce of God, and a true Revelation; and would have all his to worship him, who had so spoken unto him, for God the Creatour of the world; and that his faith was grounded on this, not that he beleev'd God to have a being, or that he was true in his promises, that which all men beleeve, but that he doubted not him to be God, whose voice, and promises he had heard; and that the God of Abraham signified not simply God, but that God which appeared unto him, even as the worship which Abraham owed unto God in that notion, was not the worship of reason, but of Religion, and Faith, and that, which not reason, but God had supernaturally revealed.

V. But we read of no Lawes given by God to Abraham, or by Abraham to his family, either then, or after, secular, or sacred (excepting the Commandement of Circumcision, which is contained in the Covenant it selfe); whence it is manifest, that there were no other Lawes, or worship, which Abraham was obliged to, but the Lawes of nature, rationall worship, and circumcision.

VI. Now Abraham was the Interpreter of all Lawes, as well sacred as secular, among those that belonged to him, not meerly naturally, as using the Lawes of nature onely, but even by the form of the Covenant it selfe, in which obedience is promised by Abraham not for himselfe onely, but for his seed also; which had

been in vain, except his children had been tyed to obey his Commands: And how can that be understood, which God sayes Gen. 18. vers. 18. 19. (All the Nations of the earth shall be blessed in him; for I know him, that he will command his children, and his houshold after him, and they shall keep the way of the Lord to doe justice, and judgement) unlesse his children and his houshold were supposed to be obliged to yeeld obedience unto his Commands.

VII. Hence it followes, that Abrahams subjects could not sinne in obeying him, provided that Abraham commanded them not, to deny Gods Existence, or Providence, or to doe somewhat expresly contrary to the honour of God. In all other things, the word of God was to be fetcht from his lips only, as being the Interpreter of all the Lawes, and words of God. For Abraham alone could teach them who was the God of Abraham, and in what manner he was to be worshipped. And they who after Abrahams death were subject to the Sovereignty of Isaac or Iacob, did by the same reason obey them in all things without sin, as long as they acknowledged, and profest the God of Abraham to be their God. For they had submitted themselves to God simply, before they did it to Abraham; and to Abraham before they did it to the God of Abraham; againe, to the God of Abraham before they did it to Isaac. In Abrahams subjects therefore, To deny God was the only Treason against the Divine Majesty; but in their posterity it was also Treason to deny t he God of Abraham, that is to say, to worship God otherwise then was instituted by Abraham, to wit, in Images made with hands, as other Nations did, which for that reason were called Idolators. And hitherto subjects might easily enough discern what was to be observed, what avoyded in the Commands of their Princes. In Images made with hands In the 15. Cha. Article, There wee have shewed such a kinde of worship to be irrationall; but if it be done by the command of a City to whom the written word of God is not known, nor received, we have then shewed this worship in the 15. Chap. art. 18. to be rationall. But where God reigns by way of Covenant, in which it is expresly warned not to worship thus, as in the Covenant made with Abraham, there, whether it be with, or without the Command of the City, it is ill done.

VIII. To goe on now, following the guidance of the holy Scripture, The same Covenant was renewed, Gen. 26. vers. 3, 4. with Isaac, and Gen. 28. vers. 14. with Iacob, where God stiles himselfe not simply God, whom nature doth dictate him to be, but distinctly the God of Abraham and Isaac; afterward being about to renew the same Covenant, by Moyses, with the whole People of Israel, Exod. 3. v. 6. I am saith he the God of thy Father, the God of Abraham, the God of Isaac, and the God of Jacob. Afterward when that People, not only the freest, but also the greatest enemy to humane subjection, by reason of the fresh memory of their AEgyptian bondage, abode in the wilderness near mount Sinai, that antient Covenant was propounded to them all to be renewed in this manner, Exod. 19. ver. 5. Therefore if yee will obey my voice indeed, and keep my Covenant, (to wit, that Covenant which was made with Abraham, Isaac, and Iacob) then shall yee be a peculiar Treasure unto me, above all People; for all the earth is mine, and yee shall be to me a Kingdome of Priests, and an holy Nation. And all the People answered together, and said, All that the Lord hath spoken, will we doe, vers. 8.

IX. In this Covenant, among other things, we must consider well the appellation of Kingdom not used before. For although God both by nature & by Covenant made with Abraham, was their King, yet owed they him an obedience and worship only naturall, as being his subjects; & religious such as Abraham instituted, as being the Subjects of Abraham, Isaac, & Iacob, their naturall Princes; For they had received no word of God beside the naturall word of right reason, neither had any Covenant past between God and them, otherwise then as their wils were included in the will of Abraham, as their Prince. But now by the Covenant made at mount Sinai, the consent of each man being had, there becomes an institutive Kingdome of God over them. That Kingdom of God so renowned in Scriptures and writings of Divines, took its beginning from this time, and hither tends that which God said to Samuel, when the Israelites asked a King, 1. Sam. 8. 7. They have not rejected thee, but they have rejected me, that I should not reign over them; and that which Samuel told the Israelites, 1. Sam. 12. 12. Yee said unto me, nay, but a King shall reign over us, when the Lord your God was your

King; and that which is said, Jer. 31. vers. 31. I will make a new Covenant, &c. Although I was an Husband unto them; And the doctrine also of Judas Galilaeus, where mention is made in Ioseph. Antiq. of the Iewes, 18. Book, 2. Chap. in these words: But Judas Galilaeus was the first authour of this fourth way of those who followed the study of wisdome. These agree in all the rest with the Pharisees, excepting that they burn with a most constant desire of liberty, beleeving God alone to be held for their Lord and Prince, and will sooner endure even the most exquisite kinds of torments, together with their kinsfolks, and dearest friends, then call any mortall man their Lord.

X. The Right of the Kingdome being thus constituted by way of Covenant, let us see in the next place, what lawes God propounded to them; now those are knowne to all, to wit, the Decalogue, and those other, as well judiciall as ceremoniall lawes, which we find from the 20. Chap. of Exodus to the end of Deuteronomie, and the death of Moyses. Now of those lawes deliver'd in generall by the hand of Moyses, some there are which oblige naturally, being made by God, as the God of nature, and had their force even before Abrahams time; others there are which oblige by vertue of the Covenant made with Abraham, being made by God as the God of Abraham, which had their force even before Moyses his time, by reason of the former Covenant; but there are others which oblige by vertue of that Covenant onely which was made last with the people themselves, being made by God, as being the Peculiar King of the Israelites. Of the first sort are all the Precepts of the Decalogue which pertaine unto manners, such as, Honour thy Parents, thou shalt not Kill, thou shalt not commit Adultery, thou shalt not Steale, thou shalt not beare false witnesse, thou shalt not Covet; For they are the Lawes of nature; Also the precept of not taking Gods name in vaine, for it is a part of naturall worship, as hath beene declar'd in the foregoing Chap. Art. 15. In like manner the second Commandement of not worshipping by way of any Image made by themselves; for this also is a part of naturall Religion, as hath beene shewed in the same Article. Of the second sort is the first Commandment of the Decalogue, of not having any other Gods; for in that consists the essence of the

Covenant made with Abraham, by which God requires nothing else, but that he should be his God, and the God of his seede: Also the Precept of keeping holy the Sabbath; for the Sanctification of the seventh day is instituted in memoriall of the six dayes Creation, as appeares out of these words, Exod. 31. ver. 16, 17. It is a perpetuall Covenant, (meaning the Sabbath) and a signe betweene me, and the Children of Israel for ever, for in sixe dayes the Lord made Heaven, and Earth, and on the seventh day he rested, and was refreshed. Of the third kind are the Politique, judiciall and Ceremoniall lawes, which onely belong'd to the Jewes. The lawes of the first and second sort written in Tables of stone, to wit the Decalogue, was kept in the Ark it selfe. The rest written in the volume of the whole Law, were laid up in the side of the Arke. Deut. 31. ver. 26. For these retaining the faith of Abraham might be chang'd, those could not.

XI. All Gods Lawes are Gods Word; but all Gods Word is not his Law. I am the Lord thy God which brought thee out of the Land of AEgypt, is the word of God, it is no Law: Neither is all that which for the better declaring of Gods Word is pronounc't, or written together with it, instantly to be taken for Gods Word: For, Thus saith the Lord, is not the voice of God, but of the Preacher or Prophet. All that, and onely that, is the word of God which a true Prophet hath declar'd God to have spoken. Now the writings of the Prophets comprehending as well those things which God, as which the Prophet himselfe speaks, are therefore called the word of God, because they containe the word of God. Now because all that, and that alone, is the Word of God which is recommended to us for such, by a true Prophet, it cannot be knowne what Gods Word is, before we know who is the true Prophet; nor can we beleeve Gods Word, before we beleeve the Prophet. Moyses was belev'd by the People of Israel for two things, His Miracles, and his Faith; for how great, and most evident Miracles soever he had wrought, yet would they not have trusted him, at least he was not to have beene trusted, if he had call'd them out of AEgypt to any other worship then the worship of the God of Abraham, Isaac, and Jacob their Fathers. For it had beene contrary to the Covenant made by themselves with God. In like manner two things there are, to

wit, supernaturall Prediction of things to come, which is a mighty miracle; and Faith in the God of Abraham their deliverer out of AEGypt, which God propos'd to all the Jews to be kept for marks of a true Prophet. He that wants either of these is no Prophet, nor is it to be receiv'd for Gods word which he obtrudes for such. If Faith be wanting, he is rejected in these words, Deut. 13. ver. 1, 2, 3, 4, 5. If there arise among you a Prophet, or a dreamer of dreams, and giveth thee a signe, or a wonder, and the signe or the wonder come to Passe, whereof he spake unto thee, saying, Let us goe after other Gods, & c. That Prophet, or that dreamer of dreames shall be put to death. If Praediction of events be wanting, he is condemn'd by these, Deut. 18. ver. 21, 22. And if thou say in thine heart, how shall we know the word which the Lord hath not spoken? When a Prophet speaketh in the name of the Lord, if the thing follow not, nor come to Passe, that is the thing which the Lord hath not spoken, but the Prophet hath spoken it presumptuously. Now, that that is the word of God which is publisht for such by a true Prophet, and that he was held to be a true Prophet among the Jewes, whose faith was true, and to whose praedictions the events answer'd, is without controversie. But what it is to follow other Gods, and whether the events which are affirm'd to answer their praedictions, doe truly answer them, or not, may admit many controversies, specially in praedictions which obscurely, & aenigmatically foretell the Event, such as the praedictions of almost all the Prophets are, as who saw not God apparently like unto Moyses, but in darke speeches, and in figures. Numb. 12. ver. 8. But of these we cannot judge otherwise then by the way of naturall reason; because that Judgment depends on the Prophets interpretation, and on its proportion with the Event.

XII. The Jewes did hold the booke of the whole Law which was called Deuteronomie, for the written word of God, and that onely, (forasmuch as can be collected out of sacred history) untill the Captivity; for this booke was deliver'd by Moyses himselfe to the Priests to be kept, and layd up in the side of the Ark of the Covenant, and to be copyed out by the Kings; and the same a long time after by the authority of King Josiah acknowledg'd againe for the Word of God. Kings

23. ver. 2. But it is not manifest when the rest of the books of the Old Testament were first receiv'd into Canon. But what concernes the Prophets, Isaiah and the rest, since they foretold no other things then what were to come to passe, either in or after the Captivity, their writings could not at that time be held for Prophetique, by reason of the Law cited above. Deut. 18. ver. 21, 22. Whereby the Israelites were commanded not to account any man for a true Prophet but him whose Prophecies were answer'd by the events; And hence peradventure it is that the Jews esteem'd the writings of those whom they slew when they Prophesied, for Prophetique afterward, that is to say, for the word of God.

XIII. It being known what Lawes there were under the old Covenant, and that Word of God receiv'd from the beginning; we must farthermore consider with whom the authority of judging, whether the writings of the Prophets arising afterward, were to be receiv'd for the Word of God, that is to say, whether the Events did answer their praedictions or not, and with whom also the authority of interpreting the Lawes already receiv'd, and the written Word of God, did reside; which thing is to be trac't through all the times, and severall changes of the Commonwealth of Israel. But it is manifest that this power during the life of Moyses, was intirely in himselfe; for if he had not been the Interpreter of the Lawes and Word, that office must have belong'd either to every private Person, or to a congregation, or Synagogue of many, or to the High-Priest, or to other Prophets. First, that that office belong'd not to private men, or any Congregation made of them, appeares hence, that they were not admitted, nay they were prohibited, with most heavy threats, to heare God speake, otherwise then by the means of Moyses; for it is written, Let not the Priests and the people break through to come up unto the Lord, lest he break forth upon them. So Moyses went downe unto the people, and spake unto them. Exod. 19. 24, 25. It is farther manifestly, and expresly declar'd, upon occasion given by the Rebellion of Core, Dathan and Abiram, and the two hundred and fifty Princes of the Assembly, that neither private men, nor the Congregation should pretend that God had spoken by them, and by Consequence that they had the right of interpreting Gods Word; for

they contending, that God spake no lesse by them then by Moyses, argue thus, Yee take too much upon you, seeing all the Congregation are holy, every one of them, and the Lord is among them; wherefore then lift yee up your selves above the Congregation of the Lord? Numb. 16. ver. 3. But how God determin'd this controversie is easily understood by the 33. and 35. verses of the same Chapter, where Corah, Dathan, and Abiram went downe alive into the Pit, and there came out fire from the Lord, and consumed the two hundred and fifty men that offer'd Incense: Secondly, that Aaron the high Priest had not this authority, is manifest by the like controversie betweene him (together with his Sister Miriam) and Moyses; For the question was, whether God spake by Moyses only, or by them also, that is to say, whether Moyses alone, or whether they also were interpreters of the Word of God. For thus they said, Hath the Lord indeed spoken onely by Moyses? Hath he not also spoken by us? Numb. 12. ver. 2. But God reprov'd them, and made a distinction betweene Moyses and other Prophets, saying, If there be a Prophet among you, I the Lord will make my selfe knowne unto him in a vision, and will speake unto him in a dreame: My Servant Moyses is not so, &c. For with him will I speake mouth to mouth, even apparently, and not in darke speeches, and the Similitude of the Lord shall he behold; wherefore then were yee not afraid to speake against my Servant Moyses? Ibid. ver. 6, 7, 8. Lastly, that the interpretation of the Word of God as long as Moses liv'd, belong'd not to any other Prophets whatsoever, is collected out of that place which we now cited concerning his eminency above all others, and out of naturall reason, for as much as it belongs to the same Prophet who brings the Commands of God to unfold them too; but there was then no other Word of God, beside that which was declar'd by Moyses. And out of this also, that there was no other Prophet extant at that time, who Prophetied to the people, excepting the 70. Elders who Prophetied by the Spirit of Moyses; and even that Joshuah, who was then Moyses his Servant, his successour afterward, beleev'd to be injuriously done, till he knew it was by Moyses his Consent; which thing is manifest by Text of Scripture, And the Lord came downe in a clowd, & c. and tooke of the spirit that was upon Moyses,

and gave it unto the 70. Elders. Numb. 11. ver. 25. Now after it was told that they Prophesied, Joshuah said unto Moyses, Forbid them my Lord. But Moyses answered, Why eniest thou for my sake? Seeing therefore Moyses alone was the Messenger of Gods Word, and that the authority of interpreting it pertain'd neither to private men, nor to the Synagogue, nor to the High Priest, nor to other Prophets; it remaines, that Moyses alone was the Interpreter of Gods Word, who also had the supreme power in civill matters; And that the conventions of Corah with the rest of his complices against Moses and Aaron; and of Aaron with his Sister against Moyses, were rais'd, not for the salvation of their soules, but by reason of their ambition, and desire of Dominion over the People.

XIV. In Joshuahs time the interpretation of the Lawes, and of the Word of God, belong'd to Eleazar the High Priest, who was also under God, their absolute King. Which is collected first of all out of the Covenant it selfe, in which the Commonwealth of Israel is called a Priestly Kingdome, or as it is recited in the 1 Pet. 2. 9. A Royall Priesthood; which could in no wise be sayd, unlesse by the institution and Covenant of the People, the regall power were understood to belong to the High Priest. Neither doth this repugne what hath beene said before, where Moyses, and not Aaron, had the Kingdome under God; since it is necessary that when one man institutes the forme of a future Common-wealth, that one should governe the Kingdome which he institutes, during his life, (whether it be Monarchie, Aristocracy, or Democracy) and have all that power for the present, which he is bestowing on others for the future. Now, that Eleazar the Priest, had not onely the Priesthood, but also the Sovereignty, is expressely set downe in Joshuahs call to the administration; for thus it is written. Take thee Joshuah the Son of Nun, a man in whom is the Spirit, and lay thine hand upon him, and set him before Eleazar the Priest, and before all the Congregation, and give him a charge in their sight, and thou shalt put some of thine honour uPon him, that all the Congregation of the Children of Israel may be obedient, and he shall stand before Eleazar the Priest, who shall aske Counsell for him after the judgment of Urim, before the Lord: at his word shall they goe out, and at his word shall they

come in, and all the Children of Israel with him, even all the Congregation. Num. 27. ver. 18, 19, 20, 21. where to aske Counsell of God for whatsoever is to be done, (that is) to interpret Gods word, and in the name of God to Command in all matters, belongs to Eleazar; and to goe out, and, to come in at his word, that is to say, to obey, belongs both to Joshuah, and to all the People. Its to be observ'd also, that that speech, Part of thy glory; clearely denotes that Joshuah had not a power equall with that which Moyses had. In the meane time it is manifest, that even in Ioshuahs time, the Supreme power and authority of interpreting the word of God, were both in one Person.

XV. After Ioshuahs death follow the times of the Iudges untill King Saul, in which it is manifest that the right of the Kingdome instituted by God, remained with the High Priest. For the Kingdome was by Covenant Priestly, that is to say, Gods government by Priests; and such ought it to have been untill that form with Gods consent were changed by the people themselves: which was not done, before that requiring a King God consented unto them, and said unto Samuel, Hearken unto the voyce of the people in all that they say unto thee; for they have not rejected thee, but they have rejected me that I should not reign over them. 1. Sam. 8. 7. The supreme civill power was therefore Rightly due by Gods own institution to the High-Priest; but actually that power was in the Prophets, to whom (being rayseed by God in an extraordinary manner) the Israelites (a people greedy of the Prophets) submitted themselves to be protected, and judged, by reason of the great esteem they had of Prophecies. The Reason of this thing, was, because that though penalties were set, and Judges appointed in the institution of Gods priestly Kingdome, yet, the Right of inflicting punishment, depended wholly on private judgement; and it belonged to a dissolute multitude, and each single Person, to punish or not to punish according as their private zeale should stirre them up. And therefore Moyses by his own command punisht no man with death; but when any man was to be put to death, one or many stirred up the multitude against him or them, by divine authority, and saying, Thus saith the Lord. Now this was conformable to the nature of Gods peculiar Kingdome. For

there God reignes indeed where his Lawes are obeyed, not for fear of men, but for fear of himselfe. And truly, if men were such as they should be, this were an excellent state of civill government; but as men are, there is a coercive power (in which I comprehend both right and might) necessary to rule them. And therefore also God from the beginning prescribed Lawes by Moyses for the future Kings. Deut. 17. vers. 14. and Moyses foretold this in his last words to the people, saying, I know that after my death ye will utterly corrupt your selves, and turn aside from the way that I have commanded you, &c. Deut. 31. 29. When therefore according to this prediction there arose another generation who knew not the Lord, nor yet the works which he had done for Israel, the children of Israel did evill in the sight of the Lord, and served Balaam, Iud. 2. 10, 11. to wit, they cast off Gods government, that is to say, that of the Priest, by whom God ruled, and afterward, when they were overcome by their enemies, and opprest with bondage, they looked for Gods will, not at the hands of the Priest any more, but of the Prophets. These therefore actually judged Israel, but their obedience was rightly due to the High Priest; Although therefore the Priestly Kingdome after the death of Moyses, & Ioshuah, was without power, yet was it not without Right. Now that the interpretation of Gods word did belong to the same High Priest, is manifest by this, That God, after the Tabernacle, & the Ark of the Covenant was consecrated, spake no more in mount Sinai, but in the Tabernacle of the Covenant, from the propitiatory which was between the Cherubims, whether it was not lawfull for any to approach except the High Priest. If therefore regard be had to the Right of the Kingdome, the supreme civill Power, and the authority of interpreting Gods word, were joyned in the High Priest; If we consider the fact, they were united in the Prophets who judged Israel. For as Iudges, they had the civill authority, as Prophets, they interpreted Gods word, and thus every way hitherto these two powers continued inseparable.

XVI. Kings being once constituted, its no doubt but the civill authority belonged to them, for the Kingdome of God by the way of Priesthood, (God consenting to the request of the Israelites) was ended; which Hierom also marks

speaking of the books of Samuel: Samuel (sayes he) Eli being dead, and Saul slain, declares the old Law abolisht; Furthermore the Oaths of the new Priesthood, and new Sovereignty in Zadok, and David, do testifie, that the Right whereby the Kings did rule, was founded in the very concession of the People. The Priest could rightfully do only what God had commanded, but the King had by right whatsoever power over every man that each man by right had over himself; for the Israelites granted him a Right to judge of all things, and to wage warre for all men; in which two are contained all Right whatsoever can be conceived from man to man. Our King (say they) shall judge us, and goe out before us, and fight our battails, 1. Sam. 8. 20. Iudicature therefore belonged to the Kings; but to judge is nothing else then by interpreting to apply the facts to the Lawes; to them therefore belonged the interpretation of Lawes too. And because there was no other written word of God acknowledged beside the Law of Moyses, untill the Captivity, the authority of interpreting Gods word, did also belong to the Kings; Nay, forasmuch as the word of God must be taken for a Law, if there had been another written word beside the Mosaicall Law, seeing the interpretation of Lawes belonged to the Kings, the interpretation of it must also have belonged to them. When the book of Deuteronomie (in which the whole Mosaicall Law was contained) being a long time lost, was found again, the Priests indeed asked Counsell of God concerning that book; but not by their own authority, but by the Commandement of Iosiah, and not immediately neither, but by the meanes of Holda the Prophetesse. Whence it appears that the authority of admitting books for the word of God, belonged not to the Priest; neither yet followes it that that authority belonged to the Prophetesse, because others did judge of the Prophets whether they were to be held for true, or not. For to what end did God give signes, and tokens to all the People, whereby the true Prophets might be discerned from the false, namely, the event of predictions, and conformity with the Religion establisht by Moyses, if they might not use those marks? The authority therefore of admitting books for the word of God belonged to the King, & thus that book of the Law was approved, and received again by the authority of King Iosiah, as

appears by the fourth book of the Kings, 22. 23. Chap. where it is reported that he gathered together all the severall degrees of his Kingdome, the Elders, Priests, Prophets, and all the people, and he read in their eares all the words of the Covenant, that is to say, he caused that Covenant to be acknowledged for the Mosaicall Covenant, that is to say, for the word of God, and to be again received, and confirmed by the Israelites. The civill power therefore, and the power of discerning Gods word from the word of men, and of interpreting Gods word even in the dayes of the Kings was wholly belonging to themselves. Prophets were sent not with authority, but in the form, and by the Right of Proclaimers, and Preachers, of whom the hearers did judge; and if perhaps these were punished who did not listen to them plainly, teaching easie things, it doth not thence follow, that the Kings were obliged to follow all things which they in Gods name did declare, were to be followed. For though Iosiah the good King of Iudah were slain because he obeyed not the word of the Lord from the mouth of Necho King of AEgypt, that is to say, because he rejected good Counsell though it seemed to come from an enemy, yet no man I hope will say that Iosiah was by any bond either of divine, or humane Lawes obliged to beleieve Pharoah Necho King of AEgypt, because he said that God had spoken to him. But what some man may object against Kings, that for want of learning, they are seldome able enough to interpret those books of antiquity in the which Gods word is contained, and that for this cause it is not reasonable that this office should depend on their authority, he may object as much against the Priests, and all mortall men, for they may erre; and although Priests were better instructed in nature, and arts then other men, yet Kings are able enough to appoint such interpreters under them; and so, though Kings did not themselves interpret the word of God, yet the office of interpreting them might depend on their authority; and they who therefore refuse to yeeld up this authority to Kings, because they cannot practise the office it selfe, doe as much as if they should say that the authority of teaching Geometry must not depend upon Kings, except they themselves were Geometricians. We read that Kings have prayed for the People, that they have blest the people, that they have consecrated the Temple,

that they have commanded the Priests, that they have removed Priests from their office, that they have constituted others. Sacrifices indeed they have not offered, for that was hereditary to Aaron, and his sonnes; but it is manifest, as in Moyses his life time, so throughout all ages from King Saul to the captivity of Babylon, that the Priesthood was not a Maistry, but a Ministry.

XVII. After their returne from Babylonian bondage, the Covenant being renewed, and sign'd, the Priestly Kingdome was restor'd to the same manner it was in from the death of Ioshuah to the beginning of the Kings; excepting that it is not expresly set downe that the return'd Jewes did give up the Right of Sovereignty either to Esdras (by whose directions they ordred their State) or to any other, beside God himselfe. That reformation seemes rather to be nothing else then the bare promises, and vowes of every man to observe those things which were written in the booke of the Law. Notwithstanding, (perhaps not by the Peoples intention) by virtue of the Covenant which they then renewed, (for the Covenant was the same with that which was made at Mount Sinai) that same state was a Priestly Kingdome, that is to say, the supreme civill authority, and the sacred were united in the Priests. Now, howsoever through the ambition of those who strove for the Priesthood, and by the interposition of forraigne Princes, it was so troubled till our Saviour Iesus Christs time, that it cannot be understood out of the histories of those times, where that authority resided; yet it's plaine, that in those times, the power of interpreting Gods Word was not severed from the supreme civill power.

XVIII. Out of all this, we may easily know how the Iewes in all times from Abraham unto Christ were to behave themselves in the Commands of their Princes. For as in Kingdomes meerly humane men must obey a subordinate Magistrate in all things, excepting when his Commands containe in them some Treason; so in the Kingdome of God, the Iewes were bound to obey their Princes, Abraham, Isaac, Jacob, Moyses, the Priest, the King, every one during their time in all things, except when their commands did containe some treason against the Divine Majesty. Now treason against the Divine Majesty was, first, the deniall of

his divine providence, for this was to deny God to be a King by nature; next, Idolatry, or the worship not of other (for there is but one God) but of strange Gods, that is to say, a worship though of one God, yet under other Titles, Attributes, and Rites, then what were establisht by Abraham, and Moyses. For this was to deny the God of Abraham to be their King by Covenant made with Abraham, and themselves. In all other things they were to obey; and if a King or Priest having the Sovereign authority, had commanded somewhat else to be done which was against the Lawes, that had been his sinne, and not his subjects, whose duty it is, not to dispute, but to obey the Commands of his superiours.

Chapter XVII: Of the Kingdome of God by the new Covenant

I. THERE ARE many cleare propheties extant in the old Testament concerning our Saviour Jesus Christ, who was to restore the Kingdome of God by a new Covenant, partly foretelling his regall Dignity, partly his Humility and Passion. Among others concerning his Dignity, these; God blessing Abraham, makes him a promise of his sonne Isaac, and addes, And Kings of People shall be of him, Gen. 17. vers. 16. Jacob blessing his sonne Judah, The Scepter (quoth he) shall not depart from Judah, Gen. 49. vers. 10. God to Moyses, A Prophet (saith he) will I raise them up from among their brethren like unto thee, and will put my words in his mouth, and he shall speak unto them all that I shall command him, and it shall come to Passe, that whosoever will not hearken unto my words, which he shall speak in my name, I will require it of him, Deut. 18. vers. 18. Isaias, The Lord himselfe shall give thee a signe, Behold a Virgin shall conceive, and bear a Sonne, and shall call his name Emanuel, Isai 7. v. 14. The same Prophet, Unto us a child is born, unto us a Sonne is given, and the government shall be upon his shoulders; and his name shall be called Wonderfull, Counsellour, the mighty God, the Everlasting Father, the Prince of Peace, Isai 9. vers. 6. And again, There shall come forth a Rod out of the stemme of Jesse, and a branch shall grow out of his roots; the spirit of the Lord shall rest upon him, &c. he shall not judge after the sight of his eyes, neither reProve after the hearing of his eares, but with righteousnesse shall he judge the Poor, &c. and he shall smite the earth with the rod of his mouth, and with the breath of his lips shall he slay the wicked, Isay 11. vers. 1, 2, 3, 4, 5. Furthermore in the 51, 52, 53, 54, 56, 60, 61, 62. Ch. of the same Isay, there is almost nothing else contained but a description of the coming, and the works of Christ. Jeremias, Behold the days come, saith the Lord, that I will make a new Covenant with the house of Israel, and with the house of Judah,

Jerem. 31. 31. And Baruch, This is our God. &c. Afterward did he shew himselfe upon earth, and conversed with men; Baruch 3. vers. 35, 37. Ezekiel, I will set up one Shepherd over them, and he shall feed them, even my Servant David, And I will make with them a Covenant of Peace, &c. Ezek. 34. vers. 23, 25. Daniel, I saw in the night visions, and behold one like the Sonne of man came with the clouds of heaven, and came to the antient of dayes, and they brought him near before him, and there was given him Dominion, and Glory, and a Kingdome, that all People, Nations, and Languages should serve him, his Dominion is an everlasting Dominion, &c. Dan. 7. vers. 13, 14. Hagga, Yet once it is a little while, and I will shake the Heaven, and the Earth, and the Sea, and the drye Land, and I will shake all Nations, and the desire of all Nations shall come, Hagga 2. v. 8. Zachariah, Under the type of Joshuah the High Priest: I will bring forth my servant the Branch, &c. Zach. 3. v. 8. And again, Behold the man whose name is the Branch, Zach. 6. v. 12. And again, Rejoyce greatly O Daughter of Sion, Shout O Daughter of Jerusalem, behold thy King cometh to thee, he is just, having salvation, Zach. 9. v. 9. The Jewes moved by these, and other Prophetes, expected Christ their King to be sent from God, who should redeem them, and furthermore bear rule over all Nations. Yea this Prophetie had spread over the whole Roman Empire (which Vespasian too, though falsly, interpreted in favour of his own enterprises) That out of Judea should come he that should have dominion.

II. Now the Prophetes of Christs Humility and Passion, amongst others are these. Isa 53. v. 4 He hath borne our griefes, and carried our sorrowes; yet we did esteeme him stricken, smitten of God, & afflicted, and by and by, He was oppressed, he was afflicted, yet he opened not his mouth; He is brought as a Lamb to the slaughter, and as a sheep before her Shearer is dumb, so opened he not his mouth, &c. vers. 7. And again, He was cut out of the Land of the living, for the transgression of my People was he stricken, &c. vers. 8. Therefore will I divide him a portion with the great, and he shall divide the spoyle with the strong, because he hath poured out his soule unto death, and he was numbred with the

transgressours, and he bare the sinne of many, and made intercession for the transgressours, vers. 12. And that of Zachary, He is lowly, riding upon an Asse, and upon a Colt the foale of an Asse. Zach. 9. vers. 9.

III. In the reign of Tiberius Cesar, JESUS our Saviour a Galilaean began to preach, the sonne (as was supposed) of Joseph, declaring to the people of the Jewes, that the Kingdome of God expected by them, was now come; and that himselfe was a King, that is to say, THE CHRIST: Explaining the Law; choosing twelve Apostles, and seventy Disciples, after the number of the Princes of the Tribes, and seventy Elders (according to the pattern of Moyses) to the Ministry; teaching the way of salvation by himselfe and them; purging the Temple; doing great signes, and fulfilling all those things which the Prophets had foretold of Christ to come. That this man, hated of the Pharisees, (whose false doctrine and hypocriticall sanctity he had reproved) and by their means, of the People accused of unlawfull seeking for the Kingdome, and crucified, was the true CHRIST, and King promised by God, and sent from his father to renew the new Covenant between them and God, both the Evangelists doe shew (describing his Genealogie, nativity, life, doctrine, death, and resurrection) and by comparing the things which he did, with those which were foretold of him, all Christians doe consent to.

IV. Now from this, That CHRIST was sent from God his Father to make a Covenant between him and the people, it is manifest, that though Christ were equall to his Father according to his nature, yet was he inferior according to the Right of the Kingdom; for this office to speak properly, was not that of a King, but of a Vice-roy, such as Moyses his Government was. For the Kingdom was not his, but his Fathers; which CHRIST himselfe signified when he was baptized as a subject, and openly profest, when he taught his Disciples to pray, Our Father, Thy Kingdome come, &c. And when he said, I will not drink of the blood of the grape, untill that day when I shall drink it new with you in the Kingdome of my Father, Mat. 26. vers. 29. And Saint Paul. As in Adam all die, so in Christ shall all be made alive; but every man in his own order; Christ the first fruits, afterward they

that are Christs, who beleev'd in his coming; Then cometh the end when he shall have delivered up the Kingdom to God even his Father, &c. 1. Cor. 15. vers. 22, 23, 24. The same notwithstanding is also called the Kingdome of Christ: for both the Mother of the sonnes of Zebedie petitioned Christ, saying, Grant that these my two sonnes may sit, the one on thy right hand, the other on thy left, in thy Kingdome, Mat. 20. vers. 21. And the Theef on the Cross, Lord remember me when thou comest into thy Kingdom, Luke 23. vers. 42. And Saint Paul, For this know yee, that no whormonger, &c. shall enter into the Kingdome of God, and of Christ, Ephes. 5. ver. 5. And elsewhere, I charge thee before God, and the Lord Iesus Christ, who shall judge the quick and dead at his appearing, and his Kingdome, & c. 2 Tim. 4. ver. 1. And the Lord shall deliver me from every evill worke, and will Preserve me unto his heavenly Kingdome, ver. 18. Nor is it to be marvelled at, that the same Kingdome is attributed to them both, since both the Father, and the Son, are the same God; and the new Covenant concerning Gods Kingdome, is not propounded in the Name of the FATHER, but in the name of the FATHER, of the SON, and of the HOLY-GHOST, as of one God.

V. But the Kingdome of God, for restitution whereof CHRIST was sent from God his Father, takes not its beginning before his second comming, to wit, from the day of Judgement, when he shall come in Majesty accompanied with his Angels: For it is promis'd the Apostles, that in the Kingdome of God, they shall judge the twelve tribes of Israel. Ye which have followed me in the regeneration, when the Sonne of man shall sit in the Throne of his glory, ye also shall sit upon twelve Thrones judging the twelve tribes of Israel, Mat. 19. ver. 28. which is not to be done till the day of judgement; CHRIST therefore is not yet in the throne of his Majesty, nor is that time when CHRIST was conversant here in the world call'd a Kingdome, but a regeneration, that is to say a renovation, or restitution of the Kingdome of God, and a calling of them who were hereafter to be receiv'd into his Kingdome; And where it is said, When the Son of man shall come in his glory, and all the holy Angels with him, then shall he sit upon the throne of his glory, and before him shall be gathered all Nations, and he shall seParate them

one from another, as a Shepherd divideth his Sheep from the Goates, Mat. 25. ver. 31. we may manifestly gather, that there will be no Locall separation of Gods Subjects from his Enemies, but that they shall live mixt together untill CHRISTs second comming. Which is also confirm'd by the comparison of the Kingdome of heaven, with wheat mingled with Darnell; and with a net containing all sorts of fish. But a multitude of men, Enemies and Subjects, living promiscuously together, cannot properly be term'd a Kingdome. Besides, the Apostles, when they askt our Saviour, Whether he would at that time when he ascended into heaven, restore the Kingdome unto Israel? did openly testifie, that they then, when CHRIST ascended, thought the Kingdome of God not to be yet come. Farthermore, the words of CHRIST, My Kingdome is not of this world; And, I will not drinke, &c. till the Kingdome of God come: And, God hath not sent his Son into the World, to judge the World, but that the World through him might be sav'd. And, If any man heare not my words, and keepe them, I judge him not; for I came not to judge the World, but to save the World. And, Man, who made me a judge or divider betweene you? And the very Appellation of the Kingdome of Heaven testifies as much. The same thing is gathered out of the words of the Prophet Jeremiah, speaking of the Kingdome of God by the new Covenant, They shall teach no more every man his Neighbour, saying, Know the Lord, for they shall all know me from the least of them, to the greatest of them, saith the Lord, Jer. 31. v. 34. which cannot be understood of a Kingdome in this World. The Kingdome of God therefore, for the restoring whereof CHRIST came into the world, of which the Prophets did Prophetie, and of which praying wee say, Thy Kingdome come, (if it must have Subjects locally separated from Enemies, if judicature, if Majesty, according as hath beene foretold,) shall begin from that time, wherein God shall separate the Sheep from the Goats; wherein the Apostles shall judge the twelve Tribes of Israel; wherein CHRIST shall come in Majesty, and glory; wherein Lastly, all men shall so know God, that they shall not need to be taught, that is to say, at CHRIST his second comming, or the day of Judgement. But if the Kingdome of God were now already restor'd, no reason

could be rendered why CHRIST having compleated the work for which he was sent, should come againe, or why we should pray, Thy Kingdome come.

VI. Now, although the Kingdome of God by CHRIST to be establisht with a new Covenant, were Heavenly, we must not therefore thinke, that they, who beleeving in CHRIST would make that Covenant, were not so to be govern'd here on the Earth too, as that they should persevere in their faith, and obedience promis'd by that Covenant. For in vaine had the Kingdome of heaven beene promis'd, if we were not to have been led into it. But none can be led, but those who are directed in the way. Moyses, when he had instituted the Priestly Kingdome, himselfe though he were no Priest, yet rul'd, and conducted the People all the time of their Peregrination untill their entrance into the promis'd Land. In the same manner is it our Saviours office (whom God in this thing would have like unto Moyses) as he was sent from his Father, so to governe the future Subjects of his heavenly Kingdome in this life, that they might attaine to, and enter into that, although the Kingdome were not properly his, but his Fathers. But the government whereby CHRIST rules the faithfull ones in this life, is not properly a Kingdome, or Dominion, but a Pastorall charge, or the Right of teaching, that is to say, God the father gave him not a power to judge of Meum and Tuum as he doth to the Kings of the Earth; nor a Coercive power; nor legislative; but of shewing to the world, and teaching them the way, and knowledge of Salvation, that is to say, of Preaching, and declaring what they were to doe, who would enter into the Kingdome of Heaven. That CHRIST had receiv'd no power from his father to judge in questions of Meum and Tuum, that is to say, in all questions of Right among those who belev'd not; those words above cited doe sufficiently declare: Man, who made me a judge, or divider betweene you? And it is confirm'd by reason; for seeing CHRIST was sent to make a Covenant between God and men, and no man is oblig'd to performe obedience before the Contract be made, if he should have judg'd of questions of Right, no man had been tyed to obey his sentence. But that the discerning of Right was not committed to CHRIST in this world, neither among the faithfull,

nor among infidels, is apparent in this, that that Right without all controversie belongs to Princes as long as it is not by, But it is not derogated God himselfe derogated from their authority; before the day of Judgement, as appeares by the words of Saint Paul, speaking of the day of Judgement, Then commeth the end when He shall have delivered up the Kingdome to God even the Father, when He shall have put downe all rule, and all authority, and Power, 1 Cor. 15. ver. 24. Secondly, the words of our Saviour reproving James, and Iohn, when they had said, Wilt thou that we call for Fyer from Heaven, that it may consume them (namely the Samaritans, who had denyed to receive him going up to Jerusalem) and replying, The Son of Man is not come to destroy soules, but to save them; And those words, Behold I send you as Sheep among Wolves; Shake off the dust of your Feet, and the like; And those words, God sent not his Son into the world, to judge the world, but that the world through him might be sav'd; and those, If any man heare my words, and keep them not, I judge him not, for I came not to judge the world, & c. doe all shew, that he had no power given him, to condemne or punish any man. We reade indeed that the Father judgeth no Man, but hath committed all judgement to the Son, but since that both may, and must be understood of the day of future judgement, it doth not at all repugne what hath beene sayed before. Lastly, that he was not sent to make new Lawes, and that therefore by his Office, and mission, he was no Legislatour properly so called, nor Moyses neither, but a bringer and Publisher of his Fathers Lawes, (for God only, and neither Moyses, nor CHRIST, was a King by Covenant) is collected hence, that he sayed, I came not to destroy (to wit the Lawes before given from God by Moyses, which he presently interprets) but to fulfill; And, He that shall break one of the least of these Commandements, and shall teach men so, He shall be called least in the Kingdome of Heaven. CHRIST therefore had not a Royall, or Sovereigne power committed to him from his Father in this world, but consiliary, and doctrinall onely; which himselfe signifies, as well then when he call his Apostles, not Hunters, but Fishers of men; as when he compares the Kingdome of God to a graine of mustard seed, and to a little Leaven hid in meale.

VII. God promis'd unto Abraham first, a numerous seed, the possession of the Land of Canaan, and a blessing upon all Nations in his seed, on this Condition, that he, and his seed should serve him; next unto the seed of Abraham according to the flesh, a Priestly Kingdome, a Government most free, in which they were to be Subject to no humane power, on this Condition, that they should serve the God of Abraham on that fashion which Moyses should teach. Lastly, both to them, and to all Nations, a heavenly, and eternall Kingdome, on Condition that they should serve the God of Abraham, on that manner which Christ should teach. For by the new, that is to say, the Christian Covenant, it's covenanted on mens part, to serve the God of Abraham, on that manner which JESUS should teach: On Gods part, to pardon their sinnes, and bring them into his caelestiall Kingdome. We have already spoken of the quality of the heavenly Kingdome above in the 5. Article; but it is usually call'd, sometimes the Kingdome of Heaven, sometimes the Kingdome of Glory, sometimes the life Eternall. What's required on mens part, namely to serve God as CHRIST should teach, containes two things, Obedience to be performed to God, (for this is to serve God) and Faith in JESUS, to wit, That we beleieve JESUS TO BE THAT CHRIST who was promis'd by God: for that only is the cause why his Doctrine is to be followed, rather than any others. Now in holy Scriptures, Repentance is often put in stead of Obedience, because Christ teacheth every where, that with God the Will is taken for the deed; but Repentance is an infallible sign of an obedient mind. These things being understood, it will most evidently appear out of many places of sacred Scripture, that those are the Conditions of the Christian Covenant which we have nam'd, to wit, giving remission of sins, and eternall life on Gods part; and Repenting, and Beleieving in JESUS CHRIST, on Mens part. First, the words, The Kingdom of God is at hand. Repent yee and beleieve the Gospell, Mark 1. 15. contain the whole Covenant: In like manner those, Thus it is written, and thus it behoved Christ to suffer, and to rise from the dead the third day; and that repentance, and remission of sinnes should be preached in his Name among all Nations, begining at Jerusalem, Luke 24. vers. 46, 47. And those, Repent and be converted, that

your sins may be blotted out, when the times of refreshing shall come, &c. Acts 3. vers. 19. And sometimes one part is expresly propounded, and the other understood, as here, He that beleeveth in the Sonne, hath everlasting life; He that beleeveth not the Sonne, shall not see life, but the wrath of God abideth on him, Iohn 3. vers. 36, Where Faith is exprest, Repentance not mentioned. And in CHRISTs preaching, Repent, for the Kingdome of heaven is at hand, Mat. 4. 17. Where Repentance is exprest, Faith is understood. But the parts of this new Contract are most manifestly, and formally set down there, where a certain Ruler bargaining as it were for the Kingdom of God, asketh our Saviour, Good Waster, what shall I doe to inherit eternall life, Luke 18. v. 18. But CHRIST first propounds one part of the price, namely observation of the Commandements, or obedience, which when he answered that he had kept, he adjoynes the other, saying, Yet lackest thou one thing; Sell all that thou hast, and distribute to the Poor, and thou shalt have Treasure in Heaven, and come, follow me, v. 22. This was matter of Faith. He therefore not giving sufficient credit to CHRIST, and his heavenly Treasures, went away sorrowfull. The same Covenant is contained in these words: Hee that beleeveth, and is baptized, shall be saved, he that beleeveth not, shall be damned, Mark 16. vers. 15, 16. Where Faith is exprest, Repentance is supposed in those that are baptized; and in these words, Except a man be born again of water, and the Holy Ghost, he cannot enter into the Kingdome of Heaven, Iohn 3. vers. 5. Where to be born of water, is the same with regeneration, that is to say, Conversion to CHRIST. Now that Baptisme is required in the two places cited just before, and in divers others, we must understand, that what Circumcision was to the old Covenant, that Baptisme is to the new: Seeing therefore, that was not of the Essence, but served for a memoriall of the old Covenant, as a Ceremony or signe (and was omitted in the wilderness) in like manner this also is used, not as pertaining to the Essence, but in memory, and for a signe of the New Covenant which wee make with God; and provided the will be not wanting, the Act through necessity may be omitted; but Repentance and Faith, which are of the Essence of the Covenant, are alwayes required.

VIII. In the Kingdome of God after this life there will be no, Lawes. partly because there is no roome for Lawes, where there is none for sinne; partly because Laws were given us from God, not to direct us in Heaven, but unto Heaven. Let us now therefore enquire what Laws CHRIST (establisht not himselfe, for he would not take upon him any Legislative authority, as hath been declared above in the sixth Article, but) propounded to us for his Fathers. Wee have a place in Scripture, where he contracts all the Lawes of God publisht till that time, into two Precepts, Thou shalt love the Lord thy God with all thine heart, with all thy soul, and with all thy minde: this is the greatest, and first Commandement. And the second is like unto it: Thou shalt love thy Neighbour as thy selfe. On these two Commandements hangs all the Law, and the Prophets, Mat. 22. vers. 37, 38, 39, 40. The first of these was given before by Moyses in the same words, Deut. 6. vers. 5. And the second even before Moyses; for it is the naturall Law, having its begining with rationall nature it selfe. And both together is the summe of all Lawes: for all the Lawes of divine naturall worship, are contained in these words, Thou shalt love God; and all the Lawes of divine worship due by the old Covenant, in these words, Thou shalt love thy God, that is to say, God as being the peculiar King of Abraham, and his seed; and all the Lawes naturall, and civill, in these words, Thou shalt love thy Neighbour as thy selfe. For he that loves God and his neighbour, hath a minde to obey all Lawes, both divine, and humane. But God requires no more then a minde to obey. Wee have another place, where CHRIST interprets the Lawes, namely, the fifth, sixth, and seventh entire Chapters of Saint Matthewes Gospell. But all those Lawes are set down, either in the Decalogue, or in the morall Law, or are contained in the faith of Abraham; as that Law of not putting away a wife is contained in the faith of Abraham: for that same, Two shall be one flesh, was not delivered either by CHRIST first, or by Moyses, but by Abraham, who first publisht the Creation of the world. The Lawes therefore which CHRIST contracts in one place, and explaines in another, are no other then those to which all mortall men are obliged, who acknowledge the God of Abraham. Beside these, we read not of any Law

given by CHRIST, beside the institution of the Sacraments of Baptisme, and the Eucharist.

IX. What may be said then of these kinde of Precepts: Repent, Be Baptized, Keep the Commandements, Beleeve the Gospell, Come unto me, Sell all that thou hast, give to the Poor, follow me, and the like? We must say that they are not Lawes, but a calling of us to the faith, such as is that of Isa. Come, buy wine, and milk without monie, and without Price, Isai 55. vers. 1. Neither if they come not, doe they therefore sinne against any Law, but against prudence onely; neither shall their infidelity be punisht, but their former sinnes. Wherefore Saint John saith of the unbeleever, The wrath of God abideth on him; he saith not, The wrath of God shall come upon him; And, He that beleeveth not, is already judged; he saith not, shall be judged, but is already judged. Nay it cannot be well conceived, that remission of sinnes should be a benefit arising from faith, unlesse we understand also on the other side, that the punishment of sinnes is an hurt proceeding from infidelity.

X. From hence, that our Saviour hath prescribed no distributive Lawes, to the Subjects of Princes, and Citizens of Cities, that is to say, hath given no rules whereby a Subject may know, and discern what is his owne, what another mans, not by what forms, words, or circumstances, a thing must be given, delivered, invaded, possest, that it may be known by Right to belong to the Receiver, Invader, or Possessour, we must necessarily understand that each single subject (not only with unbeleever, among whom CHRIST himselfe denied himselfe to be a judge and distributer, but even with Christians) must take those rules from his City, that is to say, from that Man, or Councell, which hath the supreme power. It followes therefore, that by those Lawes, Thou shalt not kill, Thou shalt not commit adultery, Thou shalt not steale, Honour thy Father and Mother, nothing else was commanded, but that Subjects, and Citizens, should absolutely obey their Princes in all questions concerning Meum & Tuum, their own and others Right. For by that Precept, Thou shalt not kill, all slaughter is not prohibited; for he that said, Thou shalt not kill, said also, Whosoever doth work uPon the Sabbath, shall

be put to death, Exod 35. vers. 2. No, nor yet all slaughter the cause not being heard; for he said, Slay every man his Brother, and every man his Companion, and every man his Neighbour, Exo. 32. v. 27. And there fell of the People about three thousand men, v. 28. Nor yet all slaughter of an innocent Person; for Iephte vowed, Whosoever cometh forth, &c. I will offer him up for a burnt offering unto the Lord, Jud. 11. vers. 31. and his vow was accepted of God. What then is forbidden? Onely this: that no man kill another, who hath not a Right to kill him, that is to say, that no man kill, unlesse it belong to him to doe so. The Law of CHRIST therefore concerning killing, and consequently all manner of hurt done to any man, and what penalties are to be set, commands us to obey the City only. In like manner, by that Precept, Thou shalt not commit adultery, all manner of Copulation is not forbidden, but only that of lying with another mans wife; but the judgment which is another mans wife, belongs to the City, and is to be determined by the rules which the City prescribes: This precept therefore commands both male and female to keep that faith intire which they have mutually given, according to the statutes of the City. So also by the precept, Thou shalt not steal, all manner of invasion, or secret surreption is not forbidden, but of another mans. only. The subject therefore is commanded this only, that he invade not, nor take away ought which the City prohibits to be invaded or taken away; and universally not to call any thing murder, adultery, or theft, but what is done contrary to the civill Lawes. Lastly, seeing CHRIST hath commanded us to honour our Parents, and hath not prescribed, with what Rites, what appellations, and what manner of obedience they are to be honoured, it is to be supposed that they are to be honoured with the will indeed, and inwardly, as Kings and Lords over their Children, but outwardly, not beyond the Cities permission, which shall assign to every man (as all things else, so also) his honour. But since the nature of justice consists in this, that every Man have his own given him, its manifest, that it also belongs to a Christian City to determin what is justice, what injustice, or a sinne against justice; Now what belongs to a City, that must be judg'd to belong to him or them who have the Sovereaine power of the City.

XI. Moreover, because our Saviour hath not shewed Subjects any other Lawes for the government of a City beside those of nature, that is to say, beside the Command of obedience, no Subject can privately determine who is a publique friend, who an enemy, when Warre, when Peace, when Truce is to be made; nor yet what Subjects, what authority, and of what men, are commodious, or prejudiciall to the safety of the Common-weale. These, and all like matters therefore are to be learned, if need be, from the City, that is to say, from the Sovereign powers.

XII. Furthermore, all these things, to build Castles, Houses, Temples; to move, carry, take away mighty weights; to send securely over Seas; to contrive engines, serving for all manner of uses; to be well acquainted with the face of the whole world, the Courses of the Starres, the seasons of the yeare, the accounts of the times, and the nature of all things; to understand perfectly all naturall and civill Rights; and all manner of Sciences, which (comprehended under the Title of Philosophy) are necessary partly to live, partly to live well; I say, the understanding of these (because CHRIST hath not delivered it) is to be learnt from reasoning, that is to say by making necessary consequences, having first taken the beginning from experience. But mens reasonings are sometimes right, sometimes wrong, and consequently that which is concluded, and held for a truth, is sometimes truth, sometimes error. Now, errors even about these Philosophicall points doe sometimes publique hurt, and give occasions of great seditions, and injuries: It is needfull therefore, as oft as any controversie ariseth in these matters contrary to publique good, and common Peace, that there be some body to judge of the reasoning, that is to say, whether that which is inferred, be rightly inferred or not, that so the controversie may be ended. But there are no rules given by CHRIST to this purpose; neither came he into the world to teach Logick. It remaines therefore that the Iudges of such controversies be the same with those whom God by nature had instituted before, namely those who in each City are constituted by the Sovereign. Moreover, if a controversie be raised of the accurate and proper signification (i.e.) the definition of those names or

appellations which are commonly us'd, in so much as it is needfull for the peace of the City, or the distribution of right, to be determin'd, the determination will belong to the City; for men by reasoning doe search out such kind of definitions in their observation of diverse conceptions, for the signification whereof, those appellations were us'd at divers times, and for divers causes. But the decision of the question whether a man doe reason rightly, belongs to the City. For Example. If a woman bring forth a Child of an unwonted shape, and the Law forbid to kill a man, the question is, whether the Childe be a man. It is demanded therefore what a man is. No man doubts, but the City shall judge it, and that without taking an account of Aristotles definition, that man is a rationall Creature. And these things (namely Right, Politie, and naturall Sciences) are Subjects concerning which CHRIST denies that it belongs to his Office to give any Praecepts, or teach any thing, beside this onely, that in all Controversies about them, every single Subject should obey the Lawes, and determinations of his City. Yet must we remember this, that the same Christ as God could not onely have taught, but also commanded what he would.

XIII. The summe of our Saviours Office was to teach the way, and all the meanes of Salvation, and aeternall life; but Iustice and civill obedience, and observation of all the naturall Lawes is one of the meanes to Salvation. Now these may be taught two wayes; one, as Theorems by the way of naturall reason, by drawing Right and the natural Lawes from humane Principles, and contracts; and this Doctrine thus deliver'd is subject to the censure of civill powers: The other, as Lawes, by divine authority, in shewing the will of God to be such; and thus to teach, belongs onely to him to whom the Will of God is supernaturally knowne, that is to say, to Christ. Secondly, it belong'd to the Office of Christ to forgive sinnes to the Penitent, for that was necessary for the Salvation of men who had already sinn'd; neither could it be done by any other; for remission of sinnes followes not Repentance naturally, (as a Debt) but it depends (as a free gift) on the will of God supernaturally to be reveal'd. Thirdly, it belongs to the Office of Christ to teach all those Commandements of God, whether concerning his

worship, or those points of faith which cannot be understood by naturall reason, but onely by revelation; of which nature are those that he was the Christ; that his Kingdome was not terrestriall, but celestiall; that there are rewards, and punishments after this life; that the soule is immortall; that there should be such, and so many Sacraments, and the like.

XIV. From what hath beene sayed in the foregoing Chapter, it is not hard to distinguish betweene things Spirituall, and Temporall. For since by Spirituall, those things are understood which have their foundation on the authority, and Office of CHRIST, and unlesse CHRIST had taught them, could not have beene known; and all other things are temporall; it followes, that the definition, and determination of whats just, and unjust, the cognizance of all controversies about the meanes of Peace, and publique defence, and the Examination of doctrines, and books in all manner of rationall science, depends upon the temporall Right. But those which are mysteries of faith, depending on CHRIST his word, and authority onely, their judgements belong to spirituall Right. But it is reasons inquisition, and pertaines to temporall Right to define what is spirituall, and what temporall, because our Saviour hath not made that distinction; For although Saint Paul in many places distinguish betweene spirituall things, and carnall things, and calls those things spirituall, which are of the spirit, to wit, the word of wisdom, the word of knowledge, faith, the gift of healing, the working of miracles, Prophetie, divers kindes of tongues, interpretation of tongues, Rom. 8. 5. 1 Cor. 12. 8, 9. All supernaturally inspired by the Holy Ghost, and such as the carnall man understands not, but he only who hath known the mind of CHRIST, 2. Cor. 2. 14, 15, 16. And those things carnall which belong to worldly wealth, Rom. 15. 27. And the men carnall men, 1 Cor. 3. vers. 1, 2, 3. yet hath he not defined, nor given us any rules whereby we may know what proceeds from naturall reason, what from supernaturall inspiration.

XV. Seeing therefore it is plain that our Saviour hath committed to, or rather not taken away from Princes, and those who in each City have obtained the Sovereignty, the supreme authority of judging & determineing al manner of

controversies about temporall matters, we must see henceforth to whom he hath left the same authority in matters spirituall. Which because it cannot bee known, except it be out of the word of God, and the Tradition of the Church, we must enquire in the next place what the word of God is, what to interpret it, what a Church is, and what the will and command of the Church. To omit that the word of God is in Scripture taken sometimes for the Sonne of God, it is used, three manner of wayes; First, most properly for that which God hath spoken; Thus whatsoever God spake unto Abraham, the Patriarchs, Moses, and the Prophets, our Saviour to his Disciples, or any others, is the word of God. Secondly, whatsoever hath been uttered by men on the motion, or by Command of the Holy Ghost; in which sense we acknowledge the Scriptures to be the word of God. Thirdly, in the New Testament indeed the word of God most frequently signifies the Doctrine of the Gospell, or the word concerning God, or the word of the Kingdome of God by CHRIST: as where it is said that CHRIST preach't the Gospell of the Kingdome, Mat. 4. vers. 23. Where the Apostles are said to preach the word of God, Acts 13. vers. 46. Where the word of God is called the word of life, Acts 5. vers. 20. The word of the Gospell, Acts 15. vers. 7. The word of faith, Rom. 10. vers. 8. The word of truth, that is to say, (adding an interpretation) The Gospel of salvation, Eph. 1. 13. And where it is called the word of the Apostles; For Saint Paul sayes, If any man obey not our word, &c. 2. Thess. 3. vers. 14. which places cannot be otherwise meant then of the doctrine Evangelicall. In like manner where the word of God is said to be sowed, to encrease, and to be multiplied, Acts 12. vers. 24. and Cha. vers. 49. it is very hard to conceive this to be spoken of the voyce of God, or of his Apostles; but of their doctrine, easie. And in this third acception is all that doctrine of the Christian faith which at this day is preacht in Pulpits, and contained in the books of divines, the word of God.

XVI. Now the sacred Scripture is intirely the word of God in this second acception, as being that which we acknowledge to be inspired from God. And innumerable places of it, in the first. And seeing the greatest part of it is conversant either in the prediction of the Kingdome of Heaven, or in

prefigurations before the incarnation of CHRIST, or in Evangelization, and explication after, The sacred Scripture is also the word of God, and therefore the Canon and Rule of all Evangelicall Doctrine, in this third signification, where the word of God is taken for the word concerning God, that is to say, for the Gospel. But because in the same Scriptures we read many things Politicall, Historicall, Morall, Physicall, and others which nothing at all concern the Mysteries of our faith, those places although they contain true doctrine, and are the Canon of such kind of doctrines, yet can they not be the Canon of the Mysteries of Christian Religion.

XVII. And truly it is not the dead voyce, or letter of the word of God, which is the Canon of Christian doctrine, but a true and genuine determination; For the minde is not governed by Scriptures, unlesse they be understood. There is need therefore of an Interpreter to make the Scriptures Canon. And hence followes one of these two things, that either the word of the Interpreter is the word of God, or that the Canon of Christian doctrine is not the word of God. The last of these must necessarily be false; for the rule of that doctrine which cannot be knowne by any humane reason, but by divine revelation only, cannot be lesse then divine; for whom we acknowledge not to be able to discern whether some doctrine be true or not, its impossible to account his opinion for a rule in the same doctrine. The first therefore is true, That the word of an Interpreter of Scriptures, is the word of God.

XVIII. Now that Interpreter whose determination hath the honour to be held for the word of God, is not every one that translates the Scriptures out of the Hebrew, and Greek tongue, to his Latine Auditors in Latine, to his French, in French, and to other Nations in their mother tongue; for this is not to interpret. For such is the nature of speech in generall, that although it deserve the chiefe place among those signes whereby we declare our conceptions to others, yet cannot it perform that office alone without the help of many circumstances; For the living voice hath its interpreters present, to wit, time, place, countenance, gesture, the Counsell of the Speaker, and himselfe unfolding his own meaning in other words as oft as need is. To recall these aids of interpretation, so much

desired in the writings of old time, is neither the part of an ordinary wit, nor yet of the quaintest, without great learning, and very much skill in antiquity. It sufficeth not therefore for interpretation of Scriptures, that a man understand the language wherein they speak. Neither is every one an authentique Interpreter of Scriptures, who writes Comments upon them: For men may erre, they may also either bend them to serve their own ambition, or even resisting, draw them into bondage by their forestallings; whence it will follow that an erroneous sentence must be held for the word of God. But although this could not happen, yet as soon as these Commentators are departed, their Commentaries will need explications, and in processe of time, those explications, expositions; those expositions new Commentaries without any end: so as there cannot in any written Interpretation whatsoever be a Canon, or Rule of Christian doctrine, whereby the Controversies of Religion may be determined. It remains, that there must bee some Canonically Interpreter whose legitimate Office it is to end Controversies begun, by explaining the word of God in the judgements themselves; and whose authority therefore must be no lesse obeyed, then theirs who first recommended the Scripture it selfe to us for a Canon of faith; and that one, and the same Person be an Interpreter of Scripture, and a supreme Judge of all manner of doctrines.

XIX. What concerns the word Ecclesia, or Church: originally it signifies the same thing that Concio, or a congregation does in Latin; even as Ecclesiastes, or Church man, the same that concionator, or Preacher, that is to say, He who speaks to the Congregation. In which sense wee read in the Acts of the Apostles, of a Church confused, and of a Lawfull Church, Acts 19. vers. 32, 39. that, taken for a Concourse of people meeting in way of tumult; this, for a convocated Assembly. But in holy writ by a Church of Christians, is sometimes understood the Assembly, and sometimes the Christians themselves, although not actually assembled, if they be permitted to enter into the Congregation, and to communicate with them. For example. Tell it to the Church, Mat. 18. vers. 17. is meant of a Church assembled; for otherwise it is impossible to tell any thing to the Church: But, Hee laid waste the Church, Acts 8. vers. 3. is understood of a

Church not assembled. Sometimes a Church is taken for those who are baptized, or for the professors of the Christian faith, whether they be Christians inwardly, or feignedly, as when we reade of somewhat said or written to the Church, or said or decreed, or done by the Church; sometimes for the Elect onely, as when it is called holy, and without blemish, Ephes. 5. vers. 27. But the Elect, as they are militant, are not properly called a Church; for they know not how to assemble, but they are a future Church, namely in that day when sever'd from the reprobate, they shall bee triumphant. Againe a Church may bee sometimes taken (for all Christians collectively,) as when Christ is called the head of his Church, and the head of his body the Church, Eph. 5. vers. 23. Colos. 1. vers. 18. sometimes for its parts, as the Church of Ephesus, The Church which is in his house, the seven Churches, & c. Lastly, a Church as it is taken for a Company actually assembled, according to the divers ends of their meeting, signifies sometimes those who are met together to deliberate, and judge, in which sense it is also called a Councell, & a Synod; sometimes those who meet together in the house of prayer to worship God, in which signification it is taken in the 1 Cor. 14. vers. 4, 5. 23. 28. &c.

XX. Now a Church which hath personall Rights, and proper actions attributed to it, and of which that same must necessarily be understood, Tell it to the church, and, he that obeys not the church, and all such like formes of speech, is to be defin'd so, as by that word may be understood, A Multitude of men who have made a new Covenant with God in Christ, (that is to say, a multitude of them who have taken upon them the Sacrament of Baptisme) which multitude, may both lawfully be call'd together by some one into one place, and he so calling them, are bound to be present either in Person, or by others. For a multitude of men, if they cannot meet in assembly, when need requires, is not to be call'd a Person; For a Church can neither speak, nor discern, nor heare, but as it is a congregation. Whatsoever is spoken by particular men, (to wit, as many opinions almost as heads) that's the speech of one man, not of the Church; farthermore, if an assembly be made, and it be unlawfull, it shall be considered as null. Not any one of these therefore who are present in a tumult shall be tyed to the decree of the

rest, but specially if he dissent; and therefore neither can such a Church make any decree; for then a multitude is sayd to decree somewhat, when every man is oblig'd by the decree of the major part. We must therefore grant to the definition of a Church (to which we attribute things belonging to a Person) not onely a possibility of assembling, but also of doing it lawfully. Besides, although there be some one who may lawfully call the rest together, yet if they who are called may lawfully not appeare (which may happen among men who are not subject one to another) that same Church is not one Person. For by what Right they, who being call'd to a certaine time, and place, doe meet together, are one Church; by the same, others flocking to another place appointed by them, are another Church. And every number of men of one opinion is a Church, and by Consequence there will be as many Churches as there are divers opinions, that is to say, the same multitude of men will at once prove to be one, and many Churches. Wherefore a Church is not one, except there be a certaine, and known, that is to say, a lawfull power, by meanes whereof every man may be oblig'd to be present in the Congregation, either himselfe in person, or by Proxie. And that becomes One, and is capable of personall functions, by the union of a lawfull power of convocating Synods, and assemblies of Christians; not by uniformity of Doctrine: and otherwise, it is a multitude, and Persons in the plurall, howsoever agreeing in opinions.

XXI. It followes what hath beene already said by necessary connexion, that a City of Christian men, and a Church, is altogether the same thing, of the same men, term'd by two names, for two causes: For the matter of a City & a Church is one, to wit the same Christian men. And the forme which consists in a Lawfull power of assembling them is the same too; for 'tis manifest that every Subject is oblig'd to come thither, whither he is summon'd by his City. Now that which is call'd a City, as it is made up of men, the same, as it consists of Christians, is styled a Church.

XXII. This too is very cohaerent with the same points, If there be many Christian Cities, they are not altogether personally one church. They may indeed

by mutuall consent become one Church, but no otherwise, then as they must also become one City; For they cannot assemble but at some certaine time, and to some place appointed. But Persons, places, and times, belong to civill Right; neither can any Subject or stranger lawfully set his foot on any place, but by the permission of the City, which is Lord of the place. But the things which cannot lawfully be done but by the permission of the City, those, if they be lawfully done, are done by the Cities authority. The Universall church is indeed one mysticall body, whereof CHRIST is the head, but in the same manner, that all men together acknowledging God for the Ruler of the world, are one Kingdome, and one City, which notwithstanding is neither one Person, nor hath it one common action, or determination. Farthermore where it is said that CHRIST is the head of his body the Church, it manifestly appeares, that that was spoken by the Apostle of the Elect, who as long as they are in this world, are a Church onely in potentia, but shall not actually be so before they be separated from the reprobate, and gather'd together among themselves, in the day of Judgement. The Church of Rome of old was very great, but she went not beyond the bounds of her Empire; and therefore neither was she Universall, unlesse it were in that sense, wherein it was also said of the City of Rome, *Orbem jam totum victor Romanus habebat*, when as yet he had not the twentieth part of it. But after that the civill Empire was divided into parts, the single Cities thence arising were so many Churches; and that power which the Church of Rome had over them, might perhaps wholly depend on the authority of those Churches, who having cast off the Emperours were yet content to admit the Doctours of Rome.

XXIII. They may be called Church-men who exercise a publique office in the Church. But of offices there was one a Ministry, another a Maistry; The office of the Ministers was to serve Tables, to take care of the temporall goods of the Church, and to distribute (at that time when all propriety of riches being abolisht, they were fed in common) to each man his portion; The Maisters according to their order, were called some Apostles, some Bishops, some Presbyters, that is to say Elders; yet not so, as that by the name of Presbyter, the age, but the office

might be distinguisht; For Timothy was a Presbyter although a young man; but because for the most part the Elders were receiv'd into the Maistership, the word, denoting age, was us'd to signifie the office. The same Maisters, according to the diversity of their employments were called some of them Apostles, some Prophets, some Evangelists, some Pastors or Teachers. And the Apostolicall worke indeed was universall; the Propheticall to declare their owne revelations in the Church; the Evangelicall to preach, or to be publishers of the Gospell among the infidels; that of the Pastors to teach, confirme, and rule the minds of those who already beleev'd.

XXIV. In the Election of Church-men two things are to be considered, the Election of the Persons, and their consecration, or institution, which also is called ordination. The first twelve Apostles CHRIST himselfe both elected, and ordain'd. After CHRIST'S ascension Matthias was elected in the roome of Judas the Traitour, the Church (which at that time consisted of a Congregation of about one hundred and twenty men) choosing two men: And they appointed two, Joseph and Matthias; but God himselfe by lot approving of Mathias. And Saint Paul calls these twelve the first, and great Apostles, also the Apostles of the Circumcision. Afterward were added two other Apostles, Paul, and Barnabas; ordain'd indeed by the Doctours, and Prophets of the Church of Antioch, (which was a particular Church) by the imposition of hands, but elected by the command of the Holy Ghost. That they were both Apostles is manifest in the 13. of the Acts v. 2, 3. That they receiv'd their Apostleship from hence, namely because they were separated by command of the spirit for the work of God, from the rest of the Prophets, and Doctours of the Church of Antioch, Saint Paul himselfe shewes, who calls himselfe for distinctions sake an Apostle separated unto the Gospell of God, Rom. 1. ver. 1. But if it be demanded further; by what authority it came to passe that that was receiv'd for the command of the Holy Ghost, which those Prophets and Doctours did say proceeded from him, it must necessarily be answer'd; by the Authority of the church of Antioch. For the Prophets & Doctours must be examined by the Church before they be admitted; For Saint John saith, Beleeve

not every Spirit, but try the Spirits, whether they are of God, because many false Prophets are gone out into the world; but by what Church, but that to which that Epistle was written? In like manner Saint Paul reprooves the Churches of Galatia, because they Judaized, Gal. 2. v. 14. although they seemed to do so by the Authority of Peter; for when he had told them that he had, reprehended Peter himselfe with these words, If thou being a Jew, livest after the manner of Gentiles, and not as do the Jewes, why compellest thou the Gentiles to live as do the Jewes? Not long after he questions them, saying, This onely would I learne of you: Received ye the Spirit by the works of the Law, or by the hearing of faith? Gal. 3. ver. 2. Where it is evident, that it was Judaisme which he reprehended the Galathians for, notwithstanding that the Apostle Peter compelled them to Judaize. Seeing therefore it belonged to the Church, and not to Peter, and therefore also not to any man, to determine what Doctors they should follow, it also pertained to the authority of the Church of Antioch to elect their Prophets and Doctors. Now because the Holy Ghost separated to himself the Apostles Paul & Barnabas, by the imposition of hands from Doctors thus elected; its manifest, that imposition of hands, & consecration, of the prime Doctors in each Church, belongs to the Doctors of the same Church. But Bishops, who were also called Presbyters, although all Presbyters were not Bishops, were ordain'd sometimes by Apostles (for Paul & Barnabas when they had taught in Derbe, Lystra, and Iconium, ordained Elders in every Church, Acts 14. v. 23.) sometimes by other Bishops, for Titus was by Paul left in Crete, that he should ordain Elders in every City, Tit. 1. v. 5. And Timothy was advised not to neglect the gift that was in him, which was given him by Prophecy with the laying on of the hands of the Presbytery, 1. Tim. 4. v. 14. And he had rules given him concerning the Election of Presbyters. But that cannot be understood otherwise, then of the ordination of those who were elected by the Church; for no man could constitute a Doctor in the Church, but by the Churches permission. For the duty of the Apostles themselves was not to command, but to teach; and although they who were recommended by the Apostles, or Presbyters, were not rejected, for the esteem that was had of the

recommenders, yet seeing they could not be elected without the will of the Church, they were also suppos'd elected by the authority of the Church. In like manner Ministers, who are called Deacons, were ordained by the Apostles; yet elected by the Church. For when the seven Deacons were to bee elected, and ordained, the Apostles elected them not, but look yee out, (say they) among you Brethren seven men of honest report, &c. And they chose Stephen, &c. And they set them before the Apostles, Acts 6. vers. 3. 6. It is apparent therefore by the custome of the Primitive Church under the Apostles, that the ordination, or consecration of all Church-men, which is done by Prayer, and imposition of hands, belonged to the Apostles, and Doctors; but the Election of those who were to be consecrated, to the Church.

XXV. Concerning the power of binding, and loosing, that is to say of remitting, and retaining of sinnes, there is no doubt, but it was given by Christ to the Pastors then yet for to come, in the same manner as it was to the present Apostles. Now the Apostles had all the power of remitting of sins given them, which Christ himselfe had; As the Father hath sent me (sayes Christ) so send I you, John 20. vers. 21. and he addes, Whose soever sins yee remit, they are remitted, and whose soever sins ye retain, they are retained. vers. 23. But what binding and loosing, or remitting and retaining of sinnes, is, admits of some scruple. For first, to retain his sinnes who being baptized into remission of sins, is truly penitent, seems to be against the very Covenant it selfe of the new Testament, and therefore could not be done by Christ himselfe, much lesse by his Pastors. And to remit the impenitent, seems to be against the will of God the Father, from whom Christ was sent to convert the world, and to reduce men unto obedience. Furthermore, if each Pastor had an authority granted him to remit and retain sinnes in this manner, all awe of Princes, and civill Magistrates, together with all kind of civill Government would be utterly destroyed. For Christ hath said it, nay even nature it selfe dictates, that we should not feare them who slay the body, but cannot kill the soule; but rather feare him who can cast both soule and body into hell, Mat. 10. vers. 28. Neither is any man so mad as not to choose to yeeld obedience rather to

them who can remit, and retain their sinnes, then to the powerfullst Kings. Nor yet on the other side, it is to be imagined, that remission of sinnes is nothing else but an exemption from Ecclesiasticall punishments; for what evill hath excommunication in it, beside the eternall pains which are consequent to it? or what benefit is it to be received into the Church if there were salvation out of it? We must therefore hold, That Pastors have Power, truly, and absolutely to forgive sinnes, but, to the penitent; and to retain them, but, of the impenitent. But while men think that to Repent, is nothing else but that every one condemn his Actions, and change those Counsels which to himselfe seem sinfull, and blameable, there is an opinion risen, that there may be repentance before any Confession of sinnes to men, and that repentance is not an effect, but a cause of Confession; and thence, the difficulty of those who say that the sins of the penitent are already forgiven in Baptisme, and theirs who repent not, cannot be forgiven at al, is against Scripture, and contrary to the words of Christ, Whose soever sins ye remit, &c. We must therefore to resolve this difficulty know in the first place, that a true acknowledgement of sin is Repentance; for he that knows he hath sinned, knows he hath erred, but to will an errour is impossible; therefore he that knowes he hath sinned, wishes he had not done it, which is to repent. Farther, where it may be doubtfull, whether that which is done be a sin or not, we must consider, that repentance doth not precede confession of sins, but is subsequent to it: for there is no repentance but of sinnes acknowledged. The penitent therefore must both acknowledge the fact, and know it to be a sinne, that is to say, against the Law. If a man therefore think, that what he hath done, is not against the Law; its impossible he should repent of it. Before repentance therefore, its necessary there be an application of the facts unto the Law. But its in vain to apply the facts unto the Law without an Interpreter. for not the words of the Law, but the sentence of the Law-giver is the rule of mens actions; but surely either one man, or some men are the Interpreters of the Law, for every man is not judge of his own fact whether it be a sin or not; wherefore the fact of which we doubt whether it be a sinne or not, must be unfolded before some man or men, and the doing of this is

confession. Now when the Interpreter of the Law hath judged the fact to bee a sinne, if the sinner submit to his judgement, and resolve with himselfe not to do so any more, tis repentance; and thus, either it is not true repentance, or else it is not antecedent, but subsequent to confession. These things being thus explained, it is not hard to understand what kinde of power that of binding and loosing is. For seeing in remission of sinnes there are two things considerable, one the Judgement or Condemnation whereby the fact is judged to be a sinne; the other, (when the Party condemned does acquiesce, and obey the sentence, that is to say, Repents) the remission of the sinne, or, (if he repent not) the Retention: The first of these, that is to say, the Judging whether it be a sinne or not, belongs to the Interpreter of the Law, that is, the Sovereign Judge; the second, namely Remission, or retention of the sinne, to the Pastor, and it is that concerning which the power of binding and loosing is conversant. And that this was the true meaning of our Saviour Christ in the institution of the same power, is apparent in the 18 of Mat. vers. 15, 16, 17, 18. thus, He there speaking to his Disciples, sayes, If thy Brother sinne against thee, goe, and tell him his fault betweene thee and him alone, (where we must observe by the way, that if thy Brother sinne against thee, is the same with, if he doe thee injury; and therefore Christ spake of those matters which belonged to the civill Tribunall) he addes, if he heare thee not (that is to say, if he deny that he hath done it, or if having confest the fact, he denies it to be unjustly done) take with thee yet one or two, and if he refuse to heare them, tell it the Church. But why to the Church, except that she might judge whether it were a sinne or not? But if he refuses to hear the Church, that is, if he doe not submit to the Churches sentence, but shall maintain that to be no sin, which She Judges to be a sinne, that is to say, if he repent not (for certain it is that no man repents himselfe of that action which She conceives not to be a sinne) he saith not, Tell it to the Apostles, that we might know that the definitive sentence in the question, whether it were a sin or not, was not left unto them, but to the Church; but let him be unto thee (sayes he) as an Heathen, or Publican, that is, as one out of the Church, as one that is not baptized, that is to say, as one whose sinnes are

retained. For all Christians were baptized into remission of sinnes. But because it might have been demanded who it was that had so great a power, as that of withholding the benefit of Baptisme from the impenitent, Christ shewes that the same Persons to whom he had given authority to baptize the penitent into the remission of sinns, and to make them of heathen men, Christians, had also authority to retain their sins who by the Church should be adjudged to be impenitent, and to make them of Christian men Heathens; and therefore presently subjoynes, Verily I say unto you, Whose soever sinnes yee shall binde upon Earth, they shall bee bound also in Heaven, and whose soever sins yee shall loose upon Earth, they shall be loosed also in Heaven. Whence we may understand, that the power of binding, and loosing, or of remitting, and retaining of sinnes, which is called in another place, the power of the keyes, is not different from the power given in another place in these words, Goe, and teach all Nations, Baptizing them in the Name of the Father, and of the Sonne, and of the Holy Ghost, Mat. 28. ver. 19. And even as the Pastours cannot refuse to Baptize him whom the Church judges worthy, so neither can they retaine his sinnes whom the Church holds fitting to be absolv'd, nor yet remit his sinnes whom the Church pronounceth disobedient. And it is the Churches part to judge of the sinne, the Pastours, to cast out, or to receive into the Church those that are judg'd. Thus Saint Paul to the Church of Corinth, Do not ye judge, saith he, of those that are within? Yet he himself pronounc't the sentence of Excommunication against the incestuous Person, I indeed (saith he) as absent in body, but present in Spirit, &c.

XXVI. The act of retaining sinnes is that which is called by the Church Excommunication, and by Saint Paul, delivering over to Satan. The word Excommunication, sounding the same with aposunagogen poiein, casting out of the Synagogue, seems to be borrowed from the Mosaicall Law, wherein they who were by the Priest adjudged leprous, were commanded to be kept apart out of the Camp, untill by the judgement of the Priest they were againe pronounc't cleane, and by certaine rights (among which the washing of the body was one) were purified, Levit. 13. ver. 46. From hence in processe of time it became a custome

of the Jewes, not to receive those who passed from Gentilisme to Judaisme, (supposing them to be uncleane) unlesse they were first washed; and those who dissented from the Doctrine of the Synagogue, they cast out of the Synagogue. By resemblance of this custome, those that came to Christianity, (whether they were Jewes, or Gentiles) were not receiv'd into the Church without Baptisme; and those that dissented from the Church were depriv'd of the Churches Communion. Now, they were therefore said to be deliver'd over to Satan, because all that was out of the Church, was comprehended within his Kingdome. The end of this kind of Discipline was, that being destitute for a time of the grace and spirituall priviledges of the Church, they might be humbled to salvation. But the effect in regard to secular matters, that being excommunicated, they should not onely be prohibited all Congregations, or Churches, and the participation of the mysteries, but as being contagious they should be avoided by all other Christians, even more then Heathen: for the Apostle allowed to accompany with Heathen, but with these not so much as to eate, 1 Cor. 5. ver. 10, II. Seeing then the effect of Excommunication is such, it is manifest in the first place, that a Christian city cannot be excommunicated. For a Christian City is a Christian Church, as hath been declar'd above in the 21. Art. and of the same extension. But a Church cannot be excommunicated; For either she must excommunicate her selfe, which is impossible; or she must be excommunicated by some other Church, and this, either universall, or particular. But seeing an Universall Church is no Person, (as hath been prov'd in the 22. Artic.) and therefore neither acts, nor does any thing, it cannot excommunicate any man. And a particular church by excommunicating another Church doth nothing; for where there is not one common Congregation, there cannot be any Excommunication. Neither if some one Church (suppose that of Jerusalem) should have excommunicated an other (suppose that of Rome) would it any more have excommunicated this, then her selfe: for he that deprives another of his Communion, deprives himselfe also of the Communion of that other. Secondly, No man can excommunicate the subjects of any absolute government all at once, or forbid them the use of their Temples, or their publique

worship of God. For they cannot be excommunicated by a Church which themselves doe constitute; for if they could, there would not onely not remain a Church, but not so much as a common-weale, and they would be dissolved of themselves; and this were not to be excommunicated, or prohibited. But if they be excommunicated by some other Church, that church is to esteem them as Heathen. But no christian Church by the doctrine of Christ, can forbid the Heathen to gather together, and Communicate among themselves, as it shall seem good to their Cities, especially if they meet to worship Christ, although it be done in a singular custome, and manner: therefore also not the excommunicated, who are to be dealt with as Heathen. Thirdly, a Prince who hath the Sovereign Power, cannot be excommunicated. For by the doctrine of Christ, neither one, nor many subjects together can interdict their Prince any publique, or private places, or deny him entrance into any Assembly whatsoever, or prohibit him the doing of what hee will within his own jurisdiction. For it is Treason among all Cities, for any one, or many subjects joyntly to arrogate to themselves any authority over the whole City; but they who arrogate to themselves an authority over him who hath the supreme power of the City, doe arrogate the same authority over the City it selfe. Besides, a Sovereign Prince, if he be a Christian, hath this farther advantage, that the City whose Will is contained in His, is that very thing which we call a Church; the Church therefore excommunicates no man, but whom it excommunicates by the authority of the Prince: but the Prince excommunicates not himselfe, his subjects therefore cannot doe it. It may be indeed that an Assembly of rebellious Citizens or Traytors, may pronounce the sentence of excommunication against their Prince, but not by Right. Much lesse can one Prince be excommunicated by another, for this would prove not an excommunication, but a provocation to Warre by the way of affront. For since that is not one church which is made up of Citizens belonging to two absolute Cities, for want of power of lawfully assembling them, (as hath been declar'd before in the 22. Art.) they who are of one Church are not bound to obey an other, and therefore cannot be excommunicated for their disobedience. Now, what some

may say, that Princes, being they are members of the Universall church, may also by the authority of the Universall church be excommunicated, signifies nothing: because the Universall church (as hath beene shewed in the 22. Art.) is not one Person, of whom it may be said that shee acted, decreed, determin'd, excommunicated, absolv'd, and the like personall attributes; neither hath she any Governour upon Earth at whose command she may assemble, and deliberate: For to be guide of the Universall church, and to have the power of assembling her, is the same thing as to be Governour, and Lord over all the Christians in the world, which is granted to none, but God onely.

XXVII. It hath beene shewed above in the 18. Art. that the authority of interpreting the Holy Scriptures consisted not in this, that the interpreter might without punishment, expound, and explicate his sentence & opinion taken thence, unto others, either by writing, or by his owne voice; but, that others have not a Right to doe, or teach ought contrary to his sentence; insomuch as the interpretation we speak of is the same with the power of defining in all manner of controversies to be determined by sacred Scriptures. Now we must shew that that power belongs to each Church, and depends on his, or their authority who have the Supreme command, provided that they be Christians. For if it depend not on the civill authority, it must either depend on the opinion of each private Subject, or some forraigne authority. But among other reasons, the inconveniencies that must follow private opinions cannot suffer its dependance on them; of which this is the chiefe, that not onely all civill obedience would be taken away (contrary to Christ his praecept) but all humane society and peace would be dissolved (contrary to the Lawes of nature;) for seeing every man is his owne interpreter of Scripture, that is to say, since every man makes himselfe judge of what is pleasing and displeasing unto God, they cannot obey their Princes before that they have judg'd whether their commands be conformable to the Word of God, or not. And thus either they obey not, or they obey for their owne opinions sake, that is to say, they obey themselves, not their Sovereigne; civill obedience therefore is lost. Againe, when every man followes his owne opinion, it's necessary that the

controversies which rise among them will become innumerable, and indeterminable; whence there will breed among men (who by their own naturall inclinations doe account all dissention an affront) first hatred, then brawles and warres, and thus all manner of peace and society would vanish. We have farthermore for an example, that which God under the old Law required to be observed concerning the book of the Law, namely, that it should be transcrib'd, and publiquely us'd, and he would have it to be the Canon of Divine doctrine: but the controversies about it not to be determined by private Persons, but onely by the Priests. Lastly, it is our Saviours Precept, that if there be any matter of offence between private Persons, they should hear the Church. Wherefore it is the Churches duty to define controversies; it therefore belongs not to private men, but to the Church, to interpret Scriptures. But that we may know that the authority of interpreting Gods Word, that is to say, of determining all questions concerning God, and Religion, belongs not to any forraign Person whatsoever, we must consider first what esteem such a power carries in the mindes of the subjects, and their civill actions. For no man can be ignorant that the voluntary actions of men by a naturall necessity, doe follow those opinions which they have concerning good, and evill, Reward, and Punishment; whence it happens that necessarily they would chuse rather to obey those by whose judgement they beleeve that they shall be eternally happy, or miserable. Now, by whose judgement it is appointed what Doctrines are necessary to salvation, by their judgement doe men expect their eternall blisse, or perdition; they will therefore yeeld them obedience in all things. Which being thus, most manifest it is, that those subjects who believe themselves bound to acquiesce to a forraign authority in those Doctrines which are necessary to salvation, doe not per se constitute a City, but are the subjects of that forraign power. Nor therefore although some Sovereign Prince should by writing grant such an authority to any other, yet so, as he would be understood to have retained the civill power in his own hands, shall such a Writing be valid, or transferre ought necessary for the retaining, or good administration of his command. For by the 2. Cha. artic. no man is said to transferre his Right, unlesse he give some

proper sign, declaring his Will to transferre it; but he who hath openly declared his will to keep his Sovereignty, cannot have given a sufficient sign of transferring the means necessary for the keeping it. This kinde of Writing therefore will not be a sign of Will, but of Ignorance in the contractors. We must consider next how absurd it is for a City, or Sovereign, to commit the ruling of his Subjects consciences to an enemy. For they are, as hath been shewed above in the 5. Cha. artic. in an hostile state, whosoever have not joyn'd themselves into the unity of one Person. Nor contradicts it this truth that they doe not alwayes fight: (for truces are made between enemies) it is sufficient for an hostile minde, that there is suspition, that the Frontiers of Cities, Kingdomes, Empires, strengthened with Garisons, doe with a fighting posture and countenance, though they strike not, yet as enemies mutually behold each other. Lastly, how unequall is it to demand that, which by the very reason of your demand, you confesse belongs to anothers Right? I am the Interpreter of Scriptures to you who are the Subject of anothers Realme: Why? By what Covenants past between you and me? By Divine authority. Whence knowne? Out of holy Scripture. Behold the Book, read it. In vain, unlesse I may also interpret the same for my self; That interpretation therefore doth by Right belong to me, and the rest of my private fellow-subjects; which we both deny. It remains therefore that in all christian Churches, that is to say, in all christian Cities, the interpretation of sacred Scripture depend on, and derive from the authority of that man, or Councell, which hath the Sovereign power of the City.

XXVIII. Now because there are two kindes of controversies, the one about spirituall matters, that is to say, questions of faith, the truth whereof cannot be searcht into by naturall reason; such are the questions concerning the nature, and office of Christ, of rewards and punishments to come, of the Sacraments, of outward worship, and the like: the other, about questions of humane science, whose truth is sought out by naturall reason, and Syllogismes, drawne from the Covenants of men, and definitions (that is to say, significations received by use, and common consent of words) such as are all questions of Right, and Philosophy.

For example, when in matter of Right its questioned whether there be a Promise, and Covenant, or not? that is nothing else, but to demand, whether such words spoken in such a manner be by common use, and consent of the Subjects, a Promise or Covenant; which if they be so called, then it is true that a Contract is made, if not, then it is false: that truth therefore depends on the compacts, and consents of men. In like manner when it is demanded in Philosophy whether the same thing may entirely be in divers places at once; the determination of the question depends on the knowledge of the common consent of men about the signification of the word entire: for if men when they say a thing is entirely somewhere doe signifie by common consent that they understand nothing of the same to be elsewhere, it is false that the same thing is in divers places at once: that truth therefore depends on the consents of men, and by the same reason in all other questions concerning Right, and Philosophy. And they who doe judge that any thing can be determin'd, (contrary to this common consent of men concerning the appellations of things) out of obscure places of Scripture, doe also judge that the use of speech, and at once all humane society, is to be taken away; for he who hath sold an whole field, will say, he meant one whole ridge, and will retaine the rest as unsold; nay, they take away reason it selfe, which is nothing else but a searching out of the truth made by such consent. These kinde of questions therefore need not be determin'd by the City by way of interpretation of Scriptures; for they belong not to Gods Word, in that sense wherein the Word of God is taken for the Word concerning God, that is to say, for the Doctrine of the Gospell; neither is he who hath the Soveraigne Power in the Church, oblig'd to employ any Ecclesiastical Doctours for the judging of any such kind of matters as these. But for the deciding of questions of Faith, that is to say, concerning God, which transcend humane capacity, we stand in need of a divine blessing (that we may not be deceiv'd at least in necessary points) to be deriv'd from CHRIST himselfe by the imposition of hands. For, seeing to the end we may attaine to aeternal Salvation, we are oblig'd to a supernatural Doctrine, & which therefore it is impossible for us to understand; to be left so destitute, as that we can be

deceiv'd in necessary points, is repugnant to aequity. This infallibility our Saviour Christ promis'd (in those things which are necessary to Salvation) to his Apostles untill the day of judgement; that is to say, to the Apostles, and Pastors succeeding the Apostles who were to be consecrated by the imposition of hands. He therefore who hath the Sovereigne power in the City, is oblig'd as a Christian, where there is any question concerning the Mysteries of Faith, to interpret the Holy Scriptures by Clergy-men lawfully ordain'd. And thus in Christian Cities the judgement both of spirituall and temporall matters belongs unto the civill authority. And that man, or councill who hath the Supreme power, is head both of the City, and of the Church; for a Church, and a Christian City is but one thing.

Chapter XVIII: Concerning those things which are necessary for our entrance into the Kingdome of Heaven

I. IT WAS ever granted that all authority in secular matters deriv'd from him who had the Sovereigne power, whether he were one Man, or an Assembly of Men. That the same in spirituall matters depended on the authority of the Church, is manifest by the next foregoing proofs; and besides this, that all Christian Cities are Churches endued with this kind of authority From whence a man though but dull of apprehension may collect, that in a Christian City, (that is to say, in a City whose Sovereignty belongs to a Christian Prince, or Councell) all Power, as well spiritual, as secular, is united under Christ; and therefore it is to be obey'd in all things. But on the other side, because we must rather obey God then Men, there is a difficulty risen, how obedience may safely be yeilded to them, if at any time somewhat should be commanded by them to be done which CHRIST hath prohibited. The reason of this difficulty is, that seeing God no longer speakes to us by CHRIST, and his Prophets in open voice, but by the holy Scriptures, which by divers men are diversly understood, they know indeed what Princes, and a congregated Church doe command; but whether that which they doe command be contrary to the word of God, or not, this they know not, but with a wavering obedience between the punishments of temporall, and spirituall death, as it were sailing betweene Scilla and Carybdis, they often run themselves upon both. But they who rightly distinguish betweene the things necessary to Salvation, and those which are not necessary, can have none of this kind of doubt. For if the command of the Prince, or City be such, that he can obey it without hazard of his aeternall Salvation, it is unjust not to obey them, and the Apostles praecepts take place: Servants in all things obey your Wasters according to the flesh. Children obey your Parents in all things. Col. 3. v. 20, 22. And the command of CHRIST, The

Scribes and Pharisees sit in Moyses chair, all things therefore whatsoever they command you, that observe, and doe. Mat. 23. v. 2. On the contrary, if they command us to doe those things which are punisht with aeternall death, it were madnesse not rather to chuse to dye a naturall death, then by obeying, to dye eternally; and then comes in that which CHRIST sayes, Feare not them who kill the body, but cannot kill the Soule. Mat. 10. v. 28. We must see therefore what all those things are, which are necessary to Salvation.

II. Now all things necessary to Salvation are comprehended in two vertues, Faith, and Obedience. The latter of these if it could be perfect would alone suffice to preserve us from damnation; but because we have all of us beene long since guilty of disobedience against God in Adam, and besides we our selves have since actually sinned, Obedience is not sufficient without remission of sinnes. But this, together with our entrance into the Kingdome of Heaven is the reward of Faith. Nothing else is requisite to Salvation; for the Kingdome of Heaven is shut to none but sinners, that is to say, those who have not perform'd due Obedience to the Lawes; and not to those neither, if they beleieve the necessary articles of the Christian Faith. Now, if we shall know in what points Obedience doth consist, and which are the necessary articles of the Christian Faith, it will at once be manifest what we must doe, and what abstaine from, at the commands of Cities, and of Princes.

III. But by Obedience in this place is signified not the fact, but the Will and desire wherewith we purpose, and endeavour as much as we can to obey for the future: in which sense the word Obedience is aequivalent to Repentance. For the vertue of repentance consists not in the sorrow which accompanies the remembrance of sinne; but in our conversion to the way, and full purpose to sinne no more, without which that sorrow is said to be the sorrow not of a Penitent but a desperate person. But because they who love God cannot but desire to obey the divine Law, and they who love their Neighbours cannot but desire to obey the morall Law, which consists as hath beene shewed above in the 3. Chapter, in the prohibition of Pride, ingratitude, contumely, inhumanity, cruelty, injury, and the

like offences, whereby our Neighbours are prejudic't, therefore also Love or charity are aequivalent to Obedience. Justice also (which is a constant will of giving to every man his due) is aequivalent with it. But that Faith and Repentance are sufficient for Salvation, is manifest by the Covenant it selfe of Baptisme; for they who were by Peter converted on the day of Pentecost, demanding him what they should do? He answered, Repent, and be Baptiz'd every one of you in the name of Jesus for the remission of your Sins. Act. 2. v. 38. There was nothing therefore to be done for the obtaining of Baptisme, that is to say, for to enter into the Kingdome of God, but to Repent, and beleeve in the Name of JESUS. For the Kingdome of Heaven is promis'd by the Covenant which is made in Baptisme; farthermore, by the words of CHRIST answering the Lawyer who askt him what he should doe to inherit eternall life, Thou knowest the Commandements, Thou shalt not Kill, Thou shalt not commit Adultery, &c. which refer to Obedience; and, Sell all that thou hast, and come, and follow me, which relates to faith, Luke 18. ver. 20. Mar. 10. ver. 18. And by that which is said, The just shall live by Faith, (not every man, but the just) for justice is the same disposition of Will which Repentance and Obedience are; And by the words of Saint Mark, The time is fulfilled, and the Kingdome of God is at hand, Repent yee, and beleeve the Gospell, by which words is not obscurely signified that there is no need of other Vertues, for our entrance into the Kingdome of God, excepting those of Repentance and Faith. The Obedience therefore which is necessarily requir'd to Salvation is nothing else but the Will, or endeavour to obey, that is to say, of doing according to the Lawes of God, that is the morall Lawes, which are the same to all men; and the civill Lawes, that is to say, the commands of Soveraignes in temporall matters, and the Ecclesiasticall Lawes in spirituall; which two kinds of Lawes are divers in divers Cities, and Churches, and are knowne by their promulgation, and publique sentences.

IV. That we may understand what the Christian Faith is, we must define Faith in generall, and distinguish it from those other acts of the minde wherewith commonly it is confounded. The object of Faith universally taken, namely for that

which is beleev'd, is evermore a proposition, (that is to say a speech affirmative, or negative) which we grant to be true. But because Propositions are granted for divers causes, it falls out, that these kind of concessions are diversly called: But we grant Propositions sometimes which notwithstanding we receive not into our mindes; and this either for a time, to wit, so long, till by consideration of the consequencies, we have well examin'd the truth of them, which we call supposing; or also simply, as through feare of the Lawes, which is to professe, or confesse by outward tokens; or for a voluntary compliance sake, which men use out of civility to those whom they respect, and for love of Peace to others, which is absolute yeelding. Now the Propositions which we receive for truth, we alwaies grant for some reasons of our owne, and these are deriv'd either from the Proposition it selfe, or from the Person propounding. They are deriv'd from the Proposition it selfe, by calling to minde what things those words which make up the Proposition doe by common consent usually signifie: if so, then the assent which we give is called knowledge, or Science. But if we cannot remember what is certainly understood by those words, but sometimes one thing, sometimes another seeme to be apprehended by us, then we are said to thinke. For example, if it be propounded that two and three makes five; and by calling to minde the order of those numerall words, that it is so appointed by the common consent of them who are of the same language with us, (as it were by a certaine contract necessary for humane society) that five shall be the name of so many unities as are contain'd in two and three taken together, a man assents, that this is therefore true because two and three together, are the same with five. This assent shall be called knowledge, and to know this truth is nothing else but to acknowledge that it is made by our selves; For by whose will and rules of speaking the number... is called two,... is called three, &c... is called five, by their will also it comes to passe, that this Proposition is true, Two and three taken together makes five. In like manner if we remember what it is that is called theft, and what injury, we shall understand by the words themselves, whether it be true that theft is an injury, or not. Truth is the same with a true Proposition; but the Proposition is true in

which the word consequent, which by Logicians is called the praedicate, embraceth the word antecedent in its amplitude, which they call the Subject; and to know truth is the same thing as to remember that it was made by our selves in the common use of words. Neither was it rashly, or unadvisedly said by Plato of old, that knowledge was memory. But it happens sometimes that words although they have a certaine, and defin'd signification by constitution, yet by vulgar use either to adorne, or deceive, they are so wrested from their owne significations, that to remember the conceptions for which they were first impos'd on things is very hard, and not to be maistered but by a sharpe judgement, and very great diligence. It happens too, that there are many words which have no proper, determin'd, and every where the same signification; and are understood not by their owne, but by vertue of other signes us'd together with them. Thirdly, there are some words of things unconceivable; of those things therefore whereof they are the words, there is no conception; and therefore in vaine doe we seeke for the truth of those Propositions, which they make out of the words themselves. In these cases, while by considering the definitions of words we search out the truth of some proposition, according to the hope we have of finding it, we thinke it sometimes true, and sometimes false; either of which apart is called thinking, and also beleeving; both together, doubting. But when our reasons for which we assent to some Proposition, derive not from the Proposition it selfe, but from the Person Propounding, whom we esteeme so learned that he is not deceiv'd, and we see no reason why he should deceive us; our assent, because it growes not from any confidence of our owne, but from another mans knowledge, is called Faith: And by the confidence of whom, we doe beleeve, we are said to trust them, or to trust in them. By what hath been said, the difference appeares first betweene Faith, and Profession; for that is alwaies joyn'd with inward assent, this not alwayes; That is an inward perswasion of the minde, this an outward obedience. Next, betweene Faith, and Opinion; for this depends on our owne reason, that on the good esteeme we have of another. Lastly betweene Faith and Knowledge; for this deliberately takes a proposition broken, and chewed; that swallowes downe

whole and entire. The explication of words, whereby the matter enquir'd after is propounded, is conducive to knowledge; nay, the onely way to know, is by definition. But this is prejudiciall to Faith; for those things which exceede humane capacity, and are propounded to be beleev'd, are never more evident by explication, but on the contrary more obscure, and harder to be credited. And the same thing befalls a man who endeavours to demonstrate the mysteries of Faith by naturall reason, which happens to a sick man, who will needs chew before he will swallow his wholesome, but bitter Pills; whence it comes to passe, that he presently brings them up againe, which perhaps would otherwise, if he had taken them well downe, have prov'd his remedy.

V. We have seene therefore what it is to beleeeve. But what is it to beleeeve in CHRIST? Or what Proposition is that which is the object of our Faith in CHRIST? For when we say, I beleeeve in CHRIST, we signifie indeed Whom, but not What we beleeeve. Now, to beleeeve in CHRIST is nothing else but to beleeeve that JESUS IS THE CHRIST, namely Hee, who according to the Prophetes of Moyses, and the Prophets of Israel, was to come into this world to institute the Kingdome of God. And this sufficiently appeares out of the words of CHRIST himselfe to Martha: I am (saith he) the Resurrection and the life, HE THAT BELEEVETH IN ME, though he were dead, yet he shall live, and WHOSOEVER LIVETH, AND BELEEVETH IN ME, shall never dye. Beleevest thou this? She saith unto him, Yea Lord, I beleeeve that THOU ART THE CHRIST the Son of God, which should come into the world. John 11. ver. 25, 26, 27. In which words we see that the question BELEEVEST THOU. IN ME? is expounded by the answer, THOU ART THE CHRIST. To beleeeve in CHRIST therefore is nothing else but to beleeeve JESUS HIMSELFE saying that he is THE CHRIST.

VI. Faith and Obedience both necessarily concurring to Salvation, what kinde of Obedience that same is, and to whom due, hath beene shewed above in the 3. Article. But now we must enquire what articles of Faith are requisite: And I say, that to a Christian* there is no other article of Faith requisite as necessary to Salvation, but only this, THAT JESUS IS THE CHRIST. But we must distinguish

(as we have already done before in the 4. Article) between Faith, and Profession. A Profession therefore of more articles (if they be commanded) may be necessary. for it is a part of our obedience due to the Lawes; but we enquire not now what Obedience, but what Faith is necessary to salvation. And this is prov'd first out of the scope of the Evangelists which was by the description of our Saviours life to establish this one Article. And we shall know that such was the scope, and counsell of the Evangelists, if we observe but the History it selfe. Saint Matthew beginning at his Genealogy shewes that JESUS was of the lineage of David, borne of a Virgin, Cha. that He was adored by the Wise men as King of the Jewes; that Herod for the same cause sought to slay him, Cha. That his Kingdome was Preacht both by John the Baptist, and Himselfe, Cha, 4. That He taught the Lawes, not as the Scribes, but as one having authority, Cha, 6, 7. That he cur'd diseases miraculously, Cha, 9. That He sent his Apostles the Preachers of his Kingdome throughout all the parts of Judea, to proclame his Kingdome, Cha. That He commanded the Messengers sent from John to enquire whether he were the CHRIST or not, to tell him what they had seene, namely the miracles which were onely competible with CHRIST, Cha. That he prov'd and declar'd his Kingdome to the Pharisees, and others by arguments, parables and signes, Chap: 12. and the following Chapters to the 21. That He maintain'd himselfe to be the Christ against the Pharisees, That He was saluted with the title of King, when he entred into Jerusalem, Cha. That he forewarn'd others of false Christs, and That He shewed in Parables what manner of Kingdome his should be, Cha, 23, 24, 25. That He was taken, and accused for this reason, because He said He was a King; and that a Title was written on his Crosse, THIS IS JESUS, THE KING OF THE JEWES, Cha, 27. Lastly, that after his resurrection, He told his Apostles that all power was given unto Him both in Heaven, and in Earth, Cha. All which tends to this end, That we should beleieve Jesus to be the Christ. Such therefore was the Scope of Saint Matthew in describing his Gospell; but such as his was, such also was the rest of the Evangelists; which Saint Iohn sets down expresly in the end of his

Gospel, These things (saith He) are written, that ye may know that Jesus is the Christ, the Sonne of the living God. Iohn 20. vers. 31.

[I say, that to a Christian] Although I conceive this assertion to be sufficiently proved by the following reasons, yet I thought it worth my labour to make a more ample explication of it, because I perceive that being somewhat new, it may possibly be distastfull to many Divines. First therefore when I say this Article, That Jesus is the Christ, is necessary to salvation; I say not that Faith onely is necessary, but I require justice also, or that Obedience which is due to the Lawes of God, that is to say, a Will to live righteously. Secondly, I deny not but the profession of many Articles, (provided that that profession be commanded by the Church) is also necessary to salvation; but seeing Faith is internall, Profession externall, I say that the former onely is properly Faith; the latter a part of Obedience; insomuch as that Article alone sufficeth for inward beleefe, but is not sufficient for the outward profession of a Christian. Lastly, even as if I had said that true and inward Repentance of sinnes was onely necessary to salvation, yet were it not to be held for a Paradox, because we suppose justice, Obedience, and a mind reformed in all manner of vertues to be contained in it: so when I say that the Faith of one Article is sufficient to salvation, it may well be lesse wondred at, seeing that in it so many other Articles are contained. For these words, Jesus is the Christ, do signifie that Jesus was that Person whom God had promised by his Prophets should come into the world to establish his Kingdom, that is to say, that Jesus is the Sonne of God, the Creatour of Heaven and Earth, born of a Virgin, dying for the sinnes of them who should beleeve in Him; that Hee was Christ, that is to say a King; that He reviv'd (for else He were not like to reign) to judge the world, and to reward every one according to his works, for otherwise he cannot be a King; also that men shall rise again, for otherwise they are not like to come to judgement. The whole Symbol of the Apostles is therefore contained in this one Article; which notwithstanding I thought reasonable to contract thus, because I found that many men for this alone, without the rest, were admitted into the

Kingdome of God, both by Christ, and his Apostles; as the Thief on the Crosse, the Eunuch baptized by Philip, the two thousand men converted to the Church at once by Saint Peter. But if any man be displeased that I doe not judge all those eternally damned, who doe not inwardly assent to every Article defined by the Church (and yet doe not contradict, but if they be commanded, doe submit) I know not what I shall say to them; for the most evident Testimonies of Holy Writ which doe follow, doe withhold me from altering my opinion.

VII. Secondly, this is proved by the preaching of the Apostles. For they were the Proclamers of his Kingdome, neither did Christ send them to preach ought but the Kingdome of God, Luke 9. vers. 2. Act. 15. vers. 6. And what they did after Christ his Ascension may be understood by the accusation which was brought against them, They drew Jason (saith Saint Luke) and certain Brethren unto the Rulers of the City, crying, These are the men that have turned the world upside down, and are come hither also, whom Jason hath received; and these all do contrary to the decrees of Caesar, saying that there is another King, one Jesus. Acts 17. vers. 6, 7. It appears also what the subject of the Apostles Sermons was, out of these words: Opening, and alleading out of the Scriptures (to wit, of the old Testament) that Christ must needs have suffered, and risen again from the dead, and that THIS JESUS IS THE CHRIST. Acts 17. vers. 2, 3.

VIII. Thirdly, By the places in which the easinesse of those things which are required by Christ to the attaining of salvation, is declared. For if an internall assent of the minde were necessarily required to the truth of all and each Proposition which this day is controverted about the Christian Faith, or by divers Churches is diversly defined, there would be nothing more difficult then the Christian Religion. And how then would that be true, My yoke is easie, and my burthen light? Mat. 11. vers. 30. and that litle ones doe beleieve in Him? Mat. 18. vers. 6. and that it pleased God by the foolishnesse of Preaching, to save those that beleieve? 1 Cor. 1. vers. 21. or how was the thiefe hanging on the Crosse sufficiently instructed to salvation, the confession of whose Faith was contained

in these words, Lord remember me when thou comest into thy Kingdome; or how could Saint Paul himselfe, from an enemy, so soon become a Doctor of Christians?

IX. Fourthly, by this, that that Article is the foundation of Faith, neither rests it on any other foundation. If any man shall say unto you, Loe here is Christ, or He is there, beleeve it not, for there shall arise false Christs, and false Prophets, and shall shew great signes, and wonders, &c. Mat. 24. vers. 23. Whence it followes, that for the Faiths sake which we have in this Article, we must not beleeve any signes, and wonders. Although we, or an Angell from Heaven (saith the Apostle) should preach to you any other Gospel, then what we have preacht, let him be accursed. Gal. 1. 8. By reason of this Article therefore we might not trust the very Apostles, and Angels themselves (and therefore I conceive not the Church neither) if they should teach the contrary. Beloved, beleeve not every spirit, but try the spirits whether they are of God, because many false Prophets are gone out into the world, hereby know yee the spirit of God, every spirit that confesseth Jesus Christ is come in the flesh, is of God, &c. 1 John 4. vers. 1, 2. That Article therefore is the measure of the Spirits whereby the authority of the Doctors, is either received, or rejected. It cannot be denied indeed, but that all who at this day are Christians, did learn from the Doctors, that it was Jesus who did all those things whereby he might be acknowledged to be the Christ; yet it followes not that the same Persons beleeved that Article for the Doctors, or the Churches, but for Jesus his own sake. For that Article was before the Christian Church, although all the rest were after it, and the Church was founded upon it, not it upon the Church. Mat. 16. vers. 18. Besides, this Article, that Jesus is the Christ, is so fundamentall, that all the rest are by Saint Paul said to be built upon it, For other foundation can no man lay, then that which is layd, which is Jesus Christ (that is to say, that Jesus is the Christ). Now if any man build uPon this foundation, gold, silver, precious stone, wood, hay, stubble; every mans work shall be made manifest: If any mans work abide which he hath built thereupon, he shall receive a reward; if any mans work shall be burnt, he shall suffer losse, but he himselfe

shall be saved. 1 Cor. 3. vers. 11, 12, 13. &c. From whence it plainly appears, that by foundation is understood this Article, THAT JESUS IS THE CHRIST. For gold, and silver, precious stones, wood, hay, stubble (whereby the Doctrines are signified) are not built upon the Person of Christ; and also, that false Doctrines may be raised upon this foundation, yet not so, as they must necessarily be damned who teach them.

X. Lastly, that this Article alone is needfull to be inwardly beleevd, may be most evidently proved out of many places of holy Scriptures, let who will be the Interpreter: Search the Scriptures, for in them yee think yee have eternall life; and they are they which testify of me. John 5. 39. But Christ meant the Scriptures of the old Testament only: for the new was then not yet written. Now, there is no other testimony concerning Christ in the old Testament, but that an eternall King was to come in such a place, that He was to be born of such Parents, that He was to teach, and doe such things; whereby, as by certain signes, he was to be knowne: All which testify this one thing, that JESUS who was so born, and did teach, and doe such things, was THE CHRIST. Other Faith then was not required to attain eternall life, besides this Article. Whosoever liveth and beleeveth in me, shall never dye. John 11. vers. 25. But to beleve in Jesus (as is there exprest) is the same with beleiving that JESUS WAS THE CHRIST. He therefore that beleeves that, shall never dye, and by consequence, that Article alone is necessary to salvation. These are written that yee might beleve that JESUS IS THE CHRIST the Sonne of God, and that beleiving yee might have life through his name. Jo. 20. vers. 31. Wherefore he that beleeves thus, shall have eternall life, and therefore needs no other Faith. Every spirit that confesseth that Jesus Christ is come in the flesh, is of God. 1 Jo. 4. v. 2. And, Whosoever beleeveth that JESUS IS THE CHRIST, is born of God. 1 Jo. 5. vers. 1. And, Who is he that overcometh the world, but he that beleeveth that IESUS is the Son of God? 1 Jo. 5. v. 5. If therefore there be no need to beleve any thing else, to the end a man may be of God, born of God, and overcome the world, then that IESUS IS THE CHRIST. that one Article then is sufficient to salvation. See, here is water, what doth hinder

me to be baptized? And Philip said, If thou beleevest with all thine heart, thou maist. And he answered and said, I beleeve that IESUS CHRIST is the Sonne of God. Acts 8. vers. 36, 37. If then this Article being beleaved with the whole heart, (that is to say, with inward Faith) was sufficient for Baptisme, it is also sufficient for salvation. Besides these places there are innumerable others which doe clearly, and expresly affirm the same thing. Nay, wheresoever wee read that our Saviour commended the Faith of any one, or that he said, Thy Faith hath saved thee, or that he healed any one for his Faiths sake, there the Proposition beleaved was no other but this, IESUS IS THE CHRIST, either directly, or consequently.

XI. But because no man can beleeve IESUS TO BE THE CHRIST, who, when he knowes that by Christ is understood that same King who was promised from God by Moyses, and the Prophets, for to be the King, and Saviour of the world, doth not also beleeve Moyses, and the Prophets, neither can he beleeve these, who beleeves not that God is, and that he governs the world; it is necessary that the Faith of God, and of the old Testament be contained in this Faith of the new. Seeing therefore that Atheisme, and the deniall of the Divine Providence, were the only treason against the Divine Majesty in the Kingdome of God by Nature; but Idolatry also in the Kingdome of God by the Old Covenant; now in this Kingdome wherein God rules by way of a new Covenant, apostasie is also added, or the renunciation of this article once receiv'd, that JESUS IS THE CHRIST. Truly other Doctrines, provided they have their determination from a lawfull Church, are not to be contradicted; for that is the sinne of disobedience; but it hath been fully declar'd before that they are not needfull to be belev'd with an inward Faith.

XII. Faith and Obedience have divers parts in accomplishing the salvation of a Christian; for this contributes the power, or capacity; that the Act. And either is said to justifie in its kinde. For Christ forgives not the sins of all men, but of the Penitent, or the Obedient, that is to say the just, I say not the guiltlesse, but the just; for justice is a Will of obeying the Lawes, and may be consistent with a sinner, and with Christ the Will to obey is Obedience; for not every man, but the

just shall live by Faith. Obedience therefore justifies because it maketh just in the same manner as temperance maketh temperate, Prudence Prudent, Chastity chaste, namely essentially; and puts a man in such a state, as makes him capable of pardon. Againe, Christ hath not promis'd forgiveness of sinnes to all just men, but only those of them who beleieve Him to be the Christ. Faith therefore justifies in such a sense as a judge may be said to justifie who absolves; namely by the sentence which actually saves a man. And in this acception of justification (for it is an aequivocall terme) Faith alone justifies, but in the other, Obedience onely: but neither Obedience alone nor Faith alone doe save us, but both together.

XIII. By what hath been said hitherto, it will be easy to discern what the duty of Christian Subjects is towards their Soveraignes, who as long as they professe themselves Christians cannot command their Subjects to deny Christ, or to offer him any contumely; for if they should command this, they would professe themselves to be no Christians. For seeing we have shewed both by naturall reason, and out of holy Scriptures, that Subjects ought in all things to obey their Princes and Governours, excepting those which are contrary to the command of God; and that the commands of God in a Christian City concerning temporall affairs, (that is to say, those which are to be discust by humane reason) are the Lawes and sentence of the City deliver'd from those who have receiv'd authority from the City to make Laws, and judge of controversies; but concerning spirituall matters; (that is to, say those which are to be defin'd by the holy Scripture) are the Lawes, and sentences of the City, that is to say the Church (for a Christian City, and a Church, as hath beene shewed in the foregoing Chapter in the 20. Art. are the same thing) deliv'rd by Pastors lawfully ordain'd, and who have to that end authority given them by the City; it manifestly followes, that in a Christian Common weale, Obedience is due to the Soveraign in all things, as well Spirituall, as Temporall. And that the same obedience even from a Christian subject is due in all temporall matters to those Princes who are no Christians, is without any controversie; but in matters spirituall, that is to say, those things which concern Gods worship, some christian Church is to be followed. For it is an

hypothesis of the Christian Faith, that God speaks not in things supernaturall, but by the way of Christian Interpreters of holy Scriptures. But what? Must we resist Princes when we cannot obey them? Truly no; for this is contrary to our civill Covenant. What must we doe then? Goe to Christ by Martyrdome. Which if it seem to any man to be an hard saying, most certain it is that he beleeves not with his whole heart THAT IESUS IS THE CHRIST the Sonne of the living God, (for he would then desire to be dissolved, and to be with Christ) but he would by a feigned Christian Faith elude that obedience which he hath contracted to yeeld up unto the City.

XIV. But some men perhaps will wonder, if, (excepting this one Article, that IESUS IS THE CHRIST, which only is necessary to salvation in relation to internall faith) all the rest belong to obedience, which may be performed, although a man doe not inwardly beleeve, (so he doe but desire to beleeve, and make an outward profession, as oft as need requires, of whatsoever is propounded by the Church); how it comes about that there are so many Tenets which are all held so to concern our Faith, that except a man doe inwardly beleeve them, He cannot enter into the Kingdome of Heaven. But if he consider that in most controversies the contention is about humane Sovereignty; in some, matter of gain, and profit; in others, the glory of Wits; he will surely wonder the lesse. The question about the propriety of the Church, is a question about the Right of Sovereignty; for, it being known what a Church is, it is known at once to whom the Rule over Christians doth belong. For if every Christian City be that Church which Christ himselfe hath commanded every Christian subject to that city, to hear, then every subject is bound to obey his City, that is to say, Him, or them who have the supreme power, not only in temporall but also in spirituall matters. But if every Christian City be not that Church, then is there some other Church more universall, which must be obeyed. All Christians therefore must obey that Church just as they would obey Christ if He came upon Earth. She will therefore rule either by the way of Monarchy, or by some Assembly: This question then concerns the Right of ruling. To the same end belongs the question concerning

infallibility; for whosoever were truly, and internally beleaved by all mankind, that he could not erre, would be sure of all Dominion, as well temporall as spirituall, over all mankind, unlesse himselfe would refuse it; for if he say that he must be obeyed in temporalls, because it is supposed he cannot erre, that Right of Dominion is immediately granted him. Hither also tends the priviledge of interpreting Scriptures. For he to whom it belongs to interpret the controversies arising from the divers interpretations of Scriptures, hath authority also simply and absolutely to determine all manner of controversies whatsoever. but he who hath this, hath also the command over all men who acknowledge the Scriptures to be the Word of God. To this end drive all the disputes about the Power of remitting, and retaining sinnes; or the authority of excommunication. For every man, if he be in his wits, will in all things yeeld that man an absolute obedience, by vertue of whose sentence he beleeves himselfe to be either saved, or damned. Hither also tends the power of instituting societies; for they depend on him by whom they subsist, who hath as many subjects as Monks, although living in an Enemies City. To this end also refers the question concerning the Iudge of lawfull Matrimony; for he to whom that judicature belongs, to him also pertains the knowledge of all those cases which concern the inheritance, and succession to all the goods, and Rights, not of private men onely, but also of Sovereign Princes. And hither also in some respect tends the Virgin-life of Ecclesiasticall Persons; for unmarried men have lesse coherence then others with civill society: and besides, it is an inconvenience not to be slighted, that Princes must either necessarily forgoe the Priesthood (which is a great bond of civill obedience) or have no hereditary Kingdome. To this end also tends the canonization of Saints which the Heathen called Apotheosis; for he that can allure forraign subjects with so great a reward, may bring those who are greedy of such glory to dare, and doe any thing. For what was it but an honourable Name with posterity? which the Decii and other Romans sought after, and a thousand others who cast themselves upon incredible perils? The controversies about Purgatory, and indulgencies, are matter of gain. The questions of Free-will, Iustification, and the manner of

receiving Christ in the Sacrament, are Philosophicall. There are also questions concerning some Rites not introduced, but left in the Church not sufficiently purged from gentilisme; but we need reckon no more. All the world knows that such is the nature of men, that dissenting in questions which concern their Power, or profit, or preeminence of Wit, they slander, and curse each other. It is not therefore to be wondred at, if almost all tenets (after men grew hot with disputings) are held forth by some or other to be necessary to salvation, and for our entrance into the Kingdome of Heaven; insomuch as they who hold them not, are not only condemned as guilty of disobedience (which in truth they are after the Church hath once defined them) but of Infidelity, which I have declared above to be wrong out of many evident places of Scripture; to which I adde this one of Saint Pauls, Let not him that eateth, despise him that eateth not; and let not him that eateth not, judge him that eateth; for God hath received him. One man esteemeth one day above another, another esteemeth every day alike. Let every man be fully perswaded in his own mind, Rom. 14. v. 3, 5.

Leviathan

OR THE MATTER, FORME, AND POWER OF A COMMONWEALTH, ECCLESIASTICALL AND CIVIL

First published in 1651, Hobbes' masterpiece concerns the structure of society and legitimate government. The text is regarded as one of the earliest and most influential examples of social contract theory. Written during the English Civil War (1642-1651), it argues for a social contract and rule by an absolute sovereign. Hobbes argues that civil war and the brute situation of a state of nature (the war of all against all) could only be avoided by strong, undivided government. The book's name derives from the biblical Leviathan mentioned in the Book of Job. Unlike the more informative titles usually given to works of early modern political philosophy, such as John Locke's *Two Treatises of Government* or Hobbes' own earlier work *The Elements of Law*, he selected a more poetic name for this challenging treatise. Lexicographers in the early modern period believed that the term "leviathan" was associated with the Hebrew words lavah, meaning "to couple, connect, or join", and thannin, meaning "a serpent or dragon".

The treatise opens with an account of human nature, presenting an image of man as matter in motion, attempting to show through example how everything about humanity can be explained materialistically, without recourse to an incorporeal, immaterial soul or a faculty for understanding ideas that are external to the human mind. The author defines terms clearly and unsentimentally. Good and evil are nothing more than terms used to denote an individual's appetites and desires, which are a tendency to move toward or away from an object. Hope, Hobbes explains, is nothing more than an appetite for a thing combined with an opinion that it can be had. He suggests that the dominant political theology of the

time, Scholasticism, thrives on confused definitions of everyday words, which is a contradiction in terms.

Hobbes goes on to describe human psychology without any reference to the *summum bonum* (greatest good), as previous thought had done. Not only is the concept of a *summum bonum* superfluous, but given the variability of human desires, there could be no such thing. Therefore, any political community that sought to provide the greatest good to its members would find itself driven by competing conceptions of that good with no way to decide among them. The result would be civil war.

Later on, Hobbes explains that in the state of nature nothing can be considered just or unjust, and every man must be considered to have a right to all things. The second law of nature is that one ought to be willing to renounce one's right to all things when others are willing to do the same, to quit the state of nature, and to erect a commonwealth with the authority to command them in all things. Hobbes concludes the first part by articulating an additional seventeen laws of nature that make the performance of the first two possible, explaining what it would mean for a sovereign to represent the people even when they disagree with the sovereign.

Leviathan does not significantly depart from previous views outlined in *De Cive*, concerning the relation between protection and obedience. However, it devotes much more attention to the civil obligations of Christians and the proper and improper roles of a church within a state. Hobbes propounds that believers do not endanger their prospects of salvation by obeying a sovereign's decrees to the letter and he maintains that churches have no authority that is not granted by the civil sovereign. Hobbes' book famously compares the State to a monster (leviathan) composed of men, created under pressure of human needs and dissolved by civil strife due to human passions. The work closes with a general "Review and Conclusion", in response to the war, which answers the question: "Does a subject have the right to change allegiance when a former sovereign's power to protect is irrevocably lost?"

A REVIEW, AND CONCLUSION

TO MY MOST HONOR'D FRIEND MR. FRANCIS GODOLPHIN OF GODOLPHIN

HONOR'D SIR.

Your most worthy Brother Mr SIDNEY GODOLPHIN, when he lived, was pleas'd to think my studies something, and otherwise to oblige me, as you know, with reall testimonies of his good opinion, great in themselves, and the greater for the worthinesse of his person. For there is not any vertue that disposeth a man, either to the service of God, or to the service of his Country, to Civill Society, or private Friendship, that did not manifestly appear in his conversation, not as acquired by necessity, or affected upon occasion, but inhaerent, and shining in a generous constitution of his nature. Therefore in honour and gratitude to him, and with devotion to your selfe, I humbly Dedicate unto you this my discourse of Common-wealth. I know not how the world will receive it, nor how it may reflect on those that shall seem to favour it. For in a way beset with those that contend on one side for too great Liberty, and on the other side for too much Authority, 'tis hard to passe between the points of both unwounded. But yet, me thinks, the endeavour to advance the Civill Power, should not be by the Civill Power condemned; nor private men, by reprehending it, declare they think that Power too great. Besides, I speak not of the men, but (in the Abstract) of the Seat of Power, (like to those simple and unpartiall creatures in the Roman Capitol, that with their noyse defended those within it, not because they were they, but there) offending none, I think, but those without, or such within (if there be any such) as favour them. That which perhaps may most offend, are certain Texts of Holy Scripture, alledged by me to other purpose than ordinarily they use to be by others. But I have done it with due submission, and also (in order to my Subject) necessarily; for they are the Outworks of the Enemy, from whence they impugne

the Civill Power. If notwithstanding this, you find my labour generally decryed, you may be pleased to excuse your selfe, and say that I am a man that love my own opinions, and think all true I say, that I honoured your Brother, and honour you, and have presum'd on that, to assume the Title (without your knowledge) of being, as I am,

Sir,

Your most humble, and most obedient servant, Thomas Hobbes.

Paris APRILL 15/25 1651.

THE INTRODUCTION

NATURE (THE ART whereby God hath made and governes the world) is by the art of man, as in many other things, so in this also imitated, that it can make an Artificial Animal. For seeing life is but a motion of Limbs, the begining whereof is in some principall part within; why may we not say, that all Automata (Engines that move themselves by springs and wheelles as doth a watch) have an artificiall life? For what is the Heart, but a Spring; and the Nerves, but so many Strings; and the Joynts, but so many Wheelles, giving motion to the whole Body, such as was intended by the Artificer? Art goes yet further, imitating that Rationall and most excellent worke of Nature, Man. For by Art is created that great LEVIATHAN called a COMMON-WEALTH, or STATE, (in latine CIVITAS) which is but an Artificiall Man; though of greater stature and strength than the Naturall, for whose protection and defence it was intended; and in which, the Sovereignty is an Artificiall Soul, as giving life and motion to the whole body; The Magistrates, and other Officers of Judicature and Execution, artificiall Joynts; Reward and Punishment (by which fastned to the seat of the Sovereignty, every joynt and member is moved to performe his duty) are the Nerves, that do the same in the Body Naturall; The Wealth and Riches of all the particular members, are the Strength; Salus Populi (the Peoples Safety) its Businesse; Counsellors, by whom all things needfull for it to know, are suggested unto it, are the Memory; Equity and Lawes, an artificiall Reason and Will; Concord, Health; Sedition, Sicknesse; and Civill War, Death. Lastly, the Pacts and Covenants, by which the parts of this Body Politique were at first made, set together, and united, resemble that Fiat, or the Let Us Make Man, pronounced by God in the Creation.

To describe the Nature of this Artificiall man, I will consider

First the Matter thereof, and the Artificer; both which is Man.

Secondly, How, and by what Covenants it is made; what are the Rights and just Power or Authority of a Sovereigne; and what it is that Preserveth and Dissolveth it.

Thirdly, what is a Christian Common-Wealth.

Lastly, what is the Kingdome of Darkness.

Concerning the first, there is a saying much usurped of late, That Wisedome is acquired, not by reading of Books, but of Men. Consequently whereunto, those persons, that for the most part can give no other proof of being wise, take great delight to shew what they think they have read in men, by uncharitable censures of one another behind their backs. But there is another saying not of late understood, by which they might learn truly to read one another, if they would take the pains; and that is, Nosce Teipsum, Read Thy Self: which was not meant, as it is now used, to countenance, either the barbarous state of men in power, towards their inferiors; or to encourage men of low degree, to a sawcie behaviour towards their betters; But to teach us, that for the similitude of the thoughts, and Passions of one man, to the thoughts, and Passions of another, whosoever looketh into himselfe, and considereth what he doth, when he does Think, Opine, Reason, Hope, Feare, &c, and upon what grounds; he shall thereby read and know, what are the thoughts, and Passions of all other men, upon the like occasions. I say the similitude of Passions, which are the same in all men, Desire, Feare, Hope, &c; not the similitude or The Objects of the Passions, which are the things Desired, Feared, Hoped, &c: for these the constitution individuall, and particular education do so vary, and they are so easie to be kept from our knowledge, that the characters of mans heart, blotted and confounded as they are, with dissembling, lying, counterfeiting, and erroneous doctrines, are legible onely to him that searcheth hearts. And though by mens actions wee do discover their designee sometimes; yet to do it without comparing them with our own, and distinguishing all circumstances, by which the case may come to be altered, is to decypher without a key, and be for the most part deceived, by too much trust, or by too much diffidence; as he that reads, is himselfe a good or evill man.

But let one man read another by his actions never so perfectly, it serves him onely with his acquaintance, which are but few. He that is to govern a whole Nation, must read in himselfe, not this, or that particular man; but Man-kind; which though it be hard to do, harder than to learn any Language, or Science; yet, when I shall have set down my own reading orderly, and perspicuously, the pains left another, will be onely to consider, if he also find not the same in himselfe. For this kind of Doctrine, admitteth no other Demonstration.

PART 1 OF MAN

CHAPTER I. OF SENSE

CONCERNING THE THOUGHTS of man, I will consider them first Singly, and afterwards in Trayne, or dependance upon one another. Singly, they are every one a Representation or Apparence, of some quality, or other Accident of a body without us; which is commonly called an Object. Which Object worketh on the Eyes, Eares, and other parts of mans body; and by diversity of working, produceth diversity of Apparences.

The Originall of them all, is that which we call Sense; (For there is no conception in a mans mind, which hath not at first, totally, or by parts, been begotten upon the organs of Sense.) The rest are derived from that originall.

To know the naturall cause of Sense, is not very necessary to the business now in hand; and I have els-where written of the same at large. Nevertheless, to fill each part of my present method, I will briefly deliver the same in this place.

The cause of Sense, is the Externall Body, or Object, which presseth the organ proper to each Sense, either immediatly, as in the Tast and Touch; or mediately, as in Seeing, Hearing, and Smelling: which pressure, by the mediation of Nerves, and other strings, and membranes of the body, continued inwards to the Brain, and Heart, causeth there a resistance, or counter-pressure, or endeavour of the heart, to deliver it self: which endeavour because Outward, seemeth to be some matter without. And this Seeming, or Fancy, is that which men call sense; and consisteth, as to the Eye, in a Light, or Colour Figured; To the Eare, in a Sound; To the Nostrill, in an Odour; To the Tongue and Palat, in a Savour; and to the rest of the body, in Heat, Cold, Hardnesse, Softnesse, and such other qualities, as we discern by Feeling. All which qualities called Sensible, are in the object that causeth them, but so many several motions of the matter, by which it presseth our organs diversly. Neither in us that are pressed, are they anything els, but divers

motions; (for motion, produceth nothing but motion.) But their apparence to us is Fancy, the same waking, that dreaming. And as pressing, rubbing, or striking the Eye, makes us fancy a light; and pressing the Eare, produceth a dinne; so do the bodies also we see, or hear, produce the same by their strong, though unobserved action, For if those Colours, and Sounds, were in the Bodies, or Objects that cause them, they could not bee severed from them, as by glasses, and in Ecchoes by reflection, wee see they are; where we know the thing we see, is in one place; the apparence, in another. And though at some certain distance, the reall, and very object seem invested with the fancy it begets in us; Yet still the object is one thing, the image or fancy is another. So that Sense in all cases, is nothing els but originall fancy, caused (as I have said) by the pressure, that is, by the motion, of externall things upon our Eyes, Eares, and other organs thereunto ordained.

But the Philosophy-schooles, through all the Universities of Christendome, grounded upon certain Texts of Aristotle, teach another doctrine; and say, For the cause of Vision, that the thing seen, sendeth forth on every side a Visible Species(in English) a Visible Shew, Apparition, or Aspect, or a Being Seen; the receiving whereof into the Eye, is Seeing. And for the cause of Hearing, that the thing heard, sendeth forth an Audible Species, that is, an Audible Aspect, or Audible Being Seen; which entring at the Eare, maketh Hearing. Nay for the cause of Understanding also, they say the thing Understood sendeth forth Intelligible Species, that is, an Intelligible Being Seen; which comming into the Understanding, makes us Understand. I say not this, as disapproving the use of Universities: but because I am to speak hereafter of their office in a Commonwealth, I must let you see on all occasions by the way, what things would be amended in them; amongst which the frequency of insignificant Speech is one.

CHAPTER II. OF IMAGINATION

THAT WHEN A thing lies still, unlesse somewhat els stirre it, it will lye still for ever, is a truth that no man doubts of. But that when a thing is in motion, it will eternally be in motion, unless somewhat els stay it, though the reason be the same, (namely, that nothing can change it selfe,) is not so easily assented to. For men measure, not onely other men, but all other things, by themselves: and because they find themselves subject after motion to pain, and lassitude, think every thing els growes weary of motion, and seeks repose of its own accord; little considering, whether it be not some other motion, wherein that desire of rest they find in themselves, consisteth. From hence it is, that the Schooles say, Heavy bodies fall downwards, out of an appetite to rest, and to conserve their nature in that place which is most proper for them; ascribing appetite, and Knowledge of what is good for their conservation, (which is more than man has) to things inanimate absurdly.

When a Body is once in motion, it moveth (unless something els hinder it) eternally; and whatsoever hindreth it, cannot in an instant, but in time, and by degrees quite extinguish it: And as wee see in the water, though the wind cease, the waves give not over rowling for a long time after; so also it happeneth in that motion, which is made in the internall parts of a man, then, when he Sees, Dreams, &c. For after the object is removed, or the eye shut, wee still retain an image of the thing seen, though more obscure than when we see it. And this is it, that Latines call Imagination, from the image made in seeing; and apply the same, though improperly, to all the other senses. But the Greeks call it Fancy; which signifies Apparence, and is as proper to one sense, as to another. Imagination therefore is nothing but Decaying Sense; and is found in men, and many other living Creatures, as well sleeping, as waking.

Memory

The decay of Sense in men waking, is not the decay of the motion made in sense; but an obscuring of it, in such manner, as the light of the Sun obscureth the light of the Starres; which starrs do no less exercise their vertue by which they are visible, in the day, than in the night. But because amongst many stroaks, which our eyes, eares, and other organs receive from externall bodies, the predominant onely is sensible; therefore the light of the Sun being predominant, we are not affected with the action of the starrs. And any object being removed from our eyes, though the impression it made in us remain; yet other objects more present succeeding, and working on us, the Imagination of the past is obscured, and made weak; as the voyce of a man is in the noyse of the day. From whence it followeth, that the longer the time is, after the sight, or Sense of any object, the weaker is the Imagination. For the continuall change of mans body, destroyes in time the parts which in sense were moved: So that the distance of time, and of place, hath one and the same effect in us. For as at a distance of place, that which wee look at, appears dimme, and without distinction of the smaller parts; and as Voyces grow weak, and inarticulate: so also after great distance of time, our imagination of the Past is weak; and wee lose(for example) of Cities wee have seen, many particular Streets; and of Actions, many particular Circumstances. This Decaying Sense, when wee would express the thing it self, (I mean Fancy it selfe,) wee call Imagination, as I said before; But when we would express the Decay, and signifie that the Sense is fading, old, and past, it is called Memory. So that Imagination and Memory, are but one thing, which for divers considerations hath divers names.

Much memory, or memory of many things, is called Experience. Againe, Imagination being only of those things which have been formerly perceived by Sense, either all at once, or by parts at severall times; The former, (which is the

imagining the whole object, as it was presented to the sense) is Simple Imagination; as when one imagineth a man, or horse, which he hath seen before. The other is Compounded; as when from the sight of a man at one time, and of a horse at another, we conceive in our mind a Centaure. So when a man compoundeth the image of his own person, with the image of the actions of an other man; as when a man imagins himselfe a Hercules, or an Alexander, (which happeneth often to them that are much taken with reading of Romants) it is a compound imagination, and properly but a Fiction of the mind. There be also other Imaginations that rise in men, (though waking) from the great impression made in sense; As from gazing upon the Sun, the impression leaves an image of the Sun before our eyes a long time after; and from being long and vehemently attent upon Geometricall Figures, a man shall in the dark, (though awake) have the Images of Lines, and Angles before his eyes: which kind of Fancy hath no particular name; as being a thing that doth not commonly fall into mens discourse.

Dreams

The imaginations of them that sleep, are those we call Dreams. And these also (as all other Imaginations) have been before, either totally, or by parcells in the Sense. And because in sense, the Brain, and Nerves, which are the necessary Organs of sense, are so benumbed in sleep, as not easily to be moved by the action of Externall Objects, there can happen in sleep, no Imagination; and therefore no Dreame, but what proceeds from the agitation of the inward parts of mans body; which inward parts, for the connexion they have with the Brayn, and other Organs, when they be distempered, do keep the same in motion; whereby the Imaginations there formerly made, appeare as if a man were waking; saving that the Organs of Sense being now benumbed, so as there is no new object, which can master and obscure them with a more vigorous impression, a Dreame must needs be more cleare, in this silence of sense, than are our waking thoughts.

And hence it cometh to pass, that it is a hard matter, and by many thought impossible to distinguish exactly between Sense and Dreaming. For my part, when I consider, that in Dreames, I do not often, nor constantly think of the same Persons, Places, Objects, and Actions that I do waking; nor remember so long a trayne of coherent thoughts, Dreaming, as at other times; And because waking I often observe the absurdity of Dreames, but never dream of the absurdities of my waking Thoughts; I am well satisfied, that being awake, I know I dreame not; though when I dreame, I think my selfe awake.

And seeing dreames are caused by the distemper of some of the inward parts of the Body; divers distempers must needs cause different Dreams. And hence it is, that lying cold breedeth Dreams of Feare, and raiseth the thought and Image of some fearfull object (the motion from the brain to the inner parts, and from the inner parts to the Brain being reciprocall:) and that as Anger causeth heat in some parts of the Body, when we are awake; so when we sleep, the over heating of the same parts causeth Anger, and raiseth up in the brain the Imagination of an Enemy. In the same manner; as naturall kindness, when we are awake causeth desire; and desire makes heat in certain other parts of the body; so also, too much heat in those parts, while wee sleep, raiseth in the brain an imagination of some kindness shewn. In summe, our Dreams are the reverse of our waking Imaginations; The motion when we are awake, beginning at one end; and when we Dream, at another.

Apparitions Or Visions

The most difficult discerning of a mans Dream, from his waking thoughts, is then, when by some accident we observe not that we have slept: which is easie to happen to a man full of fearfull thoughts; and whose conscience is much troubled; and that sleepeth, without the circumstances, of going to bed, or putting off his clothes, as one that noddeth in a chayre. For he that taketh pains, and

industriously layes himselfe to sleep, in case any uncouth and exorbitant fancy come unto him, cannot easily think it other than a Dream. We read of Marcus Brutes, (one that had his life given him by Julius Caesar, and was also his favorite, and notwithstanding murdered him,) how at Phillipi, the night before he gave battell to Augustus Caesar, he saw a fearfull apparition, which is commonly related by Historians as a Vision: but considering the circumstances, one may easily judge to have been but a short Dream. For sitting in his tent, pensive and troubled with the horreur of his rash act, it was not hard for him, slumbering in the cold, to dream of that which most affrighted him; which feare, as by degrees it made him wake; so also it must needs make the Apparition by degrees to vanish: And having no assurance that he slept, he could have no cause to think it a Dream, or any thing but a Vision. And this is no very rare Accident: for even they that be perfectly awake, if they be timorous, and supperstitious, possessed with fearfull tales, and alone in the dark, are subject to the like fancies, and believe they see spirits and dead mens Ghosts walking in Churchyards; whereas it is either their Fancy onely, or els the knavery of such persons, as make use of such superstitious feare, to pass disguised in the night, to places they would not be known to haunt.

From this ignorance of how to distinguish Dreams, and other strong Fancies, from vision and Sense, did arise the greatest part of the Religion of the Gentiles in time past, that worshipped Satyres, Fawnes, nymphs, and the like; and now adayes the opinion than rude people have of Fayries, Ghosts, and Goblins; and of the power of Witches. For as for Witches, I think not that their witch craft is any reall power; but yet that they are justly punished, for the false belief they have, that they can do such mischief, joyned with their purpose to do it if they can; their trade being neerer to a new Religion, than to a Craft or Science. And for Fayries, and walking Ghosts, the opinion of them has I think been on purpose, either taught, or not confuted, to keep in credit the use of Exorcisme, of Crosses, of holy Water, and other such inventions of Ghostly men. Neverthelesse, there is no doubt, but God can make unnaturall Apparitions. But that he does it so often,

as men need to feare such things, more than they feare the stay, or change, of the course of Nature, which he also can stay, and change, is no point of Christian faith. But evill men under pretext that God can do any thing, are so bold as to say any thing when it serves their turn, though they think it untrue; It is the part of a wise man, to believe them no further, than right reason makes that which they say, appear credible. If this superstitious fear of Spirits were taken away, and with it, Prognostiques from Dreams, false Prophecies, and many other things depending thereon, by which, crafty ambitious persons abuse the simple people, men would be much more fitted than they are for civill Obedience.

And this ought to be the work of the Schooles; but they rather nourish such doctrine. For (not knowing what Imagination, or the Senses are), what they receive, they teach: some saying, that Imaginations rise of themselves, and have no cause: Others that they rise most commonly from the Will; and that Good thoughts are blown (inspired) into a man, by God; and evill thoughts by the Divell: or that Good thoughts are powred (infused) into a man, by God; and evill ones by the Divell. Some say the Senses receive the Species of things, and deliver them to the Common-sense; and the Common Sense delivers them over to the Fancy, and the Fancy to the Memory, and the Memory to the Judgement, like handing of things from one to another, with many words making nothing understood.

Understanding

The Imagination that is rayed in man (or any other creature indued with the faculty of imagining) by words, or other voluntary signes, is that we generally call Understanding; and is common to Man and Beast. For a dogge by custome will understand the call, or the rating of his Master; and so will many other Beasts. That Understanding which is peculiar to man, is the Understanding not onely his will; but his conceptions and thoughts, by the sequell and contexture of the names

of things into Affirmations, Negations, and other formes of Speech: And of this kinde of Understanding I shall speak hereafter.

CHAPTER III. OF THE CONSEQUENCE OR TRAYNE OF IMAGINATIONS

BY CONSEQUENCE, OR Trayne of Thoughts, I understand that succession of one Thought to another, which is called (to distinguish it from Discourse in words) Mentall Discourse.

When a man thinketh on any thing whatsoever, His next Thought after, is not altogether so casuall as it seems to be. Not every Thought to every Thought succeeds indifferently. But as wee have no Imagination, whereof we have not formerly had Sense, in whole, or in parts; so we have no Transition from one Imagination to another, whereof we never had the like before in our Senses. The reason whereof is this. All Fancies are Motions within us, reliques of those made in the Sense: And those motions that immediately succeeded one another in the sense, continue also together after Sense: In so much as the former coming again to take place, and be praedominant, the later followeth, by coherence of the matter moved, in such manner, as water upon a plain Table is drawn which way any one part of it is guided by the finger. But because in sense, to one and the same thing perceived, sometimes one thing, sometimes another succeedeth, it comes to passe in time, that in the Imagining of any thing, there is no certainty what we shall Imagine next; Onely this is certain, it shall be something that succeeded the same before, at one time or another.

Trayne Of Thoughts Unguided

This Trayne of Thoughts, or Mentall Discourse, is of two sorts. The first is Unguided, Without Designee, and inconstant; Wherein there is no Passionate

Thought, to govern and direct those that follow, to it self, as the end and scope of some desire, or other passion: In which case the thoughts are said to wander, and seem impertinent one to another, as in a Dream. Such are Commonly the thoughts of men, that are not onely without company, but also without care of any thing; though even then their Thoughts are as busie as at other times, but without harmony; as the sound which a Lute out of tune would yeeld to any man; or in tune, to one that could not play. And yet in this wild ranging of the mind, a man may oft-times perceive the way of it, and the dependance of one thought upon another. For in a Discourse of our present civill warre, what could seem more impertinent, than to ask (as one did) what was the value of a Roman Penny? Yet the Cohaerence to me was manifest enough. For the Thought of the warre, introduced the Thought of the delivering up the King to his Enemies; The Thought of that, brought in the Thought of the delivering up of Christ; and that again the Thought of the 30 pence, which was the price of that treason: and thence easily followed that malicious question; and all this in a moment of time; for Thought is quick.

Trayne Of Thoughts Regulated

The second is more constant; as being Regulated by some desire, and designee. For the impression made by such things as wee desire, or feare, is strong, and permanent, or, (if it cease for a time,) of quick return: so strong it is sometimes, as to hinder and break our sleep. From Desire, ariseth the Thought of some means we have seen produce the like of that which we ayme at; and from the thought of that, the thought of means to that mean; and so continually, till we come to some beginning within our own power. And because the End, by the greatnesse of the impression, comes often to mind, in case our thoughts begin to wander, they are quickly again reduced into the way: which observed by one of the seven wise men, made him give men this praecept, which is now worne out, *Respice Finem*;

that is to say, in all your actions, look often upon what you would have, as the thing that directs all your thoughts in the way to attain it.

Remembrance

The Trayn of regulated Thoughts is of two kinds; One, when of an effect imagined, wee seek the causes, or means that produce it: and this is common to Man and Beast. The other is, when imagining any thing whatsoever, wee seek all the possible effects, that can by it be produced; that is to say, we imagine what we can do with it, when wee have it. Of which I have not at any time seen any signe, but in man onely; for this is a curiosity hardly incident to the nature of any living creature that has no other Passion but sensuall, such as are hunger, thirst, lust, and anger. In summe, the Discourse of the Mind, when it is governed by designee, is nothing but Seeking, or the faculty of Invention, which the Latines call Sagacitas, and Solertia; a hunting out of the causes, of some effect, present or past; or of the effects, of some present or past cause, sometimes a man seeks what he hath lost; and from that place, and time, wherein hee misses it, his mind runs back, from place to place, and time to time, to find where, and when he had it; that is to say, to find some certain, and limited time and place, in which to begin a method of seeking. Again, from thence, his thoughts run over the same places and times, to find what action, or other occasion might make him lose it. This we call Remembrance, or Calling to mind: the Latines call it Reminiscentia, as it were a Re-Conning of our former actions.

Sometimes a man knows a place determinate, within the compasse whereof his is to seek; and then his thoughts run over all the parts thereof, in the same manner, as one would sweep a room, to find a jewell; or as a Spaniel ranges the field, till he find a sent; or as a man should run over the alphabet, to start a rime.

Prudence

Sometime a man desires to know the event of an action; and then he thinketh of some like action past, and the events thereof one after another; supposing like events will follow like actions. As he that foresees what wil become of a Criminal, re-cons what he has seen follow on the like Crime before; having this order of thoughts, The Crime, the Officer, the Prison, the Judge, and the Gallows. Which kind of thoughts, is called Foresight, and Prudence, or Providence; and sometimes Wisdome; though such conjecture, through the difficulty of observing all circumstances, be very fallacious. But this is certain; by how much one man has more experience of things past, than another; by so much also he is more Prudent, and his expectations the seldomer faile him. The Present onely has a being in Nature; things Past have a being in the Memory onely, but things To Come have no being at all; the Future being but a fiction of the mind, applying the sequels of actions Past, to the actions that are Present; which with most certainty is done by him that has most Experience; but not with certainty enough. And though it be called Prudence, when the Event answereth our Expectation; yet in its own nature, it is but Presumption. For the foresight of things to come, which is Providence, belongs onely to him by whose will they are to come. From him onely, and supernaturally, proceeds Prophecy. The best Prophet naturally is the best guesser; and the best guesser, he that is most versed and studied in the matters he guesses at: for he hath most Signes to guesse by.

Signes

A Signe, is the Event Antecedent, of the Consequent; and contrarily, the Consequent of the Antecedent, when the like Consequences have been observed, before: And the oftner they have been observed, the lesse uncertain is the Signe. And therefore he that has most experience in any kind of businesse, has most

Signes, whereby to guesse at the Future time, and consequently is the most prudent: And so much more prudent than he that is new in that kind of business, as not to be equalled by any advantage of naturall and extemporary wit: though perhaps many young men think the contrary.

Neverthesse it is not Prudence that distinguisheth man from beast. There be beasts, that at a year old observe more, and pursue that which is for their good, more prudently, than a child can do at ten.

Conjecture Of The Time Past

As Prudence is a Praesumption of the Future, contracted from the Experience of time Past; So there is a Praesumption of things Past taken from other things (not future but) past also. For he that hath seen by what courses and degrees, a flourishing State hath first come into civill warre, and then to ruine; upon the sights of the ruines of any other State, will guesse, the like warre, and the like courses have been there also. But his conjecture, has the same incertainty almost with the conjecture of the Future; both being grounded onely upon Experience.

There is no other act of mans mind, that I can remember, naturally planted in him, so, as to need no other thing, to the exercise of it, but to be born a man, and live with the use of his five Senses. Those other Faculties, of which I shall speak by and by, and which seem proper to man onely, are acquired, and encreased by study and industry; and of most men learned by instruction, and discipline; and proceed all from the invention of Words, and Speech. For besides Sense, and Thoughts, and the Trayne of thoughts, the mind of man has no other motion; though by the help of Speech, and Method, the same Facultyes may be improved to such a height, as to distinguish men from all other living Creatures.

Whatsoever we imagine, is Finite. Therefore there is no Idea, or conception of anything we call Infinite. No man can have in his mind an Image of infinite magnitude; nor conceive the ends, and bounds of the thing named; having no

Conception of the thing, but of our own inability. And therefore the Name of GOD is used, not to make us conceive him; (for he is Incomprehensible; and his greatnesse, and power are unconceivable;) but that we may honour him. Also because whatsoever (as I said before,) we conceive, has been perceived first by sense, either all at once, or by parts; a man can have no thought, representing any thing, not subject to sense. No man therefore can conceive any thing, but he must conceive it in some place; and indued with some determinate magnitude; and which may be divided into parts; nor that any thing is all in this place, and all in another place at the same time; nor that two, or more things can be in one, and the same place at once: for none of these things ever have, or can be incident to Sense; but are absurd speeches, taken upon credit (without any signification at all,) from deceived Philosophers, and deceived, or deceiving Schoolemen.

CHAPTER IV. OF SPEECH

Originall Of Speech

The Invention of Printing, though ingenious, compared with the invention of Letters, is no great matter. But who was the first that found the use of Letters, is not known. He that first brought them into Greece, men say was Cadmus, the sonne of Agenor, King of Phaenicia. A profitable Invention for continuing the memory of time past, and the conjunction of mankind, dispersed into so many, and distant regions of the Earth; and with all difficult, as proceeding from a watchfull observation of the divers motions of the Tongue, Palat, Lips, and other organs of Speech; whereby to make as many differences of characters, to remember them. But the most noble and profitable invention of all other, was that of Speech, consisting of Names or Apellations, and their Connexion; whereby men register their Thoughts; recall them when they are past; and also declare them one to another for mutuall utility and conversation; without which, there had been amongst men, neither Common-wealth, nor Society, nor Contract, nor Peace, no more than amongst Lyons, Bears, and Wolves. The first author of Speech was GOD himselfe, that instructed Adam how to name such creatures as he presented to his sight; For the Scripture goeth no further in this matter. But this was sufficient to direct him to adde more names, as the experience and use of the creatures should give him occasion; and to joyn them in such manner by degrees, as to make himselfe understood; and so by succession of time, so much language might be gotten, as he had found use for; though not so copious, as an Orator or Philosopher has need of. For I do not find any thing in the Scripture, out of which, directly or by consequence can be gathered, that Adam was taught the names of all Figures, Numbers, Measures, Colours, Sounds, Fancies, Relations; much less

the names of Words and Speech, as Generall, Speciall, Affirmative, Negative, Interrogative, Optative, Infinitive, all which are usefull; and least of all, of Entity, Intentionality, Quiddity, and other significant words of the School.

But all this language gotten, and augmented by Adam and his posterity, was again lost at the tower of Babel, when by the hand of God, every man was stricken for his rebellion, with an oblivion of his former language. And being hereby forced to disperse themselves into severall parts of the world, it must needs be, that the diversity of Tongues that now is, proceeded by degrees from them, in such manner, as need (the mother of all inventions) taught them; and in tract of time grew every where more copious.

The Use Of Speech

The generall use of Speech, is to transerre our Mentall Discourse, into Verbal; or the Trayne of our Thoughts, into a Trayne of Words; and that for two commodities; whereof one is, the Registring of the Consequences of our Thoughts; which being apt to slip out of our memory, and put us to a new labour, may again be recalled, by such words as they were marked by. So that the first use of names, is to serve for Markes, or Notes of remembrance. Another is, when many use the same words, to signifie (by their connexion and order,) one to another, what they conceive, or think of each matter; and also what they desire, feare, or have any other passion for, and for this use they are called Signes. Speciall uses of Speech are these; First, to Register, what by cogitation, wee find to be the cause of any thing, present or past; and what we find things present or past may produce, or effect: which in summe, is acquiring of Arts. Secondly, to shew to others that knowledge which we have attained; which is, to Counsell, and Teach one another. Thirdly, to make known to others our wills, and purposes, that we may have the mutuall help of one another. Fourthly, to please and delight our

selves, and others, by playing with our words, for pleasure or ornament, innocently.

Abuses Of Speech

To these Uses, there are also foure correspondent Abuses. First, when men register their thoughts wrong, by the inconstancy of the signification of their words; by which they register for their conceptions, that which they never conceived; and so deceive themselves. Secondly, when they use words metaphorically; that is, in other sense than that they are ordained for; and thereby deceive others. Thirdly, when by words they declare that to be their will, which is not. Fourthly, when they use them to grieve one another: for seeing nature hath armed living creatures, some with teeth, some with horns, and some with hands, to grieve an enemy, it is but an abuse of Speech, to grieve him with the tongue, unlesse it be one whom wee are obliged to govern; and then it is not to grieve, but to correct and amend.

The manner how Speech serveth to the remembrance of the consequence of causes and effects, consisteth in the imposing of Names, and the Connexion of them.

Names Proper & Common Universall

Of Names, some are Proper, and singular to one onely thing; as Peter, John, This Man, This Tree: and some are Common to many things; as Man, Horse, Tree; every of which though but one Name, is nevertheless the name of divers particular things; in respect of all which together, it is called an Universall; there being nothing in the world Universall but Names; for the things named, are every one of them Individual and Singular.

One Universall name is imposed on many things, for their similitude in some quality, or other accident: And whereas a Proper Name bringeth to mind one thing onely; Universals recall any one of those many.

And of Names Universall, some are of more, and some of lesse extent; the larger comprehending the lesse large: and some again of equall extent, comprehending each other reciprocally. As for example, the Name Body is of larger signification than the word Man, and comprehendeth it; and the names Man and Rationall, are of equall extent, comprehending mutually one another. But here wee must take notice, that by a Name is not alwayes understood, as in Grammar, one onely word; but sometimes by circumlocution many words together. For all these words, Hee That In His Actions Observeth The Lawes Of His Country, make but one Name, equivalent to this one word, Just.

By this imposition of Names, some of larger, some of stricter signification, we turn the reckoning of the consequences of things imagined in the mind, into a reckoning of the consequences of Appellations. For example, a man that hath no use of Speech at all, (such, as is born and remains perfectly deafe and dumb,) if he set before his eyes a triangle, and by it two right angles, (such as are the corners of a square figure,) he may by meditation compare and find, that the three angles of that triangle, are equall to those two right angles that stand by it. But if another triangle be shewn him different in shape from the former, he cannot know without a new labour, whether the three angles of that also be equall to the same. But he that hath the use of words, when he observes, that such equality was consequent, not to the length of the sides, nor to any other particular thing in his triangle; but onely to this, that the sides were straight, and the angles three; and that that was all, for which he named it a Triangle; will boldly conclude Universally, that such equality of angles is in all triangles whatsoever; and register his invention in these generall termes, Every Triangle Hath Its Three Angles Equall To Two Right Angles. And thus the consequence found in one particular, comes to be registred and remembred, as a Universall rule; and discharges our mentall reckoning, of time and place; and delivers us from all labour of the mind, saving the first; and

makes that which was found true Here, and Now, to be true in All Times and Places.

But the use of words in registering our thoughts, is in nothing so evident as in Numbering. A naturall foole that could never learn by heart the order of numerall words, as One, Two, and Three, may observe every stroak of the Clock, and nod to it, or say one, one, one; but can never know what houre it strikes. And it seems, there was a time when those names of number were not in use; and men were fayn to apply their fingers of one or both hands, to those things they desired to keep account of; and that thence it proceeded, that now our numerall words are but ten, in any Nation, and in some but five, and then they begin again. And he that can tell ten, if he recite them out of order, will lose himselfe, and not know when he has done: Much lesse will he be able to add, and substract, and performe all other operations of Arithmetique. So that without words, there is no possibility of reckoning of Numbers; much lesse of Magnitudes, of Swiftnesse, of Force, and other things, the reckonings whereof are necessary to the being, or well-being of man-kind.

When two Names are joyned together into a Consequence, or Affirmation; as thus, A Man Is A Living Creature; or thus, If He Be A Man, He Is A Living Creature, If the later name Living Creature, signifie all that the former name Man signifieth, then the affirmation, or consequence is True; otherwise False. For True and False are attributes of Speech, not of things. And where Speech is not, there is neither Truth nor Falshood. Errour there may be, as when wee expect that which shall not be; or suspect what has not been: but in neither case can a man be charged with Untruth.

Seeing then that Truth consisteth in the right ordering of names in our affirmations, a man that seeketh precise Truth, had need to remember what every name he uses stands for; and to place it accordingly; or els he will find himselfe entangled in words, as a bird in lime-twiggs; the more he struggles, the more belimed. And therefore in Geometry, (which is the onely Science that it hath pleased God hitherto to bestow on mankind,) men begin at settling the

significations of their words; which settling of significations, they call Definitions; and place them in the beginning of their reckoning.

By this it appears how necessary it is for any man that aspires to true Knowledge, to examine the Definitions of former Authors; and either to correct them, where they are negligently set down; or to make them himselfe. For the errours of Definitions multiply themselves, according as the reckoning proceeds; and lead men into absurdities, which at last they see, but cannot avoyd, without reckoning anew from the beginning; in which lyes the foundation of their errours. From whence it happens, that they which trust to books, do as they that cast up many little summs into a greater, without considering whether those little summes were rightly cast up or not; and at last finding the errour visible, and not mistrusting their first grounds, know not which way to cleere themselves; but spend time in fluttering over their bookes; as birds that entring by the chimney, and finding themselves inclosed in a chamber, flitter at the false light of a glasse window, for want of wit to consider which way they came in. So that in the right Definition of Names, lyes the first use of Speech; which is the Acquisition of Science: And in wrong, or no Definitions' lyes the first abuse; from which proceed all false and senslesse Tenets; which make those men that take their instruction from the authority of books, and not from their own meditation, to be as much below the condition of ignorant men, as men endued with true Science are above it. For between true Science, and erroneous Doctrines, Ignorance is in the middle. Naturall sense and imagination, are not subject to absurdity. Nature it selfe cannot erre: and as men abound in copiousnesse of language; so they become more wise, or more mad than ordinary. Nor is it possible without Letters for any man to become either excellently wise, or (unless his memory be hurt by disease, or ill constitution of organs) excellently foolish. For words are wise mens counters, they do but reckon by them: but they are the mony of fooles, that value them by the authority of an Aristotle, a Cicero, or a Thomas, or any other Doctor whatsoever, if but a man.

Subject To Names

Subject To Names, is whatsoever can enter into, or be considered in an account; and be added one to another to make a summe; or substracted one from another, and leave a remainder. The Latines called Accounts of many Rationes, and accounting, Ratiocinatio: and that which we in bills or books of account call Items, they called Nomina; that is, Names: and thence it seems to proceed, that they extended the word Ratio, to the faculty of Reckoning in all other things. The Greeks have but one word Logos, for both Speech and Reason; not that they thought there was no Speech without Reason; but no Reasoning without Speech: And the act of reasoning they called syllogisme; which signifieth summing up of the consequences of one saying to another. And because the same things may enter into account for divers accidents; their names are (to shew that diversity) diversly wrested, and diversified. This diversity of names may be reduced to foure generall heads.

First, a thing may enter into account for Matter, or Body; as Living, Sensible, Rationall, Hot, Cold, Moved, Quiet; with all which names the word Matter, or Body is understood; all such, being names of Matter.

Secondly, it may enter into account, or be considered, for some accident or quality, which we conceive to be in it; as for Being Moved, for Being So Long, for Being Hot, &c; and then, of the name of the thing it selfe, by a little change or wresting, wee make a name for that accident, which we consider; and for Living put into account Life; for Moved, Motion; for Hot, Heat; for Long, Length, and the like. And all such Names, are the names of the accidents and properties, by which one Matter, and Body is distinguished from another. These are called Names Abstract; Because Severed (not from Matter, but) from the account of Matter.

Thirdly, we bring into account, the Properties of our own bodies, whereby we make such distinction: as when any thing is Seen by us, we reckon not the thing it selfe; but the Sight, the Colour, the Idea of it in the fancy: and when any thing is Heard, we reckon it not; but the Hearing, or Sound onely, which is our fancy or conception of it by the Eare: and such are names of fancies.

Fourthly, we bring into account, consider, and give names, to Names themselves, and to Speeches: For, Generall, Universall, Speciall, Oequivocall, are names of Names. And Affirmation, Interrogation, Commandement, Narration, Syllogisme, Sermon, Oration, and many other such, are names of Speeches.

Use Of Names Positive

And this is all the variety of Names Positive; which are put to mark somewhat which is in Nature, or may be feigned by the mind of man, as Bodies that are, or may be conceived to be; or of bodies, the Properties that are, or may be feigned to be; or Words and Speech.

Negative Names With Their Uses

There be also other Names, called Negative; which are notes to signifie that a word is not the name of the thing in question; as these words Nothing, No Man, Infinite, Indocible, Three Want Foure, and the like; which are nevertheless of use in reckoning, or in correcting of reckoning; and call to mind our past cogitations, though they be not names of any thing; because they make us refuse to admit of Names not rightly used.

Words Insignificant

All other names, are but insignificant sounds; and those of two sorts. One, when they are new, and yet their meaning not explained by Definition; whereof there have been abundance coyned by Schoole-men, and pusled Philosophers.

Another, when men make a name of two Names, whose significations are contradictory and inconsistent; as this name, an Incorporeall Body, or (which is all one) an Incorporeall Substance, and a great number more. For whensoever any affirmation is false, the two names of which it is composed, put together and made one, signifie nothing at all. For example if it be a false affirmation to say A Quadrangle Is Round, the word Round Quadrangle signifies nothing; but is a meere sound. So likewise if it be false, to say that vertue can be powred, or blown up and down; the words In-powred Vertue, In-blown Vertue, are as absurd and insignificant, as a Round Quadrangle. And therefore you shall hardly meet with a senselesse and insignificant word, that is not made up of some Latin or Greek names. A Frenchman seldome hears our Saviour called by the name of Parole, but by the name of Verbe often; yet Verbe and Parole differ no more, but that one is Latin, the other French.

Understanding

When a man upon the hearing of any Speech, hath those thoughts which the words of that Speech, and their connexion, were ordained and constituted to signifie; Then he is said to understand it; Understanding being nothing els, but conception caused by Speech. And therefore if Speech be peculiar to man (as for ought I know it is,) then is Understanding peculiar to him also. And therefore of absurd and false affirmations, in case they be universall, there can be no Understanding; though many think they understand, then, when they do but repeat the words softly, or con them in their mind.

What kinds of Speeches signifie the Appetites, Aversions, and Passions of mans mind; and of their use and abuse, I shall speak when I have spoken of the Passions.

Inconstant Names

The names of such things as affect us, that is, which please, and displease us, because all men be not alike affected with the same thing, nor the same man at all times, are in the common discourses of men, of Inconstant signification. For seeing all names are imposed to signifie our conceptions; and all our affections are but conceptions; when we conceive the same things differently, we can hardly avoyd different naming of them. For though the nature of that we conceive, be the same; yet the diversity of our reception of it, in respect of different constitutions of body, and prejudices of opinion, gives everything a tincture of our different passions. And therefore in reasoning, a man bust take heed of words; which besides the signification of what we imagine of their nature, disposition, and interest of the speaker; such as are the names of Vertues, and Vices; For one man calleth Wisdome, what another calleth Feare; and one Cruelty, what another Justice; one Prodigality, what another Magnanimity; one Gravity, what another Stupidity, &c. And therefore such names can never be true grounds of any ratiocination. No more can Metaphors, and Tropes of speech: but these are less dangerous, because they profess their inconstancy; which the other do not.

CHAPTER V. OF REASON, AND SCIENCE.

Reason What It Is

When a man Reasoneth, hee does nothing els but conceive a summe totall, from Addition of parcels; or conceive a Remainder, from Substraction of one summe from another: which (if it be done by Words,) is conceiving of the consequence of the names of all the parts, to the name of the whole; or from the names of the whole and one part, to the name of the other part. And though in some things, (as in numbers,) besides Adding and Subtracting, men name other operations, as Multiplying and Dividing; yet they are the same; for Multiplication, is but Addition together of things equall; and Division, but Subtracting of one thing, as often as we can. These operations are not incident to Numbers onely, but to all manner of things that can be added together, and taken one out of another. For as Arithmeticians teach to adde and subtract in Numbers; so the Geometricians teach the same in Lines, Figures (solid and superficiall,) Angles, Proportions, Times, degrees of Swiftnesse, Force, Power, and the like; The Logicians teach the same in Consequences Of Words; adding together Two Names, to make an Affirmation; and Two Affirmations, to make a syllogisme; and Many syllogismes to make a Demonstration; and from the Summe, or Conclusion of a syllogisme, they subtract one Proposition, to finde the other. Writers of Politiques, adde together Pactions, to find mens Duties; and Lawyers, Lawes and Facts, to find what is Right and Wrong in the actions of private men. In summe, in what matter soever there is place for Addition and Substraction, there also is place for Reason; and where these have no place, there Reason has nothing at all to do.

Reason Defined

Out of all which we may define, (that is to say determine,) what that is, which is meant by this word Reason, when wee reckon it amongst the Faculties of the mind. For Reason, in this sense, is nothing but Reckoning (that is, Adding and Subtracting) of the Consequences of generall names agreed upon, for the Marking and Signifying of our thoughts; I say Marking them, when we reckon by our selves; and Signifying, when we demonstrate, or approve our reckonings to other men.

Right Reason Where

And as in Arithmetique, unpractised men must, and Professors themselves may often erre, and cast up false; so also in any other subject of Reasoning, the ablest, most attentive, and most practised men, may deceive themselves, and inferre false Conclusions; Not but that Reason it selfe is always Right Reason, as well as Arithmetique is a certain and infallible art: But no one mans Reason, nor the Reason of any one number of men, makes the certaintie; no more than an account is therefore well cast up, because a great many men have unanimously approved it. And therefore, as when there is a controversy in an account, the parties must by their own accord, set up for right Reason, the Reason of some Arbitrator, or Judge, to whose sentence they will both stand, or their controversie must either come to blowes, or be undecided, for want of a right Reason constituted by Nature; so is it also in all debates of what kind soever: And when men that think themselves wiser than all others, clamor and demand right Reason for judge; yet seek no more, but that things should be determined, by no other mens reason but their own, it is as intolerable in the society of men, as it is in play after trump is turned, to use for trump on every occasion, that suite whereof they have most in their hand. For they do nothing els, that will have every of their passions, as it

comes to bear sway in them, to be taken for right Reason, and that in their own controversies: bewraying their want of right Reason, by the claym they lay to it.

The Use Of Reason

The Use and End of Reason, is not the finding of the summe, and truth of one, or a few consequences, remote from the first definitions, and settled significations of names; but to begin at these; and proceed from one consequence to another. For there can be no certainty of the last Conclusion, without a certainty of all those Affirmations and Negations, on which it was grounded, and inferred. As when a master of a family, in taking an account, casteth up the summs of all the bills of expence, into one sum; and not regarding how each bill is summed up, by those that give them in account; nor what it is he payes for; he advantages himselfe no more, than if he allowed the account in grosse, trusting to every of the accountants skill and honesty; so also in Reasoning of all other things, he that takes up conclusions on the trust of Authors, and doth not fetch them from the first Items in every Reckoning, (which are the significations of names settled by definitions), loses his labour; and does not know any thing; but onely beleeveth.

Of Error And Absurdity

When a man reckons without the use of words, which may be done in particular things, (as when upon the sight of any one thing, wee conjecture what was likely to have preceded, or is likely to follow upon it;) if that which he thought likely to follow, followes not; or that which he thought likely to have preceded it, hath not preceded it, this is called ERROR; to which even the most prudent men are subject. But when we Reason in Words of generall signification, and fall upon a generall inference which is false; though it be commonly called Error, it is indeed

an ABSURDITY, or senseless Speech. For Error is but a deception, in presuming that somewhat is past, or to come; of which, though it were not past, or not to come; yet there was no impossibility discoverable. But when we make a generall assertion, unlesse it be a true one, the possibility of it is unconceivable. And words whereby we conceive nothing but the sound, are those we call Absurd, insignificant, and Non-sense. And therefore if a man should talk to me of a Round Quadrangle; or Accidents Of Bread In Cheese; or Immaterial Substances; or of A Free Subject; A Free Will; or any Free, but free from being hindred by opposition, I should not say he were in an Errour; but that his words were without meaning; that is to say, Absurd.

I have said before, (in the second chapter,) that a Man did excell all other Animals in this faculty, that when he conceived any thing whatsoever, he was apt to enquire the consequences of it, and what effects he could do with it. And now I adde this other degree of the same excellence, that he can by words reduce the consequences he findes to generall Rules, called Theoremes, or Aphorismes; that is, he can Reason, or reckon, not onely in number; but in all other things, whereof one may be added unto, or substracted from another.

But this priviledge, is allayed by another; and that is, by the priviledge of Absurdity; to which no living creature is subject, but man onely. And of men, those are of all most subject to it, that professe Philosophy. For it is most true that Cicero sayth of them somewhere; that there can be nothing so absurd, but may be found in the books of Philosophers. And the reason is manifest. For there is not one of them that begins his ratiocination from the Definitions, or Explications of the names they are to use; which is a method that hath been used onely in Geometry; whose Conclusions have thereby been made indisputable.

Causes Of Absurditie

The first cause of Absurd conclusions I ascribe to the want of Method; in that they begin not their Ratiocination from Definitions; that is, from settled significations of their words: as if they could cast account, without knowing the value of the numerall words, One, Two, and Three.

And whereas all bodies enter into account upon divers considerations, (which I have mentioned in the precedent chapter;) these considerations being diversly named, divers absurdities proceed from the confusion, and unfit connexion of their names into assertions. And therefore

The second cause of Absurd assertions, I ascribe to the giving of names of Bodies, to Accidents; or of Accidents, to Bodies; As they do, that say, Faith Is Infused, or Inspired; when nothing can be Powred, or Breathed into any thing, but body; and that, Extension is Body; that Phantasmes are Spirits, &c.

The third I ascribe to the giving of the names of the Accidents of Bodies Without Us, to the Accidents of our Own Bodies; as they do that say, the Colour Is In The Body; The Sound Is In The Ayre, &c.

The fourth, to the giving of the names of Bodies, to Names, or Speeches; as they do that say, that There Be Things Universall; that A Living Creature Is Genus, or A Generall Thing, &c.

The fifth, to the giving of the names of Accidents, to Names and Speeches; as they do that say, The Nature Of A Thing Is In Its Definition; A Mans Command Is His Will; and the like.

The sixth, to the use of Metaphors, Tropes, and other Rhetoricall figures, in stead of words proper. For though it be lawfull to say, (for example) in common speech, The Way Goeth, Or Leadeth Hither, Or Thither, The Proverb Sayes This Or That (whereas wayes cannot go, nor Proverbs speak;) yet in reckoning, and seeking of truth, such speeches are not to be admitted.

The seventh, to names that signifie nothing; but are taken up, and learned by rote from the Schooles, as Hypostatical, Transubstantiate, Consubstantiate, Eternal-now, and the like canting of Schoole-men.

To him that can avoyd these things, it is not easie to fall into any absurdity, unlesse it be by the length of an account; wherein he may perhaps forget what went before. For all men by nature reason alike, and well, when they have good principles. For who is so stupid, as both to mistake in Geometry, and also to persist in it, when another detects his error to him?

Science

By this it appears that Reason is not as Sense, and Memory, borne with us; nor gotten by Experience onely; as Prudence is; but attayned by Industry; first in apt imposing of Names; and secondly by getting a good and orderly Method in proceeding from the Elements, which are Names, to Assertions made by Connexion of one of them to another; and so to syllogismes, which are the Connexions of one Assertion to another, till we come to a knowledge of all the Consequences of names appertaining to the subject in hand; and that is it, men call SCIENCE. And whereas Sense and Memory are but knowledge of Fact, which is a thing past, and irrevocable; Science is the knowledge of Consequences, and dependance of one fact upon another: by which, out of that we can presently do, we know how to do something els when we will, or the like, another time; Because when we see how any thing comes about, upon what causes, and by what manner; when the like causes come into our power, wee see how to make it produce the like effects.

Children therefore are not endued with Reason at all, till they have attained the use of Speech: but are called Reasonable Creatures, for the possibility apparent of having the use of Reason in time to come. And the most part of men, though they have the use of Reasoning a little way, as in numbring to some degree; yet it serves them to little use in common life; in which they govern themselves, some better, some worse, according to their differences of experience, quicknesse of memory, and inclinations to severall ends; but specially according to good or evill

fortune, and the errors of one another. For as for Science, or certain rules of their actions, they are so farre from it, that they know not what it is. Geometry they have thought Conjuring: but for other Sciences, they who have not been taught the beginnings, and some progresse in them, that they may see how they be acquired and generated, are in this point like children, that having no thought of generation, are made believe by the women, that their brothers and sisters are not born, but found in the garden.

But yet they that have no Science, are in better, and nobler condition with their naturall Prudence; than men, that by mis-reasoning, or by trusting them that reason wrong, fall upon false and absurd generall rules. For ignorance of causes, and of rules, does not set men so farre out of their way, as relying on false rules, and taking for causes of what they aspire to, those that are not so, but rather causes of the contrary.

To conclude, The Light of humane minds is Perspicuous Words, but by exact definitions first snuffed, and purged from ambiguity; Reason is the Pace; Encrease of Science, the Way; and the Benefit of man-kind, the End. And on the contrary, Metaphors, and senslesse and ambiguous words, are like Ignes Fatui; and reasoning upon them, is wandering amongst innumerable absurdities; and their end, contention, and sedition, or contempt.

Prudence & Sapience, With Their Difference

As, much Experience, is Prudence; so, is much Science, Sapience. For though wee usually have one name of Wisedome for them both; yet the Latines did always distinguish between Prudentia and Sapientia, ascribing the former to Experience, the later to Science. But to make their difference appeare more cleerly, let us suppose one man endued with an excellent naturall use, and dexterity in handling his armes; and another to have added to that dexterity, an acquired Science, of where he can offend, or be offended by his adversarie, in

every possible posture, or guard: The ability of the former, would be to the ability of the later, as Prudence to Sapience; both usefull; but the later infallible. But they that trusting onely to the authority of books, follow the blind blindly, are like him that trusting to the false rules of the master of fence, ventures praesumptuously upon an adversary, that either kills, or disgraces him.

Signes Of Science

The signes of Science, are some, certain and infallible; some, uncertain. Certain, when he that pretendeth the Science of any thing, can teach the same; that is to say, demonstrate the truth thereof perspicuously to another: Uncertain, when onely some particular events answer to his pretence, and upon many occasions prove so as he sayes they must. Signes of prudence are all uncertain; because to observe by experience, and remember all circumstances that may alter the successe, is impossible. But in any businesse, whereof a man has not infallible Science to proceed by; to forsake his own natural judgement, and be guided by generall sentences read in Authors, and subject to many exceptions, is a signe of folly, and generally scorned by the name of Pedantry. And even of those men themselves, that in Councells of the Common-wealth, love to shew their reading of Politiques and History, very few do it in their domestique affaires, where their particular interest is concerned; having Prudence enough for their private affaires: but in publique they study more the reputation of their owne wit, than the successe of anothers businesse.

CHAPTER VI. OF THE INTERIOUR BEGINNINGS OF VOLUNTARY MOTIONS

COMMONLY CALLED THE PASSIONS. AND THE SPEECHES BY
WHICH THEY ARE EXPRESSED.

Motion Vitall And Animal

There be in Animals, two sorts of Motions peculiar to them: One called Vitall; begun in generation, and continued without interruption through their whole life; such as are the Course of the Bloud, the Pulse, the Breathing, the Concoctions, Nutrition, Excretion, &c; to which Motions there needs no help of Imagination: The other in Animal Motion, otherwise called Voluntary Motion; as to Go, to Speak, to Move any of our limbes, in such manner as is first fancied in our minds. That Sense, is Motion in the organs and interiour parts of mans body, caused by the action of the things we See, Heare, &c.; And that Fancy is but the Reliques of the same Motion, remaining after Sense, has been already sayd in the first and second Chapters. And because Going, Speaking, and the like Voluntary motions, depend alwayes upon a precedent thought of Whither, Which Way, and What; it is evident, that the Imagination is the first internall beginning of all Voluntary Motion. And although unstudied men, doe not conceive any motion at all to be there, where the thing moved is invisible; or the space it is moved in, is (for the shortnesse of it) insensible; yet that doth not hinder, but that such Motions are. For let a space be never so little, that which is moved over a greater space, whereof that little one is part, must first be moved over that. These small

beginnings of Motion, within the body of Man, before they appear in walking, speaking, striking, and other visible actions, are commonly called ENDEAVOUR.

Endeavour; Appetite; Desire; Hunger; Thirst; Aversion

This Endeavour, when it is toward something which causes it, is called APPETITE, or DESIRE; the later, being the generall name; and the other, oftentimes restrayned to signifie the Desire of Food, namely Hunger and Thirst. And when the Endeavour is fromward something, it is generally called AVERSION. These words Appetite, and Aversion we have from the Latines; and they both of them signifie the motions, one of approaching, the other of retiring. So also do the Greek words for the same, which are orme and aphorme. For nature it selfe does often presse upon men those truths, which afterwards, when they look for somewhat beyond Nature, they stumble at. For the Schooles find in meere Appetite to go, or move, no actuall Motion at all: but because some Motion they must acknowledge, they call it Metaphoricall Motion; which is but an absurd speech; for though Words may be called metaphoricall; Bodies, and Motions cannot.

That which men Desire, they are also sayd to LOVE; and to HATE those things, for which they have Aversion. So that Desire, and Love, are the same thing; save that by Desire, we alwayes signifie the Absence of the object; by Love, most commonly the Presence of the same. So also by Aversion, we signifie the Absence; and by Hate, the Presence of the Object.

Of Appetites, and Aversions, some are born with men; as Appetite of food, Appetite of excretion, and exoneration, (which may also and more properly be called Aversions, from somewhat they feele in their Bodies;) and some other Appetites, not many. The rest, which are Appetites of particular things, proceed from Experience, and triall of their effects upon themselves, or other men. For of things wee know not at all, or believe not to be, we can have no further Desire,

than to tast and try. But Aversion wee have for things, not onely which we know have hurt us; but also that we do not know whether they will hurt us, or not.

Contempt

Those things which we neither Desire, nor Hate, we are said to Contemne: CONTEMPT being nothing els but an immobility, or contumacy of the Heart, in resisting the action of certain things; and proceeding from that the Heart is already moved otherwise, by either more potent objects; or from want of experience of them.

And because the constitution of a mans Body, is in continuall mutation; it is impossible that all the same things should alwayes cause in him the same Appetites, and aversions: much lesse can all men consent, in the Desire of almost any one and the same Object.

Good Evill

But whatsoever is the object of any mans Appetite or Desire; that is it, which he for his part calleth Good: And the object of his Hate, and Aversion, evill; And of his contempt, Vile, and Inconsiderable. For these words of Good, evill, and Contemptible, are ever used with relation to the person that useth them: There being nothing simply and absolutely so; nor any common Rule of Good and evill, to be taken from the nature of the objects themselves; but from the Person of the man (where there is no Common-wealth;) or, (in a Common-wealth,) From the Person that representeth it; or from an Arbitrator or Judge, whom men disagreeing shall by consent set up, and make his sentence the Rule thereof.

Pulchrum Turpe; Delightfull Profitable; Unpleasant Unprofitable

The Latine Tongue has two words, whose significations approach to those of Good and Evill; but are not precisely the same; And those are Pulchrum and Turpe. Whereof the former signifies that, which by some apparent signes promiseth Good; and the later, that, which promiseth evill. But in our Tongue we have not so generall names to expresse them by. But for Pulchrum, we say in some things, Fayre; in other Beautifull, or Handsome, or Gallant, or Honourable, or Comely, or Amiable; and for Turpe, Foule, Deformed, Ugly, Base, Nauseous, and the like, as the subject shall require; All which words, in their proper places signifie nothing els, but the Mine, or Countenance, that promiseth Good and evill. So that of Good there be three kinds; Good in the Promise, that is Pulchrum; Good in Effect, as the end desired, which is called Jucundum, Delightfull; and Good as the Means, which is called Utile, Profitable; and as many of evill: For evill, in Promise, is that they call Turpe; evill in Effect, and End, is Molestum, Unpleasant, Troublesome; and evill in the Means, Inutile, Unprofitable, Hurtfull.

Delight Displeasure

As, in Sense, that which is really within us, is (As I have sayd before) onely Motion, caused by the action of externall objects, but in apparence; to the Sight, Light and Colour; to the Eare, Sound; to the Nostrill, Odour, &c: so, when the action of the same object is continued from the Eyes, Eares, and other organs to the Heart; the real effect there is nothing but Motion, or Endeavour; which consisteth in Appetite, or Aversion, to, or from the object moving. But the apparence, or sense of that motion, is that wee either call DELIGHT, or TROUBLE OF MIND.

Pleasure Offence

This Motion, which is called Appetite, and for the apparence of it Delight, and Pleasure, seemeth to be, a corroboration of Vitall motion, and a help thereunto; and therefore such things as caused Delight, were not improperly called Jucunda, (A Juvando,) from helping or fortifying; and the contrary, Molesta, Offensive, from hindering, and troubling the motion vitall.

Pleasure therefore, (or Delight,) is the apparence, or sense of Good; and Molestation or Displeasure, the apparence, or sense of evill. And consequently all Appetite, Desire, and Love, is accompanied with some Delight more or lesse; and all Hatred, and Aversion, with more or lesse Displeasure and Offence.

Pleasures Of Sense; Pleasures Of The Mind; Joy Paine Griefe

Of Pleasures, or Delights, some arise from the sense of an object Present; And those may be called Pleasures Of Sense, (The word Sensuall, as it is used by those onely that condemn them, having no place till there be Lawes.) Of this kind are all Onerations and Exonerations of the body; as also all that is pleasant, in the Sight, Hearing, Smell, Tast, Or Touch; Others arise from the Expectation, that proceeds from foresight of the End, or Consequence of things; whether those things in the Sense Please or Displease: And these are Pleasures Of The Mind of him that draweth those consequences; and are generally called JOY. In the like manner, Displeasures, are some in the Sense, and called PAYNE; others, in the Expectation of consequences, and are called GRIEFE.

These simple Passions called Appetite, Desire, Love, Aversion, Hate, Joy, and grieve, have their names for divers considerations diversified. As first, when they one succeed another, they are diversly called from the opinion men have of the likelihood of attaining what they desire. Secondly, from the object loved or hated.

Thirdly, from the consideration of many of them together. Fourthly, from the Alteration or succession it selfe.

Hope — For Appetite with an opinion of attaining, is called HOPE.

Despaire — The same, without such opinion, DESPAIRE.

Feare — Aversion, with opinion of Hurt from the object, FEARE.

Courage — The same, with hope of avoyding that Hurt by resistance, COURAGE.

Anger — Sudden Courage, ANGER.

Confidence — Constant Hope, CONFIDENCE of our selves.

Diffidence — Constant Despayre, DIFFIDENCE of our selves.

Indignation — Anger for great hurt done to another, when we conceive the same to be done by Injury, INDIGNATION.

Benevolence — Desire of good to another, BENEVOLENCE, GOOD WILL, CHARITY. If to man generally, GOOD NATURE.

Covetousnesse — Desire of Riches, COVETOUSNESSE: a name used alwayes in signification of blame; because men contending for them, are displeased with one anothers attaining them; though the desire in it selfe, be to be blamed, or allowed, according to the means by which those Riches are sought.

Ambition — Desire of Office, or precedence, AMBITION: a name used also in the worse sense, for the reason before mentioned.

Pusillanimity — Desire of things that conduce but a little to our ends; And fear of things that are but of little hindrance, PUSILLANIMITY.

Magnanimity — Contempt of little helps, and hindrances, MAGNANIMITY.

Valour — Magnanimity, in danger of Death, or Wounds, VALOUR, FORTITUDE.

Liberality — Magnanimity in the use of Riches, LIBERALITY

Miserableness — Pusillanimity, in the same WRETCHEDNESSE, MISERABLENESSE; or PARSIMONY; as it is liked or disliked.

Kindnesse — Love of Persons for society, KINDNESSE.

Naturall Lust — Love of Persons for Pleasing the sense onely, NATURAL LUST.

Luxury — Love of the same, acquired from Ruminat[i]on, that is Imaginat[i]on of Pleasure past, LUXURY.

The Passion Of Love; Jealousie — Love of one singularly, with desire to be singularly beloved, THE PASSION OF LOVE. The same, with fear that the love is not mutuall, JEALOUSIE.

Revengefulness — Desire, by doing hurt to another, to make him condemn some fact of his own, REVENGEFULNESSE.

Curiosity — Desire, to know why, and how, CURIOSITY; such as is in no living creature but Man; so that Man is distinguished, not onely by his Reason; but also by this singular Passion from other Animals; in whom the appetite of food, and other pleasures of Sense, by praedominance, take away the care of knowing causes; which is a Lust of the mind, that by a perseverance of delight in the continuall and indefatigable generation of Knowledge, exceedeth the short vehemence of any carnall Pleasure.

Religion Superstition; True Religion — Feare of power invisible, feigned by the mind, or imagined from tales publicquely allowed, RELIGION; not allowed, superstition. And when the power imagined is truly such as we imagine, TRUE RELIGION.

Panique Terrour — Feare, without the apprehension of why, or what, PANIQUE TERROR; called so from the fables that make Pan the author of them; whereas in truth there is always in him that so feareth, first, some apprehension of the cause, though the rest run away by example; every one supposing his fellow to know why. And therefore this Passion happens to none but in a throng, or multitude of people.

Admiration — Joy, from apprehension of novelty, ADMIRATION; proper to man, because it excites the appetite of knowing the cause.

Glory Vaine-glory — Joy, arising from imaginat[i]on of a man's own power and ability, is that exultation of the mind which is called GLORYING: which, if

grounded upon the experience of his own former actions, is the same with Confidence: but if grounded on the flattery of others, or onely supposed by himselfe, for delight in the consequences of it, is called Vaine-Glory: which name is properly given; because a well-grounded Confidence begetteth attempt; whereas the supposing of power does not, and is therefore rightly called Vaine.

Dejection — Griefe, from opinion of want of power, is called dejection of mind.

The Vaine-glory which consisteth in the feigning or supposing of abilities in ourselves, which we know are not, is most incident to young men, and nourished by the Histories or Fictions of Gallant Persons; and is corrected often times by Age, and Employment.

Sudden Glory Laughter — Sudden glory, is the passion which maketh those Grimaces called LAUGHTER; and is caused either by some sudden act of their own, that pleaseth them; or by the apprehension of some deformed thing in another, by comparison whereof they suddenly applaud themselves. And it is incident most to them, that are conscious of the fewest abilities in themselves; who are forced to keep themselves in their own favour, by observing the imperfections of other men. And therefore much Laughter at the defects of others is a signe of Pusillanimity. For of great minds, one of the proper workes is, to help and free others from scorn; and compare themselves onely with the most able.

Sudden Dejection Weeping — On the contrary, Sudden Dejection is the passion that causeth WEEPING; and is caused by such accidents, as suddenly take away some vehement hope, or some prop of their power: and they are most subject to it, that rely principally on helps externall, such as are Women, and Children. Therefore, some Weep for the loss of Friends; Others for their unkindnesse; others for the sudden stop made to their thoughts of revenge, by Reconciliation. But in all cases, both Laughter and Weeping, are sudden motions; Custome taking them both away. For no man Laughs at old jests; or Weeps for an old calamity.

Shame Blushing — Griefe, for the discovery of some defect of ability is SHAME, or the passion that discovereth itself in BLUSHING; and consisteth in the apprehension of some thing dishonourable; and in young men, is a signe of the love of good reputation; and commendable: in old men it is a signe of the same; but because it comes too late, not commendable.

Impudence — The Contempt of good reputation is called IMPUDENCE.

Pitty — Griefe, for the calamity of another is PITY; and ariseth from the imagination that the like calamity may befall himselfe; and therefore is called also COMPASSION, and in the phrase of this present time a FELLOW-FEELING: and therefore for Calamity arriving from great wickedness, the best men have the least Pitty; and for the same Calamity, those have least Pitty, that think themselves least obnoxious to the same.

Cruelty — Contempt, or little sense of the calamity of others, is that which men call CRUELTY; proceeding from Security of their own fortune. For, that any man should take pleasure in other mens' great harmes, without other end of his own, I do not conceive it possible.

Emulation Envy — Griefe, for the success of a Competitor in wealth, honour, or other good, if it be joynd with Endeavour to enforce our own abilities to equal or exceed him, is called EMULATION: but joynd with Endeavour to supplant or hinder a Competitor, ENVIE.

Deliberation — When in the mind of man, Appetites and Aversions, Hopes and Feares, concerning one and the same thing, arise alternately; and divers good and evill consequences of the doing, or omitting the thing propounded, come successively into our thoughts; so that sometimes we have an Appetite to it, sometimes an Aversion from it; sometimes Hope to be able to do it; sometimes Despaire, or Feare to attempt it; the whole sum of Desires, Aversions, Hopes and Feares, continued till the thing be either done, or thought impossible, is that we call DELIBERATION.

Therefore of things past, there is no Deliberation; because manifestly impossible to be changed: nor of things known to be impossible, or thought so;

because men know, or think such Deliberation vaine. But of things impossible, which we think possible, we may Deliberate; not knowing it is in vain. And it is called DELIBERATION; because it is a putting an end to the Liberty we had of doing, or omitting, according to our own Appetite, or Aversion.

This alternate succession of Appetites, Aversions, Hopes and Feares is no less in other living Creatures than in Man; and therefore Beasts also Deliberate.

Every Deliberation is then sayd to End when that whereof they Deliberate, is either done, or thought impossible; because till then wee retain the liberty of doing, or omitting, according to our Appetite, or Aversion.

The Will

In Deliberation, the last Appetite, or Aversion, immediately adhaering to the action, or to the omission thereof, is that wee call the WILL; the Act, (not the faculty,) of Willing. And Beasts that have Deliberation must necessarily also have Will. The Definition of the Will, given commonly by the Schooles, that it is a Rationall Appetite, is not good. For if it were, then could there be no Voluntary Act against Reason. For a Voluntary Act is that, which proceedeth from the Will, and no other. But if in stead of a Rationall Appetite, we shall say an Appetite resulting from a precedent Deliberation, then the Definition is the same that I have given here. Will, therefore, Is The Last Appetite In Deliberating. And though we say in common Discourse, a man had a Will once to do a thing, that neverthelesse he forbore to do; yet that is properly but an Inclination, which makes no Action Voluntary; because the action depends not of it, but of the last Inclination, or Appetite. For if the intervenient Appetites make any action Voluntary, then by the same reason all intervenient Aversions should make the same action Involuntary; and so one and the same action should be both Voluntary & Involuntary.

By this it is manifest, that not onely actions that have their beginning from Covetousness, Ambition, Lust, or other Appetites to the thing propounded; but also those that have their beginning from Aversion, or Feare of those consequences that follow the omission, are Voluntary Actions.

Formes Of Speech, In Passion

The formes of Speech by which the Passions are expressed, are partly the same, and partly different from those, by which we express our Thoughts. And first generally all Passions may be expressed Indicatively; as, I Love, I Feare, I Joy, I Deliberate, I Will, I Command: but some of them have particular expressions by themselves, which nevertheless are not affirmations, unless it be when they serve to make other inferences, besides that of the Passion they proceed from. Deliberation is expressed Subjunctively; which is a speech proper to signifie suppositions, with their consequences; as, If This Be Done, Then This Will Follow; and differs not from the language of Reasoning, save that Reasoning is in generall words, but Deliberation for the most part is of Particulars. The language of Desire, and Aversion, is Imperative; as, Do This, Forbear That; which when the party is obliged to do, or forbear, is Command; otherwise Prayer; or els Counsell. The language of Vaine-Glory, of Indignation, Pitty and Revengefulness, Optative: but of the Desire to know, there is a peculiar expression called Interrogative; as, What Is It, When Shall It, How Is It Done, and Why So? Other language of the Passions I find none: for Cursing, Swearing, Reviling, and the like, do not signifie as Speech; but as the actions of a tongue accustomed.

These forms of Speech, I say, are expressions, or voluntary significations of our Passions: but certain signes they be not; because they may be used arbitrarily, whether they that use them, have such Passions or not. The best signes of Passions present, are either in the countenance, motions of the body, actions, and ends, or aims, which we otherwise know the man to have.

Good And Evill Apparent

And because in Deliberation the Appetites and Aversions are raised by foresight of the good and evill consequences, and sequels of the action whereof we Deliberate; the good or evill effect thereof dependeth on the foresight of a long chain of consequences, of which very seldome any man is able to see to the end. But for so far as a man seeth, if the Good in those consequences be greater than the evill, the whole chain is that which Writers call Apparent or Seeming Good. And contrarily, when the evill exceedeth the good, the whole is Apparent or Seeming Evill: so that he who hath by Experience, or Reason, the greatest and surest prospect of Consequences, Deliberates best himself; and is able, when he will, to give the best counsel unto others.

Felicity

Continual Successe in obtaining those things which a man from time to time desireth, that is to say, continual prospering, is that men call FELICITY; I mean the Felicity of this life. For there is no such thing as perpetual Tranquillity of mind, while we live here; because Life itself is but Motion, and can never be without Desire, nor without Feare, no more than without Sense. What kind of Felicity God hath ordained to them that devoutly honour him, a man shall no sooner know, than enjoy; being joys, that now are as incomprehensible, as the word of School-men, Beatifical Vision, is unintelligible.

Praise Magnification

The form of speech whereby men signifie their opinion of the Goodnesse of anything is PRAISE. That whereby they signifie the power and greatness of anything is MAGNIFYING. And that whereby they signifie the opinion they have of a man's felicity is by the Greeks called Makarismos, for which we have no name in our tongue. And thus much is sufficient for the present purpose to have been said of the passions.

CHAPTER VII. OF THE ENDS OR RESOLUTIONS OF DISCOURSE

OF ALL DISCOURSE, governed by desire of Knowledge, there is at last an End, either by attaining, or by giving over. And in the chain of Discourse, wheresoever it be interrupted, there is an End for that time.

Judgement, or Sentence Final; Doubt

If the Discourse be meerly Mentall, it consisteth of thoughts that the thing will be, and will not be; or that it has been, and has not been, alternately. So that wheresoever you break off the chayn of a mans Discourse, you leave him in a Praesumption of It Will Be, or, It Will Not Be; or it Has Been, or, Has Not Been. All which is Opinion. And that which is alternate Appetite, in Deliberating concerning Good and Evil, the same is alternate Opinion in the Enquiry of the truth of Past, and Future. And as the last Appetite in Deliberation is called the Will, so the last Opinion in search of the truth of Past, and Future, is called the JUDGEMENT, or Resolute and Final Sentence of him that Discourseth. And as the whole chain of Appetites alternate, in the question of Good or Bad is called Deliberation; so the whole chain of Opinions alternate, in the question of True, or False is called DOUBT.

No Discourse whatsoever, can End in absolute knowledge of Fact, past, or to come. For, as for the knowledge of Fact, it is originally, Sense; and ever after, Memory. And for the knowledge of consequence, which I have said before is called Science, it is not Absolute, but Conditionall. No man can know by Discourse, that this, or that, is, has been, or will be; which is to know absolutely:

but onely, that if This be, That is; if This has been, That has been; if This shall be, That shall be: which is to know conditionally; and that not the consequence of one thing to another; but of one name of a thing, to another name of the same thing.

Science Opinion Conscience

And therefore, when the Discourse is put into Speech, and begins with the Definitions of Words, and proceeds by Connexion of the same into general Affirmations, and of these again into Syllogismes, the end or last sum is called the Conclusion; and the thought of the mind by it signified is that conditional Knowledge, or Knowledge of the consequence of words, which is commonly called Science. But if the first ground of such Discourse be not Definitions, or if the Definitions be not rightly joyned together into Syllogismes, then the End or Conclusion is again OPINION, namely of the truth of somewhat said, though sometimes in absurd and senseless words, without possibility of being understood. When two, or more men, know of one and the same fact, they are said to be CONSCIOUS of it one to another; which is as much as to know it together. And because such are fittest witnesses of the facts of one another, or of a third, it was, and ever will be reputed a very Evil act, for any man to speak against his Conscience; or to corrupt or force another so to do: Insomuch that the plea of Conscience, has been always hearkened unto very diligently in all times. Afterwards, men made use of the same word metaphorically, for the knowledge of their own secret facts, and secret thoughts; and therefore it is Rhetorically said that the Conscience is a thousand witnesses. And last of all, men, vehemently in love with their own new opinions, (though never so absurd,) and obstinately bent to maintain them, gave those their opinions also that revered name of Conscience, as if they would have it seem unlawful, to change or speak against them; and so pretend to know they are true, when they know at most but that they think so.

Beliefe Faith

When a mans Discourse beginneth not at Definitions, it beginneth either at some other contemplation of his own, and then it is still called Opinion; Or it beginneth at some saying of another, of whose ability to know the truth, and of whose honesty in not deceiving, he doubteth not; and then the Discourse is not so much concerning the Thing, as the Person; And the Resolution is called BELEEF, and FAITH: Faith, In the man; Beleeve, both Of the man, and Of the truth of what he sayes. So then in Beleeve are two opinions; one of the saying of the man; the other of his vertue. To Have Faith In, or Trust To, or Beleeve A Man, signifie the same thing; namely, an opinion of the veracity of the man: But to Beleeve What Is Said, signifieth onely an opinion of the truth of the saying. But wee are to observe that this Phrase, I Beleeve In; as also the Latine, Credo In; and the Greek, Pisteno Eis, are never used but in the writings of Divines. In stead of them, in other writings are put, I Beleeve Him; I Have Faith In Him; I Rely On Him: and in Latin, Credo Illi; Fido Illi: and in Greek, Pisteno Anto: and that this singularity of the Ecclesiastical use of the word hath raised many disputes about the right object of the Christian Faith.

But by Beleeving In, as it is in the Creed, is meant, not trust in the Person; but Confession and acknowledgement of the Doctrine. For not onely Christians, but all manner of men do so believe in God, as to hold all for truth they heare him say, whether they understand it, or not; which is all the Faith and trust can possibly be had in any person whatsoever: But they do not all believe the Doctrine of the Creed.

From whence we may inferre, that when wee believe any saying whatsoever it be, to be true, from arguments taken, not from the thing it selfe, or from the principles of naturall Reason, but from the Authority, and good opinion wee have, of him that hath sayd it; then is the speaker, or person we believe in, or trust in,

and whose word we take, the object of our Faith; and the Honour done in Believing, is done to him onely. And consequently, when wee Believe that the Scriptures are the word of God, having no immediate revelation from God himselfe, our Beleefe, Faith, and Trust is in the Church; whose word we take, and acquiesce therein. And they that believe that which a Prophet relates unto them in the name of God, take the word of the Prophet, do honour to him, and in him trust, and believe, touching the truth of what he relateth, whether he be a true, or a false Prophet. And so it is also with all other History. For if I should not believe all that is written By Historians, of the glorious acts of Alexander, or Caesar; I do not think the Ghost of Alexander, or Caesar, had any just cause to be offended; or any body else, but the Historian. If Livy say the Gods made once a Cow speak, and we believe it not; wee distrust not God therein, but Livy. So that it is evident, that whatsoever we believe, upon no other reason, than what is drawn from authority of men onely, and their writings; whether they be sent from God or not, is Faith in men onely.

CHAPTER VIII. OF THE VERTUES COMMONLY CALLED INTELLECTUAL;

AND THEIR CONTRARY DEFECTS

Intellectuall Vertue Defined

Vertue generally, in all sorts of subjects, is somewhat that is valued for eminence; and consisteth in comparison. For if all things were equally in all men, nothing would be prized. And by Vertues INTELLECTUALL, are always understood such abilityes of the mind, as men praise, value, and desire should be in themselves; and go commonly under the name of a Good Witte; though the same word Witte, be used also, to distinguish one certain ability from the rest.

Wit, Naturall, Or Acquired

These Vertues are of two sorts; Naturall, and Acquired. By Naturall, I mean not, that which a man hath from his Birth: for that is nothing else but Sense; wherein men differ so little one from another, and from brute Beasts, as it is not to be reckoned amongst Vertues. But I mean, that Witte, which is gotten by Use onely, and Experience; without Method, Culture, or Instruction. This NATURALL WITTE, consisteth principally in two things; Celerity Of Imagining, (that is, swift succession of one thought to another;) and Steddy Direction to some approved end. On the Contrary a slow Imagination, maketh that Defect, or fault of the mind, which is commonly called DULNESSE, Stupidity, and sometimes by other names that signifie slownesse of motion, or difficulty to be moved.

Good Wit, Or Fancy; Good Judgement; Discretion

And this difference of quicknesse, is caused by the difference of mens passions; that love and dislike, some one thing, some another: and therefore some mens thoughts run one way, some another: and are held to, and observe differently the things that passe through their imagination. And whereas in his succession of mens thoughts, there is nothing to observe in the things they think on, but either in what they be Like One Another, or in what they be Unlike, or What They Serve For, or How They Serve To Such A Purpose; Those that observe their similitudes, in case they be such as are but rarely observed by others, are sayd to have a Good Wit; by which, in this occasion, is meant a Good Fancy. But they that observe their differences, and dissimilitudes; which is called Distinguishing, and Discerning, and Judging between thing and thing; in case, such discerning be not easie, are said to have a Good Judgement: and particularly in matter of conversation and businesse; wherein, times, places, and persons are to be discerned, this Vertue is called DISCRETION. The former, that is, Fancy, without the help of Judgement, is not commended as a Vertue: but the later which is Judgement, and Discretion, is commended for it selfe, without the help of Fancy. Besides the Discretion of times, places, and persons, necessary to a good Fancy, there is required also an often application of his thoughts to their End; that is to say, to some use to be made of them. This done; he that hath this Vertue, will be easily fitted with similitudes, that will please, not onely by illustration of his discourse, and adorning it with new and apt metaphors; but also, by the rarity or their invention. But without Steddinesse, and Direction to some End, a great Fancy is one kind of Madnesse; such as they have, that entring into any discourse, are snatched from their purpose, by every thing that comes in their thought, into so many, and so long digressions, and parentheses, that they utterly lose themselves: Which kind of folly, I know no particular name for: but the cause of it

is, sometimes want of experience; whereby that seemeth to a man new and rare, which doth not so to others: sometimes Pusillanimity; by which that seems great to him, which other men think a trifle: and whatsoever is new, or great, and therefore thought fit to be told, withdrawes a man by degrees from the intended way of his discourse.

In a good Poem, whether it be Epique, or Dramatique; as also in Sonnets, Epigrams, and other Pieces, both Judgement and Fancy are required: But the Fancy must be more eminent; because they please for the Extravagancy; but ought not to displease by Indiscretion.

In a good History, the Judgement must be eminent; because the goodnesse consisteth, in the Method, in the Truth, and in the Choyse of the actions that are most profitable to be known. Fancy has no place, but onely in adorning the stile.

In Orations of Prayse, and in Invectives, the Fancy is praedominant; because the designe is not truth, but to Honour or Dishonour; which is done by noble, or by vile comparisons. The Judgement does but suggest what circumstances make an action laudable, or culpable.

In Hortatives, and Pleadings, as Truth, or Disguise serveth best to the Designe in hand; so is the Judgement, or the Fancy most required.

In Demonstration, in Councell, and all rigourous search of Truth, Judgement does all; except sometimes the understanding have need to be opened by some apt similitude; and then there is so much use of Fancy. But for Metaphors, they are in this case utterly excluded. For seeing they openly professe deceit; to admit them into Councell, or Reasoning, were manifest folly.

And in any Discourse whatsoever, if the defect of Discretion be apparent, how extravagant soever the Fancy be, the whole discourse will be taken for a signe of want of wit; and so will it never when the Discretion is manifest, though the Fancy be never so ordinary.

The secret thoughts of a man run over all things, holy, prophane, clean, obscene, grave, and light, without shame, or blame; which verball discourse cannot do, farther than the Judgement shall approve of the Time, Place, and

Persons. An Anatomist, or a Physitian may speak, or write his judgement of unclean things; because it is not to please, but profit: but for another man to write his extravagant, and pleasant fancies of the same, is as if a man, from being tumbled into the dirt, should come and present himselfe before good company. And 'tis the want of Discretion that makes the difference. Again, in profest remissnesse of mind, and familiar company, a man may play with the sounds, and aequivocal significations of words; and that many times with encounters of extraordinary Fancy: but in a Sermon, or in publique, or before persons unknown, or whom we ought to reverence, there is no Gingling of words that will not be accounted folly: and the difference is onely in the want of Discretion. So that where Wit is wanting, it is not Fancy that is wanting, but Discretion. Judgement therefore without Fancy is Wit, but Fancy without Judgement not.

Prudence

When the thoughts of a man, that has a designe in hand, running over a multitude of things, observes how they conduce to that designe; or what designe they may conduce into; if his observations be such as are not easie, or usuall, This wit of his is called PRUDENCE; and dependeth on much Experience, and Memory of the like things, and their consequences heretofore. In which there is not so much difference of Men, as there is in their Fancies and Judgements; Because the Experience of men equall in age, is not much unequall, as to the quantity; but lyes in different occasions; every one having his private designes. To govern well a family, and a kingdome, are not different degrees of Prudence; but different sorts of businesse; no more then to draw a picture in little, or as great, or greater then the life, are different degrees of Art. A plain husband-man is more Prudent in affaires of his own house, then a Privy Counsellor in the affaires of another man.

Craft

To Prudence, if you adde the use of unjust, or dishonest means, such as usually are prompted to men by Feare, or Want; you have that Crooked Wisdome, which is called CRAFT; which is a signe of Pusillanimity. For Magnanimity is contempt of unjust, or dishonest helps. And that which the Latines Call Versutia, (translated into English, Shifting,) and is a putting off of a present danger or incommodity, by engaging into a greater, as when a man robbes one to pay another, is but a shorter sighted Craft, called Versutia, from Versura, which signifies taking mony at usurie, for the present payment of interest.

Acquired Wit

As for Acquired Wit, (I mean acquired by method and instruction,) there is none but Reason; which is grounded on the right use of Speech; and produceth the Sciences. But of Reason and Science, I have already spoken in the fifth and sixth Chapters.

The causes of this difference of Witts, are in the Passions: and the difference of Passions, proceedeth partly from the different Constitution of the body, and partly from different Education. For if the difference proceeded from the temper of the brain, and the organs of Sense, either exterior or interior, there would be no lesse difference of men in their Sight, Hearing, or other Senses, than in their Fancies, and Discretions. It proceeds therefore from the Passions; which are different, not onely from the difference of mens complexions; but also from their difference of customes, and education.

The Passions that most of all cause the differences of Wit, are principally, the more or lesse Desire of Power, of Riches, of Knowledge, and of Honour. All which may be reduced to the first, that is Desire of Power. For Riches, Knowledge and Honour are but severall sorts of Power.

Giddinesse Madnesse

And therefore, a man who has no great Passion for any of these things; but is as men terme it indifferent; though he may be so farre a good man, as to be free from giving offence; yet he cannot possibly have either a great Fancy, or much Judgement. For the Thoughts, are to the Desires, as Scouts, and Spies, to range abroad, and find the way to the things Desired: All Stedinesse of the minds motion, and all quicknesse of the same, proceeding from thence. For as to have no Desire, is to be Dead: so to have weak Passions, is Dulnesse; and to have Passions indifferently for every thing, GIDDINESSE, and Distraction; and to have stronger, and more vehement Passions for any thing, than is ordinarily seen in others, is that which men call MADNESSE.

Whereof there be almost as many kinds, as of the Passions themselves. Sometimes the extraordinary and extravagant Passion, proceedeth from the evill constitution of the organs of the Body, or harme done them; and sometimes the hurt, and indisposition of the Organs, is caused by the vehemence, or long continuance of the Passion. But in both cases the Madnesse is of one and the same nature.

The Passion, whose violence, or continuance maketh Madnesse, is either great Vaine-Glory; which is commonly called Pride, and Selfe-Conceit; or great Dejection of mind.

Rage

Pride, subjecteth a man to Anger, the excesse whereof, is the Madnesse called RAGE, and FURY. And thus it comes to passe that excessive desire of Revenge, when it becomes habituall, hurteth the organs, and becomes Rage: That excessive

love, with jealousie, becomes also Rage: Excessive opinion of a mans own selfe, for divine inspiration, for wisdom, learning, forme, and the like, becomes Distraction, and Giddinesse: the same, joyned with Envy, Rage: Vehement opinion of the truth of any thing, contradicted by others, Rage.

Melancholy

Dejection, subjects a man to causelesse fears; which is a Madnesse commonly called MELANCHOLY, apparent also in divers manners; as in haunting of solitudes, and graves; in superstitious behaviour; and in fearing some one, some another particular thing. In summe, all Passions that produce strange and unusuall behaviour, are called by the generall name of Madnesse. But of the severall kinds of Madnesse, he that would take the paines, might enrowle a legion. And if the Excesses be madnesse, there is no doubt but the Passions themselves, when they tend to Evill, are degrees of the same.

(For example,) Though the effect of folly, in them that are possessed of an opinion of being inspired, be not visible alwayes in one man, by any very extravagant action, that proceedeth from such Passion; yet when many of them conspire together, the Rage of the whole multitude is visible enough. For what argument of Madnesse can there be greater, than to clamour, strike, and throw stones at our best friends? Yet this is somewhat lesse than such a multitude will do. For they will clamour, fight against, and destroy those, by whom all their lifetime before, they have been protected, and secured from injury. And if this be Madnesse in the multitude, it is the same in every particular man. For as in the midst of the sea, though a man perceive no sound of that part of the water next him; yet he is well assured, that part contributes as much, to the Roaring of the Sea, as any other part, of the same quantity: so also, though wee perceive no great unquietnesse, in one, or two men; yet we may be well assured, that their singular Passions, are parts of the Seditious roaring of a troubled Nation. And if

there were nothing else that bewrayed their madnesse; yet that very arrogating such inspiration to themselves, is argument enough. If some man in Bedlam should entertaine you with sober discourse; and you desire in taking leave, to know what he were, that you might another time requite his civility; and he should tell you, he were God the Father; I think you need expect no extravagant action for argument of his Madnesse.

This opinion of Inspiration, called commonly, Private Spirit, begins very often, from some lucky finding of an Errour generally held by others; and not knowing, or not remembring, by what conduct of reason, they came to so singular a truth, (as they think it, though it be many times an untruth they light on,) they presently admire themselves; as being in the speciall grace of God Almighty, who hath revealed the same to them supernaturally, by his Spirit.

Again, that Madnesse is nothing else, but too much appearing Passion, may be gathered out of the effects of Wine, which are the same with those of the evill disposition of the organs. For the variety of behaviour in men that have drunk too much, is the same with that of Mad-men: some of them Raging, others Loving, others laughing, all extravagantly, but according to their severall domineering Passions: For the effect of the wine, does but remove Dissimulation; and take from them the sight of the deformity of their Passions. For, (I believe) the most sober men, when they walk alone without care and employment of the mind, would be unwilling the vanity and Extravagance of their thoughts at that time should be publicly seen: which is a confession, that Passions unguided, are for the most part meere Madnesse.

The opinions of the world, both in antient and later ages, concerning the cause of madnesse, have been two. Some, deriving them from the Passions; some, from Daemons, or Spirits, either good, or bad, which they thought might enter into a man, possesse him, and move his organs in such strange, and uncouth manner, as mad-men use to do. The former sort therefore, called such men, Mad-men: but the Later, called them sometimes Daemoniacks, (that is, possessed with spirits;)

sometimes Energumeni, (that is agitated, or moved with spirits;) and now in Italy they are called not onely Pazzi, Mad-men; but also Spiritati, men possest.

There was once a great conflux of people in Abdera, a City of the Greeks, at the acting of the Tragedy of Andromeda, upon an extream hot day: whereupon, a great many of the spectators falling into Fevers, had this accident from the heat, and from The Tragedy together, that they did nothing but pronounce Iambiques, with the names of Perseus and Andromeda; which together with the Fever, was cured, by the coming on of Winter: And this madnesse was thought to proceed from the Passion imprinted by the Tragedy. Likewise there rained a fit of madnesse in another Graecian city, which seized onely the young Maidens; and caused many of them to hang themselves. This was by most then thought an act of the Divel. But one that suspected, that contempt of life in them, might proceed from some Passion of the mind, and supposing they did not contemne also their honour, gave counsell to the Magistrates, to strip such as so hang'd themselves, and let them hang out naked. This the story sayes cured that madnesse. But on the other side, the same Graecians, did often ascribe madnesse, to the operation of the Eumenides, or Furies; and sometimes of Ceres, Phoebus, and other Gods: so much did men attribute to Phantasmes, as to think them aerial living bodies; and generally to call them Spirits. And as the Romans in this, held the same opinion with the Greeks: so also did the Jewes; For they calle mad-men Prophets, or (according as they thought the spirits good or bad) Daemoniacks; and some of them called both Prophets, and Daemoniacks, mad-men; and some called the same man both Daemoniack, and mad-man. But for the Gentiles, 'tis no wonder; because Diseases, and Health; Vices, and Vertues; and many naturall accidents, were with them termed, and worshipped as Daemons. So that a man was to understand by Daemon, as well (sometimes) an Ague, as a Divell. But for the Jewes to have such opinion, is somewhat strange. For neither Moses, nor Abraham pretended to Prophecy by possession of a Spirit; but from the voyce of God; or by a Vision or Dream: Nor is there any thing in his Law, Morall, or Ceremoniall, by which they were taught, there was any such Enthusiasme; or any

Possession. When God is sayd, (Numb. 11. 25.) to take from the Spirit that was in Moses, and give it to the 70. Elders, the Spirit of God (taking it for the substance of God) is not divided. The Scriptures by the Spirit of God in man, mean a mans spirit, enclined to Godlinesse. And where it is said (Exod. 28. 3.) “Whom I have filled with the Spirit of wisdome to make garments for Aaron,” is not meant a spirit put into them, that can make garments; but the wisdome of their own spirits in that kind of work. In the like sense, the spirit of man, when it produceth unclean actions, is ordinarily called an unclean spirit; and so other spirits, though not alwayes, yet as often as the vertue or vice so stiled, is extraordinary, and Eminent. Neither did the other Prophets of the old Testament pretend Enthusiasme; or, that God spake in them; but to them by Voyce, Vision, or Dream; and the Burthen Of The Lord was not Possession, but Command. How then could the Jewes fall into this opinion of possession? I can imagine no reason, but that which is common to all men; namely, the want of curiosity to search naturall causes; and their placing Felicity, in the acquisition of the grosse pleasures of the Senses, and the things that most immediately conduce thereto. For they that see any strange, and unusuall ability, or defect in a mans mind; unlesse they see withall, from what cause it may probably proceed, can hardly think it naturall; and if not naturall, they must needs thinke it supernaturall; and then what can it be, but that either God, or the Divell is in him? And hence it came to passe, when our Saviour (Mark 3.21.) was compassed about with the multitude, those of the house doubted he was mad, and went out to hold him: but the Scribes said he had Belzebub, and that was it, by which he cast out divels; as if the greater mad-man had awed the lesser. And that (John 10. 20.) some said, “He hath a Divell, and is mad;” whereas others holding him for a Prophet, sayd, “These are not the words of one that hath a Divell.” So in the old Testament he that came to anoynt Jehu, (2 Kings 9.11.) was a Prophet; but some of the company asked Jehu, “What came that mad-man for?” So that in summe, it is manifest, that whosoever behaved himselfe in extraordinary manner, was thought by the Jewes to be possessed either with a good, or evill spirit; except by the Sadduces, who erred so farre on

the other hand, as not to believe there were at all any spirits, (which is very neere to direct Atheisme;) and thereby perhaps the more provoked others, to terme such men Daemoniacks, rather than mad-men.

But why then does our Saviour proceed in the curing of them, as if they were posset; and not as if they were mad. To which I can give no other kind of answer, but that which is given to those that urge the Scripture in like manner against the opinion of the motion of the Earth. The Scripture was written to shew unto men the kingdome of God; and to prepare their mindes to become his obedient subjects; leaving the world, and the Philosophy thereof, to the disputation of men, for the exercising of their naturall Reason. Whether the Earths, or Suns motion make the day, and night; or whether the Exorbitant actions of men, proceed from Passion, or from the Divell, (so we worship him not) it is all one, as to our obedience, and subjection to God Almighty; which is the thing for which the Scripture was written. As for that our Saviour speaketh to the disease, as to a person; it is the usuall phrase of all that cure by words onely, as Christ did, (and Inchanters pretend to do, whether they speak to a Divel or not.) For is not Christ also said (Math. 8.26.) to have rebuked the winds? Is not he said also (Luk. 4. 39.) to rebuke a Fever? Yet this does not argue that a Fever is a Divel. And whereas many of these Divels are said to confesse Christ; it is not necessary to interpret those places otherwise, than that those mad-men confessed him. And whereas our Saviour (Math. 12. 43.) speaketh of an unclean Spirit, that having gone out of a man, wandreth through dry places, seeking rest, and finding none; and returning into the same man, with seven other spirits worse than himselfe; It is manifestly a Parable, alluding to a man, that after a little endeavour to quit his lusts, is vanquished by the strength of them; and becomes seven times worse than he was. So that I see nothing at all in the Scripture, that requireth a beliefe, that Daemoniacks were any other thing but Mad-men.

Insignificant Speech

There is yet another fault in the Discourses of some men; which may also be numbred amongst the sorts of Madnesse; namely, that abuse of words, whereof I have spoken before in the fifth chapter, by the Name of Absurdity. And that is, when men speak such words, as put together, have in them no signification at all; but are fallen upon by some, through misunderstanding of the words they have received, and repeat by rote; by others, from intention to deceive by obscurity. And this is incident to none but those, that converse in questions of matters incomprehensible, as the Schoole-men; or in questions of abstruse Philosophy. The common sort of men seldome speak Insignificantly, and are therefore, by those other Egregious persons counted Idiots. But to be assured their words are without any thing correspondent to them in the mind, there would need some Examples; which if any man require, let him take a Schoole-man into his hands, and see if he can translate any one chapter concerning any difficult point; as the Trinity; the Deity; the nature of Christ; Transubstantiation; Free-will. &c. into any of the moderne tongues, so as to make the same intelligible; or into any tolerable Latine, such as they were acquainted withall, that lived when the Latine tongue was Vulgar. What is the meaning of these words. “The first cause does not necessarily inflow any thing into the second, by force of the Essential subordination of the second causes, by which it may help it to worke?” They are the Translation of the Title of the sixth chapter of Suarez first Booke, Of The Concourse, Motion, And Help Of God. When men write whole volumes of such stuffe, are they not Mad, or intend to make others so? And particularly, in the question of Transubstantiation; where after certain words spoken, they that say, the White-nesse, Round-nesse, Magni-tude, Quali-ty, Corruptibili-ty, all which are incorporeall, &c. go out of the Wafer, into the Body of our blessed Saviour, do they not make those Nesses, Tudes and Ties, to be so many spirits possessing his body? For by Spirits, they mean alwayes things, that being incorporeall, are neverthelesse moveable from one place to another. So that this kind of Absurdity,

may rightly be numbred amongst the many sorts of Madnesse; and all the time that guided by clear Thoughts of their worldly lust, they forbear disputing, or writing thus, but Lucide Intervals. And thus much of the Vertues and Defects Intellectual.

CHAPTER IX. OF THE SEVERALL SUBJECTS OF KNOWLEDGE

THERE ARE OF KNOWLEDGE two kinds; whereof one is Knowledge Of Fact: the other Knowledge Of The Consequence Of One Affirmation To Another. The former is nothing else, but Sense and Memory, and is Absolute Knowledge; as when we see a Fact doing, or remember it done: And this is the Knowledge required in a Witnesse. The later is called Science; and is Conditionall; as when we know, that, If The Figure Showne Be A Circle, Then Any Straight Line Through The Centre Shall Divide It Into Two Equall Parts. And this is the Knowledge required in a Philosopher; that is to say, of him that pretends to Reasoning.

The Register of Knowledge Of Fact is called History. Whereof there be two sorts: one called Naturall History; which is the History of such Facts, or Effects of Nature, as have no Dependance on Mans Will; Such as are the Histories of Metals, Plants, Animals, Regions, and the like. The other, is Civill History; which is the History of the Voluntary Actions of men in Common-wealths.

The Registers of Science, are such Books as contain the Demonstrations of Consequences of one Affirmation, to another; and are commonly called Books of Philosophy; whereof the sorts are many, according to the diversity of the Matter; And may be divided in such manner as I have divided them in the following Table.

I. Science, that is, Knowledge of Consequences; which is called
also PHILOSOPHY

A. Consequences from Accidents of Bodies Naturall; which is
called NATURALL PHILOSOPHY

1. Consequences from the Accidents common to all Bodies Naturall;
which are Quantity, and Motion.

a. Consequences from Quantity, and Motion Indeterminate;
which, being the Principles or first foundation of
Philosophy, is called Philosophia Prima

PHILOSOPHIA PRIMA

b. Consequences from Motion, and Quantity Determined

1) Consequences from Quantity, and Motion Determined

a) By Figure, By Number

1] Mathematiques,

GEOMETRY

ARITHMETIQUE

2) Consequences from the Motion, and Quantity of Bodies in
Speciall

a) Consequences from the Motion, and Quantity of the
great parts of the World, as the Earth and Stars,

1] Cosmography

ASTRONOMY

GEOGRAPHY

- b) Consequences from the Motion of Speciall kinds, and Figures of Body,

1] Mechaniques, Doctrine of Weight

Science of
ENGINEERS
ARCHITECTURE
NAVIGATION

2. PHYSIQUES, or Consequences from Qualities

- a. Consequences from the Qualities of Bodies Transient, such as sometimes appear, sometimes vanish

METEOROLOGY

- b. Consequences from the Qualities of Bodies Permanent

1) Consequences from the Qualities of the Starres

- a) Consequences from the Light of the Starres. Out of this, and the Motion of the Sunne, is made the Science of

SCIOGRAPHY

- b) Consequences from the Influence of the Starres,

ASTROLOGY

2) Consequences of the Qualities from Liquid Bodies that fill the space between the Starres; such as are the Ayre, or substance aetherial.

3) Consequences from Qualities of Bodies Terrestrial

a) Consequences from parts of the Earth that are without Sense,

1] Consequences from Qualities of Minerals, as Stones, Metals, &c

2] Consequences from the Qualities of Vegetables

b) Consequences from Qualities of Animals

1] Consequences from Qualities of Animals in Generall

a] Consequences from Vision,

OPTIQUES

b] Consequences from Sounds,

MUSIQUE

c] Consequences from the rest of the senses

2] Consequences from Qualities of Men in Speciall

a] Consequences from Passions of Men,

ETHIQUES

b] Consequences from Speech,

i) In Magnifying, Vilifying, etc.

POETRY

ii) In Persuading,

RHETORIQUE

iii) In Reasoning,

LOGIQUE

iv) In Contracting,

The Science of

JUST and UNJUST

B. Consequences from the Accidents of Politique Bodies; which is called POLITIQUES, and CIVILL PHILOSOPHY

1. Of Consequences from the Institution of COMMON-WEALTHS, to the Rights, and Duties of the Body Politique, or Sovereign.

2. Of Consequences from the same, to the Duty and Right of the Subjects.

CHAPTER X. OF POWER, WORTH, DIGNITY, HONOUR AND WORTHINESS

Power

The POWER of a Man, (to take it Universally,) is his present means, to obtain some future apparent Good. And is either Originall, or Instrumentall.

Naturall Power, is the eminence of the Faculties of Body, or Mind: as extraordinary Strength, Forme, Prudence, Arts, Eloquence, Liberality, Nobility. Instrumentall are those Powers, which acquired by these, or by fortune, are means and Instruments to acquire more: as Riches, Reputation, Friends, and the Secret working of God, which men call Good Luck. For the nature of Power, is in this point, like to Fame, increasing as it proceeds; or like the motion of heavy bodies, which the further they go, make still the more hast.

The Greatest of humane Powers, is that which is compounded of the Powers of most men, united by consent, in one person, Naturall, or civill, that has the use of all their Powers depending on his will; such as is the Power of a Common-wealth: or depending on the wills of each particular; such as is the Power of a Faction, or of divers factions leagued. Therefore to have servants, is Power; To have Friends, is Power: for they are strengths united.

Also Riches joyned with liberality, is Power; because it procureth friends, and servants: Without liberality, not so; because in this case they defend not; but expose men to Envy, as a Prey.

Reputation of power, is Power; because it draweth with it the adhaerance of those that need protection.

So is Reputation of love of a mans Country, (called Popularity,) for the same Reason.

Also, what quality soever maketh a man beloved, or feared of many; or the reputation of such quality, is Power; because it is a means to have the assistance, and service of many.

Good successe is Power; because it maketh reputation of Wisdome, or good fortune; which makes men either feare him, or rely on him.

Affability of men already in power, is encrease of Power; because it gaineth love.

Reputation of Prudence in the conduct of Peace or War, is Power; because to prudent men, we commit the government of our selves, more willingly than to others.

Nobility is Power, not in all places, but onely in those Common-wealths, where it has Priviledges: for in such priviledges consisteth their Power.

Eloquence is Power; because it is seeming Prudence.

Forme is Power; because being a promise of Good, it recommendeth men to the favour of women and strangers.

The Sciences, are small Power; because not eminent; and therefore, not acknowledged in any man; nor are at all, but in a few; and in them, but of a few things. For Science is of that nature, as none can understand it to be, but such as in a good measure have attayned it.

Arts of publique use, as Fortification, making of Engines, and other Instruments of War; because they conferre to Defence, and Victory, are Power; And though the true Mother of them, be Science, namely the Mathematicques; yet, because they are brought into the Light, by the hand of the Artificer, they be esteemed (the Midwife passing with the vulgar for the Mother,) as his issue.

Worth

The Value, or WORTH of a man, is as of all other things, his Price; that is to say, so much as would be given for the use of his Power: and therefore is not absolute;

but a thing dependant on the need and judgement of another. An able conductor of Souldiers, is of great Price in time of War present, or imminent; but in Peace not so. A learned and uncorrupt Judge, is much Worth in time of Peace; but not so much in War. And as in other things, so in men, not the seller, but the buyer determines the Price. For let a man (as most men do,) rate themselves as the highest Value they can; yet their true Value is no more than it is esteemed by others.

The manifestation of the Value we set on one another, is that which is commonly called Honouring, and Dishonouring. To Value a man at a high rate, is to Honour him; at a low rate, is to Dishonour him. But high, and low, in this case, is to be understood by comparison to the rate that each man setteth on himselfe.

Dignity

The publique worth of a man, which is the Value set on him by the Commonwealth, is that which men commonly call DIGNITY. And this Value of him by the Common-wealth, is understood, by offices of Command, Judicature, publike Employment; or by Names and Titles, introduced for distinction of such Value.

To Honour and Dishonour

To pray to another, for ayde of any kind, is to HONOUR; because a signe we have an opinion he has power to help; and the more difficult the ayde is, the more is the Honour.

To obey, is to Honour; because no man obeyes them, whom they think have no power to help, or hurt them. And consequently to disobey, is to Dishonour.

To give great gifts to a man, is to Honour him; because 'tis buying of Protection, and acknowledging of Power. To give little gifts, is to Dishonour;

because it is but Almes, and signifies an opinion of the need of small helps. To be sedulous in promoting anothers good; also to flatter, is to Honour; as a signe we seek his protection or ayde. To neglect, is to Dishonour.

To give way, or place to another, in any Commodity, is to Honour; being a confession of greater power. To arrogate, is to Dishonour.

To shew any signe of love, or feare of another, is to Honour; for both to love, and to feare, is to value. To contemne, or lesse to love or feare then he expects, is to Dishonour; for 'tis undervaluing.

To praise, magnifie, or call happy, is to Honour; because nothing but goodnesse, power, and felicity is valued. To revile, mock, or pittie, is to Dishonour.

To speak to another with consideration, to appear before him with decency, and humility, is to Honour him; as signes of fear to offend. To speak to him rashly, to do anything before him obscenely, slovenly, impudently, is to Dishonour.

To believe, to trust, to rely on another, is to Honour him; signe of opinion of his vertue and power. To distrust, or not believe, is to Dishonour.

To hearken to a mans counsell, or discourse of what kind soever, is to Honour; as a signe we think him wise, or eloquent, or witty. To sleep, or go forth, or talk the while, is to Dishonour.

To do those things to another, which he takes for signes of Honour, or which the Law or Custome makes so, is to Honour; because in approving the Honour done by others, he acknowledgeth the power which others acknowledge. To refuse to do them, is to Dishonour.

To agree with in opinion, is to Honour; as being a signe of approving his judgement, and wisdom. To dissent, is Dishonour; and an upbraiding of error; and (if the dissent be in many things) of folly.

To imitate, is to Honour; for it is vehemently to approve. To imitate ones Enemy, is to Dishonour.

To honour those another honours, is to Honour him; as a signe of approbation of his judgement. To honour his Enemies, is to Dishonour him.

To employ in counsell, or in actions of difficulty, is to Honour; as a signe of opinion of his wisdom, or other power. To deny employment in the same cases, to those that seek it, is to Dishonour.

All these wayes of Honouring, are naturall; and as well within, as without Common-wealths. But in Common-wealths, where he, or they that have the supreme Authority, can make whatsoever they please, to stand for signes of Honour, there be other Honours.

A Sovereigne doth Honour a Subject, with whatsoever Title, or Office, or Employment, or Action, that he himselfe will have taken for a signe of his will to Honour him.

The King of Persia, Honoured Mordecay, when he appointed he should be conducted through the streets in the Kings Garment, upon one of the Kings Horses, with a Crown on his head, and a Prince before him, proclayming, "Thus shall it be done to him that the King will honour." And yet another King of Persia, or the same another time, to one that demanded for some great service, to weare one of the Kings robes, gave him leave so to do; but with his addition, that he should weare it as the Kings foole; and then it was Dishonour. So that of Civill Honour; such as are Magistracy, Offices, Titles; and in some places Coats, and Scutchions painted: and men Honour such as have them, as having so many signes of favour in the Common-wealth; which favour is Power.

Honourable is whatsoever possession, action, or quality, is an argument and signe of Power.

And therefore To be Honoured, loved, or feared of many, is Honourable; as arguments of Power. To be Honoured of few or none, Dishonourable.

Good fortune (if lasting,) Honourable; as a signe of the favour of God. Ill fortune, and losses, Dishonourable. Riches, are Honourable; for they are Power. Poverty, Dishonourable. Magnanimity, Liberality, Hope, Courage, Confidence, are Honourable; for they proceed from the conscience of Power. Pusillanimity, Parsimony, Fear, Diffidence, are Dishonourable.

Timely Resolution, or determination of what a man is to do, is Honourable; as being the contempt of small difficulties, and dangers. And Irresolution, Dishonourable; as a signe of too much valuing of little impediments, and little advantages: For when a man has weighed things as long as the time permits, and resolves not, the difference of weight is but little; and therefore if he resolve not, he overvalues little things, which is Pusillanimity.

All Actions, and Speeches, that proceed, or seem to proceed from much Experience, Science, Discretion, or Wit, are Honourable; For all these are Powers. Actions, or Words that proceed from Errour, Ignorance, or Folly, Dishonourable.

Gravity, as farre forth as it seems to proceed from a mind employed on some thing else, is Honourable; because employment is a signe of Power. But if it seem to proceed from a purpose to appear grave, it is Dishonourable. For the gravity of the Former, is like the steddinesse of a Ship laden with Merchandise; but of the later, like the steddinesse of a Ship ballasted with Sand, and other trash.

To be Conspicuous, that is to say, to be known, for Wealth, Office, great Actions, or any eminent Good, is Honourable; as a signe of the power for which he is conspicuous. On the contrary, Obscurity, is Dishonourable.

To be descended from conspicuous Parents, is Honourable; because they the more easily attain the aydes, and friends of their Ancestors. On the contrary, to be descended from obscure Parentage, is Dishonourable.

Actions proceeding from Equity, joyned with losse, are Honourable; as signes of Magnanimity: for Magnanimity is a signe of Power. On the contrary, Craft, Shifting, neglect of Equity, is Dishonourable.

Nor does it alter the case of Honour, whether an action (so it be great and difficult, and consequently a signe of much power,) be just or unjust: for Honour consisteth onely in the opinion of Power. Therefore the ancient Heathen did not thinke they Dishonoured, but greatly Honoured the Gods, when they introduced them in their Poems, committing Rapes, Thefts, and other great, but unjust, or unclean acts: In so much as nothing is so much celebrated in Jupiter, as his Adulteries; nor in Mercury, as his Frauds, and Thefts: of whose praises, in a

hymne of Homer, the greatest is this, that being born in the morning, he had invented Musique at noon, and before night, stolen away the Cattell of Appollo, from his Herdsmen.

Also amongst men, till there were constituted great Common-wealths, it was thought no dishonour to be a Pyrate, or a High-way Theefe; but rather a lawfull Trade, not onely amongst the Greeks, but also amongst all other Nations; as is manifest by the Histories of antient time. And at this day, in this part of the world, private Duels are, and alwayes will be Honourable, though unlawfull, till such time as there shall be Honour ordained for them that refuse, and Ignominy for them that make the Challenge. For Duels also are many times effects of Courage; and the ground of Courage is alwayes Strength or Skill, which are Power; though for the most part they be effects of rash speaking, and of the fear of Dishonour, in one, or both the Combatants; who engaged by rashnesse, are driven into the Lists to avoyd disgrace.

Scutchions, and coats of Armes haereditary, where they have any eminent Priviledges, are Honourable; otherwise not: for their Power consisteth either in such Priviledges, or in Riches, or some such thing as is equally honoured in other men. This kind of Honour, commonly called Gentry, has been derived from the Antient Germans. For there never was any such thing known, where the German Customes were unknown. Nor is it now any where in use, where the Germans have not inhabited. The antient Greek Commanders, when they went to war, had their Shields painted with such Devises as they pleased; insomuch as an unpainted Buckler was a signe of Poverty, and of a common Souldier: but they transmitted not the Inheritance of them. The Romans transmitted the Marks of their Families: but they were the Images, not the Devises of their Ancestors. Amongst the people of Asia, Afrique, and America, there is not, nor was ever, any such thing. The Germans onely had that custome; from whom it has been derived into England, France, Spain, and Italy, when in great numbers they either ayded the Romans, or made their own Conquests in these Westernne parts of the world.

For Germany, being antiently, as all other Countries, in their beginnings, divided amongst an infinite number of little Lords, or Masters of Families, that continually had wars one with another; those Masters, or Lords, principally to the end they might, when they were Covered with Arms, be known by their followers; and partly for ornament, both painted their Armor, or their Scutchion, or Coat, with the picture of some Beast, or other thing; and also put some eminent and visible mark upon the Crest of their Helmets. And his ornament both of the Armes, and Crest, descended by inheritance to their Children; to the eldest pure, and to the rest with some note of diversity, such as the Old master, that is to say in Dutch, the Here-alt thought fit. But when many such Families, joyned together, made a greater Monarchy, this duty of the Herealt, to distinguish Scutchions, was made a private Office a part. And the issue of these Lords, is the great and antient Gentry; which for the most part bear living creatures, noted for courage, and rapine; or Castles, Battlements, Belts, Weapons, Bars, Palisadoes, and other notes of War; nothing being then in honour, but vertue military. Afterwards, not onely Kings, but popular Common-wealths, gave divers manners of Scutchions, to such as went forth to the War, or returned from it, for encouragement, or recompence to their service. All which, by an observing Reader, may be found in such ancient Histories, Greek and Latine, as make mention of the German Nation, and Manners, in their times.

Titles of Honour

Titles of Honour, such as are Duke, Count, Marquis, and Baron, are Honourable; as signifying the value set upon them by the Sovereigne Power of the Common-wealth: Which Titles, were in old time titles of Office, and Command, derived some from the Romans, some from the Germans, and French. Dukes, in Latine Duces, being Generalls in War: Counts, Comites, such as bare the Generall company out of friendship; and were left to govern and defend places conquered,

and pacified: Marquises, Marchiones, were Counts that governed the Marches, or bounds of the Empire. Which titles of Duke, Count, and Marquis, came into the Empire, about the time of Constantine the Great, from the customes of the German Militia. But Baron, seems to have been a Title of the Gaules, and signifies a Great man; such as were the Kings, or Princes men, whom they employed in war about their persons; and seems to be derived from Vir, to Ber, and Bar, that signified the same in the Language of the Gaules, that Vir in Latine; and thence to Bero, and Baro: so that such men were called Berones, and after Barones; and (in Spanish) Varones. But he that would know more particularly the originall of Titles of Honour, may find it, as I have done this, in Mr. Seldens most excellent Treatise of that subject. In processe of time these offices of Honour, by occasion of trouble, and for reasons of good and peacable government, were turned into meer Titles; serving for the most part, to distinguish the precedence, place, and order of subjects in the Common-wealth: and men were made Dukes, Counts, Marquises, and Barons of Places, wherein they had neither possession, nor command: and other Titles also, were devised to the same end.

Worthinesse Fitnessse

WORTHINESSE, is a thing different from the worth, or value of a man; and also from his merit, or desert; and consisteth in a particular power, or ability for that, whereof he is said to be worthy: which particular ability, is usually named FITNESSSE, or Aptitude.

For he is Worthiest to be a Commander, to be a Judge, or to have any other charge, that is best fitted, with the qualities required to the well discharging of it; and Worthiest of Riches, that has the qualities most requisite for the well using of them: any of which qualities being absent, one may neverthelesse be a Worthy man, and valuable for some thing else. Again, a man may be Worthy of Riches, Office, and Employment, that neverthelesse, can plead no right to have it before

another; and therefore cannot be said to merit or deserve it. For Merit, praesupposeth a right, and that the thing deserved is due by promise: Of which I shall say more hereafter, when I shall speak of Contracts.

CHAPTER XI. OF THE DIFFERENCE OF MANNERS

What Is Here Meant By Manners

By MANNERS, I mean not here, Decency of behaviour; as how one man should salute another, or how a man should wash his mouth, or pick his teeth before company, and such other points of the Small Morals; But those qualities of mankind, that concern their living together in Peace, and Unity. To which end we are to consider, that the Felicity of this life, consisteth not in the repose of a mind satisfied. For there is no such *Finis Ultimus*, (utmost ayme,) nor *Summum Bonum*, (greatest good,) as is spoken of in the Books of the old Morall Philosophers. Nor can a man any more live, whose Desires are at an end, than he, whose Senses and Imaginations are at a stand. Felicity is a continuall progresse of the desire, from one object to another; the attaining of the former, being still but the way to the later. The cause whereof is, That the object of mans desire, is not to enjoy once onely, and for one instant of time; but to assure for ever, the way of his future desire. And therefore the voluntary actions, and inclinations of all men, tend, not only to the procuring, but also to the assuring of a contented life; and differ onely in the way: which ariseth partly from the diversity of passions, in divers men; and partly from the difference of the knowledge, or opinion each one has of the causes, which produce the effect desired.

A Restlesse Desire Of Power, In All Men

So that in the first place, I put for a generall inclination of all mankind, a perpetuall and restlesse desire of Power after power, that ceaseth onely in Death.

And the cause of this, is not alwayes that a man hopes for a more intensive delight, than he has already attained to; or that he cannot be content with a moderate power: but because he cannot assure the power and means to live well, which he hath present, without the acquisition of more. And from hence it is, that Kings, whose power is greatest, turn their endeavours to the assuring it at home by Lawes, or abroad by Wars: and when that is done, there succeedeth a new desire; in some, of Fame from new Conquest; in others, of ease and sensuall pleasure; in others, of admiration, or being flattered for excellence in some art, or other ability of the mind.

Love Of Contention From Competition

Competition of Riches, Honour, command, or other power, enclineth to Contention, Enmity, and War: because the way of one Competitor, to the attaining of his desire, is to kill, subdue, supplant, or repell the other. Particularly, competition of praise, enclineth to a reverence of Antiquity. For men contend with the living, not with the dead; to these ascribing more than due, that they may obscure the glory of the other.

Civil Obedience From Love Of Ease

Desire of Ease, and sensuall Delight, disposeth men to obey a common Power: because by such Desires, a man doth abandon the protection might be hoped for from his own Industry, and labour.

From Feare Of Death Or Wounds

Fear of Death, and Wounds, disposeth to the same; and for the same reason. On the contrary, needy men, and hardy, not contented with their present condition; as also, all men that are ambitious of Military command, are enclined to continue the causes of warre; and to stirre up trouble and sedition: for there is no honour Military but by warre; nor any such hope to mend an ill game, as by causing a new shuffle.

And From Love Of Arts

Desire of Knowledge, and Arts of Peace, enclineth men to obey a common Power: For such Desire, containeth a desire of leasure; and consequently protection from some other Power than their own.

Love Of Vertue, From Love Of Praise

Desire of Praise, disposeth to laudable actions, such as please them whose judgement they value; for of these men whom we contemn, we contemn also the Praises. Desire of Fame after death does the same. And though after death, there be no sense of the praise given us on Earth, as being joyes, that are either swallowed up in the unspeakable joyes of Heaven, or extinguished in the extreme torments of Hell: yet is not such Fame vain; because men have a present delight therein, from the foresight of it, and of the benefit that may rebound thereby to their posterity: which though they now see not, yet they imagine; and any thing that is pleasure in the sense, the same also is pleasure in the imagination.

Hate, From Difficulty Of Requiting Great Benefits

To have received from one, to whom we think our selves equall, greater benefits than there is hope to Requite, disposeth to counterfiet love; but really secret hatred; and puts a man into the estate of a desperate debtor, that in declining the sight of his creditor, tacitely wishes him there, where he might never see him more. For benefits oblige; and obligation is thralldome; which is to ones equall, hateful. But to have received benefits from one, whom we acknowledge our superiour, enclines to love; because the obligation is no new depression: and cheerfull acceptation, (which men call Gratitude,) is such an honour done to the obliger, as is taken generally for retribution. Also to receive benefits, though from an equall, or inferiour, as long as there is hope of requitall, disposeth to love: for in the intention of the receiver, the obligation is of ayd, and service mutuall; from whence proceedeth an Emulation of who shall exceed in benefiting; the most noble and profitable contention possible; wherein the victor is pleased with his victory, and the other revenged by confessing it.

And From Conscience Of Deserving To Be Hated

To have done more hurt to a man, than he can, or is willing to expiate, enclineth the doer to hate the sufferer. For he must expect revenge, or forgiveness; both which are hatefull.

Promptnesse To Hurt, From Fear

Feare of oppression, disposeth a man to anticipate, or to seek ayd by society: for there is no other way by which a man can secure his life and liberty.

And From Distrust Of Their Own Wit

Men that distrust their own subtilty, are in tumult, and sedition, better disposed for victory, than they that suppose themselves wise, or crafty. For these love to consult, the other (fearing to be circumvented,) to strike first. And in sedition, men being alwayes in the procincts of Battell, to hold together, and use all advantages of force, is a better stratagem, than any that can proceed from subtilty of Wit.

Vain Undertaking From Vain-glory

Vain-glorious men, such as without being conscious to themselves of great sufficiency, delight in supposing themselves gallant men, are enclined onely to ostentation; but not to attempt: Because when danger or difficulty appears, they look for nothing but to have their insufficiency discovered.

Vain-glorious men, such as estimate their sufficiency by the flattery of other men, or the fortune of some precedent action, without assured ground of hope from the true knowledge of themselves, are enclined to rash engaging; and in the approach of danger, or difficulty, to retire if they can: because not seeing the way of safety, they will rather hazard their honour, which may be salved with an excuse; than their lives, for which no salve is sufficient.

Ambition, From Opinion Of Sufficiency

Men that have a strong opinion of their own wisdom in matter of government, are disposed to Ambition. Because without publique Employment in counsell or magistracy, the honour of their wisdom is lost. And therefore Eloquent speakers

are enclined to Ambition; for Eloquence seemeth wisdom, both to themselves and others

Irresolution, From Too Great Valuing Of Small Matters

Pusillanimity disposeth men to Irresolution, and consequently to lose the occasions, and fittest opportunities of action. For after men have been in deliberation till the time of action approach, if it be not then manifest what is best to be done, tis a signe, the difference of Motives, the one way and the other, are not great: Therefore not to resolve then, is to lose the occasion by weighing of trifles; which is pusillanimity.

Frugality,(though in poor men a Vertue,) maketh a man unapt to atchieve such actions, as require the strength of many men at once: For it weakeneth their Endeavour, which is to be nourished and kept in vigor by Reward.

Confidence In Others From Ignorance Of The Marks Of Wisdom and Kindnesse Eloquence, with flattery, disposeth men to confide in them that have it; because the former is seeming Wisdom, the later seeming Kindnesse. Adde to them Military reputation, and it disposeth men to adhaere, and subject themselves to those men that have them. The two former, having given them caution against danger from him; the later gives them caution against danger from others.

And From The Ignorance Of Naturall Causes

Want of Science, that is, Ignorance of causes, disposeth, or rather constraineth a man to rely on the advise, and authority of others. For all men whom the truth concernes, if they rely not on their own, must rely on the opinion of some other, whom they think wiser than themselves, and see not why he should deceive them.

And From Want Of Understanding

Ignorance of the signification of words; which is, want of understanding, disposeth men to take on trust, not onely the truth they know not; but also the errors; and which is more, the non-sense of them they trust: For neither Error, nor non-sense, can without a perfect understanding of words, be detected.

From the same it proceedeth, that men give different names, to one and the same thing, from the difference of their own passions: As they that approve a private opinion, call it Opinion; but they that mislike it, Haeresie: and yet haeresie signifies no more than private opinion; but has onely a greater tincture of choler.

From the same also it proceedeth, that men cannot distinguish, without study and great understanding, between one action of many men, and many actions of one multitude; as for example, between the one action of all the Senators of Rome in killing Catiline, and the many actions of a number of Senators in killing Caesar; and therefore are disposed to take for the action of the people, that which is a multitude of actions done by a multitude of men, led perhaps by the perswasion of one.

Adhaerence To Custome, From Ignorance Of The Nature Of Right And Wrong Ignorance of the causes, and originall constitution of Right, Equity, Law, and Justice, disposeth a man to make Custome and Example the rule of his actions; in such manner, as to think that Unjust which it hath been the custome to punish; and that Just, of the impunity and approbation whereof they can produce an Example, or (as the Lawyers which onely use the false measure of Justice barbarously call it) a Precedent; like little children, that have no other rule of good and evill manners, but the correction they receive from their Parents, and Masters; save that children are constant to their rule, whereas men are not so; because grown strong, and stubborn, they appeale from custome to reason, and from reason to custome, as it serves their turn; receding from custome when their interest requires it, and

setting themselves against reason, as oft as reason is against them: Which is the cause, that the doctrine of Right and Wrong, is perpetually disputed, both by the Pen and the Sword: whereas the doctrine of Lines, and Figures, is not so; because men care not, in that subject what be truth, as a thing that crosses no mans ambition, profit, or lust. For I doubt not, but if it had been a thing contrary to any mans right of dominion, or to the interest of men that have dominion, That The Three Angles Of A Triangle Should Be Equall To Two Angles Of A Square; that doctrine should have been, if not disputed, yet by the burning of all books of Geometry, suppressed, as farre as he whom it concerned was able.

Adhaerence To Private Men, From Ignorance Of The Causes Of Peace
Ignorance of remote causes, disposeth men to attribute all events, to the causes immediate, and Instrumentall: For these are all the causes they perceive. And hence it comes to passe, that in all places, men that are grieved with payments to the Publique, discharge their anger upon the Publicans, that is to say, Farmers, Collectors, and other Officers of the publique Revenue; and adhaere to such as find fault with the publike Government; and thereby, when they have engaged themselves beyond hope of justification, fall also upon the Supreme Authority, for feare of punishment, or shame of receiving pardon.

Credulity From Ignorance Of Nature

Ignorance of naturall causes disposeth a man to Credulity, so as to believe many times impossibilities: for such know nothing to the contrary, but that they may be true; being unable to detect the Impossibility. And Credulity, because men love to be hearkened unto in company, disposeth them to lying: so that Ignorance it selfe without Malice, is able to make a man bothe to believe lyes, and tell them; and sometimes also to invent them.

Curiosity To Know, From Care Of Future Time

Anxiety for the future time, disposeth men to enquire into the causes of things: because the knowledge of them, maketh men the better able to order the present to their best advantage.

Naturall Religion, From The Same

Curiosity, or love of the knowledge of causes, draws a man from consideration of the effect, to seek the cause; and again, the cause of that cause; till of necessity he must come to this thought at last, that there is some cause, whereof there is no former cause, but is eternall; which is it men call God. So that it is impossible to make any profound enquiry into naturall causes, without being enclined thereby to believe there is one God Eternall; though they cannot have any Idea of him in their mind, answerable to his nature. For as a man that is born blind, hearing men talk of warming themselves by the fire, and being brought to warm himself by the same, may easily conceive, and assure himselfe, there is somewhat there, which men call Fire, and is the cause of the heat he feeles; but cannot imagine what it is like; nor have an Idea of it in his mind, such as they have that see it: so also, by the visible things of this world, and their admirable order, a man may conceive there is a cause of them, which men call God; and yet not have an Idea, or Image of him in his mind.

And they that make little, or no enquiry into the naturall causes of things, yet from the feare that proceeds from the ignorance it selfe, of what it is that hath the power to do them much good or harm, are enclined to suppose, and feign unto themselves, severall kinds of Powers Invisible; and to stand in awe of their own imaginations; and in time of distresse to invoke them; as also in the time of an expected good successe, to give them thanks; making the creatures of their own fancy, their Gods. By which means it hath come to passe, that from the

innumerable variety of Fancy, men have created in the world innumerable sorts of Gods. And this Feare of things invisible, is the naturall Seed of that, which every one in himself calleth Religion; and in them that worship, or feare that Power otherwise than they do, Superstition.

And this seed of Religion, having been observed by many; some of those that have observed it, have been enclined thereby to nourish, dresse, and forme it into Lawes; and to adde to it of their own invention, any opinion of the causes of future events, by which they thought they should best be able to govern others, and make unto themselves the greatest use of their Powers.

CHAPTER XII. OF RELIGION

Religion, In Man Onely

Seeing there are no signes, nor fruit of Religion, but in Man onely; there is no cause to doubt, but that the seed of Religion, is also onely in Man; and consisteth in some peculiar quality, or at least in some eminent degree thereof, not to be found in other Living creatures.

First, From His Desire Of Knowing Causes

And first, it is peculiar to the nature of Man, to be inquisitive into the Causes of the Events they see, some more, some lesse; but all men so much, as to be curious in the search of the causes of their own good and evill fortune.

From The Consideration Of The Beginning Of Things

Secondly, upon the sight of any thing that hath a Beginning, to think also it had a cause, which determined the same to begin, then when it did, rather than sooner or later.

From His Observation Of The Sequell Of Things

Thirdly, whereas there is no other Felicity of Beasts, but the enjoying of their quotidian Food, Ease, and Lusts; as having little, or no foresight of the time to come, for want of observation, and memory of the order, consequence, and dependance of the things they see; Man observeth how one Event hath been produced by another; and remembreth in them Antecedence and Consequence; And when he cannot assure himselfe of the true causes of things, (for the causes of good and evill fortune for the most part are invisible,) he supposes causes of them, either such as his own fancy suggesteth; or trusteth to the Authority of other men, such as he thinks to be his friends, and wiser than himselfe.

The Naturall Cause Of Religion, The Anxiety Of The Time To Come The two first, make Anxiety. For being assured that there be causes of all things that have arrived hitherto, or shall arrive hereafter; it is impossible for a man, who continually endeavoureth to secure himselfe against the evill he feares, and procure the good he desireth, not to be in a perpetuall solicitude of the time to come; So that every man, especially those that are over provident, are in an estate like to that of Prometheus. For as Prometheus, (which interpreted, is, The Prudent Man,) was bound to the hill Caucasus, a place of large prospect, where, an Eagle feeding on his liver, devoured in the day, as much as was repayed in the night: So that man, which looks too far before him, in the care of future time, hath his heart all the day long, gnawed on by feare of death, poverty, or other calamity; and has no repose, nor pause of his anxiety, but in sleep.

Which Makes Them Fear The Power Of Invisible Things

This perpetuall feare, alwayes accompanying mankind in the ignorance of causes, as it were in the Dark, must needs have for object something. And therefore when there is nothing to be seen, there is nothing to accuse, either of their good, or evill fortune, but some Power, or Agent Invisible: In which sense perhaps it was, that some of the old Poets said, that the Gods were at first created by humane Feare:

which spoken of the Gods, (that is to say, of the many Gods of the Gentiles) is very true. But the acknowledging of one God Eternall, Infinite, and Omnipotent, may more easily be derived, from the desire men have to know the causes of naturall bodies, and their severall vertues, and operations; than from the feare of what was to befall them in time to come. For he that from any effect hee seeth come to passe, should reason to the next and immediate cause thereof, and from thence to the cause of that cause, and plunge himselfe profoundly in the pursuit of causes; shall at last come to this, that there must be (as even the Heathen Philosophers confessed) one First Mover; that is, a First, and an Eternall cause of all things; which is that which men mean by the name of God: And all this without thought of their fortune; the solicitude whereof, both enclines to fear, and hinders them from the search of the causes of other things; and thereby gives occasion of feigning of as many Gods, as there be men that feigne them.

And Suppose Them Incorporeall

And for the matter, or substance of the Invisible Agents, so fancyed; they could not by naturall cogitation, fall upon any other conceipt, but that it was the same with that of the Soule of man; and that the Soule of man, was of the same substance, with that which appeareth in a Dream, to one that sleepeth; or in a Looking-glasse, to one that is awake; which, men not knowing that such apparitions are nothing else but creatures of the Fancy, think to be reall, and externall Substances; and therefore call them Ghosts; as the Latines called them Imagines, and Umbrae; and thought them Spirits, that is, thin aereall bodies; and those Invisible Agents, which they feared, to bee like them; save that they appear, and vanish when they please. But the opinion that such Spirits were Incorporeall, or Immateriall, could never enter into the mind of any man by nature; because, though men may put together words of contradictory signification, as Spirit, and Incorporeall; yet they can never have the imagination of any thing answering to

them: And therefore, men that by their own meditation, arrive to the acknowledgement of one Infinite, Omnipotent, and Eternall God, choose rather to confesse he is Incomprehensible, and above their understanding; than to define his Nature By Spirit Incorporeall, and then Confesse their definition to be unintelligible: or if they give him such a title, it is not Dogmatically, with intention to make the Divine Nature understood; but Piously, to honour him with attributes, of significations, as remote as they can from the grossnesse of Bodies Visible.

But Know Not The Way How They Effect Anything

Then, for the way by which they think these Invisible Agents wrought their effects; that is to say, what immediate causes they used, in bringing things to passe, men that know not what it is that we call Causing, (that is, almost all men) have no other rule to guesse by, but by observing, and remembring what they have seen to precede the like effect at some other time, or times before, without seeing between the antecedent and subsequent Event, any dependance or connexion at all: And therefore from the like things past, they expect the like things to come; and hope for good or evill luck, superstitiously, from things that have no part at all in the causing of it: As the Athenians did for their war at Lepanto, demand another Phormio; the Pompeian faction for their warre in Afrique, another Scipio; and others have done in divers other occasions since. In like manner they attribute their fortune to a stander by, to a lucky or unlucky place, to words spoken, especially if the name of God be amongst them; as Charming, and Conjuring (the Leiturgy of Witches;) insomuch as to believe, they have power to turn a stone into bread, bread into a man, or any thing, into any thing.

But Honour Them As They Honour Men

Thirdly, for the worship which naturally men exhibite to Powers invisible, it can be no other, but such expressions of their reverence, as they would use towards men; Gifts, Petitions, Thanks, Submission of Body, Considerate Addresses, sober Behaviour, premeditated Words, Swearing (that is, assuring one another of their promises,) by invoking them. Beyond that reason suggesteth nothing; but leaves them either to rest there; or for further ceremonies, to rely on those they believe to be wiser than themselves.

And Attribute To Them All Extraordinary Events

Lastly, concerning how these Invisible Powers declare to men the things which shall hereafter come to passe, especially concerning their good or evill fortune in generall, or good or ill successe in any particular undertaking, men are naturally at a stand; save that using to conjecture of the time to come, by the time past, they are very apt, not onely to take casuall things, after one or two encounters, for Prognostiques of the like encounter ever after, but also to believe the like Prognostiques from other men, of whom they have once conceived a good opinion.

Foure Things, Naturall Seeds Of Religion

And in these foure things, Opinion of Ghosts, Ignorance of second causes, Devotion towards what men fear, and Taking of things Casuall for Prognostiques, consisteth the Naturall seed of Religion; which by reason of the different Fancies, Judgements, and Passions of severall men, hath grown up into ceremonies so

different, that those which are used by one man, are for the most part ridiculous to another.

Made Different By Culture

For these seeds have received culture from two sorts of men. One sort have been they, that have nourished, and ordered them, according to their own invention. The other, have done it, by Gods commandement, and direction: but both sorts have done it, with a purpose to make those men that relyed on them, the more apt to Obedience, Lawes, Peace, Charity, and civill Society. So that the Religion of the former sort, is a part of humane Politiques; and teacheth part of the duty which Earthly Kings require of their Subjects. And the Religion of the later sort is Divine Politiques; and containeth Precepts to those that have yeelded themselves subjects in the Kingdome of God. Of the former sort, were all the Founders of Common-wealths, and the Law-givers of the Gentiles: Of the later sort, were Abraham, Moses, and our Blessed Saviour; by whom have been derived unto us the Lawes of the Kingdome of God.

The Absurd Opinion Of Gentilisme

And for that part of Religion, which consisteth in opinions concerning the nature of Powers Invisible, there is almost nothing that has a name, that has not been esteemed amongst the Gentiles, in one place or another, a God, or Divell; or by their Poets feigned to be inanimated, inhabited, or possessed by some Spirit or other.

The unformed matter of the World, was a God, by the name of Chaos.

The Heaven, the Ocean, the Planets, the Fire, the Earth, the Winds, were so many Gods.

Men, Women, a Bird, a Crocodile, a Calf, a Dogge, a Snake, an Onion, a Leeke, Deified. Besides, that they filled almost all places, with spirits called Daemons; the plains, with Pan, and Panises, or Satyres; the Woods, with Fawnes, and Nymphs; the Sea, with Tritons, and other Nymphs; every River, and Fountayn, with a Ghost of his name, and with Nymphs; every house, with it Lares, or Familiars; every man, with his Genius; Hell, with Ghosts, and spirituall Officers, as Charon, Cerberus, and the Furies; and in the night time, all places with Larvae, Lemures, Ghosts of men deceased, and a whole kingdome of Fayries, and Bugbears. They have also ascribed Divinity, and built Temples to meer Accidents, and Qualities; such as are Time, Night, Day, Peace, Concord, Love, Contention, Vertue, Honour, Health, Rust, Fever, and the like; which when they prayed for, or against, they prayed to, as if there were Ghosts of those names hanging over their heads, and letting fall, or withholding that Good, or Evill, for, or against which they prayed. They invoked also their own Wit, by the name of Muses; their own Ignorance, by the name of Fortune; their own Lust, by the name of Cupid; their own Rage, by the name Furies; their own privy members by the name of Priapus; and attributed their pollutions, to Incubi, and Succubae: insomuch as there was nothing, which a Poet could introduce as a person in his Poem, which they did not make either a God, or a Divel.

The same authors of the Religion of the Gentiles, observing the second ground for Religion, which is mens Ignorance of causes; and thereby their aptnesse to attribute their fortune to causes, on which there was no dependence at all apparent, took occasion to obtrude on their ignorance, in stead of second causes, a kind of second and ministeriall Gods; ascribing the cause of Foecundity, to Venus; the cause of Arts, to Apollo; of Subtilty and Craft, to Mercury; of Tempests and stormes, to Aeolus; and of other effects, to other Gods: insomuch as there was amongst the Heathen almost as great variety of Gods, as of businesse.

And to the Worship, which naturally men conceived fit to bee used towards their Gods, namely Oblations, Prayers, Thanks, and the rest formerly named; the same Legislators of the Gentiles have added their Images, both in Picture, and

Sculpture; that the more ignorant sort, (that is to say, the most part, or generality of the people,) thinking the Gods for whose representation they were made, were really included, and as it were housed within them, might so much the more stand in feare of them: And endowed them with lands, and houses, and officers, and revenues, set apart from all other humane uses; that is, consecrated, and made holy to those their Idols; as Caverns, Groves, Woods, Mountains, and whole Ilands; and have attributed to them, not onely the shapes, some of Men, some of Beasts, some of Monsters; but also the Faculties, and Passions of men and beasts; as Sense, Speech, Sex, Lust, Generation, (and this not onely by mixing one with another, to propagate the kind of Gods; but also by mixing with men, and women, to beget mongrill Gods, and but inmates of Heaven, as Bacchus, Hercules, and others;) besides, Anger, Revenge, and other passions of living creatures, and the actions proceeding from them, as Fraud, Theft, Adultery, Sodomie, and any vice that may be taken for an effect of Power, or a cause of Pleasure; and all such Vices, as amongst men are taken to be against Law, rather than against Honour.

Lastly, to the Prognostiques of time to come; which are naturally, but Conjectures upon the Experience of time past; and supernaturall, divine Revelation; the same authors of the Religion of the Gentiles, partly upon pretended Experience, partly upon pretended Revelation, have added innumerable other superstitious wayes of Divination; and made men believe they should find their fortunes, sometimes in the ambiguous or senslesse answers of the priests at Delphi, Delos, Ammon, and other famous Oracles; which answers, were made ambiguous by designe, to own the event both wayes; or absurd by the intoxicating vapour of the place, which is very frequent in sulphurous Cavernes: Sometimes in the leaves of the Sibills; of whose Prophecyes (like those perhaps of Nostradamus; for the fragments now extant seem to be the invention of later times) there were some books in reputation in the time of the Roman Republique: Sometimes in the insignificant Speeches of Mad-men, supposed to be possessed with a divine Spirit; which Possession they called Enthusiasme; and these kinds of foretelling events, were accounted Theomancy, or Prophecy; Sometimes in the

aspect of the Starres at their Nativity; which was called Horoscopy, and esteemed a part of judiciary Astrology: Sometimes in their own hopes and feares, called Thumomancy, or Presage: Sometimes in the Prediction of Witches, that pretended conference with the dead; which is called Necromancy, Conjuring, and Witchcraft; and is but juggling and confederate knavery: Sometimes in the Casuall flight, or feeding of birds; called Augury: Sometimes in the Entrayles of a sacrificed beast; which was Aruspicina: Sometimes in Dreams: Sometimes in Croaking of Ravens, or chattering of Birds: Sometimes in the Lineaments of the face; which was called Metoposcopy; or by Palmistry in the lines of the hand; in casuall words, called Omina: Sometimes in Monsters, or unusuall accidents; as Ecclipses, Comets, rare Meteors, Earthquakes, Inundations, uncouth Births, and the like, which they called Portenta and Ostenta, because they thought them to portend, or foreshew some great Calamity to come; Sometimes, in meer Lottery, as Crosse and Pile; counting holes in a sive; dipping of Verses in Homer, and Virgil; and innumerable other such vaine conceits. So easie are men to be drawn to believe any thing, from such men as have gotten credit with them; and can with gentlenesse, and dexterity, take hold of their fear, and ignorance.

The Designes Of The Authors Of The Religion Of The Heathen And therefore the first Founders, and Legislators of Common-wealths amongst the Gentiles, whose ends were only to keep the people in obedience, and peace, have in all places taken care; First, to imprint in their minds a beliefe, that those precepts which they gave concerning Religion, might not be thought to proceed from their own device, but from the dictates of some God, or other Spirit; or else that they themselves were of a higher nature than mere mortalls, that their Lawes might the more easily be received: So Numa Pompilius pretended to receive the Ceremonies he instituted amongst the Romans, from the Nymph Egeria: and the first King and founder of the Kingdome of Peru, pretended himselfe and his wife to be the children of the Sunne: and Mahomet, to set up his new Religion, pretended to have conferences with the Holy Ghost, in forme of a Dove. Secondly, they have had a care, to make it believed, that the same things were displeasing to the Gods,

which were forbidden by the Lawes. Thirdly, to prescribe Ceremonies, Supplications, Sacrifices, and Festivalls, by which they were to believe, the anger of the Gods might be appeased; and that ill success in War, great contagions of Sicknesse, Earthquakes, and each mans private Misery, came from the Anger of the Gods; and their Anger from the Neglect of their Worship, or the forgetting, or mistaking some point of the Ceremonies required. And though amongst the antient Romans, men were not forbidden to deny, that which in the Poets is written of the paines, and pleasures after this life; which divers of great authority, and gravity in that state have in their Harangues openly derided; yet that beliefe was alwaies more cherished, than the contrary.

And by these, and such other Institutions, they obtayned in order to their end, (which was the peace of the Commonwealth,) that the common people in their misfortunes, laying the fault on neglect, or errour in their Ceremonies, or on their own disobedience to the lawes, were the lesse apt to mutiny against their Governors. And being entertained with the pomp, and pastime of Festivalls, and publike Gomes, made in honour of the Gods, needed nothing else but bread, to keep them from discontent, murmuring, and commotion against the State. And therefore the Romans, that had conquered the greatest part of the then known World, made no scruple of tollerating any Religion whatsoever in the City of Rome it selfe; unlesse it had somthing in it, that could not consist with their Civill Government; nor do we read, that any Religion was there forbidden, but that of the Jewes; who (being the peculiar Kingdome of God) thought it unlawfull to acknowledge subjection to any mortall King or State whatsoever. And thus you see how the Religion of the Gentiles was a part of their Policy.

The True Religion, And The Lawes Of Gods Kingdome The Same But where God himselfe, by supernaturall Revelation, planted Religion; there he also made to himselfe a peculiar Kingdome; and gave Lawes, not only of behaviour towards himselfe; but also towards one another; and thereby in the Kingdome of God, the Policy, and lawes Civill, are a part of Religion; and therefore the distinction of Temporall, and Spirituall Domination, hath there no place. It is true, that God is

King of all the Earth: Yet may he be King of a peculiar, and chosen Nation. For there is no more incongruity therein, than that he that hath the generall command of the whole Army, should have withall a peculiar Regiment, or Company of his own. God is King of all the Earth by his Power: but of his chosen people, he is King by Covenant. But to speake more largely of the Kingdome of God, both by Nature, and Covenant, I have in the following discourse assigned an other place.

The Causes Of Change In Religion

From the propagation of Religion, it is not hard to understand the causes of the resolution of the same into its first seeds, or principles; which are only an opinion of a Deity, and Powers invisible, and supernaturall; that can never be so abolished out of humane nature, but that new Religions may againe be made to spring out of them, by the culture of such men, as for such purpose are in reputation.

For seeing all formed Religion, is founded at first, upon the faith which a multitude hath in some one person, whom they believe not only to be a wise man, and to labour to procure their happiness, but also to be a holy man, to whom God himselfe vouchsafeth to declare his will supernaturally; It followeth necessarily, when they that have the Government of Religion, shall come to have either the wisdom of those men, their sincerity, or their love suspected; or that they shall be unable to shew any probable token of divine Revelation; that the Religion which they desire to uphold, must be suspected likewise; and (without the feare of the Civill Sword) contradicted and rejected.

Injoyning Beleefe Of Impossibilities

That which taketh away the reputation of Wisdom, in him that formeth a Religion, or addeth to it when it is already formed, is the enjoyning of a beleefe

of contradictories: For both parts of a contradiction cannot possibly be true: and therefore to enjoyne the beliefe of them, is an argument of ignorance; which detects the Author in that; and discredits him in all things else he shall propound as from revelation supernaturall: which revelation a man may indeed have of many things above, but of nothing against naturall reason.

Doing Contrary To The Religion They Establish

That which taketh away the reputation of Sincerity, is the doing, or saying of such things, as appeare to be signes, that what they require other men to believe, is not believed by themselves; all which doings, or sayings are therefore called Scandalous, because they be stumbling blocks, that make men to fall in the way of Religion: as Injustice, Cruelty, Prophanesse, Avarice, and Luxury. For who can believe, that he that doth ordinarily such actions, as proceed from any of these rootes, believeth there is any such Invisible Power to be feared, as he affrighteth other men withall, for lesser faults?

That which taketh away the reputation of Love, is the being detected of private ends: as when the beliefe they require of others, conduceth or seemeth to conduce to the acquiring of Dominion, Riches, Dignity, or secure Pleasure, to themselves onely, or specially. For that which men reap benefit by to themselves, they are thought to do for their own sakes, and not for love of others

Want Of The Testimony Of Miracles

Lastly, the testimony that men can render of divine Calling, can be no other, than the operation of Miracles; or true Prophecy, (which also is a Miracle;) or extraordinary Felicity. And therefore, to those points of Religion, which have been received from them that did such Miracles; those that are added by such, as

approve not their Calling by some Miracle, obtain no greater belief, than what the Custome, and Lawes of the places, in which they be educated, have wrought into them. For as in naturall things, men of judgement require naturall signes, and arguments; so in supernaturall things, they require signes supernaturall, (which are Miracles,) before they consent inwardly, and from their hearts.

All which causes of the weakening of mens faith, do manifestly appear in the Examples following. First, we have the Example of the children of Israel; who when Moses, that had approved his Calling to them by Miracles, and by the happy conduct of them out of Egypt, was absent but 40 dayes, revolted from the worship of the true God, recommended to them by him; and setting up (Exod.32 1,2) a Golden Calfe for their God, relapsed into the Idolatry of the Egyptians; from whom they had been so lately delivered. And again, after Moses, Aaron, Joshua, and that generation which had seen the great works of God in Israel, (Judges 2 11) were dead; another generation arose, and served Baal. So that Miracles fayling, Faith also failed.

Again, when the sons of Samuel, (1 Sam.8.3) being constituted by their father Judges in Bersabee, received bribes, and judged unjustly, the people of Israel refused any more to have God to be their King, in other manner than he was King of other people; and therefore cryed out to Samuel, to choose them a King after the manner of the Nations. So that Justice Fayling, Faith also fayled: Insomuch, as they deposed their God, from reigning over them.

And whereas in the planting of Christian Religion, the Oracles ceased in all parts of the Roman Empire, and the number of Christians encreased wonderfully every day, and in every place, by the preaching of the Apostles, and Evangelists; a great part of that successe, may reasonably be attributed, to the contempt, into which the Priests of the Gentiles of that time, had brought themselves, by their uncleannesse, avarice, and jugling between Princes. Also the Religion of the Church of Rome, was partly, for the same cause abolished in England, and many other parts of Christendome; insomuch, as the fayling of Vertue in the Pastors, maketh Faith faile in the People: and partly from bringing of the Philosophy, and

doctrine of Aristotle into Religion, by the Schoole-men; from whence there arose so many contradictions, and absurdities, as brought the Clergy into a reputation both of Ignorance, and of Fraudulent intention; and enclined people to revolt from them, either against the will of their own Princes, as in France, and Holland; or with their will, as in England.

Lastly, amongst the points by the Church of Rome declared necessary for Salvation, there be so many, manifestly to the advantage of the Pope, and of his spirituall subjects, residing in the territories of other Christian Princes, that were it not for the mutuall emulation of those Princes, they might without warre, or trouble, exclude all forraign Authority, as easily as it has been excluded in England. For who is there that does not see, to whose benefit it conduceth, to have it believed, that a King hath not his Authority from Christ, unlesse a Bishop crown him? That a King, if he be a Priest, cannot Marry? That whether a Prince be born in lawfull Marriage, or not, must be judged by Authority from Rome? That Subjects may be freed from their Alleageance, if by the Court of Rome, the King be judged an Heretique? That a King (as Chilperique of France) may be deposed by a Pope (as Pope Zachary,) for no cause; and his Kingdome given to one of his Subjects? That the Clergy, and Regulars, in what Country soever, shall be exempt from the Jurisdiction of their King, in cases criminall? Or who does not see, to whose profit redound the Fees of private Masses, and Vales of Purgatory; with other signes of private interest, enough to mortifie the most lively Faith, if (as I sayd) the civill Magistrate, and Custome did not more sustain it, than any opinion they have of the Sanctity, Wisdome, or Probity of their Teachers? So that I may attribute all the changes of Religion in the world, to one and the some cause; and that is, unpleasing Priests; and those not onely amongst Catholiques, but even in that Church that hath presumed most of Reformation.

CHAPTER XIII. OF THE NATURALL CONDITION OF MANKIND,

AS CONCERNING THEIR FELICITY, AND MISERY

NATURE HATH MADE men so equall, in the faculties of body, and mind; as that though there bee found one man sometimes manifestly stronger in body, or of quicker mind then another; yet when all is reckoned together, the difference between man, and man, is not so considerable, as that one man can thereupon claim to himselfe any benefit, to which another may not pretend, as well as he. For as to the strength of body, the weakest has strength enough to kill the strongest, either by secret machination, or by confederacy with others, that are in the same danger with himselfe.

And as to the faculties of the mind, (setting aside the arts grounded upon words, and especially that skill of proceeding upon generall, and infallible rules, called Science; which very few have, and but in few things; as being not a native faculty, born with us; nor attained, (as Prudence,) while we look after somewhat els,) I find yet a greater equality amongst men, than that of strength. For Prudence, is but Experience; which equall time, equally bestowes on all men, in those things they equally apply themselves unto. That which may perhaps make such equality incredible, is but a vain conceit of ones owne wisdom, which almost all men think they have in a greater degree, than the Vulgar; that is, than all men but themselves, and a few others, whom by Fame, or for concurring with themselves, they approve. For such is the nature of men, that howsoever they may acknowledge many others to be more witty, or more eloquent, or more learned; Yet they will hardly believe there be many so wise as themselves: For they see their own wit at hand, and other mens at a distance. But this proveth rather that

men are in that point equall, than unequall. For there is not ordinarily a greater signe of the equall distribution of any thing, than that every man is contented with his share.

From Equality Proceeds Diffidence

From this equality of ability, ariseth equality of hope in the attaining of our Ends. And therefore if any two men desire the same thing, which neverthelesse they cannot both enjoy, they become enemies; and in the way to their End, (which is principally their owne conservation, and sometimes their delectation only,) endeavour to destroy, or subdue one an other. And from hence it comes to passe, that where an Invader hath no more to feare, than an other mans single power; if one plant, sow, build, or possesse a convenient Seat, others may probably be expected to come prepared with forces united, to dispossesse, and deprive him, not only of the fruit of his labour, but also of his life, or liberty. And the Invader again is in the like danger of another.

From Diffidence Warre

And from this diffidence of one another, there is no way for any man to secure himselfe, so reasonable, as Anticipation; that is, by force, or wiles, to master the persons of all men he can, so long, till he see no other power great enough to endanger him: And this is no more than his own conservation requireth, and is generally allowed. Also because there be some, that taking pleasure in contemplating their own power in the acts of conquest, which they pursue farther than their security requires; if others, that otherwise would be glad to be at ease within modest bounds, should not by invasion increase their power, they would not be able, long time, by standing only on their defence, to subsist. And by

consequence, such augmentation of dominion over men, being necessary to a mans conservation, it ought to be allowed him.

Againe, men have no pleasure, (but on the contrary a great deale of grieffe) in keeping company, where there is no power able to over-awe them all. For every man looketh that his companion should value him, at the same rate he sets upon himselfe: And upon all signes of contempt, or undervaluing, naturally endeavours, as far as he dares (which amongst them that have no common power, to keep them in quiet, is far enough to make them destroy each other,) to extort a greater value from his contemners, by damage; and from others, by the example.

So that in the nature of man, we find three principall causes of quarrel. First, Competition; Secondly, Diffidence; Thirdly, Glory.

The first, maketh men invade for Gain; the second, for Safety; and the third, for Reputation. The first use Violence, to make themselves Masters of other mens persons, wives, children, and cattell; the second, to defend them; the third, for trifles, as a word, a smile, a different opinion, and any other signe of undervalue, either direct in their Persons, or by reflexion in their Kindred, their Friends, their Nation, their Profession, or their Name.

Out Of Civil States,

There Is Alwayes Warre Of Every One Against Every One Hereby it is manifest, that during the time men live without a common Power to keep them all in awe, they are in that condition which is called Warre; and such a warre, as is of every man, against every man. For WARRE, consisteth not in Battell onely, or the act of fighting; but in a tract of time, wherein the Will to contend by Battell is sufficiently known: and therefore the notion of Time, is to be considered in the nature of Warre; as it is in the nature of Weather. For as the nature of Foule weather, lyeth not in a showre or two of rain; but in an inclination thereto of many

dayes together: So the nature of War, consisteth not in actuall fighting; but in the known disposition thereto, during all the time there is no assurance to the contrary. All other time is PEACE.

The Incommodities Of Such A War

Whatsoever therefore is consequent to a time of Warre, where every man is Enemy to every man; the same is consequent to the time, wherein men live without other security, than what their own strength, and their own invention shall furnish them withall. In such condition, there is no place for Industry; because the fruit thereof is uncertain; and consequently no Culture of the Earth; no Navigation, nor use of the commodities that may be imported by Sea; no commodious Building; no Instruments of moving, and removing such things as require much force; no Knowledge of the face of the Earth; no account of Time; no Arts; no Letters; no Society; and which is worst of all, continuall feare, and danger of violent death; And the life of man, solitary, poore, nasty, brutish, and short.

It may seem strange to some man, that has not well weighed these things; that Nature should thus dissociate, and render men apt to invade, and destroy one another: and he may therefore, not trusting to this Inference, made from the Passions, desire perhaps to have the same confirmed by Experience. Let him therefore consider with himselfe, when taking a journey, he armes himselfe, and seeks to go well accompanied; when going to sleep, he locks his dores; when even in his house he locks his chests; and this when he knows there bee Lawes, and publike Officers, armed, to revenge all injuries shall bee done him; what opinion he has of his fellow subjects, when he rides armed; of his fellow Citizens, when he locks his dores; and of his children, and servants, when he locks his chests. Does he not there as much accuse mankind by his actions, as I do by my words? But neither of us accuse mans nature in it. The Desires, and other Passions

of man, are in themselves no Sin. No more are the Actions, that proceed from those Passions, till they know a Law that forbids them; which till Lawes be made they cannot know: nor can any Law be made, till they have agreed upon the Person that shall make it.

It may peradventure be thought, there was never such a time, nor condition of warre as this; and I believe it was never generally so, over all the world: but there are many places, where they live so now. For the savage people in many places of America, except the government of small Families, the concord whereof dependeth on naturall lust, have no government at all; and live at this day in that brutish manner, as I said before. Howsoever, it may be perceived what manner of life there would be, where there were no common Power to feare; by the manner of life, which men that have formerly lived under a peacefull government, use to degenerate into, in a civill Warre.

But though there had never been any time, wherein particular men were in a condition of warre one against another; yet in all times, Kings, and persons of Sovereigne authority, because of their Independency, are in continuall jealousies, and in the state and posture of Gladiators; having their weapons pointing, and their eyes fixed on one another; that is, their Forts, Garrisons, and Guns upon the Frontiers of their Kingdomes; and continuall Spyes upon their neighbours; which is a posture of War. But because they uphold thereby, the Industry of their Subjects; there does not follow from it, that misery, which accompanies the Liberty of particular men.

In Such A Warre, Nothing Is Unjust

To this warre of every man against every man, this also is consequent; that nothing can be Unjust. The notions of Right and Wrong, Justice and Injustice have there no place. Where there is no common Power, there is no Law: where no Law, no Injustice. Force, and Fraud, are in warre the two Cardinall vertues.

Justice, and Injustice are none of the Faculties neither of the Body, nor Mind. If they were, they might be in a man that were alone in the world, as well as his Senses, and Passions. They are Qualities, that relate to men in Society, not in Solitude. It is consequent also to the same condition, that there be no Propriety, no Dominion, no Mine and Thine distinct; but onely that to be every mans that he can get; and for so long, as he can keep it. And thus much for the ill condition, which man by meer Nature is actually placed in; though with a possibility to come out of it, consisting partly in the Passions, partly in his Reason.

The Passions That Incline Men To Peace

The Passions that encline men to Peace, are Feare of Death; Desire of such things as are necessary to commodious living; and a Hope by their Industry to obtain them. And Reason suggesteth convenient Articles of Peace, upon which men may be drawn to agreement. These Articles, are they, which otherwise are called the Lawes of Nature: whereof I shall speak more particularly, in the two following Chapters.

CHAPTER XIV. OF THE FIRST AND SECOND NATURALL LAWES, AND OF CONTRACTS

Right Of Nature What

The RIGHT OF NATURE, which Writers commonly call Jus Naturale, is the Liberty each man hath, to use his own power, as he will himselfe, for the preservation of his own Nature; that is to say, of his own Life; and consequently, of doing any thing, which in his own Judgement, and Reason, hee shall conceive to be the aptest means thereunto.

Liberty What

By LIBERTY, is understood, according to the proper signification of the word, the absence of externall Impediments: which Impediments, may oft take away part of a mans power to do what hee would; but cannot hinder him from using the power left him, according as his judgement, and reason shall dictate to him.

A Law Of Nature What

A LAW OF NATURE, (*Lex Naturalis*,) is a Precept, or generall Rule, found out by Reason, by which a man is forbidden to do, that, which is destructive of his life, or taketh away the means of preserving the same; and to omit, that, by which he thinketh it may be best preserved. For though they that speak of this subject, use to confound Jus, and Lex, Right and Law; yet they ought to be distinguished;

because RIGHT, consisteth in liberty to do, or to forbear; Whereas LAW, determineth, and bindeth to one of them: so that Law, and Right, differ as much, as Obligation, and Liberty; which in one and the same matter are inconsistent.

Naturally Every Man Has Right To Everything

And because the condition of Man, (as hath been declared in the precedent Chapter) is a condition of Warre of every one against every one; in which case every one is governed by his own Reason; and there is nothing he can make use of, that may not be a help unto him, in preserving his life against his enemies; It followeth, that in such a condition, every man has a Right to every thing; even to one anothers body. And therefore, as long as this naturall Right of every man to every thing endureth, there can be no security to any man, (how strong or wise soever he be,) of living out the time, which Nature ordinarily alloweth men to live.

The Fundamental Law Of Nature

And consequently it is a precept, or generall rule of Reason, “That every man, ought to endeavour Peace, as farre as he has hope of obtaining it; and when he cannot obtain it, that he may seek, and use, all helps, and advantages of Warre.” The first branch, of which Rule, containeth the first, and Fundamentall Law of Nature; which is, “To seek Peace, and follow it.” The Second, the summe of the Right of Nature; which is, “By all means we can, to defend our selves.”

The Second Law Of Nature

From this Fundamentall Law of Nature, by which men are commanded to endeavour Peace, is derived this second Law; “That a man be willing, when others are so too, as farre-forth, as for Peace, and defence of himselfe he shall think it necessary, to lay down this right to all things; and be contented with so much liberty against other men, as he would allow other men against himselfe.” For as long as every man holdeth this Right, of doing any thing he liketh; so long are all men in the condition of Warre. But if other men will not lay down their Right, as well as he; then there is no Reason for any one, to divest himselfe of his: For that were to expose himselfe to Prey, (which no man is bound to) rather than to dispose himselfe to Peace. This is that Law of the Gospell; “Whatsoever you require that others should do to you, that do ye to them.” And that Law of all men, “Quod tibi feiri non vis, alteri ne feceris.”

What it is to lay down a Right

To Lay Downe a mans Right to any thing, is to Divest himselfe of the Liberty, of hindring another of the benefit of his own Right to the same. For he that renounceth, or passeth away his Right, giveth not to any other man a Right which he had not before; because there is nothing to which every man had not Right by Nature: but onely standeth out of his way, that he may enjoy his own originall Right, without hindrance from him; not without hindrance from another. So that the effect which redoundeth to one man, by another mans defect of Right, is but so much diminution of impediments to the use of his own Right originall.

Renouncing (or) Transferring Right What; Obligation Duty Justice

Right is layd aside, either by simply Renouncing it; or by Transferring it to another. By Simply RENOUNCING; when he cares not to whom the benefit

thereof redoundeth. By TRANSFERRING; when he intendeth the benefit thereof to some certain person, or persons. And when a man hath in either manner abandoned, or granted away his Right; then is he said to be OBLIGED, or BOUND, not to hinder those, to whom such Right is granted, or abandoned, from the benefit of it: and that he Ought, and it his DUTY, not to make voyd that voluntary act of his own: and that such hindrance is INJUSTICE, and INJURY, as being Sine Jure; the Right being before renounced, or transferred. So that Injury, or Injustice, in the controversies of the world, is somewhat like to that, which in the disputations of Scholers is called Absurdity. For as it is there called an Absurdity, to contradict what one maintained in the Beginning: so in the world, it is called Injustice, and Injury, voluntarily to undo that, which from the beginning he had voluntarily done. The way by which a man either simply Renounceth, or Transferreth his Right, is a Declaration, or Signification, by some voluntary and sufficient signe, or signes, that he doth so Renounce, or Transferre; or hath so Renounced, or Transferred the same, to him that accepteth it. And these Signes are either Words onely, or Actions onely; or (as it happeneth most often) both Words and Actions. And the same are the BONDS, by which men are bound, and obliged: Bonds, that have their strength, not from their own Nature, (for nothing is more easily broken then a mans word,) but from Feare of some evill consequence upon the rupture.

Not All Rights Are Alienable

Whensoever a man Transferreth his Right, or Renounceth it; it is either in consideration of some Right reciprocally transferred to himselfe; or for some other good he hopeth for thereby. For it is a voluntary act: and of the voluntary acts of every man, the object is some Good To Himselfe. And therefore there be some Rights, which no man can be understood by any words, or other signes, to have abandoned, or transferred. As first a man cannot lay down the right of

resisting them, that assault him by force, to take away his life; because he cannot be understood to ayme thereby, at any Good to himselfe. The same may be sayd of Wounds, and Chayns, and Imprisonment; both because there is no benefit consequent to such patience; as there is to the patience of suffering another to be wounded, or imprisoned: as also because a man cannot tell, when he seeth men proceed against him by violence, whether they intend his death or not. And lastly the motive, and end for which this renouncing, and transferring or Right is introduced, is nothing else but the security of a mans person, in his life, and in the means of so preserving life, as not to be weary of it. And therefore if a man by words, or other signes, seem to despoyle himselfe of the End, for which those signes were intended; he is not to be understood as if he meant it, or that it was his will; but that he was ignorant of how such words and actions were to be interpreted.

Contract What

The mutuall transferring of Right, is that which men call CONTRACT.

There is difference, between transferring of Right to the Thing; and transferring, or tradition, that is, delivery of the Thing it selfe. For the Thing may be delivered together with the Translation of the Right; as in buying and selling with ready mony; or exchange of goods, or lands: and it may be delivered some time after.

Covenant What

Again, one of the Contractors, may deliver the Thing contracted for on his part, and leave the other to perform his part at some determinate time after, and in the mean time be trusted; and then the Contract on his part, is called PACT, or

COVENANT: Or both parts may contract now, to performe hereafter: in which cases, he that is to performe in time to come, being trusted, his performance is called Keeping Of Promise, or Faith; and the fayling of performance (if it be voluntary) Violation Of Faith.

Free-gift

When the transferring of Right, is not mutuall; but one of the parties transferreth, in hope to gain thereby friendship, or service from another, or from his friends; or in hope to gain the reputation of Charity, or Magnanimity; or to deliver his mind from the pain of compassion; or in hope of reward in heaven; This is not Contract, but GIFT, FREEGIFT, GRACE: which words signifie one and the same thing.

Signes Of Contract Expresse

Signes of Contract, are either Expresse, or By Inference. Expresse, are words spoken with understanding of what they signifie; And such words are either of the time Present, or Past; as, I Give, I Grant, I Have Given, I Have Granted, I Will That This Be Yours: Or of the future; as, I Will Give, I Will Grant; which words of the future, are called Promise.

Signes Of Contract By Inference

Signes by Inference, are sometimes the consequence of Words; sometimes the consequence of Silence; sometimes the consequence of Actions; sometimes the consequence of Forbearing an Action: and generally a signe by Inference, of any Contract, is whatsoever sufficiently argues the will of the Contractor.

Free Gift Passeth By Words Of The Present Or Past

Words alone, if they be of the time to come, and contain a bare promise, are an insufficient signe of a Free-gift and therefore not obligatory. For if they be of the time to Come, as, To Morrow I Will Give, they are a signe I have not given yet, and consequently that my right is not transferred, but remaineth till I transferre it by some other Act. But if the words be of the time Present, or Past, as, “I have given, or do give to be delivered to morrow,” then is my to morrows Right given away to day; and that by the vertue of the words, though there were no other argument of my will. And there is a great difference in the signification of these words, Volos Hoc Tuum Esse Cras, and Cros Dabo; that is between “I will that this be thine to morrow,” and, “I will give it to thee to morrow:” For the word I Will, in the former manner of speech, signifies an act of the will Present; but in the later, it signifies a promise of an act of the will to Come: and therefore the former words, being of the Present, transferre a future right; the later, that be of the Future, transferre nothing. But if there be other signes of the Will to transferre a Right, besides Words; then, though the gift be Free, yet may the Right be understood to passe by words of the future: as if a man propound a Prize to him that comes first to the end of a race, The gift is Free; and though the words be of the Future, yet the Right passeth: for if he would not have his words so be understood, he should not have let them runne.

Signes Of Contract Are Words Both Of The Past, Present, and Future In Contracts, the right passeth, not onely where the words are of the time Present, or Past; but also where they are of the Future; because all Contract is mutuall translation, or change of Right; and therefore he that promiseth onely, because he hath already received the benefit for which he promiseth, is to be understood as if he intended the Right should passe: for unlesse he had been content to have his words so understood, the other would not have performed his part first. And for

that cause, in buying, and selling, and other acts of Contract, A Promise is equivalent to a Covenant; and therefore obligatory.

Merit What

He that performeth first in the case of a Contract, is said to MERIT that which he is to receive by the performance of the other; and he hath it as Due. Also when a Prize is propounded to many, which is to be given to him onely that winneth; or mony is thrown amongst many, to be enjoyed by them that catch it; though this be a Free Gift; yet so to Win, or so to Catch, is to Merit, and to have it as DUE. For the Right is transferred in the Propounding of the Prize, and in throwing down the mony; though it be not determined to whom, but by the Event of the contention. But there is between these two sorts of Merit, this difference, that In Contract, I Merit by vertue of my own power, and the Contractors need; but in this case of Free Gift, I am enabled to Merit onely by the benignity of the Giver; In Contract, I merit at The Contractors hand that hee should depart with his right; In this case of gift, I Merit not that the giver should part with his right; but that when he has parted with it, it should be mine, rather than anothers. And this I think to be the meaning of that distinction of the Schooles, between Meritum Congrui, and Meritum Condigni. For God Almighty, having promised Paradise to those men (hoodwinkt with carnall desires,) that can walk through this world according to the Precepts, and Limits prescribed by him; they say, he that shall so walk, shall Merit Paradise Ex Congruo. But because no man can demand a right to it, by his own Righteousnesse, or any other power in himselfe, but by the Free Grace of God onely; they say, no man can Merit Paradise Ex Condigno. This I say, I think is the meaning of that distinction; but because Disputers do not agree upon the signification of their own termes of Art, longer than it serves their turn; I will not affirme any thing of their meaning: onely this I say; when a gift is given

indefinitely, as a prize to be contended for, he that winneth Meriteth, and may claime the Prize as Due.

Covenants Of Mutuall Trust, When Invalid

If a Covenant be made, wherein neither of the parties performe presently, but trust one another; in the condition of meer Nature, (which is a condition of Warre of every man against every man,) upon any reasonable suspition, it is Voyd; But if there be a common Power set over them bothe, with right and force sufficient to compell performance; it is not Voyd. For he that performeth first, has no assurance the other will performe after; because the bonds of words are too weak to bridle mens ambition, avarice, anger, and other Passions, without the feare of some coerceive Power; which in the condition of meer Nature, where all men are equall, and judges of the justnesse of their own fears cannot possibly be supposed. And therefore he which performeth first, does but betray himselfe to his enemy; contrary to the Right (he can never abandon) of defending his life, and means of living.

But in a civill estate, where there is a Power set up to constrain those that would otherwise violate their faith, that feare is no more reasonable; and for that cause, he which by the Covenant is to perform first, is obliged so to do.

The cause of Feare, which maketh such a Covenant invalid, must be alwayes something arising after the Covenant made; as some new fact, or other signe of the Will not to performe; else it cannot make the Covenant Voyd. For that which could not hinder a man from promising, ought not to be admitted as a hindrance of performing.

Right To The End, Containeth Right To The Means

He that transferreth any Right, transferreth the Means of enjoying it, as farre as lyeth in his power. As he that selleth Land, is understood to transferre the Herbage, and whatsoever growes upon it; Nor can he that sells a Mill turn away the Stream that drives it. And they that give to a man The Right of government in Sovereignty, are understood to give him the right of levying mony to maintain Souldiers; and of appointing Magistrates for the administration of Justice.

No Covenant With Beasts

To make Covenant with bruit Beasts, is impossible; because not understanding our speech, they understand not, nor accept of any translation of Right; nor can translate any Right to another; and without mutuall acceptation, there is no Covenant.

Nor With God Without Speciall Revelation

To make Covenant with God, is impossible, but by Mediation of such as God speaketh to, either by Revelation supernaturall, or by his Lieutenants that govern under him, and in his Name; For otherwise we know not whether our Covenants be accepted, or not. And therefore they that Vow any thing contrary to any law of Nature, Vow in vain; as being a thing unjust to pay such Vow. And if it be a thing commanded by the Law of Nature, it is not the Vow, but the Law that binds them.

No Covenant, But Of Possible And Future

The matter, or subject of a Covenant, is alwayes something that falleth under deliberation; (For to Covenant, is an act of the Will; that is to say an act, and the

last act, of deliberation;) and is therefore alwayes understood to be something to come; and which is judged Possible for him that Covenanteth, to performe.

And therefore, to promise that which is known to be Impossible, is no Covenant. But if that prove impossible afterwards, which before was thought possible, the Covenant is valid, and bindeth, (though not to the thing it selfe,) yet to the value; or, if that also be impossible, to the unfeigned endeavour of performing as much as is possible; for to more no man can be obliged.

Covenants How Made Voyd

Men are freed of their Covenants two wayes; by Performing; or by being Forgiven. For Performance, is the naturall end of obligation; and Forgivenessse, the restitution of liberty; as being a retransferring of that Right, in which the obligation consisted.

Covenants Extorted By Feare Are Valide

Covenants entred into by fear, in the condition of meer Nature, are obligatory. For example, if I Covenant to pay a ransome, or service for my life, to an enemy; I am bound by it. For it is a Contract, wherein one receiveth the benefit of life; the other is to receive mony, or service for it; and consequently, where no other Law (as in the condition, of meer Nature) forbiddeth the performance, the Covenant is valid. Therefore Prisoners of warre, if trusted with the payment of their Ransome, are obliged to pay it; And if a weaker Prince, make a disadvantageous peace with a stronger, for feare; he is bound to keep it; unlesse (as hath been sayd before) there ariseth some new, and just cause of feare, to renew the war. And even in Common-wealths, if I be forced to redeem my selfe from a Theefe by promising him mony, I am bound to pay it, till the Civill Law discharge me. For whatsoever

I may lawfully do without Obligation, the same I may lawfully Covenant to do through feare: and what I lawfully Covenant, I cannot lawfully break.

The Former Covenant To One, Makes Voyd The Later To Another

A former Covenant, makes voyd a later. For a man that hath passed away his Right to one man to day, hath it not to passe to morrow to another: and therefore the later promise passeth no Right, but is null.

A Mans Covenant Not To Defend Himselfe, Is Voyd

A Covenant not to defend my selfe from force, by force, is alwayes voyd. For (as I have shewed before) no man can transferre, or lay down his Right to save himselfe from Death, Wounds, and Imprisonment, (the avoyding whereof is the onely End of laying down any Right,) and therefore the promise of not resisting force, in no Covenant transferreth any right; nor is obliging. For though a man may Covenant thus, “Unlesse I do so, or so, kill me;” he cannot Covenant thus “Unless I do so, or so, I will not resist you, when you come to kill me.” For man by nature chooseth the lesser evill, which is danger of death in resisting; rather than the greater, which is certain and present death in not resisting. And this is granted to be true by all men, in that they lead Criminals to Execution, and Prison, with armed men, notwithstanding that such Criminals have consented to the Law, by which they are condemned.

No Man Obligated To Accuse Himselfe

A Covenant to accuse ones Selfe, without assurance of pardon, is likewise invalide. For in the condition of Nature, where every man is Judge, there is no place for Accusation: and in the Civill State, the Accusation is followed with Punishment; which being Force, a man is not obliged not to resist. The same is also true, of the Accusation of those, by whose Condemnation a man falls into misery; as of a Father, Wife, or Benefactor. For the Testimony of such an Accuser, if it be not willingly given, is praesumed to be corrupted by Nature; and therefore not to be received: and where a mans Testimony is not to be credited, his not bound to give it. Also Accusations upon Torture, are not to be reputed as Testimonies. For Torture is to be used but as means of conjecture, and light, in the further examination, and search of truth; and what is in that case confessed, tendeth to the ease of him that is Tortured; not to the informing of the Torturers: and therefore ought not to have the credit of a sufficient Testimony: for whether he deliver himselfe by true, or false Accusation, he does it by the Right of preserving his own life.

The End Of An Oath; The Forme Of As Oath

The force of Words, being (as I have formerly noted) too weak to hold men to the performance of their Covenants; there are in mans nature, but two imaginable helps to strengthen it. And those are either a Feare of the consequence of breaking their word; or a Glory, or Pride in appearing not to need to breake it. This later is a Generosity too rarely found to be presumed on, especially in the pursuers of Wealth, Command, or sensuall Pleasure; which are the greatest part of Mankind. The Passion to be reckoned upon, is Fear; whereof there be two very generall Objects: one, the Power of Spirits Invisible; the other, the Power of those men they shall therein Offend. Of these two, though the former be the greater Power, yet the feare of the later is commonly the greater Feare. The Feare of the former is in every man, his own Religion: which hath place in the nature of man before

Civill Society. The later hath not so; at least not place enough, to keep men to their promises; because in the condition of meer Nature, the inequality of Power is not discerned, but by the event of Battell. So that before the time of Civill Society, or in the interruption thereof by Warre, there is nothing can strengthen a Covenant of Peace agreed on, against the temptations of Avarice, Ambition, Lust, or other strong desire, but the feare of that Invisible Power, which they every one Worship as God; and Feare as a Revenger of their perfidy. All therefore that can be done between two men not subject to Civill Power, is to put one another to swear by the God he feareth: Which Swearing or OATH, is a Forme Of Speech, Added To A Promise; By Which He That Promiseth, Signifieth, That Unlesse He Performe, He Renounceth The Mercy Of His God, Or Calleth To Him For Vengeance On Himselfe. Such was the Heathen Forme, "Let Jupiter kill me else, as I kill this Beast." So is our Forme, "I shall do thus, and thus, so help me God." And this, with the Rites and Ceremonies, which every one useth in his own Religion, that the feare of breaking faith might be the greater.

No Oath, But By God

By this it appears, that an Oath taken according to any other Forme, or Rite, then his, that sweareth, is in vain; and no Oath: And there is no Swearing by any thing which the Swearer thinks not God. For though men have sometimes used to swear by their Kings, for feare, or flattery; yet they would have it thereby understood, they attributed to them Divine honour. And that Swearing unnecessarily by God, is but prophaning of his name: and Swearing by other things, as men do in common discourse, is not Swearing, but an impious Custome, gotten by too much vehemence of talking.

An Oath Addes Nothing To The Obligation

It appears also, that the Oath addes nothing to the Obligation. For a Covenant, if lawfull, binds in the sight of God, without the Oath, as much as with it; if unlawfull, bindeth not at all; though it be confirmed with an Oath.

CHAPTER XV. OF OTHER LAWES OF NATURE

The Third Law Of Nature, Justice

From that law of Nature, by which we are obliged to transferre to another, such Rights, as being retained, hinder the peace of Mankind, there followeth a Third; which is this, That Men Performe Their Covenants Made: without which, Covenants are in vain, and but Empty words; and the Right of all men to all things remaining, wee are still in the condition of Warre.

Justice And Injustice What

And in this law of Nature, consisteth the Fountain and Originall of JUSTICE. For where no Covenant hath preceded, there hath no Right been transferred, and every man has right to every thing; and consequently, no action can be Unjust. But when a Covenant is made, then to break it is Unjust: And the definition of INJUSTICE, is no other than The Not Performance Of Covenant. And whatsoever is not Unjust, is Just.

Justice And Propriety Begin With The Constitution of Common-wealth But because Covenants of mutuall trust, where there is a feare of not performance on either part, (as hath been said in the former Chapter,) are invalid; though the Originall of Justice be the making of Covenants; yet Injustice actually there can be none, till the cause of such feare be taken away; which while men are in the naturall condition of Warre, cannot be done. Therefore before the names of Just, and Unjust can have place, there must be some coercive Power, to compell men equally to the performance of their Covenants, by the terrour of some punishment,

greater than the benefit they expect by the breach of their Covenant; and to make good that Propriety, which by mutuall Contract men acquire, in recompence of the universall Right they abandon: and such power there is none before the erection of a Common-wealth. And this is also to be gathered out of the ordinary definition of Justice in the Schooles: For they say, that “Justice is the constant Will of giving to every man his own.” And therefore where there is no Own, that is, no Propriety, there is no Injustice; and where there is no coercive Power erected, that is, where there is no Common-wealth, there is no Propriety; all men having Right to all things: Therefore where there is no Common-wealth, there nothing is Unjust. So that the nature of Justice, consisteth in keeping of valid Covenants: but the Validity of Covenants begins not but with the Constitution of a Civill Power, sufficient to compell men to keep them: And then it is also that Propriety begins.

Justice Not Contrary To Reason

The Foole hath sayd in his heart, there is no such thing as Justice; and sometimes also with his tongue; seriously alleaging, that every mans conservation, and contentment, being committed to his own care, there could be no reason, why every man might not do what he thought conduced thereunto; and therefore also to make, or not make; keep, or not keep Covenants, was not against Reason, when it conduced to ones benefit. He does not therein deny, that there be Covenants; and that they are sometimes broken, sometimes kept; and that such breach of them may be called Injustice, and the observance of them Justice: but he questioneth, whether Injustice, taking away the feare of God, (for the same Foole hath said in his heart there is no God,) may not sometimes stand with that Reason, which dictateth to every man his own good; and particularly then, when it conduceth to such a benefit, as shall put a man in a condition, to neglect not onely the dispraise, and revilings, but also the power of other men. The Kingdome of

God is gotten by violence; but what if it could be gotten by unjust violence? were it against Reason so to get it, when it is impossible to receive hurt by it? and if it be not against Reason, it is not against Justice; or else Justice is not to be approved for good. From such reasoning as this, Succesfull wickednesse hath obtained the Name of Vertue; and some that in all other things have disallowed the violation of Faith; yet have allowed it, when it is for the getting of a Kingdome. And the Heathen that believed, that Saturn was deposed by his son Jupiter, believed neverthelesse the same Jupiter to be the avenger of Injustice: Somewhat like to a piece of Law in Cokes Commentaries on Littleton; where he sayes, If the right Heire of the Crown be attainted of Treason; yet the Crown shall descend to him, and Eo Instante the Atteynder be voyd; From which instances a man will be very prone to inferre; that when the Heire apparent of a Kingdome, shall kill him that is in possession, though his father; you may call it Injustice, or by what other name you will; yet it can never be against Reason, seeing all the voluntary actions of men tend to the benefit of themselves; and those actions are most Reasonable, that conduce most to their ends. This specious reasoning is nevertheless false.

For the question is not of promises mutuall, where there is no security of performance on either side; as when there is no Civill Power erected over the parties promising; for such promises are no Covenants: But either where one of the parties has performed already; or where there is a Power to make him performe; there is the question whether it be against reason, that is, against the benefit of the other to performe, or not. And I say it is not against reason. For the manifestation whereof, we are to consider; First, that when a man doth a thing, which notwithstanding any thing can be foreseen, and reckoned on, tendeth to his own destruction, howsoever some accident which he could not expect, arriving may turne it to his benefit; yet such events do not make it reasonably or wisely done. Secondly, that in a condition of Warre, wherein every man to every man, for want of a common Power to keep them all in awe, is an Enemy, there is no man can hope by his own strength, or wit, to defend himselfe from destruction, without

the help of Confederates; where every one expects the same defence by the Confederation, that any one else does: and therefore he which declares he thinks it reason to deceive those that help him, can in reason expect no other means of safety, than what can be had from his own single Power. He therefore that breaketh his Covenant, and consequently declareth that he thinks he may with reason do so, cannot be received into any Society, that unite themselves for Peace and defence, but by the error of them that receive him; nor when he is received, be retain'd in it, without seeing the danger of their error; which errors a man cannot reasonably reckon upon as the means of his security; and therefore if he be left, or cast out of Society, he perisheth; and if he live in Society, it is by the errors of other men, which he could not foresee, nor reckon upon; and consequently against the reason of his preservation; and so, as all men that contribute not to his destruction, forbear him onely out of ignorance of what is good for themselves.

As for the Instance of gaining the secure and perpetuall felicity of Heaven, by any way; it is frivolous: there being but one way imaginable; and that is not breaking, but keeping of Covenant.

And for the other Instance of attaining Sovereignty by Rebellion; it is manifest, that though the event follow, yet because it cannot reasonably be expected, but rather the contrary; and because by gaining it so, others are taught to gain the same in like manner, the attempt thereof is against reason. Justice therefore, that is to say, Keeping of Covenant, is a Rule of Reason, by which we are forbidden to do any thing destructive to our life; and consequently a Law of Nature.

There be some that proceed further; and will not have the Law of Nature, to be those Rules which conduce to the preservation of mans life on earth; but to the attaining of an eternall felicity after death; to which they think the breach of Covenant may conduce; and consequently be just and reasonable; (such are they that think it a work of merit to kill, or depose, or rebell against, the Sovereigne Power constituted over them by their own consent.) But because there is no naturall knowledge of mans estate after death; much lesse of the reward that is

then to be given to breach of Faith; but onely a beliefe grounded upon other mens saying, that they know it supernaturally, or that they know those, that knew them, that knew others, that knew it supernaturally; Breach of Faith cannot be called a Precept of Reason, or Nature.

Covenants Not Discharged By The Vice Of The Person To Whom Made

Others, that allow for a Law of Nature, the keeping of Faith, do neverthelesse make exception of certain persons; as Heretiques, and such as use not to performe their Covenant to others: And this also is against reason. For if any fault of a man, be sufficient to discharge our Covenant made; the same ought in reason to have been sufficient to have hindred the making of it.

Justice Of Men, And Justice Of Actions What

The names of Just, and Unjust, when they are attributed to Men, signifie one thing; and when they are attributed to Actions, another. When they are attributed to Men, they signifie Conformity, or Inconformity of Manners, to Reason. But when they are attributed to Actions, they signifie the Conformity, or Inconformity to Reason, not of Manners, or manner of life, but of particular Actions. A Just man therefore, is he that taketh all the care he can, that his Actions may be all Just: and an Unjust man, is he that neglecteth it. And such men are more often in our Language stiled by the names of Righteous, and Unrighteous; then Just, and Unjust; though the meaning be the same. Therefore a Righteous man, does not lose that Title, by one, or a few unjust Actions, that proceed from sudden Passion, or mistake of Things, or Persons: nor does an Unrighteous man, lose his character, for such Actions, as he does, or forbears to do, for feare: because his Will is not framed by the Justice, but by the apparant benefit of what he is to do. That which

gives to humane Actions the relish of Justice, is a certain Noblenesse or Gallantnesse of courage, (rarely found,) by which a man scorns to be beholding for the contentment of his life, to fraud, or breach of promise. This Justice of the Manners, is that which is meant, where Justice is called a Vertue; and Injustice a Vice.

But the Justice of Actions denominates men, not Just, but Guiltlesse; and the Injustice of the same, (which is also called Injury,) gives them but the name of Guilty.

Justice Of Manners, And Justice Of Actions

Again, the Injustice of Manners, is the disposition, or aptitude to do Injurie; and is Injustice before it proceed to Act; and without supposing any individuall person injured. But the Injustice of an Action, (that is to say Injury,) supposeth an individuall person Injured; namely him, to whom the Covenant was made: And therefore many times the injury is received by one man, when the dammage redoundeth to another. As when The Master commandeth his servant to give mony to a stranger; if it be not done, the Injury is done to the Master, whom he had before Covenanted to obey; but the dammage redoundeth to the stranger, to whom he had no Obligation; and therefore could not Injure him. And so also in Common-wealths, private men may remit to one another their debts; but not robberies or other violences, whereby they are endammaged; because the detaining of Debt, is an Injury to themselves; but Robbery and Violence, are Injuries to the Person of the Common-wealth.

Nothing Done To A Man, By His Own Consent Can Be Injury

Whatsoever is done to a man, conformable to his own Will signified to the doer, is no Injury to him. For if he that doeth it, hath not passed away his originall right to do what he please, by some Antecedent Covenant, there is no breach of Covenant; and therefore no Injury done him. And if he have; then his Will to have it done being signified, is a release of that Covenant; and so again there is no Injury done him.

Justice Commutative, And Distributive

Justice of Actions, is by Writers divided into Commutative, and Distributive; and the former they say consisteth in proportion Arithmetically; the later in proportion Geometrically. Commutative therefore, they place in the equality of value of the things contracted for; And Distributive, in the distribution of equally benefit, to men of equally merit. As if it were Injustice to sell dearer than we buy; or to give more to a man than he merits. The value of all things contracted for, is measured by the Appetite of the Contractors: and therefore the just value, is that which they be contented to give. And Merit (besides that which is by Covenant, where the performance on one part, meriteth the performance of the other part, and falls under Justice Commutative, not Distributive,) is not due by Justice; but is rewarded of Grace onely. And therefore this distinction, in the sense wherein it useth to be expounded, is not right. To speak properly, Commutative Justice, is the Justice of a Contractor; that is, a Performance of Covenant, in Buying, and Selling; Hiring, and Letting to Hire; Lending, and Borrowing; Exchanging, Bartering, and other acts of Contract.

And Distributive Justice, the Justice of an Arbitrator; that is to say, the act of defining what is Just. Wherein, (being trusted by them that make him Arbitrator,) if he performe his Trust, he is said to distribute to every man his own: and his is indeed Just Distribution, and may be called (though improperly) Distributive

Justice; but more properly Equity; which also is a Law of Nature, as shall be shewn in due place.

The Fourth Law Of Nature, Gratitude

As Justice dependeth on Antecedent Covenant; so does Gratitude depend on Antecedent Grace; that is to say, Antecedent Free-gift: and is the fourth Law of Nature; which may be conceived in this Forme, “That a man which receiveth Benefit from another of meer Grace, Endeavour that he which giveth it, have no reasonable cause to repent him of his good will.” For no man giveth, but with intention of Good to himselfe; because Gift is Voluntary; and of all Voluntary Acts, the Object is to every man his own Good; of which if men see they shall be frustrated, there will be no beginning of benevolence, or trust; nor consequently of mutuall help; nor of reconciliation of one man to another; and therefore they are to remain still in the condition of War; which is contrary to the first and Fundamentall Law of Nature, which commandeth men to Seek Peace. The breach of this Law, is called Ingratitude; and hath the same relation to Grace, that Injustice hath to Obligation by Covenant.

The Fifth, Mutuall accommodation, or Compleasance

A fifth Law of Nature, is COMPLEASANCE; that is to say, “That every man strive to accommodate himselfe to the rest.” For the understanding whereof, we may consider, that there is in mens aptnesse to Society; a diversity of Nature, rising from their diversity of Affections; not unlike to that we see in stones brought together for building of an Aedifice. For as that stone which by the asperity, and irregularity of Figure, takes more room from others, than it selfe fills; and for the hardnesse, cannot be easily made plain, and thereby hindereth the

building, is by the builders cast away as unprofitable, and troublesome: so also, a man that by asperity of Nature, will strive to retain those things which to himselfe are superfluous, and to others necessary; and for the stubbornness of his Passions, cannot be corrected, is to be left, or cast out of Society, as combersome thereunto. For seeing every man, not onely by Right, but also by necessity of Nature, is supposed to endeavour all he can, to obtain that which is necessary for his conservation; He that shall oppose himselfe against it, for things superfluous, is guilty of the warre that thereupon is to follow; and therefore doth that, which is contrary to the fundamentall Law of Nature, which commandeth To Seek Peace. The observers of this Law, may be called SOCIABLE, (the Latines call them Comodi;) The contrary, Stubborn, Insociable, Froward, Intractable.

The Sixth, Facility To Pardon

A sixth Law of Nature is this, “That upon caution of the Future time, a man ought to pardon the offences past of them that repenting, desire it.” For PARDON, is nothing but granting of Peace; which though granted to them that persevere in their hostility, be not Peace, but Feare; yet not granted to them that give caution of the Future time, is signe of an aversion to Peace; and therefore contrary to the Law of Nature.

The Seventh, That In Revenges, Men Respect Onely The Future Good

A seventh is, “ That in Revenges, (that is, retribution of evil for evil,) Men look not at the greatnesse of the evill past, but the greatnesse of the good to follow.” Whereby we are forbidden to inflict punishment with any other designe, than for correction of the offender, or direction of others. For this Law is consequent to the next before it, that commandeth Pardon, upon security of the Future Time.

Besides, Revenge without respect to the Example, and profit to come, is a triumph, or glorying in the hurt of another, tending to no end; (for the End is alwayes somewhat to Come;) and glorying to no end, is vain-glory, and contrary to reason; and to hurt without reason, tendeth to the introduction of Warre; which is against the Law of Nature; and is commonly stiled by the name of Cruelty.

The Eighth, Against Contumely

And because all signes of hatred, or contempt, provoke to fight; insomuch as most men choose rather to hazard their life, than not to be revenged; we may in the eighth place, for a Law of Nature set down this Precept, “That no man by deed, word, countenance, or gesture, declare Hatred, or Contempt of another.” The breach of which Law, is commonly called Contumely.

The Ninth, Against Pride

The question who is the better man, has no place in the condition of meer Nature; where, (as has been shewn before,) all men are equall. The inequallity that now is, has been introduced by the Lawes civill. I know that Aristotle in the first booke of his Politiques, for a foundation of his doctrine, maketh men by Nature, some more worthy to Command, meaning the wiser sort (such as he thought himselfe to be for his Philosophy;) others to Serve, (meaning those that had strong bodies, but were not Philosophers as he;) as if Master and Servant were not introduced by consent of men, but by difference of Wit; which is not only against reason; but also against experience. For there are very few so foolish, that had not rather governe themselves, than be governed by others: Nor when the wise in their own conceit, contend by force, with them who distrust their owne wisdom, do they alwaies, or often, or almost at any time, get the Victory. If Nature therefore have

made men equall, that equalitie is to be acknowledged; or if Nature have made men unequall; yet because men that think themselves equall, will not enter into conditions of Peace, but upon Equall termes, such equalitie must be admitted. And therefore for the ninth Law of Nature, I put this, “That every man acknowledge other for his Equall by Nature.” The breach of this Precept is Pride.

The Tenth Against Arrogance

On this law, dependeth another, “That at the entrance into conditions of Peace, no man require to reserve to himselfe any Right, which he is not content should be reserved to every one of the rest.” As it is necessary for all men that seek peace, to lay down certaine Rights of Nature; that is to say, not to have libertie to do all they list: so is it necessarie for mans life, to retaine some; as right to governe their owne bodies; enjoy aire, water, motion, waies to go from place to place; and all things else without which a man cannot live, or not live well. If in this case, at the making of Peace, men require for themselves, that which they would not have to be granted to others, they do contrary to the precedent law, that commandeth the acknowledgement of naturall equalitie, and therefore also against the law of Nature. The observers of this law, are those we call Modest, and the breakers Arrogant Men. The Greeks call the violation of this law pleonexia; that is, a desire of more than their share.

The Eleventh Equity

Also “If a man be trusted to judge between man and man,” it is a precept of the Law of Nature, “that he deale Equally between them.” For without that, the Controversies of men cannot be determined but by Warre. He therefore that is partiall in judgment, doth what in him lies, to deterre men from the use of Judges,

and Arbitrators; and consequently, (against the fundamentall Lawe of Nature) is the cause of Warre.

The observance of this law, from the equall distribution to each man, of that which in reason belongeth to him, is called EQUITY, and (as I have sayd before) distributive justice: the violation, Acception Of Persons, Prosopolepsia.

The Twelfth, Equall Use Of Things Common

And from this followeth another law, “That such things as cannot be divided, be enjoyed in Common, if it can be; and if the quantity of the thing permit, without Stint; otherwise Proportionably to the number of them that have Right.” For otherwise the distribution is Unequall, and contrary to Equitie.

The Thirteenth, Of Lot

But some things there be, that can neither be divided, nor enjoyed in common. Then, The Law of Nature, which prescribeth Equity, requireth, “That the Entire Right; or else, (making the use alternate,) the First Possession, be determined by Lot.” For equall distribution, is of the Law of Nature; and other means of equall distribution cannot be imagined.

The Fourteenth, Of Primogeniture, And First Seising

Of Lots there be two sorts, Arbitrary, and Naturall. Arbitrary, is that which is agreed on by the Competitors; Naturall, is either Primogeniture, (which the Greek calls Kleronomia, which signifies, Given by Lot;) or First Seisure.

And therefore those things which cannot be enjoyed in common, nor divided, ought to be adjudged to the First Possessor; and in some cases to the First-Borne, as acquired by Lot.

The Fifteenth, Of Mediators

It is also a Law of Nature, “That all men that mediate Peace, be allowed safe Conduct.” For the Law that commandeth Peace, as the End, commandeth Intercession, as the Means; and to Intercession the Means is safe Conduct.

The Sixteenth, Of Submission To Arbitrement

And because, though men be never so willing to observe these Lawes, there may nevertheless arise questions concerning a mans action; First, whether it were done, or not done; Secondly (if done) whether against the Law, or not against the Law; the former whereof, is called a question Of Fact; the later a question Of Right; therefore unlesse the parties to the question, Covenant mutually to stand to the sentence of another, they are as farre from Peace as ever. This other, to whose Sentence they submit, is called an ARBITRATOR. And therefore it is of the Law of Nature, “That they that are at controversie, submit their Right to the judgement of an Arbitrator.”

The Seventeenth, No Man Is His Own Judge

And seeing every man is presumed to do all things in order to his own benefit, no man is a fit Arbitrator in his own cause: and if he were never so fit; yet Equity allowing to each party equall benefit, if one be admitted to be Judge, the other is

to be admitted also; & so the controversie, that is, the cause of War, remains, against the Law of Nature.

The Eighteenth, No Man To Be Judge, That Has In Him Cause Of Partiality

For the same reason no man in any Cause ought to be received for Arbitrator, to whom greater profit, or honour, or pleasure apparently ariseth out of the victory of one party, than of the other: for he hath taken (though an unavoydable bribe, yet) a bribe; and no man can be obliged to trust him. And thus also the controversie, and the condition of War remaineth, contrary to the Law of Nature.

The Nineteenth, Of Witnesse

And in a controversie of Fact, the Judge being to give no more credit to one, than to the other, (if there be no other Arguments) must give credit to a third; or to a third and fourth; or more: For else the question is undecided, and left to force, contrary to the Law of Nature.

These are the Lawes of Nature, dictating Peace, for a means of the conservation of men in multitudes; and which onely concern the doctrine of Civill Society. There be other things tending to the destruction of particular men; as Drunkenness, and all other parts of Intemperance; which may therefore also be reckoned amongst those things which the Law of Nature hath forbidden; but are not necessary to be mentioned, nor are pertinent enough to this place.

A Rule, By Which The Laws Of Nature May Easily Be Examined

And though this may seem too subtile a deduction of the Lawes of Nature, to be taken notice of by all men; whereof the most part are too busie in getting food, and the rest too negligent to understand; yet to leave all men unexcusable, they have been contracted into one easie sum, intelligible even to the meanest capacity; and that is, “Do not that to another, which thou wouldest not have done to thy selfe;” which sheweth him, that he has no more to do in learning the Lawes of Nature, but, when weighing the actions of other men with his own, they seem too heavy, to put them into the other part of the ballance, and his own into their place, that his own passions, and selfe-love, may adde nothing to the weight; and then there is none of these Lawes of Nature that will not appear unto him very reasonable.

The Lawes Of Nature Oblige In Conscience Always,

But In Effect Then Onely When There Is Security The Lawes of Nature oblige In Foro Interno; that is to say, they bind to a desire they should take place: but In Foro Externo; that is, to the putting them in act, not alwayes. For he that should be modest, and tractable, and performe all he promises, in such time, and place, where no man els should do so, should but make himselfe a prey to others, and procure his own certain ruine, contrary to the ground of all Lawes of Nature, which tend to Natures preservation. And again, he that shall observe the same Lawes towards him, observes them not himselfe, seeketh not Peace, but War; & consequently the destruction of his Nature by Violence.

And whatsoever Lawes bind In Foro Interno, may be broken, not onely by a fact contrary to the Law but also by a fact according to it, in case a man think it contrary. For though his Action in this case, be according to the Law; which where the Obligation is In Foro Interno, is a breach.

The Laws Of Nature Are Eternal;

The Lawes of Nature are Immutable and Eternall, For Injustice, Ingratitude, Arrogance, Pride, Iniquity, Acception of persons, and the rest, can never be made lawfull. For it can never be that Warre shall preserve life, and Peace destroy it.

And Yet Easie

The same Lawes, because they oblige onely to a desire, and endeavour, I mean an unfeigned and constant endeavour, are easie to be observed. For in that they require nothing but endeavour; he that endeavoureth their performance, fulfilleth them; and he that fulfilleth the Law, is Just.

The Science Of These Lawes, Is The True Morall Philosophy

And the Science of them, is the true and onely Moral Philosophy. For Morall Philosophy is nothing else but the Science of what is Good, and Evill, in the conversation, and Society of mankind. Good, and Evill, are names that signifie our Appetites, and Aversions; which in different tempers, customes, and doctrines of men, are different: And divers men, differ not onely in their Judgement, on the senses of what is pleasant, and unpleasant to the tast, smell, hearing, touch, and sight; but also of what is conformable, or disagreeable to Reason, in the actions of common life. Nay, the same man, in divers times, differs from himselfe; and one time praiseth, that is, calleth Good, what another time he dispraiseth, and calleth Evil: From whence arise Disputes, Controversies, and at last War. And therefore so long as man is in the condition of meer Nature, (which is a condition of War,) as private Appetite is the measure of Good, and Evill: and consequently all men agree on this, that Peace is Good, and therefore also the way, or means of Peace,

which (as I have shewed before) are Justice, Gratitude, Modesty, Equity, Mercy, & the rest of the Laws of Nature, are good; that is to say, Morall Vertues; and their contrarie Vices, Evill. Now the science of Vertue and Vice, is Morall Philosophie; and therefore the true Doctrine of the Lawes of Nature, is the true Morall Philosophie. But the Writers of Morall Philosophie, though they acknowledge the same Vertues and Vices; Yet not seeing wherein consisted their Goodnesse; nor that they come to be praised, as the meanes of peaceable, sociable, and comfortable living; place them in a mediocrity of passions: as if not the Cause, but the Degree of daring, made Fortitude; or not the Cause, but the Quantity of a gift, made Liberality.

These dictates of Reason, men use to call by the name of Lawes; but improperly: for they are but Conclusions, or Theoremes concerning what conduceth to the conservation and defence of themselves; whereas Law, properly is the word of him, that by right hath command over others. But yet if we consider the same Theoremes, as delivered in the word of God, that by right commandeth all things; then are they properly called Lawes.

CHAPTER XVI. OF PERSONS, AUTHORS, AND THINGS PERSONATED

A PERSON WHAT

A PERSON, is he “whose words or actions are considered, either as his own, or as representing the words or actions of an other man, or of any other thing to whom they are attributed, whether Truly or by Fiction.”

Person Naturall, And Artificiall

When they are considered as his owne, then is he called a Naturall Person: And when they are considered as representing the words and actions of an other, then is he a Feigned or Artificiall person.

The Word Person, Whence

The word Person is latine: instead whereof the Greeks have Prosopon, which signifies the Face, as Persona in latine signifies the Disguise, or Outward Appearance of a man, counterfeited on the Stage; and sometimes more particularly that part of it, which disguiseth the face, as a Mask or Visard: And from the Stage, hath been translated to any Representer of speech and action, as well in Tribunalls, as Theaters. So that a Person, is the same that an Actor is, both on the Stage and in common Conversation; and to Personate, is to Act, or Represent himselfe, or an other; and he that acteth another, is said to beare his Person, or act in his name; (in which sence Cicero useth it where he saies, “Unus Sustineo Tres

Personas; Mei, Adversarii, & Judicis, I beare three Persons; my own, my Adversaries, and the Judges;”) and is called in diverse occasions, diversly; as a Representer, or Representative, a Lieutenant, a Vicar, an Attorney, a Deputy, a Procurator, an Actor, and the like.

Actor, Author; Authority

Of Persons Artificiall, some have their words and actions Owned by those whom they represent. And then the Person is the Actor; and he that owneth his words and actions, is the AUTHOR: In which case the Actor acteth by Authority. For that which in speaking of goods and possessions, is called an Owner, and in latine Dominus, in Greeke Kurios; speaking of Actions, is called Author. And as the Right of possession, is called Dominion; so the Right of doing any Action, is called AUTHORITY. So that by Authority, is alwayes understood a Right of doing any act: and Done By Authority, done by Commission, or Licence from him whose right it is.

Covenants By Authority, Bind The Author

From hence it followeth, that when the Actor maketh a Covenant by Authority, he bindeth thereby the Author, no lesse than if he had made it himselfe; and no lesse subjecteth him to all the consequences of the same. And therefore all that hath been said formerly, (Cha) of the nature of Covenants between man and man in their naturall capacity, is true also when they are made by their Actors, Representers, or Procurators, that have authority from them, so far-forth as is in their Commission, but no farther.

And therefore he that maketh a Covenant with the Actor, or Representer, not knowing the Authority he hath, doth it at his own perill. For no man is obliged by

a Covenant, whereof he is not Author; nor consequently by a Covenant made against, or beside the Authority he gave.

But Not The Actor

When the Actor doth any thing against the Law of Nature by command of the Author, if he be obliged by former Covenant to obey him, not he, but the Author breaketh the Law of Nature: for though the Action be against the Law of Nature; yet it is not his: but contrarily; to refuse to do it, is against the Law of Nature, that forbiddeth breach of Covenant.

The Authority Is To Be Shewne

And he that maketh a Covenant with the Author, by mediation of the Actor, not knowing what Authority he hath, but onely takes his word; in case such Authority be not made manifest unto him upon demand, is no longer obliged: For the Covenant made with the Author, is not valid, without his Counter-assurance. But if he that so Covenanteth, knew before hand he was to expect no other assurance, than the Actors word; then is the Covenant valid; because the Actor in this case maketh himselfe the Author. And therefore, as when the Authority is evident, the Covenant obligeth the Author, not the Actor; so when the Authority is feigned, it obligeth the Actor onely; there being no Author but himselfe.

Things Personated, Inanimate

There are few things, that are incapable of being represented by Fiction. Inanimate things, as a Church, an Hospital, a Bridge, may be Personated by a

Rector, Master, or Overseer. But things Inanimate, cannot be Authors, nor therefore give Authority to their Actors: Yet the Actors may have Authority to procure their maintenance, given them by those that are Owners, or Governours of those things. And therefore, such things cannot be Personated, before there be some state of Civill Government.

Irrational

Likewise Children, Fooles, and Mad-men that have no use of Reason, may be Personated by Guardians, or Curators; but can be no Authors (during that time) of any action done by them, longer then (when they shall recover the use of Reason) they shall judge the same reasonable. Yet during the Folly, he that hath right of governing them, may give Authority to the Guardian. But this again has no place but in a State Civill, because before such estate, there is no Dominion of Persons.

False Gods

An Idol, or meer Figment of the brain, may be Personated; as were the Gods of the Heathen; which by such Officers as the State appointed, were Personated, and held Possessions, and other Goods, and Rights, which men from time to time dedicated, and consecrated unto them. But idols cannot be Authors: for a Idol is nothing. The Authority proceeded from the State: and therefore before introduction of Civill Government, the Gods of the Heathen could not be Personated.

The True God

The true God may be Personated. As he was; first, by Moses; who governed the Israelites, (that were not his, but Gods people,) not in his own name, with Hoc Dicit Moses; but in Gods Name, with Hoc Dicit Dominus. Secondly, by the son of man, his own Son our Blessed Saviour Jesus Christ, that came to reduce the Jewes, and induce all Nations into the Kingdome of his Father; not as of himselfe, but as sent from his Father. And thirdly, by the Holy Ghost, or Comforter, speaking, and working in the Apostles: which Holy Ghost, was a Comforter that came not of himselfe; but was sent, and proceeded from them both.

A Multitude Of Men, How One Person

A Multitude of men, are made One Person, when they are by one man, or one Person, Represented; so that it be done with the consent of every one of that Multitude in particular. For it is the Unity of the Representer, not the Unity of the Represented, that maketh the Person One. And it is the Representer that beareth the Person, and but one Person: And Unity, cannot otherwise be understood in Multitude.

Every One Is Author

And because the Multitude naturally is not One, but Many; they cannot be understood for one; but many Authors, of every thing their Representative faith, or doth in their name; Every man giving their common Representer, Authority from himselfe in particular; and owning all the actions the Representer doth, in case they give him Authority without stint: Otherwise, when they limit him in what, and how farre he shall represent them, none of them owneth more, than they gave him commission to Act.

An Actor May Be Many Men Made One By Plurality Of Voyces

And if the Representative consist of many men, the voyce of the greater number, must be considered as the voyce of them all. For if the lesser number pronounce (for example) in the Affirmative, and the greater in the Negative, there will be Negatives more than enough to destroy the Affirmatives; and thereby the excesse of Negatives, standing uncontradicted, are the onely voyce the Representative hath.

Representatives, When The Number Is Even, Unprofitable

And a Representative of even number, especially when the number is not great, whereby the contradictory voyces are oftentimes equall, is therefore oftentimes mute, and incapable of Action. Yet in some cases contradictory voyces equall in number, may determine a question; as in condemning, or absolving, equality of votes, even in that they condemne not, do absolve; but not on the contrary condemne, in that they absolve not. For when a Cause is heard; not to condemne, is to absolve; but on the contrary, to say that not absolving, is condemning, is not true. The like it is in a deliberation of executing presently, or deferring till another time; For when the voyces are equall, the not decreeing Execution, is a decree of Dilation.

Negative Voyce

Or if the number be odde, as three, or more, (men, or assemblies;) whereof every one has by a Negative Voice, authority to take away the effect of all the

Affirmative Voices of the rest, This number is no Representative; because by the diversity of Opinions, and Interests of men, it becomes oftentimes, and in cases of the greatest consequence, a mute Person, and unapt, as for many things else, so for the government of a Multitude, especially in time of Warre.

Of Authors there be two sorts. The first simply so called; which I have before defined to be him, that owneth the Action of another simply. The second is he, that owneth an Action, or Covenant of another conditionally; that is to say, he undertaketh to do it, if the other doth it not, at, or before a certain time. And these Authors conditionall, are generally called SURETYES, in Latine Fidejussores, and Sponsores; and particularly for Debt, Praedes; and for Appearance before a Judge, or Magistrate, Vades.

PART II. OF COMMON-WEALTH

CHAPTER XVII. OF THE CAUSES, GENERATION, AND DEFINITION OF A COMMON-WEALTH

The End Of Common-wealth, Particular Security

The finall Cause, End, or Designe of men, (who naturally love Liberty, and Dominion over others,) in the introduction of that restraint upon themselves, (in which wee see them live in Common-wealths,) is the foresight of their own preservation, and of a more contented life thereby; that is to say, of getting themselves out from that miserable condition of Warre, which is necessarily consequent (as hath been shewn) to the naturall Passions of men, when there is no visible Power to keep them in awe, and tye them by feare of punishment to the performance of their Covenants, and observation of these Lawes of Nature set down in the fourteenth and fifteenth Chapters.

Which Is Not To Be Had From The Law Of Nature:

For the Lawes of Nature (as Justice, Equity, Modesty, Mercy, and (in summe) Doing To Others, As Wee Would Be Done To,) if themselves, without the terrour of some Power, to cause them to be observed, are contrary to our naturall Passions, that carry us to Partiality, Pride, Revenge, and the like. And Covenants, without the Sword, are but Words, and of no strength to secure a man at all. Therefore notwithstanding the Lawes of Nature, (which every one hath then kept, when he has the will to keep them, when he can do it safely,) if there be no Power erected, or not great enough for our security; every man will and may lawfully rely on his own strength and art, for caution against all other men. And in all places, where men have lived by small Families, to robbe and spoyle one another,

has been a Trade, and so farre from being reputed against the Law of Nature, that the greater spoyles they gained, the greater was their honour; and men observed no other Lawes therein, but the Lawes of Honour; that is, to abstain from cruelty, leaving to men their lives, and instruments of husbandry. And as small Families did then; so now do Cities and Kingdomes which are but greater Families (for their own security) enlarge their Dominions, upon all pretences of danger, and fear of Invasion, or assistance that may be given to Invaders, endeavour as much as they can, to subdue, or weaken their neighbours, by open force, and secret arts, for want of other Caution, justly; and are remembred for it in after ages with honour.

Nor From The Conjunction Of A Few Men Or Familyes

Nor is it the joyning together of a small number of men, that gives them this security; because in small numbers, small additions on the one side or the other, make the advantage of strength so great, as is sufficient to carry the Victory; and therefore gives encouragement to an Invasion. The Multitude sufficient to confide in for our Security, is not determined by any certain number, but by comparison with the Enemy we feare; and is then sufficient, when the odds of the Enemy is not of so visible and conspicuous moment, to determine the event of warre, as to move him to attempt.

Nor From A Great Multitude, Unlesse Directed By One Judgement

And be there never so great a Multitude; yet if their actions be directed according to their particular judgements, and particular appetites, they can expect thereby no defence, nor protection, neither against a Common enemy, nor against the injuries of one another. For being distracted in opinions concerning the best use and

application of their strength, they do not help, but hinder one another; and reduce their strength by mutuall opposition to nothing: whereby they are easily, not onely subdued by a very few that agree together; but also when there is no common enemy, they make warre upon each other, for their particular interests. For if we could suppose a great Multitude of men to consent in the observation of Justice, and other Lawes of Nature, without a common Power to keep them all in awe; we might as well suppose all Man-kind to do the same; and then there neither would be nor need to be any Civill Government, or Common-wealth at all; because there would be Peace without subjection.

And That Continually

Nor is it enough for the security, which men desire should last all the time of their life, that they be governed, and directed by one judgement, for a limited time; as in one Battell, or one Warre. For though they obtain a Victory by their unanimous endeavour against a forraign enemy; yet afterwards, when either they have no common enemy, or he that by one part is held for an enemy, is by another part held for a friend, they must needs by the difference of their interests dissolve, and fall again into a Warre amongst themselves.

Why Certain Creatures Without Reason, Or Speech,

Do Neverthelesse Live In Society, Without Any Coercive Power

It is true, that certain living creatures, as Bees, and Ants, live sociably one with another, (which are therefore by Aristotle numbred amongst Politicall creatures;) and yet have no other direction, than their particular judgements and appetites; nor speech, whereby one of them can signifie to another, what he thinks expedient

for the common benefit: and therefore some man may perhaps desire to know, why Man-kind cannot do the same. To which I answer,

First, that men are continually in competition for Honour and Dignity, which these creatures are not; and consequently amongst men there ariseth on that ground, Envy and Hatred, and finally Warre; but amongst these not so.

Secondly, that amongst these creatures, the Common good differeth not from the Private; and being by nature enclined to their private, they procure thereby the common benefit. But man, whose Joy consisteth in comparing himselfe with other men, can relish nothing but what is eminent.

Thirdly, that these creatures, having not (as man) the use of reason, do not see, nor think they see any fault, in the administration of their common businesse: whereas amongst men, there are very many, that thinke themselves wiser, and abler to govern the Publique, better than the rest; and these strive to reforme and innovate, one this way, another that way; and thereby bring it into Distraction and Civill warre.

Fourthly, that these creatures, though they have some use of voice, in making knowne to one another their desires, and other affections; yet they want that art of words, by which some men can represent to others, that which is Good, in the likenesse of Evill; and Evill, in the likenesse of Good; and augment, or diminish the apparent greatnesse of Good and Evill; discontenting men, and troubling their Peace at their pleasure.

Fiftly, irrationall creatures cannot distinguish betweene Injury, and Dammage; and therefore as long as they be at ease, they are not offended with their fellowes: whereas Man is then most troublesome, when he is most at ease: for then it is that he loves to shew his Wisdome, and controule the Actions of them that governe the Common-wealth.

Lastly, the agreement of these creatures is Naturall; that of men, is by Covenant only, which is Artificiall: and therefore it is no wonder if there be somewhat else required (besides Covenant) to make their Agreement constant and

lasting; which is a Common Power, to keep them in awe, and to direct their actions to the Common Benefit.

The Generation Of A Common-wealth

The only way to erect such a Common Power, as may be able to defend them from the invasion of Forraigners, and the injuries of one another, and thereby to secure them in such sort, as that by their owne industrie, and by the fruites of the Earth, they may nourish themselves and live contentedly; is, to conferre all their power and strength upon one Man, or upon one Assembly of men, that may reduce all their Wills, by plurality of voices, unto one Will: which is as much as to say, to appoint one man, or Assembly of men, to beare their Person; and every one to owne, and acknowledge himselfe to be Author of whatsoever he that so beareth their Person, shall Act, or cause to be Acted, in those things which concerne the Common Peace and Safetie; and therein to submit their Wills, every one to his Will, and their Judgements, to his Judgment. This is more than Consent, or Concord; it is a reall Unitie of them all, in one and the same Person, made by Covenant of every man with every man, in such manner, as if every man should say to every man, "I Authorise and give up my Right of Governing my selfe, to this Man, or to this Assembly of men, on this condition, that thou give up thy Right to him, and Authorise all his Actions in like manner." This done, the Multitude so united in one Person, is called a COMMON-WEALTH, in latine CIVITAS. This is the Generation of that great LEVIATHAN, or rather (to speake more reverently) of that Mortall God, to which wee owe under the Immortall God, our peace and defence. For by this Authoritie, given him by every particular man in the Common-Wealth, he hath the use of so much Power and Strength conferred on him, that by terror thereof, he is inabled to forme the wills of them all, to Peace at home, and mutuall ayd against their enemies abroad.

The Definition Of A Common-wealth

And in him consisteth the Essence of the Common-wealth; which (to define it,) is “One Person, of whose Acts a great Multitude, by mutuall Covenants one with another, have made themselves every one the Author, to the end he may use the strength and means of them all, as he shall think expedient, for their Peace and Common Defence.”

Soveraigne, And Subject, What

And he that carryeth this Person, as called SOVERAIGNE, and said to have Soveraigne Power; and every one besides, his SUBJECT.

The attaining to this Soveraigne Power, is by two wayes. One, by Naturall force; as when a man maketh his children, to submit themselves, and their children to his government, as being able to destroy them if they refuse, or by Warre subdueth his enemies to his will, giving them their lives on that condition. The other, is when men agree amongst themselves, to submit to some Man, or Assembly of men, voluntarily, on confidence to be protected by him against all others. This later, may be called a Politicall Common-wealth, or Common-wealth by Institution; and the former, a Common-wealth by Acquisition. And first, I shall speak of a Common-wealth by Institution.

CHAPTER XVIII. OF THE RIGHTS OF SOVERAIGNES BY INSTITUTION

The Act Of Instituting A Common-wealth, What

A Common-wealth is said to be Instituted, when a Multitude of men do Agree, and Covenant, Every One With Every One, that to whatsoever Man, or Assembly Of Men, shall be given by the major part, the Right to Present the Person of them all, (that is to say, to be their Representative;) every one, as well he that Voted For It, as he that Voted Against It, shall Authorise all the Actions and Judgements, of that Man, or Assembly of men, in the same manner, as if they were his own, to the end, to live peaceably amongst themselves, and be protected against other men.

The Consequences To Such Institution, Are

I. The Subjects Cannot Change The Forme Of Government

From this Institution of a Common-wealth are derived all the Rights, and Facultyes of him, or them, on whom the Sovereigne Power is conferred by the consent of the People assembled.

First, because they Covenant, it is to be understood, they are not obliged by former Covenant to any thing repugnant hereunto. And Consequently they that have already Instituted a Common-wealth, being thereby bound by Covenant, to own the Actions, and Judgements of one, cannot lawfully make a new Covenant, amongst themselves, to be obedient to any other, in any thing whatsoever, without

his permission. And therefore, they that are subjects to a Monarch, cannot without his leave cast off Monarchy, and return to the confusion of a disunited Multitude; nor transferre their Person from him that beareth it, to another Man, or other Assembly of men: for they are bound, every man to every man, to Own, and be reputed Author of all, that he that already is their Sovereigne, shall do, and judge fit to be done: so that any one man dissenting, all the rest should break their Covenant made to that man, which is injustice: and they have also every man given the Sovereignty to him that beareth their Person; and therefore if they depose him, they take from him that which is his own, and so again it is injustice. Besides, if he that attempteth to depose his Sovereign, be killed, or punished by him for such attempt, he is author of his own punishment, as being by the Institution, Author of all his Sovereign shall do: And because it is injustice for a man to do any thing, for which he may be punished by his own authority, he is also upon that title, unjust. And whereas some men have pretended for their disobedience to their Sovereign, a new Covenant, made, not with men, but with God; this also is unjust: for there is no Covenant with God, but by mediation of some body that representeth Gods Person; which none doth but Gods Lieutenant, who hath the Sovereignty under God. But this pretence of Covenant with God, is so evident a lye, even in the pretenders own consciences, that it is not onely an act of an unjust, but also of a vile, and unmanly disposition.

2. Sovereigne Power Cannot Be Forfeited

Secondly, Because the Right of bearing the Person of them all, is given to him they make Sovereigne, by Covenant onely of one to another, and not of him to any of them; there can happen no breach of Covenant on the part of the Sovereigne; and consequently none of his Subjects, by any pretence of forfeiture, can be freed from his Subjection. That he which is made Sovereigne maketh no Covenant with his Subjects beforehand, is manifest; because either he must make

it with the whole multitude, as one party to the Covenant; or he must make a severall Covenant with every man. With the whole, as one party, it is impossible; because as yet they are not one Person: and if he make so many severall Covenants as there be men, those Covenants after he hath the Sovereignty are voyd, because what act soever can be pretended by any one of them for breach thereof, is the act both of himselfe, and of all the rest, because done in the Person, and by the Right of every one of them in particular. Besides, if any one, or more of them, pretend a breach of the Covenant made by the Sovereigne at his Institution; and others, or one other of his Subjects, or himselfe alone, pretend there was no such breach, there is in this case, no Judge to decide the controversie: it returns therefore to the Sword again; and every man recovereth the right of Protecting himselfe by his own strength, contrary to the designe they had in the Institution. It is therefore in vain to grant Sovereignty by way of precedent Covenant. The opinion that any Monarch receiveth his Power by Covenant, that is to say on Condition, proceedeth from want of understanding this easie truth, that Covenants being but words, and breath, have no force to oblige, contain, constrain, or protect any man, but what it has from the publique Sword; that is, from the untied hands of that Man, or Assembly of men that hath the Sovereignty, and whose actions are avouched by them all, and performed by the strength of them all, in him united. But when an Assembly of men is made Sovereigne; then no man imagineth any such Covenant to have past in the Institution; for no man is so dull as to say, for example, the People of Rome, made a Covenant with the Romans, to hold the Sovereignty on such or such conditions; which not performed, the Romans might lawfully depose the Roman People. That men see not the reason to be alike in a Monarchy, and in a Popular Government, proceedeth from the ambition of some, that are kinder to the government of an Assembly, whereof they may hope to participate, than of Monarchy, which they despair to enjoy.

3. No Man Can Without Injustice Protest Against The

Institution Of The Sovereigne Declared By The Major Part. Thirdly, because the major part hath by consenting voices declared a Sovereigne; he that dissented must now consent with the rest; that is, be contented to avow all the actions he shall do, or else justly be destroyed by the rest. For if he voluntarily entered into the Congregation of them that were assembled, he sufficiently declared thereby his will (and therefore tacitely covenanted) to stand to what the major part should ordayne: and therefore if he refuse to stand thereto, or make Protestation against any of their Decrees, he does contrary to his Covenant, and therefore unjustly. And whether he be of the Congregation, or not; and whether his consent be asked, or not, he must either submit to their decrees, or be left in the condition of warre he was in before; wherein he might without injustice be destroyed by any man whatsoever.

4. The Sovereigns Actions Cannot Be Justly Accused By The Subject

Fourthly, because every Subject is by this Institution Author of all the Actions, and Judgements of the Sovereigne Instituted; it followes, that whatsoever he doth, it can be no injury to any of his Subjects; nor ought he to be by any of them accused of Injustice. For he that doth any thing by authority from another, doth therein no injury to him by whose authority he acteth: But by this Institution of a Common-wealth, every particular man is Author of all the Sovereigne doth; and consequently he that complaineth of injury from his Sovereigne, complaineth of that whereof he himselfe is Author; and therefore ought not to accuse any man but himselfe; no nor himselfe of injury; because to do injury to ones selfe, is impossible. It is true that they that have Sovereigne power, may commit Iniquity; but not Injustice, or Injury in the proper signification.

5. What Soever The Sovereigne Doth, Is Unpunishable By The Subject

Fiftly, and consequently to that which was sayd last, no man that hath Sovereigne power can justly be put to death, or otherwise in any manner by his Subjects punished. For seeing every Subject is author of the actions of his Sovereigne; he punisheth another, for the actions committed by himselfe.

6. The Sovereigne Is Judge Of What Is Necessary For The Peace

And Defence Of His Subjects

And because the End of this Institution, is the Peace and Defence of them all; and whosoever has right to the End, has right to the Means; it belongeth of Right, to whatsoever Man, or Assembly that hath the Sovereignty, to be Judge both of the meanes of Peace and Defence; and also of the hindrances, and disturbances of the same; and to do whatsoever he shall think necessary to be done, both beforehand, for the preserving of Peace and Security, by prevention of discord at home and Hostility from abroad; and, when Peace and Security are lost, for the recovery of the same. And therefore,

And Judge Of What Doctrines Are Fit To Be Taught Them

Sixtly, it is annexed to the Sovereignty, to be Judge of what Opinions and Doctrines are averse, and what conducing to Peace; and consequently, on what occasions, how farre, and what, men are to be trusted withall, in speaking to Multitudes of people; and who shall examine the Doctrines of all bookes before they be published. For the Actions of men proceed from their Opinions; and in the

wel governing of Opinions, consisteth the well governing of mens Actions, in order to their Peace, and Concord. And though in matter of Doctrine, nothing ought to be regarded but the Truth; yet this is not repugnant to regulating of the same by Peace. For Doctrine Repugnant to Peace, can no more be True, than Peace and Concord can be against the Law of Nature. It is true, that in a Common-wealth, where by the negligence, or unskilfullnesse of Governours, and Teachers, false Doctrines are by time generally received; the contrary Truths may be generally offensive; Yet the most sudden, and rough busling in of a new Truth, that can be, does never breake the Peace, but onely somtimes awake the Warre. For those men that are so remissely governed, that they dare take up Armes, to defend, or introduce an Opinion, are still in Warre; and their condition not Peace, but only a Cessation of Armes for feare of one another; and they live as it were, in the procincts of battaile continually. It belongeth therefore to him that hath the Sovereign Power, to be Judge, or constitute all Judges of Opinions and Doctrines, as a thing necessary to Peace, thereby to prevent Discord and Civill Warre.

7. The Right Of Making Rules, Whereby The Subject May

Every Man Know What Is So His Owne, As No Other Subject

Can Without Injustice Take It From Him

Seventhly, is annexed to the Soveraigntie, the whole power of prescribing the Rules, whereby every man may know, what Goods he may enjoy and what Actions he may doe, without being molested by any of his fellow Subjects: And this is it men Call Propriety. For before constitution of Sovereign Power (as hath already been shewn) all men had right to all things; which necessarily causeth Warre: and therefore this Proprietie, being necessary to Peace, and depending on Sovereign Power, is the Act of the Power, in order to the publique peace. These Rules of Propriety (or Meum and Tuum) and of Good, Evill, Lawfull and

Unlawfull in the actions of subjects, are the Civill Lawes, that is to say, the lawes of each Commonwealth in particular; though the name of Civill Law be now restrained to the antient Civill Lawes of the City of Rome; which being the head of a great part of the World, her Lawes at that time were in these parts the Civill Law.

8. To Him Also Belongeth The Right Of All Judicature

And Decision Of Controversies:

Eightly, is annexed to the Sovereigntie, the Right of Judicature; that is to say, of hearing and deciding all Controversies, which may arise concerning Law, either Civill, or naturall, or concerning Fact. For without the decision of Controversies, there is no protection of one Subject, against the injuries of another; the Lawes concerning Meum and Tuum are in vaine; and to every man remaineth, from the naturall and necessary appetite of his own conservation, the right of protecting himselfe by his private strength, which is the condition of Warre; and contrary to the end for which every Common-wealth is instituted.

9. And Of Making War, And Peace, As He Shall Think Best:

Ninthly, is annexed to the Sovereignty, the Right of making Warre, and Peace with other Nations, and Common-wealths; that is to say, of Judging when it is for the publique good, and how great forces are to be assembled, armed, and payd for that end; and to levy mony upon the Subjects, to defray the expenses thereof. For the Power by which the people are to be defended, consisteth in their Armies; and the strength of an Army, in the union of their strength under one Command; which Command the Sovereign Instituted, therefore hath; because the command

of the Militia, without other Institution, maketh him that hath it Sovereign. And therefore whosoever is made Generall of an Army, he that hath the Sovereign Power is alwayes Generallissimo.

10. And Of Choosing All Counsellours, And Ministers,

Both Of Peace, And Warre:

Tenthly, is annexed to the Sovereignty, the choosing of all Counsellours, Ministers, Magistrates, and Officers, both in peace, and War. For seeing the Sovereign is charged with the End, which is the common Peace and Defence; he is understood to have Power to use such Means, as he shall think most fit for his discharge.

11. And Of Rewarding, And Punishing, And That (Where No

Former Law hath Determined The Measure Of It) Arbitrary:

Eleventhly, to the Sovereign is committed the Power of Rewarding with riches, or honour; and of Punishing with corporall, or pecuniary punishment, or with ignominy every Subject according to the Lawe he hath formerly made; or if there be no Law made, according as he shall judge most to conduce to the encouraging of men to serve the Common-wealth, or deterring of them from doing dis-service to the same.

12. And Of Honour And Order

Lastly, considering what values men are naturally apt to set upon themselves; what respect they look for from others; and how little they value other men; from whence continually arise amongst them, Emulation, Quarrells, Factions, and at last Warre, to the destroying of one another, and diminution of their strength against a Common Enemy; It is necessary that there be Lawes of Honour, and a publique rate of the worth of such men as have deserved, or are able to deserve well of the Common-wealth; and that there be force in the hands of some or other, to put those Lawes in execution. But it hath already been shown, that not onely the whole Militia, or forces of the Common-wealth; but also the Judicature of all Controversies, is annexed to the Sovereignty. To the Sovereign therefore it belongeth also to give titles of Honour; and to appoint what Order of place, and dignity, each man shall hold; and what signes of respect, in publique or private meetings, they shall give to one another.

These Rights Are Indivisible

These are the Rights, which make the Essence of Sovereignty; and which are the marques, whereby a man may discern in what Man, or Assembly of men, the Sovereign Power is placed, and resideth. For these are incommunicable, and inseparable. The Power to coyn Mony; to dispose of the estate and persons of Infant heires; to have praeemption in Markets; and all other Statute Praerogatives, may be transferred by the Sovereign; and yet the Power to protect his Subject be retained. But if he transferre the Militia, he retains the Judicature in vain, for want of execution of the Lawes; Or if he grant away the Power of raising Mony; the Militia is in vain: or if he give away the government of doctrines, men will be frighted into rebellion with the feare of Spirits. And so if we consider any one of the said Rights, we shall presently see, that the holding of all the rest, will produce no effect, in the conservation of Peace and Justice, the end for which all Common-wealths are Instituted. And this division is it, whereof it is said, “A

kingdome divided in it selfe cannot stand:” For unlesse this division precede, division into opposite Armies can never happen. If there had not first been an opinion received of the greatest part of England, that these Powers were divided between the King, and the Lords, and the House of Commons, the people had never been divided, and fallen into this Civill Warre; first between those that disagreed in Politiques; and after between the Dissenters about the liberty of Religion; which have so instructed men in this point of Sovereign Right, that there be few now (in England,) that do not see, that these Rights are inseparable, and will be so generally acknowledged, at the next return of Peace; and so continue, till their miseries are forgotten; and no longer, except the vulgar be better taught than they have hetherto been.

And Can By No Grant Passe Away Without Direct

Renouncing Of The Sovereign Power

And because they are essentiall and inseparable Rights, it follows necessarily, that in whatsoever, words any of them seem to be granted away, yet if the Sovereign Power it selfe be not in direct termes renounced, and the name of Sovereign no more given by the Grantees to him that Grants them, the Grant is voyd: for when he has granted all he can, if we grant back the Sovereignty, all is restored, as inseparably annexed thereunto.

The Power And Honour Of Subjects Vanisheth In The Presence

Of The Power Sovereign

This great Authority being indivisible, and inseparably annexed to the Sovereignty, there is little ground for the opinion of them, that say of Sovereign Kings, though they be *Singulis Majores*, of greater Power than every one of their Subjects, yet they be *Universis Minores*, of lesse power than them all together. For if by All Together, they mean not the collective body as one person, then All Together, and Every One, signifie the same; and the speech is absurd. But if by All Together, they understand them as one Person (which person the Sovereign bears,) then the power of all together, is the same with the Sovereigns power; and so again the speech is absurd; which absurdity they see well enough, when the Sovereignty is in an Assembly of the people; but in a Monarch they see it not; and yet the power of Sovereignty is the same in whomsoever it be placed.

And as the Power, so also the Honour of the Sovereign, ought to be greater, than that of any, or all the Subjects. For in the Sovereignty is the fountain of Honour. The dignities of Lord, Earle, Duke, and Prince are his Creatures. As in the presence of the Master, the Servants are equall, and without any honour at all; So are the Subjects, in the presence of the Sovereign. And though they shine some more, some lesse, when they are out of his sight; yet in his presence, they shine no more than the Starres in presence of the Sun.

Sovereigne Power Not Hurtfull As The Want Of It,

And The Hurt Proceeds For The Greatest Part From Not

Submitting Readily, To A Lesse

But a man may here object, that the Condition of Subjects is very miserable; as being obnoxious to the lusts, and other irregular passions of him, or them that have so unlimited a Power in their hands. And commonly they that live under a Monarch, think it the fault of Monarchy; and they that live under the government of Democracy, or other Sovereign Assembly, attribute all the inconvenience to

that forme of Common-wealth; whereas the Power in all formes, if they be perfect enough to protect them, is the same; not considering that the estate of Man can never be without some incommmodity or other; and that the greatest, that in any forme of Government can possibly happen to the people in generall, is scarce sensible, in respect of the miseries, and horrible calamities, that accompany a Civill Warre; or that dissolute condition of masterlesse men, without subjection to Lawes, and a coercive Power to tye their hands from rapine, and revenge: nor considering that the greatest pressure of Sovereign Governours, proceedeth not from any delight, or profit they can expect in the dammage, or weakening of their subjects, in whose vigor, consisteth their own selves, that unwillingly contributing to their own defence, make it necessary for their Governours to draw from them what they can in time of Peace, that they may have means on any emergent occasion, or sudden need, to resist, or take advantage on their Enemies. For all men are by nature provided of notable multiplying glasses, (that is their Passions and Self-love,) through which, every little payment appeareth a great grievance; but are destitute of those prospective glasses, (namely Morall and Civill Science,) to see a farre off the miseries that hang over them, and cannot without such payments be avoyded.

CHAPTER XIX. OF THE SEVERALL KINDS OF COMMON-WEALTH BY INSTITUTION,

AND OF SUCCESSION TO THE SOVERAIGNE POWER

The Different Formes Of Common-wealths But Three

The difference of Common-wealths, consisteth in the difference of the Sovereign, or the Person representative of all and every one of the Multitude. And because the Sovereignty is either in one Man, or in an Assembly of more than one; and into that Assembly either Every man hath right to enter, or not every one, but Certain men distinguished from the rest; it is manifest, there can be but Three kinds of Common-wealth. For the Representative must needs be One man, or More: and if more, then it is the Assembly of All, or but of a Part. When the Representative is One man, then is the Common-wealth a MONARCHY: when an Assembly of All that will come together, then it is a DEMOCRACY, or Popular Common-wealth: when an Assembly of a Part onely, then it is called an ARISTOCRACY. Other kind of Common-wealth there can be none: for either One, or More, or All must have the Sovereign Power (which I have shewn to be indivisible) entire.

Tyranny And Oligarchy, But Different Names Of Monarchy, And Aristocracy

There be other names of Government, in the Histories, and books of Policy; as Tyranny, and Oligarchy: But they are not the names of other Formes of Government, but of the same Formes misliked. For they that are discontented under Monarchy, call it Tyranny; and they that are displeased with Aristocracy,

called it Oligarchy: so also, they which find themselves grieved under a Democracy, call it Anarchy, (which signifies want of Government;) and yet I think no man believes, that want of Government, is any new kind of Government: nor by the same reason ought they to believe, that the Government is of one kind, when they like it, and another, when they dislike it, or are oppressed by the Governours.

Subordinate Representatives Dangerous

It is manifest, that men who are in absolute liberty, may, if they please, give Authority to One Man, to represent them every one; as well as give such Authority to any Assembly of men whatsoever; and consequently may subject themselves, if they think good, to a Monarch, as absolutely, as to any other Representative. Therefore, where there is already erected a Sovereign Power, there can be no other Representative of the same people, but onely to certain particular ends, by the Sovereign limited. For that were to erect two Sovereigns; and every man to have his person represented by two Actors, that by opposing one another, must needs divide that Power, which (if men will live in Peace) is indivisible, and thereby reduce the Multitude into the condition of Warre, contrary to the end for which all Sovereignty is instituted. And therefore as it is absurd, to think that a Sovereign Assembly, inviting the People of their Dominion, to send up their Deputies, with power to make known their Advise, or Desires, should therefore hold such Deputies, rather than themselves, for the absolute Representative of the people: so it is absurd also, to think the same in a Monarchy. And I know not how this so manifest a truth, should of late be so little observed; that in a Monarchy, he that had the Sovereignty from a descent of 600 years, was alone called Sovereign, had the title of Majesty from every one of his Subjects, and was unquestionably taken by them for their King; was notwithstanding never considered as their Representative; that name without contradiction passing for

the title of those men, which at his command were sent up by the people to carry their Petitions, and give him (if he permitted it) their advise. Which may serve as an admonition, for those that are the true, and absolute Representative of a People, to instruct men in the nature of that Office, and to take heed how they admit of any other generall Representation upon any occasion whatsoever, if they mean to discharge the truth committed to them.

Comparison Of Monarchy, With Sovereign Assemblyes

The difference between these three kindes of Common-wealth, consisteth not in the difference of Power; but in the difference of Convenience, or Aptitude to produce the Peace, and Security of the people; for which end they were instituted. And to compare Monarchy with the other two, we may observe; First, that whosoever beareth the Person of the people, or is one of that Assembly that bears it, beareth also his own naturall Person. And though he be carefull in his politique Person to procure the common interest; yet he is more, or no lesse carefull to procure the private good of himselfe, his family, kindred and friends; and for the most part, if the publique interest chance to crosse the private, he prefers the private: for the Passions of men, are commonly more potent than their Reason. From whence it follows, that where the publique and private interest are most closely united, there is the publique most advanced. Now in Monarchy, the private interest is the same with the publique. The riches, power, and honour of a Monarch arise onely from the riches, strength and reputation of his Subjects. For no King can be rich, nor glorious, nor secure; whose Subjects are either poore, or contemptible, or too weak through want, or dissention, to maintain a war against their enemies: Whereas in a Democracy, or Aristocracy, the publique prosperity conferres not so much to the private fortune of one that is corrupt, or ambitious, as doth many times a perfidious advice, a treacherous action, or a Civill warre.

Secondly, that a Monarch receiveth counsell of whom, when, and where he pleaseth; and consequently may heare the opinion of men versed in the matter about which he deliberates, of what rank or quality soever, and as long before the time of action, and with as much secrecy, as he will. But when a Sovereigne Assembly has need of Counsell, none are admitted but such as have a Right thereto from the beginning; which for the most part are of those who have beene versed more in the acquisition of Wealth than of Knowledge; and are to give their advice in long discourses, which may, and do commonly excite men to action, but not governe them in it. For the Understanding is by the flame of the Passions, never enlightned, but dazled: Nor is there any place, or time, wherein an Assemblie can receive Counsell with secrecie, because of their owne Multitude.

Thirdly, that the Resolutions of a Monarch, are subject to no other Inconstancy, than that of Humane Nature; but in Assemblies, besides that of Nature, there ariseth an Inconstancy from the Number. For the absence of a few, that would have the Resolution once taken, continue firme, (which may happen by security, negligence, or private impediments,) or the diligent appearance of a few of the contrary opinion, undoes to day, all that was concluded yesterday.

Fourthly, that a Monarch cannot disagree with himselfe, out of envy, or interest; but an Assembly may; and that to such a height, as may produce a Civill Warre.

Fifthly, that in Monarchy there is this inconvenience; that any Subject, by the power of one man, for the enriching of a favourite or flatterer, may be deprived of all he possesseth; which I confesse is a great and inevitable inconvenience. But the same may as well happen, where the Sovereigne Power is in an Assembly: for their power is the same; and they are as subject to evill Counsell, and to be seduced by Orators, as a Monarch by Flatterers; and becoming one an others Flatterers, serve one anothers Covetousnesse and Ambition by turnes. And whereas the Favorites of an Assembly, are many; and the Kindred much more numerous, than of any Monarch. Besides, there is no Favourite of a Monarch, which cannot as well succour his friends, as hurt his enemies: But Orators, that is

to say, Favourites of Sovereigne Assemblies, though they have great power to hurt, have little to save. For to accuse, requires lesse Eloquence (such is mans Nature) than to excuse; and condemnation, than absolution more resembles Justice.

Sixtly, that it is an inconvenience in Monarchie, that the Soveraigntie may descend upon an Infant, or one that cannot discern between Good and Evill: and consisteth in this, that the use of his Power, must be in the hand of another Man, or of some Assembly of men, which are to governe by his right, and in his name; as Curators, and Protectors of his Person, and Authority. But to say there is inconvenience, in putting the use of the Sovereign Power, into the hand of a Man, or an Assembly of men; is to say that all Government is more Inconvenient, than Confusion, and Civill Warre. And therefore all the danger that can be pretended, must arise from the Contention of those, that for an office of so great honour, and profit, may become Competitors. To make it appear, that this inconvenience, proceedeth not from that forme of Government we call Monarchy, we are to consider, that the precedent Monarch, hath appointed who shall have the Tuiton of his Infant Successor, either expressly by Testament, or tacitly, by not controlling the Custome in that case received: And then such inconvenience (if it happen) is to be attributed, not to the Monarchy, but to the Ambition, and Injustice of the Subjects; which in all kinds of Government, where the people are not well instructed in their Duty, and the Rights of Soveraignty, is the same. Or else the precedent Monarch, hath not at all taken order for such Tuiton; And then the Law of Nature hath provided this sufficient rule, That the Tuiton shall be in him, that hath by Nature most interest in the preservation of the Authority of the Infant, and to whom least benefit can accrue by his death, or diminution. For seeing every man by nature seeketh his own benefit, and promotion; to put an Infant into the power of those, that can promote themselves by his destruction, or dammage, is not Tuiton, but Trechery. So that sufficient provision being taken, against all just quarrell, about the Government under a Child, if any contention arise to the disturbance of the publique Peace, it is not to be attributed to the

forme of Monarchy, but to the ambition of Subjects, and ignorance of their Duty. On the other side, there is no great Common-wealth, the Sovereignty whereof is in a great Assembly, which is not, as to consultations of Peace, and Warre, and making of Lawes, in the same condition, as if the Government were in a Child. For as a Child wants the judgement to dissent from counsell given him, and is thereby necessitated to take the advise of them, or him, to whom he is committed: So an Assembly wanteth the liberty, to dissent from the counsell of the major part, be it good, or bad. And as a Child has need of a Tutor, or Protector, to preserve his Person, and Authority: So also (in great Common-wealths,) the Sovereign Assembly, in all great dangers and troubles, have need of Custodes Libertatis; that is of Dictators, or Protectors of their Authoritie; which are as much as Temporary Monarchs; to whom for a time, they may commit the entire exercise of their Power; and have (at the end of that time) been oftner deprived thereof, than Infant Kings, by their Protectors, Regents, or any other Tutors.

Though the Kinds of Sovereigntie be, as I have now shewn, but three; that is to say, Monarchie, where one Man has it; or Democracie, where the generall Assembly of Subjects hath it; or Aristocracie, where it is in an Assembly of certain persons nominated, or otherwise distinguished from the rest: Yet he that shall consider the particular Common-wealthes that have been, and are in the world, will not perhaps easily reduce them to three, and may thereby be inclined to think there be other Formes, arising from these mingled together. As for example, Elective Kingdomes; where Kings have the Sovereigne Power put into their hands for a time; of Kingdomes, wherein the King hath a power limited: which Governments, are nevertheless by most Writers called Monarchie. Likewise if a Popular, or Aristocraticall Common-wealth, subdue an Enemies Countrie, and govern the same, by a President, Procurator, or other Magistrate; this may seeme perhaps at first sight, to be a Democraticall, or Aristocraticall Government. But it is not so. For Elective Kings, are not Sovereignes, but Ministers of the Sovereigne; nor limited Kings Sovereignes, but Ministers of them that have the Sovereigne Power: nor are those Provinces which are in subjection

to a Democracie, or Aristocracie of another Common-wealth, Democratically, or Aristocratically governed, but Monarchically.

And first, concerning an Elective King, whose power is limited to his life, as it is in many places of Christendome at this day; or to certaine Yeares or Moneths, as the Dictators power amongst the Romans; If he have Right to appoint his Successor, he is no more Elective but Hereditary. But if he have no Power to elect his Successor, then there is some other Man, or Assembly known, which after his decease may elect a new, or else the Common-wealth dieth, and dissolveth with him, and returneth to the condition of Warre. If it be known who have the power to give the Soveraigntie after his death, it is known also that the Soveraigntie was in them before: For none have right to give that which they have not right to possesse, and keep to themselves, if they think good. But if there be none that can give the Soveraigntie, after the decease of him that was first elected; then has he power, nay he is obliged by the Law of Nature, to provide, by establishing his Successor, to keep those that had trusted him with the Government, from relapsing into the miserable condition of Civill warre. And consequently he was, when elected, a Soveraign absolute.

Secondly, that King whose power is limited, is not superiour to him, or them that have the power to limit it; and he that is not superiour, is not supreme; that is to say not Soveraign. The Soveraignty therefore was alwaies in that Assembly which had the Right to Limit him; and by consequence the government not Monarchy, but either Democracy, or Aristocracy; as of old time in Sparta; where the Kings had a priviledge to lead their Armies; but the Soveraignty was in the Ephori.

Thirdly, whereas heretofore the Roman People, governed the land of Judea (for example) by a President; yet was not Judea therefore a Democracy; because they were not governed by any Assembly, into which, any of them, had right to enter; nor by an Aristocracy; because they were not governed by any Assembly, into which, any man could enter by their Election: but they were governed by one Person, which though as to the people of Rome was an Assembly of the people,

or Democracy; yet as to the people of Judea, which had no right at all of participating in the government, was a Monarch. For though where the people are governed by an Assembly, chosen by themselves out of their own number, the government is called a Democracy, or Aristocracy; yet when they are governed by an Assembly, not of their own choosing, 'tis a Monarchy; not of One man, over another man; but of one people, over another people.

Of The Right Of Succession

Of all these Formes of Government, the matter being mortall, so that not onely Monarchs, but also whole Assemblies dy, it is necessary for the conservation of the peace of men, that as there was order taken for an Artificiall Man, so there be order also taken, for an Artificiall Eternity of life; without which, men that are governed by an Assembly, should return into the condition of Warre in every age; and they that are governed by One man, as soon as their Governour dyeth. This Artificiall Eternity, is that which men call the Right of Succession.

There is no perfect forme of Government, where the disposing of the Succession is not in the present Sovereign. For if it be in any other particular Man, or private Assembly, it is in a person subject, and may be assumed by the Sovereign at his pleasure; and consequently the Right is in himselfe. And if it be in no particular man, but left to a new choyce; then is the Common-wealth dissolved; and the Right is in him that can get it; contrary to the intention of them that did institute the Common-wealth, for their perpetuall, and not temporary security.

In a Democracy, the whole Assembly cannot faile, unlesse the Multitude that are to be governed faile. And therefore questions of the right of Succession, have in that forme of Government no place at all.

In an Aristocracy, when any of the Assembly dyeth, the election of another into his room belongeth to the Assembly, as the Sovereign, to whom belongeth

the choosing of all Counsellours, and Officers. For that which the Representative doth, as Actor, every one of the Subjects doth, as Author. And though the Sovereign assembly, may give Power to others, to elect new men, for supply of their Court; yet it is still by their Authority, that the Election is made; and by the same it may (when the publique shall require it) be recalled.

The Present Monarch Hath Right To Dispose Of The Succession The greatest difficultie about the right of Succession, is in Monarchy: And the difficulty ariseth from this, that at first sight, it is not manifest who is to appoint the Successor; nor many times, who it is whom he hath appointed. For in both these cases, there is required a more exact ratiocination, than every man is accustomed to use. As to the question, who shall appoint the Successor, of a Monarch that hath the Sovereign Authority; that is to say, (for Elective Kings and Princes have not the Sovereign Power in propriety, but in use only,) we are to consider, that either he that is in possession, has right to dispose of the Succession, or else that right is again in the dissolved Multitude. For the death of him that hath the Sovereign power in propriety, leaves the Multitude without any Sovereign at all; that is, without any Representative in whom they should be united, and be capable of doing any one action at all: And therefore they are incapable of Election of any new Monarch; every man having equall right to submit himselfe to such as he thinks best able to protect him, or if he can, protect himselfe by his owne sword; which is a returne to Confusion, and to the condition of a War of every man against every man, contrary to the end for which Monarchy had its first Institution. Therefore it is manifest, that by the Institution of Monarchy, the disposing of the Successor, is alwaies left to the Judgment and Will of the present Possessor.

And for the question (which may arise sometimes) who it is that the Monarch in possession, hath designed to the succession and inheritance of his power; it is determined by his expresse Words, and Testament; or by other tacite signes sufficient.

Succession Passeth By Expresse Words;

By expresse Words, or Testament, when it is declared by him in his life time, viva voce, or by Writing; as the first Emperours of Rome declared who should be their Heires. For the word Heire does not of it selfe imply the Children, or nearest Kindred of a man; but whomsoever a man shall any way declare, he would have to succeed him in his Estate. If therefore a Monarch declare expresly, that such a man shall be his Heire, either by Word or Writing, then is that man immediately after the decease of his Predecessor, Invested in the right of being Monarch.

Or, By Not Controlling A Custome;

But where Testament, and expresse Words are wanting, other naturall signes of the Will are to be followed: whereof the one is Custome. And therefore where the Custome is, that the next of Kindred absolutely succeedeth, there also the next of Kindred hath right to the Succession; for that, if the will of him that was in possession had been otherwise, he might easily have declared the same in his life time. And likewise where the Custome is, that the next of the Male Kindred succeedeth, there also the right of Succession is in the next of the Kindred Male, for the same reason. And so it is if the Custome were to advance the Female. For whatsoever Custome a man may by a word controule, and does not, it is a naturall signe he would have that Custome stand.

Or, By Presumption Of Naturall Affection

But where neither Custome, nor Testament hath preceded, there it is to be understood, First, that a Monarchs will is, that the government remain Monarchicall; because he hath approved that government in himselfe. Secondly, that a Child of his own, Male, or Female, be preferred before any other; because men are presumed to be more enclined by nature, to advance their own children, than the children of other men; and of their own, rather a Male than a Female; because men, are naturally fitter than women, for actions of labour and danger. Thirdly, where his own Issue faileth, rather a Brother than a stranger; and so still the neerer in bloud, rather than the more remote, because it is alwayes presumed that the neerer of kin, is the neerer in affection; and 'tis evident that a man receives alwayes, by reflexion, the most honour from the greatnesse of his nearest kindred.

To Dispose Of The Succession, Though To A King Of Another Nation,

Not Unlawfull

But if it be lawfull for a Monarch to dispose of the Succession by words of Contract, or Testament, men may perhaps object a great inconvenience: for he may sell, or give his Right of governing to a stranger; which, because strangers (that is, men not used to live under the same government, not speaking the same language) do commonly undervalue one another, may turn to the oppression of his Subjects; which is indeed a great inconvenience; but it proceedeth not necessarily from the subjection to a strangers government, but from the unskilfulnesse of the Governours, ignorant of the true rules of Politiques. And therefore the Romans when they had subdued many Nations, to make their Government digestible, were wont to take away that grievance, as much as they thought necessary, by giving sometimes to whole Nations, and sometimes to Principall men of every Nation they conquered, not onely the Privileges, but also

the Name of Romans; and took many of them into the Senate, and Offices of charge, even in the Roman City. And this was it our most wise King, King James, aymed at, in endeavouring the Union of his two Realms of England and Scotland. Which if he could have obtained, had in all likelihood prevented the Civill warres, which make both those Kingdomes at this present, miserable. It is not therefore any injury to the people, for a Monarch to dispose of the Succession by Will; though by the fault of many Princes, it hath been sometimes found inconvenient. Of the lawfulnessse of it, this also is an argument, that whatsoever inconvenience can arrive by giving a Kingdome to a stranger, may arrive also by so marrying with strangers, as the Right of Succession may descend upon them: yet this by all men is accounted lawfull.

CHAPTER XX. OF DOMINION PATERNALL AND DESPOTICALL

A COMMON-WEALTH BY Acquisition, is that, where the Sovereign Power is acquired by Force; And it is acquired by force, when men singly, or many together by plurality of voyces, for fear of death, or bonds, do authorise all the actions of that Man, or Assembly, that hath their lives and liberty in his Power.

Wherein Different From A Common-wealth By Institution

And this kind of Dominion, or Sovereignty, differeth from Sovereignty by Institution, onely in this, That men who choose their Sovereign, do it for fear of one another, and not of him whom they Institute: But in this case, they subject themselves, to him they are afraid of. In both cases they do it for fear: which is to be noted by them, that hold all such Covenants, as proceed from fear of death, or violence, voyd: which if it were true, no man, in any kind of Common-wealth, could be obliged to Obedience. It is true, that in a Common-wealth once Instituted, or acquired, Promises proceeding from fear of death, or violence, are no Covenants, nor obliging, when the thing promised is contrary to the Lawes; But the reason is not, because it was made upon fear, but because he that promiseth, hath no right in the thing promised. Also, when he may lawfully performe, and doth not, it is not the Invalidity of the Covenant, that absolveth him, but the Sentence of the Sovereign. Otherwise, whensoever a man lawfully promiseth, he unlawfully breaketh: But when the Sovereign, who is the Actor, acquitteth him, then he is acquitted by him that exorted the promise, as by the Author of such absolution.

The Rights Of Sovereignty The Same In Both

But the Rights, and Consequences of Sovereignty, are the same in both. His Power cannot, without his consent, be Transferred to another: He cannot Forfeit it: He cannot be Accused by any of his Subjects, of Injury: He cannot be Punished by them: He is Judge of what is necessary for Peace; and Judge of Doctrines: He is Sole Legislator; and Supreme Judge of Controversies; and of the Times, and Occasions of Warre, and Peace: to him it belongeth to choose Magistrates, Counsellours, Commanders, and all other Officers, and Ministers; and to determine of Rewards, and punishments, Honour, and Order. The reasons whereof, are the same which are alledged in the precedent Chapter, for the same Rights, and Consequences of Sovereignty by Institution.

Dominion Paternall How Attained Not By Generation, But By Contract

Dominion is acquired two wayes; By Generation, and by Conquest. The right of Dominion by Generation, is that, which the Parent hath over his Children; and is called PATERNALL. And is not so derived from the Generation, as if therefore the Parent had Dominion over his Child because he begat him; but from the Childs Consent, either expresse, or by other sufficient arguments declared. For as to the Generation, God hath ordained to man a helper; and there be alwayes two that are equally Parents: the Dominion therefore over the Child, should belong equally to both; and he be equally subject to both, which is impossible; for no man can obey two Masters. And whereas some have attributed the Dominion to the Man onely, as being of the more excellent Sex; they misreckon in it. For there is not always that difference of strength or prudence between the man and the woman, as that the right can be determined without War. In Common-wealths,

this controversie is decided by the Civill Law: and for the most part, (but not alwayes) the sentence is in favour of the Father; because for the most part Common-wealths have been erected by the Fathers, not by the Mothers of families. But the question lyeth now in the state of meer Nature; where there are supposed no lawes of Matrimony; no lawes for the Education of Children; but the Law of Nature, and the naturall inclination of the Sexes, one to another, and to their children. In this condition of meer Nature, either the Parents between themselves dispose of the dominion over the Child by Contract; or do not dispose thereof at all. If they dispose thereof, the right passeth according to the Contract. We find in History that the Amazons Contracted with the Men of the neighbouring Countries, to whom they had recourse for issue, that the issue Male should be sent back, but the Female remain with themselves: so that the dominion of the Females was in the Mother.

Or Education;

If there be no Contract, the Dominion is in the Mother. For in the condition of Meer Nature, where there are no Matrimoniall lawes, it cannot be known who is the Father, unlesse it be declared by the Mother: and therefore the right of Dominion over the Child dependeth on her will, and is consequently hers. Again, seeing the Infant is first in the power of the Mother; so as she may either nourish, or expose it, if she nourish it, it oweth its life to the Mother; and is therefore obliged to obey her, rather than any other; and by consequence the Dominion over it is hers. But if she expose it, and another find, and nourish it, the Dominion is in him that nourisheth it. For it ought to obey him by whom it is preserved; because preservation of life being the end, for which one man becomes subject to another, every man is supposed to promise obedience, to him, in whose power it is to save, or destroy him.

Or Precedent Subjection Of One Of The Parents To The Other

If the Mother be the Fathers subject, the Child, is in the Fathers power: and if the Father be the Mothers subject, (as when a Sovereign Queen marrieth one of her subjects,) the Child is subject to the Mother; because the Father also is her subject.

If a man and a woman, Monarches of two severall Kingdomes, have a Child, and contract concerning who shall have the Dominion of him, the Right of the Dominion passeth by the Contract. If they contract not, the Dominion followeth the Dominion of the place of his residence. For the Sovereign of each Country hath Dominion over all that reside therein.

He that hath the Dominion over the Child, hath Dominion also over their Childrens Children. For he that hath Dominion over the person of a man, hath Dominion over all that is his; without which, Dominion were but a Title, without the effect.

The Right Of Succession Followeth The Rules Of The Rights Of Possession

The Right of Succession to Paternall dominion, proceedeth in the same manner, as doth the Right of Succession to Monarchy; of which I have already sufficiently spoken in the precedent chapter.

Despoticall Dominion, How Attained

Dominion acquired by Conquest, or Victory in war, is that which some Writers call DESPOTICALL, from Despotes, which signifieth a Lord, or Master; and is

the Dominion of the Master over his Servant. And this Dominion is then acquired to the Victor, when the Vanquished, to avoyd the present stroke of death, covenanteth either in expresse words, or by other sufficient signes of the Will, that so long as his life, and the liberty of his body is allowed him, the Victor shall have the use thereof, at his pleasure. And after such Covenant made, the Vanquished is a SERVANT, and not before: for by the word Servant (whether it be derived from Servire, to Serve, or from Servare, to Save, which I leave to Grammarians to dispute) is not meant a Captive, which is kept in prison, or bonds, till the owner of him that took him, or bought him of one that did, shall consider what to do with him: (for such men, (commonly called Slaves,) have no obligation at all; but may break their bonds, or the prison; and kill, or carry away captive their Master, justly:) but one, that being taken, hath corporall liberty allowed him; and upon promise not to run away, nor to do violence to his Master, is trusted by him.

Not By The Victory, But By The Consent Of The Vanquished

It is not therefore the Victory, that giveth the right of Dominion over the Vanquished, but his own Covenant. Nor is he obliged because he is Conquered; that is to say, beaten, and taken, or put to flight; but because he commeth in, and submitteth to the Victor; Nor is the Victor obliged by an enemies rendring himselfe, (without promise of life,) to spare him for this his yeelding to discretion; which obliges not the Victor longer, than in his own discretion hee shall think fit.

And that men do, when they demand (as it is now called) Quarter, (which the Greeks called Zogria, taking alive,) is to evade the present fury of the Victor, by Submission, and to compound for their life, with Ransome, or Service: and therefore he that hath Quarter, hath not his life given, but deferred till farther deliberation; For it is not an yeelding on condition of life, but to discretion. And then onely is his life in security, and his service due, when the Victor hath trusted

him with his corporall liberty. For Slaves that work in Prisons, or Fetters, do it not of duty, but to avoyd the cruelty of their task-masters.

The Master of the Servant, is Master also of all he hath; and may exact the use thereof; that is to say, of his goods, of his labour, of his servants, and of his children, as often as he shall think fit. For he holdeth his life of his Master, by the covenant of obedience; that is, of owning, and authorising whatsoever the Master shall do. And in case the Master, if he refuse, kill him, or cast him into bonds, or otherwise punish him for his disobedience, he is himselfe the author of the same; and cannot accuse him of injury.

In summe the Rights and Consequences of both Paternall and Despotically Dominion, are the very same with those of a Sovereign by Institution; and for the same reasons: which reasons are set down in the precedent chapter. So that for a man that is Monarch of divers Nations, whereof he hath, in one the Sovereignty by Institution of the people assembled, and in another by Conquest, that is by the Submission of each particular, to avoyd death or bonds; to demand of one Nation more than of the other, from the title of Conquest, as being a Conquered Nation, is an act of ignorance of the Rights of Sovereignty. For the Sovereign is absolute over both alike; or else there is no Sovereignty at all; and so every man may Lawfully protect himselfe, if he can, with his own sword, which is the condition of war.

Difference Between A Family And A Kingdom

By this it appears, that a great Family if it be not part of some Common-wealth, is of it self, as to the Rights of Sovereignty, a little Monarchy; whether that Family consist of a man and his children; or of a man and his servants; or of a man, and his children, and servants together: wherein the Father of Master is the Sovereign. But yet a Family is not properly a Common-wealth; unlesse it be of that power by its own number, or by other opportunities, as not to be subdued without the hazard

of war. For where a number of men are manifestly too weak to defend themselves united, every one may use his own reason in time of danger, to save his own life, either by flight, or by submission to the enemy, as hee shall think best; in the same manner as a very small company of souldiers, surprised by an army, may cast down their armes, and demand quarter, or run away, rather than be put to the sword. And thus much shall suffice; concerning what I find by speculation, and deduction, of Sovereign Rights, from the nature, need, and designes of men, in erecting of Commonwealths, and putting themselves under Monarchs, or Assemblies, entrusted with power enough for their protection.

The Right Of Monarchy From Scripture

Let us now consider what the Scripture teacheth in the same point. To Moses, the children of Israel say thus. (Exod. 20. 19) “Speak thou to us, and we will heare thee; but let not God speak to us, lest we dye.” This is absolute obedience to Moses. Concerning the Right of Kings, God himself by the mouth of Samuel, saith, (1 Sam. 8. 11, 12, &c.) “This shall be the Right of the King you will have to reigne over you. He shall take your sons, and set them to drive his Chariots, and to be his horsemen, and to run before his chariots; and gather in his harvest; and to make his engines of War, and Instruments of his chariots; and shall take your daughters to make perfumes, to be his Cookes, and Bakers. He shall take your fields, your vine-yards, and your olive-yards, and give them to his servants. He shall take the tyth of your corne and wine, and give it to the men of his chamber, and to his other servants. He shall take your man-servants, and your maid-servants, and the choice of your youth, and employ them in his businesse. He shall take the tyth of your flocks; and you shall be his servants.” This is absolute power, and summed up in the last words, “you shall be his servants.” Again, when the people heard what power their King was to have, yet they consented thereto, and say thus, (Verse. 19 &c.) “We will be as all other nations, and our

King shall judge our causes, and goe before us, to conduct our wars.” Here is confirmed the Right that Sovereigns have, both to the Militia, and to all Judicature; in which is contained as absolute power, as one man can possibly transferre to another. Again, the prayer of King Salomon to God, was this. (1 Kings 3. 9) “Give to thy servant understanding, to judge thy people, and to discern between Good and Evill.” It belongeth therefore to the Sovereigne to bee Judge, and to praescribe the Rules of Discerning Good and Evill; which Rules are Lawes; and therefore in him is the Legislative Power. Saul sought the life of David; yet when it was in his power to slay Saul, and his Servants would have done it, David forbad them, saying (1 Sam. 24. 9) “God forbid I should do such an act against my Lord, the anoynted of God.” For obedience of servants St. Paul saith, (Coll. 3. 20) “Servants obey your masters in All things,” and, (Verse. 22) “Children obey your Parents in All things.” There is simple obedience in those that are subject to Paternall, or Despoticall Dominion. Again, (Math. 23. 2,3) “The Scribes and Pharisees sit in Moses chayre and therefore All that they shall bid you observe, that observe and do.” There again is simple obedience. And St. Paul, (Tit. 3. 2) “Warn them that they subject themselves to Princes, and to those that are in Authority, & obey them.” This obedience is also simple. Lastly, our Saviour himselfe acknowledges, that men ought to pay such taxes as are by Kings imposed, where he says, “Give to Caesar that which is Caesars;” and payed such taxes himselfe. And that the Kings word, is sufficient to take any thing from any subject, when there is need; and that the King is Judge of that need: For he himselfe, as King of the Jewes, commanded his Disciples to take the Asse, and Asses Colt to carry him into Jerusalem, saying, (Mat. 21. 2,3) “Go into the Village over against you, and you shall find a shee Asse tyed, and her Colt with her, unty them, and bring them to me. And if any man ask you, what you mean by it, Say the Lord hath need of them: And they will let them go.” They will not ask whether his necessity be a sufficient title; nor whether he be judge of that necessity; but acquiesce in the will of the Lord.

To these places may be added also that of Genesis, (Gen. 3. 5) “You shall be as Gods, knowing Good and Evill.” and verse 11. “Who told thee that thou wast naked? hast thou eaten of the tree, of which I commanded thee thou shouldest not eat?” For the Cognisance of Judicature of Good and Evill, being forbidden by the name of the fruit of the tree of Knowledge, as a triall of Adams obedience; The Divell to enflame the Ambition of the woman, to whom that fruit already seemed beautifull, told her that by tasting it, they should be as Gods, knowing Good and Evill. Whereupon having both eaten, they did indeed take upon them Gods office, which is Judicature of Good and Evill; but acquired no new ability to distinguish between them aright. And whereas it is sayd, that having eaten, they saw they were naked; no man hath so interpreted that place, as if they had formerly blind, as saw not their own skins: the meaning is plain, that it was then they first judged their nakednesse (wherein it was Gods will to create them) to be uncomely; and by being ashamed, did tacitely censure God himselfe. And thereupon God saith, “Hast thou eaten, &c.” as if he should say, doest thou that owest me obedience, take upon thee to judge of my Commandements? Whereby it is cleerly, (though Allegorically,) signified, that the Commands of them that have the right to command, are not by their Subjects to be censured, nor disputed.

Soveraign Power Ought In All Common-wealths To Be Absolute

So it appeareth plainly, to my understanding, both from Reason, and Scripture, that the Soveraign Power, whether placed in One Man, as in Monarchy, or in one Assembly of men, as in Popular, and Aristocraticall Common-wealths, is as great, as possibly men can be imagined to make it. And though of so unlimited a Power, men may fancy many evill consequences, yet the consequences of the want of it, which is perpetuall warre of every man against his neighbour, are much worse. The condition of man in this life shall never be without Inconveniences; but there happeneth in no Common-wealth any great Inconvenience, but what proceeds

from the Subjects disobedience, and breach of those Covenants, from which the Common-wealth had its being. And whosoever thinking Sovereign Power too great, will seek to make it lesse; must subject himselfe, to the Power, that can limit it; that is to say, to a greater.

The greatest objection is, that of the Practise; when men ask, where, and when, such Power has by Subjects been acknowledged. But one may ask them again, when, or where has there been a Kingdome long free from Sedition and Civill Warre. In those Nations, whose Common-wealths have been long-lived, and not been destroyed, but by forraign warre, the Subjects never did dispute of the Sovereign Power. But howsoever, an argument for the Practise of men, that have not sifted to the bottom, and with exact reason weighed the causes, and nature of Common-wealths, and suffer daily those miseries, that proceed from the ignorance thereof, is invalid. For though in all places of the world, men should lay the foundation of their houses on the sand, it could not thence be inferred, that so it ought to be. The skill of making, and maintaining Common-wealths, consisteth in certain Rules, as doth Arithmetique and Geometry; not (as Tennis-play) on Practise onely: which Rules, neither poor men have the leisure, nor men that have had the leisure, have hitherto had the curiosity, or the method to find out.

CHAPTER XXI. OF THE LIBERTY OF SUBJECTS

Liberty What

Liberty, or FREEDOME, signifieth (properly) the absence of Opposition; (by Opposition, I mean externall Impediments of motion;) and may be applyed no lesse to Irrational, and Inanimate creatures, than to Rationall. For whatsoever is so tyed, or environed, as it cannot move, but within a certain space, which space is determined by the opposition of some externall body, we say it hath not Liberty to go further. And so of all living creatures, whilst they are imprisoned, or restrained, with walls, or chayns; and of the water whilst it is kept in by banks, or vessels, that otherwise would spread it selfe into a larger space, we use to say, they are not at Liberty, to move in such manner, as without those externall impediments they would. But when the impediment of motion, is in the constitution of the thing it selfe, we use not to say, it wants the Liberty; but the Power to move; as when a stone lyeth still, or a man is fastned to his bed by sicknesse.

What It Is To Be Free

And according to this proper, and generally received meaning of the word, A FREE-MAN, is “he, that in those things, which by his strength and wit he is able to do, is not hindred to doe what he has a will to.” But when the words Free, and Liberty, are applyed to any thing but Bodies, they are abused; for that which is not subject to Motion, is not subject to Impediment: And therefore, when ’tis said (for example) The way is free, no liberty of the way is signified, but of those that walk

in it without stop. And when we say a Guift is free, there is not meant any liberty of the Guift, but of the Giver, that was not bound by any law, or Covenant to give it. So when we Speak Freely, it is not the liberty of voice, or pronunciation, but of the man, whom no law hath obliged to speak otherwise then he did. Lastly, from the use of the word Freewill, no liberty can be inferred to the will, desire, or inclination, but the liberty of the man; which consisteth in this, that he finds no stop, in doing what he has the will, desire, or inclination to doe.

Feare And Liberty Consistent

Feare and Liberty are consistent; as when a man throweth his goods into the Sea for Feare the ship should sink, he doth it neverthesse very willingly, and may refuse to doe it if he will: It is therefore the action, of one that was Free; so a man sometimes pays his debt, only for Feare of Imprisonment, which because no body hindred him from detaining, was the action of a man at Liberty. And generally all actions which men doe in Common-wealths, for Feare of the law, or actions, which the doers had Liberty to omit.

Liberty And Necessity Consistent

Liberty and Necessity are Consistent: As in the water, that hath not only Liberty, but a Necessity of descending by the Channel: so likewise in the Actions which men voluntarily doe; which (because they proceed from their will) proceed from Liberty; and yet because every act of mans will, and every desire, and inclination proceedeth from some cause, which causes in a continuall chaine (whose first link in the hand of God the first of all causes) proceed from Necessity. So that to him that could see the connexion of those causes, the Necessity of all mens voluntary actions, would appeare manifest. And therefore God, that seeth, and disposeth all

things, seeth also that the Liberty of man in doing what he will, is accompanied with the Necessity of doing that which God will, & no more, nor lesse. For though men may do many things, which God does not command, nor is therefore Author of them; yet they can have no passion, nor appetite to any thing, of which appetite Gods will is not the cause. And did not his will assure the Necessity of mans will, and consequently of all that on mans will dependeth, the Liberty of men would be a contradiction, and impediment to the omnipotence and Liberty of God. And this shall suffice, (as to the matter in hand) of that naturall Liberty, which only is properly called Liberty.

Artificiall Bonds, Or Covenants

But as men, for the atteyning of peace, and conservation of themselves thereby, have made an Artificiall Man, which we call a Common-wealth; so also have they made Artificiall Chains, called Civill Lawes, which they themselves, by mutuall covenants, have fastned at one end, to the lips of that Man, or Assembly, to whom they have given the Sovereaign Power; and at the other end to their own Ears. These Bonds in their own nature but weak, may neverthesse be made to hold, by the danger, though not by the difficulty of breaking them.

Liberty Of Subjects Consisteth In Liberty From Covenants

In relation to these Bonds only it is, that I am to speak now, of the Liberty of Subjects. For seeing there is no Common-wealth in the world, for the regulating of all the actions, and words of men, (as being a thing impossible:) it followeth necessarily, that in all kinds of actions, by the laws praetermitted, men have the Liberty, of doing what their own reasons shall suggest, for the most profitable to themselves. For if wee take Liberty in the proper sense, for corporall Liberty; that

is to say, freedome from chains, and prison, it were very absurd for men to clamor as they doe, for the Liberty they so manifestly enjoy. Againe, if we take Liberty, for an exemption from Lawes, it is no lesse absurd, for men to demand as they doe, that Liberty, by which all other men may be masters of their lives. And yet as absurd as it is, this is it they demand; not knowing that the Lawes are of no power to protect them, without a Sword in the hands of a man, or men, to cause those laws to be put in execution. The Liberty of a Subject, lyeth therefore only in those things, which in regulating their actions, the Sovereign hath praetermitted; such as is the Liberty to buy, and sell, and otherwise contract with one another; to choose their own abroad, their own diet, their own trade of life, and institute their children as they themselves think fit; & the like.

Liberty Of The Subject Consistent With Unlimited Power Of The Sovereign

Neverthelesse we are not to understand, that by such Liberty, the Sovereign Power of life, and death, is either abolished, or limited. For it has been already shewn, that nothing the Sovereign Representative can doe to a Subject, on what pretence soever, can properly be called Injustice, or Injury; because every Subject is Author of every act the Sovereign doth; so that he never wanteth Right to any thing, otherwise, than as he himself is the Subject of God, and bound thereby to observe the laws of Nature. And therefore it may, and doth often happen in Common-wealths, that a Subject may be put to death, by the command of the Sovereign Power; and yet neither doe the other wrong: as when Jephtha caused his daughter to be sacrificed: In which, and the like cases, he that so dieth, had Liberty to doe the action, for which he is neverthelesse, without Injury put to death. And the same holdeth also in a Sovereign Prince, that putteth to death an Innocent Subject. For though the action be against the law of Nature, as being contrary to Equitie, (as was the killing of Uriah, by David;) yet it was not an Injurie to Uriah; but to God. Not to Uriah, because the right to doe what he

pleased, was given him by Uriah himself; And yet to God, because David was Gods Subject; and prohibited all Iniquitie by the law of Nature. Which distinction, David himself, when he repented the fact, evidently confirmed, saying, “To thee only have I sinned.” In the same manner, the people of Athens, when they banished the most potent of their Common-wealth for ten years, thought they committed no Injustice; and yet they never questioned what crime he had done; but what hurt he would doe: Nay they commanded the banishment of they knew not whom; and every Citizen bringing his Oystershell into the market place, written with the name of him he desired should be banished, without actually accusing him, sometimes banished an Aristides, for his reputation of Justice; And sometimes a scurrilous Jester, as Hyperbolus, to make a Jest of it. And yet a man cannot say, the Sovereign People of Athens wanted right to banish them; or an Athenian the Libertie to Jest, or to be Just.

The Liberty Which Writers Praise, Is The Liberty Of Sovereigns;

Not Of Private Men

The Libertie, whereof there is so frequent, and honourable mention, in the Histories, and Philosophy of the Antient Greeks, and Romans, and in the writings, and discourse of those that from them have received all their learning in the Politiques, is not the Libertie of Particular men; but the Libertie of the Common-wealth: which is the same with that, which every man then should have, if there were no Civil Laws, nor Common-wealth at all. And the effects of it also be the same. For as amongst masterlesse men, there is perpetuall war, of every man against his neighbour; no inheritance, to transmit to the Son, nor to expect from the Father; no propriety of Goods, or Lands; no security; but a full and absolute Libertie in every Particular man: So in States, and Common-wealths not dependent on one another, every Common-wealth, (not every man) has an

absolute Libertie, to doe what it shall judge (that is to say, what that Man, or Assemblie that representeth it, shall judge) most conducing to their benefit. But withall, they live in the condition of a perpetuall war, and upon the confines of battel, with their frontiers armed, and canons planted against their neighbours round about. The Athenians, and Romanes, were free; that is, free Commonwealths: not that any particular men had the Libertie to resist their own Representative; but that their Representative had the Libertie to resist, or invade other people. There is written on the Turrets of the city of Luca in great characters at this day, the word LIBERTAS; yet no man can thence inferre, that a particular man has more Libertie, or Immunitie from the service of the Commonwealth there, than in Constantinople. Whether a Common-wealth be Monarchicall, or Popular, the Freedome is still the same.

But it is an easy thing, for men to be deceived, by the specious name of Libertie; and for want of Judgement to distinguish, mistake that for their Private Inheritance, and Birth right, which is the right of the Publique only. And when the same errour is confirmed by the authority of men in reputation for their writings in this subject, it is no wonder if it produce sedition, and change of Government. In these westerne parts of the world, we are made to receive our opinions concerning the Institution, and Rights of Common-wealths, from Aristotle, Cicero, and other men, Greeks and Romanes, that living under Popular States, derived those Rights, not from the Principles of Nature, but transcribed them into their books, out of the Practice of their own Common-wealths, which were Popular; as the Grammarians describe the Rules of Language, out of the Practise of the time; or the Rules of Poetry, out of the Poems of Homer and Virgil. And because the Athenians were taught, (to keep them from desire of changing their Government,) that they were Freemen, and all that lived under Monarchy were slaves; therefore Aristotle puts it down in his Politiques,(lib.6.cap.2) “In democracy, Liberty is to be supposed: for ’tis commonly held, that no man is Free in any other Government.” And as Aristotle; so Cicero, and other Writers have grounded their Civill doctrine, on the opinions of the Romans, who were taught to

hate Monarchy, at first, by them that having deposed their Sovereign, shared amongst them the Sovereignty of Rome; and afterwards by their Successors. And by reading of these Greek, and Latine Authors, men from their childhood have gotten a habit (under a false shew of Liberty,) of favouring tumults, and of licentious controlling the actions of their Sovereigns; and again of controlling those controllers, with the effusion of so much blood; as I think I may truly say, there was never any thing so deerly bought, as these Western parts have bought the learning of the Greek and Latine tongues.

Liberty Of The Subject How To Be Measured

To come now to the particulars of the true Liberty of a Subject; that is to say, what are the things, which though commanded by the Sovereign, he may neverthelesse, without Injustice, refuse to do; we are to consider, what Rights we passe away, when we make a Common-wealth; or (which is all one,) what Liberty we deny our selves, by owning all the Actions (without exception) of the Man, or Assembly we make our Sovereign. For in the act of our Submission, consisteth both our Obligation, and our Liberty; which must therefore be inferred by arguments taken from thence; there being no Obligation on any man, which ariseth not from some Act of his own; for all men equally, are by Nature Free. And because such arguments, must either be drawn from the expresse words, “I Authorise all his Actions,” or from the Intention of him that submitteth himselfe to his Power, (which Intention is to be understood by the End for which he so submitteth;) The Obligation, and Liberty of the Subject, is to be derived, either from those Words, (or others equivalent;) or else from the End of the Institution of Sovereignty; namely, the Peace of the Subjects within themselves, and their Defence against a common Enemy.

Subjects Have Liberty To Defend Their Own Bodies,

Even Against Them That Lawfully Invade Them

First therefore, seeing Sovereignty by Institution, is by Covenant of every one to every one; and Sovereignty by Acquisition, by Covenants of the Vanquished to the Victor, or Child to the Parent; It is manifest, that every Subject has Liberty in all those things, the right whereof cannot by Covenant be transferred. I have shewn before in the 14. Chapter, that Covenants, not to defend a mans own body, are voyd. Therefore,

Are Not Bound To Hurt Themselves;

If the Sovereign command a man (though justly condemned,) to kill, wound, or mayme himselfe; or not to resist those that assault him; or to abstain from the use of food, ayre, medicine, or any other thing, without which he cannot live; yet hath that man the Liberty to disobey.

If a man be interrogated by the Sovereign, or his Authority, concerning a crime done by himselfe, he is not bound (without assurance of Pardon) to confesse it; because no man (as I have shewn in the same Chapter) can be obliged by Covenant to accuse himselfe.

Again, the Consent of a Subject to Sovereign Power, is contained in these words, “I Authorise, or take upon me, all his actions;” in which there is no restriction at all, of his own former naturall Liberty: For by allowing him to Kill Me, I am not bound to Kill my selfe when he commands me. “’Tis one thing to say ‘Kill me, or my fellow, if you please;’ another thing to say, ‘I will kill my selfe, or my fellow.’” It followeth therefore, that

No man is bound by the words themselves, either to kill himselfe, or any other man; And consequently, that the Obligation a man may sometimes have, upon the

Command of the Sovereign to execute any dangerous, or dishonourable Office, dependeth not on the Words of our Submission; but on the Intention; which is to be understood by the End thereof. When therefore our refusall to obey, frustrates the End for which the Sovereignty was ordained; then there is no Liberty to refuse: otherwise there is.

Nor To Warfare, Unless They Voluntarily Undertake It

Upon this ground, a man that is commanded as a Souldier to fight against the enemy, though his Sovereign have Right enough to punish his refusall with death, may neverthesse in many cases refuse, without Injustice; as when he substituteth a sufficient Souldier in his place: for in this case he deserteth not the service of the Common-wealth. And there is allowance to be made for naturall timorousnesse, not onely to women, (of whom no such dangerous duty is expected,) but also to men of feminine courage. When Armies fight, there is on one side, or both, a running away; yet when they do it not out of trechery, but fear, they are not esteemed to do it unjustly, but dishonourably. For the same reason, to avoyd battell, is not Injustice, but Cowardise. But he that inrowleth himselfe a Souldier, or taketh imprest mony, taketh away the excuse of a timorous nature; and is obliged, not onely to go to the battell, but also not to run from it, without his Captaines leave. And when the Defence of the Common-wealth, requireth at once the help of all that are able to bear Arms, every one is obliged; because otherwise the Institution of the Common-wealth, which they have not the purpose, or courage to preserve, was in vain.

To resist the Sword of the Common-wealth, in defence of another man, guilty, or innocent, no man hath Liberty; because such Liberty, takes away from the Sovereign, the means of Protecting us; and is therefore destructive of the very essence of Government. But in case a great many men together, have already resisted the Sovereign Power Unjustly, or committed some Capitall crime, for

which every one of them expecteth death, whether have they not the Liberty then to joyn together, and assist, and defend one another? Certainly they have: For they but defend their lives, which the guilty man may as well do, as the Innocent. There was indeed injustice in the first breach of their duty; Their bearing of Arms subsequent to it, though it be to maintain what they have done, is no new unjust act. And if it be onely to defend their persons, it is not unjust at all. But the offer of Pardon taketh from them, to whom it is offered, the plea of self-defence, and maketh their perseverance in assisting, or defending the rest, unlawfull.

The Greatest Liberty Of Subjects, Dependeth On The Silence Of The Law

As for other Lyberties, they depend on the silence of the Law. In cases where the Sovereign has prescribed no rule, there the Subject hath the liberty to do, or forbear, according to his own discretion. And therefore such Liberty is in some places more, and in some lesse; and in some times more, in other times lesse, according as they that have the Sovereignty shall think most convenient. As for Example, there was a time, when in England a man might enter in to his own Land, (and dispossesse such as wrongfully possessed it) by force. But in after-times, that Liberty of Forcible entry, was taken away by a Statute made (by the King) in Parliament. And in some places of the world, men have the Liberty of many wives: in other places, such Liberty is not allowed.

If a Subject have a controversie with his Sovereigne, of Debt, or of right of possession of lands or goods, or concerning any service required at his hands, or concerning any penalty corporall, or pecuniary, grounded on a precedent Law; He hath the same Liberty to sue for his right, as if it were against a Subject; and before such Judges, as are appointed by the Sovereign. For seeing the Sovereign demandeth by force of a former Law, and not by vertue of his Power; he declareth thereby, that he requireth no more, than shall appear to be due by that Law. The sute therefore is not contrary to the will of the Sovereign; and consequently the

Subject hath the Liberty to demand the hearing of his Cause; and sentence, according to that Law. But if he demand, or take any thing by pretence of his Power; there lyeth, in that case, no action of Law: for all that is done by him in Vertue of his Power, is done by the Authority of every subject, and consequently, he that brings an action against the Sovereign, brings it against himselfe.

If a Monarch, or Sovereign Assembly, grant a Liberty to all, or any of his Subjects; which Grant standing, he is disabled to provide for their safety, the Grant is voyd; unlesse he directly renounce, or transferre the Sovereignty to another. For in that he might openly, (if it had been his will,) and in plain termes, have renounced, or transferred it, and did not; it is to be understood it was not his will; but that the Grant proceeded from ignorance of the repugnancy between such a Liberty and the Sovereign Power; and therefore the Sovereignty is still retayned; and consequently all those Powers, which are necessary to the exercising thereof; such as are the Power of Warre, and Peace, of Judicature, of appointing Officers, and Councillours, of levying Mony, and the rest named in the 18th Chapter.

In What Cases Subjects Absolved Of Their Obedience To Their Sovereign

The Obligation of Subjects to the Sovereign is understood to last as long, and no longer, than the power lasteth, by which he is able to protect them. For the right men have by Nature to protect themselves, when none else can protect them, can by no Covenant be relinquished. The Sovereignty is the Soule of the Commonwealth; which once departed from the Body, the members doe no more receive their motion from it. The end of Obedience is Protection; which, wheresoever a man seeth it, either in his own, or in anothers sword, Nature applyeth his obedience to it, and his endeavour to maintaine it. And though Sovereignty, in the intention of them that make it, be immortall; yet is it in its own nature, not only subject to violent death, by forreign war; but also through the ignorance, and

passions of men, it hath in it, from the very institution, many seeds of a naturall mortality, by Intestine Discord.

In Case Of Captivity

If a Subject be taken prisoner in war; or his person, or his means of life be within the Guards of the enemy, and hath his life and corporall Libertie given him, on condition to be Subject to the Victor, he hath Libertie to accept the condition; and having accepted it, is the subject of him that took him; because he had no other way to preserve himselfe. The case is the same, if he be detained on the same termes, in a forreign country. But if a man be held in prison, or bonds, or is not trusted with the libertie of his bodie; he cannot be understood to be bound by Covenant to subjection; and therefore may, if he can, make his escape by any means whatsoever.

In Case The Sovereign Cast Off The Government From Himself And Heyrs

If a Monarch shall relinquish the Sovereignty, both for himself, and his heires; His Subjects returne to the absolute Libertie of Nature; because, though Nature may declare who are his Sons, and who are the nerest of his Kin; yet it dependeth on his own will, (as hath been said in the precedent chapter,) who shall be his Heyr. If therefore he will have no Heyre, there is no Sovereignty, nor Subjection. The case is the same, if he dye without known Kindred, and without declaration of his Heyre. For then there can no Heire be known, and consequently no Subjection be due.

In Case Of Banishment

If the Sovereign Banish his Subject; during the Banishment, he is not Subject. But he that is sent on a message, or hath leave to travell, is still Subject; but it is, by Contract between Sovereigns, not by vertue of the covenant of Subjection. For whosoever entred into anothers dominion, is Subject to all the Lawes thereof; unless he have a privilege by the amity of the Sovereigns, or by speciall licence.

In Case The Sovereign Render Himself Subject To Another

If a Monarch subdued by war, render himself Subject to the Victor; his Subjects are delivered from their former obligation, and become obliged to the Victor. But if he be held prisoner, or have not the liberty of his own Body; he is not understood to have given away the Right of Soveraigntie; and therefore his Subjects are obliged to yield obedience to the Magistrates formerly placed, governing not in their own name, but in his. For, his Right remaining, the question is only of the Administration; that is to say, of the Magistrates and Officers; which, if he have not means to name, he is supposed to approve those, which he himself had formerly appointed.

CHAPTER XXII. OF SYSTEMES SUBJECT, POLITICALL, AND PRIVATE

The Divers Sorts Of Systemes Of People

Having spoken of the Generation, Forme, and Power of a Common-wealth, I am in order to speak next of the parts thereof. And first of Systemes, which resemble the similar parts, or Muscles of a Body naturall. By SYSTEMES; I understand any numbers of men joyned in one Interest, or one Businesse. Of which, some are Regular, and some Irregular. Regular are those, where one Man, or Assembly of men, is constituted Representative of the whole number. All other are Irregular.

Of Regular, some are Absolute, and Independent, subject to none but their own Representative: such are only Common-wealths; Of which I have spoken already in the 5. last preceding chapters. Others are Dependent; that is to say, Subordinate to some Sovereign Power, to which every one, as also their Representative is Subject.

Of Systemes subordinate, some are Politicall, and some Private. Politicall (otherwise Called Bodies Politique, and Persons In Law,) are those, which are made by authority from the Sovereign Power of the Common-wealth. Private, are those, which are constituted by Subjects amongst themselves, or by authoritie from a stranger. For no authority derived from forraign power, within the Dominion of another, is Publique there, but Private.

And of Private Systemes, some are Lawfull; some Unlawfull: Lawfull, are those which are allowed by the Common-wealth: all other are Unlawfull. Irregular Systemes, are those which having no Representative, consist only in concourse of People; which if not forbidden by the Common-wealth, nor made on evill designe, (such as are conflux of People to markets, or shews, or any other

harmesle end,) are Lawfull. But when the Intention is evill, or (if the number be considerable) unknown, they are Unlawfull.

In All Bodies Politique The Power Of The Representative Is Limited

In Bodies Politique, the power of the Representative is alwaies Limited: And that which prescribeth the limits thereof, is the Power Sovereign. For Power Unlimited, is absolute Sovereignty. And the Sovereign, in every Commonwealth, is the absolute Representative of all the Subjects; and therefore no other, can be Representative of any part of them, but so far forth, as he shall give leave; And to give leave to a Body Politique of Subjects, to have an absolute Representative to all intents and purposes, were to abandon the Government of so much of the Commonwealth, and to divide the Dominion, contrary to their Peace and Defence, which the Sovereign cannot be understood to doe, by any Grant, that does not plainly, and directly discharge them of their subjection. For consequences of words, are not the signes of his will, when other consequences are signes of the contrary; but rather signes of error, and misreckoning; to which all mankind is too prone.

The bounds of that Power, which is given to the Representative of a Bodie Politique, are to be taken notice of, from two things. One is their Writt, or Letters from the Sovereign: the other is the Law of the Common-wealth.

By Letters Patents

For though in the Institution or Acquisition of a Common-wealth, which is independent, there needs no Writing, because the Power of the Representative has there no other bounds, but such as are set out by the unwritten Law of Nature; yet in subordinate bodies, there are such diversities of Limitation necessary,

concerning their businesses, times, and places, as can neither be remembred without Letters, nor taken notice of, unlesse such Letters be Patent, that they may be read to them, and withall sealed, or testified, with the Seales, or other permanent signes of the Authority Sovereign.

And The Lawes

And because such Limitation is not alwaies easie, or perhaps possible to be described in writing; the ordinary Lawes, common to all Subjects, must determine, that the Representative may lawfully do, in all Cases, where the Letters themselves are silent. And therefore

When The Representative Is One Man, His Unwarranted Acts His Own Onely

In a Body Politique, if the Representative be one man, whatsoever he does in the Person of the Body, which is not warranted in his Letters, nor by the Lawes, is his own act, and not the act of the Body, nor of any other Member thereof besides himselfe: Because further than his Letters, or the Lawes limit, he representeth no mans person, but his own. But what he does according to these, is the act of every one: For of the Act of the Sovereign every one is Author, because he is their Representative unlimited; and the act of him that recedes not from the Letters of the Sovereign, is the act of the Sovereign, and therefore every member of the Body is Author of it.

When It Is An Assembly, It Is The Act Of Them That Assented Onely

But if the Representative be an Assembly, whatsoever that Assembly shall Decree, not warranted by their Letters, or the Lawes, is the act of the Assembly, or Body Politique, and the act of every one by whose Vote the Decree was made; but not the act of any man that being present Voted to the contrary; nor of any man absent, unlesse he Voted it by procuration. It is the act of the Assembly, because Voted by the major part; and if it be a crime, the Assembly may be punished, as farre-forth as it is capable, as by dissolution, or forfeiture of their Letters (which is to such artificiall, and fictitious Bodies, capitall,) or (if the Assembly have a Common stock, wherein none of the Innocent Members have propriety,) by pecuniary Mulct. For from corporall penalties Nature hath exempted all Bodies Politique. But they that gave not their Vote, are therefore Innocent, because the Assembly cannot Represent any man in things unwarranted by their Letters, and consequently are not involved in their Votes.

When The Representative Is One Man, If He Borrow Mony, Or Owe It, By Contract; He Is Lyable Onely, The Members Not If the person of the Body Politique being in one man, borrow mony of a stranger, that is, of one that is not of the same Body, (for no Letters need limit borrowing, seeing it is left to mens own inclinations to limit lending) the debt is the Representatives. For if he should have Authority from his Letters, to make the members pay what he borroweth, he should have by consequence the Sovereignty of them; and therefore the grant were either voyd, as proceeding from Errour, commonly incident to humane Nature, and an unsufficient signe of the will of the Granter; or if it be avowed by him, then is the Representer Sovereign, and falleth not under the present question, which is onely of Bodies subordinate. No member therefore is obliged to pay the debt so borrowed, but the Representative himselfe: because he that lendeth it, being a stranger to the Letters, and to the qualification of the Body, understandeth those onely for his debtors, that are engaged; and seeing the Representer can ingage himselfe, and none else, has him onely for Debtor; who must therefore pay him, out of the common stock (if there be any), or (if there be none) out of his own estate.

If he come into debt by Contract, or Mulct, the case is the same.

When It Is An Assembly, They Onely Are Liable That Have Assented

But when the Representative is an Assembly, and the debt to a stranger; all they, and onely they are responsible for the debt, that gave their votes to the borrowing of it, or to the Contract that made it due, or to the fact for which the Mulct was imposed; because every one of those in voting did engage himselfe for the payment: For he that is author of the borrowing, is obliged to the payment, even of the whole debt, though when payd by any one, he be discharged.

If The Debt Be To One Of The Assembly, The Body Onely Is Obligated

But if the debt be to one of the Assembly, the Assembly onely is obliged to the payment, out of their common stock (if they have any:) For having liberty of Vote, if he Vote the Mony, shall be borrowed, he Votes it shall be payd; If he Vote it shall not be borrowed, or be absent, yet because in lending, he voteth the borrowing, he contradicteth his former Vote, and is obliged by the later, and becomes both borrower and lender, and consequently cannot demand payment from any particular man, but from the common Treasure onely; which fayling he hath no remedy, nor complaint, but against himselfe, that being privy to the acts of the Assembly, and their means to pay, and not being enforced, did neverthelesse through his own folly lend his mony.

Protestation Against The Decrees Of Bodies Politique

Sometimes Lawful; But Against Sovereign Power Never It is manifest by this, that in Bodies Politique subordinate, and subject to a Sovereign Power, it is sometimes not onely lawfull, but expedient, for a particular man to make open protestation against the decrees of the Representative Assembly, and cause their dissent to be Registred, or to take witnesse of it; because otherwise they may be obliged to pay debts contracted, and be responsible for crimes committed by other men: But in a Sovereign Assembly, that liberty is taken away, both because he that protesteth there, denies their Sovereignty; and also because whatsoever is commanded by the Sovereign Power, is as to the Subject (though not so alwayes in the sight of God) justified by the Command; for of such command every Subject is the Author.

Bodies Politique For Government Of A Province, Colony, Or Town

The variety of Bodies Politique, is almost infinite; for they are not onely distinguished by the severall affaires, for which they are constituted, wherein there is an unspeakable diversitie; but also by the times, places, and numbers, subject to many limitations. And as to their affaires, some are ordained for Government; As first, the Government of a Province may be committed to an Assembly of men, wherein all resolutions shall depend on the Votes of the major part; and then this Assembly is a Body Politique, and their power limited by Commission. This word Province signifies a charge, or care of businesse, which he whose businesse it is, committeth to another man, to be administred for, and under him; and therefore when in one Common-wealth there be divers Countries, that have their Lawes distinct one from another, or are farre distant in place, the Administration of the Government being committed to divers persons, those Countries where the Sovereign is not resident, but governs by Commission, are called Provinces. But of the government of a Province, by an Assembly residing in the Province it selfe, there be few examples. The Romans who had the

Sovereignty of many Provinces; yet governed them alwaies by Presidents, and Praetors; and not by Assemblies, as they governed the City of Rome, and Territories adjacent. In like manner, when there were Colonies sent from England, to Plant Virginia, and Sommer-Ilands; though the government of them here, were committed to Assemblies in London, yet did those Assemblies never commit the Government under them to any Assembly there; but did to each Plantation send one Governour; For though every man, where he can be present by Nature, desires to participate of government; yet where they cannot be present, they are by Nature also enclined, to commit the Government of their common Interest rather to a Monarchicall, then a Popular form of Government: which is also evident in those men that have great private estates; who when they are unwilling to take the paines of administring the businesse that belongs to them, choose rather to trust one Servant, than a Assembly either of their friends or servants. But howsoever it be in fact, yet we may suppose the Government of a Province, or Colony committed to an Assembly: and when it is, that which in this place I have to say, is this; that whatsoever debt is by that Assembly contracted; or whatsoever unlawfull Act is decreed, is the Act onely of those that assented, and not of any that dissented, or were absent, for the reasons before alledged. Also that an Assembly residing out of the bounds of that Colony whereof they have the government, cannot execute any power over the persons, or goods of any of the Colonie, to seize on them for debt, or other duty, in any place without the Colony it selfe, as having no Jurisdiction, nor Authoritie elsewhere, but are left to the remedie, which the Law of the place alloweth them. And though the Assembly have right, to impose a Muilt upon any of their members, that shall break the Lawes they make; yet out of the Colonie it selfe, they have no right to execute the same. And that which is said here, of the Rights of an Assembly, for the government of a Province, or a Colony, is appliable also to an Assembly for the Government of a Town, or University, or a College, or a Church, or for any other Government over the persons of men.

And generally, in all Bodies Politique, if any particular member conceive himself Injured by the Body it self, the Cognisance of his cause belongeth to the Sovereign, and those the Sovereign hath ordained for Judges in such causes, or shall ordaine for that particular cause; and not to the Body it self. For the whole Body is in this case his fellow subject, which in a Sovereign Assembly, is otherwise: for there, if the Sovereign be not Judge, though in his own cause, there can be no Judge at all.

Bodies Politique For Ordering Of Trade

In a Bodie Politique, for the well ordering of forraigne Traffique, the most commodious Representative is an Assembly of all the members; that is to say, such a one, as every one that adventureth his mony, may be present at all the Deliberations, and Resolutions of the Body, if they will themselves. For proof whereof, we are to consider the end, for which men that are Merchants, and may buy and sell, export, and import their Merchandise, according to their own discretions, doe neverthelesse bind themselves up in one Corporation. It is true, there be few Merchants, that with the Merchandise they buy at home, can freight a Ship, to export it; or with that they buy abroad, to bring it home; and have therefore need to joyn together in one Society; where every man may either participate of the gaine, according to the proportion of his adventure; or take his own; and sell what he transports, or imports, at such prices as he thinks fit. But this is no Body Politique, there being no Common Representative to oblige them to any other Law, than that which is common to all other subjects. The End of their Incorporating, is to make their gaine the greater; which is done two wayes; by sole buying, and sole selling, both at home, and abroad. So that to grant to a Company of Merchants to be a Corporation, or Body Politique, is to grant them a double Monopoly, whereof one is to be sole buyers; another to be sole sellers. For when there is a Company incorporate for any particular forraign Country, they

only export the Commodities vendible in that Country; which is sole buying at home, and sole selling abroad. For at home there is but one buyer, and abroad but one that selleth: both which is gainfull to the Merchant, because thereby they buy at home at lower, and sell abroad at higher rates: And abroad there is but one buyer of forraign Merchandise, and but one that sels them at home; both which againe are gainfull to the adventurers.

Of this double Monopoly one part is disadvantageous to the people at home, the other to forraigners. For at home by their sole exportation they set what price they please on the husbandry and handy-works of the people; and by the sole importation, what price they please on all forraign commodities the people have need of; both which are ill for the people. On the contrary, by the sole selling of the native commodities abroad, and sole buying the forraign commodities upon the place, they raise the price of those, and abate the price of these, to the disadvantage of the forraigner: For where but one selleth, the Merchandise is the dearer; and where but one buyeth the cheaper: Such Corporations therefore are no other then Monopolies; though they would be very profitable for a Commonwealth, if being bound up into one body in forraigne Markets they were at liberty at home, every man to buy, and sell at what price he could.

The end then of these Bodies of Merchants, being not a Common benefit to the whole Body, (which have in this case no common stock, but what is deducted out of the particular adventures, for building, buying, victualling and manning of Ships,) but the particular gaine of every adventurer, it is reason that every one be acquainted with the employment of his own; that is, that every one be of the Assembly, that shall have the power to order the same; and be acquainted with their accounts. And therefore the Representative of such a Body must be an Assembly, where every member of the Body may be present at the consultations, if he will.

If a Body Politique of Merchants, contract a debt to a stranger by the act of their Representative Assembly, every Member is lyable by himself for the whole. For a stranger can take no notice of their private Lawes, but considereth them as

so many particular men, obliged every one to the whole payment, till payment made by one dischargeth all the rest: But if the debt be to one of the Company, the creditor is debter for the whole to himself, and cannot therefore demand his debt, but only from the common stock, if there be any.

If the Common-wealth impose a Tax upon the Body, it is understood to be layd upon every member proportionably to his particular adventure in the Company. For there is in this case no other common stock, but what is made of their particular adventures.

If a Mulet be layd upon the Body for some unlawfull act, they only are lyable by whose votes the act was decreed, or by whose assistance it was executed; for in none of the rest is there any other crime but being of the Body; which if a crime, (because the Body was ordeyned by the authority of the Common-wealth,) is not his.

If one of the Members be indebted to the Body, he may be sued by the Body; but his goods cannot be taken, nor his person imprisoned by the authority of the Body; but only by Authority of the Common-wealth: for if they can doe it by their own Authority, they can by their own Authority give judgement that the debt is due, which is as much as to be Judge in their own Cause.

A Bodie Politique For Counsel To Be Give To The Sovereign

These Bodies made for the government of Men, or of Traffique, be either perpetuall, or for a time prescribed by writing. But there be Bodies also whose times are limited, and that only by the nature of their businesse. For example, if a Sovereign Monarch, or a Sovereign Assembly, shall think fit to give command to the towns, and other severall parts of their territory, to send to him their Deputies, to enforme him of the condition, and necessities of the Subjects, or to advise with him for the making of good Lawes, or for any other cause, as with one Person representing the whole Country, such Deputies, having a place and time of

meeting assigned them, are there, and at that time, a Body Politique, representing every Subject of that Dominion; but it is onely for such matters as shall be propounded unto them by that Man, or Assembly, that by the Sovereign Authority sent for them; and when it shall be declared that nothing more shall be propounded, nor debated by them, the Body is dissolved. For if they were the absolute Representative of the people, then were it the Sovereign Assembly; and so there would be two Sovereign Assemblies, or two Sovereigns, over the same people; which cannot consist with their Peace. And therefore where there is once a Sovereignty, there can be no absolute Representation of the people, but by it. And for the limits of how farre such a Body shall represent the whole People, they are set forth in the Writing by which they were sent for. For the People cannot choose their Deputies to other intent, than is in the Writing directed to them from their Sovereign expressed.

A Regular Private Body, Lawfull, As A Family

Private Bodies Regular, and Lawfull, are those that are constituted without Letters, or other written Authority, saving the Lawes common to all other Subjects. And because they be united in one Person Representative, they are held for Regular; such as are all Families, in which the Father, or Master ordereth the whole Family. For he obligeth his Children, and Servants, as farre as the Law permitteth, though not further, because none of them are bound to obedience in those actions, which the Law hath forbidden to be done. In all other actions, during the time they are under domestique government, they are subject to their Fathers, and Masters, as to their immediate Sovereigns. For the Father, and Master being before the Institution of Common-wealth, absolute Sovereigns in their own Families, they lose afterward no more of their Authority, than the Law of the Common-wealth taketh from them.

Private Bodies Regular, But Unlawfull

Private Bodies Regular, but Unlawfull, are those that unite themselves into one person Representative, without any publique Authority at all; such as are the Corporations of Beggars, Theeves and Gipsies, the better to order their trade of begging, and stealing; and the Corporations of men, that by Authority from any forraign Person, unite themselves in anothers Dominion, for easier propagation of Doctrines, and for making a party, against the Power of the Common-wealth.

Systemes Irregular, Such As Are Private Leagues

Irregular Systemes, in their nature, but Leagues, or sometimes meer concourse of people, without union to any particular designe, not by obligation of one to another, but proceeding onely from a similitude of wills and inclinations, become Lawfull, or Unlawfull, according to the lawfulnessse, or unlawfulnessse of every particular mans design therein: And his designe is to be understood by the occasion.

The Leagues of Subjects, (because Leagues are commonly made for mutuall defence,) are in a Common-wealth (which is no more than a League of all the Subjects together) for the most part unnecessary, and savour of unlawfull designe; and are for that cause Unlawfull, and go commonly by the name of factions, or Conspiracies. For a League being a connexion of men by Covenants, if there be no power given to any one Man or Assembly, (as in the condition of meer Nature) to compell them to performance, is so long onely valid, as there ariseth no just cause of distrust: and therefore Leagues between Common-wealths, over whom there is no humane Power established, to keep them all in awe, are not onely lawfull, but also profitable for the time they last. But Leagues of the Subjects of

one and the same Common-wealth, where every one may obtain his right by means of the Sovereign Power, are unnecessary to the maintaining of Peace and Justice, and (in case the designe of them be evill, or Unknown to the Common-wealth) unlawfull. For all uniting of strength by private men, is, if for evill intent, unjust; if for intent unknown, dangerous to the Publique, and unjustly concealed.

Secret Cabals

If the Sovereign Power be in a great Assembly, and a number of men, part of the Assembly, without authority, consult a part, to contrive the guidance of the rest; This is a Faction, or Conspiracy unlawfull, as being a fraudulent seducing of the Assembly for their particular interest. But if he, whose private interest is to be debated, and judged in the Assembly, make as many friends as he can; in him it is no Injustice; because in this case he is no part of the Assembly. And though he hire such friends with mony, (unlesse there be an expresse Law against it,) yet it is not Injustice. For sometimes, (as mens manners are,) Justice cannot be had without mony; and every man may think his own cause just, till it be heard, and judged.

Feuds Of Private Families

In all Common-wealths, if a private man entertain more servants, than the government of his estate, and lawfull employment he has for them requires, it is Faction, and unlawfull. For having the protection of the Common-wealth, he needeth not the defence of private force. And whereas in Nations not thoroughly civilized, severall numerous Families have lived in continuall hostility, and invaded one another with private force; yet it is evident enough, that they have done unjustly; or else that they had no Common-wealth.

Factions For Government

And as Factions for Kindred, so also Factions for Government of Religion, as of Papists, Protestants, &c. or of State, as Patricians, and Plebeians of old time in Rome, and of Aristocraticalls and Democraticalls of old time in Greece, are unjust, as being contrary to the peace and safety of the people, and a taking of the Sword out of the hand of the Sovereign.

Concourse of people, is an Irregular System, the lawfulness, or unlawfulness, whereof dependeth on the occasion, and on the number of them that are assembled. If the occasion be lawfull, and manifest, the Concourse is lawfull; as the usuall meeting of men at Church, or at a publique Shew, in usuall numbers: for if the numbers be extraordinarily great, the occasion is not evident; and consequently he that cannot render a particular and good account of his being amongst them, is to be judged conscious of an unlawfull, and tumultuous designe. It may be lawfull for a thousand men, to joyn in a Petition to be delivered to a Judge, or Magistrate; yet if a thousand men come to present it, it is a tumultuous Assembly; because there needs but one or two for that purpose. But in such cases as these, it is not a set number that makes the Assembly Unlawfull, but such a number, as the present Officers are not able to suppress, and bring to Justice.

When an unusuall number of men, assemble against a man whom they accuse; the Assembly is an Unlawfull tumult; because they may deliver their accusation to the Magistrate by a few, or by one man. Such was the case of St. Paul at Ephesus; where Demetrius, and a great number of other men, brought two of Pauls companions before the Magistrate, saying with one Voyce, "Great is Diana of the Ephesians;" which was their way of demanding Justice against them for teaching the people such doctrine, as was against their Religion, and Trade. The occasion here, considering the Lawes of that People, was just; yet was their Assembly Judged Unlawfull, and the Magistrate reprehended them for it, in these

words,(Acts 19. 40) “If Demetrius and the other work-men can accuse any man, of any thing, there be Pleas, and Deputies, let them accuse one another. And if you have any other thing to demand, your case may be judged in an Assembly Lawfully called. For we are in danger to be accused for this dayes sedition, because, there is no cause by which any man can render any reason of this Concourse of People.” Where he calleth an Assembly, whereof men can give no just account, a Sedition, and such as they could not answer for. And this is all I shall say concerning Systemes, and Assemblyes of People, which may be compared (as I said,) to the Similar parts of mans Body; such as be Lawfull, to the Muscles; such as are Unlawfull, to Wens, Biles, and Apostemes, engendred by the unnaturall conflux of evill humours.

CHAPTER XXIII. OF THE PUBLIQUE MINISTERS OF SOVERAIGN POWER

IN THE LAST Chapter I have spoken of the Similar parts of a Common-wealth; In this I shall speak of the parts Organicall, which are Publique Ministers.

Publique Minister Who

A PUBLIQUE MINISTER, is he, that by the Sovereign, (whether a Monarch, or an Assembly,) is employed in any affaires, with Authority to represent in that employment, the Person of the Common-wealth. And whereas every man, or assembly that hath Sovereignty, representeth two Persons, or (as the more common phrase is) has two Capacities, one Naturall, and another Politique, (as a Monarch, hath the person not onely of the Common-wealth, but also of a man; and a Sovereign Assembly hath the Person not onely of the Common-wealth, but also of the Assembly); they that be servants to them in their naturall Capacity, are not Publique Ministers; but those onely that serve them in the Administration of the Publique businesse. And therefore neither Ushers, nor Sergeants, nor other Officers that waite on the Assembly, for no other purpose, but for the commodity of the men assembled, in an Aristocracy, or Democracy; nor Stewards, Chamberlains, Cofferers, or any other Officers of the houshold of a Monarch, are Publique Ministers in a Monarchy.

Ministers For The Generall Administration

Of Publique Ministers, some have charge committed to them of a general Administration, either of the whole Dominion, or of a part thereof. Of the whole, as to a Protector, or Regent, may bee committed by the Predecessor of an Infant King, during his minority, the whole Administration of his Kingdome. In which case, every Subject is so far obliged to obedience, as the Ordinances he shall make, and the commands he shall give be in the Kings name, and not inconsistent with his Sovereigne Power. Of a Part, or Province; as when either a Monarch, or a Sovereign Assembly, shall give the generall charge thereof to a Governour, Lieutenant, Praefect, or Vice-Roy: And in this case also, every one of that Province, is obliged to all he shall doe in the name of the Sovereign, and that not incompatible with the Sovereigns Right. For such Protectors, Vice-Roys, and Governours, have no other right, but what depends on the Sovereigns Will; and no Commission that can be given them, can be interpreted for a Declaration of the will to transferre the Sovereignty, without expresse and perspicuous words to that purpose. And this kind of Publique Ministers resembleth the Nerves, and Tendons that move the severall limbs of a body naturall.

For Speciall Administration, As For Oeconomy

Others have speciall Administration; that is to say, charges of some speciall businesse, either at home, or abroad: As at home, First, for the Oeconomy of a Common-wealth, They that have Authority concerning the Treasure, as Tributes, Impositions, Rents, Fines, or whatsoever publique revenue, to collect, receive, issue, or take the Accounts thereof, are Publique Ministers: Ministers, because they serve the Person Representative, and can doe nothing against his Command, nor without his Authority: Publique, because they serve him in his Politicall Capacity.

Secondly, they that have Authority concerning the Militia; to have the custody of Armes, Forts, Ports; to Levy, Pay, or Conduct Souldiers; or to provide for any

necessary thing for the use of war, either by Land or Sea, are publique Ministers. But a Souldier without Command, though he fight for the Common-wealth, does not therefore represent the Person of it; because there is none to represent it to. For every one that hath command, represents it to them only whom he commandeth.

For Instruction Of The People

They also that have authority to teach, or to enable others to teach the people their duty to the Sovereign Power, and instruct them in the knowledge of what is just, and unjust, thereby to render them more apt to live in godlinesse, and in peace among themselves, and resist the publique enemy, are Publique Ministers: Ministers, in that they doe it not by their own Authority, but by anothers; and Publique, because they doe it (or should doe it) by no Authority, but that of the Sovereign. The Monarch, or the Sovereign Assembly only hath immediate Authority from God, to teach and instruct the people; and no man but the Sovereign, receiveth his power *Dei Gratia* simply; that is to say, from the favour of none but God: All other, receive theirs from the favour and providence of God, and their Sovereigns; as in a Monarchy *Dei Gratia & Regis*; or *Dei Providentia & Voluntate Regis*.

For Judicature

They also to whom Jurisdiction is given, are Publique Ministers. For in their Seats of Justice they represent the person of the Sovereign; and their Sentence, is his Sentence; For (as hath been before declared) all Judicature is essentially annexed to the Sovereignty; and therefore all other Judges are but Ministers of him, or them that have the Sovereign Power. And as Controversies are of two sorts,

namely of Fact, and of Law; so are judgements, some of Fact, some of Law: And consequently in the same controversie, there may be two Judges, one of Fact, another of Law.

And in both these controversies, there may arise a controversie between the party Judged, and the Judge; which because they be both Subjects to the Sovereign, ought in Equity to be Judged by men agreed on by consent of both; for no man can be Judge in his own cause. But the Sovereign is already agreed on for Judge by them both, and is therefore either to heare the Cause, and determine it himself, or appoint for Judge such as they shall both agree on. And this agreement is then understood to be made between them divers wayes; as first, if the Defendant be allowed to except against such of his Judges, whose interest maketh him suspect them, (for as to the Complaynant he hath already chosen his own Judge,) those which he excepteth not against, are Judges he himself agrees on. Secondly, if he appeale to any other Judge, he can appeale no further; for his appeale is his choice. Thirdly, if he appeale to the Sovereign himself, and he by himself, or by Delegates which the parties shall agree on, give Sentence; that Sentence is finall: for the Defendant is Judged by his own Judges, that is to say, by himself.

These properties of just and rationall Judicature considered, I cannot forbear to observe the excellent constitution of the Courts of Justice, established both for Common, and also for Publique Pleas in England. By Common Pleas, I meane those, where both the Complaynant and Defendant are Subjects: and by Publique, (which are also called Pleas of the Crown) those, where the Complaynant is the Sovereign. For whereas there were two orders of men, whereof one was Lords, the other Commons; The Lords had this Priviledge, to have for Judges in all Capitall crimes, none but Lords; and of them, as many as would be present; which being ever acknowledged as a Priviledge of favour, their Judges were none but such as they had themselves desired. And in all controversies, every Subject (as also in civill controversies the Lords) had for Judges, men of the Country where the matter in controversie lay; against which he might make his exceptions, till at

last Twelve men without exception being agreed on, they were Judged by those twelve. So that having his own Judges, there could be nothing alledged by the party, why the sentence should not be finall, These publique persons, with Authority from the Sovereign Power, either to Instruct, or Judge the people, are such members of the Common-wealth, as may fitly be compared to the organs of Voice in a Body naturall.

For Execution

Publique Ministers are also all those, that have Authority from the Sovereign, to procure the Execution of Judgements given; to publish the Sovereigns Commands; to suppress Tumults; to apprehend, and imprison Malefactors; and other acts tending to the conservation of the Peace. For every act they doe by such Authority, is the act of the Common-wealth; and their service, answerable to that of the Hands, in a Bodie naturall.

Publique Ministers abroad, are those that represent the Person of their own Sovereign, to forraign States. Such are Ambassadors, Messengers, Agents, and Heralds, sent by publique Authoritie, and on publique Busnesse.

But such as are sent by Authoritie only of some private partie of a troubled State, though they be received, are neither Publique, nor Private Ministers of the Common-wealth; because none of their actions have the Common-wealth for Author. Likewise, an Ambassador sent from a Prince, to congratulate, condole, or to assist at a solemnity, though Authority be Publique; yet because the busnesse is Private, and belonging to him in his naturall capacity; is a Private person. Also if a man be sent into another Country, secretly to explore their counsels, and strength; though both the Authority, and the Busnesse be Publique; yet because there is none to take notice of any Person in him, but his own; he is but a Private Minister; but yet a Minister of the Common-wealth; and may be compared to an Eye in the Body naturall. And those that are appointed to receive the Petitions or

other informations of the People, and are as it were the publique Eare, are Publique Ministers, and represent their Sovereign in that office.

Counsellors Without Other Employment Then To Advise Are Not Publique Ministers

Neither a Counsellor, nor a Councill of State, if we consider it with no Authority of Judicature or Command, but only of giving Advice to the Sovereign when it is required, or of offering it when it is not required, is a Publique Person. For the Advice is addressed to the Sovereign only, whose person cannot in his own presence, be represented to him, by another. But a Body of Counsellors, are never without some other Authority, either of Judicature, or of immediate Administration: As in a Monarchy, they represent the Monarch, in delivering his Commands to the Publique Ministers: In a Democracy, the Councill, or Senate propounds the Result of their deliberations to the people, as a Councill; but when they appoint Judges, or heare Causes, or give Audience to Ambassadors, it is in the quality of a Minister of the People: And in an Aristocracy the Councill of State is the Sovereign Assembly it self; and gives counsell to none but themselves.

CHAPTER XXIV. OF THE NUTRITION, AND PROCREATION OF A COMMON-WEALTH

THE NOURISHMENT OF A Common-wealth Consisteth In The Commodities
Of Sea And Land

The NUTRITION of a Common-wealth consisteth, in the Plenty, and Distribution of Materials conducing to Life: In Concoction, or Preparation; and (when concocted) in the Conveyance of it, by convenient conduits, to the Publique use.

As for the Plenty of Matter, it is a thing limited by Nature, to those commodities, which from (the two breasts of our common Mother) Land, and Sea, God usually either freely giveth, or for labour selleth to man-kind.

For the Matter of this Nutriment, consisting in Animals, Vegetals, and Minerals, God hath freely layd them before us, in or neer to the face of the Earth; so as there needeth no more but the labour, and industry of receiving them. Insomuch as Plenty dependeth (next to Gods favour) meerly on the labour and industry of men.

This Matter, commonly called Commodities, is partly Native, and partly Forraign: Native, that which is to be had within the Territory of the Common-wealth; Forraign, that which is imported from without. And because there is no Territory under the Dominion of one Common-wealth, (except it be of very vast extent,) that produceth all things needfull for the maintenance, and motion of the whole Body; and few that produce not something more than necessary; the superfluous commodities to be had within, become no more superfluous, but supply these wants at home, by importation of that which may be had abroad, either by Exchange, or by just Warre, or by Labour: for a mans Labour also, is a commodity exchangeable for benefit, as well as any other thing: And there have

been Common-wealths that having no more Territory, than hath served them for habitation, have neverthelesse, not onely maintained, but also encreased their Power, partly by the labour of trading from one place to another, and partly by selling the Manufactures, whereof the Materials were brought in from other places.

And The Right Of Distribution Of Them

The Distribution of the Materials of this Nourishment, is the constitution of Mine, and Thine, and His, that is to say, in one word Propriety; and belongeth in all kinds of Common-wealth to the Sovereign Power. For where there is no Common-wealth, there is, (as hath been already shewn) a perpetuall warre of every man against his neighbour; And therefore every thing is his that getteth it, and keepeth it by force; which is neither Propriety nor Community; but Uncertainty. Which is so evident, that even Cicero, (a passionate defender of Liberty,) in a publique pleading, attributeth all Propriety to the Law Civil, “Let the Civill Law,” saith he, “be once abandoned, or but negligently guarded, (not to say oppressed,) and there is nothing, that any man can be sure to receive from his Ancestor, or leave to his Children.” And again; “Take away the Civill Law, and no man knows what is his own, and what another mans.” Seeing therefore the Introduction of Propriety is an effect of Common-wealth; which can do nothing but by the Person that Represents it, it is the act onely of the Sovereign; and consisteth in the Lawes, which none can make that have not the Sovereign Power. And this they well knew of old, who called that Nomos, (that is to say, Distribution,) which we call Law; and defined Justice, by distributing to every man his own.

All Private Estates Of Land Proceed Originally

From The Arbitrary Distribution Of The Sovereign

In this Distribution, the First Law, is for Division of the Land it selfe: wherein the Sovereign assigneth to every man a portion, according as he, and not according as any Subject, or any number of them, shall judge agreeable to Equity, and the Common Good. The Children of Israel, were a Common-wealth in the Wildernesse; but wanted the commodities of the Earth, till they were masters of the Land of Promise; which afterward was divided amongst them, not by their own discretion, but by the discretion of Eleazar the Priest, and Joshua their Generall: who when there were twelve Tribes, making them thirteen by subdivision of the Tribe of Joseph; made neverthelesse but twelve portions of the Land; and ordained for the Tribe of Levi no land; but assigned them the Tenth part of the whole fruits; which division was therefore Arbitrary. And though a People coming into possession of a land by warre, do not alwaies exterminate the antient Inhabitants, (as did the Jewes,) but leave to many, or most, or all of them their Estates; yet it is manifest they hold them afterwards, as of the Victors distribution; as the people of England held all theirs of William the Conquerour.

Propriety Of A Subject Excludes Not The Dominion Of The Sovereign,

But Onely Of Another Subject

From whence we may collect, that the Propriety which a subject hath in his lands, consisteth in a right to exclude all other subjects from the use of them; and not to exclude their Sovereign, be it an Assembly, or a Monarch. For seeing the Sovereign, that is to say, the Common-wealth (whose Person he representeth,) is understood to do nothing but in order to the common Peace and Security, this Distribution of lands, is to be understood as done in order to the same: And

consequently, whatsoever Distribution he shall make in prejudice thereof, is contrary to the will of every subject, that committed his Peace, and safety to his discretion, and conscience; and therefore by the will of every one of them, is to be reputed voyd. It is true, that a Sovereign Monarch, or the greater part of a Sovereign Assembly, may ordain the doing of many things in pursuit of their Passions, contrary to their own consciences, which is a breach of trust, and of the Law of Nature; but this is not enough to authorise any subject, either to make warre upon, or so much as to accuse of Injustice, or any way to speak evill of their Sovereign; because they have authorised all his actions, and in bestowing the Sovereign Power, made them their own. But in what cases the Commands of Sovereigns are contrary to Equity, and the Law of Nature, is to be considered hereafter in another place.

The Publique Is Not To Be Dieted

In the Distribution of land, the Common-wealth it selfe, may be conceived to have a portion, and possesse, and improve the same by their Representative; and that such portion may be made sufficient, to susteine the whole expence to the common Peace, and defence necessarily required: Which were very true, if there could be any Representative conceived free from humane passions, and infirmities. But the nature of men being as it is, the setting forth of Publique Land, or of any certaine Revenue for the Common-wealth, is in vaine; and tendeth to the dissolution of Government, and to the condition of meere Nature, and War, assoon as ever the Sovereign Power falleth into the hands of a Monarch, or of an Assembly, that are either too negligent of mony, or too hazardous in engaging the publique stock, into a long, or costly war. Common-wealths can endure no Diet: For seeing their expence is not limited by their own appetite, but by externall Accidents, and the appetites of their neighbours, the Publique Riches cannot be limited by other limits, than those which the emergent occasions shall require.

And whereas in England, there were by the Conquerour, divers Lands reserved to his own use, (besides Forrests, and Chases, either for his recreation, or for preservation of Woods,) and divers services reserved on the Land he gave his Subjects; yet it seems they were not reserved for his Maintenance in his Publique, but in his Naturall capacity: For he, and his Successors did for all that, lay Arbitrary Taxes on all Subjects land, when they judged it necessary. Or if those publique Lands, and Services, were ordained as a sufficient maintenance of the Common-wealth, it was contrary to the scope of the Institution; being (as it appeared by those ensuing Taxes) insufficient, and (as it appears by the late Revenue of the Crown) Subject to Alienation, and Diminution. It is therefore in vaine, to assign a portion to the Common-wealth; which may sell, or give it away; and does sell, and give it away when tis done by their Representative.

The Places And Matter Of Traffique Depend, As Their Distribution,

On The Sovereign

As the Distribution of Lands at home; so also to assigne in what places, and for what commodities, the Subject shall traffique abroad, belongeth to the Sovereign. For if it did belong to private persons to use their own discretion therein, some of them would bee drawn for gaine, both to furnish the enemy with means to hurt the Common-wealth, and hurt it themselves, by importing such things, as pleasing mens appetites, be neverthelesse noxious, or at least unprofitable to them. And therefore it belongeth to the Common-wealth, (that is, to the Sovereign only,) to approve, or disapprove both of the places, and matter of forraign Traffique.

The Laws Of Transferring Property Belong Also To The Sovereign

Further, seeing it is not enough to the Sustentation of a Common-wealth, that every man have a propriety in a portion of Land, or in some few commodities, or a naturall property in some usefull art, and there is no art in the world, but is necessary either for the being, or well being almost of every particular man; it is necessary, that men distribute that which they can spare, and transferre their propriety therein, mutually one to another, by exchange, and mutuall contract. And therefore it belongeth to the Common-wealth, (that is to say, to the Sovereign,) to appoint in what manner, all kinds of contract between Subjects, (as buying, selling, exchanging, borrowing, lending, letting, and taking to hire,) are to bee made; and by what words, and signes they shall be understood for valid. And for the Matter, and Distribution of the Nourishment, to the severall Members of the Common-wealth, thus much (considering the modell of the whole worke) is sufficient.

Mony The Bloud Of A Common-wealth

By Concoction, I understand the reducing of all commodities, which are not presently consumed, but reserved for Nourishment in time to come, to some thing of equal value, and withall so portably, as not to hinder the motion of men from place to place; to the end a man may have in what place soever, such Nourishment as the place affordeth. And this is nothing else but Gold, and Silver, and Mony. For Gold and Silver, being (as it happens) almost in all Countries of the world highly valued, is a commodious measure for the value of all things else between Nations; and Mony (of what matter soever coyned by the Sovereign of a Common-wealth,) is a sufficient measure of the value of all things else, between the Subjects of that Common-wealth. By the means of which measures, all commodities, Moveable, and Immoveable, are made to accompany a man, to all places of his resort, within and without the place of his ordinary residence; and the same passeth from Man to Man, within the Common-wealth; and goes round

about, Nourishing (as it passeth) every part thereof; In so much as this Concoction, is as it were the Sanguification of the Common-wealth: For naturall Bloud is in like manner made of the fruits of the Earth; and circulating, nourisheth by the way, every Member of the Body of Man.

And because Silver and Gold, have their value from the matter it self; they have first this priviledge, that the value of them cannot be altered by the power of one, nor of a few Common-wealths; as being a common measure of the commodities of all places. But base Mony, may easily be enhanced, or abased. Secondly, they have the priviledge to make Common-wealths, move, and stretch out their armes, when need is, into forraign Countries; and supply, not only private Subjects that travell, but also whole Armies with provision. But that Coyne, which is not considerable for the Matter, but for the Stamp of the place, being unable to endure change of ayr, hath its effect at home only; where also it is subject to the change of Laws, and thereby to have the value diminished, to the prejudice many times of those that have it.

The Conduits And Way Of Mony To The Publique Use

The Conduits, and Wayes by which it is conveyed to the Publique use, are of two sorts; One, that Conveyeth it to the Publique Coffers; The other, that Issueth the same out againe for publique payments. Of the first sort, are Collectors, Receivers, and Treasurers; of the second are the Treasurers againe, and the Officers appointed for payment of severall publique or private Ministers. And in this also, the Artificiall Man maintains his resemblance with the Naturall; whose Veins receiving the Bloud from the severall Parts of the Body, carry it to the Heart; where being made Vitall, the Heart by the Arteries sends it out again, to enliven, and enable for motion all the Members of the same.

The Children Of A Common-wealth Colonies

The Procreation, or Children of a Common-wealth, are those we call Plantations, or Colonies; which are numbers of men sent out from the Common-wealth, under a Conductor, or Governour, to inhabit a Forraign Country, either formerly voyd of Inhabitants, or made voyd then, by warre. And when a Colony is settled, they are either a Common-wealth of themselves, discharged of their subjection to their Sovereign that sent them, (as hath been done by many Common-wealths of antient time,) in which case the Common-wealth from which they went was called their Metropolis, or Mother, and requires no more of them, then Fathers require of the Children, whom they emancipate, and make free from their domestique government, which is Honour, and Friendship; or else they remain united to their Metropolis, as were the Colonies of the people of Rome; and then they are no Common-wealths themselves, but Provinces, and parts of the Common-wealth that sent them. So that the Right of Colonies (saving Honour, and League with their Metropolis,) dependeth wholly on their Licence, or Letters, by which their Sovereign authorised them to Plant.

CHAPTER XXV. OF COUNSELL

Counsell What

How fallacious it is to judge of the nature of things, by the ordinary and inconstant use of words, appeareth in nothing more, than in the confusion of Counsels, and Commands, arising from the Imperative manner of speaking in them both, and in many other occasions besides. For the words “Doe this,” are the words not onely of him that Commandeth; but also of him that giveth Counsell; and of him that Exhorteth; and yet there are but few, that see not, that these are very different things; or that cannot distinguish between them, when they perceive who it is that speaketh, and to whom the Speech is directed, and upon what occasion. But finding those phrases in mens writings, and being not able, or not willing to enter into a consideration of the circumstances, they mistake sometimes the Precepts of Counsellours, for the Precepts of them that command; and sometimes the contrary; according as it best agreeth with the conclusions they would inferre, or the actions they approve. To avoyd which mistakes, and render to those termes of Commanding, Counselling, and Exhorting, their proper and distinct significations, I define them thus.

Differences Between Command And Counsell

COMMAND is, where a man saith, “Doe this,” or “Doe this not,” without expecting other reason than the Will of him that sayes it. From this it followeth manifestly, that he that Commandeth, pretendeth thereby his own Benefit: For the

reason of his Command is his own Will onely, and the proper object of every mans Will, is some Good to himselfe.

COUNSELL, is where a man saith, “Doe” or “Doe not this,” and deduceth his own reasons from the benefit that arriveth by it to him to whom he saith it. And from this it is evident, that he that giveth Counsell, pretendeth onely (whatsoever he intendeth) the good of him, to whom he giveth it.

Therefore between Counsell and Command, one great difference is, that Command is directed to a mans own benefit; and Counsell to the benefit of another man. And from this ariseth another difference, that a man may be obliged to do what he is Commanded; as when he hath covenanted to obey: But he cannot be obliged to do as he is Counsell'd, because the hurt of not following it, is his own; or if he should covenant to follow it, then is the Counsell turned into the nature of a Command. A third difference between them is, that no man can pretend a right to be of another mans Counsell; because he is not to pretend benefit by it to himselfe; but to demand right to Counsell another, argues a will to know his designes, or to gain some other Good to himselfe; which (as I said before) is of every mans will the proper object.

This also is incident to the nature of Counsell; that whatsoever it be, he that asketh it, cannot in equity accuse, or punish it: For to ask Counsell of another, is to permit him to give such Counsell as he shall think best; And consequently, he that giveth counsell to his Sovereign, (whether a Monarch, or an Assembly) when he asketh it, cannot in equity be punished for it, whether the same be conformable to the opinion of the most, or not, so it be to the Proposition in debate. For if the sense of the Assembly can be taken notice of, before the Debate be ended, they should neither ask, nor take any further Counsell; For the Sense of the Assembly, is the Resolution of the Debate, and End of all Deliberation. And generally he that demandeth Counsell, is Author of it; and therefore cannot punish it; and what the Sovereign cannot, no man else can. But if one Subject giveth Counsell to another, to do any thing contrary to the Lawes, whether that Counsell proceed from evill intention, or from ignorance onely, it is punishable by the Common-wealth;

because ignorance of the Law, is no good excuse, where every man is bound to take notice of the Lawes to which he is subject.

Exhortation And Dehortation What

EXHORTATION, and DEHORTATION, is Counsell, accompanied with signes in him that giveth it, of vehement desire to have it followed; or to say it more briefly, Counsell Vehemently Pressed. For he that Exhorteth, doth not deduce the consequences of what he adviseth to be done, and tye himselfe therein to the rigour of true reasoning; but encourages him he Counselleth, to Action: As he that Dehorteth, deterreth him from it. And therefore they have in their speeches, a regard to the common Passions, and opinions of men, in deducing their reasons; and make use of Similitudes, Metaphors, Examples, and other tooles of Oratory, to perswade their Hearers of the Utility, Honour, or Justice of following their advise.

From whence may be inferred, First, that Exhortation and Dehortation, is directed to the Good of him that giveth the Counsell, not of him that asketh it, which is contrary to the duty of a Counsellour; who (by the definition of Counsell) ought to regard, not his own benefits, but his whom he adviseth. And that he directeth his Counsell to his own benefit, is manifest enough, by the long and vehement urging, or by the artificial giving thereof; which being not required of him, and consequently proceeding from his own occasions, is directed principally to his own benefit, and but accidentally to the good of him that is Counsell'd, or not at all.

Secondly, that the use of Exhortation and Dehortation lyeth onely, where a man is to speak to a Multitude; because when the Speech is addressed to one, he may interrupt him, and examine his reasons more rigorously, than can be done in a Multitude; which are too many to enter into Dispute, and Dialogue with him that speaketh indifferently to them all at once. Thirdly, that they that Exhort and

Dehort, where they are required to give Counsell, are corrupt Counsellours, and as it were bribed by their own interest. For though the Counsell they give be never so good; yet he that gives it, is no more a good Counsellour, than he that giveth a Just Sentence for a reward, is a just Judge. But where a man may lawfully Command, as a Father in his Family, or a Leader in an Army, his Exhortations and Dehortations, are not onely lawfull, but also necessary, and laudable: But then they are no more Counsells, but Commands; which when they are for Execution of soure labour; sometimes necessity, and alwayes humanity requireth to be sweetned in the delivery, by encouragement, and in the tune and phrase of Counsell, rather then in harsher language of Command.

Examples of the difference between Command and Counsell, we may take from the formes of Speech that expresse them in Holy Scripture. “Have no other Gods but me; Make to thy selfe no graven Image; Take not Gods name in vain; Sanctifie the Sabbath; Honour thy Parents; Kill not; Steale not,” &c. are Commands; because the reason for which we are to obey them, is drawn from the will of God our King, whom we are obliged to obey. But these words, “Sell all thou hast; give it to the poore; and follow me,” are Counsell; because the reason for which we are to do so, is drawn from our own benefit; which is this, that we shall have “Treasure in Heaven.” These words, “Go into the village over against you, and you shall find an Asse tyed, and her Colt; loose her, and bring her to me,” are a Command: for the reason of their fact is drawn from the will of their Master: but these words, “Repent, and be Baptized in the Name of Jesus,” are Counsell; because the reason why we should so do, tendeth not to any benefit of God Almighty, who shall still be King in what manner soever we rebell; but of our selves, who have no other means of avoyding the punishment hanging over us for our sins.

Differences Of Fit And Unfit Counsellours

As the difference of Counsell from Command, hath been now deduced from the nature of Counsell, consisting in a deducing of the benefit, or hurt that may arise to him that is to be Counsell'd, by the necessary or probable consequences of the action he propoundeth; so may also the differences between apt, and inept counsellours be derived from the same. For Experience, being but Memory of the consequences of like actions formerly observed, and Counsell but the Speech whereby that experience is made known to another; the Vertues, and Defects of Counsell, are the same with the Vertues, and Defects Intellectuall: And to the Person of a Common-wealth, his Counsellours serve him in the place of Memory, and Mentall Discourse. But with this resemblance of the Common-wealth, to a naturall man, there is one dissimilitude joyned, of great importance; which is, that a naturall man receiveth his experience, from the naturall objects of sense, which work upon him without passion, or interest of their own; whereas they that give Counsell to the Representative person of a Common-wealth, may have, and have often their particular ends, and passions, that render their Counsell's alwayes suspected, and many times unfaithfull. And therefore we may set down for the first condition of a good Counsellour, That His Ends, And Interest, Be Not Inconsistent With The Ends And Interest Of Him He Counselleth.

Secondly, Because the office of a Counsellour, when an action comes into deliberation, is to make manifest the consequences of it, in such manner, as he that is Counsell'd may be truly and evidently informed; he ought to propound his advise, in such forme of speech, as may make the truth most evidently appear; that is to say, with as firme ratiocination, as significant and proper language, and as briefly, as the evidence will permit. And therefore Rash, And Unevident Inferences; (such as are fetched onely from Examples, or authority of Books, and are not arguments of what is good, or evill, but witnesses of fact, or of opinion,) Obscure, Confused, And Ambiguous Expressions, Also All Metaphoricall Speeches, Tending To The Stirring Up Of Passion, (because such reasoning, and such expressions, are usefull onely to deceive, or to lead him we Counsell

towards other ends than his own) Are Repugnant To The Office Of A Counsellour.

Thirdly, Because the Ability of Counselling proceedeth from Experience, and long study; and no man is presumed to have experience in all those things that to the Administration of a great Common-wealth are necessary to be known, No Man Is Presumed To Be A Good Counsellour, But In Such Businesse, As He Hath Not Onely Been Much Versed In, But Hath Also Much Meditated On, And Considered. For seeing the businesse of a Common-wealth is this, to preserve the people at home, and defend them against forraign Invasion, we shall find, it requires great knowledge of the disposition of Man-kind, of the Rights of Government, and of the nature of Equity, Law, Justice, and Honour, not to be attained without study; And of the Strength, Commodities, Places, both of their own Country, and their Neighbours; as also of the inclinations, and designes of all Nations that may any way annoy them. And this is not attained to, without much experience. Of which things, not onely the whole summe, but every one of the particulars requires the age, and observation of a man in years, and of more than ordinary study. The wit required for Counsel, as I have said before is Judgement. And the differences of men in that point come from different education, of some to one kind of study, or businesse, and of others to another. When for the doing of any thing, there be Infallible rules, (as in Engines, and Edifices, the rules of Geometry,) all the experience of the world cannot equall his Counsell, that has learnt, or found out the Rule. And when there is no such Rule, he that hath most experience in that particular kind of businesse, has therein the best Judgement, and is the best Counsellour.

Fourthly, to be able to give Counsell to a Common-wealth, in a businesse that hath reference to another Common-wealth, It Is Necessary To Be Acquainted With The Intelligences, And Letters That Come From Thence, And With All The Records Of Treaties, And Other Transactions Of State Between Them; which none can doe, but such as the Representative shall think fit. By which we may

see, that they who are not called to Counsell, can have no good Counsell in such cases to obtrude.

Fifthly, Supposing the number of Counsellors equall, a man is better Counsell'd by hearing them apart, then in an Assembly; and that for many causes. First, in hearing them apart, you have the advice of every man; but in an Assembly many of them deliver their advice with I, or No, or with their hands, or feet, not moved by their own sense, but by the eloquence of another, or for feare of displeasing some that have spoken, or the whole Assembly, by contradiction; or for feare of appearing duller in apprehension, than those that have applauded the contrary opinion. Secondly, in an Assembly of many, there cannot choose but be some whose interests are contrary to that of the Publique; and these their Interests make passionate, and Passion eloquent, and Eloquence drawes others into the same advice. For the Passions of men, which asunder are moderate, as the heat of one brand; in Assembly are like many brands, that enflame one another, (especially when they blow one another with Orations) to the setting of the Common-wealth on fire, under pretence of Counselling it. Thirdly, in hearing every man apart, one may examine (when there is need) the truth, or probability of his reasons, and of the grounds of the advice he gives, by frequent interruptions, and objections; which cannot be done in an Assembly, where (in every difficult question) a man is rather astonied, and dazled with the variety of discourse upon it, than informed of the course he ought to take. Besides, there cannot be an Assembly of many, called together for advice, wherein there be not some, that have the ambition to be thought eloquent, and also learned in the Politiques; and give not their advice with care of the businesse propounded, but of the applause of their motly orations, made of the divers colored threds, or shreds of Authors; which is an Impertinence at least, that takes away the time of serious Consultation, and in the secret way of Counselling apart, is easily avoided. Fourthly, in Deliberations that ought to be kept secret, (whereof there be many occasions in Publique Businesse,) the Counsells of many, and especially in Assemblies, are dangerous; And therefore great Assemblies are necessitated to

commit such affaires to lesser numbers, and of such persons as are most versed, and in whose fidelity they have most confidence.

To conclude, who is there that so far approves the taking of Counsell from a great Assembly of Counsellours, that wisheth for, or would accept of their pains, when there is a question of marrying his Children, disposing of his Lands, governing his Household, or managing his private Estate, especially if there be amongst them such as wish not his prosperity? A man that doth his businesse by the help of many and prudent Counsellours, with every one consulting apart in his proper element, does it best, as he that useth able Seconds at Tennis play, placed in their proper stations. He does next best, that useth his own Judgement only; as he that has no Second at all. But he that is carried up and down to his businesse in a framed Counsell, which cannot move but by the plurality of consenting opinions, the execution whereof is commonly (out of envy, or interest) retarded by the part dissenting, does it worst of all, and like one that is carried to the ball, though by good Players, yet in a Wheele-barrough, or other frame, heavy of it self, and retarded also by the inconcurrent judgements, and endeavours of them that drive it; and so much the more, as they be more that set their hands to it; and most of all, when there is one, or more amongst them, that desire to have him lose. And though it be true, that many eys see more then one; yet it is not to be understood of many Counsellours; but then only, when the finall Resolution is in one man. Otherwise, because many eyes see the same thing in divers lines, and are apt to look asquint towards their private benefit; they that desire not to misse their marke, though they look about with two eyes, yet they never ayme but with one; And therefore no great Popular Common-wealth was ever kept up; but either by a forraign Enemy that united them; or by the reputation of some one eminent Man amongst them; or by the secret Counsell of a few; or by the mutuall feare of equall factions; and not by the open Consultations of the Assembly. And as for very little Common-wealths, be they Popular, or Monarchicall, there is no humane wisdom can uphold them, longer then the Jealousy lasteth of their potent Neighbours.

CHAPTER XXVI. OF CIVILL LAWES

Civill Law what

By CIVILL LAWES, I understand the Lawes, that men are therefore bound to observe, because they are Members, not of this, or that Common-wealth in particular, but of a Common-wealth. For the knowledge of particular Lawes belongeth to them, that professe the study of the Lawes of their severall Countries; but the knowledge of Civill Law in generall, to any man. The antient Law of Rome was called their Civil Law, from the word Civitas, which signifies a Common-wealth; And those Countries, which having been under the Roman Empire, and governed by that Law, retaine still such part thereof as they think fit, call that part the Civill Law, to distinguish it from the rest of their own Civill Lawes. But that is not it I intend to speak of here; my designe being not to shew what is Law here, and there; but what is Law; as Plato, Aristotle, Cicero, and divers others have done, without taking upon them the profession of the study of the Law.

And first it manifest, that Law in generall, is not Counsell, but Command; nor a Command of any man to any man; but only of him, whose Command is addressed to one formerly obliged to obey him. And as for Civill Law, it addeth only the name of the person Commanding, which is *Persona Civitatis*, the Person of the Common-wealth.

Which considered, I define Civill Law in this Manner. “CIVILL LAW, Is to every Subject, those Rules, which the Common-wealth hath Commanded him, by Word, Writing, or other sufficient Sign of the Will, to make use of, for the Distinction of Right, and Wrong; that is to say, of what is contrary, and what is not contrary to the Rule.”

In which definition, there is nothing that is not at first sight evident. For every man seeth, that some Lawes are addressed to all the Subjects in generall; some to particular Provinces; some to particular Vocations; and some to particular Men; and are therefore Lawes, to every of those to whom the Command is directed; and to none else. As also, that Lawes are the Rules of Just, and Unjust; nothing being reputed Unjust, that is not contrary to some Law. Likewise, that none can make Lawes but the Common-wealth; because our Subjection is to the Common-wealth only: and that Commands, are to be signified by sufficient Signs; because a man knows not otherwise how to obey them. And therefore, whatsoever can from this definition by necessary consequence be deduced, ought to be acknowledged for truth. Now I deduce from it this that followeth.

The Sovereign Is Legislator

1. The Legislator in all Common-wealths, is only the Sovereign, be he one Man, as in a Monarchy, or one Assembly of men, as in a Democracy, or Aristocracy. For the Legislator, is he that maketh the Law. And the Common-wealth only, praescribes, and commandeth the observation of those rules, which we call Law: Therefore the Common-wealth is the Legislator. But the Common-wealth is no Person, nor has capacity to doe any thing, but by the Representative, (that is, the Sovereign;) and therefore the Sovereign is the sole Legislator. For the same reason, none can abrogate a Law made, but the Sovereign; because a Law is not abrogated, but by another Law, that forbiddeth it to be put in execution.

And Not Subject To Civill Law

2. The Sovereign of a Common-wealth, be it an Assembly, or one Man, is not subject to the Civill Lawes. For having power to make, and repeale Lawes, he

may when he pleaseth, free himselfe from that subjection, by repealing those Lawes that trouble him, and making of new; and consequently he was free before. For he is free, that can be free when he will: Nor is it possible for any person to be bound to himselfe; because he that can bind, can release; and therefore he that is bound to himselfe onely, is not bound.

Use, A Law Not By Vertue Of Time, But Of The Soveraigns Consent

3. When long Use obtaineth the authority of a Law, it is not the Length of Time that maketh the Authority, but the Will of the Soveraign signified by his silence, (for Silence is sometimes an argument of Consent;) and it is no longer Law, then the Soveraign shall be silent therein. And therefore if the Soveraign shall have a question of Right grounded, not upon his present Will, but upon the Lawes formerly made; the Length of Time shal bring no prejudice to his Right; but the question shal be judged by Equity. For many unjust Actions, and unjust Sentences, go uncontrolled a longer time, than any man can remember. And our Lawyers account no Customes Law, but such as are reasonable, and that evill Customes are to be abolished; But the Judgement of what is reasonable, and of what is to be abolished, belongeth to him that maketh the Law, which is the Soveraign Assembly, or Monarch.

The Law Of Nature, And The Civill Law Contain Each Other

4. The Law of Nature, and the Civill Law, contain each other, and are of equall extent. For the Lawes of Nature, which consist in Equity, Justice, Gratitude, and other morall Vertues on these depending, in the condition of meer Nature (as I have said before in the end of the 15th Chapter,) are not properly Lawes, but qualities that dispose men to peace, and to obedience. When a Common-wealth is

once settled, then are they actually Lawes, and not before; as being then the commands of the Common-wealth; and therefore also Civill Lawes: for it is the Sovereign Power that obliges men to obey them. For in the differences of private men, to declare, what is Equity, what is Justice, and what is morall Vertue, and to make them binding, there is need of the Ordinances of Sovereign Power, and Punishments to be ordained for such as shall break them; which Ordinances are therefore part of the Civill Law. The Law of Nature therefore is a part of the Civill Law in all Common-wealths of the world. Reciprocally also, the Civill Law is a part of the Dictates of Nature. For Justice, that is to say, Performance of Covenant, and giving to every man his own, is a Dictate of the Law of Nature. But every subject in a Common-wealth, hath covenanted to obey the Civill Law, (either one with another, as when they assemble to make a common Representative, or with the Representative it selfe one by one, when subdued by the Sword they promise obedience, that they may receive life;) And therefore Obedience to the Civill Law is part also of the Law of Nature. Civill, and Naturall Law are not different kinds, but different parts of Law; whereof one part being written, is called Civill, the other unwritten, Naturall. But the Right of Nature, that is, the naturall Liberty of man, may by the Civill Law be abridged, and restrained: nay, the end of making Lawes, is no other, but such Restraint; without the which there cannot possibly be any Peace. And Law was brought into the world for nothing else, but to limit the naturall liberty of particular men, in such manner, as they might not hurt, but assist one another, and joyn together against a common Enemy.

Provinciall Lawes Are Not Made By Custome, But By The Sovereign Power

5. If the Sovereign of one Common-wealth, subdue a people that have lived under other written Lawes, and afterwards govern them by the same Lawes, by which they were governed before; yet those Lawes are the Civill Lawes of the Victor,

and not of the Vanquished Common-wealth, For the Legislator is he, not by whose authority the Lawes were first made, but by whose authority they now continue to be Lawes. And therefore where there be divers Provinces, within the Dominion of a Common-wealth, and in those Provinces diversity of Lawes, which commonly are called the Customes of each severall Province, we are not to understand that such Customes have their Force, onely from Length of Time; but that they were antiently Lawes written, or otherwise made known, for the Constitutions, and Statutes of their Sovereigns; and are now Lawes, not by vertue of the Praescription of time, but by the Constitutions of their present Sovereigns. But if an unwritten Law, in all the Provinces of a Dominion, shall be generally observed, and no iniquity appear in the use thereof; that law can be no other but a Law of Nature, equally obliging all man-kind.

Some Foolish Opinions Of Lawyers Concerning The Making Of Lawes

6. Seeing then all Lawes, written, and unwritten, have their Authority, and force, from the Will of the Common-wealth; that is to say, from the Will of the Representative; which in a Monarchy is the Monarch, and in other Common-wealths the Sovereign Assembly; a man may wonder from whence proceed such opinions, as are found in the Books of Lawyers of eminence in severall Common-wealths, directly, or by consequence making the Legislative Power depend on private men, or subordinate Judges. As for example, “That the Common Law, hath no Controul but the Parliament;” which is true onely where a Parliament has the Sovereign Power, and cannot be assembled, nor dissolved, but by their own discretion. For if there be a right in any else to dissolve them, there is a right also to controule them, and consequently to controule their controulings. And if there be no such right, then the Controul of Lawes is not Parliamentum, but Rex In Parlamento. And where a Parliament is Sovereign, if it should assemble never so many, or so wise men, from the Countries subject to them, for whatsoever cause;

yet there is no man will believe, that such an Assembly hath thereby acquired to themselves a Legislative Power. Item, that the two arms of a Common-wealth, are Force, and Justice; The First Whereof Is In The King; The Other Deposited In The Hands Of The Parliament. As if a Common-wealth could consist, where the Force were in any hand, which Justice had not the Authority to command and govern.

7. That Law can never be against Reason, our Lawyers are agreed; and that not the Letter,(that is, every construction of it,) but that which is according to the Intention of the Legislator, is the Law. And it is true: but the doubt is, of whose Reason it is, that shall be received for Law. It is not meant of any private Reason; for then there would be as much contradiction in the Lawes, as there is in the Schooles; nor yet (as Sr. Ed, Coke makes it (Sir Edward Coke, upon Littleton Lib.2. Ch.6 fol 97.b),) an Artificiall Perfection of Reason, Gotten By Long Study, Observation, And Experience, (as his was.) For it is possible long study may encrease, and confirm erroneous Sentences: and where men build on false grounds, the more they build, the greater is the ruine; and of those that study, and observe with equall time, and diligence, the reasons and resolutions are, and must remain discordant: and therefore it is not that Juris Prudentia, or wisdom of subordinate Judges; but the Reason of this our Artificiall Man the Common-wealth, and his Command, that maketh Law: And the Common-wealth being in their Representative but one Person, there cannot easily arise any contradiction in the Lawes; and when there doth, the same Reason is able, by interpretation, or alteration, to take it away. In all Courts of Justice, the Sovereign (which is the Person of the Common-wealth,) is he that Judgeth: The subordinate Judge, ought to have regard to the reason, which moved his Sovereign to make such Law, that his Sentence may be according thereunto; which then is his Sovereigns Sentence; otherwise it is his own, and an unjust one.

Law Made, If Not Also Made Known, Is No Law

8. From this, that the Law is a Command, and a Command consisteth in declaration, or manifestation of the will of him that commandeth, by voyce, writing, or some other sufficient argument of the same, we may understand, that the Command of the Common-wealth, is Law onely to those, that have means to take notice of it. Over naturall fooles, children, or mad-men there is no Law, no more than over brute beasts; nor are they capable of the title of just, or unjust; because they had never power to make any covenant, or to understand the consequences thereof; and consequently never took upon them to authorise the actions of any Sovereign, as they must do that make to themselves a Commonwealth. And as those from whom Nature, or Accident hath taken away the notice of all Lawes in generall; so also every man, from whom any accident, not proceeding from his own default, hath taken away the means to take notice of any particular Law, is excused, if he observe it not; And to speak properly, that Law is no Law to him. It is therefore necessary, to consider in this place, what arguments, and signes be sufficient for the knowledge of what is the Law; that is to say, what is the will of the Sovereign, as well in Monarchies, as in other formes of government.

Unwritten Lawes Are All Of Them Lawes Of Nature

And first, if it be a Law that obliges all the Subjects without exception, and is not written, nor otherwise published in such places as they may take notice thereof, it is a Law of Nature. For whatsoever men are to take knowledge of for Law, not upon other mens words, but every one from his own reason, must be such as is agreeable to the reason of all men; which no Law can be, but the Law of Nature. The Lawes of Nature therefore need not any publishing, nor Proclamation; as

being contained in this one Sentence, approved by all the world, “Do not that to another, which thou thinkest unreasonable to be done by another to thy selfe.”

Secondly, if it be a Law that obliges only some condition of men, or one particular man and be not written, nor published by word, then also it is a Law of Nature; and known by the same arguments, and signs, that distinguish those in such a condition, from other Subjects. For whatsoever Law is not written, or some way published by him that makes it Law, can be known no way, but by the reason of him that is to obey it; and is therefore also a Law not only Civill, but Naturall. For example, if the Sovereign employ a Publique Minister, without written Instructions what to doe; he is obliged to take for Instructions the Dictates of Reason; As if he make a Judge, The Judge is to take notice, that his Sentence ought to be according to the reason of his Sovereign, which being alwaies understood to be Equity, he is bound to it by the Law of Nature: Or if an Ambassador, he is (in al things not conteined in his written Instructions) to take for Instruction that which Reason dictates to be most conducing to his Sovereigns interest; and so of all other Ministers of the Sovereignty, publique and private. All which Instructions of naturall Reason may be comprehended under one name of Fidelity; which is a branch of naturall Justice.

The Law of Nature excepted, it belongeth to the essence of all other Lawes, to be made known, to every man that shall be obliged to obey them, either by word, or writing, or some other act, known to proceed from the Sovereign Authority. For the will of another, cannot be understood, but by his own word, or act, or by conjecture taken from his scope and purpose; which in the person of the Common-wealth, is to be supposed alwaies consonant to Equity and Reason. And in antient time, before letters were in common use, the Lawes were many times put into verse; that the rude people taking pleasure in singing, or reciting them, might the more easily reteine them in memory. And for the same reason Solomon adviseth a man, to bind the ten Commandements (Prov. 7. 3) upon his ten fingers. And for the Law which Moses gave to the people of Israel at the renewing of the Covenant, (Deut. 11. 19) he biddeth them to teach it their Children, by

discoursing of it both at home, and upon the way; at going to bed, and at rising from bed; and to write it upon the posts, and dores of their houses; and (Deut. 31. 12) to assemble the people, man, woman, and child, to heare it read.

Nothing Is Law Where The Legislator Cannot Be Known

Nor is it enough the Law be written, and published; but also that there be manifest signs, that it proceedeth from the will of the Sovereign. For private men, when they have, or think they have force enough to secure their unjust designes, and convoy them safely to their ambitious ends, may publish for Lawes what they please, without, or against the Legislative Authority. There is therefore requisite, not only a Declaration of the Law, but also sufficient signes of the Author, and Authority. The Author, or Legislator is supposed in every Common-wealth to be evident, because he is the Sovereign, who having been Constituted by the consent of every one, is supposed by every one to be sufficiently known. And though the ignorance, and security of men be such, for the most part, as that when the memory of the first Constitution of their Common-wealth is worn out, they doe not consider, by whose power they use to be defended against their enemies, and to have their industry protected, and to be righted when injury is done them; yet because no man that considers, can make question of it, no excuse can be derived from the ignorance of where the Sovereignty is placed. And it is a Dictate of Naturall Reason, and consequently an evident Law of Nature, that no man ought to weaken that power, the protection whereof he hath himself demanded, or wittingly received against others. Therefore of who is Sovereign, no man, but by his own fault, (whatsoever evill men suggest,) can make any doubt. The difficulty consisteth in the evidence of the Authority derived from him; The removing whereof, dependeth on the knowledge of the publique Registers, publique Counsels, publique Ministers, and publique Seales; by which all Lawes are sufficiently verified.

Difference Between Verifying And Authorising

Verified, I say, not Authorised: for the Verification, is but the Testimony and Record; not the Authority of the law; which consisteth in the Command of the Sovereign only.

The Law Verified By The Subordinate Judge

If therefore a man have a question of Injury, depending on the Law of Nature; that is to say, on common Equity; the Sentence of the Judge, that by Commission hath Authority to take cognisance of such causes, is a sufficient Verification of the Law of Nature in that individuall case. For though the advice of one that professeth the study of the Law, be usefull for the avoyding of contention; yet it is but advice; tis the Judge must tell men what is Law, upon the hearing of the Controversy.

By The Publique Registers

But when the question is of injury, or crime, upon a written Law; every man by recourse to the Registers, by himself, or others, may (if he will) be sufficiently enformed, before he doe such injury, or commit the crime, whither it be an injury, or not: Nay he ought to doe so: for when a man doubts whether the act he goeth about, be just, or unjust; and may informe himself, if he will; the doing is unlawfull. In like manner, he that supposeth himself injured, in a case determined by the written Law, which he may by himself, or others see and consider; if he

complaine before he consults with the Law, he does unjustly, and bewrayeth a disposition rather to vex other men, than to demand his own right.

By Letters Patent, And Publique Seale

If the question be of Obedience to a publique Officer; To have seen his Commission, with the Publique Seale, and heard it read; or to have had the means to be informed of it, if a man would, is a sufficient Verification of his Authority. For every man is obliged to doe his best endeavour, to informe himself of all written Lawes, that may concerne his own future actions.

The Interpretation Of The Law Dependeth On The Sovereign Power

The Legislator known; and the Lawes, either by writing, or by the light of Nature, sufficiently published; there wanteth yet another very materiall circumstance to make them obligatory. For it is not the Letter, but the Intendment, or Meaning; that is to say, the authentique Interpretation of the Law (which is the sense of the Legislator,) in which the nature of the Law consisteth; And therefore the Interpretation of all Lawes dependeth on the Authority Sovereign; and the Interpreters can be none but those, which the Sovereign, (to whom only the Subject oweth obedience) shall appoint. For else, by the craft of an Interpreter, the Law my be made to beare a sense, contrary to that of the Sovereign; by which means the Interpreter becomes the Legislator.

All Lawes Need Interpretation

All Laws, written, and unwritten, have need of Interpretation. The unwritten Law of Nature, though it be easy to such, as without partiality, and passion, make use of their naturall reason, and therefore leaves the violators thereof without excuse; yet considering there be very few, perhaps none, that in some cases are not blinded by self love, or some other passion, it is now become of all Laws the most obscure; and has consequently the greatest need of able Interpreters. The written Laws, if they be short, are easily mis-interpreted, from the divers significations of a word, or two; if long, they be more obscure by the diverse significations of many words: in so much as no written Law, delivered in few, or many words, can be well understood, without a perfect understanding of the finall causes, for which the Law was made; the knowledge of which finall causes is in the Legislator. To him therefore there can not be any knot in the Law, insoluble; either by finding out the ends, to undoe it by; or else by making what ends he will, (as Alexander did with his sword in the Gordian knot,) by the Legislative power; which no other Interpreter can doe.

The Authentickall Interpretation Of Law Is Not That Of Writers

The Interpretation of the Lawes of Nature, in a Common-wealth, dependeth not on the books of Morall Philosophy. The Authority of writers, without the Authority of the Common-wealth, maketh not their opinions Law, be they never so true. That which I have written in this Treatise, concerning the Morall Vertues, and of their necessity, for the procuring, and maintaining peace, though it bee evident Truth, is not therefore presently Law; but because in all Common-wealths in the world, it is part of the Civill Law: For though it be naturally reasonable; yet it is by the Sovereigne Power that it is Law: Otherwise, it were a great error, to call the Lawes of Nature unwritten Law; whereof wee see so many volumes published, and in them so many contradictions of one another, and of themselves.

The Interpreter Of The Law Is The Judge Giving Sentence Viva Voce

In Every Particular Case

The Interpretation of the Law of Nature, is the Sentence of the Judge constituted by the Sovereign Authority, to heare and determine such controversies, as depend thereon; and consisteth in the application of the Law to the present case. For in the act of Judicature, the Judge doth no more but consider, whither the demand of the party, be consonant to naturall reason, and Equity; and the Sentence he giveth, is therefore the Interpretation of the Law of Nature; which Interpretation is Authentique; not because it is his private Sentence; but because he giveth it by Authority of the Sovereign, whereby it becomes the Sovereigns Sentence; which is Law for that time, to the parties pleading.

The Sentence Of A Judge, Does Not Bind Him, Or Another Judge

To Give Like Sentence In Like Cases Ever After

But because there is no Judge Subordinate, nor Sovereign, but may erre in a Judgement of Equity; if afterward in another like case he find it more consonant to Equity to give a contrary Sentence, he is obliged to doe it. No mans error becomes his own Law; nor obliges him to persist in it. Neither (for the same reason) becomes it a Law to other Judges, though sworn to follow it. For though a wrong Sentence given by authority of the Sovereign, if he know and allow it, in such Lawes as are mutable, be a constitution of a new Law, in cases, in which every little circumstance is the same; yet in Lawes immutable, such as are the Lawes of Nature, they are no Lawes to the same, or other Judges, in the like cases for ever after. Princes succeed one another; and one Judge passeth, another

commeth; nay, Heaven and Earth shall passe; but not one title of the Law of Nature shall passe; for it is the Eternall Law of God. Therefore all the Sentences of precedent Judges that have ever been, cannot all together make a Law contrary to naturall Equity: Nor any Examples of former Judges, can warrant an unreasonable Sentence, or discharge the present Judge of the trouble of studying what is Equity (in the case he is to Judge,) from the principles of his own naturall reason. For example sake, 'Tis against the Law of Nature, To Punish The Innocent; and Innocent is he that acquitteth himselfe Judicially, and is acknowledged for Innocent by the Judge. Put the case now, that a man is accused of a capitall crime, and seeing the powers and malice of some enemy, and the frequent corruption and partiality of Judges, runneth away for feare of the event, and afterwards is taken, and brought to a legall triall, and maketh it sufficiently appear, he was not guilty of the crime, and being thereof acquitted, is neverthelesse condemned to lose his goods; this is a manifest condemnation of the Innocent. I say therefore, that there is no place in the world, where this can be an interpretation of a Law of Nature, or be made a Law by the Sentences of precedent Judges, that had done the same. For he that judged it first, judged unjustly; and no Injustice can be a pattern of Judgement to succeeding Judges. A written Law may forbid innocent men to fly, and they may be punished for flying: But that flying for feare of injury, should be taken for presumption of guilt, after a man is already absolved of the crime Judicially, is contrary to the nature of a Presumption, which hath no place after Judgement given. Yet this is set down by a great Lawyer for the common Law of England. "If a man," saith he, "that is Innocent, be accused of Felony, and for feare flyeth for the same; albeit he judicially acquitteth himselfe of the Felony; yet if it be found that he fled for the Felony, he shall notwithstanding his Innocency, Forfeit all his goods, chattels, debts, and duties. For as to the Forfeiture of them, the Law will admit no prooffe against the Presumption in Law, grounded upon his flight." Here you see, An Innocent Man, Judicially Acquitted, Notwithstanding His Innocency, (when no written Law forbad him to fly) after his acquitall, Upon A Presumption In Law,

condemned to lose all the goods he hath. If the Law ground upon his flight a Presumption of the fact, (which was Capitall,) the Sentence ought to have been Capitall: if the presumption were not of the Fact, for what then ought he to lose his goods? This therefore is no Law of England; nor is the condemnation grounded upon a Presumption of Law, but upon the Presumption of the Judges. It is also against Law, to say that no Proofs shall be admitted against a Presumption of Law. For all Judges, Sovereign and subordinate, if they refuse to heare Proofs, refuse to do Justice: for though the Sentence be Just, yet the Judges that condemn without hearing the Proofs offered, are Unjust Judges; and their Presumption is but Prejudice; which no man ought to bring with him to the Seat of Justice, whatsoever precedent judgements, or examples he shall pretend to follow. There be other things of this nature, wherein mens Judgements have been perverted, by trusting to Precedents: but this is enough to shew, that though the Sentence of the Judge, be a Law to the party pleading, yet it is no Law to any Judge, that shall succeed him in that Office.

In like manner, when question is of the Meaning of written Lawes, he is not the Interpreter of them, that writeth a Commentary upon them. For Commentaries are commonly more subject to cavill, than the Text; and therefore need other Commentaries; and so there will be no end of such Interpretation. And therefore unlesse there be an Interpreter authorised by the Sovereign, from which the subordinate Judges are not to recede, the Interpreter can be no other than the ordinary Judges, in the some manner, as they are in cases of the unwritten Law; and their Sentences are to be taken by them that plead, for Lawes in that particular case; but not to bind other Judges, in like cases to give like judgements. For a Judge may erre in the Interpretation even of written Lawes; but no error of a subordinate Judge, can change the Law, which is the generall Sentence of the Sovereigne.

The Difference Between The Letter And Sentence Of The Law

In written Lawes, men use to make a difference between the Letter, and the Sentence of the Law: And when by the Letter, is meant whatsoever can be gathered from the bare words, 'tis well distinguished. For the significations of almost all words, are either in themselves, or in the metaphoricall use of them, ambiguous; and may be drawn in argument, to make many senses; but there is onely one sense of the Law. But if by the Letter, be meant the Literall sense, then the Letter, and the Sentence or intention of the Law, is all one. For the literall sense is that, which the Legislator is alwayes supposed to be Equity: For it were a great contumely for a Judge to think otherwise of the Sovereigne. He ought therefore, if the Word of the Law doe not fully authorise a reasonable Sentence, to supply it with the Law of Nature; or if the case be difficult, to respit Judgement till he have received more ample authority. For Example, a written Law ordaineth, that he which is thrust out of his house by force, shall be restored by force: It happens that a man by negligence leaves his house empty, and returning is kept out by force, in which case there is no speciall Law ordained. It is evident, that this case is contained in the same Law: for else there is no remedy for him at all; which is to be supposed against the Intention of the Legislator. Again, the word of the Law, commandeth to Judge according to the Evidence: A man is accused falsly of a fact, which the Judge saw himself done by another; and not by him that is accused. In this case neither shall the Letter of the Law be followed to the condemnation of the Innocent, nor shall the Judge give Sentence against the evidence of the Witnesses; because the Letter of the Law is to the contrary: but procure of the Sovereign that another be made Judge, and himselfe Witnesse. So that the incommodity that follows the bare words of a written Law, may lead him to the Intention of the Law, whereby to interpret the same the better; though no Incommodity can warrant a Sentence against the Law. For every Judge of Right, and Wrong, is not Judge of what is Commodious, or Incommodious to the Common-wealth.

The Abilities Required In A Judge

The abilities required in a good Interpreter of the Law, that is to say, in a good Judge, are not the same with those of an Advocate; namely the study of the Lawes. For a Judge, as he ought to take notice of the Fact, from none but the Witnesses; so also he ought to take notice of the Law, from nothing but the Statutes, and Constitutions of the Sovereign, alledged in the pleading, or declared to him by some that have authority from the Sovereign Power to declare them; and need not take care before-hand, what hee shall Judge; for it shall bee given him what hee shall say concerning the Fact, by Witnesses; and what hee shall say in point of Law, from those that shall in their pleadings shew it, and by authority interpret it upon the place. The Lords of Parliament in England were Judges, and most difficult causes have been heard and determined by them; yet few of them were much versed in the study of the Lawes, and fewer had made profession of them: and though they consulted with Lawyers, that were appointed to be present there for that purpose; yet they alone had the authority of giving Sentence. In like manner, in the ordinary trialls of Right, Twelve men of the common People, are the Judges, and give Sentence, not onely of the Fact, but of the Right; and pronounce simply for the Complaynant, or for the Defendant; that is to say, are Judges not onely of the Fact, but also of the Right: and in a question of crime, not onely determine whether done, or not done; but also whether it be Murder, Homicide, Felony, Assault, and the like, which are determinations of Law: but because they are not supposed to know the Law of themselves, there is one that hath Authority to enforme them of it, in the particular case they are to Judge of. But yet if they judge not according to that he tells them, they are not subject thereby to any penalty; unlesse it be made appear, they did it against their consciences, or had been corrupted by reward. The things that make a good Judge, or good Interpreter of the Lawes, are, first A Right Understanding of that

principall Law of Nature called Equity; which depending not on the reading of other mens Writings, but on the goodnesse of a mans own naturall Reason, and Meditation, is presumed to be in those most, that have had most leisure, and had the most inclination to meditate thereon. Secondly, Contempt Of Unnecessary Riches, and Preferments. Thirdly, To Be Able In Judgement To Devest Himselfe Of All Feare, Anger, Hatred, Love, And Compassion. Fourthly, and lastly, Patience To Heare; Diligent Attention In Hearing; And Memory To Retain, Digest And Apply What He Hath Heard.

Divisions Of Law

The difference and division of the Lawes, has been made in divers manners, according to the different methods, of those men that have written of them. For it is a thing that dependeth not on Nature, but on the scope of the Writer; and is subservient to every mans proper method. In the Institutions of Justinian, we find seven sorts of Civill Lawes.

1. The Edicts, Constitutions, and Epistles Of The Prince, that is, of the Emperour; because the whole power of the people was in him. Like these, are the Proclamations of the Kings of England.

2. The Decrees Of The Whole People Of Rome (comprehending the Senate,) when they were put to the Question by the Senate. These were Lawes, at first, by the vertue of the Sovereign Power residing in the people; and such of them as by the Emperours were not abrogated, remained Lawes by the Authority Imperiall. For all Lawes that bind, are understood to be Lawes by his authority that has power to repeale them. Somewhat like to these Lawes, are the Acts of Parliament in England.

3. The Decrees Of The Common People (excluding the Senate,) when they were put to the question by the Tribune of the people. For such of them as were

not abrogated by the Emperours, remained Lawes by the Authority Imperiall. Like to these, were the Orders of the House of Commons in England.

4. *Senatus Consulta*, the Orders Of The Senate; because when the people of Rome grew so numerous, as it was inconvenient to assemble them; it was thought fit by the Emperour, that men should Consult the Senate in stead of the people: And these have some resemblance with the Acts of Counsell.

5. The Edicts Of Praetors, and (in some Cases) of the Aediles: such as are the Chiefe Justices in the Courts of England.

6. *Responsa Prudentum*; which were the Sentences, and Opinions of those Lawyers, to whom the Emperour gave Authority to interpret the Law, and to give answer to such as in matter of Law demanded their advice; which Answers, the Judges in giving Judgement were obliged by the Constitutions of the Emperour to observe; And should be like the Reports of Cases Judged, if other Judges be by the Law of England bound to observe them. For the Judges of the Common Law of England, are not properly Judges, but *Juris Consulti*; of whom the Judges, who are either the Lords, or Twelve men of the Country, are in point of Law to ask advice.

7. Also, Unwritten Customes, (which in their own nature are an imitation of Law,) by the tacite consent of the Emperour, in case they be not contrary to the Law of Nature, are very Lawes.

Another division of Lawes, is into Naturall and Positive. Naturall are those which have been Lawes from all Eternity; and are called not onely Naturall, but also Morall Lawes; consisting in the Morall Vertues, as Justice, Equity, and all habits of the mind that conduce to Peace, and Charity; of which I have already spoken in the fourteenth and fifteenth Chapters.

Positive, are those which have not been for Eternity; but have been made Lawes by the Will of those that have had the Sovereign Power over others; and are either written, or made known to men, by some other argument of the Will of their Legislator.

Another Division Of Law

Again, of Positive Lawes some are Humane, some Divine; And of Humane positive lawes, some are Distributive, some Penal. Distributive are those that determine the Rights of the Subjects, declaring to every man what it is, by which he acquireth and holdeth a propriety in lands, or goods, and a right or liberty of action; and these speak to all the Subjects. Penal are those, which declare, what Penalty shall be inflicted on those that violate the Law; and speak to the Ministers and Officers ordained for execution. For though every one ought to be informed of the Punishments ordained beforehand for their transgression; neverthelesse the Command is not addressed to the Delinquent, (who cannot be supposed will faithfully punish himselfe,) but to publique Ministers appointed to see the Penalty executed. And these Penal Lawes are for the most part written together with the Lawes Distributive; and are sometimes called Judgements. For all Lawes are generall judgements, or Sentences of the Legislator; as also every particular Judgement, is a Law to him, whose case is Judged.

Divine Positive Law How Made Known To Be Law

Divine Positive Lawes (for Naturall Lawes being Eternall, and Universall, are all Divine,) are those, which being the Commandements of God, (not from all Eternity, nor universally addressed to all men, but onely to a certain people, or to certain persons,) are declared for such, by those whom God hath authorised to declare them. But this Authority of man to declare what be these Positive Lawes of God, how can it be known? God may command a man by a supernaturall way, to deliver Lawes to other men. But because it is of the essence of Law, that he who is to be obliged, be assured of the Authority of him that declareth it, which

we cannot naturally take notice to be from God, How Can A Man Without Supernaturall Revelation Be Assured Of The Revelation Received By The Declarer? and How Can He Be Bound To Obey Them? For the first question, how a man can be assured of the Revelation of another, without a Revelation particularly to himselfe, it is evidently impossible: for though a man may be induced to believe such Revelation, from the Miracles they see him doe, or from seeing the Extraordinary sanctity of his life, or from seeing the Extraordinary wisdom, or Extraordinary felicity of his Actions, all which are marks of Gods extraordinary favour; yet they are not assured evidence of speciall Revelation. Miracles are Marvellous workes: but that which is marvellous to one, may not be so to another. Sanctity may be feigned; and the visible felicities of this world, are most often the work of God by Naturall, and ordinary causes. And therefore no man can infallibly know by naturall reason, that another has had a supernaturall revelation of Gods will; but only a beliefe; every one (as the signs thereof shall appear greater, or lesser) a firmer, or a weaker belief.

But for the second, how he can be bound to obey them; it is not so hard. For if the Law declared, be not against the Law of Nature (which is undoubtedly Gods Law) and he undertake to obey it, he is bound by his own act; bound I say to obey it, but not bound to believe it: for mens beliefe, and interiour cogitations, are not subject to the commands, but only to the operation of God, ordinary, or extraordinary. Faith of Supernaturall Law, is not a fulfilling, but only an assenting to the same; and not a duty that we exhibite to God, but a gift which God freely giveth to whom he pleaseth; as also Unbelief is not a breach of any of his Lawes; but a rejection of them all, except the Lawes Naturall. But this that I say, will be made yet cleerer, by the Examples, and Testimonies concerning this point in holy Scripture. The Covenant God made with Abraham (in a Supernaturall Manner) was thus, (Gen. 17. 10) “This is the Covenant which thou shalt observe between Me and Thee and thy Seed after thee.” Abrahams Seed had not this revelation, nor were yet in being; yet they are a party to the Covenant, and bound to obey what Abraham should declare to them for Gods Law; which they could not be, but in

vertue of the obedience they owed to their Parents; who (if they be Subject to no other earthly power, as here in the case of Abraham) have Sovereign power over their children, and servants. Againe, where God saith to Abraham, “In thee shall all Nations of the earth be blessed: For I know thou wilt command thy children, and thy house after thee to keep the way of the Lord, and to observe Righteousnesse and Judgement,” it is manifest, the obedience of his Family, who had no Revelation, depended on their former obligation to obey their Sovereign. At Mount Sinai Moses only went up to God; the people were forbidden to approach on paine of death; yet were they bound to obey all that Moses declared to them for Gods Law. Upon what ground, but on this submission of their own, “Speak thou to us, and we will heare thee; but let not God speak to us, lest we dye?” By which two places it sufficiently appeareth, that in a Common-wealth, a subject that has no certain and assured Revelation particularly to himself concerning the Will of God, is to obey for such, the Command of the Common-wealth: for if men were at liberty, to take for Gods Commandements, their own dreams, and fancies, or the dreams and fancies of private men; scarce two men would agree upon what is Gods Commandement; and yet in respect of them, every man would despise the Commandements of the Common-wealth. I conclude therefore, that in all things not contrary to the Morall Law, (that is to say, to the Law of Nature,) all Subjects are bound to obey that for divine Law, which is declared to be so, by the Lawes of the Common-wealth. Which also is evident to any mans reason; for whatsoever is not against the Law of Nature, may be made Law in the name of them that have the Sovereign power; and there is no reason men should be the lesse obliged by it, when tis propounded in the name of God. Besides, there is no place in the world where men are permitted to pretend other Commandements of God, than are declared for such by the Common-wealth. Christian States punish those that revolt from Christian Religion, and all other States, those that set up any Religion by them forbidden. For in whatsoever is not regulated by the Common-wealth, tis Equity (which is the Law of Nature, and therefore an eternall Law of God) that every man equally enjoy his liberty.

Another Division Of Lawes

There is also another distinction of Laws, into Fundamentall, and Not Fundamentall: but I could never see in any Author, what a Fundamentall Law signifieth. Neverthelesse one may very reasonably distinguish Laws in that manner.

A Fundamentall Law What

For a Fundamentall Law in every Common-wealth is that, which being taken away, the Common-wealth faileth, and is utterly dissolved; as a building whose Foundation is destroyed. And therefore a Fundamentall Law is that, by which Subjects are bound to uphold whatsoever power is given to the Sovereign, whether a Monarch, or a Sovereign Assembly, without which the Common-wealth cannot stand, such as is the power of War and Peace, of Judicature, of Election of Officers, and of doing whatsoever he shall think necessary for the Publique good. Not Fundamentall is that the abrogating whereof, draweth not with it the dissolution of the Common-Wealth; such as are the Lawes Concerning Controversies between subject and subject. Thus much of the Division of Lawes.

Difference Between Law And Right

I find the words *Lex Civilis*, and *Jus Civile*, that is to say, Law and Right Civil, promiscuously used for the same thing, even in the most learned Authors; which neverthelesse ought not to be so. For Right is Liberty, namely that Liberty which the Civil Law leaves us: But Civill Law is an Obligation; and takes from us the

Liberty which the Law of Nature gave us. Nature gave a Right to every man to secure himselfe by his own strength, and to invade a suspected neighbour, by way of prevention; but the Civill Law takes away that Liberty, in all cases where the protection of the Lawe may be safely stayd for. Insomuch as Lex and Jus, are as different as Obligation and Liberty.

And Between A Law And A Charter

Likewise Lawes and Charters are taken promiscuously for the same thing. Yet Charters are Donations of the Sovereign; and not Lawes, but exemptions from Law. The phrase of a Law is Jubeo, Injungo, I Command, and Enjoyn: the phrase of a Charter is Dedi, Concessi, I Have Given, I Have Granted: but what is given or granted, to a man, is not forced upon him, by a Law. A Law may be made to bind All the Subjects of a Common-wealth: a Liberty, or Charter is only to One man, or some One part of the people. For to say all the people of a Common-wealth, have Liberty in any case whatsoever; is to say, that in such case, there hath been no Law made; or else having been made, is now abrogated.

CHAPTER XXVII. OF CRIMES, EXCUSES, AND EXTENUATIONS

SINNE WHAT

A Sinne, is not onely a Transgression of a Law, but also any Contempt of the Legislator. For such Contempt, is a breach of all his Lawes at once. And therefore may consist, not onely in the Commission of a Fact, or in the Speaking of Words by the Lawes forbidden, or in the Omission of what the Law commandeth, but also in the Intention, or purpose to transgresse. For the purpose to breake the Law, is some degree of Contempt of him, to whom it belongeth to see it executed. To be delighted in the Imagination onely, of being possessed of another mans goods, servants, or wife, without any intention to take them from him by force, or fraud, is no breach of the Law, that sayth, “Thou shalt not covet:” nor is the pleasure a man my have in imagining, or dreaming of the death of him, from whose life he expecteth nothing but damage, and displeasure, a Sinne; but the resolving to put some Act in execution, that tendeth thereto. For to be pleased in the fiction of that, which would please a man if it were reall, is a Passion so adhaerent to the Nature both of a man, and every other living creature, as to make it a Sinne, were to make Sinne of being a man. The consideration of this, has made me think them too severe, both to themselves, and others, that maintain, that the First motions of the mind, (though checked with the fear of God) be Sinnes. But I confesse it is safer to erre on that hand, than on the other.

A Crime What

A Crime, is a sinne, consisting in the Committing (by Deed, or Word) of that which the Law forbiddeth, or the Omission of what it hath commanded. So that every Crime is a sinne; but not every sinne a Crime. To intend to steale, or kill, is a sinne, though it never appeare in Word, or Fact: for God that seeth the thoughts of man, can lay it to his charge: but till it appear by some thing done, or said, by which the intention may be Crime; which distinction the Greeks observed in the word amartema, and egklema, or aitia; wherof the former, (which is translated Sinne,) signifieth any swarving from the Law whatsoever; but the two later, (which are translated Crime,) signifie that sinne onely, whereof one man may accuse another. But of Intentions, which never appear by any outward act, there is no place for humane accusation. In like manner the Latines by Peccatum, which is Sinne, signifie all manner of deviation from the Law; but by crimen, (which word they derive from Cerno, which signifies to perceive,) they mean onely such sinnes, as may be made appear before a Judge; and therefore are not meer Intentions.

Where No Civill Law Is, There Is No Crime

From this relation of Sinne to the Law, and of Crime to the Civill Law, may be inferred, First, that where Law ceaseth, Sinne ceaseth. But because the Law of Nature is eternall, Violation of Covenants, Ingratitude, Arrogance, and all Facts contrary to any Morall vertue, can never cease to be Sinne. Secondly, that the Civill Law ceasing, Crimes cease: for there being no other Law remaining, but that of Nature, there is no place for Accusation; every man being his own Judge, and accused onely by his own Conscience, and cleared by the Uprightnesse of his own Intention. When therefore his Intention is Right, his fact is no Sinne: if otherwise, his fact is Sinne; but not Crime. Thirdly, That when the Sovereign Power ceaseth, Crime also ceaseth: for where there is no such Power, there is no protection to be had from the Law; and therefore every one may protect himself

by his own power: for no man in the Institution of Sovereign Power can be supposed to give away the Right of preserving his own body; for the safety whereof all Sovereignty was ordained. But this is to be understood onely of those, that have not themselves contributed to the taking away of the Power that protected them: for that was a Crime from the beginning.

Ignorance Of The Law Of Nature Excuseth No Man

The source of every Crime, is some defect of the Understanding; or some error in Reasoning, or some sudden force of the Passions. Defect in the Understanding, is Ignorance; in Reasoning, Erroneous Opinion. Again, ignorance is of three sort; of the Law, and of the Sovereign, and of the Penalty. Ignorance of the Law of Nature Excuseth no man; because every man that hath attained to the use of Reason, is supposed to know, he ought not to do to another, what he would not have done to himselfe. Therefore into what place soever a man shall come, if he do any thing contrary to that Law, it is a Crime. If a man come from the Indies hither, and perswade men here to receive a new Religion, or teach them any thing that tendeth to disobedience of the Lawes of this Country, though he be never so well perswaded of the truth of what he teacheth, he commits a Crime, and may be justly punished for the same, not onely because his doctrine is false, but also because he does that which he would not approve in another, namely, that coming from hence, he should endeavour to alter the Religion there. But ignorance of the Civill Law, shall Excuse a man in a strange Country, till it be declared to him; because, till then no Civill Law is binding.

Ignorance Of The Civill Law Excuseth Sometimes

In the like manner, if the Civill Law of a mans own Country, be not so sufficiently declared, as he may know it if he will; nor the Action against the Law of Nature; the Ignorance is a good Excuse: In other cases ignorance of the Civill Law, Excuseth not.

Ignorance Of The Sovereign Excuseth Not

Ignorance of the Sovereign Power, in the place of a mans ordinary residence, Excuseth him not; because he ought to take notice of the Power, by which he hath been protected there.

Ignorance Of The Penalty Excuseth Not

Ignorance of the Penalty, where the Law is declared, Excuseth no man: For in breaking the Law, which without a fear of penalty to follow, were not a Law, but vain words, he undergoeth the penalty, though he know not what it is; because, whosoever voluntarily doth any action, accepteth all the known consequences of it; but Punishment is a known consequence of the violation of the Lawes, in every Common-wealth; which punishment, if it be determined already by the Law, he is subject to that; if not, then is he subject to Arbitrary punishment. For it is reason, that he which does Injury, without other limitation than that of his own Will, should suffer punishment without other limitation, than that of his Will whose Law is thereby violated.

Punishments Declared Before The Fact, Excuse From Greater Punishments

After It

But when a penalty, is either annexed to the Crime in the Law it selfe, or hath been usually inflicted in the like cases; there the Delinquent is Excused from a greater penalty. For the punishment foreknown, if not great enough to deterre men from the action, is an invitement to it: because when men compare the benefit of their Injustice, with the harm of their punishment, by necessity of Nature they choose that which appeareth best for themselves; and therefore when they are punished more than the Law had formerly determined, or more than others were punished for the same Crime; it the Law that tempted, and deceiveth them.

Nothing Can Be Made A Crime By A Law Made After The Fact

No Law, made after a Fact done, can make it a Crime: because if the Fact be against the Law of Nature, the Law was before the Fact; and a Positive Law cannot be taken notice of, before it be made; and therefore cannot be Obligatory. But when the Law that forbiddeth a Fact, is made before the Fact be done; yet he that doth the Fact, is lyable to the Penalty ordained after, in case no lesser Penalty were made known before, neither by Writing, nor by Example, for the reason immediatly before alledged.

False Principles Of Right And Wrong Causes Of Crime

From defect in Reasoning, (that is to say, from Errour,) men are prone to violate the Lawes, three wayes. First, by Presumption of false Principles; as when men from having observed how in all places, and in all ages, unjust Actions have been authorised, by the force, and victories of those who have committed them; and that potent men, breaking through the Cob-web Lawes of their Country, the weaker sort, and those that have failed in their Enterprises, have been esteemed the onely Criminals; have thereupon taken for Principles, and grounds of their

Reasoning, “That Justice is but a vain word: That whatsoever a man can get by his own Industry, and hazard, is his own: That the Practice of all Nations cannot be unjust: That examples of former times are good Arguments of doing the like again;” and many more of that kind: Which being granted, no Act in it selfe can be a Crime, but must be made so (not by the Law, but) by the successe of them that commit it; and the same Fact be vertuous, or vicious, as Fortune pleaseth; so that what Marius makes a Crime, Sylla shall make meritorious, and Caesar (the same Lawes standing) turn again into a Crime, to the perpetuall disturbance of the Peace of the Common-wealth.

False Teachers Mis-interpreting The Law Of Nature Secondly, by false

Teachers, that either mis-interpret the Law of Nature, making it thereby repugnant to the Law Civill; or by teaching for Lawes, such Doctrines of their own, or Traditions of former times, as are inconsistent with the duty of a Subject.

And False Inferences From True Principles, By Teachers

Thirdly, by Erroneous Inferences from True Principles; which happens commonly to men that are hasty, and praecipitate in concluding, and resolving what to do; such as are they, that have both a great opinion of their own understanding, and believe that things of this nature require not time and study, but onely common experience, and a good naturall wit; whereof no man thinks himselfe unprovided: whereas the knowledge, of Right and Wrong, which is no lesse difficult, there is no man will pretend to, without great and long study. And of those defects in Reasoning, there is none that can Excuse (though some of them may Extenuate) a Crime, in any man, that pretendeth to the administration of his own private

businessse; much lesse in them that undertake a publique charge; because they pretend to the Reason, upon the want whereof they would ground their Excuse.

By Their Passions;

Of the Passions that most frequently are the causes of Crime, one, is Vain-glory, or a foolish over-rating of their own worth; as if difference of worth, were an effect of their wit, or riches, or bloud, or some other naturall quality, not depending on the Will of those that have the Sovereign Authority. From whence proceedeth a Presumption that the punishments ordained by the Lawes, and extended generally to all Subjects, ought not to be inflicted on them, with the same rigour they are inflicted on poore, obscure, and simple men, comprehended under the name of the Vulgar.

Presumption Of Riches

Therefore it happeneth commonly, that such as value themselves by the greatnesse of their wealth, adventure on Crimes, upon hope of escaping punishment, by corrupting publique Justice, or obtaining Pardon by Mony, or other rewards.

And Friends

And that such as have multitude of Potent Kindred; and popular men, that have gained reputation amongst the Multitude, take courage to violate the Lawes, from a hope of oppressing the Power, to whom it belongeth to put them in execution.

Wisedome

And that such as have a great, and false opinion of their own Wisedome, take upon them to reprehend the actions, and call in question the Authority of them that govern, and so to unsettle the Lawes with their publique discourse, as that nothing shall be a Crime, but what their own designs require should be so. It happeneth also to the same men, to be prone to all such Crimes, as consist in Craft, and in deceiving of their Neighbours; because they think their designs are too subtile to be perceived. These I say are effects of a false presumption of their own Wisedome. For of them that are the first movers in the disturbance of Common-wealth, (which can never happen without a Civill Warre,) very few are left alive long enough, to see their new Designes established: so that the benefit of their Crimes, redoundeth to Posterity, and such as would least have wished it: which argues they were not as wise, as they thought they were. And those that deceive upon hope of not being observed, do commonly deceive themselves, (the darknesse in which they believe they lye hidden, being nothing else but their own blindnesse;) and are no wiser than Children, that think all hid, by hiding their own eyes.

And generally all vain-glorious men, (unlesse they be withall timorous,) are subject to Anger; as being more prone than others to interpret for contempt, the ordinary liberty of conversation: And there are few Crimes that may not be produced by Anger.

Hatred, Lust, Ambition, Covetousnesse, Causes Of Crime

As for the Passions, of Hate, Lust, Ambition, and Covetousnesse, what Crimes they are apt to produce, is so obvious to every mans experience and

understanding, as there needeth nothing to be said of them, saving that they are infirmities, so annexed to the nature, both of man, and all other living creatures, as that their effects cannot be hindred, but by extraordinary use of Reason, or a constant severity in punishing them. For in those things men hate, they find a continuall, and unavoydable molestation; whereby either a mans patience must be everlasting, or he must be eased by removing the power of that which molesteth him; The former is difficult; the later is many times impossible, without some violation of the Law. Ambition, and Covetousnesse are Passions also that are perpetually incumbent, and pressing; whereas Reason is not perpetually present, to resist them: and therefore whensoever the hope of impunity appears, their effects proceed. And for Lust, what it wants in the lasting, it hath in the vehemence, which sufficeth to weigh down the apprehension of all easie, or uncertain punishments.

Fear Sometimes Cause Of Crime, As When The Danger Is Neither Present,

Nor Corporeall

Of all Passions, that which enclineth men least to break the Lawes, is Fear. Nay, (excepting some generous natures,) it is the onely thing, (when there is apparence of profit, or pleasure by breaking the Lawes,) that makes men keep them. And yet in many cases a Crime may be committed through Feare.

For not every Fear justifies the Action it produceth, but the fear onely of corporeall hurt, which we call Bodily Fear, and from which a man cannot see how to be delivered, but by the action. A man is assaulted, fears present death, from which he sees not how to escape, but by wounding him that assaulteth him; If he wound him to death, this is no Crime; because no man is supposed at the making of a Common-wealth, to have abandoned the defence of his life, or limbes, where the Law cannot arrive time enough to his assistance. But to kill a man, because

from his actions, or his threatnings, I may argue he will kill me when he can, (seeing I have time, and means to demand protection, from the Sovereign Power,) is a Crime. Again, a man receives words of disgrace, or some little injuries (for which they that made the Lawes, had assigned no punishment, nor thought it worthy of a man that hath the use of Reason, to take notice of,) and is afraid, unlesse he revenge it, he shall fall into contempt, and consequently be obnoxious to the like injuries from others; and to avoyd this, breaks the Law, and protects himselfe for the future, by the terrour of his private revenge. This is a Crime; For the hurt is not Corporeall, but Phantasticall, and (though in this corner of the world, made sensible by a custome not many years since begun, amongst young and vain men,) so light, as a gallant man, and one that is assured of his own courage, cannot take notice of. Also a man may stand in fear of Spirits, either through his own superstition, or through too much credit given to other men, that tell him of strange Dreams and visions; and thereby be made believe they will hurt him, for doing, or omitting divers things, which neverthelesse, to do, or omit, is contrary to the Lawes; And that which is so done, or omitted, is not to be Excused by this fear; but is a Crime. For (as I have shewn before in the second Chapter) Dreams be naturally but the fancies remaining in sleep, after the impressions our Senses had formerly received waking; and when men are by any accident unassured they have slept, seem to be reall Visions; and therefore he that presumes to break the Law upon his own, or anothers Dream, or pretended Vision, or upon other Fancy of the power of Invisible Spirits, than is permitted by the Common-wealth, leaveth the Law of Nature, which is a certain offence, and followeth the imagery of his own, or another private mans brain, which he can never know whether it signifieth any thing, or nothing, nor whether he that tells his Dream, say true, or lye; which if every private man should have leave to do, (as they must by the Law of Nature, if any one have it) there could no Law be made to hold, and so all Common-wealth would be dissolved.

Crimes Not Equall

From these different sources of Crimes, it appeares already, that all Crimes are not (as the Stoicks of old time maintained) of the same allay. There is place, not only for EXCUSE, by which that which seemed a Crime, is proved to be none at all; but also for EXTENUATION, by which the Crime, that seemed great, is made lesse. For though all Crimes doe equally deserve the name of Injustice, as all deviation from a strait line is equally crookednesse, which the Stoicks rightly observed; yet it does not follow that all Crimes are equally unjust, no more than that all crooked lines are equally crooked; which the Stoicks not observing, held it as great a Crime, to kill a Hen, against the Law, as to kill ones Father.

Totall Excuses

That which totally Excuseth a Fact, and takes away from it the nature of a Crime, can be none but that, which at the same time, taketh away the obligation of the Law. For the fact committed once against the Law, if he that committed it be obliged to the Law, can be no other than a Crime.

The want of means to know the Law, totally Excuseth: For the Law whereof a man has no means to enforme himself, is not obligatory. But the want of diligence to enquire, shall not be considered as a want of means; Nor shall any man, that pretendeth to reason enough for the Government of his own affairs, be supposed to want means to know the Lawes of Nature; because they are known by the reason he pretends to: only Children, and Madmen are Excused from offences against the Law Naturall.

Where a man is captive, or in the power of the enemy, (and he is then in the power of the enemy, when his person, or his means of living, is so,) if it be without his own fault, the Obligation of the Law ceaseth; because he must obey the enemy, or dye; and consequently such obedience is no Crime: for no man is

obliged (when the protection of the Law faileth,) not to protect himself, by the best means he can.

If a man by the terrour of present death, be compelled to doe a fact against the Law, he is totally Excused; because no Law can oblige a man to abandon his own preservation. And supposing such a Law were obligatory; yet a man would reason thus, “If I doe it not, I die presently; if I doe it, I die afterwards; therefore by doing it, there is time of life gained;” Nature therefore compells him to the fact.

When a man is destitute of food, or other thing necessary for his life, and cannot preserve himselfe any other way, but by some fact against the Law; as if in a great famine he take the food by force, or stealth, which he cannot obtaine for mony nor charity; or in defence of his life, snatch away another mans Sword, he is totally Excused, for the reason next before alledged.

Excuses Against The Author

Again, Facts done against the Law, by the authority of another, are by that authority Excused against the Author; because no man ought to accuse his own fact in another, that is but his instrument: but it is not Excused against a third person thereby injured; because in the violation of the law, bothe the Author, and Actor are Criminalls. From hence it followeth that when that Man, or Assembly, that hath the Sovereign Power, commandeth a man to do that which is contrary to a former Law, the doing of it is totally Excused: For he ought not to condemn it himselfe, because he is the Author; and what cannot justly be condemned by the Sovereign, cannot justly be punished by any other. Besides, when the Sovereign commandeth any thing to be done against his own former Law, the Command, as to that particular fact, is an abrogation of the Law.

If that Man, or Assembly, that hath the Sovereign Power, disclaime any Right essentiall to the Sovereignty, whereby there accrueth to the Subject, any liberty inconsistent with the Sovereign Power, that is to say, with the very being of a

Common-wealth, if the Subject shall refuse to obey the Command in any thing, contrary to the liberty granted, this is neverthelesse a Sinne, and contrary to the duty of the Subject: for he ought to take notice of what is inconsistent with the Sovereignty, because it was erected by his own consent, and for his own defence; and that such liberty as is inconsistent with it, was granted through ignorance of the evill consequence thereof. But if he not onely disobey, but also resist a publique Minister in the execution of it, then it is a Crime; because he might have been righted, (without any breach of the Peace,) upon complaint.

The Degrees of Crime are taken on divers Scales, and measured, First, by the malignity of the Source, or Cause: Secondly, by the contagion of the Example: Thirdly, by the mischief of the Effect; and Fourthly, by the concurrence of Times, Places, and Persons.

Presumption Of Power, Aggravateth

The same Fact done against the Law, if it proceed from Presumption of strength, riches, or friends to resist those that are to execute the Law, is a greater Crime, than if it proceed from hope of not being discovered, or of escape by flight: For Presumption of impunity by force, is a Root, from whence springeth, at all times, and upon all temptations, a contempt of all Lawes; whereas in the later case, the apprehension of danger, that makes a man fly, renders him more obedient for the future. A Crime which we know to be so, is greater than the same Crime proceeding from a false perswasion that it is lawfull: For he that committeth it against his own conscience, presumeth on his force, or other power, which encourages him to commit the same again: but he that doth it by error, after the error shewn him, is conformable to the Law.

Evill Teachers, Extenuate

Hee, whose error proceeds from the authority of a Teacher, or an Interpreter of the Law publicely authorised, is not so faulty, as he whose error proceedeth from a peremptory pursute of his own principles, and reasoning: For what is taught by one that teacheth by publique Authority, the Common-wealth teacheth, and hath a resemblance of Law, till the same Authority controuleth it; and in all Crimes that contain not in them a denyall of the Sovereign Power, nor are against an evident Law, Excuseth totally: whereas he that groundeth his actions, on his private Judgement, ought according to the rectitude, or error thereof, to stand, or fall.

Examples Of Impunity, Extenuate

The same Fact, if it have been constantly punished in other men, as a greater Crime, than if there have been may precedent Examples of impunity. For those Examples, are so many hopes of Impunity given by the Sovereign himselfe: And because he which furnishes a man with such a hope, and presumption of mercy, as encourageth him to offend, hath his part in the offence; he cannot reasonably charge the offender with the whole.

Praemeditation, Aggravateth

A Crime arising from a sudden Passion, is not so great, as when the same ariseth from long meditation: For in the former case there is a place for Extenuation, in the common infirmity of humane nature: but he that doth it with praemeditation, has used circumspection, and cast his eye, on the Law, on the punishment, and on the consequence thereof to humane society; all which in committing the Crime,

hee hath contemned, and postposed to his own appetite. But there is no suddenesse of Passion sufficient for a totall Excuse: For all the time between the first knowing of the Law, and the Commission of the Fact, shall be taken for a time of deliberation; because he ought by meditation of the Law, to rectifie the irregularity of his Passions.

Where the Law is publiquely, and with assiduity, before all the people read, and interpreted; a fact done against it, is a greater Crime, than where men are left without such instruction, to enquire of it with difficulty, uncertainty, and interruption of their Callings, and be informed by private men: for in this case, part of the fault is discharged upon common infirmity; but in the former there is apparent negligence, which is not without some contempt of the Sovereign Power.

Tacite Approbation Of The Sovereign, Extenuates

Those facts which the Law expresly condemneth, but the Law-maker by other manifest signes of his will tacitly approveth, are lesse Crimes, than the same facts, condemned both by the Law, and Lawmaker. For seeing the will of the Law-maker is a Law, there appear in this case two contradictory Lawes; which would totally Excuse, if men were bound to take notice of the Sovereigns approbation, by other arguments, than are expressed by his command. But because there are punishments consequent, not onely to the transgression of his Law, but also to the observing of it, he is in part a cause of the transgression, and therefore cannot reasonably impute the whole Crime to the Delinquent. For example, the Law condemneth Duells; the punishment is made capitall: On the contrary part, he that refuseth Duell, is subject to contempt and scorne, without remedy; and sometimes by the Sovereign himselfe thought unworthy to have any charge, or preferment in Warre: If thereupon he accept Duell, considering all men lawfully endeavour to obtain the good opinion of them that have the Sovereign Power, he ought not in reason to be rigorously punished; seeing part of the fault may be discharged on

the punisher; which I say, not as wishing liberty of private revenges, or any other kind of disobedience; but a care in Governours, not to countenance any thing obliquely, which directly they forbid. The examples of Princes, to those that see them, are, and ever have been, more potent to govern their actions, than the Lawes themselves. And though it be our duty to do, not what they do, but what they say; yet will that duty never be performed, till it please God to give men an extraordinary, and supernaturall grace to follow that Precept.

Comparison Of Crimes From Their Effects

Again, if we compare Crimes by the mischief of their Effects, First, the same fact, when it redounds to the damage of many, is greater, than when it redounds to the hurt of few. And therefore, when a fact hurteth, not onely in the present, but also, (by example) in the future, it is a greater Crime, than if it hurt onely in the present: for the former, is a fertile Crime, and multiplies to the hurt of many; the later is barren. To maintain doctrines contrary to the Religion established in the Common-wealth, is a greater fault, in an authorised Preacher, than in a private person: So also is it, to live prophanely, incontinently, or do any irreligious act whatsoever. Likewise in a Professor of the Law, to maintain any point, on do any act, that tendeth to the weakning of the Sovereign Power, as a greater Crime, than in another man: Also in a man that hath such reputation for wisdom, as that his counsells are followed, or his actions imitated by many, his fact against the Law, is a greater Crime, than the same fact in another: For such men not onely commit Crime, but teach it for Law to all other men. And generally all Crimes are the greater, by the scandall they give; that is to say, by becoming stumbling-blocks to the weak, that look not so much upon the way they go in, as upon the light that other men carry before them.

Laesae Majestas

Also Facts of Hostility against the present state of the Common-wealth, are greater Crimes, than the same acts done to private men; For the damage extends it selfe to all: Such are the betraying of the strengths, or revealing of the secrets of the Common-wealth to an Enemy; also all attempts upon the Representative of the Common-wealth, be it a monarch, or an Assembly; and all endeavours by word, or deed to diminish the Authority of the same, either in the present time, or in succession: which Crimes the Latines understand by *Crimina Laesae Majestatis*, and consist in designe, or act, contrary to a Fundamentall Law.

Bribery And False Testimony

Likewise those Crimes, which render Judgements of no effect, are greater Crimes, than Injuries done to one, or a few persons; as to receive mony to give False judgement, or testimony, is a greater Crime, than otherwise to deceive a man of the like, or a greater summe; because not onely he has wrong, that falls by such judgements; but all Judgements are rendered uselesse, and occasion ministred to force, and private revenges.

Depeculation

Also Robbery, and Depeculation of the Publique treasure, or Revenues, is a greater Crime, than the robbing, or defrauding of a Private man; because to robbe the publique, is to robbe many at once.

Counterfeiting Authority

Also the Counterfeit usurpation of publique Ministry, the Counterfeiting of publique Seales, or publique Coine, than counterfeiting of a private mans person, or his seale; because the fraud thereof, extendeth to the dammage of many.

Crimes Against Private Men Compared

Of facts against the Law, done to private men, the greater Crime, is that, where the dammage in the common opinion of men, is most sensible. And therefore

To kill against the Law, is a greater Crime, than any other injury, life preserved.

And to kill with Torment, greater, than simply to kill.

And Mutilation of a limbe, greater, than the spoyling a man of his goods.

And the spoyling a man of his goods, by Terroure of death, or wounds, than by clandestine surreption.

And by clandestine Surreption, than by consent fraudulently obtained.

And the violation of chastity by Force, greater, than by flattery.

And of a woman Married, than of a woman not married.

For all these things are commonly so valued; though some men are more, and some lesse sensible of the same offence. But the Law regardeth not the particular, but the generall inclination of mankind.

And therefore the offence men take, from contumely, in words, or gesture, when they produce no other harme, than the present griefe of him that is reproached, hath been neglected in the Lawes of the Greeks, Romans, and other both antient, and moderne Common-wealths; supposing the true cause of such griefe to consist, not in the contumely, (which takes no hold upon men conscious of their own Vertue,) but in the Pusillanimity of him that is offended by it.

Also a Crime against a private man, is much aggravated by the person, time, and place. For to kill ones Parent, is a greater Crime, than to kill another: for the Parent ought to have the honour of a Sovereign, (though he have surrendred his Power to the Civill Law,) because he had it originally by Nature. And to Robbe a

poore man, is a greater Crime, than to robbe a rich man; because 'tis to the poore a more sensible dammage.

And a Crime committed in the Time, or Place appointed for Devotion, is greater, than if committed at another time or place: for it proceeds from a greater contempt of the Law.

Many other cases of Aggravation, and Extenuation might be added: but by these I have set down, it is obvious to every man, to take the altitude of any other Crime proposed.

Publique Crimes What

Lastly, because in almost all Crimes there is an Injury done, not onely to some Private man, but also to the Common-wealth; the same Crime, when the accusation is in the name of the Common-wealth, is called Publique Crime; and when in the name of a Private man, a Private Crime; And the Pleas according thereunto called Publique, *Judicia Publica*, Pleas of the Crown; or Private Pleas. As in an Accusation of Murder, if the accuser be a Private man, the plea is a Private plea; if the accuser be the Sovereign, the plea is a Publique plea.

CHAPTER XXVIII. OF PUNISHMENTS, AND REWARDS

The Definition Of Punishment

“A PUNISHMENT, is an Evill inflicted by publique Authority, on him that hath done, or omitted that which is Judged by the same Authority to be a Transgression of the Law; to the end that the will of men may thereby the better be disposed to obedience.”

Right To Punish Whence Derived

Before I inferre any thing from this definition, there is a question to be answered, of much importance; which is, by what door the Right, or Authority of Punishing in any case, came in. For by that which has been said before, no man is supposed bound by Covenant, not to resist violence; and consequently it cannot be intended, that he gave any right to another to lay violent hands upon his person. In the making of a Common-wealth, every man giveth away the right of defending another; but not of defending himselfe. Also he obligeth himselfe, to assist him that hath the Sovereignty, in the Punishing of another; but of himselfe not. But to covenant to assist the Sovereign, in doing hurt to another, unlesse he that so covenanteth have a right to doe it himselfe, is not to give him a Right to Punish. It is manifest therefore that the Right which the Common-wealth (that is, he, or they that represent it) hath to Punish, is not grounded on any concession, or gift of the Subjects. But I have also shewed formerly, that before the Institution of Common-wealth, every man had a right to every thing, and to do whatsoever he thought necessary to his own preservation; subduing, hurting, or killing any man in order

thereunto. And this is the foundation of that right of Punishing, which is exercised in every Common-wealth. For the Subjects did not give the Sovereign that right; but onely in laying down theirs, strengthned him to use his own, as he should think fit, for the preservation of them all: so that it was not given, but left to him, and to him onely; and (excepting the limits set him by naturall Law) as entire, as in the condition of meer Nature, and of warre of every one against his neighbour.

Private Injuries, And Revenges No Punishments

From the definition of Punishment, I inferre, First, that neither private revenges, nor injuries of private men, can properly be stiled Punishment; because they proceed not from publique Authority.

Nor Denyall Of Preferment

Secondly, that to be neglected, and unpreferred by the publique favour, is not a Punishment; because no new evill is thereby on any man Inflicted; he is onely left in the estate he was in before.

Nor Pain Inflicted Without Publique Hearing

Thirdly, that the evill inflicted by publique Authority, without precedent publique condemnation, is not to be stiled by the name of Punishment; but of an hostile act; because the fact for which a man is Punished, ought first to be Judged by publique Authority, to be a transgression of the Law.

Nor Pain Inflicted By Usurped Power

Fourthly, that the evill inflicted by usurped power, and Judges without Authority from the Sovereign, is not Punishment; but an act of hostility; because the acts of power usurped, have not for Author, the person condemned; and therefore are not acts of publique Authority.

Nor Pain Inflicted Without Respect To The Future Good

Fifthly, that all evill which is inflicted without intention, or possibility of disposing the Delinquent, or (by his example) other men, to obey the Lawes, is not Punishment; but an act of hostility; because without such an end, no hurt done is contained under that name.

Naturall Evill Consequences, No Punishments

Sixthly, whereas to certain actions, there be annexed by Nature, divers hurtfull consequences; as when a man in assaulting another, is himselfe slain, or wounded; or when he falleth into sicknesse by the doing of some unlawfull act; such hurt, though in respect of God, who is the author of Nature, it may be said to be inflicted, and therefore a Punishment divine; yet it is not contained in the name of Punishment in respect of men, because it is not inflicted by the Authority of man.

Hurt Inflicted, If Lesse Than The Benefit Of Transgressing,

Is Not Punishment

Seventhly, If the harm inflicted be lesse than the benefit, or contentment that naturally followeth the crime committed, that harm is not within the definition; and is rather the Price, or Redemption, than the Punishment of a Crime: Because it is of the nature of Punishment, to have for end, the disposing of men to obey the Law; which end (if it be lesse that the benefit of the transgression) it attaineth not, but worketh a contrary effect.

Where The Punishment Is Annexed To The Law, A Greater Hurt Is Not

Punishment, But Hostility

Eighthly, If a Punishment be determined and prescribed in the Law it selfe, and after the crime committed, there be a greater Punishment inflicted, the excesse is not Punishment, but an act of hostility. For seeing the aym of Punishment is not a revenge, but terrour; and the terrour of a great Punishment unknown, is taken away by the declaration of a lesse, the unexpected addition is no part of the Punishment. But where there is no Punishment at all determined by the Law, there whatsoever is inflicted, hath the nature of Punishment. For he that goes about the violation of a Law, wherein no penalty is determined, expecteth an indeterminate, that is to say, an arbitrary Punishment.

Hurt Inflicted For A Fact Done Before The Law, No Punishment

Ninthly, Harme inflicted for a Fact done before there was a Law that forbad it, is not Punishment, but an act of Hostility: For before the Law, there is no transgression of the Law: But Punishment supposeth a fact judged, to have been a transgression of the Law; Therefore Harme inflicted before the Law made, is not Punishment, but an act of Hostility.

The Representative Of The Common-wealth Unpunishable

Tenthly, Hurt inflicted on the Representative of the Common-wealth, is not Punishment, but an act of Hostility: Because it is of the nature of Punishment, to be inflicted by publique Authority, which is the Authority only of the Representative it self.

Hurt To Revolted Subjects Is Done By Right Of War, Not

By Way Of Punishment

Lastly, Harme inflicted upon one that is a declared enemy, falls not under the name of Punishment: Because seeing they were either never subject to the Law, and therefore cannot transgresse it; or having been subject to it, and professing to be no longer so, by consequence deny they can transgresse it, all the Harms that can be done them, must be taken as acts of Hostility. But in declared Hostility, all infliction of evill is lawfull. From whence it followeth, that if a subject shall by fact, or word, wittingly, and deliberately deny the authority of the Representative of the Common-wealth, (whatsoever penalty hath been formerly ordained for Treason,) he may lawfully be made to suffer whatsoever the Representative will: For in denying subjection, he denies such Punishment as by the Law hath been ordained; and therefore suffers as an enemy of the Common-wealth; that is, according to the will of the Representative. For the Punishments set down in the Law, are to Subjects, not to Enemies; such as are they, that having been by their own act Subjects, deliberately revolting, deny the Sovereign Power.

The first, and most generall distribution of Punishments, is into Divine, and Humane. Of the former I shall have occasion, to speak, in a more convenient place hereafter.

Humane, are those Punishments that be inflicted by the Commandement of Man; and are either Corporall, or Pecuniary, or Ignominy, or Imprisonment, or Exile, or mixt of these.

Punishments Corporall

Corporall Punishment is that, which is inflicted on the body directly, and according to the intention of him that inflicteth it: such as are stripes, or wounds, or deprivation of such pleasures of the body, as were before lawfully enjoyed.

Capitall

And of these, some be Capitall, some Lesse than Capitall. Capitall, is the Infliction of Death; and that either simply, or with torment. Lesse than Capitall, are Stripes, Wounds, Chains, and any other corporall Paine, not in its own nature mortall. For if upon the Infliction of a Punishment death follow not in the Intention of the Inflicter, the Punishment is not be esteemed Capitall, though the harme prove mortall by an accident not to be foreseen; in which case death is not inflicted, but hastened.

Pecuniary Punishment, is that which consisteth not only in the deprivation of a Summe of Mony, but also of Lands, or any other goods which are usually bought and sold for mony. And in case the Law, that ordaineth such a punishment, be made with design to gather mony, from such as shall transgresse the same, it is not properly a Punishment, but the Price of priviledge, and exemption from the Law, which doth not absolutely forbid the fact, but only to those that are not able to pay the mony: except where the Law is Naturall, or part of Religion; for in that case it is not an exemption from the Law, but a transgression of it. As where a Law exacteth a Pecuniary mulct, of them that take the name of God in vaine, the

payment of the mulct, is not the price of a dispensation to sweare, but the Punishment of the transgression of a Law undispensable. In like manner if the Law impose a Summe of Mony to be payd, to him that has been Injured; this is but a satisfaction for the hurt done him; and extinguisheth the accusation of the party injured, not the crime of the offender.

Ignominy

Ignominy, is the infliction of such Evill, as is made Dishonorable; or the deprivation of such Good, as is made Honourable by the Common-wealth. For there be some things Honorable by Nature; as the effects of Courage, Magnanimity, Strength, Wisdome, and other abilities of body and mind: Others made Honorable by the Common-wealth; as Badges, Titles, Offices, or any other singular marke of the Soveraigns favour. The former, (though they may faile by nature, or accident,) cannot be taken away by a Law; and therefore the losse of them is not Punishment. But the later, may be taken away by the publique authority that made them Honorable, and are properly Punishments: Such are degrading men condemned, of their Badges, Titles, and Offices; or declaring them incapable of the like in time to come.

Imprisonment

Imprisonment, is when a man is by publique Authority deprived of liberty; and may happen from two divers ends; whereof one is the safe custody of a man accused; the other is the inflicting of paine on a man condemned. The former is not Punishment; because no man is supposed to be Punisht, before he be Judicially heard, and declared guilty. And therefore whatsoever hurt a man is made to suffer by bonds, or restraint, before his cause be heard, over and above

that which is necessary to assure his custody, is against the Law of Nature. But the Later is Punishment, because Evill, and inflicted by publique Authority, for somewhat that has by the same Authority been Judged a Transgression of the Law. Under this word Imprisonment, I comprehend all restraint of motion, caused by an externall obstacle, be it a House, which is called by the generall name of a Prison; or an Iland, as when men are said to be confined to it; or a place where men are set to worke, as in old time men have been condemned to Quarries, and in these times to Gallies; or be it a Chaine, or any other such impediment.

Exile

Exile, (Banishment) is when a man is for a crime, condemned to depart out of the dominion of the Common-wealth, or out of a certaine part thereof; and during a prefixed time, or for ever, not to return into it: and seemeth not in its own nature, without other circumstances, to be a Punishment; but rather an escape, or a publique commandement to avoid Punishment by flight. And Cicero sayes, there was never any such Punishment ordained in the City of Rome; but calls it a refuge of men in danger. For if a man banished, be neverthelesse permitted to enjoy his Goods, and the Revenue of his Lands, the meer change of ayr is no punishment; nor does it tend to that benefit of the Common-wealth, for which all Punishments are ordained, (that is to say, to the forming of mens wils to the observation of the Law;) but many times to the dammage of the Common-wealth. For a Banished man, is a lawfull enemy of the Common-wealth that banished him; as being no more a Member of the same. But if he be withall deprived of his Lands, or Goods, then the Punishment lyeth not in the Exile, but is to be reckoned amongst Punishments Pecuniary.

The Punishment Of Innocent Subjects Is Contrary To The Law Of Nature

All Punishments of Innocent subjects, be they great or little, are against the Law of Nature; For Punishment is only of Transgression of the Law, and therefore there can be no Punishment of the Innocent. It is therefore a violation, First, of that Law of Nature, which forbiddeth all men, in their Revenges, to look at any thing but some future good: For there can arrive no good to the Common-wealth, by Punishing the Innocent. Secondly, of that, which forbiddeth Ingratitude: For seeing all Sovereign Power, is originally given by the consent of every one of the Subjects, to the end they should as long as they are obedient, be protected thereby; the Punishment of the Innocent, is a rendring of Evill for Good. And thirdly, of the Law that commandeth Equity; that is to say, an equall distribution of Justice; which in Punishing the Innocent is not observed.

But The Harme Done To Innocents In War, Not So

But the Infliction of what evill soever, on an Innocent man, that is not a Subject, if it be for the benefit of the Common-wealth, and without violation of any former Covenant, is no breach of the Law of Nature. For all men that are not Subjects, are either Enemies, or else they have ceased from being so, by some precedent covenants. But against Enemies, whom the Common-wealth judgeth capable to do them hurt, it is lawfull by the originall Right of Nature to make warre; wherein the Sword Judgeth not, nor doth the Victor make distinction of Nocent and Innocent, as to the time past; nor has other respect of mercy, than as it conduceth to the good of his own People. And upon this ground it is, that also in Subjects, who deliberately deny the Authority of the Common-wealth established, the vengeance is lawfully extended, not onely to the Fathers, but also to the third and fourth generation not yet in being, and consequently innocent of the fact, for which they are afflicted: because the nature of this offence, consisteth in the renouncing of subjection; which is a relapse into the condition of warre,

commonly called Rebellion; and they that so offend, suffer not as Subjects, but as Enemies. For Rebellion, is but warre renewed.

Reward, Is Either Salary, Or Grace

REWARD, is either of Gift, or by Contract. When by Contract, it is called Salary, and Wages; which is benefit due for service performed, or promised. When of Gift, it is benefit proceeding from the Grace of them that bestow it, to encourage, or enable men to do them service. And therefore when the Sovereign of a Common-wealth appointeth a Salary to any publique Office, he that receiveth it, is bound in Justice to performe his office; otherwise, he is bound onely in honour, to acknowledgement, and an endeavour of requitall. For though men have no lawfull remedy, when they be commanded to quit their private businesse, to serve the publique, without Reward, or Salary; yet they are not bound thereto, by the Law of Nature, nor by the institution of the Common-wealth, unlesse the service cannot otherwise be done; because it is supposed the Sovereign may make use of all their means, insomuch as the most common Souldier, may demand the wages of his warrefare, as a debt.

Benefits Bestowed For Fear, Are Not Rewards

The benefits which a Sovereign bestoweth on a Subject, for fear of some power, and ability he hath to do hurt to the Common-wealth, are not properly Rewards; for they are not Salaryes; because there is in this case no contract supposed, every man being obliged already not to do the Common-wealth disservice: nor are they Graces; because they be extorted by feare, which ought not to be incident to the Sovereign Power: but are rather Sacrifices, which the Sovereign (considered in his naturall person, and not in the person of the Common-wealth) makes, for the

appeasing the discontent of him he thinks more potent than himselfe; and encourage not to obedience, but on the contrary, to the continuance, and increasing of further extortion.

Salaries Certain And Casuall

And whereas some Salaries are certain, and proceed from the publique Treasure; and others uncertain, and casuall, proceeding from the execution of the Office for which the Salary is ordained; the later is in some cases hurtfull to the Commonwealth; as in the case of Judicature. For where the benefit of the Judges, and Ministers of a Court of Justice, ariseth for the multitude of Causes that are brought to their cognisance, there must needs follow two Inconveniences: One, is the nourishing of sutes; for the more sutes, the greater benefit: and another that depends on that, which is contention about Jurisdiction; each Court drawing to it selfe, as many Causes as it can. But in offices of Execution there are not those Inconveniences; because their employment cannot be encreased by any endeavour of their own. And thus much shall suffice for the nature of Punishment, and Reward; which are, as it were, the Nerves and Tendons, that move the limbes and joynts of a Common-wealth.

Hitherto I have set forth the nature of Man, (whose Pride and other Passions have compelled him to submit himselfe to Government;) together with the great power of his Governour, whom I compared to Leviathan, taking that comparison out of the two last verses of the one and fortieth of Job; where God having set forth the great power of Leviathan, called him King of the Proud. “There is nothing,” saith he, “on earth, to be compared with him. He is made so as not be afraid. Hee seeth every high thing below him; and is King of all the children of pride.” But because he is mortall, and subject to decay, as all other Earthly creatures are; and because there is that in heaven, (though not on earth) that he should stand in fear of, and whose Lawes he ought to obey; I shall in the next

following Chapters speak of his Diseases, and the causes of his Mortality; and of what Lawes of Nature he is bound to obey.

CHAPTER XXIX. OF THOSE THINGS THAT WEAKEN, OR TEND TO THE DISSOLUTION OF A COMMON-WEALTH

DISSOLUTION OF COMMON-WEALTHS Proceedeth From Imperfect Institution

Though nothing can be immortall, which mortals make; yet, if men had the use of reason they pretend to, their Common-wealths might be secured, at least, from perishing by internall diseases. For by the nature of their Institution, they are designed to live, as long as Man-kind, or as the Lawes of Nature, or as Justice it selfe, which gives them life. Therefore when they come to be dissolved, not by externall violence, but intestine disorder, the fault is not in men, as they are the Matter; but as they are the Makers, and orderers of them. For men, as they become at last weary of irregular justling, and hewing one another, and desire with all their hearts, to conforme themselves into one firme and lasting edifice; so for want, both of the art of making fit Laws, to square their actions by, and also of humility, and patience, to suffer the rude and combersome points of their present greatnesse to be taken off, they cannot without the help of a very able Architect, be compiled, into any other than a crasie building, such as hardly lasting out their own time, must assuredly fall upon the heads of their posterity.

Amongst the Infirmities therefore of a Common-wealth, I will reckon in the first place, those that arise from an Imperfect Institution, and resemble the diseases of a naturall body, which proceed from a Defectuous Procreation.

Want Of Absolute Power

Of which, this is one, “That a man to obtain a Kingdome, is sometimes content with lesse Power, than to the Peace, and defence of the Common-wealth is

necessarily required.” From whence it commeth to passe, that when the exercise of the Power layd by, is for the publique safety to be resumed, it hath the resemblance of as unjust act; which disposeth great numbers of men (when occasion is presented) to rebell; In the same manner as the bodies of children, gotten by diseased parents, are subject either to untimely death, or to purge the ill quality, derived from their vicious conception, by breaking out into biles and scabbs. And when Kings deny themselves some such necessary Power, it is not alwayes (though sometimes) out of ignorance of what is necessary to the office they undertake; but many times out of a hope to recover the same again at their pleasure: Wherein they reason not well; because such as will hold them to their promises, shall be maintained against them by forraign Common-wealths; who in order to the good of their own Subjects let slip few occasions to Weaken the estate of their Neighbours. So was Thomas Beckett Archbishop of Canterbury, supported against Henry the Second, by the Pope; the subjection of Ecclesiastiques to the Common-wealth, having been dispensed with by William the Conqueror at his reception, when he took an Oath, not to infringe the liberty of the Church. And so were the Barons, whose power was by William Rufus (to have their help in transferring the Succession from his Elder brother, to himselfe,) encreased to a degree, inconsistent with the Sovereign Power, maintained in their Rebellion against King John, by the French. Nor does this happen in Monarchy onely. For whereas the stile of the antient Roman Common-wealth, was, The Senate, and People of Rome; neither Senate, nor People pretended to the whole Power; which first caused the seditions, of Tiberius Gracchus, Caius Gracchus, Lucius Saturnius, and others; and afterwards the warres between the Senate and the People, under Marius and Sylla; and again under Pompey and Caesar, to the Extinction of their Democracy, and the setting up of Monarchy.

The people of Athens bound themselves but from one onely Action; which was, that no man on pain of death should propound the renewing of the warre for the Island of Salamis; And yet thereby, if Solon had not caused to be given out he was mad, and afterwards in gesture and habit of a mad-man, and in verse,

propounded it to the People that flocked about him, they had had an enemy perpetually in readinesse, even at the gates of their Citie; such dammage, or shifts, are all Common-wealths forced to, that have their Power never so little limited.

Private Judgement Of Good and Evill

In the second place, I observe the Diseases of a Common-wealth, that proceed from the poyson of seditious doctrines; whereof one is, “That every private man is Judge of Good and Evill actions.” This is true in the condition of meer Nature, where there are no Civill Lawes; and also under Civill Government, in such cases as are not determined by the Law. But otherwise, it is manifest, that the measure of Good and Evill actions, is the Civill Law; and the Judge the Legislator, who is alwayes Representative of the Common-wealth. From this false doctrine, men are disposed to debate with themselves, and dispute the commands of the Common-wealth; and afterwards to obey, or disobey them, as in their private judgements they shall think fit. Whereby the Common-wealth is distracted and Weakened.

Erroneous Conscience

Another doctrine repugnant to Civill Society, is, that “Whatsoever a man does against his Conscience, is Sinne;” and it dependeth on the presumption of making himself judge of Good and Evill. For a mans Conscience, and his Judgement is the same thing; and as the Judgement, so also the Conscience may be erroneous. Therefore, though he that is subject to no Civill Law, sinneth in all he does against his Conscience, because he has no other rule to follow but his own reason; yet it is not so with him that lives in a Common-wealth; because the Law is the publique Conscience, by which he hath already undertaken to be guided. Otherwise in such diversity, as there is of private Consciences, which are but

private opinions, the Common-wealth must needs be distracted, and no man dare to obey the Sovereign Power, farther than it shall seem good in his own eyes.

Pretence Of Inspiration

It hath been also commonly taught, “That Faith and Sanctity, are not to be attained by Study and Reason, but by supernaturall Inspiration, or Infusion,” which granted, I see not why any man should render a reason of his Faith; or why every Christian should not be also a Prophet; or why any man should take the Law of his Country, rather than his own Inspiration, for the rule of his action. And thus wee fall again into the fault of taking upon us to Judge of Good and Evill; or to make Judges of it, such private men as pretend to be supernaturally Inspired, to the Dissolution of all Civill Government. Faith comes by hearing, and hearing by those accidents, which guide us into the presence of them that speak to us; which accidents are all contrived by God Almighty; and yet are not supernaturall, but onely, for the great number of them that concur to every effect, unobservable. Faith, and Sanctity, are indeed not very frequent; but yet they are not Miracles, but brought to passe by education, discipline, correction, and other naturall wayes, by which God worketh them in his elect, as such time as he thinketh fit. And these three opinions, pernicious to Peace and Government, have in this part of the world, proceeded chiefly from the tongues, and pens of unlearned Divines; who joyning the words of Holy Scripture together, otherwise than is agreeable to reason, do what they can, to make men think, that Sanctity and Naturall Reason, cannot stand together.

Subjecting The Sovereign Power To Civill Lawes

A fourth opinion, repugnant to the nature of a Common-wealth, is this, “That he that hath the Sovereign Power, is subject to the Civill Lawes.” It is true, that Sovereigns are all subjects to the Lawes of Nature; because such lawes be Divine, and cannot by any man, or Common-wealth be abrogated. But to those Lawes which the Sovereign himselfe, that is, which the Common-wealth maketh, he is not subject. For to be subject to Lawes, is to be subject to the Common-wealth, that is to the Sovereign Representative, that is to himselfe; which is not subjection, but freedome from the Lawes. Which error, because it setteth the Lawes above the Sovereign, setteth also a Judge above him, and a Power to punish him; which is to make a new Sovereign; and again for the same reason a third, to punish the second; and so continually without end, to the Confusion, and Dissolution of the Common-wealth.

Attributing Of Absolute Propriety To The Subjects

A Fifth doctrine, that tendeth to the Dissolution of a Common-wealth, is, “That every private man has an absolute Propriety in his Goods; such, as excludeth the Right of the Sovereign.” Every man has indeed a Propriety that excludes the Right of every other Subject: And he has it onely from the Sovereign Power; without the protection whereof, every other man should have equall Right to the same. But if the Right of the Sovereign also be excluded, he cannot performe the office they have put him into; which is, to defend them both from forraign enemies, and from the injuries of one another; and consequently there is no longer a Common-wealth.

And if the Propriety of Subjects, exclude not the Right of the Sovereign Representative to their Goods; much lesse to their offices of Judicature, or Execution, in which they Represent the Sovereign himselfe.

Dividing Of The Sovereign Power

There is a Sixth doctrine, plainly, and directly against the essence of a Commonwealth; and 'tis this, "That the Sovereign Power may be divided." For what is it to divide the Power of a Common-wealth, but to Dissolve it; for Powers divided mutually destroy each other. And for these doctrines, men are chiefly beholding to some of those, that making profession of the Lawes, endeavour to make them depend upon their own learning, and not upon the Legislative Power.

Imitation Of Neighbour Nations

And as False Doctrine, so also often-times the Example of different Government in a neighbouring Nation, disposeth men to alteration of the forme already settled. So the people of the Jewes were stirred up to reject God, and to call upon the Prophet Samuel, for a King after the manner of the Nations; So also the lesser Cities of Greece, were continually disturbed, with seditions of the Aristocraticall, and Democraticall factions; one part of almost every Common-wealth, desiring to imitate the Lacedaemonians; the other, the Athenians. And I doubt not, but many men, have been contented to see the late troubles in England, out of an imitation of the Low Countries; supposing there needed no more to grow rich, than to change, as they had done, the forme of their Government. For the constitution of mans nature, is of it selfe subject to desire novelty: When therefore they are provoked to the same, by the neighbourhood also of those that have been enriched by it, it is almost impossible for them, not to be content with those that sollicite them to change; and love the first beginnings, though they be grieved with the continuance of disorder; like hot blouds, that having gotten the itch, tear themselves with their own nayles, till they can endure the smart no longer.

Imitation Of The Greeks, And Romans

And as to Rebellion in particular against Monarchy; one of the most frequent causes of it, is the Reading of the books of Policy, and Histories of the antient Greeks, and Romans; from which, young men, and all others that are unprovided of the Antidote of solid Reason, receiving a strong, and delightfull impression, of the great exploits of warre, atchieved by the Conductors of their Armies, receive withall a pleasing Idea, of all they have done besides; and imagine their great prosperity, not to have proceeded from the aemulation of particular men, but from the vertue of their popular form of government: Not considering the frequent Seditions, and Civill Warres, produced by the imperfection of their Policy. From the reading, I say, of such books, men have undertaken to kill their Kings, because the Greek and Latine writers, in their books, and discourses of Policy, make it lawfull, and laudable, for any man so to do; provided before he do it, he call him Tyrant. For they say not Regicide, that is, killing of a King, but Tyrannicide, that is, killing of a Tyrant is lawfull. From the same books, they that live under a Monarch conceive an opinion, that the Subjects in a Popular Common-wealth enjoy Liberty; but that in a Monarchy they are all Slaves. I say, they that live under a Monarchy conceive such an opinion; not they that live under a Popular Government; for they find no such matter. In summe, I cannot imagine, how anything can be more prejudiciall to a Monarchy, than the allowing of such books to be publikely read, without present applying such correctives of discreet Masters, as are fit to take away their Venime; Which Venime I will not doubt to compare to the biting of a mad Dogge, which is a disease the Physicians call Hydrophobia, or Fear Of Water. For as he that is so bitten, has a continuall torment of thirst, and yet abhorreth water; and is in such an estate, as if the poyson endeavoured to convert him into a Dogge: So when a Monarchy is once bitten to the quick, by those Democraticall writers, that continually snarle at that estate; it wanteth nothing more than a strong Monarch, which neverthelesse out of

a certain Tyrannophobia, or feare of being strongly governed, when they have him, they abhorre.

As here have been Doctors, that hold there be three Soules in a man; so there be also that think there may be more Soules, (that is, more Soveraigns,) than one, in a Common-wealth; and set up a Supremacy against the Soveraignty; Canons against Lawes; and a Ghostly Authority against the Civill; working on mens minds, with words and distinctions, that of themselves signifie nothing, but bewray (by their obscurity) that there walketh (as some think invisibly) another Kingdome, as it were a Kingdome of Fayries, in the dark. Now seeing it is manifest, that the Civill Power, and the Power of the Common-wealth is the same thing; and that Supremacy, and the Power of making Canons, and granting Faculties, implyeth a Common-wealth; it followeth, that where one is Soveraign, another Supreme; where one can make Lawes, and another make Canons; there must needs be two Common-wealths, of one & the same Subjects; which is a Kingdome divided in it selfe, and cannot stand. For notwithstanding the insignificant distinction of Temporall, and Ghostly, they are still two Kingdomes, and every Subject is subject to two Masters. For seeing the Ghostly Power challengeth the Right to declare what is Sinne it challengeth by consequence to declare what is Law, (Sinne being nothing but the transgression of the Law;) and again, the Civill Power challenging to declare what is Law, every Subject must obey two Masters, who bothe will have their Commands be observed as Law; which is impossible. Or, if it be but one Kingdome, either the Civill, which is the Power of the Common-wealth, must be subordinate to the Ghostly; or the Ghostly must be subordinate to the Temporall and then there is no Supremacy but the Temporall. When therefore these two Powers oppose one another, the Common-wealth cannot but be in great danger of Civill warre, and Dissolution. For the Civill Authority being more visible, and standing in the cleerer light of naturall reason cannot choose but draw to it in all times a very considerable part of the people: And the Spirituall, though it stand in the darknesse of Schoole distinctions, and hard words; yet because the fear of Darknesse, and Ghosts, is

greater than other fears, cannot want a party sufficient to Trouble, and sometimes to Destroy a Common-wealth. And this is a Disease which not unfitly may be compared to the Epilepsie, or Falling-sickness (which the Jewes took to be one kind of possession by Spirits) in the Body Naturall. For as in this Disease, there is an unnaturall spirit, or wind in the head that obstructeth the roots of the Nerves, and moving them violently, taketh away the motion which naturally they should have from the power of the Soule in the Brain, and thereby causeth violent, and irregular motions (which men call Convulsions) in the parts; insomuch as he that is seized therewith, falleth down sometimes into the water, and sometimes into the fire, as a man deprived of his senses; so also in the Body Politique, when the Spirituall power, moveth the Members of a Common-wealth, by the terrour of punishments, and hope of rewards (which are the Nerves of it,) otherwise than by the Civill Power (which is the Soule of the Common-wealth) they ought to be moved; and by strange, and hard words suffocates the people, and either Overwhelm the Common-wealth with Oppression, or cast it into the Fire of a Civill warre.

Mixt Government

Sometimes also in the meerly Civill government, there be more than one Soule: As when the Power of levying mony, (which is the Nutritive faculty,) has depended on a generall Assembly; the Power of conduct and command, (which is the Motive Faculty,) on one man; and the Power of making Lawes, (which is the Rationall faculty,) on the accidentall consent, not onely of those two, but also of a third; This endangereth the Common-wealth, sometimes for want of consent to good Lawes; but most often for want of such Nourishment, as is necessary to Life, and Motion. For although few perceive, that such government, is not government, but division of the Common-wealth into three Factions, and call it mixt Monarchy; yet the truth is, that it is not one independent Common-wealth,

but three independent Factions; nor one Representative Person, but three. In the Kingdome of God, there may be three Persons independent, without breach of unity in God that Reigneth; but where men Reigne, that be subject to diversity of opinions, it cannot be so. And therefore if the King bear the person of the People, and the generall Assembly bear also the person of the People, and another assembly bear the person of a Part of the people, they are not one Person, nor one Sovereign, but three Persons, and three Sovereigns.

To what Disease in the Naturall Body of man, I may exactly compare this irregularity of a Common-wealth, I know not. But I have seen a man, that had another man growing out of his side, with an head, armes, breast, and stomach, of his own: If he had had another man growing out of his other side, the comparison might then have been exact.

Want Of Mony

Hitherto I have named such Diseases of a Common-wealth, as are of the greatest, and most present danger. There be other, not so great; which neverthelesse are not unfit to be observed. As first, the difficulty of raising Mony, for the necessary uses of the Common-wealth; especially in the approach of warre. This difficulty ariseth from the opinion, that every Subject hath of a Propriety in his lands and goods, exclusive of the Sovereigns Right to the use of the same. From whence it commeth to passe, that the Sovereign Power, which foreseeeth the necessities and dangers of the Common-wealth, (finding the passage of mony to the publique Treasure obstructed, by the tenacity of the people,) whereas it ought to extend it selfe, to encounter, and prevent such dangers in their beginnings, contracteth it selfe as long as it can, and when it cannot longer, struggles with the people by strategems of Law, to obtain little summes, which not sufficing, he is fain at last violently to open the way for present supply, or Perish; and being put often to these extremities, at last reduceth the people to their due temper; or else the

Common-wealth must perish. Insomuch as we may compare this Distemper very aptly to an Ague; wherein, the fleshy parts being congealed, or by venomous matter obstructed; the Veins which by their naturall course empty themselves into the Heart, are not (as they ought to be) supplied from the Arteries, whereby there succeedeth at first a cold contraction, and trembling of the limbes; and afterwards a hot, and strong endeavour of the Heart, to force a passage for the Bloud; and before it can do that, contenteth it selfe with the small refreshments of such things as coole of a time, till (if Nature be strong enough) it break at last the contumacy of the parts obstructed, and dissipateth the venome into sweat; or (if Nature be too weak) the Patient dyeth.

Monopolies And Abuses Of Publicans

Again, there is sometimes in a Common-wealth, a Disease, which resembleth the Pleurisie; and that is, when the Treasure of the Common-wealth, flowing out of its due course, is gathered together in too much abundance, in one, or a few private men, by Monopolies, or by Farmes of the Publique Revenues; in the same manner as the Blood in a Pleurisie, getting into the Membrane of the breast, breedeth there an Inflammation, accompanied with a Fever, and painfull stitches.

Popular Men

Also, the Popularity of a potent Subject, (unlesse the Common-wealth have very good caution of his fidelity,) is a dangerous Disease; because the people (which should receive their motion from the Authority of the Sovereign,) by the flattery, and by the reputation of an ambitious man, are drawn away from their obedience to the Lawes, to follow a man, of whose vertues, and designes they have no knowledge. And this is commonly of more danger in a Popular Government, than

in a Monarchy; as it may easily be made believe, they are the People. By this means it was, that Julius Caesar, who was set up by the People against the Senate, having won to himselfe the affections of his Army, made himselfe Master, both of Senate and People. And this proceeding of popular, and ambitious men, is plain Rebellion; and may be resembled to the effects of Witchcraft.

Excessive Greatnesse Of A Town, Multitude Of Corporations

Another infirmity of a Common-wealth, is the immoderate greatnesse of a Town, when it is able to furnish out of its own Circuit, the number, and expence of a great Army: As also the great number of Corporations; which are as it were many lesser Common-wealths in the bowels of a greater, like wormes in the entrayles of a naturall man.

Liberty Of Disputing Against Sovereign Power

To which may be added, the Liberty of Disputing against absolute Power, by pretenders to Politicall Prudence; which though bred for the most part in the Lees of the people; yet animated by False Doctrines, are perpetually meddling with the Fundamentall Lawes, to the molestation of the Common-wealth; like the little Wormes, which Physicians call Ascarides.

We may further adde, the insatiable appetite, or Bulimia, of enlarging Dominion; with the incurable Wounds thereby many times received from the enemy; And the Wens, of ununited conquests, which are many times a burthen, and with lesse danger lost, than kept; As also the Lethargy of Ease, and Consumption of Riot and Vain Expence.

Dissolution Of The Common-wealth

Lastly, when in a warre (forraign, or intestine,) the enemies got a final Victory; so as (the forces of the Common-wealth keeping the field no longer) there is no farther protection of Subjects in their loyalty; then is the Common-wealth DISSOLVED, and every man at liberty to protect himselfe by such courses as his own discretion shall suggest unto him. For the Sovereign, is the publique Soule, giving Life and Motion to the Common-wealth; which expiring, the Members are governed by it no more, than the Carcasse of a man, by his departed (though Immortal) Soule. For though the Right of a Sovereign Monarch cannot be extinguished by the act of another; yet the Obligation of the members may. For he that wants protection, may seek it anywhere; and when he hath it, is obliged (without fraudulent pretence of having submitted himselfe out of fear,) to protect his Protection as long as he is able. But when the Power of an Assembly is once suppressed, the Right of the same perisheth utterly; because the Assembly it selfe is extinct; and consequently, there is no possibility for the Sovereignty to re-enter.

CHAPTER XXX. OF THE OFFICE OF THE SOVERAIGN REPRESENTATIVE

The Procuration Of The Good Of The People

The OFFICE of the Sovereign, (be it a Monarch, or an Assembly,) consisteth in the end, for which he was trusted with the Sovereign Power, namely the procuration of the Safety Of The People; to which he is obliged by the Law of Nature, and to render an account thereof to God, the Author of that Law, and to none but him. But by Safety here, is not meant a bare Preservation, but also all other Contentments of life, which every man by lawfull Industry, without danger, or hurt to the Common-wealth, shall acquire to himselfe.

By Instruction & Lawes

And this is intended should be done, not by care applied to Individualls, further than their protection from injuries, when they shall complain; but by a generall Providence, contained in publique Instruction, both of Doctrine, and Example; and in the making, and executing of good Lawes, to which individuall persons may apply their own cases.

Against The Duty Of A Sovereign To Relinquish Any Essentiall Right
of Sovereignty Or Not To See The People Taught The Grounds Of Them

And because, if the essentiall Rights of Sovereignty (specified before in the eighteenth Chapter) be taken away, the Common-wealth is thereby dissolved, and every man returneth into the condition, and calamity of a warre with every other man, (which is the greatest evill that can happen in this life;) it is the Office of the Sovereign, to maintain those Rights entire; and consequently against his duty, First, to transferre to another, or to lay from himselfe any of them. For he that deserteth the Means, deserteth the Ends; and he deserteth the Means, that being the Sovereign, acknowledgeth himselfe subject to the Civill Lawes; and renounceth the Power of Supreme Judicature; or of making Warre, or Peace by his own Authority; or of Judging of the Necessities of the Common-wealth; or of levying Mony, and Souldiers, when, and as much as in his own conscience he shall judge necessary; or of making Officers, and Ministers both of Warre, and Peace; or of appointing Teachers, and examining what Doctrines are conformable, or contrary to the Defence, Peace, and Good of the people. Secondly, it is against his duty, to let the people be ignorant, or mis-in-formed of the grounds, and reasons of those his essentiall Rights; because thereby men are easie to be seduced, and drawn to resist him, when the Common-wealth shall require their use and exercise.

And the grounds of these Rights, have the rather need to be diligently, and truly taught; because they cannot be maintained by any Civill Law, or terrour of legal punishment. For a Civill Law, that shall forbid Rebellion, (and such is all resistance to the essentiall Rights of Sovereignty,) is not (as a Civill Law) any obligation, but by vertue onely of the Law of Nature, that forbiddeth the violation of Faith; which naturall obligation if men know not, they cannot know the Right of any Law the Sovereign maketh. And for the Punishment, they take it but for an act of Hostility; which when they think they have strength enough, they will endeavour by acts of Hostility, to avoyd.

Objection Of Those That Say There Are No Principles Of Reason For

Absolute Sovereignty

As I have heard some say, that Justice is but a word, without substance; and that whatsoever a man can by force, or art, acquire to himselfe, (not onely in the condition of warre, but also in a Common-wealth,) is his own, which I have already shewed to be false: So there be also that maintain, that there are no grounds, nor Principles of Reason, to sustain those essentiall Rights, which make Sovereignty absolute. For if there were, they would have been found out in some place, or other; whereas we see, there has not hitherto been any Common-wealth, where those Rights have been acknowledged, or challenged. Wherein they argue as ill, as if the Savage people of America, should deny there were any grounds, or Principles of Reason, so to build a house, as to last as long as the materials, because they never yet saw any so well built. Time, and Industry, produce every day new knowledge. And as the art of well building, is derived from Principles of Reason, observed by industrious men, that had long studied the nature of materials, and the divers effects of figure, and proportion, long after mankind began (though poorly) to build: So, long time after men have begun to constitute Common-wealths, imperfect, and apt to relapse into disorder, there may, Principles of Reason be found out, by industrious meditation, to make use of them, or be neglected by them, or not, concerneth my particular interest, at this day, very little. But supposing that these of mine are not such Principles of Reason; yet I am sure they are Principles from Authority of Scripture; as I shall make it appear, when I shall come to speak of the Kingdome of God, (administred by Moses,) over the Jewes, his peculiar people by Covenant.

Objection From The Incapacity Of The Vulgar

But they say again, that though the Principles be right, yet Common people are not of capacity enough to be made to understand them. I should be glad, that the Rich, and Potent Subjects of a Kingdome, or those that are accounted the most Learned, were no lesse incapable than they. But all men know, that the obstructions to this kind of doctrine, proceed not so much from the difficulty of the matter, as from the interest of them that are to learn. Potent men, digest hardly any thing that setteth up a Power to bridle their affections; and Learned men, any thing that discovereth their errours, and thereby lesseneth their Authority: whereas the Common-peoples minds, unlesse they be tainted with dependance on the Potent, or scribbled over with the opinions of their Doctors, are like clean paper, fit to receive whatsoever by Publique Authority shall be imprinted in them. Shall whole Nations be brought to Acquiesce in the great Mysteries of Christian Religion, which are above Reason; and millions of men be made believe, that the same Body may be in innumerable places, at one and the same time, which is against Reason; and shall not men be able, by their teaching, and preaching, protected by the Law, to make that received, which is so consonant to Reason, that any unprejudicated man, needs no more to learn it, than to hear it? I conclude therefore, that in the instruction of the people in the Essentiall Rights (which are the Naturall, and Fundamentall Lawes) of Sovereignty, there is no difficulty, (whilst a Sovereign has his Power entire,) but what proceeds from his own fault, or the fault of those whom he trusteth in the administration of the Commonwealth; and consequently, it is his Duty, to cause them so to be instructed; and not onely his Duty, but his Benefit also, and Security, against the danger that may arrive to himselfe in his naturall Person, from Rebellion.

Subjects Are To Be Taught, Not To Affect Change Of Government

And (to descend to particulars) the People are to be taught, First, that they ought not to be in love with any forme of Government they see in their neighbour

Nations, more than with their own, nor (whatsoever present prosperity they behold in Nations that are otherwise governed than they,) to desire change. For the prosperity of a People ruled by an Aristocraticall, or Democraticall assembly, commeth not from Aristocracy, nor from Democracy, but from the Obedience, and Concord of the Subjects; nor do the people flourish in a Monarchy, because one man has the right to rule them, but because they obey him. Take away in any kind of State, the Obedience, (and consequently the Concord of the People,) and they shall not onely not flourish, but in short time be dissolved. And they that go about by disobedience, to doe no more than reforme the Common-wealth, shall find they do thereby destroy it; like the foolish daughters of Peleus (in the fable;) which desiring to renew the youth of their decrepit Father, did by the Counsell of Medea, cut him in pieces, and boyle him, together with strange herbs, but made not of him a new man. This desire of change, is like the breach of the first of Gods Commandements: For there God says, Non Habebis Deos Alienos; Thou shalt not have the Gods of other Nations; and in another place concerning Kings, that they are Gods.

Nor Adhere (Against The Sovereign) To Popular Men

Secondly, they are to be taught, that they ought not to be led with admiration of the vertue of any of their fellow Subjects, how high soever he stand, nor how conspicuously soever he shine in the Common-wealth; nor of any Assembly, (except the Sovereign Assembly,) so as to deferre to them any obedience, or honour, appropriate to the Sovereign onely, whom (in their particular stations) they represent; nor to receive any influence from them, but such as is conveyed by them from the Sovereign Authority. For that Sovereign, cannot be imagined to love his People as he ought, that is not Jealous of them, but suffers them by the flattery of Popular men, to be seduced from their loyalty, as they have often been, not onely secretly, but openly, so as to proclaime Marriage with them In Facie

Ecclesiae by Preachers; and by publishing the same in the open streets: which may fitly be compared to the violation of the second of the ten Commandements.

Nor To Dispute The Sovereign Power

Thirdly, in consequence to this, they ought to be informed, how great fault it is, to speak evill of the Sovereign Representative, (whether One man, or an Assembly of men;) or to argue and dispute his Power, or any way to use his Name irreverently, whereby he may be brought into Contempt with his People, and their Obedience (in which the safety of the Common-wealth consisteth) slackened. Which doctrine the third Commandement by resemblance pointeth to.

And To Have Dayes Set Apart To Learn Their Duty

Fourthly, seeing people cannot be taught this, nor when 'tis taught, remember it, nor after one generation past, so much as know in whom the Sovereign Power is placed, without setting a part from their ordinary labour, some certain times, in which they may attend those that are appointed to instruct them; It is necessary that some such times be determined, wherein they may assemble together, and (after prayers and praises given to God, the Sovereign of Sovereigns) hear those their Duties told them, and the Positive Lawes, such as generally concern them all, read and expounded, and be put in mind of the Authority that maketh them Lawes. To this end had the Jewes every seventh day, a Sabbath, in which the Law was read and expounded; and in the solemnity whereof they were put in mind, that their King was God; that having created the world in six days, he rested the seventh day; and by their resting on it from their labour, that that God was their King, which redeemed them from their servile, and painfull labour in Egypt, and gave them a time, after they had rejoyced in God, to take joy also in themselves, by lawfull recreation. So that the first Table of the Commandements, is spent all, in setting down the summe of Gods absolute Power; not onely as God, but as King by pact, (in peculiar) of the Jewes; and may therefore give light, to those

that have the Sovereign Power conferred on them by the consent of men, to see what doctrine they Ought to teach their Subjects.

And To Honour Their Parents

And because the first instruction of Children, dependeth on the care of their Parents; it is necessary that they should be obedient to them, whilst they are under their tuition; and not onely so, but that also afterwards (as gratitude requireth,) they acknowledge the benefit of their education, by externall signes of honour. To which end they are to be taught, that originally the Father of every man was also his Sovereign Lord, with power over him of life and death; and that the Fathers of families, when by instituting a Common-wealth, they resigned that absolute Power, yet it was never intended, they should lose the honour due unto them for their education. For to relinquish such right, was not necessary to the Institution of Sovereign Power; nor would there be any reason, why any man should desire to have children, or take the care to nourish, and instruct them, if they were afterwards to have no other benefit from them, than from other men. And this accordeth with the fifth Commandement.

And To Avoyd Doing Of Injury:

Again, every Sovereign Ought to cause Justice to be taught, which (consisting in taking from no man what is his) is as much as to say, to cause men to be taught not to deprive their Neighbour, by violence, or fraud, of any thing which by the Sovereign Authority is theirs. Of things held in propriety, those that are dearest to a man are his own life, & limbs; and in the next degree, (in most men,) those that concern conjugall affection; and after them riches and means of living. Therefore the People are to be taught, to abstain from violence to one anothers person, by

private revenges; from violation of conjugall honour; and from forcibly rapine, and fraudulent surreption of one anothers goods. For which purpose also it is necessary they be shewed the evill consequences of false Judgement, by corruption either of Judges or Witnesses, whereby the distinction of propriety is taken away, and Justice becomes of no effect: all which things are intimated in the sixth, seventh, eighth, and ninth Commandements.

And To Do All This Sincerely From The Heart

Lastly, they are to be taught, that not onely the unjust facts, but the designes and intentions to do them, (though by accident hindred,) are Injustice; which consisteth in the pravity of the will, as well as in the irregularity of the act. And this is the intention of the tenth Commandement, and the summe of the Second Table; which is reduced all to this one Commandement of mutuall Charity, “Thou shalt love thy neighbour as thy selfe.” as the summe of the first Table is reduced to “the love of God;” whom they had then newly received as their King.

The Use Of Universities

As for the Means, and Conduits, by which the people may receive this Instruction, wee are to search, by what means so may Opinions, contrary to the peace of Mankind, upon weak and false Principles, have neverthesse been so deeply rooted in them. I mean those, which I have in the precedent Chapter specified: as That men shall Judge of what is lawfull and unlawfull, not by the Law it selfe, but by their own private Judgements; That Subjects sinne in obeying the Commands of the Common-wealth, unlesse they themselves have first judged them to be lawfull: That their Propriety in their riches is such, as to exclude the Dominion, which the Common-wealth hath over the same: That it is lawfull for Subjects to kill such, as

they call Tyrants: That the Sovereign Power may be divided, and the like; which come to be instilled into the People by this means. They whom necessity, or covetousnesse keepeth attent on their trades, and labour; and they, on the other side, whom superfluity, or sloth carrieth after their sensuall pleasures, (which two sorts of men take up the greatest part of Man-kind,) being diverted from the deep meditation, which the learning of truth, not onely in the matter of Naturall Justice, but also of all other Sciences necessarily requireth, receive the Notions of their duty, chiefly from Divines in the Pulpit, and partly from such of their Neighbours, or familiar acquaintance, as having the Faculty of discoursing readily, and plausibly, seem wiser and better learned in cases of Law, and Conscience, than themselves. And the Divines, and such others as make shew of Learning, derive their knowledge from the Universities, and from the Schooles of Law, or from the Books, which by men eminent in those Schooles, and Universities have been published. It is therefore manifest, that the Instruction of the people, dependeth wholly, on the right teaching of Youth in the Universities. But are not (may some men say) the Universities of England learned enough already to do that? or is it you will undertake to teach the Universities? Hard questions. Yet to the first, I doubt not to answer; that till towards the later end of Henry the Eighth, the Power of the Pope, was alwayes upheld against the Power of the Common-wealth, principally by the Universities; and that the doctrines maintained by so many Preachers, against the Sovereign Power of the King, and by so many Lawyers, and others, that had their education there, is a sufficient argument, that though the Universities were not authors of those false doctrines, yet they knew not how to plant the true. For in such a contradiction of Opinions, it is most certain, that they have not been sufficiently instructed; and 'tis no wonder, if they yet retain a relish of that subtile liquor, wherewith they were first seasoned, against the Civill Authority. But to the later question, it is not fit, nor needfull for me to say either I, or No: for any man that sees what I am doing, may easily perceive what I think.

The safety of the People, requireth further, from him, or them that have the Sovereign Power, that Justice be equally administred to all degrees of People; that

is, that as well the rich, and mighty, as poor and obscure persons, may be righted of the injuries done them; so as the great, may have no greater hope of impunity, when they doe violence, dishonour, or any Injury to the meaner sort, than when one of these, does the like to one of them: For in this consisteth Equity; to which, as being a Precept of the Law of Nature, a Sovereign is as much subject, as any of the meanest of his People. All breaches of the Law, are offences against the Common-wealth: but there be some, that are also against private Persons. Those that concern the Common-wealth onely, may without breach of Equity be pardoned; for every man may pardon what is done against himselfe, according to his own discretion. But an offence against a private man, cannot in Equity be pardoned, without the consent of him that is injured; or reasonable satisfaction.

The Inequality of Subjects, proceedeth from the Acts of Sovereign Power; and therefore has no more place in the presence of the Sovereign; that is to say, in a Court of Justice, then the Inequality between Kings, and their Subjects, in the presence of the King of Kings. The honour of great Persons, is to be valued for their beneficence, and the aydes they give to men of inferiour rank, or not at all. And the violences, oppressions, and injuries they do, are not extenuated, but aggravated by the greatnesse of their persons; because they have least need to commit them. The consequences of this partiality towards the great, proceed in this manner. Impunity maketh Insolence; Insolence Hatred; and Hatred, an Endeavour to pull down all oppressing and contumelious greatnesse, though with the ruine of the Common-wealth.

Equall Taxes

To Equall Justice, appertaineth also the Equall imposition of Taxes; the equality whereof dependeth not on the Equality of riches, but on the Equality of the debt, that every man oweth to the Common-wealth for his defence. It is not enough, for a man to labour for the maintenance of his life; but also to fight, (if need be,) for

the securing of his labour. They must either do as the Jewes did after their return from captivity, in re-edifying the Temple, build with one hand, and hold the Sword in the other; or else they must hire others to fight for them. For the Impositions that are layd on the People by the Sovereign Power, are nothing else but the Wages, due to them that hold the publique Sword, to defend private men in the exercise of severall Trades, and Callings. Seeing then the benefit that every one receiveth thereby, is the enjoyment of life, which is equally dear to poor, and rich; the debt which a poor man oweth them that defend his life, is the same which a rich man oweth for the defence of his; saving that the rich, who have the service of the poor, may be debtors not onely for their own persons, but for many more. Which considered, the Equality of Imposition, consisteth rather in the Equality of that which is consumed, than of the riches of the persons that consume the same. For what reason is there, that he which laboureth much, and sparing the fruits of his labour, consumeth little, should be more charged, then he that living idly, getteth little, and spendeth all he gets; seeing the one hath no more protection from the Common-wealth, then the other? But when the Impositions, are layd upon those things which men consume, every man payeth Equally for what he useth: Nor is the Common-wealth defrauded, by the luxurious waste of private men.

Publique Charity

And whereas many men, by accident unavoidable, become unable to maintain themselves by their labour; they ought not to be left to the Charity of private persons; but to be provided for, (as far-forth as the necessities of Nature require,) by the Lawes of the Common-wealth. For as it is Uncharitableness in any man, to neglect the impotent; so it is in the Sovereign of a Common-wealth, to expose them to the hazard of such uncertain Charity.

Prevention Of Idlenesse

But for such as have strong bodies, the case is otherwise: they are to be forced to work; and to avoyd the excuse of not finding employment, there ought to be such Lawes, as may encourage all manner of Arts; as Navigation, Agriculture, Fishing, and all manner of Manufacture that requires labour. The multitude of poor, and yet strong people still encreasing, they are to be transplanted into Countries not sufficiently inhabited: where neverthelesse, they are not to exterminate those they find there; but constrain them to inhabit closer together, and not range a great deal of ground, to snatch what they find; but to court each little Plot with art and labour, to give them their sustenance in due season. And when all the world is overchargd with Inhabitants, then the last remedy of all is Warre; which provideth for every man, by Victory, or Death.

Good Lawes What

To the care of the Sovereign, belongeth the making of Good Lawes. But what is a good Law? By a Good Law, I mean not a Just Law: for no Law can be Unjust. The Law is made by the Sovereign Power, and all that is done by such Power, is warranted, and owned by every one of the people; and that which every man will have so, no man can say is unjust. It is in the Lawes of a Common-wealth, as in the Lawes of Gaming: whatsoever the Gamesters all agree on, is Injustice to none of them. A good Law is that, which is Needfull, for the Good Of The People, and withall Perspicuous.

Such As Are Necessary

For the use of Lawes, (which are but Rules Authorised) is not to bind the People from all Voluntary actions; but to direct and keep them in such a motion, as not to hurt themselves by their own impetuous desires, rashnesse, or indiscretion, as Hedges are set, not to stop Travellers, but to keep them in the way. And therefore a Law that is not Needfull, having not the true End of a Law, is not Good. A Law may be conceived to be Good, when it is for the benefit of the Sovereign; though it be not Necessary for the People; but it is not so. For the good of the Sovereign and People, cannot be separated. It is a weak Sovereign, that has weak Subjects; and a weak People, whose Sovereign wanteth Power to rule them at his will. Unnecessary Lawes are not good Lawes; but trapps for Mony: which where the right of Sovereign Power is acknowledged, are superfluous; and where it is not acknowledged, unsufficient to defend the People.

Such As Are Perspicuous

The Perspicuity, consisteth not so much in the words of the Law it selfe, as in a Declaration of the Causes, and Motives, for which it was made. That is it, that shewes us the meaning of the Legislator, and the meaning of the Legislator known, the Law is more easily understood by few, than many words. For all words, are subject to ambiguity; and therefore multiplication of words in the body of the Law, is multiplication of ambiguity: Besides it seems to imply, (by too much diligence,) that whosoever can evade the words, is without the compasse of the Law. And this is a cause of many unnecessary Processes. For when I consider how short were the Lawes of antient times; and how they grew by degrees still longer; me thinks I see a contention between the Penners, and Pleaders of the Law; the former seeking to circumscribe the later; and the later to evade their circumscriptions; and that the Pleaders have got the Victory. It belongeth therefore to the Office of a Legislator, (such as is in all Common-wealths the Supreme Representative, be it one Man, or an Assembly,) to make the reason

Perspicuous, why the Law was made; and the Body of the Law it selfe, as short, but in as proper, and significant termes, as may be.

Punishments

It belongeth also to the Office of the Sovereign, to make a right application of Punishments, and Rewards. And seeing the end of punishing is not revenge, and discharge of choler; but correction, either of the offender, or of others by his example; the severest Punishments are to be inflicted for those Crimes, that are of most Danger to the Publique; such as are those which proceed from malice to the Government established; those that spring from contempt of Justice; those that provoke Indignation in the Multitude; and those, which unpunished, seem Authorised, as when they are committed by Sonnes, Servants, or Favorites of men in Authority: For Indignation carrieth men, not onely against the Actors, and Authors of Injustice; but against all Power that is likely to protect them; as in the case of Tarquin; when for the Insolent act of one of his Sonnes, he was driven out of Rome, and the Monarchy it selfe dissolved. But Crimes of Infirmitie; such as are those which proceed from great provocation, from great fear, great need, or from ignorance whether the Fact be a great Crime, or not, there is place many times for Lenity, without prejudice to the Common-wealth; and Lenity when there is such place for it, is required by the Law of Nature. The Punishment of the Leaders, and teachers in a Commotion; not the poore seduced People, when they are punished, can profit the Common-wealth by their example. To be severe to the People, is to punish that ignorance, which may in great part be imputed to the Sovereign, whose fault it was, they were no better instructed.

Rewards

In like manner it belongeth to the Office, and Duty of the Sovereign, to apply his Rewards alwayes so, as there may arise from them benefit to the Commonwealth: wherein consisteth their Use, and End; and is then done, when they that have well served the Common-wealth, are with as little expence of the Common Treasure, as is possible, so well recompenced, as others thereby may be encouraged, both to serve the same as faithfully as they can, and to study the arts by which they may be enabled to do it better. To buy with Mony, or Preferment, from a Popular ambitious Subject, to be quiet, and desist from making ill impressions in the mindes of the People, has nothing of the nature of Reward; (which is ordained not for disservice, but for service past;) nor a signe of Gratitude, but of Fear: nor does it tend to the Benefit, but to the Dammage of the Publique. It is a contention with Ambition, like that of Hercules with the Monster Hydra, which having many heads, for every one that was vanquished, there grew up three. For in like manner, when the stubbornnesse of one Popular man, is overcome with Reward, there arise many more (by the Example) that do the same Mischiefe, in hope of like Benefit: and as all sorts of Manufacture, so also Malice encrease by being vendible. And though sometimes a Civill warre, may be differred, by such wayes as that, yet the danger growes still the greater, and the Publique ruine more assured. It is therefore against the Duty of the Sovereign, to whom the Publique Safety is committed, to Reward those that aspire to greatnesse by disturbing the Peace of their Country, and not rather to oppose the beginnings of such men, with a little danger, than after a longer time with greater.

Counsellours

Another Businesse of the Sovereign, is to choose good Counsellours; I mean such, whose advice he is to take in the Government of the Common-wealth. For this word Counsell, Consilium, corrupted from Considium, is a large signification, and comprehendeth all Assemblies of men that sit together, not

onely to deliberate what is to be done hereafter, but also to judge of Facts past, and of Law for the present. I take it here in the first sense onely: And in this sense, there is no choyce of Counsell, neither in a Democracy, nor Aristocracy; because the persons Counselling are members of the person Counsell'd. The choyce of Counsellours therefore is to Monarchy; In which, the Sovereign that endeavoureth not to make choyce of those, that in every kind are the most able, dischargeth not his Office as he ought to do. The most able Counsellours, are they that have least hope of benefit by giving evill Counsell, and most knowledge of those things that conduce to the Peace, and Defence of the Common-wealth. It is a hard matter to know who expecteth benefit from publique troubles; but the signes that guide to a just suspicion, is the soothing of the people in their unreasonable, or irremediable grievances, by men whose estates are not sufficient to discharge their accustomed expences, and may easily be observed by any one whom it concerns to know it. But to know, who has most knowledge of the Publique affaires, is yet harder; and they that know them, need them a great deale the lesse. For to know, who knowes the Rules almost of any Art, is a great degree of the knowledge of the same Art; because no man can be assured of the truth of anothers Rules, but he that is first taught to understand them. But the best signes of Knowledge of any Art, are, much conversing in it, and constant good effects of it. Good Counsell comes not by Lot, nor by Inheritance; and therefore there is no more reason to expect good Advice from the rich, or noble, in matter of State, than in delineating the dimensions of a fortresse; unlesse we shall think there needs no method in the study of the Politiques, (as there does in the study of Geometry,) but onely to be lookers on; which is not so. For the Politiques is the harder study of the two. Whereas in these parts of Europe, it hath been taken for a Right of certain persons, to have place in the highest Councell of State by Inheritance; it is derived from the Conquests of the antient Germans; wherein many absolute Lords joyning together to conquer other Nations, would not enter in to the Confederacy, without such Priviledges, as might be marks of difference in time following, between their Posterity, and the posterity of their Subjects;

which Priviledges being inconsistent with the Sovereign Power, by the favour of the Sovereign, they may seem to keep; but contending for them as their Right, they must needs by degrees let them go, and have at last no further honour, than adhaereth naturally to their abilities.

And how able soever be the Counsellours in any affaire, the benefit of their Counsell is greater, when they give every one his Advice, and reasons of it apart, than when they do it in an Assembly, by way of Orations; and when they have praemeditated, than when they speak on the sudden; both because they have more time, to survey the consequences of action; and are lesse subject to be carried away to contradiction, through Envy, Emulation, or other Passions arising from the difference of opinion.

The best Counsell, in those things that concern not other Nations, but onely the ease, and benefit the Subjects may enjoy, by Lawes that look onely inward, is to be taken from the generall informations, and complaints of the people of each Province, who are best acquainted with their own wants, and ought therefore, when they demand nothing in derogation of the essentiall Rights of Sovereignty, to be diligently taken notice of. For without those Essentiall Rights, (as I have often before said,) the Common-wealth cannot at all subsist.

Commanders

A Commander of an Army in chiefe, if he be not Popular, shall not be beloved, nor feared as he ought to be by his Army; and consequently cannot performe that office with good successe. He must therefore be Industrious, Valiant, Affable, Liberall and Fortunate, that he may gain an opinion both of sufficiency, and of loving his Souldiers. This is Popularity, and breeds in the Souldiers both desire, and courage, to recommend themselves to his favour; and protects the severity of the Generall, in punishing (when need is) the Mutinous, or negligent Souldiers. But this love of Souldiers, (if caution be not given of the Commanders fidelity,) is

a dangerous thing to Sovereign Power; especially when it is in the hands of an Assembly not popular. It belongeth therefore to the safety of the People, both that they be good Conductors, and faithfull subjects, to whom the Sovereign Commits his Armies.

But when the Sovereign himselfe is Popular, that is, revered and beloved of his People, there is no danger at all from the Popularity of a Subject. For Souldiers are never so generally unjust, as to side with their Captain; though they love him, against their Sovereign, when they love not onely his Person, but also his Cause. And therefore those, who by violence have at any time suppressed the Power of their Lawfull Sovereign, before they could settle themselves in his place, have been alwayes put to the trouble of contriving their Titles, to save the People from the shame of receiving them. To have a known Right to Sovereign Power, is so popular a quality, as he that has it needs no more, for his own part, to turn the hearts of his Subjects to him, but that they see him able absolutely to govern his own Family: Nor, on the part of his enemies, but a disbanding of their Armies. For the greatest and most active part of Mankind, has never hetherto been well contented with the present.

Concerning the Offices of one Sovereign to another, which are comprehended in that Law, which is commonly called the Law of Nations, I need not say any thing in this place; because the Law of Nations, and the Law of Nature, is the same thing. And every Sovereign hath the same Right, in procuring the safety of his People, that any particular man can have, in procuring the safety of his own Body. And the same Law, that dictateth to men that have no Civil Government, what they ought to do, and what to avoyd in regard of one another, dictateth the same to Common-wealths, that is, to the Consciences of Sovereign Princes, and Sovereign Assemblies; there being no Court of Naturall Justice, but in the Conscience onely; where not Man, but God raigneth; whose Lawes, (such of them as oblige all Mankind,) in respect of God, as he is the Author of Nature, are Naturall; and in respect of the same God, as he is King of Kings, are Lawes. But

of the Kingdome of God, as King of Kings, and as King also of a peculiar People,
I shall speak in the rest of this discourse.

CHAPTER XXXI. OF THE KINGDOME OF GOD BY NATURE

The Scope Of The Following Chapters

That the condition of meer Nature, that is to say, of absolute Liberty, such as is theirs, that neither are Sovereigns, nor Subjects, is Anarchy, and the condition of Warre: That the Praecepts, by which men are guided to avoyd that condition, are the Lawes of Nature: That a Common-wealth, without Sovereign Power, is but a word, without substance, and cannot stand: That Subjects owe to Sovereigns, simple Obedience, in all things, wherein their obedience is not repugnant to the Lawes of God, I have sufficiently proved, in that which I have already written. There wants onely, for the entire knowledge of Civill duty, to know what are those Lawes of God. For without that, a man knows not, when he is commanded any thing by the Civill Power, whether it be contrary to the Law of God, or not: and so, either by too much civill obedience, offends the Divine Majesty, or through feare of offending God, transgresses the commandements of the Common-wealth. To avoyd both these Rocks, it is necessary to know what are the Lawes Divine. And seeing the knowledge of all Law, dependeth on the knowledge of the Sovereign Power; I shall say something in that which followeth, of the KINGDOME OF GOD.

Who Are Subjects In The Kingdome Of God

“God is King, let the Earth rejoyce,” saith the Psalmist. (Psal. 96. 1). And again, “God is King though the Nations be angry; and he that sitteth on the Cherubins, though the earth be moved.” (Psal. 98. 1). Whether men will or not, they must be

subject alwayes to the Divine Power. By denying the Existence, or Providence of God, men may shake off their Ease, but not their Yoke. But to call this Power of God, which extendeth it selfe not onely to Man, but also to Beasts, and Plants, and Bodies inanimate, by the name of Kingdome, is but a metaphoricall use of the word. For he onely is properly said to Raigne, that governs his Subjects, by his Word, and by promise of Rewards to those that obey it, and by threatning them with Punishment that obey it not. Subjects therefore in the Kingdome of God, are not Bodies Inanimate, nor creatures Irrationall; because they understand no Precepts as his: Nor Atheists; nor they that believe not that God has any care of the actions of mankind; because they acknowledge no Word for his, nor have hope of his rewards, or fear of his threatnings. They therefore that believe there is a God that governeth the world, and hath given Praecepts, and propounded Rewards, and Punishments to Mankind, are Gods Subjects; all the rest, are to be understood as Enemies.

A Threefold Word Of God, Reason, Revelation, Prophecy

To rule by Words, requires that such Words be manifestly made known; for else they are no Lawes: For to the nature of Lawes belongeth a sufficient, and clear Promulgation, such as may take away the excuse of Ignorance; which in the Lawes of men is but of one onely kind, and that is, Proclamation, or Promulgation by the voyce of man. But God declareth his Lawes three wayes; by the Dictates of Naturall Reason, By Revelation, and by the Voyce of some Man, to whom by the operation of Miracles, he procureth credit with the rest. From hence there ariseth a triple Word of God, Rational, Sensible, and Prophetique: to which Correspondeth a triple Hearing; Right Reason, Sense Supernaturall, and Faith. As for Sense Supernaturall, which consisteth in Revelation, or Inspiration, there have not been any Universall Lawes so given, because God speaketh not in that manner, but to particular persons, and to divers men divers things.

A Twofold Kingdome Of God, Naturall And Prophetique From the difference between the other two kinds of Gods Word, Rationall, and Prophetique, there may be attributed to God, a two-fold Kingdome, Naturall, and Prophetique: Naturall, wherein he governeth as many of Mankind as acknowledge his Providence, by the naturall Dictates of Right Reason; And Prophetique, wherein having chosen out one peculiar Nation (the Jewes) for his Subjects, he governed them, and none but them, not onely by naturall Reason, but by Positive Lawes, which he gave them by the mouths of his holy Prophets. Of the Naturall Kingdome of God I intend to speak in this Chapter.

The Right Of Gods Sovereignty Is Derived From His Omnipotence The Right of Nature, whereby God reigneth over men, and punisheth those that break his Lawes, is to be derived, not from his Creating them, as if he required obedience, as of Gratitude for his benefits; but from his Irresistible Power. I have formerly shewn, how the Sovereign Right ariseth from Pact: To shew how the same Right may arise from Nature, requires no more, but to shew in what case it is never taken away. Seeing all men by Nature had Right to All things, they had Right every one to reigne over all the rest. But because this Right could not be obtained by force, it concerned the safety of every one, laying by that Right, to set up men (with Sovereign Authority) by common consent, to rule and defend them: whereas if there had been any man of Power Irresistible; there had been no reason, why he should not by that Power have ruled, and defended both himselfe, and them, according to his own discretion. To those therefore whose Power is irresistible, the dominion of all men adhaereth naturally by their excellence of Power; and consequently it is from that Power, that the Kingdome over men, and the Right of afflicting men at his pleasure, belongeth Naturally to God Almighty; not as Creator, and Gracious; but as Omnipotent. And though Punishment be due for Sinne onely, because by that word is understood Affliction for Sinne; yet the Right of Afflicting, is not alwayes derived from mens Sinne, but from Gods Power.

Sinne Not The Cause Of All Affliction

This question, “Why Evill men often Prosper, and Good men suffer Adversity,” has been much disputed by the Antient, and is the same with this of ours, “By what Right God dispenseth the Prosperities and Adversities of this life;” and is of that difficulty, as it hath shaken the faith, not onely of the Vulgar, but of Philosophers, and which is more, of the Saints, concerning the Divine Providence. “How Good,” saith David, “is the God of Israel to those that are Upright in Heart; and yet my feet were almost gone, my treadings had well-nigh slipt; for I was grieved at the Wicked, when I saw the Ungodly in such Prosperity.” And Job, how earnestly does he expostulate with God, for the many Afflictions he suffered, notwithstanding his Righteousnesse? This question in the case of Job, is decided by God himselfe, not by arguments derived from Job’s Sinne, but his own Power. For whereas the friends of Job drew their arguments from his Affliction to his Sinne, and he defended himselfe by the conscience of his Innocence, God himselfe taketh up the matter, and having justified the Affliction by arguments drawn from his Power, such as this “Where was thou when I layd the foundations of the earth,” and the like, both approved Job’s Innocence, and reproved the Erroneous doctrine of his friends. Conformable to this doctrine is the sentence of our Saviour, concerning the man that was born Blind, in these words, “Neither hath this man sinned, nor his fathers; but that the works of God might be made manifest in him.” And though it be said “That Death entred into the world by sinne,” (by which is meant that if Adam had never sinned, he had never dyed, that is, never suffered any separation of his soule from his body,) it follows not thence, that God could not justly have Afflicted him, though he had not Sinned, as well as he afflicteth other living creatures, that cannot sinne.

Divine Lawes

Having spoken of the Right of Gods Sovereignty, as grounded onely on Nature; we are to consider next, what are the Divine Lawes, or Dictates of Naturall Reason; which Lawes concern either the naturall Duties of one man to another, or the Honour naturally due to our Divine Sovereign. The first are the same Lawes of Nature, of which I have spoken already in the 14. and 15. Chapters of this Treatise; namely, Equity, Justice, Mercy, Humility, and the rest of the Morall Vertues. It remaineth therefore that we consider, what Praecepts are dictated to men, by their Naturall Reason onely, without other word of God, touching the Honour and Worship of the Divine Majesty.

Honour And Worship What

Honour consisteth in the inward thought, and opinion of the Power, and Goodnesse of another: and therefore to Honour God, is to think as Highly of his Power and Goodnesse, as is possible. And of that opinion, the externall signes appearing in the Words, and Actions of men, are called Worship; which is one part of that which the Latines understand by the word Cultus: For Cultus signifieth properly, and constantly, that labour which a man bestowes on any thing, with a purpose to make benefit by it. Now those things whereof we make benefit, are either subject to us, and the profit they yeeld, followeth the labour we bestow upon them, as a naturall effect; or they are not subject to us, but answer our labour, according to their own Wills. In the first sense the labour bestowed on the Earth, is called Culture; and the education of Children a Culture of their mindes. In the second sense, where mens wills are to be wrought to our purpose, not by Force, but by Compleasance, it signifieth as much as Courting, that is, a winning of favour by good offices; as by praises, by acknowledging their Power, and by whatsoever is pleasing to them from whom we look for any benefit. And

this is properly Worship: in which sense Publicola, is understood for a Worshipper of the People, and Cultus Dei, for the Worship of God.

Severall Signes Of Honour

From internall Honour, consisting in the opinion of Power and Goodnesse, arise three Passions; Love, which hath reference to Goodnesse; and Hope, and Fear, that relate to Power: And three parts of externall worship; Praise, Magnifying, and Blessing: The subject of Praise, being Goodnesse; the subject of Magnifying, and Blessing, being Power, and the effect thereof Felicity. Praise, and Magnifying are significant both by Words, and Actions: By Words, when we say a man is Good, or Great: By Actions, when we thank him for his Bounty, and obey his Power. The opinion of the Happinesse of another, can onely be expressed by words.

Worship Naturall And Arbitrary

There be some signes of Honour, (both in Attributes and Actions,) that be Naturally so; as amongst Attributes, Good, Just, Liberall, and the like; and amongst Actions, Prayers, Thanks, and Obedience. Others are so by Institution, or Custome of men; and in some times and places are Honourable; in others Dishonourable; in others Indifferent: such as are the Gestures in Salutation, Prayer, and Thanksgiving, in different times and places, differently used. The former is Naturall; the later Arbitrary Worship.

Worship Commanded And Free

And of Arbitrary Worship, there bee two differences: For sometimes it is a Commanded, sometimes Voluntary Worship: Commanded, when it is such as hee requireth, who is Worshipped: Free, when it is such as the Worshipper thinks fit. When it is Commanded, not the words, or gestures, but the obedience is the Worship. But when Free, the Worship consists in the opinion of the beholders: for if to them the words, or actions by which we intend honour, seem ridiculous, and tending to contumely; they are not Worship; because a signe is not a signe to him that giveth it, but to him to whom it is made; that is, to the spectator.

Worship Publique And Private

Again, there is a Publique, and a Private Worship. Publique, is the Worship that a Common-wealth performeth, as one Person. Private, is that which a Private person exhibiteth. Publique, in respect of the whole Common-wealth, is Free; but in respect of Particular men it is not so. Private, is in secret Free; but in the sight of the multitude, it is never without some Restraint, either from the Lawes, or from the Opinion of men; which is contrary to the nature of Liberty.

The End Of Worship

The End of Worship amongst men, is Power. For where a man seeth another worshipped he supposeth him powerfull, and is the readier to obey him; which makes his Power greater. But God has no Ends: the worship we do him, proceeds from our duty, and is directed according to our capacity, by those rules of Honour, that Reason dictateth to be done by the weak to the more potent men, in hope of benefit, for fear of dammage, or in thankfulness for good already received from them.

Attributes Of Divine Honour

That we may know what worship of God is taught us by the light of Nature, I will begin with his Attributes. Where, First, it is manifest, we ought to attribute to him Existence: For no man can have the will to honour that, which he thinks not to have any Being.

Secondly, that those Philosophers, who sayd the World, or the Soule of the World was God, spake unworthily of him; and denyed his Existence: For by God, is understood the cause of the World; and to say the World is God, is to say there is no cause of it, that is, no God.

Thirdly, to say the World was not Created, but Eternall, (seeing that which is Eternall has no cause,) is to deny there is a God.

Fourthly, that they who attributing (as they think) Ease to God, take from him the care of Mankind; take from him his Honour: for it takes away mens love, and fear of him; which is the root of Honour.

Fifthly, in those things that signifie Greatnesse, and Power; to say he is Finite, is not to Honour him: For it is not a signe of the Will to Honour God, to attribute to him lesse than we can; and Finite, is lesse than we can; because to Finite, it is easie to adde more.

Therefore to attribute Figure to him, is not Honour; for all Figure is Finite:

Nor to say we conceive, and imagine, or have an Idea of him, in our mind: for whatsoever we conceive is Finite:

Not to attribute to him Parts, or Totality; which are the Attributes onely of things Finite:

Nor to say he is this, or that Place: for whatsoever is in Place, is bounded, and Finite:

Nor that he is Moved, or Resteth: for both these Attributes ascribe to him Place:

Nor that there be more Gods than one; because it implies them all Finite: for there cannot be more than one Infinite: Nor to ascribe to him (unlesse Metaphorically, meaning not the Passion, but the Effect) Passions that partake of Griefe; as Repentance, Anger, Mercy: or of Want; as Appetite, Hope, Desire; or of any Passive faculty: For Passion, is Power limited by somewhat else.

And therefore when we ascribe to God a Will, it is not to be understood, as that of Man, for a Rationall Appetite; but as the Power, by which he effecteth every thing.

Likewise when we attribute to him Sight, and other acts of Sense; as also Knowledge, and Understanding; which in us is nothing else, but a tumult of the mind, raised by externall things that presse the organicall parts of mans body: For there is no such thing in God; and being things that depend on naturall causes, cannot be attributed to him.

Hee that will attribute to God, nothing but what is warranted by naturall Reason, must either use such Negative Attributes, as Infinite, Eternall, Incomprehensible; or Superlatives, as Most High, Most Great, and the like; or Indefinite, as Good, Just, Holy, Creator; and in such sense, as if he meant not to declare what he is, (for that were to circumscribe him within the limits of our Fancy,) but how much wee admire him, and how ready we would be to obey him; which is a signe of Humility, and of a Will to honour him as much as we can: For there is but one Name to signifie our Conception of his Nature, and that is, I AM: and but one Name of his Relation to us, and that is God; in which is contained Father, King, and Lord.

Actions That Are Signes Of Divine Honour

Concerning the actions of Divine Worship, it is a most generall Precept of Reason, that they be signes of the Intention to Honour God; such as are, First,

Prayers: For not the Carvers, when they made Images, were thought to make them Gods; but the People that Prayed to them.

Secondly, Thanksgiving; which differeth from Prayer in Divine Worship, no otherwise, than that Prayers precede, and Thanks succeed the benefit; the end both of the one, and the other, being to acknowledge God, for Author of all benefits, as well past, as future.

Thirdly, Gifts; that is to say, Sacrifices, and Oblations, (if they be of the best,) are signes of Honour: for they are Thanksgivings.

Fourthly, Not to swear by any but God, is naturally a signe of Honour: for it is a confession that God onely knoweth the heart; and that no mans wit, or strength can protect a man against Gods vengeance on the perjured.

Fifthly, it is a part of Rationall Worship, to speak Considerately of God; for it argues a Fear of him, and Fear, is a confession of his Power. Hence followeth, That the name of God is not to be used rashly, and to no purpose; for that is as much, as in Vain: And it is to no purpose; unlesse it be by way of Oath, and by order of the Common-wealth, to make Judgements certain; or between Common-wealths, to avoyd Warre. And that disputing of Gods nature is contrary to his Honour: For it is supposed, that in this naturall Kingdome of God, there is no other way to know any thing, but by naturall Reason; that is, from the Principles of naturall Science; which are so farre from teaching us any thing of Gods nature, as they cannot teach us our own nature, nor the nature of the smallest creature living. And therefore, when men out of the Principles of naturall Reason, dispute of the Attributes of God, they but dishonour him: For in the Attributes which we give to God, we are not to consider the signification of Philosophicall Truth; but the signification of Pious Intention, to do him the greatest Honour we are able. From the want of which consideration, have proceeded the volumes of disputation about the Nature of God, that tend not to his Honour, but to the honour of our own wits, and learning; and are nothing else but inconsiderate, and vain abuses of his Sacred Name.

Sixthly, in Prayers, Thanksgivings, Offerings and Sacrifices, it is a Dictate of naturall Reason, that they be every one in his kind the best, and most significant of Honour. As for example, that Prayers, and Thanksgiving, be made in Words and Phrases, not sudden, nor light, nor Plebeian; but beautifull and well composed; For else we do not God as much honour as we can. And therefore the Heathens did absurdly, to worship Images for Gods: But their doing it in Verse, and with Musick, both of Voyce, and Instruments, was reasonable. Also that the Beasts they offered in sacrifice, and the Gifts they offered, and their actions in Worshipping, were full of submission, and commemorative of benefits received, was according to reason, as proceeding from an intention to honour him.

Seventhly, Reason directeth not onely to worship God in Secret; but also, and especially, in Publique, and in the sight of men: For without that, (that which in honour is most acceptable) the procuring others to honour him, is lost.

Lastly, Obedience to his Lawes (that is, in this case to the Lawes of Nature,) is the greatest worship of all. For as Obedience is more acceptable to God than sacrifice; so also to set light by his Commandements, is the greatest of all contumelies. And these are the Lawes of that Divine Worship, which naturall Reason dictateth to private men.

Publique Worship Consisteth In Uniformity

But seeing a Common-wealth is but one Person, it ought also to exhibite to God but one Worship; which then it doth, when it commandeth it to be exhibited by Private men, Publiquely. And this is Publique Worship; the property whereof, is to be Uniforme: For those actions that are done differently, by different men, cannot be said to be a Publique Worship. And therefore, where many sorts of Worship be allowed, proceeding from the different Religions of Private men, it cannot be said there is any Publique Worship, nor that the Common-wealth is of any Religion at all.

All Attributes Depend On The Lawes Civill

And because words (and consequently the Attributes of God) have their signification by agreement, and constitution of men; those Attributes are to be held significative of Honour, that men intend shall so be; and whatsoever may be done by the wills of particular men, where there is no Law but Reason, may be done by the will of the Common-wealth, by Lawes Civill. And because a Common-wealth hath no Will, nor makes no Lawes, but those that are made by the Will of him, or them that have the Sovereign Power; it followeth, that those Attributes which the Sovereign ordaineth, in the Worship of God, for signes of Honour, ought to be taken and used for such, by private men in their publique Worship.

Not All Actions

But because not all Actions are signes by Constitution; but some are Naturally signes of Honour, others of Contumely, these later (which are those that men are ashamed to do in the sight of them they reverence) cannot be made by humane power a part of Divine worship; nor the former (such as are decent, modest, humble Behaviour) ever be separated from it. But whereas there be an infinite number of Actions, and Gestures, of an indifferent nature; such of them as the Common-wealth shall ordain to be Publicuely and Universally in use, as signes of Honour, and part of Gods Worship, are to be taken and used for such by the Subjects. And that which is said in the Scripture, “It is better to obey God than men,” hath place in the kingdome of God by Pact, and not by Nature.

Naturall Punishments

Having thus briefly spoken of the Naturall Kingdome of God, and his Naturall Lawes, I will adde onely to this Chapter a short declaration of his Naturall Punishments. There is no action of man in this life, that is not the beginning of so long a chayn of Consequences, as no humane Providence, is high enough, to give a man a prospect to the end. And in this Chayn, there are linked together both pleasing and unpleasing events; in such manner, as he that will do any thing for his pleasure, must engage himselfe to suffer all the pains annexed to it; and these pains, are the Naturall Punishments of those actions, which are the beginning of more Harme than Good. And hereby it comes to passe, that Intemperance, is naturally punished with Diseases; Rashnesse, with Mischances; Injustice, with the Violence of Enemies; Pride, with Ruine; Cowardise, with Oppression; Negligent government of Princes, with Rebellion; and Rebellion, with Slaughter. For seeing Punishments are consequent to the breach of Lawes; Naturall Punishments must be naturally consequent to the breach of the Lawes of Nature; and therefore follow them as their naturall, not arbitrary effects.

The Conclusion Of The Second Part

And thus farre concerning the Constitution, Nature, and Right of Sovereigns; and concerning the Duty of Subjects, derived from the Principles of Naturall Reason. And now, considering how different this Doctrine is, from the Practise of the greatest part of the world, especially of these Western parts, that have received their Morall learning from Rome, and Athens; and how much depth of Morall Philosophy is required, in them that have the Administration of the Sovereign Power; I am at the point of believing this my labour, as uselesse, and the Common-wealth of Plato; For he also is of opinion that it is impossible for the disorders of State, and change of Governments by Civill Warre, ever to be taken

away, till Sovereigns be Philosophers. But when I consider again, that the Science of Naturall Justice, is the onely Science necessary for Sovereigns, and their principall Ministers; and that they need not be charged with the Sciences Mathematicall, (as by Plato they are,) further, than by good Lawes to encourage men to the study of them; and that neither Plato, nor any other Philosopher hitherto, hath put into order, and sufficiently, or probably proved all the Theoremes of Morall doctrine, that men may learn thereby, both how to govern, and how to obey; I recover some hope, that one time or other, this writing of mine, may fall into the hands of a Sovereign, who will consider it himselfe, (for it is short, and I think clear,) without the help of any interested, or envious Interpreter; and by the exercise of entire Sovereignty, in protecting the Publique teaching of it, convert this Truth of Speculation, into the Utility of Practice.

PART III. OF A CHRISTIAN COMMON-WEALTH

CHAPTER XXXII. OF THE PRINCIPLES OF CHRISTIAN POLITIQUES

THE WORD OF God Delivered By Prophets Is The Main Principle
Of Christian Politiques

I have derived the Rights of Sovereigne Power, and the duty of Subjects hitherto, from the Principles of Nature onely; such as Experience has found true, or Consent (concerning the use of words) has made so; that is to say, from the nature of Men, known to us by Experience, and from Definitions (of such words as are Essentiall to all Politicall reasoning) universally agreed on. But in that I am next to handle, which is the Nature and Rights of a CHRISTIAN COMMON-WEALTH, whereof there dependeth much upon Supernaturall Revelations of the Will of God; the ground of my Discourse must be, not only the Naturall Word of God, but also the Propheticall.

Neverthelesse, we are not to renounce our Senses, and Experience; nor (that which is the undoubted Word of God) our naturall Reason. For they are the talents which he hath put into our hands to negotiate, till the coming again of our blessed Saviour; and therefore not to be folded up in the Napkin of an Implicate Faith, but employed in the purchase of Justice, Peace, and true Religion, For though there be many things in Gods Word above Reason; that is to say, which cannot by naturall reason be either demonstrated, or confuted; yet there is nothing contrary to it; but when it seemeth so, the fault is either in our unskilfull Interpretation, or erroneous Ratiocination.

Therefore, when any thing therein written is too hard for our examination, wee are bidden to captivate our understanding to the Words; and not to labour in sifting out a Philosophicall truth by Logick, of such mysteries as are not comprehensible, nor fall under any rule of naturall science. For it is with the

mysteries of our Religion, as with wholesome pills for the sick, which swallowed whole, have the vertue to cure; but chewed, are for the most part cast up again without effect.

What It Is To Captivate The Understanding

But by the Captivity of our Understanding, is not meant a Submission of the Intellectual faculty, to the Opinion of any other man; but of the Will to Obedience, where obedience is due. For Sense, Memory, Understanding, Reason, and Opinion are not in our power to change; but alwaies, and necessarily such, as the things we see, hear, and consider suggest unto us; and therefore are not effects of our Will, but our Will of them. We then Captivate our Understanding and Reason, when we forbear contradiction; when we so speak, as (by lawfull Authority) we are commanded; and when we live accordingly; which in sum, is Trust, and Faith reposed in him that speaketh, though the mind be incapable of any Notion at all from the words spoken.

How God Speaketh To Men

When God speaketh to man, it must be either immediately; or by mediation of another man, to whom he had formerly spoken by himself immediately. How God speaketh to a man immediately, may be understood by those well enough, to whom he hath so spoken; but how the same should be understood by another, is hard, if not impossible to know. For if a man pretend to me, that God hath spoken to him supernaturally, and immediately, and I make doubt of it, I cannot easily perceive what argument he can produce, to oblige me to beleieve it. It is true, that if he be my Sovereign, he may oblige me to obedience, so, as not by act or word to declare I beleieve him not; but not to think any otherwise then my reason

perswades me. But if one that hath not such authority over me, shall pretend the same, there is nothing that exacteth either beleefe, or obedience.

For to say that God hath spoken to him in the Holy Scripture, is not to say God hath spoken to him immediately, but by mediation of the Prophets, or of the Apostles, or of the Church, in such manner as he speaks to all other Christian men. To say he hath spoken to him in a Dream, is no more than to say he dreamed that God spake to him; which is not of force to win beleef from any man, that knows dreams are for the most part naturall, and may proceed from former thoughts; and such dreams as that, from selfe conceit, and foolish arrogance, and false opinion of a mans own godlinesse, or other vertue, by which he thinks he hath merited the favour of extraordinary Revelation. To say he hath seen a Vision, or heard a Voice, is to say, that he hath dreamed between sleeping and waking: for in such manner a man doth many times naturally take his dream for a vision, as not having well observed his own slumbering. To say he speaks by supernaturall Inspiration, is to say he finds an ardent desire to speak, or some strong opinion of himself, for which he can alledge no naturall and sufficient reason. So that though God Almighty can speak to a man, by Dreams, Visions, Voice, and Inspiration; yet he obliges no man to beleefe he hath so done to him that pretends it; who (being a man), may erre, and (which is more) may lie.

By What Marks Prophets Are Known

How then can he, to whom God hath never revealed his Wil immediately (saving by the way of natural reason) know when he is to obey, or not to obey his Word, delivered by him, that sayes he is a Prophet? (1 Kings 22) Of 400 Prophets, of whom the K. of Israel asked counsel, concerning the warre he made against Ramoth Gilead, only Micaiah was a true one.(1 Kings 13) The Prophet that was sent to prophecy against the Altar set up by Jeroboam, though a true Prophet, and that by two miracles done in his presence appears to be a Prophet sent from God,

was yet deceived by another old Prophet, that perswaded him as from the mouth of God, to eat and drink with him. If one Prophet deceive another, what certainty is there of knowing the will of God, by other way than that of Reason? To which I answer out of the Holy Scripture, that there be two marks, by which together, not asunder, a true Prophet is to be known. One is the doing of miracles; the other is the not teaching any other Religion than that which is already established. Asunder (I say) neither of these is sufficient. (Deut. 13 v. 1,2,3,4,5) “If a Prophet rise amongst you, or a Dreamer of dreams, and shall pretend the doing of a miracle, and the miracle come to passe; if he say, Let us follow strange Gods, which thou hast not known, thou shalt not hearken to him, &c. But that Prophet and Dreamer of dreams shall be put to death, because he hath spoken to you to Revolt from the Lord your God.” In which words two things are to be observed, First, that God wil not have miracles alone serve for arguments, to approve the Prophets calling; but (as it is in the third verse) for an experiment of the constancy of our adherence to himself. For the works of the Egyptian Sorcerers, though not so great as those of Moses, yet were great miracles. Secondly, that how great soever the miracle be, yet if it tend to stir up revolt against the King, or him that governeth by the Kings authority, he that doth such miracle, is not to be considered otherwise than as sent to make triall of their allegiance. For these words, “revolt from the Lord your God,” are in this place equivalent to “revolt from your King.” For they had made God their King by pact at the foot of Mount Sinai; who ruled them by Moses only; for he only spake with God, and from time to time declared Gods Commandements to the people. In like manner, after our Saviour Christ had made his Disciples acknowledge him for the Messiah, (that is to say, for Gods anointed, whom the nation of the Jews daily expected for their King, but refused when he came,) he omitted not to advertise them of the danger of miracles. “There shall arise,” (saith he) “false Christs, and false Prophets, and shall doe great wonders and miracles, even to the seducing (if it were possible) of the very Elect.” (Mat. 24. 24) By which it appears, that false Prophets may have the power of miracles; yet are wee not to take their doctrin for Gods Word. St.

Paul says further to the Galatians, that “if himself, or an Angell from heaven preach another Gospel to them, than he had preached, let him be accursed.” (Gal. 1. 8) That Gospel was, that Christ was King; so that all preaching against the power of the King received, in consequence to these words, is by St. Paul accursed. For his speech is addressed to those, who by his preaching had already received Jesus for the Christ, that is to say, for King of the Jews.

The Marks Of A Prophet In The Old Law, Miracles, And Doctrine

Conformable To The Law

And as Miracles, without preaching that Doctrine which God hath established; so preaching the true Doctrine, without the doing of Miracles, is an unsufficient argument of immediate Revelation. For if a man that teacheth not false Doctrine, should pretend to bee a Prophet without shewing any Miracle, he is never the more to bee regarded for his pretence, as is evident by Deut. 18. v. 21, 22. “If thou say in thy heart, How shall we know that the Word (of the Prophet) is not that which the Lord hath spoken. When the Prophet shall have spoken in the name of the Lord, that which shall not come to passe, that’s the word which the Lord hath not spoken, but the Prophet has spoken it out of the pride of his own heart, fear him not.” But a man may here again ask, When the Prophet hath foretold a thing, how shal we know whether it will come to passe or not? For he may foretel it as a thing to arrive after a certain long time, longer then the time of mans life; or indefinitely, that it will come to passe one time or other: in which case this mark of a Prophet is unusefull; and therefore the miracles that oblige us to beleieve a Prophet, ought to be confirmed by an immediate, or a not long deferr’d event. So that it is manifest, that the teaching of the Religion which God hath established, and the showing of a present Miracle, joined together, were the only marks whereby the Scripture would have a true Prophet, that is to say immediate

Revelation to be acknowledged; neither of them being singly sufficient to oblige any other man to regard what he saith.

Miracles Ceasing, Prophets Cease, The Scripture Supplies Their Place

Seeing therefore Miracles now cease, we have no sign left, whereby to acknowledge the pretended Revelations, or Inspirations of any private man; nor obligation to give ear to any Doctrine, farther than it is conformable to the Holy Scriptures, which since the time of our Saviour, supply the want of all other Prophecy; and from which, by wise and careful ratiocination, all rules and precepts necessary to the knowledge of our duty both to God and man, without Enthusiasme, or supernaturall Inspiration, may easily be deduced. And this Scripture is it, out of which I am to take the Principles of my Discourse, concerning the Rights of those that are the Supream Govenors on earth, of Christian Common-wealths; and of the duty of Christian Subjects towards their Sovereigns. And to that end, I shall speak in the next Chapter, of the Books, Writers, Scope and Authority of the Bible.

CHAPTER XXXIII. OF THE NUMBER, ANTIQUITY, SCOPE, AUTHORITY,

AND INTERPRETERS OF THE BOOKS OF HOLY SCRIPTURES

Of The Books Of Holy Scripture

By the Books of Holy SCRIPTURE, are understood those, which ought to be the Canon, that is to say, the Rules of Christian life. And because all Rules of life, which men are in conscience bound to observe, are Laws; the question of the Scripture, is the question of what is Law throughout all Christendome, both Naturall, and Civill. For though it be not determined in Scripture, what Laws every Christian King shall constitute in his own Dominions; yet it is determined what laws he shall not constitute. Seeing therefore I have already proved, that Sovereigns in their own Dominions are the sole Legislators; those Books only are Canonically, that is, Law, in every nation, which are established for such by the Sovereign Authority. It is true, that God is the Sovereign of all Sovereigns; and therefore, when he speaks to any Subject, he ought to be obeyed, whatsoever any earthly Potentate command to the contrary. But the question is not of obedience to God, but of When, and What God hath said; which to Subjects that have no supernaturall revelation, cannot be known, but by that naturall reason, which guided them, for the obtaining of Peace and Justice, to obey the authority of their severall Common-wealths; that is to say, of their lawfull Sovereigns. According to this obligation, I can acknowledge no other Books of the Old Testament, to be Holy Scripture, but those which have been commanded to be acknowledged for such, by the Authority of the Church of England. What Books these are, is sufficiently known, without a Catalogue of them here; and they are the same that are acknowledged by St. Jerome, who holdeth the rest, namely, the Wisdome of

Solomon, Ecclesiasticus, Judith, Tobias, the first and second of Maccabees, (though he had seen the first in Hebrew) and the third and fourth of Esdras, for Apocrypha. Of the Canonick, Josephus a learned Jew, that wrote in the time of the Emperor Domitian, reckoneth Twenty Two, making the number agree with the Hebrew Alphabet. St. Jerome does the same, though they reckon them in different manner. For Josephus numbers Five Books of Moses, Thirteen of Prophets, that writ the History of their own times (which how it agrees with the Prophets writings contained in the Bible wee shall see hereafter), and Four of Hymnes and Morall Precepts. But St. Jerome reckons Five Books of Moses, Eight of Prophets, and Nine of other Holy writ, which he calls of Hagiographa. The Septuagint, who were 70. learned men of the Jews, sent for by Ptolemy King of Egypt, to translate the Jewish Law, out of the Hebrew into the Greek, have left us no other for holy Scripture in the Greek tongue, but the same that are received in the Church of England.

As for the Books of the New Testament, they are equally acknowledged for Canon by all Christian Churches, and by all sects of Christians, that admit any Books at all for Canonick.

Their Antiquity

Who were the originall writers of the severall Books of Holy Scripture, has not been made evident by any sufficient testimony of other History, (which is the only proof of matter of fact); nor can be by any arguments of naturall Reason; for Reason serves only to convince the truth (not of fact, but) of consequence. The light therefore that must guide us in this question, must be that which is held out unto us from the Bookes themselves: And this light, though it show us not the writer of every book, yet it is not unusefull to give us knowledge of the time, wherein they were written.

The Pentateuch Not Written By Moses

And first, for the Pentateuch, it is not argument enough that they were written by Moses, because they are called the five Books of Moses; no more than these titles, The Book of Joshua, the Book of Judges, The Book of Ruth, and the Books of the Kings, are arguments sufficient to prove, that they were written by Joshua, by the Judges, by Ruth, and by the Kings. For in titles of Books, the subject is marked, as often as the writer. The History Of Livy, denotes the Writer; but the History Of Scanderbeg, is denominated from the subject. We read in the last Chapter of Deuteronomie, Ver. 6. concerning the sepulcher of Moses, “that no man knoweth of his sepulcher to this day,” that is, to the day wherein those words were written. It is therefore manifest, that those words were written after his interrement. For it were a strange interpretation, to say Moses spake of his own sepulcher (though by Prophecy), that it was not found to that day, wherein he was yet living. But it may perhaps be alledged, that the last Chapter only, not the whole Pentateuch, was written by some other man, but the rest not: Let us therefore consider that which we find in the Book of Genesis, Cha. Ver. 6 “And Abraham passed through the land to the place of Sichem, unto the plain of Moreh, and the Canaanite was then in the land;” which must needs bee the words of one that wrote when the Canaanite was not in the land; and consequently, not of Moses, who dyed before he came into it. Likewise Numbers 21. Ver. 14. the Writer citeth another more ancient Book, Entituled, The Book of the Warres of the Lord, wherein were registred the Acts of Moses, at the Red-sea, and at the brook of Arnon. It is therefore sufficiently evident, that the five Books of Moses were written after his time, though how long after it be not so manifest.

But though Moses did not compile those Books entirely, and in the form we have them; yet he wrote all that which hee is there said to have written: as for example, the Volume of the Law, which is contained, as it seemeth in the 11 of

Deuteronomie, and the following Chapters to the 27. which was also commanded to be written on stones, in their entry into the land of Canaan. (Deut. 31. 9) And this did Moses himself write, and deliver to the Priests and Elders of Israel, to be read every seventh year to all Israel, at their assembling in the feast of Tabernacles. And this is that Law which God commanded, that their Kings (when they should have established that form of Government) should take a copy of from the Priests and Levites to lay in the side of the Arke; (Deut. 31. 26) and the same which having been lost, was long time after found again by Hilkiah, and sent to King Josias, who causing it to be read to the People, renewed the Covenant between God and them. (2 King. 22. 8 & 23. 1,2,3)

The Book of Joshua Written After His Time

That the Book of Joshua was also written long after the time of Joshua, may be gathered out of many places of the Book it self. Joshua had set up twelve stones in the midst of Jordan, for a monument of their passage; (Josh 4. 9) of which the Writer saith thus, “They are there unto this day;” (Josh 5. 9) for “unto this day”, is a phrase that signifieth a time past, beyond the memory of man. In like manner, upon the saying of the Lord, that he had rolled off from the people the Reproach of Egypt, the Writer saith, “The place is called Gilgal unto this day;” which to have said in the time of Joshua had been improper. So also the name of the Valley of Achor, from the trouble that Achan raised in the Camp, (Josh. 7. 26) the Writer saith, “remaineth unto this day;” which must needs bee therefore long after the time of Joshua. Arguments of this kind there be many other; as Josh. 8. 29. 13. 13. 14. 14. 15. 63.

The Booke Of Judges And Ruth Written Long After The Captivity

The same is manifest by like arguments of the Book of Judges, cha. 21,26 6.24 10.4 15.19 17.6 and Ruth 1. 1. but especially Judg. 18. 30. where it is said, that Jonathan “and his sonnes were Priests to the Tribe of Dan, untill the day of the captivity of the land.”

The Like Of The Bookes Of Samuel

That the Books of Samuel were also written after his own time, there are the like arguments, 1 Sam. 5.5. 7.13,15. 27.6. & 30.25. where, after David had adjudged equall part of the spoiles, to them that guarded the Ammunition, with them that fought, the Writer saith, “He made it a Statute and an Ordinance to Israel to this day.” (2. Sam. 6.4.) Again, when David (displeased, that the Lord had slain Uzzah, for putting out his hand to sustain the Ark,) called the place Perez-Uzzah, the Writer saith, it is called so “to this day”: the time therefore of the writing of that Book, must be long after the time of the fact; that is, long after the time of David.

The Books Of The Kings, And The Chronicles

As for the two Books of the Kings, and the two books of the Chronicles, besides the places which mention such monuments, as the Writer saith, remained till his own days; such as are 1 Kings 9.13. 9.21. 10. 12. 12.19. 2 Kings 2.22. 8.22. 10.27. 14.7. 16.6. 17.23. 17.34. 17.41. 1 Chron. 4.41. 5.26. It is argument sufficient they were written after the captivity in Babylon, that the History of them is continued till that time. For the Facts Registered are alwaies more ancient than such Books as make mention of, and quote the Register; as these Books doe in divers places, referring the Reader to the Chronicles of the Kings of Juda, to the Chronicles of the Kings of Israel, to the Books of the Prophet Samuel, or the

Prophet Nathan, of the Prophet Ahijah; to the Vision of Jehdo, to the Books of the Prophet Serveiah, and of the Prophet Addo.

Ezra And Nehemiah

The Books of Esdras and Nehemiah were written certainly after their return from captivity; because their return, the re-edification of the walls and houses of Jerusalem, the renovation of the Covenant, and ordination of their policy are therein contained.

Esther

The History of Queen Esther is of the time of the Captivity; and therefore the Writer must have been of the same time, or after it.

Job

The Book of Job hath no mark in it of the time wherein it was written: and though it appear sufficiently (Exekiel 14.14, and James 5.11.) that he was no fained person; yet the Book it self seemeth not to be a History, but a Treatise concerning a question in ancient time much disputed, “why wicked men have often prospered in this world, and good men have been afflicted;” and it is the most probably, because from the beginning, to the third verse of the third chapter, where the complaint of Job beginneth, the Hebrew is (as St. Jerome testifies) in prose; and from thence to the sixt verse of the last chapter in Hexameter Verses; and the rest of that chapter again in prose. So that the dispute is all in verse; and the prose is added, but as a Preface in the beginning, and an Epilogue in the end. But Verse is

no usuall stile of such, as either are themselves in great pain, as Job; or of such as come to comfort them, as his friends; but in Philosophy, especially morall Philosophy, in ancient time frequent.

The Psalter

The Psalmes were written the most part by David, for the use of the Quire. To these are added some songs of Moses, and other holy men; and some of them after the return from the Captivity; as the 137. and the 126. whereby it is manifest that the Psalter was compiled, and put into the form it now hath, after the return of the Jews from Babylon.

The Proverbs

The Proverbs, being a Collection of wise and godly Sayings, partly of Solomon, partly of Agur the son of Jakeh; and partly of the Mother of King Lemuel, cannot probably be thought to have been collected by Solomon, rather then by Agur, or the Mother of Lemues; and that, though the sentences be theirs, yet the collection or compiling them into this one Book, was the work of some other godly man, that lived after them all.

Ecclesiastes And The Canticles

The Books of Ecclesiastes and the Canticles have nothing that was not Solomons, except it be the Titles, or Inscriptions. For “The Words of the Preacher, the Son of David, King in Jerusalem;” and, “the Song of Songs, which is Solomon’s,” seem to have been made for distinctions sake, then, when the Books of Scripture were

gathered into one body of the Law; to the end, that not the Doctrine only, but the Authors also might be extant.

The Prophets

Of the Prophets, the most ancient, are Sophoniah, Jonas, Amos, Hosea, Isaiah and Michaiah, who lived in the time of Amaziah, and Azariah, otherwise Ozias, Kings of Judah. But the Book of Jonas is not properly a Register of his Prophecy, (for that is contained in these few words, “Fourty dayes and Ninivy shall be destroyed,”) but a History or Narration of his frowardenesse and disputing Gods commandements; so that there is small probability he should be the Author, seeing he is the subject of it. But the Book of Amos is his Prophecy.

Jeremiah, Abdias, Nahum, and Habakkuk prophecyed in the time of Josiah.

Ezekiel, Daniel, Aggeus, and Zacharias, in the Captivity.

When Joel and Malachi prophecyed, is not evident by their Writings. But considering the Inscriptions, or Titles of their Books, it is manifest enough, that the whole Scripture of the Old Testament, was set forth in the form we have it, after the return of the Jews from their Captivity in Babylon, and before the time of Ptolemaeus Philadelphus, that caused it to bee translated into Greek by seventy men, which were sent him out of Judea for that purpose. And if the Books of Apocrypha (which are recommended to us by the Church, though not for Canonicall, yet for profitable Books for our instruction) may in this point be credited, the Scripture was set forth in the form wee have it in, by Esdras; as may appear by that which he himself saith, in the second book, chapt. 14. verse 21, 22, &c. where speaking to God, he saith thus, “Thy law is burnt; therefore no man knoweth the things which thou has done, or the works that are to begin. But if I have found Grace before thee, send down the holy Spirit into me, and I shall write all that hath been done in the world, since the beginning, which were written in thy Law, that men may find thy path, and that they which will live in the later

days, may live.” And verse 45. “And it came to passe when the forty dayes were fulfilled, that the Highest spake, saying, ‘The first that thou hast written, publish openly, that the worthy and unworthy may read it; but keep the seventy last, that thou mayst deliver them onely to such as be wise among the people.’” And thus much concerning the time of the writing of the Bookes of the Old Testament.

The New Testament

The Writers of the New Testament lived all in lesse then an age after Christs Ascension, and had all of them seen our Saviour, or been his Disciples, except St. Paul, and St. Luke; and consequently whatsoever was written by them, is as ancient as the time of the Apostles. But the time wherein the Books of the New Testament were received, and acknowledged by the Church to be of their writing, is not altogether so ancient. For, as the Bookes of the Old Testament are derived to us, from no higher time then that of Esdras, who by the direction of Gods Spirit retrived them, when they were lost: Those of the New Testament, of which the copies were not many, nor could easily be all in any one private mans hand, cannot bee derived from a higher time, that that wherein the Governours of the Church collected, approved, and recommended them to us, as the writings of those Apostles and Disciples; under whose names they go. The first enumeration of all the Bookes, both of the Old, and New Testament, is in the Canons of the Apostles, supposed to be collected by Clement the first (after St. Peter) Bishop of Rome. But because that is but supposed, and by many questioned, the Councell of Laodicea is the first we know, that recommended the Bible to the then Christian Churches, for the Writings of the Prophets and Apostles: and this Councell was held in the 364. yeer after Christ. At which time, though ambition had so far prevailed on the great Doctors of the Church, as no more to esteem Emperours, though Christian, for the Shepherds of the people, but for Sheep; and Emperours not Christian, for Wolves; and endeavoured to passe their Doctrine, not for

Counsell, and Information, as Preachers; but for Laws, as absolute Governours; and thought such frauds as tended to make the people the more obedient to Christian Doctrine, to be pious; yet I am perswaded they did not therefore falsifie the Scriptures, though the copies of the Books of the New Testament, were in the hands only of the Ecclesiasticks; because if they had had an intention so to doe, they would surely have made them more favorable to their power over Christian Princes, and Civill Sovereignty, than they are. I see not therefore any reason to doubt, but that the Old, and New Testament, as we have them now, are the true Registers of those things, which were done and said by the Prophets, and Apostles. And so perhaps are some of those Books which are called Apocrypha, if left out of the Canon, not for inconformity of Doctrine with the rest, but only because they are not found in the Hebrew. For after the conquest of Asia by Alexander the Great, there were few learned Jews, that were not perfect in the Greek tongue. For the seventy Interpreters that converted the Bible into Greek, were all of them Hebrews; and we have extant the works of Philo and Josephus both Jews, written by them eloquently in Greek. But it is not the Writer, but the authority of the Church, that maketh a Book Canonically.

Their Scope

And although these Books were written by divers men, yet it is manifest the Writers were all indued with one and the same Spirit, in that they conspire to one and the same end, which is the setting forth of the Rights of the Kingdome of God, the Father, Son, and Holy Ghost. For the Book of Genesis, deriveth the Genealogy of Gods people, from the creation of the World, to the going into Egypt: the other four Books of Moses, contain the Election of God for their King, and the Laws which hee prescribed for their Government: The Books of Joshua, Judges, Ruth, and Samuel, to the time of Saul, describe the acts of Gods people, till the time they cast off Gods yoke, and called for a King, after the manner of

their neighbour nations; The rest of the History of the Old Testament, derives the succession of the line of David, to the Captivity, out of which line was to spring the restorer of the Kingdome of God, even our blessed Saviour God the Son, whose coming was foretold in the Bookes of the Prophets, after whom the Evangelists writt his life, and actions, and his claim to the Kingdome, whilst he lived on earth: and lastly, the Acts, and Epistles of the Apostles, declare the coming of God, the Holy Ghost, and the Authority he left with them, and their successors, for the direction of the Jews, and for the invitation of the Gentiles. In summe, the Histories and the Prophecies of the old Testament, and the Gospels, and Epistles of the New Testament, have had one and the same scope, to convert men to the obedience of God; 1. in Moses, and the Priests; 2. in the man Christ; and 3. in the Apostles and the successors to Apostolicall power. For these three at several times did represent the person of God: Moses, and his successors the High Priests, and Kings of Judah, in the Old Testament: Christ himself, in the time he lived on earth: and the Apostles, and their successors, from the day of Pentecost (when the Holy Ghost descended on them) to this day.

The Question Of The Authority Of The Scriptures Stated.

It is a question much disputed between the divers sects of Christian Religion, From Whence The Scriptures Derive Their Authority; which question is also propounded sometimes in other terms, as, How Wee Know Them To Be The Word Of God, or, Why We Beleeve Them To Be So: and the difficulty of resolving it, ariseth chiefly from the impropnesse of the words wherein the question it self is couched. For it is beleeved on all hands, that the first and originall Author of them is God; and consequently the question disputed, is not that. Again, it is manifest, that none can know they are Gods Word, (though all true Christians beleeve it,) but those to whom God himself hath revealed it supernaturally; and therefore the question is not rightly moved, of our Knowledge

of it. Lastly, when the question is propounded of our Beleefe; because some are moved to beleefe for one, and others for other reasons, there can be rendred no one generall answer for them all. The question truly stated is, By What Authority They Are Made Law.

Their Authority And Interpretation

As far as they differ not from the Laws of Nature, there is no doubt, but they are the Law of God, and carry their Authority with them, legible to all men that have the use of naturall reason: but this is no other Authority, then that of all other Morall Doctrine consonant to Reason; the Dictates whereof are Laws, not Made, but Eternall.

If they be made Law by God himselfe, they are of the nature of written Law, which are Laws to them only to whom God hath so sufficiently published them, as no man can excuse himself, by saying, he know not they were his.

He therefore, to whom God hath not supernaturally revealed, that they are his, nor that those that published them, were sent by him, is not obliged to obey them, by any Authority, but his, whose Commands have already the force of Laws; that is to say, by any other Authority, then that of the Common-wealth, residing in the Sovereign, who only has the Legislative power. Again, if it be not the Legislative Authority of the Common-wealth, that giveth them the force of Laws, it must bee some other Authority derived from God, either private, or publique: if private, it obliges onely him, to whom in particular God hath been pleased to reveale it. For if every man should be obliged, to take for Gods Law, what particular men, on pretence of private Inspiration, or Revelation, should obtrude upon him, (in such a number of men, that out of pride, and ignorance, take their own Dreams, and extravagant Fancies, and Madnesse, for testimonies of Gods Spirit; or out of ambition, pretend to such Divine testimonies, falsely, and contrary to their own consciences,) it were impossible that any Divine Law should be acknowledged. If

publique, it is the Authority of the Common-wealth, or of the Church. But the Church, if it be one person, is the same thing with a Common-wealth of Christians; called a Common-wealth, because it consisteth of men united in one person, their Sovereign; and a Church, because it consisteth in Christian men, united in one Christian Sovereign. But if the Church be not one person, then it hath no authority at all; it can neither command, nor doe any action at all; nor is capable of having any power, or right to any thing; nor has any Will, Reason, nor Voice; for all these qualities are personall. Now if the whole number of Christians be not contained in one Common-wealth, they are not one person; nor is there an Universall Church that hath any authority over them; and therefore the Scriptures are not made Laws, by the Universall Church: or if it bee one Common-wealth, then all Christian Monarchs, and States are private persons, and subject to bee judged, deposed, and punished by an Universall Sovereigne of all Christendome. So that the question of the Authority of the Scriptures is reduced to this, “Whether Christian Kings, and the Sovereigne Assemblies in Christian Common-wealths, be absolute in their own Territories, immediately under God; or subject to one Vicar of Christ, constituted over the Universall Church; to bee judged, condemned, deposed, and put to death, as hee shall think expedient, or necessary for the common good.”

Which question cannot bee resolved, without a more particular consideration of the Kingdome of God; from whence also, wee are to judge of the Authority of Interpreting the Scripture. For, whosoever hath a lawfull power over any Writing, to make it Law, hath the power also to approve, or disapprove the interpretation of the same.

CHAPTER XXXIV. OF THE SIGNIFICATION OF SPIRIT, ANGEL, AND INSPIRATION IN

THE BOOKS OF HOLY SCRIPTURE

Body And Spirit How Taken In The Scripture

Seeing the foundation of all true Ratiocination, is the constant Signification of words; which in the Doctrine following, dependeth not (as in naturall science) on the Will of the Writer, nor (as in common conversation) on vulgar use, but on the sense they carry in the Scripture; It is necessary, before I proceed any further, to determine, out of the Bible, the meaning of such words, as by their ambiguity, may render what I am to inferre upon them, obscure, or disputable. I will begin with the words BODY, and SPIRIT, which in the language of the Schools are termed, Substances, Corporeall, and Incorporeall.

The Word Body, in the most generall acceptation, signifieth that which filleth, or occupyeth some certain room, or imagined place; and dependeth not on the imagination, but is a reall part of that we call the Universe. For the Universe, being the Aggregate of all Bodies, there is no reall part thereof that is not also Body; nor any thing properly a Body, that is not also part of (that Aggregate of all Bodies) the Universe. The same also, because Bodies are subject to change, that is to say, to variety of apparence to the sense of living creatures, is called Substance, that is to say, Subject, to various accidents, as sometimes to be Moved, sometimes to stand Still; and to seem to our senses sometimes Hot, sometimes Cold, sometimes of one Colour, Smel, Tast, or Sound, somtimes of another. And this diversity of Seeming, (produced by the diversity of the operation of bodies, on the

organs of our sense) we attribute to alterations of the Bodies that operate, & call them Accidents of those Bodies. And according to this acceptation of the word, Substance and Body, signifie the same thing; and therefore Substance Incorporeall are words, which when they are joined together, destroy one another, as if a man should say, an Incorporeall Body.

But in the sense of common people, not all the Universe is called Body, but only such parts thereof as they can discern by the sense of Feeling, to resist their force, or by the sense of their Eyes, to hinder them from a farther prospect. Therefore in the common language of men, Aire, and Aeriall Substances, use not to be taken for Bodies, but (as often as men are sensible of their effects) are called Wind, or Breath, or (because the some are called in the Latine Spiritus) Spirits; as when they call that aeriall substance, which in the body of any living creature, gives it life and motion, Vitall and Animall Spirits. But for those Idols of the brain, which represent Bodies to us, where they are not, as in a Looking-glasse, in a Dream, or to a Distempered brain waking, they are (as the Apostle saith generally of all Idols) nothing; Nothing at all, I say, there where they seem to bee; and in the brain it self, nothing but tumult, proceeding either from the action of the objects, or from the disorderly agitation of the Organs of our Sense. And men, that are otherwise imployed, then to search into their causes, know not of themselves, what to call them; and may therefore easily be perswaded, by those whose knowledge they much reverence, some to call them Bodies, and think them made of aire compacted by a power supernaturall, because the sight judges them corporeall; and some to call them Spirits, because the sense of Touch discerneth nothing in the place where they appear, to resist their fingers: So that the proper signification of Spirit in common speech, is either a subtile, fluid, and invisible Body, or a Ghost, or other Idol or Phantasme of the Imagination. But for metaphoricall significations, there be many: for sometimes it is taken for Disposition or Inclination of the mind; as when for the disposition to controwl the sayings of other men, we say, A Spirit Contradiction; For A Disposition to Uncleannesse, An Unclean Spirit; for Perversenesse, A Froward Spirit; for

Sullenness, A Dumb Spirit, and for Inclination To Godlinesse, And Gods Service, the Spirit of God: sometimes for any eminent ability, or extraordinary passion, or disease of the mind, as when Great Wisdome is called the Spirit Of Wisdome; and Mad Men are said to be Possessed With A Spirit.

Other signification of Spirit I find no where any; and where none of these can satisfie the sense of that word in Scripture, the place falleth not under humane Understanding; and our Faith therein consisteth not in our Opinion, but in our Submission; as in all places where God is said to be a Spirit; or where by the Spirit of God, is meant God himselfe. For the nature of God is incomprehensible; that is to say, we understand nothing of What He Is, but only That He Is; and therefore the Attributes we give him, are not to tell one another, What He Is, Nor to signifie our opinion of his Nature, but our desire to honor him with such names as we conceive most honorable amongst our selves.

Spirit Of God Taken In The Scripture Sometimes For A Wind, Or Breath

Gen. 1. 2. “The Spirit of God moved upon the face of the Waters.” Here if by the Spirit of God be meant God himself, then is Motion attributed to God, and consequently Place, which are intelligible only of Bodies, and not of substances incorporeall; and so the place is above our understanding, that can conceive nothing moved that changes not place, or that has not dimension; and whatsoever has dimension, is Body. But the meaning of those words is best understood by the like place, Gen. 8. 1. Where when the earth was covered with Waters, as in the beginning, God intending to abate them, and again to discover the dry land, useth like words, “I will bring my Spirit upon the Earth, and the waters shall be diminished.” in which place by Spirit is understood a Wind, (that is an Aire or Spirit Moved,) which might be called (as in the former place) the Spirit of God, because it was Gods Work.

Secondly, For Extraordinary Gifts Of The Understanding

Gen. 41. 38. Pharaoh calleth the Wisdome of Joseph, the Spirit of God. For Joseph having advised him to look out a wise and discreet man, and to set him over the land of Egypt, he saith thus, “Can we find such a man as this is, in whom is the Spirit of God?” and Exod. 28.3. “Thou shalt speak (saith God) to all that are wise hearted, whom I have filled with the Spirit of Wisdome, to make Aaron Garments, to consecrate him.” Where extraordinary Understanding, though but in making Garments, as being the Gift of God, is called the Spirit of God. The same is found again, Exod. 31.3,4,5,6. and 35.31. And Isaiah 11.2,3. where the Prophet speaking of the Messiah, saith, “The Spirit of the Lord shall abide upon him, the Spirit of wisdom and understanding, the Spirit of counsell, and fortitude; and the Spirit of the fear of the Lord.” Where manifestly is meant, not so many Ghosts, but so many eminent Graces that God would give him.

Thirdly, For Extraordinary Affections

In the Book of Judges, an extraordinary Zeal, and Courage in the defence of Gods people, is called the Spirit of God; as when it excited Othniel, Gideon, Jeptha, and Samson to deliver them from servitude, Judg. 3.10. 6.34. 11.29. 13.25. 14.6,19. And of Saul, upon the newes of the insolence of the Ammonites towards the men of Jabeth Gilead, it is said (1 Sam.11.6.) that “The Spirit of God came upon Saul, and his Anger (or, as it is in the Latine, His Fury) was kindled greatly.” Where it is not probable was meant a Ghost, but an extraordinary Zeal to punish the cruelty of the Ammonites. In like manner by the Spirit of God, that came upon Saul, when hee was amongst the Prophets that praised God in Songs, and Musick

(1 Sam.19.20.) is to be understood, not a Ghost, but an unexpected and sudden Zeal to join with them in their devotions.

Fourthly, For The Gift Of Prediction By Dreams And Visions

The false Prophet Zedekiah, saith to Micaiah (1 Kings 22.24.) “Which way went the Spirit of the Lord from me to speak to thee?” Which cannot be understood of a Ghost; for Micaiah declared before the Kings of Israel and Judah, the event of the battle, as from a Vision, and not as from a Spirit, speaking in him.

In the same manner it appeareth, in the Books of the Prophets, that though they spake by the Spirit of God, that is to say, by a speciall grace of Prediction; yet their knowledge of the future, was not by a Ghost within them, but by some supernaturall Dream or Vision.

Fiftly, For Life

Gen. 2.7. It is said, “God made man of the dust of the Earth, and breathed into his nostrills (spiraculum vitae) the breath of life, and man was made a living soul.” There the Breath of Life inspired by God, signifies no more, but that God gave him life; And (Job 27.3.) “as long as the Spirit of God is in my nostrils;” is no more then to say, “as long as I live.” So in Ezek. 1.20. “the Spirit of life was in the wheels,” is equivalent to, “the wheels were alive.” And (Ezek. 2.30.) “the spirit entred into me, and set me on my feet,” that is, “I recovered my vitall strength;” not that any Ghost, or incorporeal substance entred into, and possessed his body.

Sixtly, For A Subordination To Authority

In the 11 chap. of Numbers. verse 17. “I will take (saith God) of the Spirit, which is upon thee, and will put it upon them, and they shall bear the burthen of the people with thee;” that is, upon the seventy Elders: whereupon two of the seventy are said to prophecy in the campe; of whom some complained, and Joshua desired Moses to forbid them; which Moses would not doe. Whereby it appears; that Joshua knew not they had received authority so to do, and prophecyed according to the mind of Moses, that is to say, by a Spirit, or Authority subordinate to his own.

In the like sense we read (Deut. 34.9.) that “Joshua was full of the Spirit of wisdome,” because Moses had laid his hands upon him: that is, because he was Ordained by Moses, to prosecute the work hee had himselfe begun, (namely, the bringing of Gods people into the promised land), but prevented by death, could not finish.

In the like sense it is said, (Rom. 8.9.) “If any man have not the Spirit of Christ, he is none of his:” not meaning thereby the Ghost of Christ, but a Submission to his Doctrine. As also (1 John 4.2.) “Hereby you shall know the Spirit of God; Every Spirit that confesseth that Jesus Christ is come in the flesh, is of God;” by which is meant the Spirit of unfained Christianity, or Submission to that main Article of Christian faith, that Jesus is the Christ; which cannot be interpreted of a Ghost.

Likewise these words (Luke 4.1.) “And Jesus full of the Holy Ghost” (that is, as it is exprest, Mat. 4.1. and Mar. 1.12. “of the Holy Spirit”,) may be understood, for Zeal to doe the work for which hee was sent by God the Father: but to interpret it of a Ghost, is to say, that God himselfe (for so our Saviour was,) was filled with God; which is very improper, and insignificant. How we came to translate Spirits, by the word Ghosts, which signifieth nothing, neither in heaven, nor earth, but the Imaginary inhabitants of mans brain, I examine not: but this I say, the word Spirit in the text signifieth no such thing; but either properly a reall Substance, or Metaphorically, some extraordinary Ability of Affection of the Mind, or of the Body.

Seventhly, For Aeriall Bodies

The Disciples of Christ, seeing him walking upon the sea, (Mat. 14.26. and Marke 6.49.) supposed him to be a Spirit, meaning thereby an Aeriall Body, and not a Phantasme: for it is said, they all saw him; which cannot be understood of the delusions of the brain, (which are not common to many at once, as visible Bodies are; but singular, because of the differences of Fancies), but of Bodies only. In like manner, where he was taken for a Spirit, by the same Apostles (Luke 24.3,7.): So also (Acts 12.15) when St. Peter was delivered out of Prison, it would not be beleaved; but when the Maid said he was at the dore, they said it was his Angel; by which must be meant a corporeall substance, or we must say, the Disciples themselves did follow the common opinion of both Jews and Gentiles, that some such apparitions were not Imaginary, but Reall; and such as needed not the fancy of man for their Existence: These the Jews called Spirits, and Angels, Good or Bad; as the Greeks called the same by the name of Daemons. And some such apparitions may be reall, and substantiall; that is to say, subtile Bodies, which God can form by the same power, by which he formed all things, and make use of, as of Ministers, and Messengers (that is to say, Angels) to declare his will, and execute the same when he pleaseth, in extraordinary and supernaturall manner. But when hee hath so formed them they are Substances, endued with dimensions, and take up roome, and can be moved from place to place, which is peculiar to Bodies; and therefore are not Ghosts Incorporeall, that is to say, Ghosts that are in No Place; that is to say, that are No Where; that is to say, that seeming to be Somewhat, are Nothing. But if corporeall be taken in the most vulgar manner, for such Substances as are perceptible by our externall Senses; then is Substance Incorporeall, a thing not Imaginary, but Reall; namely, a thin Substance Invisible, but that hath the same dimensions that are in grosser Bodies.

Angel What

By the name of ANGEL, is signified generally, a Messenger; and most often, a Messenger of God: And by a Messenger of God, is signified, any thing that makes known his extraordinary Presence; that is to say, the extraordinary manifestation of his power, especially by a Dream, or Vision.

Concerning the creation of Angels, there is nothing delivered in the Scriptures. That they are Spirits, is often repeated: but by the name of Spirit, is signified both in Scripture, and vulgarly, both amongst Jews, and Gentiles, sometimes thin Bodies; as the Aire, the Wind, the Spirits Vitall, and Animall, of living creatures; and sometimes the Images that rise in the fancy in Dreams, and Visions; which are not reall Substances, but accidents of the brain; yet when God raiseth them supernaturally, to signifie his Will, they are not improperly termed Gods Messengers, that is to say, his Angels.

And as the Gentiles did vulgarly conceive the Imagery of the brain, for things really subsistent without them, and not dependent on the fancy; and out of them framed their opinions of Daemons, Good and Evill; which because they seemed to subsist really, they called Substances; and because they could not feel them with their hands, Incorporeall: so also the Jews upon the same ground, without any thing in the Old Testament that constrained them thereunto, had generally an opinion, (except the sect of the Sadduces,) that those apparitions (which it pleased God sometimes to produce in the fancie of men, for his own service, and therefore called them his Angels) were substances, not dependent on the fancy, but permanent creatures of God; whereof those which they thought were good to them, they esteemed the Angels of God, and those they thought would hurt them, they called Evill Angels, or Evill Spirits; such as was the Spirit of Python, and the Spirits of Mad-men, of Lunatiques, and Epileptiques: For they esteemed such as were troubled with such diseases, Daemoniaques.

But if we consider the places of the Old Testament where Angels are mentioned, we shall find, that in most of them, there can nothing else be

understood by the word Angel, but some image raised (supernaturally) in the fancy, to signifie the presence of God in the execution of some supernaturall work; and therefore in the rest, where their nature is not exprest, it may be understood in the same manner.

For we read Gen. 16. that the same apparition is called, not onely an Angel, but God; where that which (verse 7.) is called the Angel of the Lord, in the tenth verse, saith to Agar, “I will multiply thy seed exceedingly;” that is, speaketh in the person of God. Neither was this apparition a Fancy figured, but a Voice. By which it is manifest, that Angel signifieth there, nothing but God himself, that caused Agar supernaturally to apprehend a voice supernaturall, testifying Gods speciall presence there. Why therefore may not the Angels that appeared to Lot, and are called Gen. 19.13. Men; and to whom, though they were but two, Lot speaketh (ver. 18.) as but one, and that one, as God, (for the words are, “Lot said unto them, Oh not so my Lord”) be understood of images of men, supernaturally formed in the Fancy; as well as before by Angel was understood a fancied Voice? When the Angel called to Abraham out of heaven, to stay his hand (Gen. 22.11.) from slaying Isaac, there was no Apparition, but a Voice; which neverthelesse was called properly enough a Messenger, or Angel of God, because it declared Gods will supernaturally, and saves the labour of supposing any permanent Ghosts. The Angels which Jacob saw on the Ladder of Heaven (Gen. 28.12.) were a Vision of his sleep; therefore onely Fancy, and a Dream; yet being supernaturall, and signs of Gods Speciall presence, those apparitions are not improperly called Angels. The same is to be understood (Gen.31.11.) where Jacob saith thus, “The Angel of the Lord appeared to mee in my sleep.” For an apparition made to a man in his sleep, is that which all men call a Dreame, whether such Dreame be naturall, or supernaturall: and that which there Jacob calleth an Angel, was God himselfe; for the same Angel saith (verse 13.) “I am the God of Bethel.”

Also (Exod.14.9.) the Angel that went before the Army of Israel to the Red Sea, and then came behind it, is (verse 19.) the Lord himself; and he appeared not in the form of a beautifull man, but in form (by day) of a Pillar Of Cloud and (by

night) in form of a Pillar Of Fire; and yet this Pillar was all the apparition, and Angel promised to Moses (Exod. 14.9.) for the Armies guide: For this cloudy pillar, is said, to have descended, and stood at the dore of the Tabernacle, and to have talked with Moses.

There you see Motion, and Speech, which are commonly attributed to Angels, attributed to a Cloud, because the Cloud served as a sign of Gods presence; and was no lesse an Angel, then if it had had the form of a Man, or Child of never so great beauty; or Wings, as usually they are painted, for the false instruction of common people. For it is not the shape; but their use, that makes them Angels. But their use is to be significations of Gods presence in supernaturall operations; As when Moses (Exod. 33.14.) had desired God to goe along with the Campe, (as he had done alwaies before the making of the Golden Calfe,) God did not answer, “I will goe,” nor “I will send an Angel in my stead;” but thus, “my presence shall goe with thee.”

To mention all the places of the Old Testament where the name of Angel is found, would be too long. Therefore to comprehend them all at once, I say, there is no text in that part of the Old Testament, which the Church of England holdeth for Canonically, from which we can conclude, there is, or hath been created, any permanent thing (understood by the name of Spirit or Angel,) that hath not quantity; and that may not be, by the understanding divided; that is to say, considered by parts; so as one part may bee in one place, and the next part in the next place to it; and, in summe, which is not (taking Body for that, which is somewhat, or some where) Corporeall; but in every place, the sense will bear the interpretation of Angel, for Messenger; as John Baptist is called an Angel, and Christ the Angel of the Covenant; and as (according to the same Analogy) the Dove, and the Fiery Tongues, in that they were signes of Gods speciall presence, might also be called Angels. Though we find in Daniel two names of Angels, Gabriel, and Michael; yet is cleer out of the text it selfe, (Dan. 12.1) that by Michael is meant Christ, not as an Angel, but as a Prince: and that Gabriel (as the like apparitions made to other holy men in their sleep) was nothing but a

supernaturall phantasme, by which it seemed to Daniel, in his dream, that two Saints being in talke, one of them said to the other, “Gabriel, let us make this man understand his Vision:” For God needeth not, to distinguish his Celestiall servants by names, which are usefull onely to the short memories of Mortalls. Nor in the New Testament is there any place, out of which it can be proved, that Angels (except when they are put for such men, as God hath made the Messengers, and Ministers of his word, or works) are things permanent, and withall incorporeall. That they are permanent, may bee gathered from the words of our Saviour himselfe, (Mat. 25.41.) where he saith, it shall be said to the wicked in the last day, “Go ye cursed into everlasting fire prepared for the Devil and his Angels:” which place is manifest for the permanence of Evill Angels, (unlesse wee might think the name of Devill and his Angels may be understood of the Churches Adversaries and their Ministers;) but then it is repugnant to their Immateriality; because Everlasting fire is no punishment to impatible substances, such as are all things Incorporeall. Angels therefore are not thence proved to be Incorporeall. In like manner where St. Paul sayes (1 Cor. 6.3.) “Knew ye not that wee shall judge the Angels?” And (2 Pet. 2.4.) “For if God spared not the Angels that sinned, but cast them down into Hell.” And (Jude 1,6.) “And the Angels that kept not their first estate, but left their owne habitation, hee hath reserved in everlasting chaines under darknesse unto the Judgement of the last day;” though it prove the Permanence of Angelicall nature, it confirmeth also their Materiality. And (Mat. 22.30.) In the resurrection men doe neither marry, nor give in marriage, but are as the Angels of God in heaven:” but in the resurrection men shall be Permanent, and not Incorporeall; so therefore also are the Angels.

There be divers other places out of which may be drawn the like conclusion. To men that understand the signification of these words, Substance, and Incorporeall; as Incorporeall is taken not for subtile body, but for Not Body, they imply a contradiction: insomuch as to say, an Angel, or Spirit is (in that sense) an Incorporeall Substance, is to say in effect, there is no Angel nor Spirit at all. Considering therefore the signification of the word Angel in the Old Testament,

and the nature of Dreams and Visions that happen to men by the ordinary way of Nature; I was enclined to this opinion, that Angels were nothing but supernaturall apparitions of the Fancy, raised by the speciall and extraordinary operation of God, thereby to make his presence and commandements known to mankind, and chiefly to his own people. But the many places of the New Testament, and our Saviours own words, and in such texts, wherein is no suspicion of corruption of the Scripture, have extorted from my feeble Reason, an acknowledgement, and beleef, that there be also Angels substantiall, and permanent. But to beleieve they be in no place, that is to say, no where, that is to say, nothing, as they (though indirectly) say, that will have them Incorporeall, cannot by Scripture bee evinced.

Inspiration What

On the signification of the word Spirit, dependeth that of the word INSPIRATION; which must either be taken properly; and then it is nothing but the blowing into a man some thin and subtile aire, or wind, in such manner as a man filleth a bladder with his breath; or if Spirits be not corporeal, but have their existence only in the fancy, it is nothing but the blowing in of a Phantasme; which is improper to say, and impossible; for Phantasmes are not, but only seem to be somewhat. That word therefore is used in the Scripture metaphorically onely: As (Gen. 2.7.) where it is said, that God Inspired into man the breath of life, no more is meant, then that God gave unto him vitall motion. For we are not to think that God made first a living breath, and then blew it into Adam after he was made, whether that breath were reall, or seeming; but only as it is (Acts 17.25.) “that he gave him life and breath;” that is, made him a living creature. And where it is said (2 Tim. 3.16.) “all Scripture is given by Inspiration from God,” speaking there of the Scripture of the Old Testament, it is an easie metaphor, to signifie, that God enclined the spirit or mind of those Writers, to write that which should be usefull, in teaching, reproving, correcting, and instructing men in the way of righteous

living. But where St. Peter (2 Pet. 1.21.) saith, that “Prophecy came not in old time by the will of man, but the holy men of God spake as they were moved by the Holy Spirit,” by the Holy Spirit, is meant the voice of God in a Dream, or Vision supernaturall, which is not Inspiration; Nor when our Saviour breathing on his Disciples, said, “Receive the Holy Spirit,” was that Breath the Spirit, but a sign of the spirituall graces he gave unto them. And though it be said of many, and of our Saviour himself, that he was full of the Holy Spirit; yet that Fulnesse is not to be understood for Infusion of the substance of God, but for accumulation of his gifts, such as are the gift of sanctity of life, of tongues, and the like, whether attained supernaturally, or by study and industry; for in all cases they are the gifts of God. So likewise where God sayes (Joel 2.28.) “I will powre out my Spirit upon all flesh, and your Sons and your Daughters shall prophecy, your Old men shall dream Dreams, and your Young men shall see Visions,” wee are not to understand it in the proper sense, as if his Spirit were like water, subject to effusion, or infusion; but as if God had promised to give them Propheticall Dreams, and Visions. For the proper use of the word Infused, in speaking of the graces of God, is an abuse of it; for those graces are Vertues, not Bodies to be carryed hither and thither, and to be powred into men, as into barrels.

In the same manner, to take Inspiration in the proper sense, or to say that Good Spirits entred into men to make them prophecy, or Evill Spirits into those that became Phrenetique, Lunatique, or Epileptique, is not to take the word in the sense of the Scripture; for the Spirit there is taken for the power of God, working by causes to us unknown. As also (Acts 2.2.) the wind, that is there said to fill the house wherein the Apostles were assembled on the day of Pentecost, is not to be understood for the Holy Spirit, which is the Deity it self; but for an Externall sign of Gods speciall working on their hearts, to effect in them the internall graces, and holy vertues hee thought requisite for the performance of their Apostleship.

CHAPTER XXXV. OF THE SIGNIFICATION IN SCRIPTURE OF KINGDOME OF GOD, OF

HOLY, SACRED, AND SACRAMENT

Kingdom Of God Taken By Divines Metaphorically But In The Scriptures

Properly

The Kingdome of God in the Writings of Divines, and specially in Sermons, and Treatises of Devotion, is taken most commonly for Eternall Felicity, after this life, in the Highest Heaven, which they also call the Kingdome of Glory; and sometimes for (the earnest of that felicity) Sanctification, which they terme the Kingdome of Grace, but never for the Monarchy, that is to say, the Sovereign Power of God over any Subjects acquired by their own consent, which is the proper signification of Kingdome.

To the contrary, I find the KINGDOME OF GOD, to signifie in most places of Scripture, a Kingdome Properly So Named, constituted by the Votes of the People of Israel in peculiar manner; wherein they chose God for their King by Covenant made with him, upon Gods promising them the possession of the land of Canaan; and but seldom metaphorically; and then it is taken for Dominion Over Sinne; (and only in the New Testament;) because such a Dominion as that, every Subject shall have in the Kingdome of God, and without prejudice to the Sovereign.

From the very Creation, God not only reigned over all men Naturally by his might; but also had Peculiar Subjects, whom he commanded by a Voice, as one man speaketh to another. In which manner he Reigned over Adam, and gave him

commandement to abstaine from the tree of cognizance of Good and Evill; which when he obeyed not, but tasting thereof, took upon him to be as God, judging between Good and Evill, not by his Creators commandement, but by his own sense, his punishment was a privation of the estate of Eternall life, wherein God had at first created him: And afterwards God punished his posterity, for their vices, all but eight persons, with an universall deluge; And in these eight did consist the then Kingdome Of God.

The Originall Of The Kingdome Of God

After this, it pleased God to speak to Abraham, and (Gen. 17.7,8.) to make a Covenant with him in these words, “I will establish my Covenant between me, and thee, and thy seed after thee in their generations, for an everlasting Covenant, to be a God to thee, and to thy seed after thee; And I will give unto thee, and to thy seed after thee, the land wherein thou art a stranger, all the land of Canaan for an everlasting possession.” And for a memoriall, and a token of this Covenant, he ordaineth (verse 11.) the Sacrament of Circumcision. This is it which is called the Old Covenant, or Testament; and containeth a Contract between God and Abraham; by which Abraham obligeth himself, and his posterity, in a peculiar manner to be subject to Gods positive Law; for to the Law Morall he was obliged before, as by an Oath of Allegiance. And though the name of King be not yet given to God, nor of Kingdome to Abraham and his seed; yet the thing is the same; namely, an Institution by pact, of Gods peculiar Sovereignty over the seed of Abraham; which in the renewing of the same Covenant by Moses, at Mount Sinai, is expressly called a peculiar Kingdome of God over the Jews: and it is of Abraham (not of Moses) St. Paul saith (Rom. 4.11.) that he is the “Father of the Faithfull,” that is, of those that are loyall, and doe not violate their Allegiance sworn to God, then by Circumcision, and afterwards in the New Covenant by Baptisme.

That The Kingdome Of God Is Properly His Civill Sovereignty Over

A Peculiar People By Pact

This Covenant, at the Foot of Mount Sinai, was renewed by Moses (Exod. 19.5.) where the Lord commandeth Moses to speak to the people in this manner, “If you will obey my voice indeed, and keep my Covenant, then yee shall be a peculiar people to me, for all the Earth is mine; and yee shall be unto me a Sacerdotall Kingdome, and an holy Nation.” For a “Peculiar people” the vulgar Latine hath, *Peculium De Cunctis Populis*: the English translation made in the beginning of the Reign of King James, hath, a “Peculiar treasure unto me above all Nations;” and the Geneva French, “the most precious Jewel of all Nations.” But the truest Translation is the first, because it is confirmed by St. Paul himself (Tit. 2.14.) where he saith, alluding to that place, that our blessed Saviour “gave himself for us, that he might purifie us to himself, a peculiar (that is, an extraordinary) people:” for the word is in the Greek *periousios*, which is opposed commonly to the word *epiousios*: and as this signifieth Ordinary, Quotidian, or (as in the Lords Prayer) Of Daily Use; so the other signifieth that which is Overplus, and Stored Up, and Enjoyed In A Speciall Manner; which the Latines call *Peculium*; and this meaning of the place is confirmed by the reason God rendereth of it, which followeth immediately, in that he addeth, “For all the Earth is mine,” as if he should say, “All the Nations of the world are mine;” but it is not so that you are mine, but in a Speciall Manner: For they are all mine, by reason of my Power; but you shall be mine, by your own Consent, and Covenant; which is an addition to his ordinary title, to all nations.

The same is again confirmed in expresse words in the same Text, “Yee shall be to me a Sacerdotall Kingdome, and an holy Nation.” The Vulgar Latine hath it, *Regnum Sacerdotale*, to which agreeth the Translation of that place (1 Pet. 2.9.) *Sacerdotium Regale*, A Regal Priesthood; as also the Institution it self, by which

no man might enter into the Sanctum Sanctorum, that is to say, no man might enquire Gods will immediately of God himselfe, but onely the High Priest. The English Translation before mentioned, following that of Geneva, has, “a Kingdome of Priests;” which is either meant of the succession of one High Priest after another, or else it accordeth not with St. Peter, nor with the exercise of the High Priesthood; For there was never any but the High Priest onely, that was to informe the People of Gods Will; nor any Convocation of Priests ever allowed to enter into the Sanctum Sanctorum.

Again, the title of a Holy Nation confirmes the same: For Holy signifies, that which is Gods by speciall, not by generall Right. All the Earth (as is said in the text) is Gods; but all the Earth is not called Holy, but that onely which is set apart for his especiall service, as was the Nation of the Jews. It is therefore manifest enough by this one place, that by the Kingdome of God, is properly meant a Common-wealth, instituted (by the consent of those which were to be subject thereto) for their Civill Government, and the regulating of their behaviour, not onely towards God their King, but also towards one another in point of justice, and towards other Nations both in peace and warre; which properly was a Kingdome, wherein God was King, and the High priest was to be (after the death of Moses) his sole Viceroy, or Lieutenant.

But there be many other places that clearly prove the same. As first (1 Sam. 8.7.) when the Elders of Israel (grieved with the corruption of the Sons of Samuel) demanded a King, Samuel displeased therewith, prayed unto the Lord; and the Lord answering said unto him, “Hearken unto the voice of the People, for they have not rejected thee, but they have rejected me, that I should not reign over them.” Out of which it is evident, that God himself was then their King; and Samuel did not command the people, but only delivered to them that which God from time to time appointed him.

Again, (1 Sam. 12.12.) where Samuel saith to the People, “When yee saw that Nahash King of the Children of Ammon came against you, ye said unto me, Nay, but a King shall reign over us, when the Lord your God was your King:” It is

manifest that God was their King, and governed the Civill State of their Commonwealth.

And after the Israelites had rejected God, the Prophets did foretell his restitution; as (Isaiah 24.23.) “Then the Moon shall be confounded, and the Sun ashamed when the Lord of Hosts shall reign in Mount Zion, and in Jerusalem;” where he speaketh expressly of his Reign in Zion, and Jerusalem; that is, on Earth. And (Micah 4.7.) “And the Lord shall reign over them in Mount Zion:” This Mount Zion is in Jerusalem upon the Earth. And (Ezek. 20.33.) “As I live, saith the Lord God, surely with a mighty hand, and a stretched out arme, and with fury powred out, I wil rule over you; and (verse 37.) I will cause you to passe under the rod, and I will bring you into the bond of the Covenant;” that is, I will reign over you, and make you to stand to that Covenant which you made with me by Moses, and brake in your rebellion against me in the days of Samuel, and in your election of another King.

And in the New testament, the Angel Gabriel saith of our Saviour (Luke 1.32,33) “He shall be great, and be called the Son of the Most High, and the Lord shall give him the throne of his Father David; and he shall reign over the house of Jacob for ever; and of his Kingdome there shall be no end.” This is also a Kingdome upon Earth; for the claim whereof, as an enemy to Caesar, he was put to death; the title of his crosse, was, Jesus of Nazareth, King of the Jews; hee was crowned in scorn with a crown of Thornes; and for the proclaiming of him, it is said of the Disciples (Acts 17.7.) “That they did all of them contrary to the decrees of Caesar, saying there was another King, one Jesus. The Kingdome therefore of God, is a reall, not a metaphoricall Kingdome; and so taken, not onely in the Old Testament, but the New; when we say, “For thine is the Kingdome, the Power, and Glory,” it is to be understood of Gods Kingdome, by force of our Covenant, not by the Right of Gods Power; for such a Kingdome God alwaies hath; so that it were superfluous to say in our prayer, “Thy Kingdome come,” unlesse it be meant of the Restauration of that Kingdome of God by Christ, which by revolt of the Israelites had been interrupted in the election of

Saul. Nor had it been proper to say, “The Kingdome of Heaven is at hand,” or to pray, “Thy Kingdome come,” if it had still continued.

There be so many other places that confirm this interpretation, that it were a wonder there is no greater notice taken of it, but that it gives too much light to Christian Kings to see their right of Ecclesiastical Government. This they have observed, that in stead of a Sacerdotall Kingdome, translate, a Kingdome of Priests: for they may as well translate a Royall Priesthood, (as it is in St. Peter) into a Priesthood of Kings. And whereas, for a Peculiar People, they put a Pretious Jewel, or Treasure, a man might as well call the speciall Regiment, or Company of a Generall, the Generalls pretious Jewel, or his Treasure.

In short, the Kingdome of God is a Civill Kingdome; which consisted, first in the obligation of the people of Israel to those Laws, which Moses should bring unto them from Mount Sinai; and which afterwards the High Priest of the time being, should deliver to them from before the Cherubins in the Sanctum Sanctorum; and which kingdome having been cast off, in the election of Saul, the Prophets foretold, should be restored by Christ; and the Restauration whereof we daily pray for, when we say in the Lords Prayer, “Thy Kingdome come;” and the Right whereof we acknowledge, when we adde, “For thine is the Kingdome, the Power, and Glory, for ever and ever, Amen;” and the Proclaiming whereof, was the Preaching of the Apostles; and to which men are prepared, by the Teachers of the Gospel; to embrace which Gospel, (that is to say, to promise obedience to Gods government) is, to bee in the Kingdome of Grace, because God hath gratis given to such the power to bee the subjects (that is, Children) of God hereafter, when Christ shall come in Majesty to judge the world, and actually to govern his owne people, which is called the Kingdome of Glory. If the Kingdome of God (called also the Kingdome of Heaven, from the gloriousnesse, and admirable height of that throne) were not a Kingdome which God by his Lieutenant, or Vicars, who deliver his Commandements to the people, did exercise on Earth; there would not have been so much contention, and warre, about who it is, by

whom God speaketh to us; neither would many Priests have troubled themselves with Spirituall Jurisdiction, nor any King have denied it them.

Out of this literall interpretation of the Kingdome of God, ariseth also the true interpretation of the word HOLY. For it is a word, which in Gods Kingdome answereth to that, which men in their Kingdomes use to call Publique, or the Kings.

The King of any Countrey is the Publique Person, or Representative of all his own Subjects. And God the King of Israel was the Holy One of Israel. The Nation which is subject to one earthly Sovereign, is the Nation of that Sovereign, that is, of the Publique Person. So the Jews, who were Gods Nation, were called (Exod. 19.6.) “a Holy Nation.” For by Holy, is alwaies understood, either God himselfe, or that which is Gods in propriety; as by Publique is alwaies meant, either the Person of the Common-wealth it self, or something that is so the Common-wealths, as no private person can claim any propriety therein.

Therefore the Sabbath (Gods day) is a Holy Day; the Temple, (Gods house) a Holy House; Sacrifices, Tithes, and Offerings (Gods tribute) Holy Duties; Priests, Prophets, and anointed Kings, under Christ (Gods ministers) Holy Men; The Coelestiall ministring Spirits (Gods Messengers) Holy Angels; and the like: and wheresoever the word Holy is taken properly, there is still something signified of Propriety, gotten by consent. In saying “Hallowed be thy name,” we do but pray to God for grace to keep the first Commandement, of “having no other Gods but Him.” Mankind is Gods Nation in propriety: but the Jews only were a Holy Nation. Why, but because they became his Propriety by covenant.

Sacred What

And the word Profane, is usually taken in the Scripture for the same with Common; and consequently their contraries, Holy, and Proper, in the Kingdome of God must be the same also. But figuratively, those men also are called Holy,

that led such godly lives, as if they had forsaken all worldly designes, and wholly devoted, and given themselves to God. In the proper sense, that which is made Holy by Gods appropriating or separating it to his own use, is said to be Sanctified by God, as the Seventh day in the fourth Commandement; and as the Elect in the New Testament were said to bee Sanctified, when they were endued with the Spirit of godlinesse. And that which is made Holy by the dedication of men, and given to God, so as to be used onely in his publique service, is called also SACRED, and said to be consecrated, as Temples, and other Houses of Publique Prayer, and their Utensils, Priests, and Ministers, Victimes, Offerings, and the externall matter of Sacraments.

Degrees of Sanctity

Of Holinesse there be degrees: for of those things that are set apart for the service of God, there may bee some set apart again, for a neerer and more especial service. The whole Nation of the Israelites were a people Holy to God; yet the tribe of Levi was amongst the Israelites a Holy tribe; and amongst the Levites, the Priests were yet more Holy; and amongst the Priests, the High Priest was the most Holy. So the Land of Judea was the Holy Land; but the Holy City wherein God was to be worshipped, was more Holy; and again, the Temples more Holy than the City; and the Sanctum Sanctorum more Holy than the rest of the Temple.

Sacrament

A SACRAMENT, is a separation of some visible thing from common use; and a consecration of it to Gods service, for a sign, either of our admission into the Kingdome of God, to be of the number of his peculiar people, or for a Commemoration of the same. In the Old Testament, the sign of Admission was

Circumcision; in the New Testament, Baptisme. The Commemoration of it in the Old Testament, was the Eating (at a certain time, which was Anniversary) of the Paschall Lamb; by which they were put in mind of the night wherein they were delivered out of their bondage in Egypt; and in the New Testament, the celebrating of the Lords Supper; by which, we are put in mind, of our deliverance from the bondage of sin, by our Blessed Saviours death upon the crosse. The Sacraments of Admission, are but once to be used, because there needs but one Admission; but because we have need of being often put in mind of our deliverance, and of our Alleageance, The Sacraments of Commemoration have need to be reiterated. And these are the principall Sacraments, and as it were the solemne oathes we make of our Alleageance. There be also other Consecrations, that may be called Sacraments, as the word implyeth onely Consecration to Gods service; but as it implies an oath, or promise of Alleageance to God, there were no other in the Old Testament, but Circumcision, and the Passover; nor are there any other in the New Testament, but Baptisme, and the Lords Supper.

CHAPTER XXXVI. OF THE WORD OF GOD, AND OF PROPHETS

Word What

When there is mention of the Word of God, or of Man, it doth not signifie a part of Speech, such as Grammarians call a Noun, or a Verb, or any simple voice, without a contexture with other words to make it significative; but a perfect Speech or Discourse, whereby the speaker Affirmeth, Denieth, Commandeth, Promiseth, Threateneth, Wisheth, or Interrogateth. In which sense it is not Vocabulum, that signifies a Word; but Sermo, (in Greek Logos) that is some Speech, Discourse, or Saying.

The Words Spoken By God And Concerning God, Both Are Called Gods Word

In Scripture

Again, if we say the Word of God, or of Man, it may bee understood sometimes of the Speaker, (as the words that God hath spoken, or that a Man hath spoken): In which sense, when we say, the Gospel of St. Matthew, we understand St. Matthew to be the Writer of it: and sometimes of the Subject: In which sense, when we read in the Bible, “The words of the days of the Kings of Israel, or Judah,” ’tis meant, that the acts that were done in those days, were the Subject of those Words; And in the Greek, which (in the Scripture) retaineth many Hebraismes, by the Word of God is oftentimes meant, not that which is spoken by God, but concerning God, and his government; that is to say, the Doctrine of Religion: Insomuch, as it is all one, to say Logos Theou, and Theologia; which is, that

Doctrine which wee usually call Divinity, as is manifest by the places following (Acts 13.46.) “Then Paul and Barnabas waxed bold, and said, It was necessary that the Word of God should first have been spoken to you, but seeing you put it from you, and judge your selves unworthy of everlasting life, loe, we turn to the Gentiles.” That which is here called the Word of god, was the Doctrine of Christian Religion; as it appears evidently by that which goes before. And (Acts 5.20.) where it is said to the Apostles by an Angel, “Go stand and speak in the Temple, all the Words of this life;” by the Words of this life, is meant, the Doctrine of the Gospel; as is evident by what they did in the Temple, and is expressed in the last verse of the same Chap. “Daily in the Temple, and in every house they ceased not to teach and preach Christ Jesus:” In which place it is manifest, that Jesus Christ was the subject of this Word of Life; or (which is all one) the subject of the Words of this Life Eternall, that our saviour offered them. So (Acts 15.7.) the Word of God, is called the Word of the Gospel, because it containeth the Doctrine of the Kingdome of Christ; and the same Word (Rom. 10.8,9.) is called the Word of Faith; that is, as is there expressed, the Doctrine of Christ come, and raised from the dead. Also (Mat. 13. 19.) “When any one heareth the Word of the Kingdome;” that is, the Doctrine of the Kingdome taught by Christ. Again, the same Word, is said (Acts 12. 24.) “to grow and to be multiplied;” which to understand of the Evangelicall Doctrine is easie, but of the Voice, or Speech of God, hard and strange. In the same sense the Doctrine of Devils, signifieth not the Words of any Devill, but the Doctrine of Heathen men concerning Daemons, and those Phantasms which they worshipped as Gods. (1 Tim. 4.1.)

Considering these two significations of the WORD OF GOD, as it is taken in Scripture, it is manifest in this later sense (where it is taken for the Doctrine of the Christian Religion,) that the whole scripture is the Word of God: but in the former sense not so. For example, though these words, “I am the Lord thy God, &c.” to the end of the Ten Commandements, were spoken by God to Moses; yet the Preface, “God spake these words and said,” is to be understood for the Words of

him that wrote the holy History. The Word of God, as it is taken for that which he hath spoken, is understood sometimes Properly, sometimes Metaphorically. Properly, as the words, he hath spoken to his Prophets; Metaphorically, for his Wisdome, Power, and eternall Decree, in making the world; in which sense, those Fiats, “Let there be light,” “Let there be a firmament,” “Let us make man,” &c. (Gen. 1.) are the Word of God. And in the same sense it is said (John 1.3.) “All things were made by it, and without it was nothing made that was made; And (Heb. 1.3.) “He upholdeth all things by the word of his Power;” that is, by the Power of his Word; that is, by his Power; and (Heb. 11.3.) “The worlds were framed by the Word of God;” and many other places to the same sense: As also amongst the Latines, the name of Fate, which signifieth properly The Word Spoken, is taken in the same sense.

Secondly, For The Effect Of His Word

Secondly, for the effect of his Word; that is to say, for the thing it self, which by his Word is Affirmed, Commanded, Threatned, or Promised; as (Psalm 105.19.) where Joseph is said to have been kept in prison, “till his Word was come;” that is, till that was come to passe which he had (Gen. 40.13.) foretold to Pharaohs Butler, concerning his being restored to his office: for there by His Word Was Come, is meant, the thing it self was come to passe. So also (1 King. 18.36.) Elijah saith to God, “I have done all these thy Words,” in stead of “I have done all these things at thy Word,” or commandement: and (Jer. 17.15.) “Where is the Word of the Lord,” is put for, “Where is the Evill he threatened:” And (Ezek. 12.28.) “There shall none of my Words be prolonged any more:” by “Words” are understood those Things, which God promised to his people. And in the New Testament (Mat. 24.35.) “heaven and earth shal pass away, but my Words shall not pass away;” that is, there is nothing that I have promised or foretold, that shall not come to passe. And in this sense it is, that St. John the Evangelist, and, I

think, St. John onely calleth our Saviour himself as in the flesh “the Word of God (as Joh. 1.14.) the Word was made Flesh;” that is to say, the Word, or Promise that Christ should come into the world, “who in the beginning was with God;” that is to say, it was in the purpose of God the Father, to send God the Son into the world, to enlighten men in the way of Eternall life, but it was not till then put in execution, and actually incarnate; So that our Saviour is there called “the Word,” not because he was the promise, but the thing promised. They that taking occasion from this place, doe commonly call him the Verbe of God, do but render the text more obscure. They might as well term him the Nown of God: for as by Nown, so also by Verbe, men understand nothing but a part of speech, a voice, a sound, that neither affirms, nor denies, nor commands, nor promiseth, nor is any substance corporeall, or spirituall; and therefore it cannot be said to bee either God, or Man; whereas our Saviour is both. And this Word which St. John in his Gospel saith was with God, is (in his 1 Epistle, verse 1.) called “the Word of Life;” and (verse 2.) “The eternall life, which was with the Father:” so that he can be in no other sense called the Word, then in that, wherein he is called Eternall life; that is, “he that hath procured us Eternall life,” by his comming in the flesh. So also (Apocalypse 19.13.) the Apostle speaking of Christ, clothed in a garment dipt in bloud, saith; his name is “the Word of God;” which is to be understood, as if he had said his name had been, “He that was come according to the purpose of God from the beginning, and according to his Word and promises delivered by the Prophets.” So that there is nothing here of the Incarnation of a Word, but of the Incarnation of God the Son, therefore called the Word, because his Incarnation was the Performance of the Promise; In like manner as the Holy Ghost is called The Promise. (Acts 1.4. Luke 24.49.)

Thirdly, For The Words Of Reason And Equity

There are also places of the Scripture, where, by the Word of God, is signified such Words as are consonant to reason, and equity, though spoken sometimes neither by prophet, nor by a holy man. For Pharaoh Necho was an Idolator; yet his Words to the good King Josiah, in which he advised him by Messengers, not to oppose him in his march against Carchemish, are said to have proceeded from the mouth of God; and that Josiah not hearkning to them, was slain in the battle; as is to be read 2 Chron. 35. vers. 21,22,23. It is true, that as the same History is related in the first book of Esdras, not Pharaoh, but Jeremiah spake these words to Josiah, from the mouth of the Lord. But wee are to give credit to the Canonically Scripture, whatsoever be written in the Apocrypha.

The Word of God, is then also to be taken for the Dictates of reason, and equity, when the same is said in the Scriptures to bee written in mans heart; as Psalm 36.31. Jerem. 31.33. Deut.30.11, 14. and many other like places.

Divers Acceptions Of The Word Prophet

The name of PROPHET, signifieth in Scripture sometimes Prolocutor; that is, he that speaketh from God to Man, or from man to God: And sometimes Praedictor, or a foreteller of things to come; And sometimes one that speaketh incoherently, as men that are distracted. It is most frequently used in the sense of speaking from God to the People. So Moses, Samuel, Elijah, Isaiah, Jeremiah, and others were Prophets. And in this sense the High Priest was a Prophet, for he only went into the Sanctum Sanctorum, to enquire of God; and was to declare his answer to the people. And therefore when Caiphas said, it was expedient that one man should die for the people, St. John saith (cha.51.) that “He spake not this of himselfe, but being High Priest that year, he prophesied that one man should dye for the nation.” Also they that in Christian Congregations taught the people, (1 Cor. 14.3.) are said to Prophecy. In the like sense it is, that God saith to Moses (Exod. 4.16.) concerning Aaron, “He shall be thy Spokes-man to the People; and he shall

be to thee a mouth, and thou shalt be to him in stead of God;" that which here is Spokesman, is (chap.7.1.) interpreted Prophet; "See (saith God) I have made thee a God to Pharaoh, and Aaron thy Brother shall be thy Prophet." In the sense of speaking from man to God, Abraham is called a Prophet (Genes. 20.7.) where God in a Dream speaketh to Abimelech in this manner, "Now therefore restore the man his wife, for he is a Prophet, and shall pray for thee;" whereby may be also gathered, that the name of Prophet may be given, not unproperly to them that in Christian Churches, have a Calling to say publique prayers for the Congregation. In the same sense, the Prophets that came down from the High place (or Hill of God) with a Psaltery, and a Tabret, and a Pipe, and a Harp (1 Sam. 10.5,6.) and (vers. 10.) Saul amongst them, are said to Prophecy, in that they praised God, in that manner publicquely. In the like sense, is Miriam (Exod. 15.20.) called a Prophetesse. So is it also to be taken (1 Cor. 11.4,5.) where St. Paul saith, "Every man that prayeth or prophecyeth with his head covered, &c. and every woman that prayeth or prophecyeth with her head uncovered: For Prophecy in that place, signifieth no more, but praising God in Psalmes, and Holy Songs; which women might doe in the Church, though it were not lawfull for them to speak to the Congregation. And in this signification it is, that the Poets of the Heathen, that composed Hymnes and other sorts of Poems in the honor of their Gods, were called Vates (Prophets) as is well enough known by all that are versed in the Books of the Gentiles, and as is evident (Tit. 1.12.) where St. Paul saith of the Cretians, that a Prophet of their owne said, they were Liars; not that St. Paul held their Poets for Prophets, but acknowledgeth that the word Prophet was commonly used to signifie them that celebrated the honour of God in Verse

Praediction Of Future Contingents, Not Alwaies Prophecy

When by Prophecy is meant Praediction, or foretelling of future Contingents; not only they were Prophets, who were Gods Spokesmen, and foretold those things to

others, which God had foretold to them; but also all those Imposters, that pretend by the helpe of familiar spirits, or by superstitious divination of events past, from false causes, to foretell the like events in time to come: of which (as I have declared already in the 12. chapter of this Discourse) there be many kinds, who gain in the opinion of the common sort of men, a greater reputation of Prophecy, by one casuall event that may bee but wrested to their purpose, than can be lost again by never so many failings. Prophecy is not an art, nor (when it is taken for Praediction) a constant Vocation; but an extraordinary, and temporary Employment from God, most often of Good men, but sometimes also of the Wicked. The woman of Endor, who is said to have had a familiar spirit, and thereby to have raised a Phantasme of Samuel, and foretold Saul his death, was not therefore a Prophetesse; for neither had she any science, whereby she could raise such a Phantasme; nor does it appear that God commanded the raising of it; but onely guided that Imposture to be a means of Sauls terror and discouragement; and by consequent, of the discomfiture, by which he fell. And for Incoherent Speech, it was amongst the Gentiles taken for one sort of Prophecy, because the Prophets of their Oracles, intoxicated with a spirit, or vapour from the cave of the Pythian Oracle at Delphi, were for the time really mad, and spake like mad-men; of whose loose words a sense might be made to fit any event, in such sort, as all bodies are said to be made of Materia prima. In the Scripture I find it also so taken (1 Sam. 18. 10.) in these words, “And the Evill spirit came upon Saul, and he Prophecyed in the midst of the house.”

The Manner How God Hath Spoken To The Prophets

And although there be so many significations in Scripture of the word Prophet; yet is that the most frequent, in which it is taken for him, to whom God speaketh immediately, that which the Prophet is to say from him, to some other man, or to the people. And hereupon a question may be asked, in what manner God speaketh

to such a Prophet. Can it (may some say) be properly said, that God hath voice and language, when it cannot be properly said, he hath a tongue, or other organs, as a man? The Prophet David argueth thus, “Shall he that made the eye, not see? or he that made the ear, not hear?” But this may be spoken, not (as usually) to signifie Gods nature, but to signifie our intention to honor him. For to See, and Hear, are Honorable Attributes, and may be given to God, to declare (as far as our capacity can conceive) his Almighty power. But if it were to be taken in the strict, and proper sense, one might argue from his making of all parts of mans body, that he had also the same use of them which we have; which would be many of them so uncomely, as it would be the greatest contumely in the world to ascribe them to him. Therefore we are to interpret Gods speaking to men immediately, for that way (whatsoever it be), by which God makes them understand his will: And the wayes whereby he doth this, are many; and to be sought onely in the Holy Scripture: where though many times it be said, that God spake to this, and that person, without declaring in what manner; yet there be again many places, that deliver also the signes by which they were to acknowledge his presence, and commandement; and by these may be understood, how he spake to many of the rest.

To The Extraordinary Prophets Of The Old Testament He Spake

By Dreams, Or Visions

In what manner God spake to Adam, and Eve, and Cain, and Noah, is not expressed; nor how he spake to Abraham, till such time as he came out of his own countrey to Sichem in the land of Canaan; and then (Gen. 12.7.) God is said to have Appeared to him. So there is one way, whereby God made his presence manifest; that is, by an Apparition, or Vision. And again, (Gen. 15.1.) The Word of the Lord came to Abraham in a Vision; that is to say, somewhat, as a sign of

Gods presence, appeared as Gods Messenger, to speak to him. Again, the Lord appeared to Abraham (Gen. 18. 1.) by an apparition of three Angels; and to Abimelech (Gen. 20. 3.) in a dream: To Lot (Gen. 19. 1.) by an apparition of Two Angels: And to Hagar (Gen. 21. 17.) by the apparition of one Angel: And to Abraham again (Gen. 22. 11.) by the apparition of a voice from heaven: And (Gen. 26. 24.) to Isaac in the night; (that is, in his sleep, or by dream): And to Jacob (Gen. 28. 12.) in a dream; that is to say (as are the words of the text) “Jacob dreamed that he saw a ladder, &c.” And (Gen. 32. 1.) in a Vision of Angels: And to Moses (Exod. 3.2.) in the apparition of a flame of fire out of the midst of a bush: And after the time of Moses, (where the manner how God spake immediately to man in the Old Testament, is expressed) hee spake alwaies by a Vision, or by a Dream; as to Gideon, Samuel, Eliah, Elisha, Isaiah, Ezekiel, and the rest of the Prophets; and often in the New Testament, as to Joseph, to St. Peter, to St. Paul, and to St. John the Evangelist in the Apocalypse.

Onely to Moses hee spake in a more extraordinary manner in Mount Sinai, and in the Tabernacle; and to the High Priest in the Tabernacle, and in the Sanctum Sanctorum of the Temple. But Moses, and after him the High Priests were Prophets of a more eminent place, and degree in Gods favour; And God himself in expresse words declareth, that to other Prophets hee spake in Dreams and Visions, but to his servant Moses, in such manner as a man speaketh to his friend. The words are these (Numb. 12. 6,7,8.) “If there be a Prophet among you, I the Lord will make my self known to him in a Vision, and will speak unto him in a Dream. My servant Moses is not so, who is faithfull in all my house; with him I will speak mouth to mouth, even apparently, not in dark speeches; and the similitude of the Lord shall he behold.” And (Exod. 33. 11.) “The Lord spake to Moses face to face, as a man speaketh to his friend.” And yet this speaking of God to Moses, was by mediation of an Angel, or Angels, as appears expressly, Acts 7. ver. 35. and 53. and Gal. 3. 19. and was therefore a Vision, though a more cleer Vision than was given to other Prophets. And conformable hereunto, where God saith (Deut. 13. 1.) “If there arise amongst you a Prophet, or Dreamer of

Dreams,” the later word is but the interpretation of the former. And (Joel 2. 28.) “Your sons and your daughters shall Prophecy; your old men shall dream Dreams, and your young men shall see Visions:” where again, the word Prophecy is expounded by Dream, and Vision. And in the same manner it was, that God spake to Solomon, promising him Wisdome, Riches, and Honor; for the text saith, (1 Kings 3. 15.) “And Solomon awoak, and behold it was a Dream:” So that generally the Prophets extraordinary in the old Testament took notice of the Word of God no otherwise, than from their Dreams, or Visions, that is to say, from the imaginations which they had in their sleep, or in an Extasie; which imaginations in every true Prophet were supernaturall; but in false Prophets were either naturall, or feigned.

The same Prophets were neverthelesse said to speak by the Spirit; as (Zach. 7. 12.) where the Prophet speaking of the Jewes, saith, “They made their hearths hard as Adamant, lest they should hear the law, and the words which the Lord of Hosts hath sent in his Spirit by the former Prophets.” By which it is manifest, that speaking by the Spirit, or Inspiration, was not a particular manner of Gods speaking, different from Vision, when they that were said to speak by the Spirit, were extraordinary Prophets, such as for every new message, were to have a particular Commission, or (which is all one) a new Dream, or Vision.

To Prophets Of Perpetuall Calling, And Supreme, God Spake In The Old Testament From The Mercy Seat, In A Manner Not Expressed In The Scripture. Of Prophets, that were so by a perpetuall Calling in the Old Testament, some were Supreme, and some Subordinate: Supreme were first Moses; and after him the High Priest, every one for his time, as long as the Priesthood was Royall; and after the people of the Jews, had rejected God, that he should no more reign over them, those Kings which submitted themselves to Gods government, were also his chief Prophets; and the High Priests office became Ministeriall. And when God was to be consulted, they put on the holy vestments, and enquired of the Lord, as the King commanded them, and were deprived of their office, when the King thought fit. For King Saul (1 Sam. 13. 9.) commanded the burnt offering to

be brought, and (1 Sam. 14. 18.) he commands the Priest to bring the Ark neer him; and (ver. 19.) again to let it alone, because he saw an advantage upon his enemies. And in the same chapter Saul asketh counsell of God. In like manner King David, after his being anointed, though before he had possession of the Kingdome, is said to “enquire of the Lord” (1 Sam. 23. 2.) whether he should fight against the Philistines at Keilah; and (verse 10.) David commandeth the Priest to bring him the Ephod, to enquire whether he should stay in Keilah, or not. And King Solomon (1 Kings 2. 27.) took the Priesthood from Abiathar, and gave it (verse 35.) to Zadoc. Therefore Moses, and the High Priests, and the pious Kings, who enquired of God on all extraordinary occasions, how they were to carry themselves, or what event they were to have, were all Sovereign Prophets. But in what manner God spake unto them, is not manifest. To say that when Moses went up to God in Mount Sinai, it was a Dream, or Vision, such as other Prophets had, is contrary to that distinction which God made between Moses, and other Prophets, Numb. 12. 6,7,8. To say God spake or appeared as he is in his own nature, is to deny his Infinitenesse, Invisibility, Incomprehensibility. To say he spake by Inspiration, or Infusion of the Holy Spirit, as the Holy Spirit signifieth the Deity, is to make Moses equall with Christ, in whom onely the Godhead (as St. Paul speaketh Col. 2.9.) dwelleth bodily. And lastly, to say he spake by the Holy Spirit, as it signifieth the graces, or gifts of the Holy Spirit, is to attribute nothing to him supernaturall. For God disposeth men to Piety, Justice, Mercy, Truth, Faith, and all manner of Vertue, both Morall, and intellectuall, by doctrine, example, and by severall occasions, naturall, and ordinary.

And as these ways cannot be applyed to God, in his speaking to Moses, at Mount Sinai; so also, they cannot be applyed to him, in his speaking to the High Priests, from the Mercy-Seat. Therefore in what manner God spake to those Sovereign Prophets of the Old Testament, whose office it was to enquire of him, is not intelligible. In the time of the New Testament, there was no Sovereign Prophet, but our Saviour; who was both God that spake, and the Prophet to whom he spake.

To Prophets Of Perpetuall Calling, But Subordinate, God Spake By The Spirit. To subordinate Prophets of perpetuall Calling, I find not any place that proveth God spake to them supernaturall; but onely in such manner, as naturally he inclineth men to Piety, to Beleef, to Righteousnesse, and to other vertues all other Christian Men. Which way, though it consist in Constitution, Instruction, Education, and the occasions and invitements men have to Christian vertues; yet it is truly attributed to the operation of the Spirit of God, or Holy Spirit (which we in our language call the Holy Ghost): For there is no good inclination, that is not of the operation of God. But these operations are not alwaies supernaturall. When therefore a Prophet is said to speak in the Spirit, or by the Spirit of God, we are to understand no more, but that he speaks according to Gods will, declared by the supreme Prophet. For the most common acceptation of the word Spirit, is in the signification of a mans intention, mind, or disposition.

In the time of Moses, there were seventy men besides himself, that Prophecyed in the Campe of the Israelites. In what manner God spake to them, is declared in the 11 of Numbers, verse 25. “The Lord came down in a cloud, and spake unto Moses, and took of the Spirit that was upon him, and gave it to the seventy Elders. And it came to passe, when the Spirit rested upon them, they Prophecyed, and did not cease,” By which it is manifest, first, that their Prophecying to the people, was subservient, and subordinate to the Prophecying of Moses; for that God took of the Spirit of Moses, to put upon them; so that they Prophecyed as Moses would have them: otherwise they had not been suffered to Prophecy at all. For there was (verse 27.) a complaint made against them to Moses; and Joshua would have Moses to have forbidden them; which he did not, but said to Joshua, Bee not jealous in my behalf. Secondly, that the Spirit of God in that place, signifieth nothing but the Mind and Disposition to obey, and assist Moses in the administration of the Government. For if it were meant they had the substantial Spirit of God; that is, the Divine nature, inspired into them, then they had it in no lesse manner than Christ himself, in whom onely the Spirit of God dwelt bodily. It is meant therefore of the Gift and Grace of God, that guided them to co-operate

with Moses; from whom their Spirit was derived. And it appeareth (verse 16.) that, they were such as Moses himself should appoint for Elders and Officers of the People: For the words are, “Gather unto me seventy men, whom thou knowest to be Elders and Officers of the people:” where, “thou knowest,” is the same with “thou appointest,” or “hast appointed to be such.” For we are told before (Exod. 18.) that Moses following the counsell of Jethro his Father-in-law, did appoint Judges, and Officers over the people, such as feared God; and of these, were those Seventy, whom God by putting upon them Moses spirit, inclined to aid Moses in the Administration of the Kingdome: and in this sense the Spirit of God is said (1 Sam. 16. 13, 14.) presently upon the anointing of David, to have come upon David, and left Saul; God giving his graces to him he chose to govern his people, and taking them away from him, he rejected. So that by the Spirit is meant Inclination to Gods service; and not any supernaturall Revelation.

God Sometimes Also Spake By Lots

God spake also many times by the event of Lots; which were ordered by such as he had put in Authority over his people. So wee read that God manifested by the Lots which Saul caused to be drawn (1 Sam. 14. 43.) the fault that Jonathan had committed, in eating a honey-comb, contrary to the oath taken by the people. And (Josh. 18. 10.) God divided the land of Canaan amongst the Israelite, by the “lots that Joshua did cast before the Lord in Shiloh.” In the same manner it seemeth to be, that God discovered (Joshua 7.16., &c.) the crime of Achan. And these are the wayes whereby God declared his Will in the Old Testament.

All which ways he used also in the New Testament. To the Virgin Mary, by a Vision of an Angel: To Joseph in a Dream: again to Paul in the way to Damascus in a Vision of our Saviour: and to Peter in the Vision of a sheet let down from heaven, with divers sorts of flesh, of clean and unclean, beasts; and in prison, by Vision of an Angel: And to all the Apostles, and Writers of the New Testament,

by the graces of his Spirit; and to the Apostles again (at the choosing of Matthias in the place of Judas Iscariot) by lot.

Every Man Ought To Examine The Probability Of A Pretended Prophets

Calling

Seeing then all Prophecy supposeth Vision, or Dream, (which two, when they be naturall, are the same,) or some especiall gift of God, so rarely observed in mankind, as to be admired where observed; and seeing as well such gifts, as the most extraordinary Dreams, and Visions, may proceed from God, not onely by his supernaturall, and immediate, but also by his naturall operation, and by mediation of second causes; there is need of Reason and Judgement to discern between naturall, and supernaturall Gifts, and between naturall, and supernaturall Visions, or Dreams. And consequently men had need to be very circumspect, and wary, in obeying the voice of man, that pretending himself to be a Prophet, requires us to obey God in that way, which he in Gods name telleth us to be the way to happinesse. For he that pretends to teach men the way of so great felicity, pretends to govern them; that is to say, to rule, and reign over them; which is a thing, that all men naturally desire, and is therefore worthy to be suspected of Ambition and Imposture; and consequently, ought to be examined, and tryed by every man, before hee yeeld them obedience; unlesse he have yeelded it them already, in the institution of a Common-wealth; as when the Prophet is the Civill Sovereign, or by the Civil Sovereign Authorized. And if this examination of Prophets, and Spirits, were not allowed to every one of the people, it had been to no purpose, to set out the marks, by which every man might be able, to distinguish between those, whom they ought, and those whom they ought not to follow. Seeing therefore such marks are set out (Deut. 13. 1,&c.) to know a Prophet by; and (1 John 4.1.&c.) to know a Spirit by: and seeing there is so much

Prophecy in the Old Testament; and so much Preaching in the New Testament against Prophets; and so much greater a number ordinarily of false Prophets, then of true; every one is to beware of obeying their directions, at their own perill. And first, that there were many more false than true Prophets, appears by this, that when Ahab (1 Kings 22.) consulted four hundred Prophets, they were all false Imposters, but onely one Michaiah. And a little before the time of the Captivity, the Prophets were generally lyars. “The Prophets” (saith the Lord by Jerem. cha. 23. verse 14.) “prophecy Lies in my name. I sent them not, neither have I commanded them, nor spake unto them, they prophecy to you a false Vision, a thing of naught; and the deceit of their heart.” In so much as God commanded the People by the mouth of the Prophet Jeremiah (cha. 23.) not to obey them. “Thus saith the Lord of Hosts, hearken not unto the words of the Prophets, that prophecy to you. They make you vain, they speak a Vision of their own heart, and not out of the mouth of the Lord.”

All Prophecy But Of The Sovereign Prophet Is To Be Examined

By Every Subject

Seeing then there was in the time of the Old Testament, such quarrells amongst the Visionary Prophets, one contesting with another, and asking When departed the Spirit from me, to go to thee? as between Michaiah, and the rest of the four hundred; and such giving of the Lye to one another, (as in Jerem. 23.14.) and such controversies in the New Testament at this day, amongst the Spirituall Prophets: Every man then was, and now is bound to make use of his Naturall Reason, to apply to all Prophecy those Rules which God hath given us, to discern the true from the false. Of which rules, in the Old Testament, one was, conformable doctrine to that which Moses the Sovereign Prophet had taught them; and the other the miraculous power of foretelling what God would bring to passe, as I

have already shown out of Deut. 13. 1. &c. and in the New Testament there was but one onely mark; and that was the preaching of this Doctrine, That Jesus Is The Christ, that is, the King of the Jews, promised in the Old Testament. Whosoever denied that Article, he was a false Prophet, whatsoever miracles he might seem to work; and he that taught it was a true Prophet. For St. John (1 Epist, 4. 2, &c) speaking expressely of the means to examine Spirits, whether they be of God, or not; after he hath told them that there would arise false Prophets, saith thus, “Hereby know ye the Spirit of God. Every Spirit that confesseth that Jesus Christ is come in the flesh, is of God;” that is, is approved and allowed as a Prophet of God: not that he is a godly man, or one of the Elect, for this, that he confesseth, professeth, or preacheth Jesus to be the Christ; but for that he is a Prophet avowed. For God sometimes speaketh by Prophets, whose persons he hath not accepted; as he did by Baalam; and as he foretold Saul of his death, by the Witch of Endor. Again in the next verse, “Every Spirit that confesseth not that Jesus Christ is come in the Flesh, is not of Christ. And this is the Spirit of Antichrist.” So that the rule is perfect on both sides; that he is a true Prophet, which preacheth the Messiah already come, in the person of Jesus; and he a false one that denyeth him come, and looketh for him in some future Imposter, that shall take upon him that honour falsely, whom the Apostle there properly calleth Antichrist. Every man therefore ought to consider who is the Sovereign Prophet; that is to say, who it is, that is Gods Viceregent on earth; and hath next under God, the Authority of Governing Christian men; and to observe for a Rule, that Doctrine, which in the name of God, hee commanded to bee taught; and thereby to examine and try out the truth of those Doctrines, which pretended Prophets with miracles, or without, shall at any time advance: and if they find it contrary to that Rule, to doe as they did, that came to Moses, and complained that there were some that Prophecyed in the Campe, whose Authority so to doe they doubted of; and leave to the Sovereign, as they did to Moses to uphold, or to forbid them, as hee should see cause; and if hee disavow them, then no more to obey their voice; or if he approve them, then to obey them, as men to whom God hath given a part of the Spirit of

their Sovereigne. For when Christian men, take not their Christian Sovereign, for Gods Prophet; they must either take their owne Dreams, for the prophecy they mean to bee governed by, and the tumour of their own hearts for the Spirit of God; or they must suffer themselves to bee lead by some strange Prince; or by some of their fellow subjects, that can bewitch them, by slander of the government, into rebellion, without other miracle to confirm their calling, then sometimes an extraordinary successe, and Impunity; and by this means destroying all laws, both divine, and humane, reduce all Order, Government, and Society, to the first Chaos of Violence, and Civill warre.

CHAPTER XXXVII. OF MIRACLES, AND THEIR USE

A Miracle Is A Work That Causeth Admiration

By Miracles are signified the Admirable works of God: & therefore they are also called Wonders. And because they are for the most part, done, for a signification of his commandement, in such occasions, as without them, men are apt to doubt, (following their private naturall reasoning,) what he hath commanded, and what not, they are commonly in Holy Scripture, called Signes, in the same sense, as they are called by the Latines, Ostenta, and Portenta, from shewing, and fore-signifying that, which the Almighty is about to bring to passe.

And Must Therefore Be Rare, Whereof There Is No Naturall Cause Known

To understand therefore what is a Miracle, we must first understand what works they are, which men wonder at, and call Admirable. And there be but two things which make men wonder at any event: The one is, if it be strange, that is to say, such, as the like of it hath never, or very rarely been produced: The other is, if when it is produced, we cannot imagine it to have been done by naturall means, but onely by the immediate hand of God. But when wee see some possible, naturall cause of it, how rarely soever the like has been done; or if the like have been often done, how impossible soever it be to imagine a naturall means thereof, we no more wonder, nor esteem it for a Miracle.

Therefore, if a Horse, or Cow should speak, it were a Miracle; because both the thing is strange, & the Naturall cause difficult to imagin: So also were it, to see a strange deviation of nature, in the production of some new shape of a living

creature. But when a man, or other Animal, engenders his like, though we know no more how this is done, than the other; yet because 'tis usuall, it is no Miracle. In like manner, if a man be metamorphosed into a stone, or into a pillar, it is a Miracle; because strange: but if a peece of wood be so changed; because we see it often, it is no Miracle: and yet we know no more, by what operation of God, the one is brought to passe, than the other.

The first Rainbow that was seen in the world, was a Miracle, because the first; and consequently strange; and served for a sign from God, placed in heaven, to assure his people, there should be no more an universall destruction of the world by Water. But at this day, because they are frequent, they are not Miracles, neither to them that know their naturall causes, nor to them who know them not. Again, there be many rare works produced by the Art of man: yet when we know they are done; because thereby wee know also the means how they are done, we count them not for Miracles, because not wrought by the immediate hand of God, but by mediation of humane Industry.

That Which Seemeth A Miracle To One Man, May Seem Otherwise To Another

Furthermore, seeing Admiration and Wonder, is consequent to the knowledge and experience, wherewith men are endued, some more, some lesse; it followeth, that the same thing, may be a Miracle to one, and not to another. And thence it is, that ignorant, and superstitious men make great Wonders of those works, which other men, knowing to proceed from Nature, (which is not the immediate, but the ordinary work of God,) admire not at all: As when Ecclipses of the Sun and Moon have been taken for supernaturall works, by the common people; when neverthesse, there were others, could from their naturall causes, have foretold the very hour they should arrive: Or, as when a man, by confederacy, and secret intelligence, getting knowledge of the private actions of an ignorant, unwary man, thereby tells him, what he has done in former time; it seems to him a Miraculous

thing; but amongst wise, and cautelous men, such Miracles as those, cannot easily be done.

The End Of Miracles

Again, it belongeth to the nature of a Miracle, that it be wrought for the procuring of credit to Gods Messengers, Ministers, and Prophets, that thereby men may know, they are called, sent, and employed by God, and thereby be the better inclined to obey them. And therefore, though the creation of the world, and after that the destruction of all living creatures in the universall deluge, were admirable works; yet because they were not done to procure credit to any Prophet, or other Minister of God, they use not to be called Miracles. For how admirable soever any work be, the Admiration consisteth not in that it could be done, because men naturally beleeve the Almighty can doe all things, but because he does it at the Prayer, or Word of a man. But the works of God in Egypt, by the hand of Moses, were properly Miracles; because they were done with intention to make the people of Israel beleeve, that Moses came unto them, not out of any design of his owne interest, but as sent from God. Therefore after God had commanded him to deliver the Israelites from the Egyptian bondage, when he said (Exod 4.1. &c.) “They will not beleeve me, but will say, the Lord hath not appeared unto me,” God gave him power, to turn the Rod he had in his hand into a Serpent, and again to return it into a Rod; and by putting his hand into his bosome, to make it leproous; and again by pulling it out to make it whole, to make the Children of Israel beleeve (as it is verse 5.) that the God of their Fathers had appeared unto him; And if that were not enough, he gave him power to turn their waters into bloud. And when hee had done these Miracles before the people, it is said (verse 41.) that “they beleevved him.” Neverthelesse, for fear of Pharaoh, they durst not yet obey him. Therefore the other works which were done to plague Pharaoh and the Egyptians, tended all to make the Israelites beleeve in Moses, and were

properly Miracles. In like manner if we consider all the Miracles done by the hand of Moses, and all the rest of the Prophets, till the Captivity; and those of our Saviour, and his Apostles afterward; we shall find, their end was alwaies to beget, or confirm beleefe, that they came not of their own motion, but were sent by God. Wee may further observe in Scripture, that the end of Miracles, was to beget beleef, not universally in all men, elect, and reprobate; but in the elect only; that is to say, is such as God had determined should become his Subjects. For those miraculous plagues of Egypt, had not for end, the conversion of Pharaoh; For God had told Moses before, that he would harden the heart of Pharaoh, that he should not let the people goe: And when he let them goe at last, not the Miracles perswaded him, but the plagues forced him to it. So also of our Saviour, it is written, (Mat. 13. 58.) that he wrought not many Miracles in his own countrey, because of their unbeleef; and (in Marke 6.5.) in stead of, “he wrought not many,” it is, “he could work none.” It was not because he wanted power; which to say, were blasphemy against God; nor that the end of Miracles was not to convert incredulous men to Christ; for the end of all the Miracles of Moses, of Prophets, of our Saviour, and of his Apostles was to adde men to the Church; but it was, because the end of their Miracles, was to adde to the Church (not all men, but) such as should be saved; that is to say, such as God had elected. Seeing therefore our Saviour sent from his Father, hee could not use his power in the conversion of those, whom his Father had rejected. They that expounding this place of St. Marke, say, that his word, “Hee could not,” is put for, “He would not,” do it without example in the Greek tongue, (where Would Not, is put sometimes for Could Not, in things inanimate, that have no will; but Could Not, for Would Not, never,) and thereby lay a stumbling block before weak Christians; as if Christ could doe no Miracles, but amongst the credulous.

The Definition Of A Miracle

From that which I have here set down, of the nature, and use of a Miracle, we may define it thus, “A MIRACLE, is a work of God, (besides his operation by the way of Nature, ordained in the Creation,) done for the making manifest to his elect, the mission of an extraordinary Minister for their salvation.”

And from this definition, we may inferre; First, that in all Miracles, the work done, is not the effect of any vertue in the Prophet; because it is the effect of the immediate hand of God; that is to say God hath done it, without using the Prophet therein, as a subordinate cause.

Secondly, that no Devil, Angel, or other created Spirit, can do a Miracle. For it must either be by vertue of some naturall science, or by Incantation, that is, vertue of words. For if the Inchanters do it by their own power independent, there is some power that proceedeth not from God; which all men deny: and if they doe it by power given them, then is the work not from the immediate hand of God, but naturall, and consequently no Miracle.

There be some texts of Scripture, that seem to attribute the power of working wonders (equall to some of those immediate Miracles, wrought by God himself,) to certain Arts of Magick, and Incantation. As for example, when we read that after the Rod of Moses being cast on the ground became a Serpent, (Exod. 7. 11.) “the Magicians of Egypt did the like by their Enchantments;” and that after Moses had turned the waters of the Egyptian Streams, Rivers, Ponds, and Pooles of water into blood, (Exod. 7. 22.) “the Magicians of Egypt did so likewise, with their Enchantments;” and that after Moses had by the power of God brought frogs upon the land, (Exod. 8. 7.) “the Magicians also did so with their Enchantments, and brought up frogs upon the land of Egypt;” will not a man be apt to attribute Miracles to Enchantments; that is to say, to the efficacy of the sound of Words; and think the same very well proved out of this, and other such places? and yet there is no place of Scripture, that telleth us what on Enchantment is. If therefore Enchantment be not, as many think it, a working of strange effects by spells, and words; but Imposture, and delusion, wrought by ordinary means; and so far from supernaturall, as the Impostors need not the study so much as of naturall causes,

but the ordinary ignorance, stupidity, and superstition of mankind, to doe them; those texts that seem to countenance the power of Magick, Witchcraft, and Enchantment, must needs have another sense, than at first sight they seem to bear.

That Men Are Apt To Be Deceived By False Miracles

For it is evident enough, that Words have no effect, but on those that understand them; and then they have no other, but to signifie the intentions, or passions of them that speak; and thereby produce, hope, fear, or other passions, or conceptions in the hearer. Therefore when a Rod seemeth a Serpent, or the Water Bloud, or any other Miracle seemeth done by Enchantment; if it be not to the edification of Gods people, not the Rod, nor the Water, nor any other thing is enchanted; that is to say, wrought upon by the Words, but the Spectator. So that all the Miracle consisteth in this, that the Enchanter has deceived a man; which is no Miracle, but a very easie matter to doe.

For such is the ignorance, and aptitude to error generally of all men, but especially of them that have not much knowledge of naturall causes, and of the nature, and interests of men; as by innumerable and easie tricks to be abused. What opinion of miraculous power, before it was known there was a Science of the course of the Stars, might a man have gained, that should have told the people, This hour, or day the Sun should be darkned? A juggler by the handling of his goblets, and other trinkets, if it were not now ordinarily practised, would be thought to do his wonders by the power at least of the Devil. A man that hath practised to speak by drawing in of his breath, (which kind of men in antient time were called Ventriloqui,) and so make the weaknesse of his voice seem to proceed, not from the weak impulsion of the organs of Speech, but from distance of place, is able to make very many men beleieve it is a voice from Heaven, whatsoever he please to tell them. And for a crafty man, that hath enquired into the secrets, and familiar confessions that one man ordinarily maketh to another of

his actions and adventures past, to tell them him again is no hard matter; and yet there be many, that by such means as that, obtain the reputation of being Conjurers. But it is too long a businesse, to reckon up the severall sorts of those men, which the Greeks called Thaumaturgi, that is to say, workers of things wonderfull; and yet these do all they do, by their own single dexterity. But if we looke upon the Impostures wrought by Confederacy, there is nothing how impossible soever to be done, that is impossible to bee beleaved. For two men conspiring, one to seem lame, the other to cure him with a charme, will deceive many: but many conspiring, one to seem lame, another so to cure him, and all the rest to bear witnesse; will deceive many more.

Cautions Against The Imposture Of Miracles

In this aptitude of mankind, to give too hasty beleefe to pretended Miracles, there can be no better, nor I think any other caution, than that which God hath prescribed, first by Moses, (as I have said before in the precedent chapter,) in the beginning of the 13. and end of the 18. of Deuteronomy; That wee take not any for Prophets, that teach any other Religion, then that which Gods Lieutenant, (which at that time was Moses,) hath established; nor any, (though he teach the same Religion,) whose Praediction we doe not see come to passe. Moses therefore in his time, and Aaron, and his successors in their times, and the Sovereign Governour of Gods people, next under God himself, that is to say, the Head of the Church in all times, are to be consulted, what doctrine he hath established, before wee give credit to a pretended Miracle, or Prophet. And when that is done, the thing they pretend to be a Miracle, we must both see it done, and use all means possible to consider, whether it be really done; and not onely so, but whether it be such, as no man can do the like by his naturall power, but that it requires the immediate hand of God. And in this also we must have recourse to Gods Lieutenant; to whom in all doubtfull cases, wee have submitted our private

judgments. For Example; if a man pretend, that after certain words spoken over a peece of bread, that presently God hath made it not bread, but a God, or a man, or both, and neverthelesse it looketh still as like bread as ever it did; there is no reason for any man to think it really done; nor consequently to fear him, till he enquire of God, by his Vicar, or Lieutenant, whether it be done, or not. If he say not, then followeth that which Moses saith, (Deut. 18. 22.) “he hath spoken it presumptuously, thou shalt not fear him.” If he say ’tis done, then he is not to contradict it. So also if wee see not, but onely hear tell of a Miracle, we are to consult the Lawful Church; that is to say, the lawful Head thereof, how far we are to give credit to the relators of it. And this is chiefly the case of men, that in these days live under Christian Sovereigns. For in these times, I do not know one man, that ever saw any such wondrous work, done by the charm, or at the word, or prayer of a man, that a man endued but with a mediocrity of reason, would think supernaturall: and the question is no more, whether what wee see done, be a Miracle; whether the Miracle we hear, or read of, were a reall work, and not the Act of a tongue, or pen; but in plain terms, whether the report be true, or a lye. In which question we are not every one, to make our own private Reason, or Conscience, but the Publique Reason, that is, the reason of Gods Supreme Lieutenant, Judge; and indeed we have made him Judge already, if wee have given him a Sovereign power, to doe all that is necessary for our peace and defence. A private man has alwaies the liberty, (because thought is free,) to beleeve, or not beleeve in his heart, those acts that have been given out for Miracles, according as he shall see, what benefit can accrew by mens belief, to those that pretend, or countenance them, and thereby conjecture, whether they be Miracles, or Lies. But when it comes to confession of that faith, the Private Reason must submit to the Publique; that is to say, to Gods Lieutenant. But who is this Lieutenant of God, and Head of the Church, shall be considered in its proper place thereafter.

CHAPTER XXXVIII. OF THE SIGNIFICATION IN SCRIPTURE OF ETERNALL LIFE,

HELL, SALVATION, THE WORLD TO COME, AND REDEMPTION

THE MAINTENANCE OF Civill Society, depending on Justice; and Justice on the power of Life and Death, and other lesse Rewards and Punishments, residing in them that have the Sovereignty of the Common-wealth; It is impossible a Common-wealth should stand, where any other than the Sovereign, hath a power of giving greater rewards than Life; and of inflicting greater punishments than Death. Now seeing Eternall Life is a greater reward, than the Life Present; and Eternall Torment a greater punishment than the Death of Nature; It is a thing worthy to be well considered, of all men that desire (by obeying Authority) to avoid the calamities of Confusion, and Civill war, what is meant in Holy Scripture, by Life Eternall, and Torment Eternall; and for what offences, against whom committed, men are to be Eternally Tormented; and for what actions, they are to obtain Eternall Life.

Place Of Adams Eternity If He Had Not Sinned, The Terrestrial Paradise

And first we find, that Adam was created in such a condition of life, as had he not broken the commandement of God, he had enjoyed it in the Paradise of Eden Everlastingly. For there was the Tree of Life; whereof he was so long allowed to eat, as he should forbear to eat of the tree of Knowledge of Good an Evill; which was not allowed him. And therefore as soon as he had eaten of it, God thrust him out of Paradise, “lest he should put forth his hand, and take also of the tree of life,

and live for ever.” (Gen. 3. 22.) By which it seemeth to me, (with submission neverthelesse both in this, and in all questions, whereof the determination dependeth on the Scriptures, to the interpretation of the Bible authorized by the Common-wealth, whose Subject I am,) that Adam if he had not sinned, had had an Eternall Life on Earth: and that Mortality entred upon himself, and his posterity, by his first Sin. Not that actuall Death then entred; for Adam then could never have had children; whereas he lived long after, and saw a numerous posterity ere he dyed. But where it is said, “In the day that thou eatest thereof, thou shalt surely die,” it must needs bee meant of his Mortality, and certitude of death. Seeing then Eternall life was lost by Adams forfeiture, in committing sin, he that should cancell that forfeiture was to recover thereby, that Life again. Now Jesus Christ hath satisfied for the sins of all that beleeve in him; and therefore recovered to all beleevers, that ETERNALL LIFE, which was lost by the sin of Adam. And in this sense it is, that the comparison of St. Paul holdeth (Rom. 5.18, 19.) “As by the offence of one, Judgment came upon all men to condemnation, even so by the righteousnesse of one, the free gift came upon all men to Justification of Life.” Which is again (1 Cor. 15.21,22) more perspicuously delivered in these words, “For since by man came death, by man came also the resurrection of the dead. For as in Adam all die, even so in Christ shall all be made alive.”

Texts Concerning The Place Of Life Eternall For Beleevers

Concerning the place wherein men shall enjoy that Eternall Life, which Christ hath obtained for them, the texts next before alledged seem to make it on Earth. For if as in Adam, all die, that is, have forfeited Paradise, and Eternall Life on Earth; even so in Christ all shall be made alive; then all men shall be made to live on Earth; for else the comparison were not proper. Hereunto seemeth to agree that of the Psalmist, (Psal. 133.3.) “Upon Zion God commanded the blessing, even

Life for evermore;" for Zion, is in Jerusalem, upon Earth: as also that of S. Joh. (Rev. 2.7.) "To him that overcommeth I will give to eat of the tree of life, which is in the midst of the Paradise of God." This was the tree of Adams Eternall life; but his life was to have been on Earth. The same seemeth to be confirmed again by St. Joh. (Rev. 21.2.) where he saith, "I John saw the Holy City, New Jerusalem, coming down from God out of heaven, prepared as a Bride adorned for her husband:" and again v. 10. to the same effect: As if he should say, the new Jerusalem, the Paradise of God, at the coming again of Christ, should come down to Gods people from Heaven, and not they goe up to it from Earth. And this differs nothing from that, which the two men in white clothing (that is, the two Angels) said to the Apostles, that were looking upon Christ ascending (Acts 1.11.) "This same Jesus, who is taken up from you into Heaven, shall so come, as you have seen him go up into Heaven." Which soundeth as if they had said, he should come down to govern them under his Father, Eternally here; and not take them up to govern them in Heaven; and is conformable to the Restauration of the Kingdom of God, instituted under Moses; which was a Political government of the Jews on Earth. Again, that saying of our Saviour (Mat. 22.30.) "that in the Resurrection they neither marry, nor are given in marriage, but are as the Angels of God in heaven," is a description of an Eternall Life, resembling that which we lost in Adam in the point of Marriage. For seeing Adam, and Eve, if they had not sinned, had lived on Earth Eternally, in their individuall persons; it is manifest, they should not continually have procreated their kind. For if Immortals should have generated, as Mankind doth now; the Earth in a small time, would not have been able to afford them a place to stand on. The Jews that asked our Saviour the question, whose wife the woman that had married many brothers, should be, in the resurrection, knew not what were the consequences of Immortality; that there shal be no Generation, and consequently no marriage, no more than there is Marriage, or generation among the Angels. The comparison between that Eternall life which Adam lost, and our Saviour by his Victory over death hath recovered; holdeth also in this, that as Adam lost Eternall Life by his sin, and yet lived after

it for a time; so the faithful Christian hath recovered Eternal Life by Christs passion, though he die a natural death, and remaine dead for a time; namely, till the Resurrection. For as Death is reckoned from the Condemnation of Adam, not from the Execution; so life is reckoned from the Absolution, not from the Resurrection of them that are elected in Christ.

Ascension Into Heaven

That the place wherein men are to live Eternally, after the Resurrection, is the Heavens, meaning by Heaven, those parts of the world, which are the most remote from Earth, as where the stars are, or above the stars, in another Higher Heaven, called Caelum Empyreum, (whereof there is no mention in Scripture, nor ground in Reason) is not easily to be drawn from any text that I can find. By the Kingdome of Heaven, is meant the Kingdome of the King that dwelleth in Heaven; and his Kingdome was the people of Israel, whom he ruled by the Prophets his Lieutenants, first Moses, and after him Eleazar, and the Sovereign Priests, till in the days of Samuel they rebelled, and would have a mortall man for their King, after the manner of other Nations. And when our Saviour Christ, by the preaching of his Ministers, shall have perswaded the Jews to return, and called the Gentiles to his obedience, then shall there be a new Kingdome of Heaven, because our King shall then be God, whose Throne is Heaven; without any necessity evident in the Scripture, that man shall ascend to his happinesse any higher than Gods Footstool the Earth. On the contrary, we find written (Joh. 3.13.) that “no man hath ascended into Heaven, but he that came down from Heaven, even the Son of man, that is in Heaven.” Where I observe by the way, that these words are not, as those which go immediately before, the words of our Saviour, but of St. John himself; for Christ was then not in Heaven, but upon the Earth. The like is said of David (Acts 2.34.) where St. Peter, to prove the Ascension of Christ, using the words of the Psalmist, (Psal. 16.10.) “Thou wilt not leave my

soule in Hell, nor suffer thine Holy one to see corruption,” saith, they were spoken (not of David, but) of Christ; and to prove it, addeth this Reason, “For David is not ascended into Heaven.” But to this a man may easily answer, and say, that though their bodies were not to ascend till the generall day of Judgment, yet their souls were in Heaven as soon as they were departed from their bodies; which also seemeth to be confirmed by the words of our Saviour (Luke 20.37,38.) who proving the Resurrection out of the word of Moses, saith thus, “That the dead are raised, even Moses shewed, at the bush, when he calleth the Lord, the God of Abraham, and the God of Isaac, and the God of Jacob. For he is not a God of the Dead, but of the Living; for they all live to him.” But if these words be to be understood only of the Immortality of the Soul, they prove not at all that which our Saviour intended to prove, which was the Resurrection of the Body, that is to say, the Immortality of the Man. Therefore our Saviour meaneth, that those Patriarchs were Immortall; not by a property consequent to the essence, and nature of mankind, but by the will of God, that was pleased of his mere grace, to bestow Eternall Life upon the faithfull. And though at that time the Patriarchs and many other faithfull men were Dead, yet as it is in the text, they Lived To God; that is, they were written in the Book of Life with them that were absolved of their sinnes, and ordained to Life eternall at the Resurrection. That the Soul of man is in its own nature Eternall, and a living Creature independent on the Body; or that any meer man is Immortall, otherwise than by the Resurrection in the last day, (except Enos and Elias,) is a doctrine not apparent in Scripture. The whole 14. Chapter of Job, which is the speech not of his friends, but of himselfe, is a complaint of this Mortality of Nature; and yet no contradiction of the Immortality at the Resurrection. “There is hope of a tree,” (saith hee verse 7.) “if it be cast down, Though the root thereof wax old, and the stock thereof die in the ground, yet when it scenteth the water it will bud, and bring forth boughes like a Plant. But man dyeth, and wasteth away, yea, man giveth up the Ghost, and where is he?” and (verse 12.) “man lyeth down, and riseth not, till the heavens be no more.” But when is it, that the heavens shall be no more? St. Peter tells us, that it

is at the generall Resurrection. For in his 2. Epistle, 3. Chapter, and 7. verse, he saith, that “the Heavens and the Earth that are now, are reserved unto fire against the day of Judgment, and perdition of ungodly men,” and (verse 12.) “looking for, and hasting to the comming of God, wherein the Heavens shall be on fire, and shall be dissolved, and the Elements shall melt with fervent heat. Neverthelesse, we according to the promise look for new Heavens, and a new Earth, wherein dwelleth righteousness.” Therefore where Job saith, man riseth not till the Heavens be no more; it is all one, as if he had said, the Immortall Life (and Soule and Life in the Scripture, do usually signifie the same thing) beginneth not in man, till the Resurrection, and day of Judgment; and hath for cause, not his specificall nature, and generation; but the Promise. For St. Peter saies not, “Wee look for new heavens, and a new earth, (from Nature) but from Promise.”

Lastly, seeing it hath been already proved out of divers evident places of Scripture, in the 35. chapter of this book, that the Kingdom of God is a Civil Common-wealth, where God himself is Sovereign, by vertue first of the Old, and since of the New Covenant, wherein he reigneth by his Vicar, or Lieutenant; the same places do therefore also prove, that after the comming again of our Saviour in his Majesty, and glory, to reign actually, and Eternally; the Kingdom of God is to be on Earth. But because this doctrine (though proved out of places of Scripture not few, nor obscure) will appear to most men a novelty; I doe but propound it; maintaining nothing in this, or any other paradox of Religion; but attending the end of that dispute of the sword, concerning the Authority, (not yet amongst my Countrey-men decided,) by which all sorts of doctrine are to bee approved, or rejected; and whose commands, both in speech, and writing, (whatsoever be the opinions of private men) must by all men, that mean to be protected by their Laws, be obeyed. For the points of doctrine concerning the Kingdome (of) God, have so great influence on the Kingdome of Man, as not to be determined, but by them, that under God have the Sovereign Power.

The Place After Judgment, Of Those Who Were Never In The Kingdome
Of God, Or Having Been In, Are Cast Out

As the Kingdome of God, and Eternall Life, so also Gods Enemies, and their Torments after Judgment, appear by the Scripture, to have their place on Earth. The name of the place, where all men remain till the Resurrection, that were either buried, or swallowed up of the Earth, is usually called in Scripture, by words that signifie Under Ground; which the Latines read generally *Infernus*, and *Inferni*, and the Greeks *Hades*; that is to say, a place where men cannot see; and containeth as well the Grave, as any other deeper place. But for the place of the damned after the Resurrection, it is not determined, neither in the Old, nor New Testament, by any note of situation; but onely by the company: as that it shall bee, where such wicked men were, as God in former times in extraordinary, and miraculous manner, had destroyed from off the face of the Earth: As for Example, that they are in *Inferno*, in *Tartarus*, or in the bottomelesse pit; because *Corah*, *Dathan*, and *Abirom*, were swallowed up alive into the earth. Not that the Writers of the Scripture would have us beleeeve, there could be in the globe of the Earth, which is not only finite, but also (compared to the height of the Stars) of no considerable magnitude, a pit without a bottome; that is, a hole of infinite depth, such as the Greeks in their *Daemonologie* (that is to say, in their doctrine concerning *Daemons*,) and after them, the Romans called *Tartarus*; of which *Virgill* sayes,

Bis patet in praeceps, tantem tenditque sub umbras,

Quantus ad aethereum coeli suspectus Olymum:

for that is a thing the proportion of Earth to Heaven cannot bear: but that wee should beleeeve them there, indefinitely, where those men are, on whom God inflicted that Exemplary punishment.

The Congregation Of Giants

Again, because those mighty men of the Earth, that lived in the time of Noah, before the floud, (which the Greeks called Heroes, and the Scripture Giants, and both say, were begotten, by copulation of the children of God, with the children of men,) were for their wicked life destroyed by the generall deluge; the place of the Damned, is therefore also sometimes marked out, by the company of those deceased Giants; as Proverbs 21.16. “The man that wandreth out of the way of understanding, shall remain in the congregation of the Giants,” and Job 26.5. “Behold the Giants groan under water, and they that dwell with them.” Here the place of the Damned, is under the water. And Isaiah 14.9. “Hell is troubled how to meet thee,” (that is, the King of Babylon) “and will displace the Giants for thee:” and here again the place of the Damned, (if the sense be literall,) is to be under water.

Lake Of Fire

Thirdly, because the Cities of Sodom, and Gomorrah, by the extraordinary wrath of God, were consumed for their wickednesse with Fire and Brimstone, and together with them the countrey about made a stinking bituminous Lake; the place of the Damned is sometimes expressed by Fire, and a Fiery Lake: as in the Apocalypse ch.21.8. “But the timorous, incredulous, and abominable, and Murderers, and Whoremongers, and Sorcerers, and Idolators, and all Lyars, shall have their part in the Lake that burneth with Fire, and Brimstone; which is the second Death.” So that it is manifest, that Hell Fire, which is here expressed by Metaphor, from the reall Fire of Sodome, signifieth not any certain kind, or place of Torment; but is to be taken indefinitely, for Destruction, as it is in the 20. Chapter, at the 14. verse; where it is said, that “Death and Hell were cast into the Lake of Fire;” that is to say, were abolished, and destroyed; as if after the day of

Judgment, there shall be no more Dying, nor no more going into Hell; that is, no more going to Hades (from which word perhaps our word Hell is derived,) which is the same with no more Dying.

Utter Darknesse

Fourthly, from the Plague of Darknesse inflicted on the Egyptians, of which it is written (Exod. 10.23.) “They saw not one another, neither rose any man from his place for three days; but all the Children of Israel had light in their dwellings;” the place of the wicked after Judgment, is called Utter Darknesse, or (as it is in the originall) Darknesse Without. And so it is expressed (Mat. 22.13.) where the King commandeth his Servants, “to bind hand and foot the man that had not on his Wedding garment, and to cast him out,” Eis To Skotos To Exoteron, Externall Darknesse, or Darknesse Without: which though translated Utter Darknesse, does not signifie How Great, but Where that darknesse is to be; namely, Without The Habitation of Gods Elect.

Gehenna, And Tophet

Lastly, whereas there was a place neer Jerusalem, called the Valley of the Children of Hinnon; in a part whereof, called Tophet, the Jews had committed most grievous Idolatry, sacrificing their children to the Idol Moloch; and wherein also God had afflicted his enemies with most grievous punishments; and wherein Josias had burnt the Priests of Moloch upon their own Altars, as appeareth at large in the 2 of Kings cha. the place served afterwards, to receive the filth, and garbage which was carried thither, out of the City; and there used to be fires made, from time to time, to purifie the aire, and take away the stench of Carrion. From this abominable place, the Jews used ever after to call the place of the Damned, by the

name of Gehenna, or Valley of Hinnon. And this Gehenna, is that word, which is usually now translated HELL; and from the fires from time to time there burning, we have the notion of Everlasting, and Unquenchable Fire.

Of The Literall Sense Of The Scripture Concerning Hell

Seeing now there is none, that so interprets the Scripture, as that after the day of Judgment, the wicked are all Eternally to be punished in the Valley of Hinnon; or that they shall so rise again, as to be ever after under ground, or under water; or that after the Resurrection, they shall no more see one another; nor stir from one place to another; it followeth, me thinks, very necessarily, that that which is thus said concerning Hell Fire, is spoken metaphorically; and that therefore there is a proper sense to bee enquired after, (for of all Metaphors there is some reall ground, that may be expressed in proper words) both of the Place of Hell, and the nature of Hellish Torment, and Tormenters.

Satan, Devill, Not Proper Names, But Appellatives

And first for the Tormenters, wee have their nature, and properties, exactly and properly delivered by the names of, The Enemy, or Satan; The Accuser, or Diabolus; The Destroyer, or Abbadon. Which significant names, Satan, Devill, Abbadon, set not forth to us any Individuall person, as proper names use to doe; but onely an office, or quality; and are therefore Appellatives; which ought not to have been left untranslated, as they are, in the Latine, and Modern Bibles; because thereby they seem to be the proper names of Daemons; and men are the more easily seduced to beleeve the doctrine of Devills; which at that time was the Religion of the Gentiles, and contrary to that of Moses, and of Christ.

And because by the Enemy, the Accuser, and Destroyer, is meant, the Enemy of them that shall be in the Kingdome of God; therefore if the Kingdome of God after the Resurrection, bee upon the Earth, (as in the former Chapter I have shewn by Scripture it seems to be,) The Enemy, and his Kingdome must be on Earth also. For so also was it, in the time before the Jews had deposed God. For Gods Kingdome was in Palestine; and the Nations round about, were the Kingdomes of the Enemy; and consequently by Satan, is meant any Earthly Enemy of the Church.

Torments Of Hell

The Torments of Hell, are expressed sometimes, by “weeping, and gnashing of teeth,” as Mat. 8.12. Sometimes, by “the worm of Conscience;” as Isa.66.24. and Mark 9.44, 46, 48; sometimes, by Fire, as in the place now quoted, “where the worm dyeth not, and the fire is not quenched,” and many places beside: sometimes by “Shame, and contempt,” as Dan. 12.2. “And many of them that sleep in the dust of the Earth, shall awake; some to Everlasting life; and some to shame, and everlasting contempt.” All which places design metaphorically a grief, and discontent of mind, from the sight of that Eternall felicity in others, which they themselves through their own incredulity, and disobedience have lost. And because such felicity in others, is not sensible but by comparison with their own actuall miseries; it followeth that they are to suffer such bodily paines, and calamities, as are incident to those, who not onely live under evill and cruell Governours, but have also for Enemy, the Eternall King of the Saints, God Almighty. And amongst these bodily paines, is to be reckoned also to every one of the wicked a second Death. For though the Scripture bee clear for an universall Resurrection; yet wee do not read, that to any of the Reprobate is promised an Eternall life. For whereas St. Paul (1 Cor. 15.42, 43.) to the question concerning what bodies men shall rise with again, saith, that “the body is sown in corruption,

and is raised in incorruption; It is sown in dishonour, it is raised in glory; it is sown in weaknesse, it is raised in power;” Glory and Power cannot be applyed to the bodies of the wicked: Nor can the name of Second Death, bee applyed to those that can never die but once: And although in Metaphoricall speech, a Calamitous life Everlasting, may bee called an Everlasting Death yet it cannot well be understood of a Second Death. The fire prepared for the wicked, is an Everlasting Fire: that is to say, the estate wherein no man can be without torture, both of body and mind, after the Resurrection, shall endure for ever; and in that sense the Fire shall be unquenchable, and the torments Everlasting: but it cannot thence be inferred, that hee who shall be cast into that fire, or be tormented with those torments, shall endure, and resist them so, as to be eternally burnt, and tortured, and yet never be destroyed, nor die. And though there be many places that affirm Everlasting Fire, and Torments (into which men may be cast successively one after another for ever;) yet I find none that affirm there shall bee an Eternall Life therein of any individuall person; but on the contrary, an Everlasting Death, which is the Second Death: (Apoc. 20. 13,14.) “For after Death, and the Grave shall have delivered up the dead which were in them, and every man be judged according to his works; Death and the Grave shall also be cast into the Lake of Fire. This is the Second Death.” Whereby it is evident, that there is to bee a Second Death of every one that shall bee condemned at the day of Judgement, after which hee shall die no more.

The Joyes Of Life Eternall, And Salvation The Same Thing,

Salvation From Sin, And From Misery, All One

The joyes of Life Eternall, are in Scripture comprehended all under the name of SALVATION, or Being Saved. To be saved, is to be secured, either respectively, against speciall Evills, or absolutely against all Evill, comprehending Want,

Sicknesse, and Death it self. And because man was created in a condition Immortall, not subject to corruption, and consequently to nothing that tendeth to the dissolution of his nature; and fell from that happinesse by the sin of Adam; it followeth, that to be Saved From Sin, is to be saved from all the Evill, and Calamities that Sinne hath brought upon us. And therefore in the Holy Scripture, Remission of Sinne, and Salvation from Death and Misery, is the same thing, as it appears by the words of our Saviour, who having cured a man sick of the Palsey, by saying, (Mat. 9.2.) “Son be of good cheer, thy Sins be forgiven thee;” and knowing that the Scribes took for blasphemy, that a man should pretend to forgive Sins, asked them (v.5.) “whether it were easier to say, Thy Sinnes be forgiven thee, or, Arise and walk;” signifying thereby, that it was all one, as to the saving of the sick, to say, “Thy Sins are forgiven,” and “Arise and walk;” and that he used that form of speech, onely to shew he had power to forgive Sins. And it is besides evident in reason, that since Death and Misery, were the punishments of Sin, the discharge of Sinne, must also be a discharge of Death and Misery; that is to say, Salvation absolute, such as the faithfull are to enjoy after the day of Judgment, by the power, and favour of Jesus Christ, who for that cause is called our SAVIOUR.

Concerning Particular Salvations, such as are understood, 1 Sam. 14.39. “as the Lord liveth that saveth Israel,” that is, from their temporary enemies, and 2 Sam. 22.4. “Thou art my Saviour, thou savest me from violence;” and 2 Kings 13.5. “God gave the Israelites a Saviour, and so they were delivered from the hand of the Assyrians,” and the like, I need say nothing; there being neither difficulty, nor interest, to corrupt the interpretation of texts of that kind.

The Place Of Eternall Salvation

But concerning the Generall Salvation, because it must be in the Kingdome of Heaven, there is great difficulty concerning the Place. On one side, by Kingdome

(which is an estate ordained by men for their perpetuall security against enemies, and want) it seemeth that this Salvation should be on Earth. For by Salvation is set forth unto us, a glorious Reign of our King, by Conquest; not a safety by Escape: and therefore there where we look for Salvation, we must look also for Triumph; and before Triumph, for Victory; and before Victory, for Battell; which cannot well be supposed, shall be in Heaven. But how good soever this reason may be, I will not trust to it, without very evident places of Scripture. The state of Salvation is described at large, Isaiah, 33. ver. 20,21,22,23,24.

“Look upon Zion, the City of our solemnities, thine eyes shall see Jerusalem a quiet habitation, a tabernacle that shall not be taken down; not one of the stakes thereof shall ever be removed, neither shall any of the cords thereof be broken.

But there the glorious Lord will be unto us a place of broad rivers, and streams; wherein shall goe no Gally with oares; neither shall gallant ship passe thereby.

For the Lord is our Judge, the Lord is our Lawgiver, the Lord is our King, he will save us.

Thy tacklings are loosed; they could not well strengthen their mast; they could not spread the sail: then is the prey of a great spoil divided; the lame take the prey.

And the Inhabitant shall not say, I am sicke; the people that shall dwell therein shall be forgiven their Iniquity.”

In which words wee have the place from whence Salvation is to proceed, “Jerusalem, a quiet habitation;” the Eternity of it, “a tabernacle that shall not be taken down,” &c. The Saviour of it, “the Lord, their Judge, their Lawgiver, their King, he will save us;” the Salvation, “the Lord shall be to them as a broad mote of swift waters,” &c. the condition of their Enemies, “their tacklings are loose, their masts weake, the lame shal take the spoil of them.” The condition of the Saved, “The Inhabitants shall not say, I am sick.” And lastly, all this is comprehended in Forgivenessse of sin, “The people that dwell therein shall be forgiven their iniquity.” By which it is evident, that Salvation shall be on Earth, then, when God shall reign, (at the coming again of Christ) in Jerusalem; and

from Jerusalem shall proceed the Salvation of the Gentiles that shall be received into Gods Kingdome; as is also more expressly declared by the same Prophet, Cha.20, 21. “And they,” (that is, the Gentiles who had any Jew in bondage) “shall bring all your brethren, for an offering to the Lord, out of all nations, upon horses, and in charets, and in litters, and upon mules, and upon swift beasts, to my holy mountain, Jerusalem, saith the Lord, as the Children of Israel bring an offering in a clean vessell into the House of the Lord. And I will also take of them for Priests and for Levites, saith the Lord:” Whereby it is manifest, that the chief seat of Gods Kingdome (which is the Place, from whence the Salvation of us that were Gentiles, shall proceed) shall be Jerusalem; And the same is also confirmed by our Saviour, in his discourse with the woman of Samaria, concerning the place of Gods worship; to whom he saith, John 4.22. that the Samaritans worshipped they know not what, but the Jews worship what they knew, “For Salvation is of the Jews (Ex Judais, that is, begins at the Jews): as if he should say, you worship God, but know not by whom he wil save you, as we doe, that know it shall be one of the tribe of Judah, a Jew, not a Samaritan. And therefore also the woman not impertinently answered him again, “We know the Messias shall come.” So that which our saviour saith, “Salvation is from the Jews,” is the same that Paul sayes (Rom. 1.16,17.) “The Gospel is the power of God to Salvation to every one that beleeveth; To the Jew first, and also to the Greek. For therein is the righteousnesse of God revealed from faith to faith;” from the faith of the Jew, to the faith of the Gentile. In thelike sense the Prophet Joel describing the day of Judgment, (cha.30,31.) that God would “shew wonders in heaven, and in earth, bloud, and fire, and pillars of smoak. The Sun should be turned to darknesse, and the Moon into bloud, before the great and terrible day of the Lord come,” he addeth verse 32. “and it shall come to passe, that whosoever shall call upon the name of the Lord, shall be saved. For in Mount Zion, and in Jerusalem shall be Salvation.” And Obadiah verse 17 saith the same, “Upon Mount Zion shall be Deliverance; and there shall be holinesse, and the house of Jacob shall possesse their possessions,” that is, the possessions of the Heathen, which possessions he

expresseth more particularly in the following verses, by the Mount of Esau, the Land of the Philistines, the Fields of Ephraim, of Samaria, Gilead, and the Cities of the South, and concludes with these words, “the Kingdom shall be the Lords.” All these places are for Salvation, and the Kingdome of God (after the day of Judgement) upon Earth. On the other side, I have not found any text that can probably be drawn, to prove any Ascension of the Saints into Heaven; that is to say, into any Coelum Empyreum, or other aetheriall Region; saving that it is called the Kingdome of Heaven; which name it may have, because God, that was King of the Jews, governed them by his commands, sent to Moses by Angels from Heaven, to reduce them to their obedience; and shall send him thence again, to rule both them, and all other faithfull men, from the day of Judgment, Everlastingly: or from that, that the Throne of this our Great King is in Heaven; whereas the Earth is but his Footstool. But that the Subjects of God should have any place as high as his throne, or higher than his Footstool, it seemeth not sutable to the dignity of a King, nor can I find any evident text for it in holy Scripture.

From this that hath been said of the Kingdom of God, and of Salvation, it is not hard to interpret, what is meant by the WORLD TO COME. There are three worlds mentioned in Scripture, the Old World, the Present World, and the World to Come. Of the first, St. Peter speaks, (2 Pet. 2.5.) “If God spared not the Old World, but saved Noah the eighth person, a Preacher of righteousness, bringing the flood upon the world of the ungodly,” &c. So the First World, was from Adam to the generall Flood. Of the present World, our Saviour speaks (John 18.36.) “My Kingdome is not of this World.” For he came onely to teach men the way of Salvation, and to renew the Kingdome of his Father, by his doctrine. Of the World to come, St. Peter speaks, (2 Pet. 3. 13.) “Nevertheless we according to his promise look for new Heavens, and a new Earth.” This is that WORLD, wherein Christ coming down from Heaven, in the clouds, with great power, and glory, shall send his Angels, and shall gather together his elect, from the four winds, and

from the uttermost parts of the Earth, and thence forth reign over them, (under his Father) Everlastingly.

Redemption

Salvation of a sinner, supposeth a precedent REDEMPTION; for he that is once guilty of Sin, is obnoxious to the Penalty of the same; and must pay (or some other for him) such Ransome, as he that is offended, and has him in his power, shall require. And seeing the person offended, is Almighty God, in whose power are all things; such Ransome is to be paid before Salvation can be acquired, as God hath been pleased to require. By this Ransome, is not intended a satisfaction for Sin, equivalent to the Offence, which no sinner for himselfe, nor righteous man can ever be able to make for another; The dammage a man does to another, he may make amends for by restitution, or recompence, but sin cannot be taken away by recompence; for that were to make the liberty to sin, a thing vendible. But sins may bee pardoned to the repentant, either Gratis, or upon such penalty, as God is pleased to accept. That which God usually accepted in the Old Testament, was some Sacrifice, or Oblation. To forgive sin is not an act of Injustice, though the punishment have been threatned. Even amongst men, though the promise of Good, bind the promiser; yet threats, that is to say, promises, of Evill, bind them not; much lesse shall they bind God, who is infinitely more mercifull then men. Our Saviour Christ therefore to Redeem us, did not in that sense satisfie for the Sins of men, as that his Death, of its own vertue, could make it unjust in God to punish sinners with Eternall death; but did make that Sacrifice, and Oblation of himself, at his first coming, which God was pleased to require, for the Salvation at his second coming, of such as in the mean time should repent, and beleieve in him. And though this act of our Redemption, be not alwaies in Scripture called a Sacrifice, and Oblation, but sometimes a Price, yet by Price we are not to understand any thing, by the value whereof, he could claim right to a pardon for

us, from his offended Father, but that Price which God the Father was pleased in mercy to demand.

CHAPTER XXXIX. OF THE SIGNIFICATION IN SCRIPTURE OF THE WORD CHURCH

Church The Lords House

The word Church, (Ecclesia) signifieth in the Books of Holy Scripture divers things. Sometimes (though not often) it is taken for Gods House, that is to say, for a Temple, wherein Christians assemble to perform holy duties publicquely; as, 1 Cor. 14. ver. 34. “Let your women keep silence in the Churches:” but this is Metaphorically put, for the Congregation there assembled; and hath been since used for the Edifice it self, to distinguish between the Temples of Christians, and Idolaters. The Temple of Jerusalem was Gods House, and the House of Prayer; and so is any Edifice dedicated by Christians to the worship of Christ, Christs House: and therefore the Greek Fathers call it Kuriake, The Lords House; and thence, in our language it came to be called Kyrke, and Church.

Ecclesia Properly What

Church (when not taken for a House) signifieth the same that Ecclesia signified in the Grecian Common-wealths; that is to say, a Congregation, or an Assembly of Citizens, called forth, to hear the Magistrate speak unto them; and which in the Common-wealth of Rome was called Concio, as he that spake was called Ecclesiastes, and Concionator. And when they were called forth by lawfull Authority, (Acts 19.39.) it was Ecclesia Legitima, a Lawfull Church, Ennomos Ecclesia. But when they were excited by tumultuous, and seditious clamor, then it was a confused Church, Ecclesia Sugkechumene.

It is taken also sometimes for the men that have right to be of the Congregation, though not actually assembled; that is to say, for the whole multitude of Christian men, how far soever they be dispersed: as (Act. 8.3.) where it is said, that “Saul made havock of the Church:” And in this sense is Christ said to be Head of the Church. And sometimes for a certain part of Christians, as (Col. 4.15.) “Salute the Church that is in his house.” Sometimes also for the Elect onely; as (Ephes. 5.27.) “A Glorious Church, without spot, or wrinkle, holy, and without blemish;” which is meant of the Church Triumphant, or, Church To Come. Sometimes, for a Congregation assembled, of professors of Christianity, whether their profession be true, or counterfeit, as it is understood, Mat. 18.17. where it is said, “Tell it to the Church, and if hee neglect to hear the Church, let him be to thee as a Gentile, or Publican.”

In What Sense The Church Is One Person Church Defined

And in this last sense only it is that the Church can be taken for one Person; that is to say, that it can be said to have power to will, to pronounce, to command, to be obeyed, to make laws, or to doe any other action whatsoever; For without authority from a lawfull Congregation, whatsoever act be done in a concourse of people, it is the particular act of every one of those that were present, and gave their aid to the performance of it; and not the act of them all in grosse, as of one body; much lesse that act of them that were absent, or that being present, were not willing it should be done. According to this sense, I define a CHURCH to be, “A company of men professing Christian Religion, united in the person of one Sovereign; at whose command they ought to assemble, and without whose authority they ought not to assemble.” And because in all Common-wealths, that Assembly, which is without warrant from the Civil Sovereign, is unlawful; that Church also, which is assembled in any Common-wealth, that hath forbidden them to assemble, is an unlawfull Assembly.

A Christian Common-wealth, And A Church All One

It followeth also, that there is on Earth, no such universall Church as all Christians are bound to obey; because there is no power on Earth, to which all other Common-wealths are subject: There are Christians, in the Dominions of severall Princes and States; but every one of them is subject to that Common-wealth, whereof he is himself a member; and consequently, cannot be subject to the commands of any other Person. And therefore a Church, such as one as is capable to Command, to Judge, Absolve, Condemn, or do any other act, is the same thing with a Civil Common-wealth, consisting of Christian men; and is called a Civill State, for that the subjects of it are Men; and a Church, for that the subjects thereof are Christians. Temporall and Spirituall Government, are but two words brought into the world, to make men see double, and mistake their Lawfull Sovereign. It is true, that the bodies of the faithfull, after the Resurrection shall be not onely Spirituall, but Eternall; but in this life they are grosse, and corruptible. There is therefore no other Government in this life, neither of State, nor Religion, but Temporall; nor teaching of any doctrine, lawfull to any Subject, which the Governour both of the State, and of the Religion, forbiddeth to be taught: And that Governor must be one; or else there must needs follow Faction, and Civil war in the Common-wealth, between the Church and State; between Spiritualists, and Temporalists; between the Sword Of Justice, and the Shield Of Faith; and (which is more) in every Christian mans own brest, between the Christian, and the Man. The Doctors of the Church, are called Pastors; so also are Civill Sovereignes: But if Pastors be not subordinate one to another, so as that there may bee one chief Pastor, men will be taught contrary Doctrines, whereof both may be, and one must be false. Who that one chief Pastor is, according to the law of Nature, hath been already shewn; namely, that it is the Civill Sovereign; And to whom the Scripture hath assigned that Office, we shall see in the Chapters following.

CHAPTER XL

OF THE RIGHTS OF THE KINGDOME OF GOD, IN ABRAHAM, MOSES,
HIGH PRIESTS,

AND THE KINGS OF JUDAH

The Sovereign Rights Of Abraham

The Father of the Faithfull, and first in the Kingdome of God by Covenant, was Abraham. For with him was the Covenant first made; wherein he obliged himself, and his seed after him, to acknowledge and obey the commands of God; not onely such, as he could take notice of, (as Morall Laws,) by the light of Nature; but also such, as God should in speciall manner deliver to him by Dreams and Visions. For as to the Morall law, they were already obliged, and needed not have been contracted withall, by promise of the Land of Canaan. Nor was there any Contract, that could adde to, or strengthen the Obligation, by which both they, and all men else were bound naturally to obey God Almighty: And therefore the Covenant which Abraham made with God, was to take for the Commandement of God, that which in the name of God was commanded him, in a Dream, or Vision, and to deliver it to his family, and cause them to observe the same.

Abraham Had The Sole Power Of Ordering The Religion Of His Own People

In this Contract of God with Abraham, wee may observe three points of important consequence in the government of Gods people. First, that at the making of this Covenant, God spake onely to Abraham; and therefore contracted not with any of his family, or seed, otherwise then as their wills (which make the essence of all Covenants) were before the Contract involved in the will of Abraham; who was therefore supposed to have had a lawfull power, to make them perform all that he covenanted for them. According whereunto (Gen 18.18, 19.) God saith, “All the Nations of the Earth shall be blessed in him, For I know him that he will command his children and his houshold after him, and they shall keep the way of the Lord.” From whence may be concluded this first point, that they to whom God hath not spoken immediately, are to receive the positive commandements of God, from their Sovereign; as the family and seed of Abraham did from Abraham their Father, and Lord, and Civill Sovereign. And Consequently in every Commonwealth, they who have no supernaturall Revelation to the contrary, ought to obey the laws of their own Sovereign, in the externall acts and profession of Religion. As for the inward Thought, and beleef of men, which humane Governours can take no notice of, (for God onely knoweth the heart) they are not voluntary, nor the effect of the laws, but of the unrevealed will, and of the power of God; and consequently fall not under obligation.

No Pretence Of Private Spirit Against The Religion Of Abraham

From whence proceedeth another point, that it was not unlawfull for Abraham, when any of his Subjects should pretend Private Vision, or Spirit, or other Revelation from God, for the countenancing of any doctrine which Abraham should forbid, or when they followed, or adhered to any such pretender, to punish them; and consequently that it is lawfull now for the Sovereign to punish any man that shall oppose his Private Spirit against the Laws: For hee hath the same place in the Common-wealth, that Abraham had in his own Family.

Abraham Sole Judge, And Interpreter Of What God Spake

There ariseth also from the same, a third point; that as none but Abraham in his family, so none but the Sovereign in a Christian Common-wealth, can take notice what is, or what is not the Word of God. For God spake onely to Abraham; and it was he onely, that was able to know what God said, and to interpret the same to his family: And therefore also, they that have the place of Abraham in a Common-wealth, are the onely Interpreters of what God hath spoken.

The Authority Of Moses Whereon Grounded

The same Covenant was renewed with Isaac; and afterwards with Jacob; but afterwards no more, till the Israelites were freed from the Egyptians, and arrived at the Foot of Mount Sinai: and then it was renewed by Moses (as I have said before, cha.) in such manner, as they became from that time forward the Peculiar Kingdome of God; whose Lieutenant was Moses, for his owne time; and the succession to that office was setled upon Aaron, and his heirs after him, to bee to God a Sacerdotall Kingdome for ever.

By this constitution, a Kingdome is acquired to God. But seeing Moses had no authority to govern the Israelites, as a successor to the right of Abraham, because he could not claim it by inheritance; it appeareth not as yet, that the people were obliged to take him for Gods Lieutenant, longer than they beleaved that God spake unto him. And therefore his authority (notwithstanding the Covenant they made with God) depended yet merely upon the opinion they had of his Sanctity, and of the reality of his Conferences with God, and the verity of his Miracles; which opinion coming to change, they were no more obliged to take any thing for the law of God, which he propounded to them in Gods name. We are therefore to

consider, what other ground there was, of their obligation to obey him. For it could not be the commandment of God that could oblige them; because God spake not to them immediately, but by the mediation of Moses Himself; And our Saviour saith of himself, (John 5. 31.) “If I bear witness of my self, my witness is not true,” much lesse if Moses bear witness of himselfe, (especially in a claim of Kingly power over Gods people) ought his testimony to be received. His authority therefore, as the authority of all other Princes, must be grounded on the Consent of the People, and their Promise to obey him. And so it was: for “the people” (Exod. 20.18.) “when they saw the Thunderings, and the Lightnings, and the noyse of the Trumpet, and the mountaine smoaking, removed, and stood a far off. And they said unto Moses, speak thou with us, and we will hear, but let not God speak with us lest we die.” Here was their promise of obedience; and by this it was they obliged themselves to obey whatsoever he should deliver unto them for the Commandment of God.

Moses Was (Under God) Sovereign Of The Jews, All His Own Time,

Though Aaron Had The Priesthood

And notwithstanding the Covenant constituted a Sacerdotall Kingdome, that is to say, a Kingdome hereditary to Aaron; yet that is to be understood of the succession, after Moses should bee dead. For whosoever ordereth, and establisheth the Policy, as first founder of a Common-wealth (be it Monarchy, Aristocracy, or Democracy) must needs have Sovereign Power over the people all the while he is doing of it. And that Moses had that power all his own time, is evidently affirmed in the Scripture. First, in the text last before cited, because the people promised obedience, not to Aaron but to him. Secondly, (Exod. 24.1, 2.) “And God said unto Moses, Come up unto the Lord, thou, and Aaron, Nadab and Abihu, and seventy of the Elders of Israel. And Moses alone shall come neer the

Lord, but they shall not come nigh, neither shall the people goe up with him.” By which it is plain, that Moses who was alone called up to God, (and not Aaron, nor the other Priests, nor the Seventy Elders, nor the People who were forbidden to come up) was alone he, that represented to the Israelites the Person of God; that is to say, was their sole Sovereign under God. And though afterwards it be said (verse 9.) “Then went up Moses, and Aaron, Nadab, and Abihu, and seventy of the Elders of Israel, and they saw the God of Israel, and there was under his feet, as it were a paved work of a saphire stone,” &c. yet this was not till after Moses had been with God before, and had brought to the people the words which God had said to him. He onely went for the businesse of the people; the others, as the Nobles of his retinue, were admitted for honour to that speciall grace, which was not allowed to the people; which was, (as in the verse after appeareth) to see God and live. “God laid not his hand upon them, they saw God and did eat and drink” (that is, did live), but did not carry any commandement from him to the people. Again, it is every where said, “The Lord spake unto Moses,” as in all other occasions of Government; so also in the ordering of the Ceremonies of Religion, contained in the 25, 26, 27, 28, 29, 30, and 31 Chapters of Exodus, and throughout Leviticus: to Aaron seldome. The Calfe that Aaron made, Moses threw into the fire. Lastly, the question of the Authority of Aaron, by occasion of his and Miriams mutiny against Moses, was (Numbers 12.) judged by God himself for Moses. So also in the question between Moses, and the People, when Corah, Dathan, and Abiram, and two hundred and fifty Princes of the Assembly “gathered themselves together” (Numbers 16. 3) “against Moses, and against Aaron, and said unto them, ‘Ye take too much upon you, seeing all the congregation are Holy, every one of them, and the Lord is amongst them, why lift you up your selves above the congregation of the Lord?’” God caused the Earth to swallow Corah, Dathan, and Abiram with their wives and children alive, and consumed those two hundred and fifty Princes with fire. Therefore neither Aaron, nor the People, nor any Aristocracy of the chief Princes of the People, but Moses alone had next under God the Sovereignty over the Israelites: And that not onely

in causes of Civill Policy, but also of Religion; For Moses onely spake with God, and therefore onely could tell the People, what it was that God required at their hands. No man upon pain of death might be so presumptuous as to approach the Mountain where God talked with Moses. “Thou shalt set bounds” (saith the Lord, Exod 19. 12.) “to the people round about, and say, Take heed to your selves that you goe not up into the Mount, or touch the border of it; whosoever toucheth the Mount shall surely be put to death.” and again (verse 21.) “Get down, charge the people, lest they break through unto the Lord to gaze.” Out of which we may conclude, that whosoever in a Christian Common-wealth holdeth the place of Moses, is the sole Messenger of God, and Interpreter of his Commandements. And according hereunto, no man ought in the interpretation of the Scripture to proceed further then the bounds which are set by their severall Sovereigns. For the Scriptures since God now speaketh in them, are the Mount Sinai; the bounds whereof are the Laws of them that represent Gods Person on Earth. To look upon them and therein to behold the wondrous works of God, and learn to fear him is allowed; but to interpret them; that is, to pry into what God saith to him whom he appointeth to govern under him, and make themselves Judges whether he govern as God commandeth him, or not, is to transgresse the bounds God hath set us, and to gaze upon God irreverently.

All Spirits Were Subordinate To The Spirit Of Moses

There was no Prophet in the time of Moses, nor pretender to the Spirit of God, but such as Moses had approved, and Authorized. For there were in his time but Seventy men, that are said to Prophecy by the Spirit of God, and these were of all Moses his election; concerning whom God saith to Moses (Numb. 11.16.) “Gather to mee Seventy of the Elders of Israel, whom thou knowest to be the Elders of the People.” To these God imparted his Spirit; but it was not a different Spirit from that of Moses; for it is said (verse 25.) “God came down in a cloud, and took of

the Spirit that was upon Moses, and gave it to the Seventy Elders.” But as I have shewn before (cha.) by Spirit, is understood the Mind; so that the sense of the place is no other than this, that God endued them with a mind conformable, and subordinate to that of Moses, that they might Prophecy, that is to say, speak to the people in Gods name, in such manner, as to set forward (as Ministers of Moses, and by his authority) such doctrine as was agreeable to Moses his doctrine. For they were but Ministers; and when two of them Prophecied in the Camp, it was thought a new and unlawfull thing; and as it is in the 27. and 28. verses of the same Chapter, they were accused of it, and Joshua advised Moses to forbid them, as not knowing that it was by Moses his Spirit that they Prophecied. By which it is manifest, that no Subject ought to pretend to Prophecy, or to the Spirit, in opposition to the doctrine established by him, whom God hath set in the place of Moses.

After Moses The Sovereignty Was In The High Priest

Aaron being dead, and after him also Moses, the Kingdome, as being a Sacerdotall Kingdome, descended by vertue of the Covenant, to Aarons Son, Eleazar the High Priest: And God declared him (next under himself) for Sovereign, at the same time that he appointed Joshua for the Generall of their Army. For thus God saith expressly (Numb. 27.21.) concerning Joshua; “He shall stand before Eleazar the Priest, who shall ask counsell for him, before the Lord, at his word shall they goe out, and at his word they shall come in, both he, and all the Children of Israel with him:” Therefore the Supreme Power of making War and Peace, was in the Priest. The Supreme Power of Judicature belonged also to the High Priest: For the Book of the Law was in their keeping; and the Priests and Levites onely were the subordinate Judges in causes Civill, as appears in Deut. 17.8, 9, 10. And for the manner of Gods worship, there was never doubt made, but that the High Priest till the time of Saul, had the Supreme Authority.

Therefore the Civill and Ecclesiasticall Power were both joined together in one and the same person, the High Priest; and ought to bee so, in whosoever governeth by Divine Right; that is, by Authority immediate from God.

Of The Sovereign Power Between The Time Of Joshua And Of Saul

After the death of Joshua, till the time of Saul, the time between is noted frequently in the Book of Judges, “that there was in those dayes no King in Israel;” and sometimes with this addition, that “every man did that which was right in his own eyes.” By which is to bee understood, that where it is said, “there was no King,” is meant, “there was no Sovereign Power” in Israel. And so it was, if we consider the Act, and Exercise of such power. For after the death of Joshua, & Eleazar, “there arose another generation” (Judges 2.10.) “that knew not the Lord, nor the works which he had done for Israel, but did evill in the sight of the Lord, and served Baalim.” And the Jews had that quality which St. Paul noteth, “to look for a sign,” not onely before they would submit themselves to the government of Moses, but also after they had obliged themselves by their submission. Whereas Signs, and Miracles had for End to procure Faith, not to keep men from violating it, when they have once given it; for to that men are obliged by the law of Nature. But if we consider not the Exercise, but the Right of governing, the Sovereign power was still in the High Priest. Therefore whatsoever obedience was yeilded to any of the Judges, (who were men chosen by God extraordinarily, to save his rebellious subjects out of the hands of the enemy,) it cannot bee drawn into argument against the Right the High Priest had to the Sovereign Power, in all matters, both of Policy and Religion. And neither the Judges, nor Samuel himselfe had an ordinary, but extraordinary calling to the Government; and were obeyed by the Israelites, not out of duty, but out of reverence to their favour with God, appearing in their wisdome, courage, or

felicity. Hitherto therefore the Right of Regulating both the Policy, and the Religion, were inseparable.

Of The Rights Of The Kings Of Israel

To the Judges, succeeded Kings; And whereas before, all authority, both in Religion, and Policy, was in the High Priest; so now it was all in the King. For the Sovereignty over the people, which was before, not onely by vertue of the Divine Power, but also by a particular pact of the Israelites in God, and next under him, in the High Priest, as his Viceregent on earth, was cast off by the People, with the consent of God himselfe. For when they said to Samuel (1 Sam. 8.5.) “make us a King to judge us, like all the Nations,” they signified that they would no more bee governed by the commands that should bee laid upon them by the Priest, in the name of God; but by one that should command them in the same manner that all other nations were commanded; and consequently in deposing the High Priest of Royall authority, they deposed that peculiar Government of God. And yet God consented to it, saying to Samuel (verse 7.) “Hearken unto the voice of the People, in all that they shall say unto thee; for they have not rejected thee, but they have rejected mee, that I should not reign over them.” Having therefore rejected God, in whose Right the Priests governed, there was no authority left to the Priests, but such as the King was pleased to allow them; which was more, or lesse, according as the Kings were good, or evill. And for the Government of Civill affaires, it is manifest, it was all in the hands of the King. For in the same Chapter, verse 20. They say they will be like all the Nations; that their King shall be their Judge, and goe before them, and fight their battells; that is, he shall have the whole authority, both in Peace and War. In which is contained also the ordering of Religion; for there was no other Word of God in that time, by which to regulate Religion, but the Law of Moses, which was their Civill Law. Besides, we read (1 Kings 2.27.) that Solomon “thrust out Abiathar from being Priest

before the Lord.” He had therefore authority over the High Priest, as over any other Subject; which is a great mark of Supremacy in Religion. And we read also (1 Kings 8.) that hee dedicated the Temple; that he blessed the People; and that he himselfe in person made that excellent prayer, used in the Consecrations of all Churches, and houses of Prayer; which is another great mark of Supremacy in Religion. Again, we read (2 Kings 22.) that when there was question concerning the Book of the Law found in the Temple, the same was not decided by the High Priest, but Josiah sent both him, and others to enquire concerning it, of Hulda, the Prophetesse; which is another mark of the Supremacy in Religion. Lastly, wee read (1 Chro. 26.30.) that David made Hashabiah and his brethren, Hebronites, Officers of Israel among them Westward, “in all businesse of the Lord, and in the service of the King.” Likewise (verse 32.) that hee made other Hebronites, “rulers over the Reubenites, the Gadites, and the halfe tribe of Manasseh” (these were the rest of Israel that dwelt beyond Jordan) “for every matter pertaining to God, and affairs of the King.” Is not this full Power, both Temporall and Spirituall, as they call it, that would divide it? To conclude; from the first institution of Gods Kingdome, to the Captivity, the Supremacy of Religion, was in the same hand with that of the Civill Sovereignty; and the Priests office after the election of Saul, was not Magisteriall, but Ministeriall.

The Practice Of Supremacy In Religion, Was Not In The Time Of The Kings,

According To The Right Thereof

Notwithstanding the government both in Policy and Religion, were joined, first in the High Priests, and afterwards in the Kings, so far forth as concerned the Right; yet it appeareth by the same Holy History, that the people understood it not; but there being amongst them a great part, and probably the greatest part, that no longer than they saw great miracles, or (which is equivalent to a miracle) great

abilities, or great felicity in the enterprises of their Governours, gave sufficient credit, either to the fame of Moses, or to the Colloquies between God and the Priests; they took occasion as oft as their Governours displeased them, by blaming sometimes the Policy, sometimes the Religion, to change the Government, or revolt from their Obedience at their pleasure: And from thence proceeded from time to time the civill troubles, divisions, and calamities of the Nation. As for example, after the death of Eleazar and Joshua, the next generation which had not seen the wonders of God, but were left to their own weak reason, not knowing themselves obliged by the Covenant of a Sacerdotall Kingdome, regarded no more the Commandement of the Priest, nor any law of Moses, but did every man that which was right in his own eyes; and obeyed in Civill affairs, such men, as from time to time they thought able to deliver them from the neighbour Nations that oppressed them; and consulted not with God (as they ought to doe,) but with such men, or women, as they guessed to bee Prophets by their Praedictions of things to come; and thought they had an Idol in their Chappel, yet if they had a Levite for their Chaplain, they made account they worshipped the God of Israel.

And afterwards when they demanded a King, after the manner of the nations; yet it was not with a design to depart from the worship of God their King; but despairing of the justice of the sons of Samuel, they would have a King to judg them in Civill actions; but not that they would allow their King to change the Religion which they thought was recommended to them by Moses. So that they alwaies kept in store a pretext, either of Justice, or Religion, to discharge themselves of their obedience, whensoever they had hope to prevaile. Samuel was displeased with the people, for that they desired a King, (for God was their King already, and Samuel had but an authority under him); yet did Samuel, when Saul observed not his counsell, in destroying Agag as God had commanded, anoint another King, namely David, to take the succession from his heirs. Rehoboam was no Idolater; but when the people thought him an Oppressor; that Civil pretence carried from him ten Tribes to Jeroboam an Idolater. And generally

through the whole History of the Kings, as well of Judah, as of Israel, there were Prophets that alwaies controlled the Kings, for transgressing the Religion; and sometimes also for Errours of State; (2 Chro. 19. 2.) as Jehosaphat was reprov'd by the Prophet Jehu, for aiding the King of Israel against the Syrians; and Hezekiah, by Isaiah, for shewing his treasures to the Ambassadors of Babylon. By all which it appeareth, that though the power both of State and Religion were in the Kings; yet none of them were uncontrolled in the use of it, but such as were gracious for their own naturall abilities, or felicities. So that from the practise of those times, there can no argument be drawn, that the right of Supremacy in Religion was not in the Kings, unlesse we place it in the Prophets; and conclude, that because Hezekiah praying to the Lord before the Cherubins, was not answered from thence, nor then, but afterwards by the Prophet Isaiah, therefore Isaiah was supreme Head of the Church; or because Josiah consulted Hulda the Prophetesse, concerning the Book of the Law, that therefore neither he, nor the High Priest, but Hulda the Prophetesse had the Supreme authority in matter of Religion; which I thinke is not the opinion of any Doctor.

After The Captivity The Jews Had No Setled Common-wealth

During the Captivity, the Jews had no Common-wealth at all

And after their return, though they renewed their Covenant with God, yet there was no promise made of obedience, neither to Esdras, nor to any other; And presently after they became subjects to the Greeks (from whose Customes, and Daemonology, and from the doctrine of the Cabalists, their Religion became much corrupted): In such sort as nothing can be gathered from their confusion, both in State and Religion, concerning the Supremacy in either. And therefore so far forth as concerneth the Old Testament, we may conclude, that whosoever had the Sovereignty of the Common-wealth amongst the Jews, the same had also the

Supreme Authority in matter of Gods externall worship; and represented Gods Person; that is the person of God the Father; though he were not called by the name of Father, till such time as he sent into the world his Son Jesus Christ, to redeem mankind from their sins, and bring them into his Everlasting Kingdome, to be saved for evermore. Of which we are to speak in the Chapter following.

CHAPTER XLI. OF THE OFFICE OF OUR BLESSED SAVIOUR

Three Parts Of The Office Of Christ

We find in Holy Scripture three parts of the Office of the Messiah: the first of a Redeemer, or Saviour: The second of a Pastor, Counsellour, or Teacher, that is, of a Prophet sent from God, to convert such as God hath elected to Salvation; The third of a King, and Eternall King, but under his Father, as Moses and the High Priests were in their severall times. And to these three parts are corespondent three times. For our Redemption he wrought at his first coming, by the Sacrifice, wherein he offered up himself for our sinnes upon the Crosse: our conversion he wrought partly then in his own Person; and partly worketh now by his Ministers; and will continue to work till his coming again. And after his coming again, shall begin that his glorious Reign over his elect, which is to last eternally.

His Office As A Redeemer

To the Office of a Redeemer, that is, of one that payeth the Ransome of Sin, (which Ransome is Death,) it appertaineth, that he was Sacrificed, and thereby bare upon his own head, and carryed away from us our iniquities, in such sort as God had required. Not that the death of one man, though without sinne, can satisfie for the offences of all men, in the rigour of Justice, but in the Mercy of God, that ordained such Sacrifices for sin, as he was pleased in his mercy to accept. In the old Law (as we may read, Leviticus the 16.) the Lord required, that there should every year once, bee made an Atonement for the Sins of all Israel, both Priests, and others; for the doing whereof, Aaron alone was to sacrifice for

himself and the Priests a young Bullock; and for the rest of the people, he was to receive from them two young Goats, of which he was to Sacrifice one; but as for the other, which was the Scape Goat, he was to lay his hands on the head thereof, and by a confession of the iniquities of the people, to lay them all on that head, and then by some opportune man, to cause the Goat to be led into the wilderness, and there to Escape, and carry away with him the iniquities of the people. As the Sacrifice of the one Goat was a sufficient (because an acceptable) price for the Ransome of all Israel; so the death of the Messiah, is a sufficient price, for the Sins of all mankind, because there was no more required. Our Saviour Christs sufferings seem to be here figured, as cleerly, as in the oblation of Isaac, or in any other type of him in the Old Testament: He was both the sacrificed Goat, and the Scape Goat; “Hee was oppressed, and he was afflicted (Isa. 53.7.); he opened not his mouth; he brought as a lamb to the slaughter, and as a sheep is dumbe before the shearer, so opened he not his mouth:” Here he is the Sacrificed Goat. “He hath born our Grievs, (ver.4.) and carried our sorrows;” And again, (ver. 6.) “the Lord hath laid upon him the iniquities of us all:” And so he is the Scape Goat. “He was cut off from the land of the living (ver. 8.) for the transgression of my People:” There again he is the Sacrificed Goat. And again (ver. 11.) “he shall bear their sins:” Hee is the Scape Goat. Thus is the Lamb of God equivalent to both those Goates; sacrificed, in that he dyed; and escaping, in his Resurrection; being raised opportunely by his Father, and removed from the habitation of men in his Ascension.

Christs Kingdome Not Of This World

For as much therefore, as he that Redeemeth, hath no title to the Thing Redeemed, before the Redemption, and Ransome paid; and this Ransome was the Death of the Redeemer; it is manifest, that our Saviour (as man) was not King of those that he Redeemed, before hee suffered death; that is, during that time hee

conversed bodily on the Earth. I say, he was not then King in present, by vertue of the Pact, which the faithfull make with him in Baptisme; Neverthelesse, by the renewing of their Pact with God in Baptisme, they were obliged to obey him for King, (under his Father) whensoever he should be pleased to take the Kingdome upon him. According whereunto, our Saviour himself expressly saith, (John 18.36.) “My Kingdome is not of this world.” Now seeing the Scripture maketh mention but of two worlds; this that is now, and shall remain to the day of Judgment, (which is therefore also called, The Last Day;) and that which shall bee a new Heaven, and a new Earth; the Kingdome of Christ is not to begin till the general Resurrection. And that is it which our Saviour saith, (Mat. 16.27.) “The Son of man shall come in the glory of his Father, with his Angels; and then he shall reward every man according to his works.” To reward every man according to his works, is to execute the Office of a King; and this is not to be till he come in the glory of his Father, with his Angells. When our Saviour saith, (Mat. 23.2.) “The Scribes and Pharisees sit in Moses seat; All therefore whatsoever they bid you doe, that observe and doe;” hee declareth plainly, that hee ascribeth Kingly Power, for that time, not to himselfe, but to them. And so hee hath also, where he saith, (Luke 12.14.) “Who made mee a Judge, or Divider over you?” And (John 12.47.) “I came not to judge the world, but to save the world.” And yet our Saviour came into this world that hee might bee a King, and a Judge in the world to come: For hee was the Messiah, that is, the Christ, that is, the Anointed Priest, and the Sovereign Prophet of God; that is to say, he was to have all the power that was in Moses the Prophet, in the High Priests that succeeded Moses, and in the Kings that succeeded the Priests. And St. John saies expressly (cha. ver. 22.) “The Father judgeth no man, but hath committed all judgment to the Son.” And this is not repugnant to that other place, “I came not to judge the world:” for this is spoken of the world present, the other of the world to come; as also where it is said, that at the second coming of Christ, (Mat. 19. 28.) “Yee that have followed me in the Regeneration, when the Son of man shall sit in the throne of his Glory, yee shall also sit on twelve thrones, judging the twelve tribes of Israel.”

The End Of Christs Comming Was To Renew The Covenant Of The Kingdome

Of God, And To Perswade The Elect To Imbrace It, Which Was The Second

Part Of His Office

If then Christ while hee was on Earth, had no Kingdome in this World, to what end was his first coming? It was to restore unto God, by a new Covenant, the Kingdome, which being his by the Old Covenant, had been cut off by the rebellion of the Israelites in the election of Saul. Which to doe, he was to preach unto them, that he was the Messiah, that is, the King promised to them by the Prophets; and to offer himselfe in sacrifice for the sinnes of them that should by faith submit themselves thereto; and in case the nation generally should refuse him, to call to his obedience such as should beleve in him amongst the Gentiles. So that there are two parts of our Saviours Office during his aboad upon the Earth; One to Proclaim himself the Christ; and another by Teaching, and by working of Miracles, to perswade, and prepare men to live so, as to be worthy of the Immortality Beleevers were to enjoy, at such time as he should come in majesty, to take possession of his Fathers Kingdome. And therefore it is, that the time of his preaching, is often by himself called the Regeneration; which is not properly a Kingdome, and thereby a warrant to deny obedience to the Magistrates that then were, (for hee commanded to obey those that sate then in Moses chaire, and to pay tribute to Caesar;) but onely an earnest of the Kingdome of God that was to come, to those to whom God had given the grace to be his disciples, and to beleve in him; For which cause the Godly are said to bee already in the Kingdome of Grace, as naturalized in that heavenly Kingdome.

The Preaching Of Christ Not Contrary To The Then Law Of The Jews,

Nor Of Caesar

Hitherto therefore there is nothing done, or taught by Christ, that tendeth to the diminution of the Civill Right of the Jewes, or of Caesar. For as touching the Common-wealth which then was amongst the Jews, both they that bare rule amongst them, that they that were governed, did all expect the Messiah, and Kingdome of God; which they could not have done if their Laws had forbidden him (when he came) to manifest, and declare himself. Seeing therefore he did nothing, but by Preaching, and Miracles go about to prove himselfe to be that Messiah, hee did therein nothing against their laws. The Kingdome hee claimed was to bee in another world; He taught all men to obey in the mean time them that sate in Moses seat: he allowed them to give Caesar his tribute, and refused to take upon himselfe to be a Judg. How then could his words, or actions bee seditious, or tend to the overthrow of their then Civill Government? But God having determined his sacrifice, for the reduction of his elect to their former covenanted obedience, for the means, whereby he would bring the same to effect, made use of their malice, and ingratitude. Nor was it contrary to the laws of Caesar. For though Pilate himself (to gratifie the Jews) delivered him to be crucified; yet before he did so, he pronounced openly, that he found no fault in him: And put for title of his condemnation, not as the Jews required, “that he pretended to be King;” but simply, “That hee was King of the Jews;” and notwithstanding their clamour, refused to alter it; saying, “What I have written, I have written.”

The Third Part Of His Office Was To Be King (Under His Father)

Of The Elect

As for the third part of his Office, which was to be King, I have already shewn that his Kingdome was not to begin till the Resurrection. But then he shall be

King, not onely as God, in which sense he is King already, and ever shall be, of all the Earth, in vertue of his omnipotence; but also peculiarly of his own Elect, by vertue of the pact they make with him in their Baptisme. And therefore it is, that our Saviour saith (Mat. 19.28.) that his Apostles should sit upon twelve thrones, judging the twelve tribes of Israel, “When the Son of man shall sit in the throne of his glory;” whereby he signified that he should reign then in his humane nature; and (Mat. 16.27.) “The Son of man shall come in the glory of his Father, with his Angels, and then he shall reward every man according to his works.” The same we may read, Marke 13.26. and 14.26. and more expressly for the time, Luke 22.29, 30. “I appoint unto you a Kingdome, as my Father hath appointed to mee, that you may eat and drink at my table in my Kingdome, and sit on thrones judging the twelve tribes of Israel.” By which it is manifest that the Kingdome of Christ appointed to him by his Father, is not to be before the Son of Man shall come in Glory, and make his Apostles Judges of the twelve tribes of Israel. But a man may here ask, seeing there is no marriage in the Kingdome of Heaven, whether men shall then eat, and drink; what eating therefore is meant in this place? This is expounded by our Saviour (John 6.27.) where he saith, “Labour not for the meat which perisheth, but for that meat which endureth unto everlasting life, which the Son of man shall give you.” So that by eating at Christs table, is meant the eating of the Tree of Life; that is to say, the enjoying of Immortality, in the Kingdome of the Son of Man. By which places, and many more, it is evident, that our Saviours Kingdome is to bee exercised by him in his humane nature.

Christs Authority In The Kingdome Of God Subordinate To His Father

Again, he is to be King then, no otherwise than as subordinate, or Viceregent of God the Father, as Moses was in the wilderness; and as the High Priests were before the reign of Saul; and as the Kings were after it. For it is one of the Prophecies concerning Christ, that he should be like (in Office) to Moses; “I will

raise them up a Prophet (saith the Lord, Deut. 18.18.) from amongst their Brethren like unto thee, and will put my words into his mouth,” and this similitude with Moses, is also apparent in the actions of our Saviour himself, whilst he was conversant on Earth. For as Moses chose twelve Princes of the tribes, to govern under him; so did our Saviour choose twelve Apostles, who shall sit on twelve thrones, and judge the twelve tribes of Israel; And as Moses authorized Seventy Elders, to receive the Spirit of God, and to Prophecy to the people, that is, (as I have said before,) to speak unto them in the name of God; so our Saviour also ordained seventy Disciples, to preach his Kingdome, and Salvation to all Nations. And as when a complaint was made to Moses, against those of the Seventy that prophecyed in the camp of Israel, he justified them in it, as being subservient therein to his government; so also our Saviour, when St. John complained to him of a certain man that cast out Devills in his name, justified him therein, saying, (Luke 9.50.) “Forbid him not, for hee that is not against us, is on our part.”

Again, our Saviour resembled Moses in the institution of Sacraments, both of Admission into the Kingdome of God, and of Commemoration of his deliverance of his Elect from their miserable condition. As the Children of Israel had for Sacrament of their Reception into the Kingdome of God, before the time of Moses, the rite of Circumcision, which rite having been omitted in the Wildernesse, was again restored as soon as they came into the land of Promise; so also the Jews, before the coming of our Saviour, had a rite of Baptizing, that is, of washing with water all those that being Gentiles, embraced the God of Israel. This rite St. John the Baptist used in the reception of all them that gave their names to the Christ, whom hee preached to bee already come into the world; and our Saviour instituted the same for a Sacrament to be taken by all that beleevd in him. From what cause the rite of Baptisme first proceeded, is not expressed formally in the Scripture; but it may be probably thought to be an imitation of the law of Moses, concerning Leprousie; wherein the Leprous man was commanded to be kept out of the campe of Israel for a certain time; after which time being

judged by the Priest to be clean, hee was admitted into the campe after a solemne Washing. And this may therefore bee a type of the Washing in Baptisme; wherein such men as are cleansed of the Leprousie of Sin by Faith, are received into the Church with the solemnity of Baptisme. There is another conjecture drawn from the Ceremonies of the Gentiles, in a certain case that rarely happens; and that is, when a man that was thought dead, chanced to recover, other men made scruple to converse with him, as they would doe to converse with a Ghost, unlesse hee were received again into the number of men, by Washing, as Children new born were washed from the uncleannesse of their nativity, which was a kind of new birth. This ceremony of the Greeks, in the time that Judaea was under the Dominion of Alexander, and the Greeks his successors, may probably enough have crept into the Religion of the Jews. But seeing it is not likely our Saviour would countenance a Heathen rite, it is most likely it proceeded from the Legall Ceremony of Washing after Leprosie. And for the other Sacraments, of eating the Paschall Lambe, it is manifestly imitated in the Sacrament of the Lords Supper; in which the Breaking of the Bread, and the pouring out of the Wine, do keep in memory our deliverance from the Misery of Sin, by Christs Passion, as the eating of the Paschall Lambe, kept in memory the deliverance of the Jewes out of the Bondage of Egypt. Seeing therefore the authority of Moses was but subordinate, and hee but a Lieutenant to God; it followeth, that Christ, whose authority, as man, was to bee like that of Moses, was no more but subordinate to the authority of his Father. The same is more expressely signified, by that that hee teacheth us to pray, "Our Father, Let thy Kingdome come;" and, "For thine is the Kingdome, the power and the Glory;" and by that it is said, that "Hee shall come in the Glory of his Father;" and by that which St. Paul saith, (1 Cor. 15.24.) "then commeth the end, when hee shall have delivered up the Kingdome to God, even the Father;" and by many other most expresse places.

One And The Same God Is The Person Represented By Moses, And By Christ

Our Saviour therefore, both in Teaching, and Reigning, representeth (as Moses Did) the Person of God; which God from that time forward, but not before, is called the Father; and being still one and the same substance, is one Person as represented by Moses, and another Person as represented by his Sonne the Christ. For Person being a relative to a Representer, it is consequent to plurality of Representers, that there bee a plurality of Persons, though of one and the same Substance.

CHAPTER XLII. OF POWER ECCLESIASTICALL

FOR THE UNDERSTANDING of POWER ECCLESIASTICALL, what, and in whom it is, we are to distinguish the time from the Ascension of our Saviour, into two parts; one before the Conversion of Kings, and men endued with Sovereign Civill Power; the other after their Conversion. For it was long after the Ascension, before any King, or Civill Sovereign embraced, and publicquely allowed the teaching of Christian Religion.

Of The Holy Spirit That Fel On The Apostles

And for the time between, it is manifest, that the Power Ecclesiasticall, was in the Apostles; and after them in such as were by them ordained to Preach the Gospell, and to convert men to Christianity, and to direct them that were converted in the way of Salvation; and after these the Power was delivered again to others by these ordained, and this was done by Imposition of hands upon such as were ordained; by which was signified the giving of the Holy Spirit, or Spirit of God, to those whom they ordained Ministers of God, to advance his Kingdome. So that Imposition of hands, was nothing else but the Seal of their Commission to Preach Christ, and teach his Doctrine; and the giving of the Holy Ghost by that ceremony of Imposition of hands, was an imitation of that which Moses did. For Moses used the same ceremony to his Minister Joshua, as wee read Deuteronomy 34. ver. 9. “And Joshua the son of Nun was full of the Spirit of Wisdome; for Moses had laid his hands upon him.” Our Saviour therefore between his Resurrection, and Ascension, gave his Spirit to the Apostles; first, by “Breathing on them, and saying,” (John 20.22.) “Receive yee the Holy Spirit;” and after his Ascension

(Acts 2.2, 3.) by sending down upon them, a “mighty wind, and Cloven tongues of fire;” and not by Imposition of hands; as neither did God lay his hands on Moses; and his Apostles afterward, transmitted the same Spirit by Imposition of hands, as Moses did to Joshua. So that it is manifest hereby, in whom the Power Ecclesiasticall continually remained, in those first times, where there was not any Christian Common-wealth; namely, in them that received the same from the Apostles, by successive laying on of hands.

Of The Trinity

Here wee have the Person of God born now the third time. For as Moses, and the High Priests, were Gods Representative in the Old Testament; and our Saviour himselfe as Man, during his abode on earth: So the Holy Ghost, that is to say, the Apostles, and their successors, in the Office of Preaching, and Teaching, that had received the Holy Spirit, have Represented him ever since. But a Person, (as I have shewn before, [chapt. 16.].) is he that is Represented, as often as hee is Represented; and therefore God, who has been Represented (that is, Personated) thrice, may properly enough be said to be three Persons; though neither the word Person, nor Trinity be ascribed to him in the Bible. St. John indeed (1 Epist. 5.7.) saith, “There be three that bear witnesse in heaven, the Father, the Word, and the Holy Spirit; and these Three are One:” But this disagreeeth not, but accordeth fitly with three Persons in the proper signification of Persons; which is, that which is Represented by another. For so God the Father, as Represented by Moses, is one Person; and as Represented by his Sonne, another Person, and as Represented by the Apostles, and by the Doctors that taught by authority from them derived, is a third Person; and yet every Person here, is the Person of one and the same God. But a man may here ask, what it was whereof these three bare witnesse. St. John therefore tells us (verse 11.) that they bear witnesse, that “God hath given us eternall life in his Son.” Again, if it should be asked, wherein that testimony

appeareth, the Answer is easie; for he hath testified the same by the miracles he wrought, first by Moses; secondly, by his Son himself; and lastly by his Apostles, that had received the Holy Spirit; all which in their times Represented the Person of God; and either prophecyed, or preached Jesus Christ. And as for the Apostles, it was the character of the Apostleship, in the twelve first and great Apostles, to bear Witnesse of his Resurrection; as appeareth expressly (Acts 1. ver. 21,22.) where St Peter, when a new Apostle was to be chosen in the place of Judas Iscariot, useth these words, “Of these men which have companied with us all the time that the Lord Jesus went in and out amongst us, beginning at the Baptisme of John, unto that same day that hee was taken up from us, must one bee ordained to be a Witnesse with us of his Resurrection:” which words interpret the Bearing of Witnesse, mentioned by St. John. There is in the same place mentioned another Trinity of Witnesses in Earth. For (ver. 8.) he saith, “there are three that bear Witnesse in Earth, the Spirit, and the Water, and the Bloud; and these three agree in one:” that is to say, the graces of Gods Spirit, and the two Sacraments, Baptisme, and the Lords Supper, which all agree in one Testimony, to assure the consciences of beleevvers, of eternall life; of which Testimony he saith (verse 10.) “He that beleeveth on the Son of man hath the Witnesse in himselfe.” In this Trinity on Earth the Unity is not of the thing; for the Spirit, the Water, and the Bloud, are not the same substance, though they give the same testimony: But in the Trinity of Heaven, the Persons are the persons of one and the same God, though Represented in three different times and occasions. To conclude, the doctrine of the Trinity, as far as can be gathered directly from the Scripture, is in substance this; that God who is alwaies One and the same, was the Person Represented by Moses; the Person Represented by his Son Incarnate; and the Person Represented by the Apostles. As Represented by the Apostles, the Holy Spirit by which they spake, is God; As Represented by his Son (that was God and Man), the Son is that God; As represented by Moses, and the High Priests, the Father, that is to say, the Father of our Lord Jesus Christ, is that God: From whence we may gather the reason why those names Father, Son, and Holy Spirit

in the signification of the Godhead, are never used in the Old Testament: For they are Persons, that is, they have their names from Representing; which could not be, till divers men had Represented Gods Person in ruling, or in directing under him.

Thus wee see how the Power Ecclesiasticall was left by our Saviour to the Apostles; and how they were (to the end they might the better exercise that Power,) endued with the Holy Spirit, which is therefore called sometime in the New Testament Paracletus which signifieth an Assister, or one called to for helpe, though it bee commonly translated a Comforter. Let us now consider the Power it selfe, what it was, and over whom.

The Power Ecclesiasticall Is But The Power To Teach

Cardinall Bellarmine in his third generall Controversie, hath handled a great many questions concerning the Ecclesiasticall Power of the Pope of Rome; and begins with this, Whether it ought to be Monarchicall, Aristocraticall, or Democraticall. All which sorts of Power, are Sovereign, and Coercive. If now it should appear, that there is no Coercive Power left them by our Saviour; but onely a Power to proclaim the Kingdom of Christ, and to perswade men to submit themselves thereunto; and by precepts and good counsell, to teach them that have submitted, what they are to do, that they may be received into the Kingdom of God when it comes; and that the Apostles, and other Ministers of the Gospel, are our Schoolemasters, and not our Commanders, and their Precepts not Laws, but wholesome Counsells then were all that dispute in vain.

An Argument Thereof, The Power Of Christ Himself

I have shewn already (in the last Chapter,) that the Kingdome of Christ is not of this world: therefore neither can his Ministers (unlesse they be Kings,) require

obedience in his name. For if the Supreme King, have not his Regall Power in this world; by what authority can obedience be required to his Officers? As my Father sent me, (so saith our Saviour) I send you. But our Saviour was sent to perswade the Jews to return to, and to invite the Gentiles, to receive the Kingdome of his Father, and not to reign in Majesty, no not, as his Fathers Lieutenant, till the day of Judgment.

From The Name Of Regeneration

The time between the Ascension, and the generall Resurrection, is called, not a Reigning, but a Regeneration; that is, a Preparation of men for the second and glorious coming of Christ, at the day of Judgment; as appeareth by the words of our Saviour, Mat. 19.28. “You that have followed me in the Regeneration, when the Son of man shall sit in the throne of his glory, you shall also sit upon twelve Thrones;” And of St. Paul (Ephes. 6.15.) “Having your feet shod with the Preparation of the Gospell of Peace.”

From The Comparison Of It, With Fishing, Leaven, Seed

And is compared by our Saviour, to Fishing; that is, to winning men to obedience, not by Coercion, and Punishing; but by Perswasion: and therefore he said not to his Apostles, hee would make them so many Nimrods, Hunters Of Men; But Fishers Of Men. It is compared also to Leaven; to Sowing of Seed, and to the Multiplication of a grain of Mustard-seed; by all which Compulsion is excluded; and consequently there can in that time be no actual Reigning. The work of Christs Ministers, is Evangelization; that is, a Proclamation of Christ, and a preparation for his second comming; as the Evangelization of John Baptist, was a preparation to his first coming.

From The Nature Of Faith:

Again, the Office of Christs Ministers in this world, is to make men Beleeve, and have Faith in Christ: But Faith hath no relation to, nor dependence at all upon Compulsion, or Commandement; but onely upon certainty, or probability of Arguments drawn from Reason, or from something men beleeve already. Therefore the Ministers of Christ in this world, have no Power by that title, to Punish any man for not Beleeving, or for Contradicting what they say; they have I say no Power by that title of Christs Ministers, to Punish such: but if they have Sovereign Civill Power, by politick institution, then they may indeed lawfully Punish any Contradiction to their laws whatsoever: And St. Paul, of himselfe and other then Preachers of the Gospell saith in expresse words, (2 Cor. 1.24.) “Wee have no Dominion over your Faith, but are Helpers of your Joy.”

From The Authority Christ Hath Left To Civill Princes

Another Argument, that the Ministers of Christ in this present world have no right of Commanding, may be drawn from the lawfull Authority which Christ hath left to all Princes, as well Christians, as Infidels. St. Paul saith (Col. 3.20.) “Children obey your Parents in all things; for this is well pleasing to the Lord.” And ver. 22. “Servants obey in all things your Masters according to the flesh, not with eye-service, as men-pleasers, but in singleness of heart, as fearing the Lord;” This is spoken to them whose Masters were Infidells; and yet they are bidden to obey them In All Things. And again, concerning obedience to Princes. (Rom. 13. the first 6. verses) exhorting to “be subject to the Higher Powers,” he saith, “that all Power is ordained of God;” and “that we ought to be subject to them, not onely for” fear of incurring their “wrath, but also for conscience sake.” And St. Peter, (1

Epist. chae ver. 13, 14, 15.) “Submit your selves to every Ordinance of Man, for the Lords sake, whether it bee to the King, as Supreme, or unto Governours, as to them that be sent by him for the punishment of evill doers, and for the praise of them that doe well; for so is the will of God.” And again St. Paul (Tit. 3.1.) “Put men in mind to be subject to Principalities, and Powers, and to obey Magistrates.” These Princes, and Powers, whereof St. Peter, and St. Paul here speak, were all Infidels; much more therefore we are to obey those Christians, whom God hath ordained to have Sovereign Power over us. How then can wee be obliged to doe any thing contrary to the Command of the King, or other Sovereign Representant of the Common-wealth, whereof we are members, and by whom we look to be protected? It is therefore manifest, that Christ hath not left to his Ministers in this world, unlesse they be also endued with Civill Authority, any authority to Command other men.

What Christians May Do To Avoid Persecution

But what (may some object) if a King, or a Senate, or other Sovereign Person forbid us to beleieve in Christ? To this I answer, that such forbidding is of no effect, because Beleef, and Unbeleef never follow mens Commands. Faith is a gift of God, which Man can neither give, nor take away by promise of rewards, or menaces of torture. And if it be further asked, What if wee bee commanded by our lawfull Prince, to say with our tongue, wee beleieve not; must we obey such command? Profession with the tongue is but an externall thing, and no more then any other gesture whereby we signifie our obedience; and wherein a Christian, holding firmly in his heart the Faith of Christ, hath the same liberty which the Prophet Elisha allowed to Naaman the Syrian. Naaman was converted in his heart to the God of Israel; For hee saith (2 Kings 5.17.) “Thy servant will henceforth offer neither burnt offering, nor sacrifice unto other Gods but unto the Lord. In this thing the Lord pardon thy servant, that when my Master goeth into the house

of Rimmon to worship there, and he leaneth on my hand, and I bow my selfe in the house of Rimmon; when I bow my selfe in the house of Rimmon, the Lord pardon thy servant in this thing.” This the Prophet approved, and bid him “Goe in peace.” Here Naaman beleevd in his heart; but by bowing before the Idol Rimmon, he denyed the true God in effect, as much as if he had done it with his lips. But then what shall we answer to our Saviours saying, “Whosoever denyeth me before men, I will deny him before my Father which is in Heaven?” This we may say, that whatsoever a Subject, as Naaman was, is compelled to in obedience to his Sovereign, and doth it not in order to his own mind, but in order to the laws of his country, that action is not his, but his Sovereigns; nor is it he that in this case denyeth Christ before men, but his Governour, and the law of his countrey. If any man shall accuse this doctrine, as repugnant to true, and unfeigned Christianity; I ask him, in case there should be a subject in any Christian Common-wealth, that should be inwardly in his heart of the Mahometan Religion, whether if his Sovereign Command him to bee present at the divine service of the Christian Church, and that on pain of death, he think that Mamometan obliged in conscience to suffer death for that cause, rather than to obey that command of his lawful Prince. If he say, he ought rather to suffer death, then he authorizeth all private men, to disobey their Princes, in maintenance of their Religion, true, or false; if he say, he ought to bee obedient, then he alloweth to himself, that which hee denyeth to another, contrary to the words of our Saviour, “Whatsoever you would that men should doe unto you, that doe yee unto them;” and contrary to the Law of Nature, (which is the indubitable everlasting Law of God) “Do not to another, that which thou wouldest not he should doe unto thee.”

Of Martyrs

But what then shall we say of all those Martyrs we read of in the History of the Church, that they have needlessly cast away their lives? For answer hereunto, we

are to distinguish the persons that have been for that cause put to death; whereof some have received a Calling to preach, and professe the Kingdome of Christ openly; others have had no such Calling, nor more has been required of them than their owne faith. The former sort, if they have been put to death, for bearing witnesse to this point, that Jesus Christ is risen from the dead, were true Martyrs; For a Martyr is, (to give the true definition of the word) a Witnesse of the Resurrection of Jesus the Messiah; which none can be but those that conversed with him on earth, and saw him after he was risen: For a Witnesse must have seen what he testifieth, or else his testimony is not good. And that none but such, can properly be called Martyrs of Christ, is manifest out of the words of St. Peter, Act. 1.21, 22. "Wherefore of these men which have companyed with us all the time that the Lord Jesus went in and out amongst us, beginning from the Baptisme of John unto that same day hee was taken up from us, must one be ordained to be a Martyr (that is a Witnesse) with us of his Resurrection:" Where we may observe, that he which is to bee a Witnesse of the truth of the Resurrection of Christ, that is to say, of the truth of this fundamentall article of Christian Religion, that Jesus was the Christ, must be some Disciple that conversed with him, and saw him before, and after his Resurrection; and consequently must be one of his originall Disciples: whereas they which were not so, can Witnesse no more, but that their antecessors said it, and are therefore but Witnesses of other mens testimony; and are but second Martyrs, or Martyrs of Christs Witnesses.

He, that to maintain every doctrine which he himself draweth out of the History of our Saviours life, and of the Acts, or Epistles of the Apostles; or which he beleeveth upon the authority of a private man, wil oppose the Laws and Authority of the Civill State, is very far from being a Martyr of Christ, or a Martyr of his Martyrs. 'Tis one Article onely, which to die for, meriteth so honorable a name; and that Article is this, that Jesus Is The Christ; that is to say, He that hath redeemed us, and shall come again to give us salvation, and eternall life in his glorious Kingdome. To die for every tenet that serveth the ambition, or profit of the Clergy, is not required; nor is it the Death of the Witnesse, but the

Testimony it self that makes the Martyr: for the word signifieth nothing else, but the man that beareth Witnesse, whether he be put to death for his testimony, or not.

Also he that is not sent to preach this fundamentall article, but taketh it upon him of his private authority, though he be a Witnesse, and consequently a Martyr, either primary of Christ, or secondary of his Apostles, Disciples, or their Successors; yet is he not obliged to suffer death for that cause; because being not called thereto, tis not required at his hands; nor ought hee to complain, if he loseth the reward he expecteth from those that never set him on work. None therefore can be a Martyr, neither of the first, nor second degree, that have not a warrant to preach Christ come in the flesh; that is to say, none, but such as are sent to the conversion of Infidels. For no man is a Witnesse to him that already beleeveth, and therefore needs no Witnesse; but to them that deny, or doubt, or have not heard it. Christ sent his Apostles, and his Seventy Disciples, with authority to preach; he sent not all that beleevd: And he sent them to unbelievers; “I send you (saith he) as sheep amongst wolves;” not as sheep to other sheep.

Argument From The Points Of Their Commission

Lastly the points of their Commission, as they are expressly set down in the Gospel, contain none of them any authority over the Congregation.

To Preach

We have first (Mat. 10.) that the twelve Apostles were sent “to the lost sheep of the house of Israel,” and commanded to Preach, “that the Kingdome of God was at hand.” Now Preaching in the originall, is that act, which a Crier, Herald, or other Officer useth to doe publicquely in Proclaiming of a King. But a Crier hath

not right to Command any man. And (Luke 10.2.) the seventy Disciples are sent out, “as Labourers, not as Lords of the Harvest;” and are bidden (verse 9.) to say, “The Kingdome of God is come nigh unto you;” and by Kingdome here is meant, not the Kingdome of Grace, but the Kingdome of Glory; for they are bidden to denounce it (ver. 11.) to those Cities which shall not receive them, as a threatning, that it shall be more tolerable in that day for Sodome, than for such a City. And (Mat. 20.28.) our Saviour telleth his Disciples, that sought Priority of place, their Office was to minister, even as the Son of man came, not to be ministred unto, but to minister. Preachers therefore have not Magisteriall, but Ministeriall power: “Bee not called Masters, (saith our Saviour, Mat. 23.10) for one is your Master, even Christ.”

And Teach

Another point of their Commission, is, to Teach All Nations; as it is in Mat. 28.19. or as in St. Mark 16.15 “Goe into all the world, and Preach the Gospel to every creature.” Teaching therefore, and Preaching is the same thing. For they that Proclaim the coming of a King, must withall make known by what right he commeth, if they mean men shall submit themselves unto him: As St. Paul did to the Jews of Thessalonica, when “three Sabbath days he reasoned with them out of the Scriptures, opening, and alledging that Christ must needs have suffered, and risen again from the dead, and that this Jesus is Christ.” But to teach out of the Old Testament that Jesus was Christ, (that is to say, King,) and risen from the dead, is not to say, that men are bound after they beleve it, to obey those that tell them so, against the laws, and commands of their Sovereigns; but that they shall doe wisely, to expect the coming of Christ hereafter, in Patience, and Faith, with Obedience to their present Magistrates.

To Baptize;

Another point of their Commission, is to Baptize, “in the name of the Father, and of the Son, and of the Holy Ghost.” What is Baptisme? Dipping into water. But what is it to Dip a man into the water in the name of any thing? The meaning of these words of Baptisme is this. He that is Baptized, is Dipped or Washed, as a sign of becomming a new man, and a loyall subject to that God, whose Person was represented in old time by Moses, and the High Priests, when he reigned over the Jews; and to Jesus Christ, his Sonne, God, and Man, that hath redeemed us, and shall in his humane nature Represent his Fathers Person in his eternall Kingdome after the Resurrection; and to acknowledge the Doctrine of the Apostles, who assisted by the Spirit of the Father, and of the Son, were left for guides to bring us into that Kingdome, to be the onely, and assured way thereunto. This, being our promise in Baptisme; and the Authority of Earthly Sovereigns being not to be put down till the day of Judgment; (for that is expressly affirmed by S. Paul 1 Cor. 15. 22, 23, 24. where he saith, “As in Adam all die, so in Christ all shall be made alive. But every man in his owne order, Christ the first fruits, afterward they that are Christs, at his comming; Then Commeth the end, when he shall have delivered up the Kingdome of God, even the Father, when he shall have put down all Rule, and all Authority and Power”) it is manifest, that we do not in Baptisme constitute over us another authority, by which our externall actions are to be governed in this life; but promise to take the doctrine of the Apostles for our direction in the way to life eternall.

And To Forgive, And Retain Sinnes

The Power of Remission, And Retention Of Sinnes, called also the Power of Loosing, and Binding, and sometimes the Keyes Of The Kingdome Of Heaven, is a consequence of the Authority to Baptize, or refuse to Baptize. For Baptisme is

the Sacrament of Allegiance, of them that are to be received into the Kingdome of God; that is to say, into Eternall life; that is to say, to Remission of Sin: For as Eternall life was lost by the Committing, so it is recovered by the Remitting of mens Sins. The end of Baptisme is Remission of Sins: and therefore St. Peter, when they that were converted by his Sermon on the day of Pentecost, asked what they were to doe, advised them to “repent, and be Baptized in the name of Jesus, for the Remission of Sins.” And therefore seeing to Baptize is to declare the Reception of men into Gods Kingdome; and to refuse to Baptize is to declare their Exclusion; it followeth, that the Power to declare them Cast out, or Retained in it, was given to the same Apostles, and their Substitutes, and Successors. And therefore after our Saviour had breathed upon them, saying, (John 20.22.) “Receive the Holy Ghost,” hee addeth in the next verse, “Whose soever Sins ye Remit, they are Remitted unto them; and whose soever Sins ye Retain, they are Retained.” By which words, is not granted an Authority to Forgive, or Retain Sins, simply and absolutely, as God Forgiveth or Retaineth them, who knoweth the Heart of man, and truth of his Penitence and Conversion; but conditionally, to the Penitent: And this Forgivenessse, or Absolution, in case the absolved have but a feigned Repentance, is thereby without other act, or sentence of the Absolvent, made void, and hath no effect at all to Salvation, but on the contrary, to the Aggravation of his Sin. Therefore the Apostles, and their Successors, are to follow but the outward marks of Repentance; which appearing, they have no Authority to deny Absolution; and if they appeare not, they have no authority to Absolve. The same also is to be observed in Baptisme: for to a converted Jew, or Gentile, the Apostles had not the Power to deny Baptisme; nor to grant it to the Un-penitent. But seeing no man is able to discern the truth of another mans Repentance, further than by externall marks, taken from his words, and actions, which are subject to hypocrisie; another question will arise, Who it is that is constituted Judge of those marks. And this question is decided by our Saviour himself; (Mat. 18. 15, 16, 17.) “If thy Brother (saith he) shall trespasse against thee, go and tell him his fault between thee, and him alone; if he shall hear thee,

thou hast gained thy Brother. But if he will not hear thee, then take with thee one, or two more. And if he shall neglect to hear them, tell it unto the Church, let him be unto thee as an Heathen man, and a Publican.” By which it is manifest, that the Judgment concerning the truth of Repentance, belonged not to any one Man, but to the Church, that is, to the Assembly of the Faithfull, or to them that have authority to bee their Representant. But besides the Judgment, there is necessary also the pronouncing of Sentence: And this belonged alwaies to the Apostle, or some Pastor of the Church, as Prolocutor; and of this our Saviour speaketh in the 18 verse, “Whatsoever ye shall bind on earth, shall be bound in heaven; and whatsoever ye shall loose on earth, shall be loosed in heaven.” And comformable hereunto was the practise of St. Paul (1 Cor. 5.3, 4, & 5.) where he saith, “For I verily, as absent in body, but present in spirit, have determined already, as though I were present, concerning him that hath so done this deed; In the name of our Lord Jesus Christ when ye are gathered together, and my spirit, with the power of our Lord Jesus Christ, To deliver such a one to Satan;” that is to say, to cast him out of the Church, as a man whose Sins are not Forgiven. Paul here pronounceth the Sentence; but the Assembly was first to hear the Cause, (for St. Paul was absent;) and by consequence to condemn him. But in the same chapter (ver. 11, 12.) the Judgment in such a case is more expressly attributed to the Assembly: “But now I have written unto you, not to keep company, if any man that is called a Brother be a Fornicator, &c. with such a one no not to eat. For what have I to do to judg them that are without? Do not ye judg them that are within?” The Sentence therefore by which a man was put out of the Church, was pronounced by the Apostle, or Pastor; but the Judgment concerning the merit of the cause, was in the Church; that is to say, (as the times were before the conversion of Kings, and men that had Sovereign Authority in the Common-wealth,) the Assembly of the Christians dwelling in the same City; as in Corinth, in the Assembly of the Christians of Corinth.

Of Excommunication

This part of the Power of the Keyes, by which men were thrust out from the Kingdome of God, is that which is called Excommunication; and to excommunicate, is in the Originall, Aposunagogon Poiein, To Cast Out Of The Synagogue; that is, out of the place of Divine service; a word drawn from the custom of the Jews, to cast out of their Synagogues, such as they thought in manners, or doctrine, contagious, as Lepers were by the Law of Moses separated from the congregation of Israel, till such time as they should be by the Priest pronounced clean.

The Use Of Excommunication Without Civill Power.

The Use and Effect of Excommunication, whilst it was not yet strengthened with the Civill Power, was no more, than that they, who were not Excommunicate, were to avoid the company of them that were. It was not enough to repute them as Heathen, that never had been Christians; for with such they might eate, and drink; which with Excommunicate persons they might not do; as appeareth by the words of St. Paul, (1 Cor. 5. ver. 9, 10, &c.) where he telleth them, he had formerly forbidden them to “company with Fornicators;” but (because that could not bee without going out of the world,) he restraineth it to such Fornicators, and otherwise vicious persons, as were of the brethren; “with such a one” (he saith) they ought not to keep company, “no, not to eat.” And this is no more than our Saviour saith (Mat. 18.17.) “Let him be to thee as a Heathen, and as a Publican.” For Publicans (which signifieth Farmers, and Receivers of the revenue of the Common-wealth) were so hated, and detested by the Jews that were to pay for it, as that Publican and Sinner were taken amongst them for the same thing: Insomuch, as when our Saviour accepted the invitation of Zacchaeus a Publican; though it were to Convert him, yet it was objected to him as a Crime. And

therefore, when our Saviour, to Heathen, added Publican, he did forbid them to eat with a man Excommunicate.

As for keeping them out of their Synagogues, or places of Assembly, they had no Power to do it, but that of the owner of the place, whether he were Christian, or Heathen. And because all places are by right, in the Dominion of the Commonwealth; as well hee that was Excommunicated, as hee that never was Baptized, might enter into them by Commission from the Civill Magistrate; as Paul before his conversion entred into their Synagogues at Damascus, (Acts 9.2.) to apprehend Christians, men and women, and to carry them bound to Jerusalem, by Commission from the High Priest.

Of No Effect Upon An Apostate

By which it appears, that upon a Christian, that should become an Apostate, in a place where the Civill Power did persecute, or not assist the Church, the effect of Excommunication had nothing in it, neither of dammage in this world, nor of terrour: Not of terrour, because of their unbeleef; nor of dammage, because they returned thereby into the favour of the world; and in the world to come, were to be in no worse estate, then they which never had beleaved. The dammage redounded rather to the Church, by provocation of them they cast out, to a freer execution of their malice.

But Upon The Faithfull Only

Excommunication therefore had its effect onely upon those, that beleaved that Jesus Christ was to come again in Glory, to reign over, and to judge both the quick, and the dead, and should therefore refuse entrance into his Kingdom, to those whose Sins were Retained; that is, to those that were Excommunicated by

the Church. And thence it is that St. Paul calleth Excommunication, a delivery of the Excommunicate person to Satan. For without the Kingdom of Christ, all other Kingdomes after Judgment, are comprehended in the Kingdome of Satan. This is it that the faithfull stood in fear of, as long as they stood Excommunicate, that is to say, in an estate wherein their sins were not Forgiven. Whereby wee may understand, that Excommunication in the time that Christian Religion was not authorized by the Civill Power, was used onely for a correction of manners, not of errours in opinion: for it is a punishment, whereof none could be sensible but such as beleaved, and expected the coming again of our Saviour to judge the world; and they who so beleaved, needed no other opinion, but onely uprightnesse of life, to be saved.

For What Fault Lyeth Excommunication

There Lyeth Excommunication for Injustice; as (Mat. 18.) If thy Brother offend thee, tell it him privately; then with Witnesses; lastly, tell the Church; and then if he obey not, "Let him be to thee as an Heathen man, and a Publican." And there lyeth Excommunication for a Scandalous Life, as (1 Cor. 5. 11.) "If any man that is called a Brother, be a Fornicator, or Covetous, or an Idolater, or a Drunkard, or an Extortioner, with such a one yee are not to eat." But to Excommunicate a man that held this foundation, that Jesus Was The Christ, for difference of opinion in other points, by which that Foundation was not destroyed, there appeareth no authority in the Scripture, nor example in the Apostles. There is indeed in St. Paul (Titus 3.10.) a text that seemeth to be to the contrary. "A man that is an Haeretique, after the first and second admonition, reject." For an Haeretique, is he, that being a member of the Church, teacheth neverthelesse some private opinion, which the Church has forbidden: and such a one, S. Paul adviseth Titus, after the first, and second admonition, to Reject. But to Reject (in this place) is not to Excommunicate the Man; But to Give Over Admonishing Him, To Let Him

Alone, To Set By Disputing With Him, as one that is to be convinced onely by himselfe. The same Apostle saith (2 Tim. 2.23.) “Foolish and unlearned questions avoid;” The word Avoid in this place, and Reject in the former, is the same in the Originall, paraitou: but Foolish questions may bee set by without Excommunication. And again, (Tit. 3.93) “Avoid Foolish questions,” where the Originall, periistaso, (set them by) is equivalent to the former word Reject. There is no other place that can so much as colourably be drawn, to countenance the Casting out of the Church faithfull men, such as beleevd the foundation, onely for a singular superstructure of their own, proceeding perhaps from a good & pious conscience. But on the contrary, all such places as command avoiding such disputes, are written for a Lesson to Pastors, (such as Timothy and Titus were) not to make new Articles of Faith, by determining every small controversie, which oblige men to a needlesse burthen of Conscience, or provoke them to break the union of the Church. Which Lesson the Apostles themselves observed well. S. Peter and S. Paul, though their controversie were great, (as we may read in Gal. 2.11.) yet they did not cast one another out of the Church. Neverthelesse, during the Apostles time, there were other Pastors that observed it not; As Diotrephes (3 John 9. &c.) who cast out of the Church, such as S. John himself thought fit to be received into it, out of a pride he took in Praeeminence; so early it was, that Vainglory, and Ambition had found entrance into the Church of Christ.

Of Persons Liable To Excommunication

That a man be liable to Excommunication, there be many conditions requisite; as First, that he be a member of some Commonalty, that is to say, of some lawfull Assembly, that is to say, of some Christian Church, that hath power to judge of the cause for which hee is to bee Excommunicated. For where there is no community, there can bee no Excommunication; nor where there is no power to Judge, can there bee any power to give Sentence. From hence it followeth, that

one Church cannot be Excommunicated by another: For either they have equall power to Excommunicate each other, in which case Excommunication is not Discipline, nor an act of Authority, but Schisme, and Dissolution of charity; or one is so subordinate to the other, as that they both have but one voice, and then they be but one Church; and the part Excommunicated, is no more a Church, but a dissolute number of individuall persons.

And because the sentence of Excommunication, importeth an advice, not to keep company, nor so much as to eat with him that is Excommunicate, if a Sovereign Prince, or Assembly bee Excommunicate, the sentence is of no effect. For all Subjects are bound to be in the company and presence of their own Sovereign (when he requireth it) by the law of Nature; nor can they lawfully either expell him from any place of his own Dominion, whether profane or holy; nor go out of his Dominion, without his leave; much lesse (if he call them to that honour,) refuse to eat with him. And as to other Princes and States, because they are not parts of one and the same congregation, they need not any other sentence to keep them from keeping company with the State Excommunicate: for the very Institution, as it uniteth many men into one Community; so it dissociateth one Community from another: so that Excommunication is not needfull for keeping Kings and States asunder; nor has any further effect then is in the nature of Policy it selfe; unlesse it be to instigate Princes to warre upon one another.

Nor is the Excommunication of a Christian Subject, that obeyeth the laws of his own Sovereign, whether Christian, or Heathen, of any effect. For if he beleieve that “Jesus is the Christ, he hath the Spirit of God” (1 Joh. 4.1.) “and God dwelleth in him, and he in God,” (1 Joh. 4.15.) But hee that hath the Spirit of God; hee that dwelleth in God; hee in whom God dwelleth, can receive no harm by the Excommunication of men. Therefore, he that beleeveth Jesus to be the Christ, is free from all the dangers threatned to persons Excommunicate. He that beleeveth it not, is no Christian. Therefore a true and unfeigned Christian is not liable to Excommunication; Nor he also that is a professed Christian, till his Hypocrisy appear in his Manners, that is, till his behaviour bee contrary to the law

of his Sovereign, which is the rule of Manners, and which Christ and his Apostles have commanded us to be subject to. For the Church cannot judge of Manners but by externall Actions, which Actions can never bee unlawfull, but when they are against the Law of the Common-wealth.

If a mans Father, or Mother, or Master bee Excommunicate, yet are not the Children forbidden to keep them Company, nor to Eat with them; for that were (for the most part) to oblige them not to eat at all, for want of means to get food; and to authorise them to disobey their Parents, and Masters, contrary to the Precept of the Apostles.

In summe, the Power of Excommunication cannot be extended further than to the end for which the Apostles and Pastors of the Church have their Commission from our Saviour; which is not to rule by Command and Coaction, but by Teaching and Direction of men in the way of Salvation in the world to come. And as a Master in any Science, may abandon his Scholar, when hee obstinately neglecteth the practise of his rules; but not accuse him of Injustice, because he was never bound to obey him: so a Teacher of Christian doctrine may abandon his Disciples that obstinately continue in an unchristian life; but he cannot say, they doe him wrong, because they are not obliged to obey him: For to a Teacher that shall so complain, may be applyed the Answer of God to Samuel in the like place, (1 Sam. 8.) “They have not rejected thee, but mee.” Excommunication therefore when it wanteth the assistance of the Civill Power, as it doth, when a Christian State, or Prince is Excommunicate by a forain Authority, is without effect; and consequently ought to be without terrour. The name of Fulmen Excommunicationis (that is, the Thunderbolt Of Excommunication) proceeded from an imagination of the Bishop of Rome, which first used it, that he was King of Kings, as the Heathen made Jupiter King of the Gods; and assigned him in their Poems, and Pictures, a Thunderbolt, wherewith to subdue, and punish the Giants, that should dare to deny his power: Which imagination was grounded on two errors; one, that the Kingdome of Christ is of this world, contrary to our Saviours owne words, “My Kingdome is not of this world;” the other, that hee is

Christs Vicar, not onely over his owne Subjects, but over all the Christians of the World; whereof there is no ground in Scripture, and the contrary shall bee proved in its due place.

Of The Interpreter Of The Scriptures Before Civill Sovereigns

Became Christians

St. Paul coming to Thessalonica, where was a Synagogue of the Jews, (Acts 17.2, 3.) “As his manner was, went in unto them, and three Sabbath dayes reasoned with them out of the Scriptures, Opening and alledging, that Christ must needs have suffered and risen again from the dead; and that this Jesus whom he preached was the Christ.” The Scriptures here mentioned were the Scriptures of the Jews, that is, the Old Testament. The men, to whom he was to prove that Jesus was the Christ, and risen again from the dead, were also Jews, and did beleieve already, that they were the Word of God. Hereupon (as it is verse 4.) some of them beleieved, and (as it is in the 5. ver.) some beleieved not. What was the reason, when they all beleieved the Scripture, that they did not all beleieve alike; but that some approved, others disapproved the Interpretation of St. Paul that cited them; and every one Interpreted them to himself? It was this; S. Paul came to them without any Legall Commission, and in the manner of one that would not Command, but Perswade; which he must needs do, either by Miracles, as Moses did to the Israelites in Egypt, that they might see his Authority in Gods works; or by Reasoning from the already received Scripture, that they might see the truth of his doctrine in Gods Word. But whosoever perswadeth by reasoning from principles written, maketh him to whom hee speaketh Judge, both of the meaning of those principles, and also of the force of his inferences upon them. If these Jews of Thessalonica were not, who else was the Judge of what S. Paul alledged out of Scripture? If S. Paul, what needed he to quote any places to prove his

doctrine? It had been enough to have said, I find it so in Scripture, that is to say, in your Laws, of which I am Interpreter, as sent by Christ. The Interpreter therefore of the Scripture, to whose Interpretation the Jews of Thessalonica were bound to stand, could be none: every one might believe, or not believe, according as the Allegations seemed to himselfe to be agreeable, or not agreeable to the meaning of the places alledged. And generally in all cases of the world, hee that pretendeth any prooffe, maketh Judge of his prooffe him to whom he addresseth his speech. And as to the case of the Jews in particular, they were bound by expresse words (Deut. 17.) to receive the determination of all hard questions, from the Priests and Judges of Israel for the time being. But this is to bee understood of the Jews that were yet unconverted.

For the Conversion of the Gentiles, there was no use of alledging the Scriptures, which they beleevd not. The Apostles therefore laboured by Reason to confute their Idolatry; and that done, to perswade them to the faith of Christ, by their testimony of his Life, and Resurrection. So that there could not yet bee any controversie concerning the authority to Interpret Scripture; seeing no man was obliged during his infidelity, to follow any mans Interpretation of any Scripture, except his Sovereigns Interpretation of the Laws of his countrey.

Let us now consider the Conversion it self, and see what there was therein, that could be cause of such an obligation. Men were converted to no other thing then to the Beleef of that which the Apostles preached: And the Apostles preached nothing, but that Jesus was the Christ, that is to say, the King that was to save them, and reign over them eternally in the world to come; and consequently that hee was not dead, but risen again from the dead, and gone up into Heaven, and should come again one day to judg the world, (which also should rise again to be judged,) and reward every man according to his works. None of them preached that himselfe, or any other Apostle was such an Interpreter of the Scripture, as all that became Christians, ought to take their Interpretation for Law. For to Interpret the Laws, is part of the Administration of a present Kingdome; which the Apostles had not. They prayed then, and all other Pastors ever since, “Let thy

Kingdome come;” and exhorted their Converts to obey their then Ethnique Princes. The New Testament was not yet published in one Body. Every of the Evangelists was Interpreter of his own Gospel; and every Apostle of his own Epistle; And of the Old Testament, our Saviour himselfe saith to the Jews (John 5. 39.) “Search the Scriptures; for in them yee thinke to have eternall life, and they are they that testifie of me.” If hee had not meant they should Interpret them, hee would not have bidden them take thence the proof of his being the Christ; he would either have Interpreted them himselfe, or referred them to the Interpretation of the Priests.

When a difficulty arose, the Apostles and Elders of the Church assembled themselves together, and determined what should bee preached, and taught, and how they should Interpret the Scriptures to the People; but took not from the People the liberty to read, and Interpret them to themselves. The Apostles sent divers Letters to the Churches, and other Writings for their instruction; which had been in vain, if they had not allowed them to Interpret, that is, to consider the meaning of them. And as it was in the Apostles time, it must be till such time as there should be Pastors, that could authorise an Interpreter, whose Interpretation should generally be stood to: But that could not be till Kings were Pastors, or Pastors Kings.

Of The Power To Make Scripture Law

There be two senses, wherein a Writing may be said to be Canonically; for Canon, signifieth a Rule; and a Rule is a Precept, by which a man is guided, and directed in any action whatsoever. Such Precepts, though given by a Teacher to his Disciple, or a Counsellor to his friend, without power to Compell him to observe them, are neverthelesse Canons; because they are Rules: But when they are given by one, whom he that receiveth them is bound to obey, then are those Canons, not

onely Rules, but Laws: The question therefore here, is of the Power to make the Scriptures (which are the Rules of Christian Faith) Laws.

Of The Ten Commandements

That part of the Scripture, which was first Law, was the Ten Commandements, written in two Tables of Stone, and delivered by God himselfe to Moses; and by Moses made known to the people. Before that time there was no written Law of God, who as yet having not chosen any people to bee his peculiar Kingdome, had given no Law to men, but the Law of Nature, that is to say, the Precepts of Naturall Reason, written in every mans own heart. Of these two Tables, the first containeth the law of Sovereignty; 1. That they should not obey, nor honour the Gods of other Nations, in these words, “Non habebis Deos alienos coram me,” that is, “Thou shalt not have for Gods, the Gods that other Nations worship; but onely me:” whereby they were forbidden to obey, or honor, as their King and Governour, any other God, than him that spake unto them then by Moses, and afterwards by the High Priest. 2. That they “should not make any Image to represent him;” that is to say, they were not to choose to themselves, neither in heaven, nor in earth, any Representative of their own fancying, but obey Moses and Aaron, whom he had appointed to that office. 3. That “they should not take the Name of God in vain;” that is, they should not speak rashly of their King, nor dispute his Right, nor the commissions of Moses and Aaron, his Lieutenants. 4. That “they should every Seventh day abstain from their ordinary labour,” and employ that time in doing him Publique Honor. The second Table containeth the Duty of one man towards another, as “To honor Parents; Not to kill; Not to Commit Adultery; Not to steale; Not to corrupt Judgment by false witnesse;” and finally, “Not so much as to designe in their heart the doing of any injury one to another.” The question now is, Who it was that gave to these written Tables the obligatory force of Lawes. There is no doubt but that they were made Laws by

God himselfe: But because a Law obliges not, nor is Law to any, but to them that acknowledge it to be the act of the Sovereign, how could the people of Israel that were forbidden to approach the Mountain to hear what God said to Moses, be obliged to obedience to all those laws which Moses propounded to them? Some of them were indeed the Laws of Nature, as all the Second Table; and therefore to be acknowledged for Gods Laws; not to the Israelites alone, but to all people: But of those that were peculiar to the Israelites, as those of the first Table, the question remains; saving that they had obliged themselves, presently after the propounding of them, to obey Moses, in these words (Exod. 20.19.) “Speak them thou to us, and we will hear thee; but let not God speak to us, lest we die.” It was therefore onely Moses then, and after him the High Priest, whom (by Moses) God declared should administer this his peculiar Kingdome, that had on Earth, the power to make this short Scripture of the Decalogue to bee Law in the Common-wealth of Israel. But Moses, and Aaron, and the succeeding High Priests were the Civill Sovereigns. Therefore hitherto, the Canonizing, or making of the Scripture Law, belonged to the Civill Sovereigne.

Of The Judicial, And Leviticall Law

The Judiciall Law, that is to say, the Laws that God prescribed to the Magistrates of Israel, for the rule of their administration of Justice, and of the Sentences, or Judgments they should pronounce, in Pleas between man and man; and the Leviticall Law, that is to say, the rule that God prescribed touching the Rites and Ceremonies of the Priests and Levites, were all delivered to them by Moses onely; and therefore also became Lawes, by vertue of the same promise of obedience to Moses. Whether these laws were then written, or not written, but dictated to the People by Moses (after his forty dayes being with God in the Mount) by word of mouth, is not expressed in the Text; but they were all positive Laws, and equivalent to holy Scripture, and made Canonically by Moses the Civill Sovereign.

The Second Law

After the Israelites were come into the Plains of Moab over against Jericho, and ready to enter into the land of Promise, Moses to the former Laws added divers others; which therefore are called Deuteronomy: that is, Second Laws. And are (as it is written, Deut. 29.1.) “The words of a Covenant which the Lord commanded Moses to make with the Children of Israel, besides the Covenant which he made with them in Horeb.” For having explained those former Laws, in the beginning of the Book of Deuteronomy, he addeth others, that begin at the 12. Cha. and continue to the end of the 26. of the same Book. This Law (Deut. 27.1.) they were commanded to write upon great stones playstered over, at their passing over Jordan: This Law also was written by Moses himself in a Book; and delivered into the hands of the “Priests, and to the Elders of Israel,” (Deut. 31.9.) and commanded (ve. 26.) “to be put in the side of the Arke;” for in the Ark it selfe was nothing but the Ten Commandements. This was the Law, which Moses (Deuteronomy 17.18.) commanded the Kings of Israel should keep a copie of: And this is the Law, which having been long time lost, was found again in the Temple in the time of Josiah, and by his authority received for the Law of God. But both Moses at the writing, and Josiah at the recovery thereof, had both of them the Civill Sovereignty. Hitherto therefore the Power of making Scripture Canonically, was in the Civill Sovereign.

Besides this Book of the Law, there was no other Book, from the time of Moses, till after the Captivity, received amongst the Jews for the Law of God. For the Prophets (except a few) lived in the time of the Captivity it selfe; and the rest lived but a little before it; and were so far from having their Prophecies generally received for Laws, as that their persons were persecuted, partly by false Prophets, and partly by the Kings which were seduced by them. And this Book it self, which was confirmed by Josiah for the Law of God, and with it all the History of

the Works of God, was lost in the Captivity, and sack of the City of Jerusalem, as appears by that of 2 Esdras 14.21. “Thy Law is burnt; therefor no man knoweth the things that are done of thee, of the works that shall begin.” And before the Captivity, between the time when the Law was lost, (which is not mentioned in the Scripture, but may probably be thought to be the time of Rehoboam, when Shishak King of Egypt took the spoils of the Temple,(1 Kings 14.26.)) and the time of Josiah, when it was found againe, they had no written Word of God, but ruled according to their own discretion, or by the direction of such, as each of them esteemed Prophets.

The Old Testament, When Made Canonically

From whence we may inferre, that the Scriptures of the Old Testament, which we have at this day, were not Canonically, nor a Law unto the Jews, till the renovation of their Covenant with God at their return from the Captivity, and restauration of their Common-wealth under Esdras. But from that time forward they were accounted the Law of the Jews, and for such translated into Greek by Seventy Elders of Judaea, and put into the Library of Ptolemy at Alexandria, and approved for the Word of God. Now seeing Esdras was the High Priest, and the High Priest was their Civill Sovereigne, it is manifest, that the Scriptures were never made Laws, but by the Sovereign Civill Power.

The New Testament Began To Be Canonically Under Christian Sovereigns By the Writings of the Fathers that lived in the time before that Christian Religion was received, and authorised by Constantine the Emperour, we may find, that the Books we now have of the New Testament, were held by the Christians of that time (except a few, in respect of whose paucity the rest were called the Catholique Church, and others Haeretiques) for the dictates of the Holy Ghost; and consequently for the Canon, or Rule of Faith: such was the reverence and opinion they had of their Teachers; as generally the reverence that the Disciples bear to

their first Masters, in all manner of doctrine they receive from them, is not small. Therefore there is no doubt, but when S. Paul wrote to the Churches he had converted; or any other Apostle, or Disciple of Christ, to those which had then embraced Christ, they received those their Writings for the true Christian Doctrine. But in that time, when not the Power and Authority of the Teacher, but the Faith of the Hearer caused them to receive it, it was not the Apostles that made their own Writings Canonically, but every Convert made them so to himself.

But the question here, is not what any Christian made a Law, or Canon to himself, (which he might again reject, by the same right he received it;) but what was so made a Canon to them, as without injustice they could not do any thing contrary thereunto. That the New Testament should in this sense be Canonically, that is to say, a Law in any place where the Law of the Common-wealth had not made it so, is contrary to the nature of a Law. For a Law, (as hath been already shewn) is the Commandment of that Man, or Assembly, to whom we have given Sovereign Authority, to make such Rules for the direction of our actions, as hee shall think fit; and to punish us, when we do any thing contrary to the same. When therefore any other man shall offer unto us any other Rules, which the Sovereign Ruler hath not prescribed, they are but Counsell, and Advice; which, whether good, or bad, hee that is counselled, may without injustice refuse to observe, and when contrary to the Laws already established, without injustice cannot observe, how good soever he conceiveth it to be. I say, he cannot in this case observe the same in his actions, nor in his discourse with other men; though he may without blame believe the his private Teachers, and wish he had the liberty to practise their advice; and that it were publicly received for Law. For internall faith is in its own nature invisible, and consequently exempted from all humane jurisdiction; whereas the words, and actions that proceed from it, as breaches of our Civil obedience, are injustice both before God and Man. Seeing then our Saviour hath denied his Kingdome to be in this world, seeing he hath said, he came not to judge, but to save the world, he hath not subjected us to other Laws than those of the Common-wealth; that is, the Jews to the Law of Moses,

(which he saith (Mat. 5.) he came not to destroy, but to fulfill,) and other Nations to the Laws of their severall Sovereigns, and all men to the Laws of Nature; the observing whereof, both he himselfe, and his Apostles have in their teaching recommended to us, as a necessary condition of being admitted by him in the last day into his eternall Kingdome, wherein shall be Protection, and Life everlasting. Seeing then our Saviour, and his Apostles, left not new Laws to oblige us in this world, but new Doctrine to prepare us for the next; the Books of the New Testament, which containe that Doctrine, untill obedience to them was commanded, by them that God hath given power to on earth to be Legislators, were not obligatory Canons, that is, Laws, but onely good, and safe advice, for the direction of sinners in the way to salvation, which every man might take, and refuse at his owne perill, without injustice.

Again, our Saviour Christs Commission to his Apostles, and Disciples, was to Proclaim his Kingdome (not present, but) to come; and to Teach all Nations; and to Baptize them that should beleieve; and to enter into the houses of them that should receive them; and where they were not received, to shake off the dust of their feet against them; but not to call for fire from heaven to destroy them, nor to compell them to obedience by the Sword. In all which there is nothing of Power, but of Perswasion. He sent them out as Sheep unto Wolves, not as Kings to their Subjects. They had not in Commission to make Laws; but to obey, and teach obedience to Laws made; and consequently they could not make their Writings obligatory Canons, without the help of the Sovereign Civill Power. And therefore the Scripture of the New Testament is there only Law, where the lawfull Civill Power hath made it so. And there also the King, or Sovereign, maketh it a Law to himself; by which he subjecteth himselfe, not to the Doctor, or Apostle, that converted him, but to God himself, and his Son Jesus Christ, as immediately as did the Apostles themselves.

Of The Power Of Councells To Make The Scripture Law

That which may seem to give the New Testament, in respect of those that have embraced Christian Doctrine, the force of Laws, in the times, and places of persecution, is the decrees they made amongst themselves in their Synods. For we read (Acts 15.28.) the stile of the Councell of the Apostles, the Elders, and the whole Church, in this manner, “It seemed good to the Holy Ghost, and to us, to lay upon you no greater burthen than these necessary things, &C.” which is a stile that signifieth a Power to lay a burthen on them that had received their Doctrine. Now “to lay a burthen on another,” seemeth the same that “to oblige;” and therefore the Acts of that Councell were Laws to the then Christians. Neverthelesse, they were no more Laws than are these other Precepts, “Repent, Be Baptized; Keep the Commandements; Beleeeve the Gospel; Come unto me; Sell all that thou hast; Give it to the poor;” and “Follow me;” which are not Commands, but Invitations, and Callings of men to Christianity, like that of Esay 55.1. “Ho, every man that thirsteth, come yee to the waters, come, and buy wine and milke without money.” For first, the Apostles power was no other than that of our Saviour, to invite men to embrace the Kingdome of God; which they themselves acknowledged for a Kingdome (not present, but) to come; and they that have no Kingdome, can make no Laws. And secondly, if their Acts of Councell, were Laws, they could not without sin be disobeyed. But we read not any where, that they who received not the Doctrine of Christ, did therein sin; but that they died in their sins; that is, that their sins against the Laws to which they owed obedience, were not pardoned. And those Laws were the Laws of Nature, and the Civill Laws of the State, whereto every Christian man had by pact submitted himself. And therefore by the Burthen, which the Apostles might lay on such as they had converted, are not to be understood Laws, but Conditions, proposed to those that sought Salvation; which they might accept, or refuse at their own perill, without a new sin, though not without the hazard of being condemned, and excluded out of the Kingdome of God for their sins past. And

therefore of Infidels, S. John saith not, the wrath of God shall “come” upon them, but “the wrath of God remaineth upon them;” and not that they shall be condemned; but that “they are condemned already.”(John 3.36, 3.18) Nor can it be conceived, that the benefit of Faith, “is Remission of sins” unlesse we conceive withall, that the dammage of Infidelity, is “the Retention of the same sins.”

But to what end is it (may some man aske), that the Apostles, and other Pastors of the Church, after their time, should meet together, to agree upon what Doctrine should be taught, both for Faith and Manners, if no man were obliged to observe their Decrees? To this may be answered, that the Apostles, and Elders of that Councell, were obliged even by their entrance into it, to teach the Doctrine therein concluded, and decreed to be taught, so far forth, as no precedent Law, to which they were obliged to yeeld obedience, was to the contrary; but not that all other Christians should be obliged to observe, what they taught. For though they might deliberate what each of them should teach; yet they could not deliberate what others should do, unless their Assembly had had a Legislative Power; which none could have but Civill Sovereigns. For though God be the Sovereign of all the world, we are not bound to take for his Law, whatsoever is propounded by every man in his name; nor any thing contrary to the Civill Law, which God hath expressly commanded us to obey.

Seeing then the Acts of Councell of the Apostles, were then no Laws, but Councells; much lesse are Laws the Acts of any other Doctors, or Councells since, if assembled without the Authority of the Civill Sovereign. And consequently, the Books of the New Testament, though most perfect Rules of Christian Doctrine, could not be made Laws by any other authority then that of Kings, or Sovereign Assemblies.

The first Councell, that made the Scriptures we now have, Canon, is not extant: For that Collection the first Bishop of Rome after S. Peter, is subject to question: For though the Canonickall books bee there reckoned up; yet these words, “Sint vobis omnibus Clericis & Laicis Libris venerandi, &c.” containe a

distinction of Clergy, and Laity, that was not in use so neer St. Peters time. The first Councell for setting the Canonickall Scripture, that is extant, is that of Laodicea, Can. 59. which forbids the reading of other Books then those in the Churches; which is a Mandate that is not addressed to every Christian, but to those onely that had authority to read any publicquely in the Church; that is, to Ecclesiastiques onely.

Of The Right Of Constituting Ecclesiasticall Officers In The Time

Of The Apostles

Of Ecclesiastical Officers in the time of the Apostles, some were Magisteriall, some Ministeriall. Magisteriall were the Offices of preaching of the Gospel of the Kingdom of God to Infidels; of administring the Sacraments, and Divine Service; and of teaching the Rules of Faith and Manners to those that were converted. Ministeriall was the Office of Deacons, that is, of them that were appointed to the administration of the secular necessities of the Church, at such time as they lived upon a common stock of mony, raised out of the voluntary contributions of the faithfull.

Amongst the Officers Magisteriall, the first, and principall were the Apostles; whereof there were at first but twelve; and these were chosen and constituted by our Saviour himselfe; and their Office was not onely to Preach, Teach, and Baptize, but also to be Martyrs, (Witnesses of our Saviours Resurrection.) This Testimony, was the specificall, and essentiall mark; whereby the Apostleship was distinguished from other Magistracy Ecclesiasticall; as being necessary for an Apostle, either to have seen our Saviour after his Resurrection, or to have conversed with him before, and seen his works, and other arguments of his Divinity, whereby they might be taken for sufficient Witnesses. And therefore at the election of a new Apostle in the place of Judas Iscariot, S. Peter saith (Acts

1.21,22.) “Of these men that have companied with us, all the time that the Lord Jesus went in and out among us, beginning from the Baptisme of John unto that same day that he was taken up from us, must one be ordained to be a Witsnesse with us of his Resurrection.” where, by this word Must, is implied a necessary property of an Apostle, to have companied with the first and prime Apostles in the time that our Saviour manifested himself in the flesh.

Matthias Made Apostle By The Congregation.

The first Apostle, of those which were not constituted by Christ in the time he was upon the Earth, was Matthias, chosen in this manner: There were assembled together in Jerusalem about 120 Christians (Acts 1.15.) These appointed two, Joseph the Just, and Matthias (ver. 23.) and caused lots to be drawn; “and (ver. 26.) the Lot fell on Matthias and he was numbred with the Apostles.” So that here we see the ordination of this Apostle, was the act of the Congregation, and not of St. Peter, nor of the eleven, otherwise then as Members of the Assembly.

Paul And Barnabas Made Apostles By The Church Of Antioch

After him there was never any other Apostle ordained, but Paul and Barnabas, which was done (as we read Acts 13.1,2,3.) in this manner. “There were in the Church that was at Antioch, certaine Prophets, and Teachers; as Barnabas, and Simeon that was called Niger, and Lucius of Cyrene, and Manaen; which had been brought up with Herod the Tetrarch, and Saul. As they ministred unto the Lord, and fasted, the Holy Ghost said, ‘Separate mee Barnabas, and Saul for the worke whereunto I have called them.’ And when they had fasted, and prayed, and laid their hands on them, they sent them away.”

By which it is manifest, that though they were called by the Holy Ghost, their Calling was declared unto them, and their Mission authorized by the particular Church of Antioch. And that this their calling was to the Apostleship, is apparent by that, that they are both called (Acts 14.14.) Apostles: And that it was by vertue of this act of the Church of Antioch, that they were Apostles, S. Paul declareth plainly (Rom. 1.1.) in that hee useth the word, which the Holy Ghost used at his calling: For he stileth himself, “An Apostle separated unto the Gospel of God;” alluding to the words of the Holy Ghost, “Separate me Barnabas and Saul, &c.” But seeing the work of an Apostle, was to be a Witnesse of the Resurrection of Christ, and man may here aske, how S. Paul that conversed not with our Saviour before his passion, could know he was risen. To which it is easily answered, that our Saviour himself appeared to him in the way to Damascus, from Heaven, after his Ascension; “and chose him for a vessell to bear his name before the Gentiles, and Kings, and Children of Israel;” and consequently (having seen the Lord after his passion) was a competent Witnesse of his Resurrection: And as for Barnabas, he was a Disciple before the Passion. It is therefore evident that Paul, and Barnabas were Apostles; and yet chosen, and authorized (not by the first Apostles alone, but) by the Church of Antioch; as Matthias was chosen, and authorized by the Church of Jerusalem.

What Offices In The Church Are Magisteriall

Bishop, a word formed in our language, out of the Greek Episcopus, signifieth an overseer, or Superintendent of any businesse, and particularly a Pastor or Shepherd; and thence by metaphor was taken, not only amongst the Jews that were originally Shepherds, but also amongst the Heathen, to signifie the Office of a King, or any other Ruler, or Guide of People, whether he ruled by Laws, or Doctrine. And so the Apostles were the first Christian Bishops, instituted by Christ himselfe: in which sense the Apostleship of Judas is called (Acts 1.20.) his

Bishoprick. And afterwards, when there were constituted Elders in the Christian Churches, with charge to guide Christs flock by their doctrine, and advice; these Elders were also called Bishops. Timothy was an Elder (which word Elder, in the New Testament is a name of Office, as well as of Age;) yet he was also a Bishop. And Bishops were then content with the Title of Elders. Nay S. John himselfe, the Apostle beloved of our Lord, beginneth his Second Epistle with these words, “The Elder to the Elect Lady.” By which it is evident, that Bishop, Pastor, Elder, Doctor, that is to say, Teacher, were but so many divers names of the same Office in the time of the Apostles. For there was then no government by Coercion, but only by Doctrine, and Perswading. The Kingdome of God was yet to come, in a new world; so that there could be no authority to compell in any Church, till the Common-wealth had embraced the Christian Faith; and consequently no diversity of Authority, though there were diversity of Employments.

Besides these Magisteriall employments in the Church, namely Apostles, Bishops, Elders, Pastors, and Doctors, whose calling was to proclaim Christ to the Jews, and Infidels, and to direct, and teach those that beleevd we read in the New Testament of no other. For by the names of Evangelists and Prophets, is not signified any Office, but severall Gifts, by which severall men were profitable to the Church: as Evangelists, by writing the life and acts of our Saviour; such as were S. Matthew and S. John Apostles, and S. Marke and S. Luke Disciples, and whosoever else wrote of that subject, (as S. Thomas, and S. Barnabas are said to have done, though the Church have not received the Books that have gone under their names:) and as Prophets, by the gift of interpreting the Old Testament; and sometimes by declaring their speciall Revelations to the Church. For neither these gifts, nor the gifts of Languages, nor the gift of Casting out Devils, or of Curing other diseases, nor any thing else did make an Officer in the Church, save onely the due calling and election to the charge of Teaching.

Ordination Of Teachers

As the Apostles, Matthias, Paul, and Barnabas, were not made by our Saviour himself, but were elected by the Church, that is, by the Assembly of Christians; namely, Matthias by the Church of Jerusalem, and Paul, and Barnabas by the Church of Antioch; so were also the Presbyters, and Pastors in other Cities, elected by the Churches of those Cities. For proof whereof, let us consider, first, how S. Paul proceeded in the Ordination of Presbyters, in the Cities where he had converted men to the Christian Faith, immediately after he and Barnabas had received their Apostleship. We read (Acts 14.23.) that “they ordained Elders in every Church;” which at first sight may be taken for an Argument, that they themselves chose, and gave them their authority: But if we consider the Originall text, it will be manifest, that they were authorized, and chosen by the Assembly of the Christians of each City. For the words there are, “cheirotonesantes autoispresbuterous kat ekklesian,” that is, “When they had Ordained them Elders by the Holding up of Hands in every Congregation.” Now it is well enough known, that in all those Cities, the manner of choosing Magistrates, and Officers, was by plurality of suffrages; and (because the ordinary way of distinguishing the Affirmative Votes from the Negatives, was by Holding up of Hands) to ordain an Officer in any of the Cities, was no more but to bring the people together, to elect them by plurality of Votes, whether it were by plurality of elevated hands, or by plurality of voices, or plurality of balls, or beans, or small stones, of which every man cast in one, into a vessell marked for the Affirmative, or Negative; for divers Cities had divers customes in that point. It was therefore the Assembly that elected their own Elders: the Apostles were onely Presidents of the Assembly to call them together for such Election, and to pronounce them Elected, and to give them the benediction, which now is called Consecration. And for this cause they that were Presidents of the Assemblies, as (in the absence of the Apostles) the Elders were, were called proestotes, and in Latin Antistities; which words signifie the Principall Person of the Assembly, whose office was to number the Votes, and

to declare thereby who was chosen; and where the Votes were equall, to decide the matter in question, by adding his own; which is the Office of a President in Councell. And (because all the Churches had their Presbyters ordained in the same manner,) where the word is Constitute, (as Titus 1.5.) “*ina katasteses kata polin presbuterous*,” “For this cause left I thee in Crete, that thou shouldest constitute Elders in every City,” we are to understand the same thing; namely, that hee should call the faithfull together, and ordain them Presbyters by plurality of suffrages. It had been a strange thing, if in a Town, where men perhaps had never seen any Magistrate otherwise chosen then by an Assembly, those of the Town becomming Christians, should so much as have thought on any other way of Election of their Teachers, and Guides, that is to say, of their Presbyters, (otherwise called Bishops,) then this of plurality of suffrages, intimated by S. Paul (Acts 14.23.) in the word *Cheirotonesantes*: Nor was there ever any choosing of Bishops, (before the Emperors found it necessary to regulate them in order to the keeping of the peace amongst them,) but by the Assemblies of the Christians in every severall Town.

The same is also confirmed by the continuall practise even to this day, in the Election of the Bishops of Rome. For if the Bishop of any place, had the right of choosing another, to the succession of the Pastorall Office, in any City, at such time as he went from thence, to plant the same in another place; much more had he had the Right, to appoint his successour in that place, in which he last resided and dyed: And we find not, that ever any Bishop of Rome appointed his successor. For they were a long time chosen by the People, as we may see by the sedition raised about the Election, between Damascus, and Ursinicus; which Ammianus Marcellinus saith was so great, that Juventius the Praefect, unable to keep the peace between them, was forced to goe out of the City; and that there were above an hundred men found dead upon that occasion in the Church it self. And though they afterwards were chosen, first, by the whole Clergy of Rome, and afterwards by the Cardinalls; yet never any was appointed to the succession by his predecessor. If therefore they pretended no right to appoint their successors, I

think I may reasonably conclude, they had no right to appoint the new power; which none could take from the Church to bestow on them, but such as had a lawfull authority, not onely to Teach, but to Command the Church; which none could doe, but the Civill Sovereign.

Ministers Of The Church What

The word Minister in the Originall Diakonos signifieth one that voluntarily doth the businesse of another man; and differeth from a Servant onely in this, that Servants are obliged by their condition, to what is commanded them; whereas Ministers are obliged onely by their undertaking, and bound therefore to no more than that they have undertaken: So that both they that teach the Word of God, and they that administer the secular affairs of the Church, are both Ministers, but they are Ministers of different Persons. For the Pastors of the Church, called (Acts 6.4.) “The Ministers of the Word,” are Ministers of Christ, whose Word it is: But the Ministry of a Deacon, which is called (verse 2. of the same Chapter) “Serving of Tables,” is a service done to the Church, or Congregation: So that neither any one man, nor the whole Church, could ever of their Pastor say, he was their Minister; but of a Deacon, whether the charge he undertook were to serve tables, or distribute maintenance to the Christians, when they lived in each City on a common stock, or upon collections, as in the first times, or to take a care of the House of Prayer, or of the Revenue, or other worldly businesse of the Church, the whole Congregation might properly call him their Minister.

For their employment, as Deacons, was to serve the Congregation; though upon occasion they omitted not to preach the Gospel, and maintain the Doctrine of Christ, every one according to his gifts, as S. Steven did; and both to Preach, and Baptize, as Philip did: For that Philip, which (Act. 8. 5.) Preached the Gospel at Samaria, and (verse 38.) Baptized the Eunuch, was Philip the Deacon, not Philip the Apostle. For it is manifest (verse 1.) that when Philip preached in

Samaria, the Apostles were at Jerusalem, and (verse 14.) “When they heard that Samaria had received the Word of God, sent Peter and John to them;” by imposition of whose hands, they that were Baptized (verse 15.) received (which before by the Baptisme of Philip they had not received) the Holy Ghost. For it was necessary for the conferring of the Holy Ghost, that their Baptisme should be administred, or confirmed by a Minister of the Word, not by a Minister of the Church. And therefore to confirm the Baptisme of those that Philip the Deacon had Baptized, the Apostles sent out of their own number from Jerusalem to Samaria, Peter, and John; who conferred on them that before were but Baptized, those graces that were signs of the Holy Spirit, which at that time did accompany all true Beleevers; which what they were may be understood by that which S. Marke saith (cha.17.) “These signs follow them that beleeve in my Name; they shall cast out Devills; they shall speak with new tongues; They shall take up Serpents, and if they drink any deadly thing, it shall not hurt them; They shall lay hands on the sick, and they shall recover.” This to doe, was it that Philip could not give; but the Apostles could, and (as appears by this place) effectually did to every man that truly beleeved, and was by a Minister of Christ himself Baptized: which power either Christs Ministers in this age cannot conferre, or else there are very few true Beleevers, or Christ hath very few Ministers.

And How Chosen What

That the first Deacons were chosen, not by the Apostles, but by a Congregation of the Disciples; that is, of Christian men of all sorts, is manifest out of Acts 6. where we read that the Twelve, after the number of Disciples was multiplyed, called them together, and having told them, that it was not fit that the Apostles should leave the Word of God, and serve tables, said unto them (verse 3.) “Brethren looke you out among you seven men of honest report, full of the Holy Ghost, and of Wisdome, whom we may appoint over this businesse.” Here it is

manifest, that though the Apostles declared them elected; yet the Congregation chose them; which also, (verse the fift) is more expressly said, where it is written, that “the saying pleased the multitude, and they chose seven, &c.”

Of Ecclesiasticall Revenue, Under The Law Of Moses

Under the Old Testament, the Tribe of Levi were onely capable of the Priesthood, and other inferiour Offices of the Church. The land was divided amongst the other Tribes (Levi excepted,) which by the subdivision of the Tribe of Joseph, into Ephraim and Manasses, were still twelve. To the Tribe of Levi were assigned certain Cities for their habitation, with the suburbs for their cattell: but for their portion, they were to have the tenth of the fruits of the land of their Brethren. Again, the Priests for their maintenance had the tenth of that tenth, together with part of the oblations, and sacrifices. For God had said to Aaron (Numb. 18. 20.) “Thou shalt have no inheritance in their land, neither shalt thou have any part amongst them, I am thy part, and thine inheritance amongst the Children of Israel.” For God being then King, and having constituted the Tribe of Levi to be his Publique Ministers, he allowed them for their maintenance, the Publique revenue, that is to say, the part that God had reserved to himself; which were Tythes, and Offerings: and that it is which is meant, where God saith, I am thine inheritance. And therefore to the Levites might not unfitly be attributed the name of Clergy from Kleros, which signifieth Lot, or Inheritance; not that they were heirs of the Kingdome of God, more than other; but that Gods inheritance, was their maintenance. Now seeing in this time God himself was their King, and Moses, Aaron, and the succeeding High Priests were his Lieutenants; it is manifest, that the Right of Tythes, and Offerings was constituted by the Civill Power.

After their rejection of God in the demand of a King, they enjoyed still the same revenue; but the Right thereof was derived from that, that the Kings did

never take it from them: for the Publique Revenue was at the disposing of him that was the Publique Person; and that (till the Captivity) was the King. And again, after the return from the Captivity, they paid their Tythes as before to the Priest. Hitherto therefore Church Livings were determined by the Civill Sovereign.

In Our Saviours Time, And After

Of the maintenance of our Saviour, and his Apostles, we read onely they had a Purse, (which was carried by Judas Iscariot;) and, that of the Apostles, such as were Fisher-men, did sometimes use their trade; and that when our Saviour sent the Twelve Apostles to Preach, he forbad them “to carry Gold, and Silver, and Brasse in their purses, for that the workman is worthy of his hire:” (Mat. 10. 9,10.) By which it is probable, their ordinary maintenance was not unsuitable to their employment; for their employment was (ver. 8.) “freely to give, because they had freely received;” and their maintenance was the Free Gift of those that beleaved the good tyding they carryed about of the coming of the Messiah their Saviour. To which we may adde, that which was contributed out of gratitude, by such as our Saviour had healed of diseases; of which are mentioned “Certain women (Luke 8. 2,3.) which had been healed of evill spirits and infirmities; Mary Magdalen, out of whom went seven Devills; and Joanna the wife of Chuza, Herods Steward; and Susanna, and many others, which ministred unto him of their substance.

After our Saviours Ascension, the Christians of every City lived in Common, (Acts 4. 34.) upon the mony which was made of the sale of their lands and possessions, and laid down at the feet of the Apostles, of good will, not of duty; for “whilest the Land remained (saith S. Peter to Ananias Acts 5.4.) was it not thine? and after it was sold, was it not in thy power?” which sheweth he needed not to have saved his land, nor his money by lying, as not being bound to

contribute any thing at all, unlesse he had pleased. And as in the time of the Apostles, so also all the time downward, till after Constantine the Great, we shall find, that the maintenance of the Bishops, and Pastors of the Christian Church, was nothing but the voluntary contribution of them that had embraced their Doctrine. There was yet no mention of Tythes: but such was in the time of Constantine, and his Sons, the affection of Christians to their Pastors, as Ammianus Marcellinus saith (describing the sedition of Damasus and Ursinicus about the Bishopricke,) that it was worth their contention, in that the Bishops of those times by the liberality of their flock, and especially of Matrons, lived splendidly, were carryed in Coaches, and sumptuous in their fare and apparell.

The Ministers Of The Gospel Lived On The Benevolence Of Their Flocks But here may some ask, whether the Pastor were then bound to live upon voluntary contribution, as upon almes, “For who (saith S. Paul 1 Cor. 9. 7.) goeth to war at his own charges? or who feedeth a flock, and eateth not of the milke of the flock?” And again, (1 Cor. 9. 13.) “Doe ye not know that they which minister about holy things, live of the things of the Temple; and they which wait at the Altar, partake with the Altar;” that is to say, have part of that which is offered at the Altar for their maintenance? And then he concludeth, “Even so hath the Lord appointed, that they which preach the Gospel should live of the Gospel. From which place may be inferred indeed, that the Pastors of the Church ought to be maintained by their flocks; but not that the Pastors were to determine, either the quantity, or the kind of their own allowance, and be (as it were) their own Carvers. Their allowance must needs therefore be determined, either by the gratitude, and liberality of every particular man of their flock, or by the whole Congregation. By the whole Congregation it could not be, because their Acts were then no Laws: Therefore the maintenance of Pastors, before Emperours and Civill Sovereigns had made Laws to settle it, was nothing but Benevolence. They that served at the Altar lived on what was offered. In what court should they sue for it, who had no Tribunalls? Or if they had Arbitrators amongst themselves, who should execute their Judgments, when they had no power to arme their Officers?

It remaineth therefore, that there could be no certaine maintenance assigned to any Pastors of the Church, but by the whole Congregation; and then onely, when their Decrees should have the force (not onely of Canons, but also) of Laws; which Laws could not be made, but by Emperours, Kings, or other Civill Soveraignes. The Right of Tythes in Moses Law, could not be applyed to the then Ministers of the Gospell; because Moses and the High Priests were the Civill Soveraigns of the people under God, whose Kingdom amongst the Jews was present; whereas the Kingdome of God by Christ is yet to come.

Hitherto hath been shewn what the Pastors of the Church are; what are the points of their Commission (as that they were to Preach, to Teach, to Baptize, to be Presidents in their severall Congregations;) what is Ecclesiasticall Censure, viz. Excommunication, that is to say, in those places where Christianity was forbidden by the Civill Laws, a putting of themselves out of the company of the Excommunicate, and where Christianity was by the Civill Law commanded, a putting the Excommunicate out of the Congregations of Christians; who elected the Pastors and Ministers of the Church, (that it was, the Congregation); who consecrated and blessed them, (that it was the Pastor); what was their due revenue, (that it was none but their own possessions, and their own labour, and the voluntary contributions of devout and gratefull Christians). We are to consider now, what Office those persons have, who being Civill Soveraignes, have embraced also the Christian Faith.

The Civill Soveraign Being A Christian Hath The Right Of Appointing

Pastors

And first, we are to remember, that the Right of Judging what Doctrines are fit for Peace, and to be taught the Subjects, is in all Common-wealths inseparably annexed (as hath been already proved cha. 18.) to the Soveraign Power Civill,

whether it be in one Man, or in one Assembly of men. For it is evident to the meanest capacity, that mens actions are derived from the opinions they have of the Good, or Evill, which from those actions redound unto themselves; and consequently, men that are once possessed of an opinion, that their obedience to the Sovereign Power, will bee more hurtfull to them, than their disobedience, will disobey the Laws, and thereby overthrow the Common-wealth, and introduce confusion, and Civill war; for the avoiding whereof, all Civill Government was ordained. And therefore in all Common-wealths of the Heathen, the Sovereigns have had the name of Pastors of the People, because there was no Subject that could lawfully Teach the people, but by their permission and authority.

This Right of the Heathen Kings, cannot bee thought taken from them by their conversion to the Faith of Christ; who never ordained, that Kings for beleiving in him, should be deposed, that is, subjected to any but himself, or (which is all one) be deprived of the power necessary for the conservation of Peace amongst their Subjects, and for their defence against foraign Enemies. And therefore Christian Kings are still the Supreme Pastors of their people, and have power to ordain what Pastors they please, to teach the Church, that is, to teach the People committed to their charge.

Again, let the right of choosing them be (as before the conversion of Kings) in the Church, for so it was in the time of the Apostles themselves (as hath been shewn already in this chapter); even so also the Right will be in the Civill Sovereign, Christian. For in that he is a Christian, he allowes the Teaching; and in that he is the Sovereign (which is as much as to say, the Church by Representation,) the Teachers hee elects, are elected by the Church. And when an Assembly of Christians choose their Pastor in a Christian Common-wealth, it is the Sovereign that electeth him, because tis done by his Authority; In the same manner, as when a Town choose their Maior, it is the act of him that hath the Sovereign Power: For every act done, is the act of him, without whose consent it is invalid. And therefore whatsoever examples may be drawn out of History, concerning the Election of Pastors, by the People, or by the Clergy, they are no

arguments against the Right of any Civill Sovereign, because they that elected them did it by his Authority.

Seeing then in every Christian Common-wealth, the Civill Sovereign is the Supreme Pastor, to whose charge the whole flock of his Subjects is committed, and consequently that it is by his authority, that all other Pastors are made, and have power to teach, and performe all other Pastorall offices; it followeth also, that it is from the Civill Sovereign, that all other Pastors derive their right of Teaching, Preaching, and other functions pertaining to that Office; and that they are but his Ministers; in the same manner as the Magistrates of Towns, Judges in Courts of Justice, and Commanders of Armies, are all but Ministers of him that is the Magistrate of the whole Common-wealth, Judge of all Causes, and Commander of the whole Militia, which is alwayes the Civill Sovereign. And the reason hereof, is not because they that Teach, but because they that are to Learn, are his Subjects. For let it be supposed, that a Christian King commit the Authority of Ordaining Pastors in his Dominions to another King, (as divers Christian Kings allow that power to the Pope;) he doth not thereby constitute a Pastor over himself, nor a Sovereign Pastor over his People; for that were to deprive himself of the Civill Power; which depending on the opinion men have of their Duty to him, and the fear they have of Punishment in another world, would depend also on the skill, and loyalty of Doctors, who are no lesse subject, not only to Ambition, but also to Ignorance, than any other sort of men. So that where a stranger hath authority to appoint Teachers, it is given him by the Sovereign in whose Dominions he teacheth. Christian Doctors are our Schoolmasters to Christianity; But Kings are Fathers of Families, and may receive Schoolmasters for their Subjects from the recommendation of a stranger, but not from the command; especially when the ill teaching them shall redound to the great and manifest profit of him that recommends them: nor can they be obliged to retain them, longer than it is for the Publique good; the care of which they stand so long charged withall, as they retain any other essentiall Right of the Sovereignty.

The Pastorall Authority Of Sovereigns Only Is De Jure Divino,

That Of Other Pastors Is Jure Civili

If a man therefore should ask a Pastor, in the execution of his Office, as the chief Priests and Elders of the people (Mat. 21.23.) asked our Saviour, “By what authority dost thou these things, and who gave thee this authority:” he can make no other just Answer, but that he doth it by the Authority of the Common-wealth, given him by the King, or Assembly that representeth it. All Pastors, except the Supreme, execute their charges in the Right, that is by the Authority of the Civill Sovereign, that is, Jure Civili. But the King, and every other Sovereign executeth his Office of Supreme Pastor, by immediate Authority from God, that is to say, In Gods Right, or Jure Divino. And therefore none but Kings can put into their Titles (a mark of their submission to God onely) Dei Gratia Rex, &c. Bishops ought to say in the beginning of their Mandates, “By the favour of the Kings Majesty, Bishop of such a Diocesse;” or as Civill Ministers, “In his Majesties Name.” For in saying, Divina Providentia, which is the same with Dei Gratia, though disguised, they deny to have received their authority from the Civill State; and sliely slip off the Collar of their Civill Subjection, contrary to the unity and defence of the Common-wealth.

Christian Kings Have Power To Execute All Manner Of Pastoral Function

But if every Christian Sovereign be the Supreme Pastor of his own Subjects, it seemeth that he hath also the Authority, not only to Preach (which perhaps no man will deny;) but also to Baptize, and to Administer the Sacrament of the Lords Supper; and to Consecrate both Temples, and Pastors to Gods service; which most men deny; partly because they use not to do it; and partly because the

Administration of Sacraments, and Consecration of Persons, and Places to holy uses, requireth the Imposition of such mens hands, as by the like Imposition successively from the time of the Apostles have been ordained to the like Ministry. For proof therefore that Christian Kings have power to Baptize, and to Consecrate, I am to render a reason, both why they use not to doe it, and how, without the ordinary ceremony of Imposition of hands, they are made capable of doing it, when they will.

There is no doubt but any King, in case he were skilfull in the Sciences, might by the same Right of his Office, read Lectures of them himself, by which he authorizeth others to read them in the Universities. Neverthelesse, because the care of the summe of the businesse of the Common-wealth taketh up his whole time, it were not convenient for him to apply himself in Person to that particular. A King may also if he please, sit in Judgment, to hear and determine all manner of Causes, as well as give others authority to doe it in his name; but that the charge that lyeth upon him of Command and Government, constrain him to bee continually at the Helm, and to commit the Ministeriall Offices to others under him. In the like manner our Saviour (who surely had power to Baptize) Baptized none himselfe, but sent his Apostles and Disciples to Baptize. (John 4.2.) So also S. Paul, by the necessity of Preaching in divers and far distant places, Baptized few: Amongst all the Corinthians he Baptized only Crispus, Cajus, and Stephanus; (1 Cor. 1.14,16.) and the reason was, because his principall Charge was to Preach. (1 Cor. 1.17.) Whereby it is manifest, that the greater Charge, (such as is the Government of the Church,) is a dispensation for the lesse. The reason therefore why Christian Kings use not to Baptize, is evident, and the same, for which at this day there are few Baptized by Bishops, and by the Pope fewer.

And as concerning Imposition of Hands, whether it be needfull, for the authorizing of a King to Baptize, and Consecrate, we may consider thus.

Imposition of Hands, was a most ancient publique ceremony amongst the Jews, by which was designed, and made certain, the person, or other thing intended in a mans prayer, blessing, sacrifice, consecration, condemnation, or

other speech. So Jacob in blessing the children of Joseph (Gen. 48.14.) “Laid his right Hand on Ephraim the younger, and his left Hand on Manasseh the first born;” and this he did Wittingly (though they were so presented to him by Joseph, as he was forced in doing it to stretch out his arms across) to design to whom he intended the greater blessing. So also in the sacrificing of the Burnt offering, Aaron is commanded (Exod. 29.10.) “to Lay his Hands on the head of the bullock;” and (ver. 15.) “to Lay his Hand on the head of the ramme.” The same is also said again, Levit. 1.4. & 8.14. Likewise Moses when he ordained Joshua to be Captain of the Israelites, that is, consecrated him to Gods service, (Numb. 27.23.) “Laid his hands upon him, and gave him his Charge,” designing and rendring certain, who it was they were to obey in war. And in the consecration of the Levites (Numb. 8.10.) God commanded that “the Children of Israel should Put their Hands upon the Levites.” And in the condemnation of him that had blasphemed the Lord (Levit. 24.14.) God commanded that “all that heard him should Lay their Hands on his head, and that all the Congregation should stone him.” And why should they only that heard him, Lay their Hands upon him, and not rather a Priest, Levite, or other Minister of Justice, but that none else were able to design, and demonstrate to the eyes of the Congregation, who it was that had blasphemed, and ought to die? And to design a man, or any other thing, by the Hand to the Eye is lesse subject to mistake, than when it is done to the Eare by a Name.

And so much was this ceremony observed, that in blessing the whole Congregation at once, which cannot be done by Laying on of Hands, yet “Aaron (Levit. 9.22.) did lift up his Hand towards the people when he blessed them.” And we read also of the like ceremony of Consecration of Temples amongst the Heathen, as that the Priest laid his Hands on some post of the Temple, all the while he was uttering the words of Consecration. So naturall it is to design any individuall thing, rather by the Hand, to assure the Eyes, than by Words to inform the Eare in matters of Gods Publique service.

This ceremony was not therefore new in our Saviours time. For Jairus (Mark 5.23.) whose daughter was sick, besought our Saviour (not to heal her, but) “to Lay his Hands upon her, that shee might bee healed.” And (Matth. 19.13.) “they brought unto him little children, that hee should Put his Hands on them, and Pray.”

According to this ancient Rite, the Apostles, and Presbyters, and the Presbytery it self, Laid Hands on them whom they ordained Pastors, and withall prayed for them that they might receive the Holy Ghost; and that not only once, but sometimes oftner, when a new occasion was presented: but the end was still the same, namely a punctuall, and religious designation of the person, ordained either to the Pastorall Charge in general, or to a particular Mission: so (Act. 6.6.) “The Apostles Prayed, and Laid their Hands” on the seven Deacons; which was done, not to give them the Holy Ghost, (for they were full of the Holy Ghost before thy were chosen, as appeareth immediately before, verse 3.) but to design them to that Office. And after Philip the Deacon had converted certain persons in Samaria, Peter and John went down (Act. 8.17.)” and laid their Hands on them, and they received the Holy Ghost.” And not only an Apostle, but a Presbyter had this power: For S. Paul adviseth Timothy (1 Tim. 5.22.) “Lay Hands suddenly on no man;” that is, designe no man rashly to the Office of a Pastor. The whole Presbytery Laid their Hands on Timothy, as we read 1 Tim. 4.14. but this is to be understood, as that some did it by the appointment of the Presbytery, and most likely their Proestos, or Prolocutor, which it may be was St. Paul himself. For in his 2 Epist. to Tim. ver. 6. he saith to him, “Stirre up the gift of God which is in thee, by the Laying on of my Hands:” where note by the way, that by the Holy ghost, is not meant the third Person in the Trinity, but the Gifts necessary to the Pastorall Office. We read also, that St. Paul had Imposition of Hands twice; once from Ananias at Damascus (Acts 9.17,18.) at the time of his Baptisme; and again (Acts 13.3.) at Antioch, when he was first sent out to Preach. The use then of this ceremony considered in the Ordination of Pastors, was to design the Person to whom they gave such Power. But if there had been then any Christian, that had

had the Power of Teaching before; the Baptizing of him, that is the making of him a Christian, had given him no new Power, but had onely caused him to preach true Doctrine, that is, to use his Power aright; and therefore the Imposition of Hands had been unnecessary; Baptisme it selfe had been sufficient. But every Sovereign, before Christianity, had the power of Teaching, and Ordaining Teachers; and therefore Christianity gave them no new Right, but only directed them in the way of teaching truth; and consequently they needed no Imposition of Hands (besides that which is done in Baptisme) to authorize them to exercise any part of the Pastorall Function, as namely, to Baptize, and Consecrate. And in the Old Testament, though the Priest only had right to Consecrate, during the time that the Sovereignty was in the High Priest; yet it was not so when the Sovereignty was in the King: For we read (1 Kings 8.) That Solomon Blessed the People, Consecrated the Temple, and pronounced that Publique Prayer, which is the pattern now for Consecration of all Christian Churches, and Chappels: whereby it appears, he had not only the right of Ecclesiasticall Government; but also of exercising Ecclesiasticall Functions.

The Civill Sovereigne If A Christian, Is Head Of The Church

In His Own Dominions

From this consolidation of the Right Politique, and Ecclesiastique in Christian Sovereigns, it is evident, they have all manner of Power over their Subjects, that can be given to man, for the government of mens externall actions, both in Policy, and Religion; and may make such Laws, as themselves shall judge fittest, for the government of their own Subjects, both as they are the Common-wealth, and as they are the Church: for both State, and Church are the same men.

If they please therefore, they may (as many Christian Kings now doe) commit the government of their Subjects in matters of Religion to the Pope; but then the

Pope is in that point Subordinate to them, and exerciseth that Charge in anothers Dominion Jure Civili, in the Right of the Civill Sovereign; not Jure Divino, in Gods Right; and may therefore be discharged of that Office, when the Sovereign for the good of his Subjects shall think it necessary. They may also if they please, commit the care of Religion to one Supreme Pastor, or to an Assembly of Pastors; and give them what power over the Church, or one over another, they think most convenient; and what titles of honor, as of Bishops, Archbishops, Priests, or Presbyters, they will; and make such Laws for their maintenance, either by Tithes, or otherwise, as they please, so they doe it out of a sincere conscience, of which God onely is the Judge. It is the Civill Sovereign, that is to appoint Judges, and Interpreters of the Canonick Scriptures; for it is he that maketh them Laws. It is he also that giveth strength to Excommunications; which but for such Laws and Punishments, as may humble obstinate Libertines, and reduce them to union with the rest of the Church, would bee contemned. In summe, he hath the Supreme Power in all causes, as well Ecclesiasticall, as Civill, as far as concerneth actions, and words, for these onely are known, and may be accused; and of that which cannot be accused, there is no Judg at all, but God, that knoweth the heart. And these Rights are incident to all Sovereigns, whether Monarchs, or Assemblies: for they that are the Representants of a Christian People, are Representants of the Church: for a Church, and a Common-wealth of Christian People, are the same thing.

Cardinal Bellarmine's Books De Summo Pontifice Considered

Though this that I have here said, and in other places of this Book, seem cleer enough for the asserting of the Supreme Ecclesiasticall Power to Christian Sovereigns; yet because the Pope of Romes challenge to that Power universally, hath been maintained chiefly, and I think as strongly as is possible, by Cardinall

Bellarmino, in his *Controversie De Summo Pontifice*; I have thought it necessary, as briefly as I can, to examine the grounds, and strength of his Discourse.

The First Book

Of five Books he hath written of this subject, the first containeth three Questions: One, Which is simply the best government, Monarchy, Aristocracy, or Democracy; and concludeth for neither, but for a government mixt of all there: Another, which of these is the best Government of the Church; and concludeth for the mixt, but which should most participate of Monarchy: the third, whether in this mixt Monarchy, St. Peter had the place of Monarch. Concerning his first Conclusion, I have already sufficiently proved (chapt. 18.) that all Governments which men are bound to obey, are Simple, and Absolute. In Monarchy there is but One Man Supreme; and all other men that have any kind of Power in the State, have it by his Commission, during his pleasure; and execute it in his name: And in Aristocracy, and Democracy, but One Supreme Assembly, with the same Power that in Monarchy belongeth to the Monarch, which is not a Mixt, but an Absolute Sovereignty. And of the three sorts, which is the best, is not to be disputed, where any one of them is already established; but the present ought alwaies to be preferred, maintained, and accounted best; because it is against both the Law of Nature, and the Divine positive Law, to doe any thing tending to the subversion thereof. Besides, it maketh nothing to the Power of any Pastor, (unlesse he have the Civill Sovereignty,) what kind of Government is the best; because their Calling is not to govern men by Commandement, but to teach them, and perswade them by Arguments, and leave it to them to consider, whether they shall embrace, or reject the Doctrine taught. For Monarchy, Aristocracy, and Democracy, do mark out unto us three sorts of Sovereigns, not of Pastors; or, as we may say, three sorts of Masters of Families, not three sorts of Schoolmasters for their children.

And therefore the second Conclusion, concerning the best form of Government of the Church, is nothing to the question of the Popes Power without his own Dominions: For in all other Common-wealths his Power (if hee have any at all) is that of the Schoolmaster onely, and not of the Master of the Family.

For the third Conclusion, which is, that St. Peter was Monarch of the Church, he bringeth for his chiefe argument the place of S. Matth. (cha.18, 19.) “Thou art Peter, And upon this rock I will build my Church, &c. And I will give thee the keyes of Heaven; whatsoever thou shalt bind on Earth, shall be bound in Heaven, and whatsoever thou shalt loose on Earth, shall be loosed in Heaven.” Which place well considered, proveth no more, but that the Church of Christ hath for foundation one onely Article; namely, that which Peter in the name of all the Apostles professing, gave occasion to our Saviour to speak the words here cited; which that wee may cleerly understand, we are to consider, that our Saviour preached by himself, by John Baptist, and by his Apostles, nothing but this Article of Faith, “that he was the Christ;” all other Articles requiring faith no otherwise, than as founded on that. John began first, (Mat. 3.2.) preaching only this, “The Kingdome of God is at hand.” Then our Saviour himself (Mat. 4.17.) preached the same: And to his Twelve Apostles, when he gave them their Commission (Mat. 10.7.) there is no mention of preaching any other Article but that. This was the fundamentall Article, that is the Foundation of the Churches Faith. Afterwards the Apostles being returned to him, he asketh them all, (Mat. 16.13) not Peter onely, “Who men said he was;” and they answered, that “some said he was John the Baptist, some Elias, and others Jeremias, or one of the Prophets:” Then (ver. 15.) he asked them all again, (not Peter onely) “Whom say yee that I am?” Therefore Peter answered (for them all) “Thou art Christ, the Son of the Living God;” which I said is the Foundation of the Faith of the whole Church; from which our Saviour takes the occasion of saying, “Upon this stone I will build my Church;” By which it is manifest, that by the Foundation-Stone of the Church, was meant the Fundamentall Article of the Churches Faith. But why then (will some object) doth our Saviour interpose these words, “Thou art Peter”?

If the originall of this text had been rigidly translated, the reason would easily have appeared: We are therefore to consider, that the Apostle Simon, was surnamed Stone, (which is the signification of the Syriacke word Cephas, and of the Greek word Petrus). Our Saviour therefore after the confession of that Fundamentall Article, alluding to his name, said (as if it were in English) thus, Thou art “Stone,” and upon this Stone I will build my Church: which is as much as to say, this Article, that “I am the Christ,” is the Foundation of all the Faith I require in those that are to bee members of my Church: Neither is this allusion to a name, an unusuall thing in common speech: But it had been a strange, and obscure speech, if our Saviour intending to build his Church on the Person of St. Peter, had said, “thou art a Stone, and upon this Stone I will build my Church,” when it was so obvious without ambiguity to have said, “I will build my Church on thee; and yet there had been still the same allusion to his name.

And for the following words, “I will give thee the Keyes of Heaven, &c.” it is no more than what our Saviour gave also to all the rest of his Disciples (Matth. 18.18.) “Whatsoever yee shall bind on Earth, shall be bound in Heaven. And whatsoever ye shall loose on Earth, shall be loosed in Heaven.” But howsoever this be interpreted, there is no doubt but the Power here granted belongs to all Supreme Pastors; such as are all Christian Civill Soveraignes in their own Dominions. In so much, as if St. Peter, or our Saviour himself had converted any of them to beleve him, and to acknowledge his Kingdome; yet because his Kingdome is not of this world, he had left the supreme care of converting his subjects to none but him; or else hee must have deprived him of the Soveraignty, to which the Right of Teaching is inseparably annexed. And thus much in refutation of his first Book, wherein hee would prove St. Peter to have been the Monarch Universall of the Church, that is to say, of all the Christians in the world.

The Second Book

The second Book hath two Conclusions: One, that S. Peter was Bishop of Rome, and there dyed: The other, that the Popes of Rome are his Successors. Both which have been disputed by others. But supposing them to be true; yet if by Bishop of Rome bee understood either the Monarch of the Church, or the Supreme Pastor of it; not Silvester, but Constantine (who was the first Christian Emperour) was that Bishop; and as Constantine, so all other Christian Emperors were of Right supreme Bishops of the Roman Empire; I say of the Roman Empire, not of all Christendome: For other Christian Sovereigns had the same Right in their severall Territories, as to an Office essentially adhaerent to their Sovereignty. Which shall serve for answer to his second Book.

The Third Book

In the third Book, he handleth the question whether the Pope be Antichrist. For my part, I see no argument that proves he is so, in that sense that Scripture useth the name: nor will I take any argument from the quality of Antichrist, to contradict the Authority he exerciseth, or hath heretofore exercised in the Dominions of any other Prince, or State.

It is evident that the Prophets of the Old Testament foretold, and the Jews expected a Messiah, that is, a Christ, that should re-establish amongst them the kingdom of God, which had been rejected by them in the time of Samuel, when they required a King after the manner of other Nations. This expectation of theirs, made them obnoxious to the Imposture of all such, as had both the ambition to attempt the attaining of the Kingdome, and the art to deceive the People by counterfeit miracles, by hypocriticall life, or by orations and doctrine plausible. Our Saviour therefore, and his Apostles forewarned men of False Prophets, and of False Christs. False Christs, are such as pretend to be the Christ, but are not, and are called properly Antichrists, in such sense, as when there happeneth a Schisme in the Church by the election of two Popes, the one calleth the other Antipapa, or

the false Pope. And therefore Antichrist in the proper signification hath two essentiall marks; One, that he denyeth Jesus to be Christ; and another that he professeth himselfe to bee Christ. The first Mark is set down by S. John in his 1 Epist. 4. ch. 3. ver. "Every Spirit that confesseth not that Jesus Christ is come in the flesh, is not of God; And this is the Spirit of Antichrist." The other Mark is expressed in the words of our Saviour, (Mat. 24.5.) "Many shall come in my name, saying, I am Christ;" and again, "If any man shall say unto you, Loe, here is Christ, there is Christ beleeve it not." And therefore Antichrist must be a False Christ, that is, some one of them that shall pretend themselves to be Christ. And out of these two Marks, "to deny Jesus to be the Christ," and to "affirm himselfe to be the Christ," it followeth, that he must also be an "Adversary of the true Christ," which is another usuall signification of the word Antichrist. But of these many Antichrists, there is one speciall one, O Antichristos, The Antichrist, or Antichrist definitely, as one certaine person; not indefinitely An Antichrist. Now seeing the Pope of Rome, neither pretendeth himself, nor denyeth Jesus to be the Christ, I perceive not how he can be called Antichrist; by which word is not meant, one that falsely pretendeth to be His Lieutenant, or Vicar Generall, but to be Hee. There is also some Mark of the time of this speciall Antichrist, as (Mat. 24.15.) when that abominable Destroyer, spoken of by Daniel, (Dan. 9. 27.) shall stand in the Holy place, and such tribulation as was not since the beginning of the world, nor ever shall be again, insomuch as if it were to last long, (ver. 22.) "no flesh could be saved; but for the elects sake those days shall be shortened" (made fewer). But that tribulation is not yet come; for it is to be followed immediately (ver. 29.) by a darkening of the Sun and Moon, a falling of the Stars, a concussion of the Heavens, and the glorious coming again of our Saviour, in the cloudes. And therefore The Antichrist is not yet come; whereas, many Popes are both come and gone. It is true, the Pope in taking upon him to give Laws to all Christian Kings, and Nations, usurpeth a Kingdome in this world, which Christ took not on him: but he doth it not As Christ, but as For Christ, wherein there is nothing of the Antichrist.

The Fourth Book

In the fourth Book, to prove the Pope to be the supreme Judg in all questions of Faith and Manners, (which is as much as to be the absolute Monarch of all Christians in the world,) he bringeth three Propositions: The first, that his Judgments are Infallible: The second, that he can make very Laws, and punish those that observe them not: The third, that our Saviour conferred all Jurisdiction Ecclesiasticall on the Pope of Rome.

Texts For The Infallibility Of The Popes Judgement In Points Of Faith

For the Infallibility of his Judgments, he alledgeth the Scriptures: and first, that of Luke 22.31. “Simon, Simon, Satan hath desired you that hee may sift you as wheat; but I have prayed for thee, that thy faith faile not; and when thou art converted, strengthen thy Brethren.” This, according to Bellarmines exposition, is, that Christ gave here to Simon Peter two priviledges: one, that neither his Faith should fail, neither he, nor any of his successors should ever define any point concerning Faith, or Manners erroneously, or contrary to the definition of a former Pope: Which is a strange, and very much strained interpretation. But he that with attention readeth that chapter, shall find there is no place in the whole Scripture, that maketh more against the Popes Authority, than this very place. The Priests and Scribes seeking to kill our Saviour at the Passeover, and Judas possessed with a resolution to betray him, and the day of killing the Passeover being come, our Saviour celebrated the same with his Apostles, which he said, till the Kingdome of God was come hee would doe no more; and withall told them, that one of them was to betray him: Hereupon they questioned, which of them it should be; and withall (seeing the next Passeover their Master would celebrate

should be when he was King) entred into a contention, who should then be the greater man. Our Saviour therefore told them, that the Kings of the Nations had Dominion over their Subjects, and are called by a name (in Hebrew) that signifies Bountifull; but I cannot be so to you, you must endeavour to serve one another; I ordain you a Kingdome, but it is such as my Father hath ordained mee; a Kingdome that I am now to purchase with my blood, and not to possesse till my second coming; then yee shall eat and drink at my Table, and sit on Thrones, judging the twelve Tribes of Israel: And then addressing himself to St. Peter, he saith, Simon, Simon, Satan seeks by suggesting a present domination, to weaken your faith of the future; but I have prayed for thee, that thy faith shall not fail; Thou therefore (Note this,) being converted, and understanding my Kingdome as of another world, confirm the same faith in thy Brethren: To which S. Peter answered (as one that no more expected any authority in this world) “Lord I am ready to goe with thee, not onely to Prison, but to Death.” Whereby it is manifest, S. Peter had not onely no jurisdiction given him in this world, but a charge to teach all the other Apostles, that they also should have none. And for the Infallibility of St. Peters sentence definitive in matter of Faith, there is no more to be attributed to it out of this Text, than that Peter should continue in the beleef of this point, namely, that Christ should come again, and possesse the Kingdome at the day of Judgement; which was not given by the Text to all his Successors; for wee see they claim it in the World that now is.

The second place is that of Matth. 16. “Thou art Peter, and upon this rocke I will build my Church, and the gates of Hell shall not prevail against it.” By which (as I have already shewn in this chapter) is proved no more, than that the gates of Hell shall not prevail against the confession of Peter, which gave occasion to that speech; namely this, That Jesus Is Christ The Sonne Of God.

The third text is John 21. ver. 16,17. “Feed my sheep;” which contains no more but a Commission of Teaching: And if we grant the rest of the Apostles to be contained in that name of Sheep; then it is the supreme Power of Teaching: but it was onely for the time that there were no Christian Sovereigns already possessed

of that Supremacy. But I have already proved, that Christian Soveraignes are in their owne Dominions the supreme Pastors, and instituted thereto, by vertue of their being Baptized, though without other Imposition of Hands. For such imposition being a Ceremony of designing the person, is needlesse, when hee is already designed to the Power of Teaching what Doctrine he will, by his institution to an Absolute Power over his Subjects. For as I have proved before, Soveraigns are supreme Teachers (in generall) by their Office and therefore oblige themselves (by their Baptisme) to teach the Doctrine of Christ: And when they suffer others to teach their people, they doe it at the perill of their own souls; for it is at the hands of the Heads of Families that God will require the account of the instruction of his Children and Servants. It is of Abraham himself, not of a hireling, that God saith (Gen. 18.19) “I know him that he will command his Children, and his houshold after him, that they keep the way of the Lord, and do justice and judgement.

The fourth place is that of Exod. 28.30. “Thou shalt put in the Breastplate of Judgment, the Urim and the Thummin:” which hee saith is interpreted by the Septuagint, delosin kai aletheian, that is, Evidence and Truth: And thence concludeth, God had given Evidence, and Truth, (which is almost infallibility,) to the High Priest. But be it Evidence and Truth it selfe that was given; or be it but Admonition to the Priest to endeavour to inform himself cleerly, and give judgment uprightly; yet in that it was given to the High Priest, it was given to the Civill Soveraign: For next under God was the High Priest in the Common-wealth of Israel; and is an argument for Evidence and Truth, that is, for the Ecclesiasticall Supremacy of Civill Soveraigns over their own Subjects, against the pretended Power of the Pope. These are all the Texts hee bringeth for the Infallibility of the Judgement of the Pope, in point of Faith.

Texts For The Same In Point Of Manners

For the Infallibility of his Judgment concerning Manners, hee bringeth one Text, which is that of John 16.13. "When the Spirit of truth is come, hee will lead you into all truth" where (saith he) by All Truth, is meant, at least, All Truth Necessary To Salvation. But with this mitigation, he attributeth no more Infallibility to the Pope, than to any man that professeth Christianity, and is not to be damned: For if any man erre in any point, wherein not to erre is necessary to Salvation, it is impossible he should be saved; for that onely is necessary to Salvation, without which to be saved is impossible. What points these are, I shall declare out of the Scripture in the Chapter following. In this place I say no more, but that though it were granted, the Pope could not possibly teach any error at all, yet doth not this entitle him to any Jurisdiction in the Dominions of another Prince, unlesse we shall also say, a man is obliged in conscience to set on work upon all occasions the best workman, even then also when he hath formerly promised his work to another.

Besides the Text, he argueth from Reason, thus, If the Pope could erre in necessities, then Christ hath not sufficiently provided for the Churches Salvation; because he hath commanded her to follow the Popes directions. But this Reason is invalid, unlesse he shew when, and where Christ commanded that, or took at all any notice of a Pope: Nay granting whatsoever was given to S. Peter was given to the Pope; yet seeing there is in the Scripture no command to any man to obey St. Peter, no man can bee just, that obeyeth him, when his commands are contrary to those of his lawfull Sovereign.

Lastly, it hath not been declared by the Church, nor by the Pope himselfe, that he is the Civill Sovereign of all the Christians in the world; and therefore all Christians are not bound to acknowledge his Jurisdiction in point of Manners. For the Civill Sovereignty, and supreme Judicature in controversies of Manners, are the same thing: And the Makers of Civill Laws, are not onely Declarers, but also Makers of the justice, and injustice of actions; there being nothing in mens Manners that makes them righteous, or unrighteous, but their conformity with the Law of the Sovereign. And therefore when the Pope challengeth Supremacy in

controversies of Manners, hee teacheth men to disobey the Civill Sovereign; which is an erroneous Doctrine, contrary to the many precepts of our Saviour and his Apostles, delivered to us in the Scripture.

To prove the Pope has Power to make Laws, he alledgeth many places; as first, Deut. 17.12. “The man that will doe presumptuously, and will not hearken unto the Priest, (that standeth to Minister there before the Lord thy God, or unto the Judge,) even that man shall die, and thou shalt put away the evill from Israel.” For answer whereunto, we are to remember that the High Priest (next and immediately under God) was the Civill Sovereign; and all Judges were to be constituted by him. The words alledged sound therefore thus. “The man that will presume to disobey the Civill Sovereign for the time being, or any of his Officers in the execution of their places, that man shall die, &c.” which is cleerly for the Civill Sovereignty, against the Universall power of the Pope.

Secondly, he alledgeth that of Matth. 16. “Whatsoever yee shall bind, &c.” and interpreteth it for such Binding as is attributed (Matth. 23.4.) to the Scribes and Pharisees, “They bind heavy burthens, and grievous to be born, and lay them on mens shoulders;” by which is meant (he sayes) Making of Laws; and concludes thence, the Pope can make Laws. But this also maketh onely for the Legislative power of Civill Sovereigns: For the Scribes, and Pharisees sat in Moses Chaire, but Moses next under God was Sovereign of the People of Israel: and therefore our Saviour commanded them to doe all that they should say, but not all that they should do. That is, to obey their Laws, but not follow their Example.

The third place, is John 21.16. “Feed my sheep;” which is not a Power to make Laws, but a command to Teach. Making Laws belongs to the Lord of the Family; who by his owne discretion chooseth his Chaplain, as also a Schoolmaster to Teach his children.

The fourth place John 20.21. is against him. The words are, “As my Father sent me, so send I you.” But our Saviour was sent to Redeem (by his Death) such as should Beleeve; and by his own, and his Apostles preaching to prepare them for their entrance into his Kingdome; which he himself saith, is not of this world,

and hath taught us to pray for the coming of it hereafter, though hee refused (Acts 1.6,7.) to tell his Apostles when it should come; and in which, when it comes, the twelve Apostles shall sit on twelve Thrones (every one perhaps as high as that of St. Peter) to judge the twelve tribes of Israel. Seeing then God the Father sent not our Saviour to make Laws in this present world, wee may conclude from the Text, that neither did our Saviour send S. Peter to make Laws here, but to perswade men to expect his second comming with a stedfast faith; and in the mean time, if Subjects, to obey their Princes; and if Princes, both to beleieve it themselves, and to do their best to make their Subjects doe the same; which is the Office of a Bishop. Therefore this place maketh most strongly for the joining of the Ecclesiasticall Supremacy to the Civill Sovereignty, contrary to that which Cardinall Bellarmine alledgeth it for.

The fift place is Acts 15.28. "It hath seemed good to the Holy Spirit, and to us, to lay upon you no greater burden, than these necessary things, that yee abstaine from meats offered to Idols, and from bloud, and from things strangled, and from fornication." Here hee notes the word Laying Of Burdens for the Legislative Power. But who is there, that reading this Text, can say, this stile of the Apostles may not as properly be used in giving Counsell, as in making Laws? The stile of a Law is, We Command: But, We Think Good, is the ordinary stile of them, that but give Advice; and they lay a Burthen that give Advice, though it bee conditionall, that is, if they to whom they give it, will attain their ends: And such is the Burthen, of abstaining from things strangled, and from bloud; not absolute, but in case they will not erre. I have shewn before (cha.) that Law, is distinguished from Counsell, in this, that the reason of a Law, is taken from the designe, and benefit of him that prescribeth it; but the reason of a Counsell, from the designe, and benefit of him, to whom the Counsell is given. But here, the Apostles aime onely at the benefit of the converted Gentiles, namely their Salvation; not at their own benefit; for having done their endeavour, they shall have their reward, whether they be obeyed, or not. And therefore the Acts of this Councell, were not Laws, but Counsells.

The sixt place is that of Rom. 13. “Let every Soul be subject to the Higher Powers, for there is no Power but of God;” which is meant, he saith not onely of Secular, but also of Ecclesiasticall Princes. To which I answer, first, that there are no Ecclesiasticall Princes but those that are also Civill Soveraignes; and their Principalities exceed not the compasse of their Civill Soveraignty; without those bounds though they may be received for Doctors, they cannot be acknowledged for Princes. For if the Apostle had meant, we should be subject both to our own Princes, and also to the Pope, he had taught us a doctrine, which Christ himself hath told us is impossible, namely, “to serve two Masters.” And though the Apostle say in another place, “I write these things being absent, lest being present I should use sharpnesse, according to the Power which the Lord hath given me;” it is not, that he challenged a Power either to put to death, imprison, banish, whip, or fine any of them, which are Punishments; but onely to Excommunicate, which (without the Civill Power) is no more but a leaving of their company, and having no more to doe with them, than with a Heathen man, or a Publican; which in many occasions might be a greater pain to the Excommunicant, than to the Excommunicate.

The seventh place is 1 Cor. 4.21. “Shall I come unto you with a Rod, or in love, and the spirit of lenity?” But here again, it is not the Power of a Magistrate to punish offenders, that is meant by a Rod; but onely the Power of Excommunication, which is not in its owne nature a Punishment, but onely a Denouncing of punishment, that Christ shall inflict, when he shall be in possession of his Kingdome, at the day of Judgment. Nor then also shall it bee properly a Punishment, as upon a Subject that hath broken the Law; but a Revenge, as upon an Enemy, or Revolter, that denyeth the Right of our Saviour to the Kingdome: And therefore this proveth not the Legislative Power of any Bishop, that has not also the Civill Power.

The eighth place is, Timothy 3.2. “A Bishop must be the husband but of one wife, vigilant, sober, &c.” which he saith was a Law. I thought that none could make a Law in the Church, but the Monarch of the Church, St. Peter. But suppose

this Precept made by the authority of St. Peter; yet I see no reason why to call it a Law, rather than an Advice, seeing Timothy was not a Subject, but a Disciple of St. Paul; nor the flock under the charge of Timothy, his Subjects in the Kingdome, but his Scholars in the Schoole of Christ: If all the Precepts he giveth Timothy, be Laws, why is not this also a Law, “Drink no longer water, but use a little wine for thy healths sake”? And why are not also the Precepts of good Physitians, so many Laws? but that it is not the Imperative manner of speaking, but an absolute Subjection to a Person, that maketh his Precept Laws.

In like manner, the ninth place, 1 Tim. 5. 19. “Against an Elder receive not an accusation, but before two or three Witnesses,” is a wise Precept, but not a Law.

The tenth place is, Luke 10.16. “He that heareth you, heareth mee; and he that despiseth you, despiseth me.” And there is no doubt, but he that despiseth the Counsell of those that are sent by Christ, despiseth the Counsell of Christ himself. But who are those now that are sent by Christ, but such as are ordained Pastors by lawfull Authority? and who are lawfully ordained, that are not ordained by the Sovereign Pastor? and who is ordained by the Sovereign Pastor in a Christian Common-wealth, that is not ordained by the authority of the Sovereign thereof? Out of this place therefore it followeth, that he which heareth his Sovereign being a Christian, heareth Christ; and hee that despiseth the Doctrine which his King being a Christian, authorizeth, despiseth the Doctrine of Christ (which is not that which Bellarmine intendeth here to prove, but the contrary). But all this is nothing to a Law. Nay more, a Christian King, as a Pastor, and Teacher of his Subjects, makes not thereby his Doctrines Laws. He cannot oblige men to beleeve; though as a Civill Sovereign he may make Laws suitable to his Doctrine, which may oblige men to certain actions, and sometimes to such as they would not otherwise do, and which he ought not to command; and yet when they are commanded, they are Laws; and the externall actions done in obedience to them, without the inward approbation, are the actions of the Sovereign, and not of the Subject, which is in that case but as an instrument, without any motion of his owne at all; because God hath commanded to obey them.

The eleventh, is every place, where the Apostle for Counsell, putteth some word, by which men use to signifie Command; or calleth the following of his Counsell, by the name of Obedience. And therefore they are alledged out of 1 Cor. 11.2. "I commend you for keeping my Precepts as I delivered them to you." The Greek is, "I commend you for keeping those things I delivered to you, as I delivered them." Which is far from signifying that they were Laws, or any thing else, but good Counsell. And that of 1 Thess. 4.2. "You know what commandements we gave you:" where the Greek word is paraggelias edokamen, equivalent to paredokamen, what wee delivered to you, as in the place next before alledged, which does not prove the Traditions of the Apostles, to be any more than Counsells; though as is said in the 8th verse, "he that despiseth them, despiseth not man, but God": For our Saviour himself came not to Judge, that is, to be King in this world; but to Sacrifice himself for Sinners, and leave Doctors in his Church, to lead, not to drive men to Christ, who never accepteth forced actions, (which is all the Law produceth,) but the inward conversion of the heart; which is not the work of Laws, but of Counsell, and Doctrine.

And that of 2 Thess. 3.14. "If any man Obey not our word by this Epistle, note that man, and have no company with him, that he may bee ashamed": where from the word Obey, he would inferre, that this Epistle was a Law to the Thessalonians. The Epistles of the Emperours were indeed Laws. If therefore the Epistle of S. Paul were also a Law, they were to obey two Masters. But the word Obey, as it is in the Greek upakouei, signifieth Harkening To, or Putting In Practice, not onely that which is Commanded by him that has right to punish, but also that which is delivered in a way of Counsell for our good; and therefore St. Paul does not bid kill him that disobeys, nor beat, nor imprison, nor amerce him, which Legislators may all do; but avoid his company, that he may bee ashamed: whereby it is evident, it was not the Empire of an Apostle, but his Reputation amongst the Faithfull, which the Christians stood in awe of.

The last place is that of Heb. 13.17. "Obey your Leaders, and submit your selves to them, for they watch for your souls, as they that must give account:"

And here also is intended by Obedience, a following of their Counsell: For the reason of our Obedience, is not drawn from the will and command of our Pastors, but from our own benefit, as being the Salvation of our Souls they watch for, and not for the Exaltation of their own Power, and Authority. If it were meant here, that all they teach were Laws, then not onely the Pope, but every Pastor in his Parish should have Legislative Power. Again, they that are bound to obey, their Pastors, have no power to examine their commands. What then shall wee say to St. John who bids us (1 Epist. cha. ver. 1.) “Not to beleeeve every Spirit, but to try the Spirits whether they are of God, because many false Prophets are gone out into the world”? It is therefore manifest, that wee may dispute the Doctrine of our Pastors; but no man can dispute a Law. The Commands of Civill Sovereigns are on all sides granted to be Laws: if any else can make a Law besides himselfe, all Common-wealth, and consequently all Peace, and Justice must cease; which is contrary to all Laws, both Divine and Humane. Nothing therefore can be drawn from these, or any other places of Scripture, to prove the Decrees of the Pope, where he has not also the Civill Sovereignty, to be Laws.

The Question Of Superiority Between The Pope And Other Bishops The last point hee would prove, is this, “That our Saviour Christ has committed Ecclesiasticall Jurisdiction immediately to none but the Pope.” Wherein he handleth not the Question of Supremacy between the Pope and Christian Kings, but between the Pope and other Bishops. And first, he sayes it is agreed, that the Jurisdiction of Bishops, is at least in the generall De Jure Divino, that is, in the Right of God; for which he alledges S. Paul, Ephes. 4.11. where hee sayes, that Christ after his Ascension into heaven, “gave gifts to men, some Apostles, some Prophets, and some Evangelists, and some Pastors, and some Teachers.” And thence inferres, they have indeed their Jurisdiction in Gods Right; but will not grant they have it immediately from God, but derived through the Pope. But if a man may be said to have his Jurisdiction De Jure Divino, and yet not immediately; what lawfull Jurisdiction, though but Civill, is there in a Christian Common-wealth, that is not also De Jure Divino? For Christian Kings have their

Civill Power from God immediately; and the Magistrates under him exercise their severall charges in vertue of his Commission; wherein that which they doe, is no lesse De Jure Divino Mediato, than that which the Bishops doe, in vertue of the Popes Ordination. All lawfull Power is of God, immediately in the Supreme Governour, and mediately in those that have Authority under him: So that either hee must grant every Constable in the State, to hold his Office in the Right of God; or he must not hold that any Bishop holds his so, besides the Pope himselfe.

But this whole Dispute, whether Christ left the Jurisdiction to the Pope onely, or to other Bishops also, if considered out of these places where the Pope has the Civill Sovereignty, is a contention De Lana Caprina: For none of them (where they are not Sovereigns) has any Jurisdiction at all. For Jurisdiction is the Power of hearing and determining Causes between man and man; and can belong to none, but him that hath the Power to prescribe the Rules of Right and Wrong; that is, to make Laws; and with the Sword of Justice to compell men to obey his Decisions, pronounced either by himself, or by the Judges he ordaineth thereunto; which none can lawfully do, but the Civill Sovereign.

Therefore when he alledgeth out of the 6 of Luke, that our Saviour called his Disciples together, and chose twelve of them which he named Apostles, he proveth that he Elected them (all, except Matthias, Paul and Barnabas,) and gave them Power and Command to Preach, but not to Judge of Causes between man and man: for that is a Power which he refused to take upon himselfe, saying, "Who made me a Judge, or a Divider, amongst you?" and in another place, "My Kingdome is not of this world." But hee that hath not the Power to hear, and determine Causes between man and man, cannot be said to have any Jurisdiction at all. And yet this hinders not, but that our Saviour gave them Power to Preach and Baptize in all parts of the world, supposing they were not by their own lawfull Sovereign forbidden: For to our own Sovereigns Christ himself, and his Apostles have in sundry places expressly commanded us in all things to be obedient.

The arguments by which he would prove, that Bishops receive their Jurisdiction from the Pope (seeing the Pope in the Dominions of other Princes hath no Jurisdiction himself,) are all in vain. Yet because they prove, on the contrary, that all Bishops receive Jurisdiction when they have it from their Civill Sovereigns, I will not omit the recitall of them.

The first, is from Numbers 11. where Moses not being able alone to undergoe the whole burthen of administring the affairs of the People of Israel, God commanded him to choose Seventy Elders, and took part of the spirit of Moses, to put it upon those Seventy Elders: by which it is understood, not that God weakened the spirit of Moses, for that had not eased him at all; but that they had all of them their authority from him; wherein he doth truly, and ingenuously interpret that place. But seeing Moses had the entire Sovereignty in the Commonwealth of the Jews, it is manifest, that it is thereby signified, that they had their Authority from the Civill Sovereign: and therefore that place proveth, that Bishops in every Christian Common-wealth have their Authority from the Civill Sovereign; and from the Pope in his own Territories only, and not in the Territories of any other State.

The second argument, is from the nature of Monarchy; wherein all Authority is in one Man, and in others by derivation from him: But the Government of the Church, he says, is Monarchicall. This also makes for Christian Monarchs. For they are really Monarchs of their own people; that is, of their own Church (for the Church is the same thing with a Christian people;) whereas the Power of the Pope, though hee were S. Peter, is neither Monarchy, nor hath any thing of Archicall, nor Craticall, but onely of Didacticall; For God accepteth not a forced, but a willing obedience.

The third, is, from that the Sea of S. Peter is called by S. Cyprian, the Head, the Source, the Roote, the Sun, from whence the Authority of Bishops is derived. But by the Law of Nature (which is a better Principle of Right and Wrong, than the word of any Doctor that is but a man) the Civill Sovereign in every Commonwealth, is the Head, the Source, the Root, and the Sun, from which all Jurisdiction

is derived. And therefore, the Jurisdiction of Bishops, is derived from the Civill Sovereign.

The fourth, is taken from the Inequality of their Jurisdictions: For if God (saith he) had given it them immediately, he had given aswell Equality of Jurisdiction, as of Order: But wee see, some are Bishops but of own Town, some of a hundred Towns, and some of many whole Provinces; which differences were not determined by the command of God; their Jurisdiction therefore is not of God, but of Man; and one has a greater, another a lesse, as it pleaseth the Prince of the Church. Which argument, if he had proved before, that the Pope had had an Universall Jurisdiction over all Christians, had been for his purpose. But seeing that hath not been proved, and that it is notoriously known, the large Jurisdiction of the Pope was given him by those that had it, that is, by the Emperours of Rome, (for the Patriarch of Constantinople, upon the same title, namely, of being Bishop of the Capitall City of the Empire, and Seat of the Emperour, claimed to be equal to him,) it followeth, that all other Bishops have their Jurisdiction from the Sovereigns of the place wherein they exercise the same: And as for that cause they have not their Authority De Jure Divino; so neither hath the Pope his De Jure Divino, except onely where hee is also the Civill Sovereign.

His fift argument is this, "If Bishops have their Jurisdiction immediately from God, the Pope could not take it from them, for he can doe nothing contrary to Gods ordination;" And this consequence is good, and well proved. "But, (saith he) the Pope can do this, and has done it." This also is granted, so he doe it in his own Dominions, or in the Dominions of any other Prince that hath given him that Power; but not universally, in Right of the Popedome: For that power belongeth to every Christian Sovereign, within the bounds of his owne Empire, and is inseparable from the Sovereignty. Before the People of Israel had (by the commandment of God to Samuel) set over themselves a King, after the manner of other Nations, the High Priest had the Civill Government; and none but he could make, nor depose an inferiour Priest: But that Power was afterwards in the King, as may be proved by this same argument of Bellarmine; For if the Priest (be he

the High Priest or any other) had his Jurisdiction immediately from God, then the King could not take it from him; “for he could do nothing contrary to Gods ordinance: But it is certain, that King Solomon (1 Kings 2.26.) deprived Abiathar the High Priest of his office, and placed Zadok (verse 35.) in his room. Kings therefore may in the like manner Ordaine, and Deprive Bishops, as they shall thinke fit, for the well governing of their Subjects.

His sixth argument is this, If Bishops have their Jurisdiction De Jure Divino (that is, immediately from God,) they that maintaine it, should bring some Word of God to prove it: But they can bring none. The argument is good; I have therefore nothing to say against it. But it is an argument no lesse good, to prove the Pope himself to have no Jurisdiction in the Dominion of any other Prince.

Lastly, hee bringeth for argument, the testimony of two Popes, Innocent, and Leo; and I doubt not but hee might have alledged, with as good reason, the testimonies of all the Popes almost since S. Peter: For considering the love of Power naturally implanted in mankind, whosoever were made Pope, he would be tempted to uphold the same opinion. Neverthelesse, they should therein but doe, as Innocent, and Leo did, bear witness of themselves, and therefore their witness should not be good.

Of The Popes Temporall Power

In the fift Book he hath four Conclusions. The first is, “That the Pope is not Lord of all the world:” the second, “that the Pope is not Lord of all the Christian world:” The third, “That the Pope (without his owne Territory) has not any Temporall Jurisdiction DIRECTLY:” These three Conclusions are easily granted. The fourth is, “That the Pope has (in the Dominions of other Princes) the Supreme Temporall Power INDIRECTLY:” which is denied; unlesse he mean by Indirectly, that he has gotten it by Indirect means; then is that also granted. But I understand, that when he saith he hath it Indirectly, he means, that such Temporall

Jurisdiction belongeth to him of Right, but that this Right is but a Consequence of his Pastorall Authority, the which he could not exercise, unlesse he have the other with it: And therefore to the Pastorall Power (which he calls Spirituall) the Supreme Power Civill is necessarily annexed; and that thereby hee hath a Right to change Kingdomes, giving them to one, and taking them from another, when he shall think it conduces to the Salvation of Souls.

Before I come to consider the Arguments by which hee would prove this doctrine, it will not bee amisse to lay open the Consequences of it; that Princes, and States, that have the Civill Sovereignty in their severall Common-wealths, may bethink themselves, whether it bee convenient for them, and conducing to the good of their Subjects, of whom they are to give an account at the day of Judgment, to admit the same.

When it is said, the Pope hath not (in the Territories of other States) the Supreme Civill Power Directly; we are to understand, he doth not challenge it, as other Civill Sovereigns doe, from the originall submission thereto of those that are to be governed. For it is evident, and has already been sufficiently in this Treatise demonstrated, that the Right of all Sovereigns, is derived originally from the consent of every one of those that are to bee governed; whether they that choose him, doe it for their common defence against an Enemy, as when they agree amongst themselves to appoint a Man, or an Assembly of men to protect them; or whether they doe it, to save their lives, by submission to a conquering Enemy. The Pope therefore, when he disclaimeth the Supreme Civill Power over other States Directly, denyeth no more, but that his Right cometh to him by that way; He ceaseth not for all that, to claime it another way; and that is, (without the consent of them that are to be governed) by a Right given him by God, (which hee calleth Indirectly,) in his Assumption to the Papacy. But by what way soever he pretend, the Power is the same; and he may (if it bee granted to be his Right) depose Princes and States, as often as it is for the Salvation of Soules, that is, as often as he will; for he claimeth also the Sole Power to Judge, whether it be to the salvation of mens Souls, or not. And this is the Doctrine, not onely that

Bellarmino here, and many other Doctors teach in their Sermons and Books, but also that some Councells have decreed, and the Popes have decreed, and the Popes have accordingly, when the occasion hath served them, put in practise. For the fourth Councell of Lateran held under Pope Innocent the third, (in the third Chap. De Haereticis,) hath this Canon. “If a King at the Popes admonition, doe not purge his Kingdome of Haereticques, and being Excommunicate for the same, make not satisfaction within a year, his subjects are absolved of their Obedience.” And the practise hereof hath been seen on divers occasions; as in the Deposing of Chilperique, King of France; in the Translation of the Roman Empire to Charlemaine; in the Oppression of John King of England; in Transferring the Kingdome of Navarre; and of late years, in the League against Henry the third of France, and in many more occurrences. I think there be few Princes that consider not this as Injust, and Inconvenient; but I wish they would all resolve to be Kings, or Subjects. Men cannot serve two Masters: They ought therefore to ease them, either by holding the Reins of Government wholly in their own hands; or by wholly delivering them into the hands of the Pope; that such men as are willing to be obedient, may be protected in their obedience. For this distinction of Temporall, and Spirituall Power is but words. Power is as really divided, and as dangerously to all purposes, by sharing with another Indirect Power, as with a Direct one. But to come now to his Arguments.

The first is this, “The Civill Power is subject to the Spirituall: Therefore he that hath the Supreme Power Spirituall, hath right to command Temporall Princes, and dispose of their Temporalls in order to the Spirituall. As for the distinction of Temporall, and Spirituall, let us consider in what sense it may be said intelligibly, that the Temporall, or Civill Power is subject to the Spirituall. There be but two ways that those words can be made sense. For when wee say, one Power is subject to another Power, the meaning either is, that he which hath the one, is subject to him that hath the other; or that the one Power is to the other, as the means to the end. For wee cannot understand, that one Power hath Power over another Power; and that one Power can have Right or Command over another: For Subjection,

Command, Right, and Power are accidents, not of Powers, but of Persons: One Power may be subordinate to another, as the art of a Sadler, to the art of a Rider. If then it be granted, that the Civill Government be ordained as a means to bring us to a Spirituall felicity; yet it does not follow, that if a King have the Civill Power, and the Pope the Spirituall, that therefore the King is bound to obey the Pope, more then every Sadler is bound to obey every Rider. Therefore as from Subordination of an Art, cannot be inferred the Subjection of the Professor; so from the Subordination of a Government, cannot be inferred the Subjection of the Governor. When therefore he saith, the Civill Power is Subject to the Spirituall, his meaning is, that the Civill Sovereign, is Subject to the Spirituall Sovereign. And the Argument stands thus, “The Civil Sovereign, is subject to the Spirituall; Therefore the Spirituall Prince may command Temporall Princes.” Where the conclusion is the same, with the Antecedent he should have proved. But to prove it, he alledgeth first, this reason, “Kings and Popes, Clergy and Laity make but one Common-wealth; that is to say, but one Church: And in all Bodies the Members depend one upon another: But things Spirituall depend not of things Temporall: Therefore, Temporall depend on Spirituall. And therefore are Subject to them.” In which Argumentation there be two grosse errors: one is, that all Christian Kings, Popes, Clergy, and all other Christian men, make but one Common-wealth: For it is evident that France is one Common-wealth, Spain another, and Venice a third, &c. And these consist of Christians; and therefore also are severall Bodies of Christians; that is to say, severall Churches: And their severall Sovereigns Represent them, whereby they are capable of commanding and obeying, of doing and suffering, as a natural man; which no Generall or Universall Church is, till it have a Representant; which it hath not on Earth: for if it had, there is no doubt but that all Christendome were one Common-wealth, whose Sovereign were that Representant, both in things Spirituall and Temporall: And the Pope, to make himself this Representant, wanteth three things that our Saviour hath not given him, to Command, and to Judge, and to Punish, otherwise than (by Excommunication) to run from those that will not Learn of him: For

though the Pope were Christs onely Vicar, yet he cannot exercise his government, till our Saviours second coming: And then also it is not the Pope, but St. Peter himselfe, with the other Apostles, that are to be Judges of the world.

The other error in this his first Argument is, that he sayes, the Members of every Common-wealth, as of a naturall Body, depend one of another: It is true, they cohaere together; but they depend onely on the Sovereign, which is the Soul of the Common-wealth; which failing, the Common-wealth is dissolved into a Civill war, no one man so much as cohaering to another, for want of a common Dependance on a known Sovereign; Just as the Members of the naturall Body dissolve into Earth, for want of a Soul to hold them together. Therefore there is nothing in this similitude, from whence to inferre a dependance of the Laity on the Clergy, or of the Temporall Officers on the Spirituall; but of both on the Civill Sovereign; which ought indeed to direct his Civill commands to the Salvation of Souls; but is not therefore subject to any but God himselfe. And thus you see the laboured fallacy of the first Argument, to deceive such men as distinguish not between the Subordination of Actions in the way to the End; and the Subjection of Persons one to another in the administration of the Means. For to every End, the Means are determined by Nature, or by God himselfe supernaturally: but the Power to make men use the Means, is in every nation resigned (by the Law of Nature, which forbiddeth men to violate their Faith given) to the Civill Sovereign.

His second Argument is this, "Every Common-wealth, (because it is supposed to be perfect and sufficient in it self,) may command any other Common-wealth, not subject to it, and force it to change the administration of the Government, nay depose the Prince, and set another in his room, if it cannot otherwise defend it selfe against the injuries he goes about to doe them: much more may a Spirituall Common-wealth command a Temporall one to change the administration of their Government, and may depose Princes, and institute others, when they cannot otherwise defend the Spirituall Good."

That a Common-wealth, to defend it selfe against injuries, may lawfully doe all that he hath here said, is very true; and hath already in that which hath gone

before been sufficiently demonstrated. And if it were also true, that there is now in this world a Spirituall Common-wealth, distinct from a Civill Common-wealth, then might the Prince thereof, upon injury done him, or upon want of caution that injury be not done him in time to come, repaire, and secure himself by Warre; which is in summe, deposing, killing, or subduing, or doing any act of Hostility. But by the same reason, it would be no lesse lawfull for a Civill Sovereign, upon the like injuries done, or feared, to make warre upon the Spirituall Sovereign; which I beleieve is more than Cardinall Bellarmine would have inferred from his own proposition.

But Spirituall Common-wealth there is none in this world: for it is the same thing with the Kingdome of Christ; which he himselfe saith, is not of this world; but shall be in the next world, at the Resurrection, when they that have lived justly, and beleaved that he was the Christ, shall (though they died Naturall bodies) rise Spirituall bodies; and then it is, that our Saviour shall judge the world, and conquer his Adversaries, and make a Spirituall Common-wealth. In the mean time, seeing there are no men on earth, whose bodies are Spirituall; there can be no Spirituall Common-wealth amongst men that are yet in the flesh; unlesse wee call Preachers, that have Commission to Teach, and prepare men for their reception into the Kingdome of Christ at the Resurrection, a Common-wealth; which I have proved to bee none.

The third Argument is this; "It is not lawfull for Christians to tolerate an Infidel, or Haereticall King, in case he endeavour to draw them to his Haeresie, or Infidelity. But to judge whether a King draw his subjects to Haeresie, or not, belongeth to the Pope. Therefore hath the Pope Right, to determine whether the Prince be to be deposed, or not deposed."

To this I answer, that both these assertions are false. For Christians, (or men of what Religion soever,) if they tolerate not their King, whatsoever law hee maketh, though it bee concerning Religion, doe violate their faith, contrary to the Divine Law, both Naturall and Positive: Nor is there any Judge of Haeresie amongst Subjects, but their own Civill Sovereign; for "Haeresie is nothing else, but a

private opinion, obstinately maintained, contrary to the opinion which the Publique Person (that is to say, the Representant of the Common-wealth) hath commanded to bee taught.” By which it is manifest, that an opinion publicquely appointed to bee taught, cannot be Haeresie; nor the Sovereign Princes that authorize them, Haeretiques. For Haeretiques are none but private men, that stubbornly defend some Doctrine, prohibited by their lawful Sovereigns.

But to prove that Christians are not to tolerate Infidell, or Haereticall Kings, he alledgeth a place in Deut. 17. where God forbiddeth the Jews, when they shall set a King over themselves, to choose a stranger; And from thence inferreth, that it is unlawfull for a Christian, to choose a King, that is not a Christian. And ’tis true, that he that is a Christian, that is, hee that hath already obliged himself to receive our Saviour when he shall come, for his King, shal tempt God too much in choosing for King in this world, one that hee knoweth will endeavour, both by terrour, and perswasion to make him violate his faith. But, it is (saith hee) the same danger, to choose one that is not a Christian, for King, and not to depose him, when hee is chosen. To this I say, the question is not of the danger of not deposing; but of the Justice of deposing him. To choose him, may in some cases bee unjust; but to depose him, when he is chosen, is in no case Just. For it is alwaies violation of faith, and consequently against the Law of Nature, which is the eternal Law of God. Nor doe wee read, that any such Doctrine was accounted Christian in the time of the Apostles; nor in the time of the Romane Emperours, till the Popes had the Civill Sovereignty of Rome. But to this he hath replied, that the Christians of old, deposed not Nero, nor Diocletian, nor Julian, nor Valens an Arrian, for this cause onely, that they wanted Temporall forces. Perhaps so. But did our Saviour, who for calling for, might have had twelve Legions of immortall, invulnerable Angels to assist him, want forces to depose Caesar, or at least Pilate, that unjustly, without finding fault in him, delivered him to the Jews to bee crucified? Or if the Apostles wanted Temporall forces to depose Nero, was it therefore necessary for them in their Epistles to the new made Christians, to teach them, (as they did) to obey the Powers constituted over them, (whereof Nero in

that time was one,) and that they ought to obey them, not for fear of their wrath, but for conscience sake? Shall we say they did not onely obey, but also teach what they meant not, for want of strength? It is not therefore for want of strength, but for conscience sake, that Christians are to tolerate their Heathen Princes, or Princes (for I cannot call any one whose Doctrine is the Publique Doctrine, an Haeretique) that authorize the teaching of an Errour. And whereas for the Temporall Power of the Pope, he alledgeth further, that St. Paul (1 Cor. 6.) appointed Judges under the Heathen Princes of those times, such as were not ordained by those Princes; it is not true. For St. Paul does but advise them, to take some of their Brethren to compound their differences, as Arbitrators, rather than to goe to law one with another before the Heathen Judges; which is a wholesome Precept, and full of Charity, fit to bee practised also in the Best Christian Common-wealths. And for the danger that may arise to Religion, by the Subjects tolerating of an Heathen, or an Erring Prince, it is a point, of which a Subject is no competent Judge; or if hee bee, the Popes Temporall Subjects may judge also of the Popes Doctrine. For every Christian Prince, as I have formerly proved, is no lesse Supreme Pastor of his own Subjects, than the Pope of his.

The fourth Argument, is taken from the Baptisme of Kings; wherein, that they may be made Christians they submit their Scepters to Christ; and promise to keep, and defend the Christian Faith. This is true; for Christian Kings are no more but Christs Subjects: but they may, for all that, bee the Popes Fellowes; for they are Supreme Pastors of their own Subjects; and the Pope is no more but King, and Pastor, even in Rome it selfe.

The fifth Argument, is drawn from the words spoken by our Saviour, Feed My Sheep; by which was give all Power necessary for a Pastor; as the Power to chase away Wolves, such as are Haeretiques; the Power to shut up Rammes, if they be mad, or push at the other Sheep with their Hornes, such as are Evill (though Christian) Kings; and Power to give the Flock convenient food: From whence hee inferreth, that St. Peter had these three Powers given him by Christ. To which I answer, that the last of these Powers, is no more than the Power, or rather

Command to Teach. For the first, which is to chase away Wolves, that is, Haeretiques, the place hee quoteth is (Matth. 7.15.) “Beware of false Prophets which come to you in Sheeps clothing, but inwardly are ravening Wolves.” But neither are Haeretiques false Prophets, or at all Prophets: nor (admitting Haeretiques for the Wolves there meant,) were the Apostles commanded to kill them, or if they were Kings, to depose them; but to beware of, fly, and avoid them: nor was it to St. Peter, nor to any of the Apostles, but to the multitude of the Jews that followed him into the mountain, men for the most part not yet converted, that hee gave this Counsell, to Beware of false Prophets: which therefore if it conferre a Power of chasing away Kings, was given, not onely to private men; but to men that were not at all Christians. And as to the Power of Separating, and Shutting up of furious Rammes, (by which hee meaneth Christian Kings that refuse to submit themselves to the Roman Pastor,) our Saviour refused to take upon him that Power in this world himself, but advised to let the Corn and Tares grow up together till the day of Judgment: much lesse did hee give it to St. Peter, or can S. Peter give it to the Popes. St. Peter, and all other Pastors, are bidden to esteem those Christians that disobey the Church, that is, (that disobey the Christian Sovereigne) as Heathen men, and as Publicans. Seeing then men challenge to the Pope no authority over Heathen Princes, they ought to challenge none over those that are to bee esteemed as Heathen.

But from the Power to Teach onely, hee inferreth also a Coercive Power in the Pope, over Kings. The Pastor (saith he) must give his flock convenient food: Therefore the Pope may, and ought to compell Kings to doe their duty. Out of which it followeth, that the Pope, as Pastor of Christian men, is King of Kings: which all Christian Kings ought indeed either to Confesse, or else they ought to take upon themselves the Supreme Pastorall Charge, every one in his own Dominion.

His sixth, and last Argument, is from Examples. To which I answer, first, that Examples prove nothing; Secondly, that the Examples he alledgeth make not so much as a probability of Right. The fact of Jehoiada, in Killing Athaliah (2 Kings

11.) was either by the Authority of King Joash, or it was a horrible Crime in the High Priest, which (ever after the election of King Saul) was a mere Subject. The fact of St. Ambrose, in Excommunicating Theodosius the Emperour, (if it were true hee did so,) was a Capitall Crime. And for the Popes, Gregory 1. Greg. 2. Zachary, and Leo 3. their Judgments are void, as given in their own Cause; and the Acts done by them conformably to this Doctrine, are the greatest Crimes (especially that of Zachary) that are incident to Humane Nature. And thus much of Power Ecclesiasticall; wherein I had been more briefe, forbearing to examine these Arguments of Bellarmine, if they had been his, as a Private man, and not as the Champion of the Papacy, against all other Christian Princes, and States.

CHAPTER XLIII. OF WHAT IS NECESSARY FOR A MANS RECEPTION INTO THE

KINGDOME OF HEAVEN.

The Difficulty Of Obeying God And Man Both At Once

The most frequent praetext of Sedition, and Civill Warre, in Christian Commonwealths hath a long time proceeded from a difficulty, not yet sufficiently resolved, of obeying at once, both God, and Man, then when their Commandements are one contrary to the other. It is manifest enough, that when a man receiveth two contrary Commands, and knows that one of them is Gods, he ought to obey that, and not the other, though it be the command even of his lawfull Sovereign (whether a Monarch, or a Sovereign Assembly,) or the command of his Father. The difficulty therefore consisteth in this, that men when they are commanded in the name of God, know not in divers Cases, whether the command be from God, or whether he that commandeth, doe but abuse Gods name for some private ends of his own. For as there ware in the Church of the Jews, many false Prophets, that sought reputation with the people, by feigned Dreams, and Visions; so there have been in all times in the Church of Christ, false Teachers, that seek reputation with the people, by phantasticall and false Doctrines; and by such reputation (as is the nature of Ambition,) to govern them for their private benefit.

Is None To Them That Distinguish Between What Is, And What Is Not

Necessary To Salvation
